[See NAṢĀRĀ.]

NAṢRIDS, Ar. BANŪ NAṢR, also sometimes called BANU 'L-AḤMAR, a Muslim dynasty which ruled over the kingdom of Granada in the north of Spain from 629 to 897 A. H. (1231—1491).

While, thanks to the narratives of the contemporary Ibn al-Khaṭīb [q. v.] and Ibn Khaldūn [q. v.], we are very well informed about the history of the kingdom of the Naṣrids down to the second half of the xivth century, we have for the later period only a very few sources available in Arabic — and it is not always easy to fill the gaps from Christian sources —: a few pages of al-Maḥḥārī's *Nafḥ al-Ṭib* and the short anonymous chronicle published in 1863 by Müller.

We give below a chronological list of the Naṣrids; when a date A. D. is not preceded by its equivalent A. H., this is because it is not given either by Muslim historians or Arabic inscriptions.

1. Abū 'Abd Allāh Muḥammad I *al-Ghālīb bi'llāh*: 629—671 (1232—1273).
2. Abū 'Abd Allāh Muḥammad II *al-Faḥīh*: 671—701 (1273—1302).
3. Abū 'Abd Allāh Muḥammad III *al-Maḥlū'*: 701—708 (1302—1309).
4. Abū 'l-Djuyūsh Naṣr: 708—713 (1309—1314).
5. Abū 'l-Walid Ismā'il I: 713—725 (1314—1325).
6. Abū 'Abd Allāh Muḥammad IV: 725—733 (1325—1333).
7. Abū 'l-Ḥadjjādī Yūsuf I *al-Mu'ayyad bi'llāh*: 733—755 (1333—1354).
8. Abū 'Abd Allāh Muḥammad V *al-Ghānī bi'llāh*: 1^o. 755—760 (1354—1359); 2^o. 763—793 (1362—1391).
9. Abū 'l-Walid Ismā'il II: 760—761 (1359—1360).
10. Abū 'Abd Allāh Muḥammad VI: 761—763 (1360—1362).
11. Abū 'l-Ḥadjjādī Yūsuf II *al-Mustaḥsin bi'llāh*: 793—794 (1391—1392).

12. Abū 'Abd Allāh Muḥammad VII: 794—810 (1392—1408).

13. Abū 'l-Ḥadjjādī Yūsuf III *al-Nāṣir li-Dīni'llāh*: 810—820 (1408—1417).

14. Abū 'Abd Allāh Muḥammad VIII (*al-Aisar*): 1^o. 1417—1427; 2^o. 1429—1432; 3^o. 1432—1445.

15. Abū 'Abd Allāh Muḥammad IX (*al-Ṣaḥīr*): 1427—1429.

16. Abū 'l-Ḥadjjādī Yūsuf IV: 1432.

17. Abū 'Abd Allāh Muḥammad X (*al-Aḥnaf*): 1445—1455.

18. Abū 'l-Naṣr Sa'd *al-Musta'in bi'llāh*: (1455—1465).

19. Abū 'l-Ḥasan 'Alī: 1465—1482.

20. Abū 'Abd Allāh Muḥammad XI (Boabdil): 1^o. 887—888 (1482—1483); 2^o. 892—897 (1487—1491).

21. Abū 'Abd Allāh Muḥammad XII (*al-Zaghāl*): 888—892 (1483—1487).

I. Foundation of the Naṣrid kingdom. At the time when the power of the Almohads was beginning to collapse in Spain, two influential families, the Banū Mardaniṣh in Valencia [q. v.] and the Banū Hūd in Murcia [q. v.], took advantage of the civil strife to form for themselves little principalities in the east of the Peninsula. At the same time a member of the Arab family of the Banu 'l-Aḥmar, settled in Arjona, a little town some 20 miles north of Jaen, who traced their descent from the chief of the Banū Khazraḍj, Sa'd b. 'Ubāda, also tried his fortune at profiting by the troubled times. He was Muḥammad b. Yūsuf b. Aḥmad b. Naṣr and was known as al-Shaikh. In 629 (1231) he found a few supporters to proclaim him; these were mainly members of his own family and of another, related to it, the Banū Ashkilūla. The towns of Jaen, Guadix and Baza rallied in the following year to his standard. After various exploits the details of which are somewhat obscure, Muḥammad I, ancestor and founder of the dynasty of the Naṣrids, took Granada, in 635 (1237—1238) and made this town his capital. He soon decided to build a royal residence on the famous hill of the Alhambra ([q. v.]; al-Ḥamrā' or Ḥamrā' Gharnāta). In the course of the following year, he made himself lord successively of Malaga and Almeria. The little town of Lorca did not come under his sway until 663 (1264—1265). Hitherto Muḥammad I had had to employ all his forces to fight against his Muslim rivals and in order to have his hands free he declared himself the vassal of Ferdinand I, king of Castille (1217—1252) to whom he undertook to pay a considerable annual tribute. He had to take part with his overlord in the capture of Seville from the Muslims in 1248 and be a passive witness of the triumphs of the armies of the king of Castille in the south of Spain. When on the death of Ferdinand I, Alfonso X succeeded him, Muḥammad I had to renew his oath of vassalage to the latter. His kingdom, "the kingdom of Granada", was now the only area in the Peninsula ruled by a Muslim prince; bounded by the Mediterranean from the Straits of Gibraltar to Almeria, this kingdom did not go farther inland than the mountains of the Serrania de Ronda and the Sierra d'Elvira.

II. The Naṣrid kingdom in the xivth century. — Muḥammad I died in 671 (1273) and was succeeded by his son Muḥammad II, called al-Faḥīh, who on his accession sought an

alliance with the Marinids who were finally putting an end to Almohad rule in Morocco. The Marinids answered his appeal. On coming to the throne Muḥammad II had found himself faced with the necessity of putting down threatening rebellions; the most serious was that of the Banū *Ashkilūla*, governors of Malaga and Guadix. He was able to rout the rebels near Antequera, with the help of forces sent him by the Infante Don Philip and Don Nuño de Lara. On the other hand, he soon realised that the king of Castille, his suzerain, had every interest in letting the kingdom of Granada exhaust itself in internal strife. This is why the Naṣrid turned to the Marinids. In consideration for the return of Algeciras [q.v.] and Tarifa [q.v.], the sultān of Fās Abū Yūsuf Yaʿqūb b. ʿAbd al-Ḥakḥ agreed to cross into Spain where he inflicted two defeats on the Castillian troops. The chroniclers of the Marinid dynasty record the four expeditions of the king of Fās into Spain and give details of the loss of Tarifa which the Spanish leader Alonso Perez de Guzman, celebrated in legend as Guzman el Bueno, was to defend heroically a little later, in 1293. But it is from this time that the permanent intervention of the sultāns of Fās in the affairs of the Naṣrids of Granada dates; under pretence of a *ḡiḥād* they were able at every opportunity to add to the confusion of a political situation already much troubled and to weigh heavily upon the destinies of the Naṣrid throne by playing a game of alliances which were often broken as readily as they were made. The kings of Granada henceforth were to have at their side a regular body of Moroccan soldiers, the *ghuzāt* (sing. *ghāzī*) under the command of a Marinid *shaikh*, consisting of adventurers of fortunes who had become more or less undesirable in their native land.

When he died in 701 (1302) Muḥammad II was succeeded by his son Muḥammad III who was later to be known as al-Makhlūf (the deposed). It was he who built the great mosque of the Alhambra. He had to put down risings by the governors of Guadix and Almeria but had to bow before the rising of a prince of his family, Abū ʿI-Djuyūsh Naṣr b. Muḥammad, who assumed the power in 708 (1309). Muḥammad III abdicated and withdrew to Almuñecar [q.v.].

Naṣr's reign was hardly any longer or happier than that of his predecessor. After a display of energy by which he forced the king of Aragon to raise the siege of Almeria and the king of Castille to raise the siege of Algeciras, he failed against a conspiracy hatched by a Naṣrid prince Ismāʿīl, who seized the power in Granada and left only the town of Guadix to Naṣr. The latter established himself here in 713 (1314) and stayed there till his death in 722 (1322).

The fifth Naṣrid ruler, Abū ʿI-Walīd Ismāʿīl I b. Faradj b. Ismāʿīl b. Yūsuf b. Naṣr, was one of the most remarkable members of the dynasty. As soon as he had assumed the power, he showed a certain strength of character and did his best to put his frontiers in a state of defence. He regained for a time the old Naṣrid lands which had passed to the Marinids: Algeciras, Tarifa and Ronda. In 719 (1319) he had to meet an offensive from Castille and with the help of the *Shaikh* al-*Ghuzāt*, Abū Saʿīd ʿUṭhmān b. Abi ʿI-ʿUlā al-Marīni, he inflicted heavy defeats on his enemies at Alicum and in the Sierra d'Elvira. In this last battle the Infantes Don Juan and Don Pedro, guardians of

king Alfonso XI, were killed. Soon afterwards, Ismāʿīl I regained the fortresses of Huescar, Orce and Galera, then that of Baza. In the following year he took Martos. In 725 (1325) he was assassinated in his palace at the instigation of one of his relations with whom he had quarrelled, the lord of Algeciras Muḥammad b. Ismāʿīl. He left four sons of whom the eldest, Muḥammad, succeeded him on the throne of Granada.

Muḥammad IV was still a minor on his accession and remained for several years under the strict guardianship of his ministers, notably of the vizier Muḥammad Ibn al-Maḥrūk. The latter, after a long struggle with the *Shaikh* al-*Ghuzāt* Ibn Abi ʿI-ʿUlā, was finally put to death by orders of his sovereign who then took the reins of power into his own hands. The remainder of his reign was continually troubled. The help which he sought from the Marinid Sultān Abū ʿI-Ḥasan ʿAlī against the Christians earned him the enmity of the family of the Banū Abi ʿI-ʿUlā. In succession he lost Ronda, Algeciras, Marbella and Gibraltar and was ultimately assassinated in 733 (1333).

His brother Abū ʿI-Ḥadjdjādī Yūsuf I b. Ismāʿīl succeeded him and reigned for a considerable period. His first care was to avenge his brother by expelling from his kingdom the Banū Abi ʿI-ʿUlā who took refuge in Tunis and in giving the office of *Shaikh* al-*Ghuzāt* to a Marinid lord, Yaḥyā b. ʿUmar Ibn Raḥḥō. The struggle with the Christians was resumed in his reign. He sought and obtained the help of the Marinid Abū ʿI-Ḥasan, who crossed the Straits of Gibraltar in 741 (1340) with a large force and laid siege to Tarifa. This expedition ended disastrously. The king of Castille, Alfonso XI, with his army and that of the king of Portugal inflicted a sanguinary defeat on the Muslims near the mouth of the Río Salado, on the 7th *Djuma* I 741 (Oct. 30, 1340). Abū ʿI-Ḥasan had to take refuge in Algeciras, whence he was able to reach Morocco. Yūsuf I returned with all speed to Granada, while Alfonso XI profiting by the confusion of the Muslims seized Alcalá la Real, Priego and Benameji. After taking Algeciras he granted the Naṣrid king a truce of ten years, at the end of which he laid siege to Gibraltar. Alfonso XI however died of the plague during the siege. Yūsuf I himself was assassinated by a madman in the great mosque of Granada on the day of the feast of the "Breaking of the Fast" of 755 (Oct. 19, 1354). This Sultān's name will always be associated with certain monuments of the Alhambra. It was he for example who built the great gateway of the enceinte, called *Bāb al-Sharīʿa* (gate of the Esplanade; commonly called wrongly "gate of Justice", in Spanish "Puerta Judicaria" or "de la Justicia") the inscription on which records that it was finished in Rabiʿ I 749 (June 1348; cf. my *Inscriptions arabes d'Espagne*, N^o. 171). It was also Yūsuf I who in 750 (1349) built the madrasa of Granada (*ibid.*, N^o. 172).

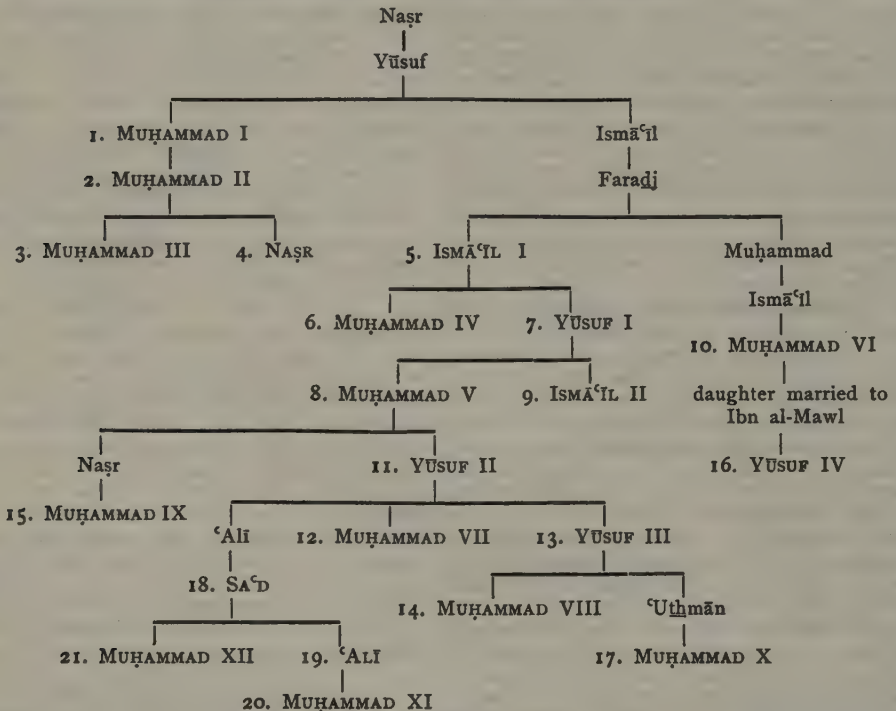

His successor was his eldest son Muḥammad V, who bore the honorific *laḥab* of al-*Ghanī* bi-ʿllāh. This sultān left the exercise of power in the hands of his father's old minister, the ḥadjīb [q.v.] Riḍwān, who maintained peaceful relations with Castille. After a few years, a conspiracy of dissatisfied Naṣrid princes forced Muḥammad V to abdicate and take refuge in Guadix, and afterwards in Morocco where he was well received by the Marinid sultān Abū Sālim (760 = 1359).

Ismā'il II b. Yūsuf I, brother of Muḥammad V, a Našrid prince devoid of personality and prestige, was put on the throne, but only for a few months. In 761 (1360) he was assassinated at the instigation of the *ra'īs* Muḥammad VI b. Ismā'il b. Našr, who seized the power; his troops soon afterwards suffered a defeat at the hands of the Christians at Guadix. He was soon overthrown by Muḥammad V who had returned to Spain and asked the help of Peter the Cruel of Castille to recover the throne. Muḥammad VI also appealed to the Christian ruler but the latter had him put to death in 763 (1362).

Muḥammad V's second reign lasted for good or evil another 30 years. It was mainly occupied by family quarrels and civil strife. It was at this time that the famous vizier Lisān al-Dīn Ibn al-Khaṭīb had to seek refuge in Morocco, which however did not save him from assassination. It

(1392) and the throne passed to his son Muḥammad VII. The latter imprisoned his elder brother Yūsuf in the fortress of Salobreña and resumed the offensive against the Christians, who took the fortress of Zahara from him in 809 (1407). When he died next year his elder brother Yūsuf III, the prisoner of Salobreña, assumed power and held it till his death in 820 (1417). After him his eldest son Muḥammad VIII became king of Granada; he is usually called by the chroniclers *al-Aisar* ("the left-handed"). It was in his reign, also much troubled, that we find the family of the Banu 'l-Sarrādj, the Abencerages [q. v.] and that of the Zegrī (Arabic *thaghrī*: "man of the frontier") beginning to play an important part in the history of Granada and the civil wars which characterise it. After various adventures, Muḥammad VIII had to abandon his

GENEALOGICAL TABLE OF THE NAŠRID SULTĀNS.

Ponce de Leon and the Duke of Medina Sidonia. Archidona also fell to the Christians. In the reign of his successor Abu 'l-Hasan 'Alī, the Christian offensive, with the accession of the Reyes Católicos, Ferdinand of Aragon and Isabella of Castille, developed an extent and energy which it had rarely displayed previously. The second last Naşrid king Muḥammad XI, generally known in history as Boabdil (a corruption of his *kunya* Abi 'Abd Allāh), was forced to declare himself the vassal of the Reyes Católicos and the last Muḥammad XII called al-Zaghall ("the brave") in spite of initial successes at the siege of Loja (1482) and the battle of al-Sharḳiya (1483), had no alternative but to bow to the triumph of the Castilian armies, and withdrew when the situation became hopeless to his estates of Alpujarra [q. v.]. Loja (1486), Velez-Málaga, Málaga and Almería (1487), Baza (1489) fell in succession. There was nothing left for Granada but to open its gates to the conquerors who entered it on 2nd Rabi' I, 897 (Jan. 1492). Muḥammad XI became an exile in Morocco where he ended his days in poverty and misery.

(E. LÉVI-PROVENÇAL)

NAŞŞ (A.), etymologically: what is apparent to the eye, as a technical term: text. In this sense the word does not occur in the Qur'an nor in the *Ḥadīth*. Al-Shāfi'ī, on the other hand, appears to be acquainted with it. In his *Risāla* he uses it chiefly in the sense of *naşş kitābīn* (p. 7, 16, 30, 41) or *naşş hukmīn* (p. 5) "what has been laid down in the Qur'an". In other passages *naşş al-kitāb* is distinguished from *sunna* (p. 21, 4, infra, 24, 7, paen., 30, 21, 63, 21). The combination *naşş sunna* occurs, however, also (p. 50, 14, 66, 2). From these passages it may also appear that al-Shāfi'ī uses the term chiefly to denote legal precepts. In accordance with this is the definition of the term as given in the *Lisān al-'Arab*: "the *naşş* of the Qur'an or of the *sunna* means the precepts (*ahkām*) contained in the plain words (*ḡāhir*) of these sources".

An extension of the term has taken place chiefly in three directions, so that *naşş*, apart from the general sense of text, may mean: *a.* the text of a precept of the law, written or not written; *b.* the *ḡāhir* [q. v.] of a sacred text; *c.* the sense of such a text. For other special meanings of the term, cf. Dozy, *Suppléments aux dictionnaires arabes*, s. v.

(A. J. WENSINCK)

NASSADS were the light wooden warships built in Nassau or Hohenau (Lower Austria), the "Nassauer" or "Hohenauer", Magyar *nassád*, pl. *nassádok*, Slav. *nasad*, which were used on the Danube. They were usually manned by Serbian seamen who were called *martaloses* (from the Magyar *martalóc*, *martalós*, lit. "robber"). According to a Florentine account, this Danube flotilla in 1475 consisted of 330 ships manned by 10,000 "nassadists" armed with lances, shields, crossbow or bow and arrow, more rarely with muskets. The larger ships had also cannon. About 1522 the commander of the Danube fleet was Radić Božić who reorganised it at Peterwardein (cf. K. J. Jireček, *Geschichte der Serben*, II/i. 258 sq.). Through want of money, the Serbian seamen then deserted to the Turks (*ibid.*, p. 262) who after the fall of Belgrade seized the Danube fleet and developed it into a powerful arm. About 1530 the Danube fleet consisted of 800 nassads and was commanded by the woiwod Kāsīm (cf. J. v. Hammer, *G. O. R.*, iii. 85).

(FRANZ BABINGER)

NASTA'LĪK. [See ARABIA, i. 391^b.]

NAŞUH PASHA, an Ottoman grand vizier, was of Christian descent and was born either in Gümüldjina (the modern Komotini, Thrace, Greece) or in Drama. According to some sources (e. g. Baudier and Grimestone in Knolles), he was the son of a Greek priest, according to others (e. g. Na'imā, *Tārīkh*, first edition, p. 283: *arnaud*

djins?) of Albanian origin. He came early in life to Stambul, spent two years in the Old Seray as a *teberdār* (halbardier) and left it as a *čaušh*. Through the favour of the sultān's confidant Mehemmed Agha he rapidly attained high office. In quick succession he became woiwod of Zile (Anatolia), master of the horse and governor of Füleke (Hungary). He married the daughter of the Kurdish Mir Šeref and thereby obtained riches as great as his power, which every one was now beginning to fear. His ambition and arrogance, his venality and cruelty knew no bounds and he was even said to be aiming at the throne. In 1015 (1606) he was to conduct the campaign against Persia, as the son-in-law of Mir Šeref and on account of his local knowledge, with the rank of third vizier and ser'asker, but his attention was claimed by the trouble in Anatolia which was affecting the whole of Asia Minor; through Kurd treachery he lost a battle and it was only in the autumn of 1608 that his troops joined the army of the grand vizier who received him very coolly (cf. J. v. Hammer, *G. O. R.*, iv. 412 sq.). In 1011 (1602) Naşūh Pasha had been appointed governor of Siwas, the next year of Ḥalab and in 1015 (1606) of Diyārbakr. His goal was the grand viziership. He did not hesitate to ask the sultān to give him the imperial seal and the post of commander-in-chief in return for a sum of 40,000 ducats and the maintenance of the army at his own expense. Aḥmad I handed on the offer to the grand vizier, who summoned Naşūh Pasha to him and fined him that sum as a punishment (cf. J. v. Hammer, *G. O. R.*, iv. 446 sq.). When soon afterwards the grand vizier, the Croat Kuyudju Murād Pasha died at the age of over 90, Naşūh Pasha became his successor (Aug. 22, 1611). In the following year he married 'Ā'isha, the three year old daughter of Sultān Aḥmad I (Feb. 1612). His arrogance now knew no bounds; all his opponents were ruthlessly disposed of. His personal qualities dazzled everyone: "Of imposing appearance, brave and eloquent, never weary of talk or action, but at the same time passionate, impetuous, quite incapable of kindly conduct and flattering words and always intent on humbling the other viziers" (J. v. Hammer, *G. O. R.*, iv. 472). As human life was nothing to him but wealth everything, he accumulated vast treasures. Sycophants and astrologers nourished in him the delusion that he was born to rule. The number of his enemies increased from day to day as a result of his intrigues and his ruthlessness. When on Friday the 13th Ramaḍān 1023 (Oct. 17, 1614) he was to accompany the Sultān to the mosque, suspecting no good, he said he was ill. The *bostāndji bashī* sent to him had him strangled by his own garden guards. His body was buried on the Oğ Maidān. His estate which fell to the coffers of the state was enormous: pearls, jewels, carpets, cloth and bullion without number (cf. J. v. Hammer, *G. O. R.*, iv. 474 sq. quoting Mezeray, i. 195). — Naşūh Pasha left several sons, one of whom Ḥusain Pasha (d. 1053 [1643]; cf. J. v. Hammer, *G. O. R.*, v. 260 and Ḥādjdjī Khalifa, *Fedhlike*, ii. 226) had a son named Mehmed. The latter wrote a history of the Ottoman empire (*Dheil-i Tawārikh-i Āl-i 'Othmān*) from the death of Murād IV (1048 = 1639) to 1081 (1670) the original MS. of which is in Dresden (cf. F. Babinger, *G. O. W.*, p. 211).

W.*, p. 211, note. — Sources of secondary value are *Sidjill-i 'Othmānī*, iv. 556 and *Ḥādīkat al-Wuzarā'*, p. 59 sqq. (with many errors). — On the rumour that Naşūh Pasha had made an arrangement with the Persians and that the discovery of this treachery caused his death, cf. the contemporary stories mentioned by J. v. Hammer, *G. O. R.*, iv. 474, note, as well as the Paris pamphlet of 1615. (FRANZ BABINGER)

NATĪDJA (A.) is the usual name for the conclusion resulting from the combination of the two premisses (*muḥaddamāt*) in the syllogism (*kiyās*). It corresponds to the Stoic ἐπιφορά; this word in the works of Galen known to the Arabs is applied to the various discharges from the body but also means, as with the Stoics, the conclusion. Aristotle used the word συμπέρασμα: that which concludes or completes the syllogism.

In place of the usual natīdja we also find *ridf* or *radf* (= deduction). (TJ. DE BOER)

NĀṬIK. [See SAB'IVA.]

NAVARINO (Ναβάρινο), a little seaport in the southwest of Messenia not far from the ancient Pylos, opposite the promontory of Koryphasium on which there was in prehistoric times an acropolis and later, during classical antiquity, an often mentioned settlement. The harbour of Navarino is one of the safest in the Greek east for it is sheltered by the island of Sphacteria, which lies right opposite it and has intimate connections with many ancient, medieval and modern events. Recent research has shown that Navarino has no connection with the Homeric Pylos. The latter was in Triphylia near the village of Kakobatos where prehistoric tombs were recently excavated. The derivation of the name Navarino cannot be given with certainty. According to Fallmerayer, *Gesch. der Halbinsel Morea*, i. 188, the name Navarino is a distinct survival of Avar rule in Morea between 587 and 807. On the other hand, Hopf thought that it owed its name to the Navarrese (cf. below). Fallmerayer's view has been adopted by E. Curtius, *Peleponnesos*, i. 86; ii. 181 and W. Miller among others. According to M. Leake, *Travels in the Morea*, i. 411, the name Navarino developed from εἰς τὸν Ἀβαρίνον. Hopf's view is however wrong, for Navarino is mentioned before the appearance of the Genoese in the Morea. In the middle ages the country round Navarino

was called Zonglon (Zonchio), from which came the French name of the place Junch (Old French jonc "rush"). One of the earliest mentions of Navarino is in the geographical treatise, the *Nuzhat al-Mushāʾiq* of Idrisi; he refers to the place as Irouda and adds that it has "a very commodious harbour". After the period of Frankish rule, information about Navarino becomes fuller. The Knights, who under Guillaume de Champlitte and Godefroy de Villeharduin had planned the conquest of the Morea, in 1205 took its inhabitants and governor prisoners after the capitulation of Navarino.

Later the Baron of Thebes and Marshal of Achaia, Nicolas St. Omer (d. 1294), built for his nephew Nicolas III St. Omer, the Neocastro (New Castle) of Navarino. This is said, according to Buchon, to have been called Neo-Avarino in contrast to Palaio-Avarino. At the end of 1381 or early in the next year, the Navarrese company seized Navarino and made it the chief centre of their military power. Navarino then became known as Château Navarres (*Voyage d'Outremer*, par le Seigneur [Nomp] de Caumont, publ. par la Grange, Paris 1858, p. 89). The Greeks however at this time called Navarino Spanochori (= village of the Spaniards, after the Navarrese). In 1417 Venetian soldiers occupied Navarino and six years later the republic of St. Mark became the lawful owner of the place. In the summer of 1460 Sulṭān Muḥammad II appeared before Navarino with an army, which, in spite of the recently concluded peace treaty, laid waste the country round the town. In August 1500 the Turks took Navarino from the Venetians without difficulty after taking Modon and Koron shortly before, although the garrison of Navarino numbered 3,000 soldiers and had provisions for about three years. Soon afterwards the Venetians were able to retake Navarino by a stratagem and to destroy the Muslim garrison. 'Alī Pasha now advanced from the land and Kemāl Re'is attacked with his fleet by sea and in 1501 they took finally Navarino, inflicting great losses on the Venetians. Navarino retained its importance under Turkish rule and was often the place of concentration of the imperial fleet. Ḥādīdī Khālifa and Ewliyā Čelebi give some important information about Navarino and the former says that its original name was Anavarin. In the year 1686 the Venetians again took the town which they held till 1715. The Turks then entered upon their last period of occupation.

During the first Russo-Turkish War in the reign of Catherine II (1768—1774) Navarino played an important part. After a stubborn defence for six days by the Turkish garrison and the Muslim civilian population, the Russians on April 10, 1770 forced the fortress of Navarino, no longer strongly enough fortified but still amply provided with munitions and artillery, to capitulate. By the terms of the treaty, the Turks of Navarino went to Chania (Crete) leaving behind them a number of Christian women whom they had had imprisoned in their harems. Soon afterwards the Russians made Navarino, the fortifications of which they renovated, their principal base of operations in the Morea. Fate decided that the Russians had to evacuate Navarino again. On June 1, 1770, the Russian ships sailed from the harbour of Navarino. The Turks next day occupied the well placed fortress, which was in part burned and destroyed.

During the last decades of Turkish rule in the Morea, the Turkish family of Bekir-Agha of Navarino played a prominent part. Soon after the outbreak of the War of Liberation, the Greeks laid siege on March 29, 1821 to Navarino where the Turks of Arcadia (Cyparisia) had also taken refuge. On Aug. 7, 1821 the Turks surrendered to the Greeks who massacred them all without mercy in spite of all agreements. In the spring of 1825, Ibrāhīm Pasha of Egypt occupied Navarino and the neighbouring fortress in spite of a heroic defence by the Greeks.

What gave Navarino its special place in history was the naval battle fought on Oct. 20, 1827 in its harbour between the combined fleets of England, France and Russia on one side and those of Turkey, Egypt and Tunisia on the other, in which the latter were almost completely destroyed. It is calculated that the Turks lost 6,000 killed and the allied losses were only about 1,000. Soon after the battle, Ibrāhīm Pasha concluded a truce with Admiral Codrington.

Navarino remained in Ibrāhīm Pasha's hands until the spring of 1828. The French under General Maison then relieved the Egyptian-Turkish troops. Alfred Reumont gives a fine picture of Navarino under French occupation in 1832.

NAVAS DE TOLOSA (LAS), a place in the south of Spain in the province of Jaen on the frontier of Andalusia, a short distance from the modern town of Carolina. Its site corresponds to that of a fortress called Ḥiṣn al-ʿIḳāb in the Muslim period. It was in the plain which lies in front of it that there was fought on the 15th Šafar 609 (July 16, 1212) the great battle between the Christians and the Almohads which ended in the rout of the latter.

As a result of the defeat of Alarcos [q. v.], the king of Castille, Alfonso VIII, had concluded a truce with the Muslims. On its expiration at the end of the xiith century, the Christian troops began a series of surprise attacks on the Muslim frontiers. Disturbed at this, the Almohad ruler al-Nāšir [q. v.] prepared a great expeditionary force in Morocco while on his side the king of Castille secured the help of the kings of Aragon,

Navarre and Leon, as well as of the Count of Portugal and the Pope, who preached a crusade against the infidel. The Christian troops gathered in Toledo and set out on June 20, 1212. The encounter was a bloody one. The Muslim volunteers from Morocco and the Andalusian contingents soon lost ground and the Almohad 'abid were in their turn decimated. The victors were able to exploit their success and took Ubeda [q. v.], Baeza [q. v.] and other strongholds. The Christian victory of las Navas de Tolosa was certainly one of the most important steps in the "Reconquista".

NAWĀWĪ. [See NURĪ.]

AL-NAWĀWĪ (or AL-NAWĀWĪ), MUḤYĪ AL-DIN ABŪ ZAKARĪYĀ' YAḤYĀ B. ŠHARAF B. MURĪ [following Nawawī's own spelling, Suyūṭī, fol. 53b] B. ḤASAN B. ḤUSAIN B. MUḤAMMAD B. DJUM'Ā B. ḤIZĀM AL-ḤIZĀMĪ AL-DIMASHQĪ, a Šhāfi'ī jurist, born in Muḥarram 631 (Oct. 1233) in Nawā south of Damascus in Djawlān. The ability of the boy very early attracted attention and his father brought him in 649 to the Madrasa al-Rawḥiyya in Damascus. There he first of all studied medicine but very soon went over to Islāmic learning. In 651 he made the pilgrimage with his father. About 655 he began to write and was called to the al-Ašhrafīyya school of tradition in Damascus in succession to Abū Šhāma who had just died. Although his health had suffered severely during his life as a student, he lived very frugally and even declined a salary. His reputation as a scholar and a man soon became so great that he even dared to approach Sultān Baibars to ask him to free the people of Syria from the war-taxes imposed upon them and to protect the teachers in the madrasas from a reduction in their income. This was in vain however, and Baibars expelled al-Nawawī from Damascus when he alone refused to sign a *fatwā* approving the legality of these exactions. (This action of al-Nawawī's is commemorated in the popular romance *Sīrat al-Zāhir Baibars*, Cairo 1326, xli. 38 sqq. in which the Sultān, cursed by al-Nawawī, becomes blind for a time). He died unmarried in his father's house in Nawā on Wednesday 24th Radjab 676 (Dec. 22, 1277). His tomb is still held in honour there.

Al-Nawawī has retained his high reputation to the present day. He had an exceptional knowledge of Tradition and adopted even stricter standards than later Islām; for example he admits only five works on Tradition as canonical, while he expressly puts the *Sunan* of Ibn Māḍja on a level with the *Musnad* of Aḥmad b. Ḥanbal (cf. *Šarḥ Muslim*, i. 5; *Adhkār*, p. 3). In spite of his fondness for Muslim, he gives a higher place to Bukhārī (*Tahdhīb*, p. 550). He wrote the principal commentary on Muslim's *Šaḥīḥ* (pr. in 5 volumes, Cairo 1283); as an introduction to this, he wrote a history of the transmission of this work and a sketch of the science of Tradition. He gives not only observations on the *isnāds* and a grammatical explanation of the traditions but he also comments on them,

mainly from the theological and legal aspect, quoting when necessary not only the founders of the principal schools but also the older jurists like al-Awzā'ī, 'Aṭā, etc. He also inserted headings (*tarḍjama*) in Muslim's work. We may also mention his frequently annotated *Kitāb al-Arba'īn* (pr. Būlāḳ 1294 and often since) and portions of commentaries on al-Bukhārī (*G. A. L.*, i. 158) and Abū Dāwūd (Ibn al-'Aṭṭār, fol. 10v); and an extract from Ibn al-Šalāḥ, *Ulūm al-Ḥadīth* with the title *al-Taḳrīb wa 'l-Taisir*, partly transl. by Marçais, in *J. A.*, ser. 9, xvi.—xviii. and printed at Cairo 1307, with a commentary by al-Suyūṭī, *Tadrib al-Rāwī*.

Al-Nawawī's importance as a jurist is perhaps even greater. In Šhāfi'ī circles he was regarded with his *Minḥādī al-Ṭālibīn* (finished 669; pr. Cairo 1297 and frequently; ed. van den Berg with French transl., Batavia 1882—1884; cf. thereon Snouck Hurgronje, *Verspr. Geschr.*, vi. 3—18) as the highest authority along with al-Rāfi'ī and since the tenth (xvth) century the two commentaries on this work, Ibn Ḥadjar's *Tuhfa* and al-Ramlī's *Nihāya*, have been regarded almost as the law books of the Šhāfi'ī school. The book consists of excerpts from the *Muḥarrar* of Rāfi'ī and, as the author himself says, is intended to be a kind of commentary on it. It certainly owes the estimation in which it is held also to the fact that it goes back via al-Rāfi'ī and al-Ḡhazālī to the Imām al-Haramain. We should also mention the *Rawḍa fī Mukhtaṣar Šarḥ al-Rāfi'ī* (on Ḡhazālī's *Wad'iz*) finished in 669 on which commentaries have often been written and the commentaries on Šhīrāzī's *al-Muḥadḍḥab* and *al-Tanbīh* (*G. A. L.*, i. 387) and al-Ḡhazālī's *al-Wasīf*, which do not seem to have survived, and a collection of *fatwā*'s put together by his pupil Ibn al-'Aṭṭār (Cairo 1352).

His biographical and grammatical studies resulted in the *Tahdhīb al-Asmā' wa 'l-Lughāt* (Part I on the names, Wüstenfeld, Göttingen 1842—1847; Part 2 only in Ms. in Leyden; included by Ibn al-'Aṭṭār among the unfinished works and there are certainly gaps in it) and *al-Taḥrīr fī Alfāz al-Tanbīh*. To his mystical tendencies — he had attended lectures on the *Risāla* of al-Ḳuṣhairī and transmitted it — we owe works like the *Kitāb al-Adhkār* on the prayers, finished in 667 (pr. Cairo 1331 and frequently), the *Riyāḍ al-Šāliḥīn* (finished in 670; pr. Mecca 1302, 1312) and the incomplete *Bustān al-'Ārifīn fī 'l-Zuhd wa 'l-Taṣawwuf*. An almost complete list of his some 50 works is given in Wüstenfeld, p. 45 sqq., those that are still in MSS. are given in Brockelmann, *G. A. L.*, i. 394 sqq. and index and those that are printed in Sarkis, *Muḍjam*, col. 1876—1879.

Bibliography: Ibn al-'Aṭṭār (d. 724 = 1324), *Tuhfat al-Ṭālibīn fī Tarḍjamat Šaikhīn* al-Imām al-Nawawī [with many *marḥūm*'s], MS. Tübingen, N^o. 18; al-Sakhāwī (d. 902 = 1496—1497), *Tarḍjamat Kuṭb al-Awliyyā' ... al-Nawawī*, Ms. Berlin, Wetzstein, ii. 1742, fol. 140—207 (Ahlwardt, N^o. 10125); al-Suyūṭī, *al-Minḥādī fī Tarḍjamat al-Nawawī*, MS. Berlin Wetzstein II, 1807, fol. 53r—68r (Ahlwardt, N^o. 10126); al-Subkī, *Ṭabaḳāt al-šāfi'īya al-kubrā*, Cairo 1324, v. 165—168; al-Dhahabī, *Tadhkirat al-Huffāz*, Haidarābād n. d., iv. 259—264; al-Yāfi'ī, *Mir'āt al-Dīanān*, Haidarābād 1339, iv. 182—186; the other sources are printed in Wüsten-

feld, *Über das Leben und die Schriften des Scheich Abu Zakariya Fahja el-Nawawi*, Göttingen 1849; Snouck Hurgronje, *Verspr. Geschriften*, ii. 387 sq. For the reference to the popular romance I am indebted to Herr cand. phil. Wangelin.

(HEFFENING)

AL-NAWAWI MUHAMMAD B. 'OMAR B. 'ARABI AL-DJAWI, an Arabic writer of Malay origin, born in Tanāra (Banten), the son of a village judge (*pangatu*), after concluding his studies made the pilgrimage to Mecca and settled there permanently about 1855, after making a short visit to his native land. After he had studied further and completed his education with the teachers of the holy city, he set up as a teacher himself and gained great influence over his fellow countrymen and their kinsmen. From 1870 he devoted half his time to authorship. He was still alive in 1888.

He wrote a large number of commentaries on popular textbooks, which are listed by Brockelmann, *G. A. L.*, ii. 501 in addition to Snouck Hurgronje, *Mekka*, ii. 362 sqq. Of these the following may be mentioned, with some information additional to what is contained in these two works.

He expounded the *Kur'an* in his *al-Tafsir al-munir li-Ma'alim al-Tanzil al-musfir 'an Wudjuh Mahasin al-Ta'wil*, Cairo 1305. In the field of *Fikih* he annotated the *Fath al-Karib* of Muhammad b. al-Kāsim al-Ghazzī (d. 918 = 1512), a commentary on Abū Shudjā' al-Isfahānī's *al-Takrib*, entitled *al-Tawshih*, Cairo 1305, 1310, and again entitled *Kut al-Habib*, Cairo 1301, 1305, 1310. — He wrote a commentary on al-Ghazzālī's *Bidāyat al-Hidāya* under the title *Marāḥi l-'Ubūdiyya*, Būlak 1293, 1309; Cairo 1298, 1304, 1307, 1308, 1319, 1327. — On the *Manāḥib al-Hādij* of Muḥammad b. Muḥammad al-Shirbīnī al-Khaṭīb (d. 977 = 1569) he wrote *al-Fath al-mudḥib*, Būlak 1276, 1292; Cairo 1297, 1298, 1306; Mecca 1316. — On the *Safinat al-Salāh* of 'Abd Allāh b. Yaḥyā al-Ḥaḍramī he wrote the *Sullam al-Munādīāt*, Būlak 1297; Cairo 1301, 1307. — He wrote a commentary on the 601 questions of Aḥmad b. Muḥammad al-Zahid (d. 819 = 1416) put into verse by his fellow countryman Muṣṭafā b. 'Oṭhmān al-Djāwī al-Kārūtī as *al-Fath al-mubīn* on ṣalāt, alms, fast and pilgrimage under the title *al-Id al-thamin*, Cairo 1300; the *Safinat al-Nadīā* of Sālim b. Samīr of Shīhr in Ḥaḍramawt, ended in Batavia, was expounded under the title *Kashifat al-Sadā*, Cairo 1292, 1301, 1302, 1303, 1305; Būlak 1309. — On the exposition of the *uṣūl al-dīn* by his colleague Muḥammad b. Sulaimān Ḥasab Allāh entitled *al-Riyād al-badī'a* he wrote the commentary *al-Thimār al-yānī'a*, Cairo 1299, 1308, 1329; Būlak 1302.

In the field of dogmatics he annotated al-Sanūsī's *Umm al-Barāhīn* (d. 892 = 1496) entitled *Dharī'at al-yaḥīn*, Cairo 1304; the *Aḳīdat al-'Awānīm* of Aḥmad al-Marzūḳī (c. 1281 = 1864) entitled *Nūr al-Zalām*, Cairo 1303, 1329; al-Bādjūrī's *Risāla fī 'Ilm al-Tawḥīd* entitled *Tidjān al-Darārī*, Cairo 1301, 1309, Mecca 1329; the *Masā'il* of Abū 'l-Laith entitled *Ḳaṭr al-Ghailh*, Cairo 1301, 1303, Mecca 1311; the anonymous *Fath al-Rahmān* entitled *Ḥilyat al-Ṣibyān* in a *Madjmū'a*, Mecca 1304; the *al-Durr al-farīd* of his teachers Aḥmad al-Naḥrāwī entitled *Fath al-madḥīd*, Cairo 1298.

In the field of mysticism he wrote a commentary on the *Manẓūma Hidāyat al-Adhkiyā*

ilā Ṭarīḳ al-Awliyā' of Zain al-Dīn al-Malibārī (d. 928 = 1522) entitled *Salālim al-Fuḍalā'*, Cairo 1301, Mecca 1315; and on his *Manẓūma fī Shu'ab al-Imān* he wrote the *Kāmi' al-Tiḡhyān*, Cairo 1296. On the *al-Manḥadī al-atamm fī Tabwīb al-Ḥukm* of 'Alī b. Ḥusām al-Dīn al-Hindī (d. 975 = 1567) he wrote *Miṣbāḥ al-Ḍulm*, Mecca 1314. — His commentaries on stories of the life of the Prophet may be classed as edifying popular literature; such he wrote on the *Mawlid al-Nabī* under the title *al-'Arūs*, Cairo 1926, which is ascribed by some to Ibn al-Djāwzī, by others to Aḥmad b. al-Kāsim al-Ḥarīrī, entitled *Fath al-Ṣamad al-'ālim 'alā Mawlid al-Shaiḥ Aḥmad b. Kāsim wayusammā al-Bulūḡ al-Fawz li-Bayān Alfāḡ Mawlid Ibn al-Djāwzī*, Būlak 1292, entitled *Bughyat al-'Awāmm fī Sharḥ Mawlid Saiyid al-Anām li-Ibn al-Djāwzī*, Cairo 1927 and *Fath al-Ṣamad al-'ālim 'alā Mawlid al-Shaiḥ Aḥmad b. Kāsim*, Mecca 1306, as well as on the *Mawlid* of Dja'far al-Barzandjī (d. 1179 = 1765) entitled *Tarḡīb al-Muṣṭaḥīn*, Būlak 1292, and again under the title *Madāridj al-Ṣu'ūd*, Būlak 1296, and on his *al-Khaṣā'is al-nabawīya* entitled *al-Durar al-baḥiya*, Būlak 1299. He made an excerpt from al-Kaṣṭallānī's (d. 923 = 1517) *Mawlid* entitled *al-Ibriz al-dānī fī Mawlid Saiyidnā Muḥammad al-Saiyid al-'Adnānī*, Cairo 1299.

In the field of grammar he wrote a commentary on the *Adjurrūmiya* entitled *Kashf al-Murūṭiya 'an Sitār al-Adjurrūmiya*, Cairo 1308 and on a versification *Fath Ghāfir al-Khaṭiya 'ala 'l-Kawākib al-djalya fī Naẓm al-Adjurrūmiya*, Būlak 1298, on 'Abd al-Mun'im Iwāḍ al-Djirdjāwī's (c. 1271 = 1854) *al-Rawḍa al-baḥiya fī 'l-Abwāb al-taṣrifīya* entitled *al-Fusūṣ al-yāḳūtiya*, Cairo 1299. In the field of rhetoric he completed in 1293 (1876) a commentary on the *Risālat al-Isti'ārat* of Ḥusain al-Nawāwī al-Mālikī entitled *Lubāb al-Bayān*, Cairo 1301.

Bibliography: In the article; cf. also J. I. Sarkis, *Mu'djam al-Maṭbū'āt*, col. 1879—1883.

(C. BROCKELMANN)

NAWBA, an art-form in the music of the Islāmic East similar to the European cantata or suite. There are two varieties: 1. the nawba of chamber music, and 2. the nawba of military music [for the latter see **ṬABL KHANA** in the *Supplement*]. The nawba of chamber music varies in construction according to its provenance, and does not always carry this particular name. As early as the viiith century A. D. we appear to see this nawba in its nascent stage. The musicians at the court of the Caliphate under the early 'Abbāsids performed in turn (*dawr*) and succession (*nawba*), and by the time of al-Wāṭḥik (d. 847) we know that a court musician had a particular day for his nawba (*Kitāb al-Aghānī*, iii. 177; v. 82, 120; vi. 73; x. 123; xvii. 131; xxi. 150). Some musicians were famous because they specialized in certain genres of music, such as Ibrāhīm al-Mawṣilī in the *mākhūrī* and Ḥakam al-Wādī in the *ḥasadī* rhythms (*Aghānī*, vi. 12, 66), and a programme made up of these diverse types of music probably led to the term nawba being transferred to the programme itself (Ribera, *Las Cantigas*, p. 48).

Although we read in the *Alf Laila wa-Laila* of a nawba (ii. 54), a *dūridj* (a quick movement; cf. the modern *dardj*) of a nawba (ii. 87), as well as a complete nawba (iv. 173) being played, yet it is not until the xivth century A. D. that we

possess precise information about the nawba and its integral parts. 'Abd al-Kādir b. Ḡhaibī [q. v.] tells us that among the ancient forms of musical composition were the nawba, *nashīd* and *basīf*. The nawba, he says, was made up of four movements (*ḡita*^c) viz., the *ḡawāl*, the *ḡhaṣāl*, the *tarāna*, and the *furū dāshī*. In the year 1379, whilst at the court of Djalāl al-Dīn al-Ḥusain the Djalālīrid sultān of al-ʿIrāk, Ibn Ḡhaibī introduced a fifth movement to the nawba, which he called the *mustazād*. During this occasion, he tells us, he composed fifty *nawbāt* for the court, and the words of one of these have been preserved (fol. 96v). These five movements were instrumental as well as vocal, and besides the verse-form being specified (the *tarāna* for instance was in *rubāʿī*), the rhythms (*īkzāʿāt*) for the instrumental accompaniments were also prescribed, one of the *thaḡīl* group being essential. The purely instrumental movements are also mentioned by Ibn Ḡhaibī including the overture called the *pīshraw*, which even to-day is the prelude to the nawba. He calls it *naḡṣh* ("embroideries"), and says that the *pīshraw al-fulānī* has three, five, or seven sections (*buyūt*).

In days of old the nawba was considered the most important art-form in the music of Islāmic peoples. To-day it has fallen into neglect and in some countries will probably soon disappear. Two distinct cultures may be found in the modern nawba, the Eastern and Western. The former is clearly a survival of that nawba described by Ibn Ḡhaibī in the xivth century A. D. The latter is claimed (Yāfil) to have had its origin in al-Andalus in the viith—ixth century, and is known to-day as the *nawba ḡharnaṭī*. It is confined to North Africa, the purest type being found in the West, whilst the nearer the East is approached the more we find the influence of the Eastern nawba.

The Levantine nawba to-day comprises the following movements: 1. The *taḡṣīm*, an instrumental prelude played by the *mūʿallīm* or *chef d'orchestre*; 2. the *bīshraw* or *baṣhrāf*, an instrumental overture; 3. the *kūr*, a vocal movement; 4. the *murabbaʿ*, whose name recalls the form of the xivth century *tarāna*; 5. the *naḡṣh*, also reminiscent of the *naḡṣh* of old, since its function is tonal "embroidery"; 6. the *aghīr samāʿī*, in slow rhythm; 7. the *sharkī*, comprising verses; 8. the *yūrūk samāʿī*; 9. the *bīshraw samāʿī*, an instrumental finale (cf. Thibaut and Lavignac, v. 2861). A shorter nawba is described by Ducoudray (p. 22), whilst the famous British musician Sir Arthur Sullivan has related (*Fortnightly Review*, 1905, p. 86) his experiences as an auditor of the nawba. The various movements, especially the instrumental ones, are also cultivated in the Near East as sole items of performance, the *bīshraw*, *taḡṣīm*, and *sharkī* being special favourites. The *bīshraw* or *baṣhrāf* is still composed in sections as of old, but these are called *ḡhanāt* instead of *buyūt*. Another interesting type of nawba in Egypt includes the dance, and an example is given in complete score by Victor Loret. It comprises seven movements: 1. The *baṣhrāf*, for instruments and voices; 2. the *turkmānī al-awwal*, for the ballet; 3. the *salām*, for the solo dance; 4. the *turkmānī al-ṡhānī*, for the ballet; 5. the *taḡṣīm*, for the solo dance; 6. the *turkmānī al-ṡhālīth*, for the ballet; 7. the *māṣhī*, for the solo dance. The whole is accompanied by choir and instruments.

In Western Turkeṣtān the nawba of to-day

shows that in the Middle East it has developed somewhat differently from that of the Levant. Here, more attention has been paid to the purely instrumental movements, and they have been kept separate. The nawba is here called a *maḡām*, a name which properly stands for "a melodic mode". It is divided into three parts, the first two being the most important. These two are the *mushkilāt* or instrumental pieces, and the *naṣr* comprising vocal-instrumental pieces. The names of most of the sections of the *mushkilāt* and *naṣr* refer to either rhythmic (*uṣūl*) or melodic modes (*maḡāmāt*), although two of them, the *pīshraw* and the *tarāna*, retain names which occur in the xivth century Ibn Ḡhaibī treatise. In Bukhārā, only six *maḡāmāt* (= *nawbāt*) appear to have survived, although the Uzbegs claim that they know others. These six have recently been described by the Uzbeg poet Fitrat, whilst the notation has been published by a Soviet Union official, Colonel V. A. Uspensky. There is also another but shorter type of *maḡām* known in Bukhārā, and six of these have also survived. In Khwārizm, the *mushkilāt* of the *maḡāmāt* (= *nawbāt*) differ from those of Bukhārā, and here an additional one has been spared the ravages of time. The Khwārizmī *mushkilāt* are probably purer than those of Bukhārā because they appear to have been handed down, not *viva voce* as elsewhere, but by means of a notation which was known as early as the time of the Khwārizm Shāh 'Alā' al-Dīn Muḡammad (d. 1220) (cf. *Pro-Musica*, New York 1927, v.; *The Sackbut*, London 1924, iv.).

In North Africa, as already stated, a different tradition in the nawba has been followed. Here there are several varieties, but the most highly esteemed is the *nawba ḡharnaṭī*. As the name signifies, al-Andalus is the place of origin, and this is claimed for both the words and music. Although MSS. exist which contain the words of the Granadan *nawbāt*, yet we only know the music itself from modern Moorish practice. We read of the "twenty-four *nawbāt*", which tells us that the *nawbāt* were composed in the twenty-four modes (*ṡubūʿ*). Others say that the Andalusians only possessed twelve or fourteen *nawbāt* (F. Salvador-Daniel, p. 52; Yāfil, Pref.) but it has now been shown (Farmer, *An Old Moorish Lute Tutor*) that there were twenty-four originally, but their names are different from those which some writers have presumed (Delphin et Guin, p. 62; Lavignac, v. 2859). The *nawba ḡharnaṭī* as performed in Algeria to-day comprises the following movements: 1. the *dāʿira*, a short vocal prelude; 2. the *mustakhbir*, an instrumental prelude; 3. the *tūṣhiya* or *tawṣhiya* ("ornamenting"); the overture proper; 4. the *maṣdar* or *muṣaddar*, a vocal movement, preceded by a short instrumental prelude called a *kursī*; 5. the *baṭaiḡ* or *baṭaiḡh*, a vocal movement preceded by a *kursī*; 6. the *dardj*, also a vocal movement preceded by a *kursī*, and whose name is practically identical with the old *dāridj* (cf. above); 7. the *inṣirāf*, a vocal movement which is introduced by a *tūṣhiya*; 8. the *ḡhalāṣ* or *mukhlaṣ*, the finale (British Museum MS., Or. 7007; Yāfil, *Maḡimūʿ*; cf. Lavignac, v. 2941; Delphin and Guin, p. 65). The words of the classical Granadan *nawbāt* have been edited from MS. sources and *viva voce* by Edmond Yāfil in his *Maḡimūʿ al-Aḡḡānī*, whilst with the collaboration of Jules Rouanet he issued his *Répertoire de musique arabe*

et maure which contains the music of a complete *nawba gharnaḥī* and sundry movements from others. In 1863, Christianowitsch published his *Esquisse historique de la Musique arabe*, which also contained the major portions of seven Granadan *nawbat*. Another type of *nawba* practised in Algeria, but of secondary importance, is the *nawbat al-inḳilābāt*. In Morocco the five movements of the *nawba* are the *basīf*, the *ḡā'im wanuṣf*, the *baṭā'ihī*, the *ḡuddām*, and the *dardj*, as well as the overture *tūshiya*.

NAWBAKHT. This Iranian patronymic (*naw* or *nai* + *bakht* "new fortune") was borne in Baghdād during the first two 'Abbāsīd centuries by a family remarkable for its influence on the advancement of learning and on the political legitimism of the Imāmis.

It claimed descent (cf. Buhturī, *Diwān*, p. 115) from the Persian hero Gīw son of Gūdarz celebrated in the *Shāhnāma* (cf. Justi, *Iranisches Namenbuch*, p. 399 and Christensen, *Kayanides*, p. 59, 117). Its first known representative Nawbakht, an astrologer, owed his fortune to the future caliph al-Manṣūr, to whom in prison he is said to have foretold the throne and later the victory over the Zaidī rebel Ibrāhīm in the same year (144 = 762) in which, having drawn up the horoscope of Baghdād, the new capital, he was granted fiefs in it. His son Abū Sahl Timādīh (on this curious phenomenon cf. Ibn Abī Uṣaib'a, ed. Aug. Müller, Leipzig

1884, iii., p. xli. [Vorwort] and H. Ritter, *op. cit.*, p. 9) (d. 170 = 786) had seven sons by his wife Zerrin, the founders of the various branches of the Āl Nawbakht in which we find theologians like Ibrāhīm b. Ishāḳ b. Abī Sahl (wrote about 350 = 961 the *Kitāb al-Yākūt*, on which a commentary by 'Allāma Ḥillī has been found by A. Eghbāl; an earlier commentary had been written by Ibn Abī 'l-Ḥadīd, according to his *Sharḥ al-Nahāj*, iv. 575; and the *Kitāb al-Itihādī*), Abū Sahl Ismā'īl [cf. NAWBAKHTI], Ḥusain b. Ruḥ, third wakīl of the Imāmis [cf. IBN RŪḤ], and Ḥasan b. Mūsā [cf. NAWBAKHTI]; astronomers like Faḍl b. Abī Sahl (Ibn al-Nadīm, *Fihrist*, p. 275; who has been confused with al-Ma'mūn's minister) and Mūsā b. Ḥasan Ibn Kibriyā; secretaries of state; and finally enlightened students of poetry to whom the editors of the diwāns of Abū Nuwās, Ibn al-Rūmī and Buhturī went to establish the texts.

Bibliography: 'Abbās Eghbāl, *Khāne-dāne Nawbakhtī*, Teheran 1933, 16 + 297 pp. with a genealogical tree, and useful indices, among others that of the Shī'ī sects, p. 249—267; H. Ritter in his edition of the *Firaḳ* of Ḥasan Nawbakhtī. (LOUIS MASSIGNON)

NAWBAKHTI, *nisba* of the Nawbakht family.

1. FAḌL B. (ABĪ SAHL) B. NAWBAKHT (d. 200 = 815) an astronomer like his father (with whom he is confused) and, like his brother Ḥasan, attached to the *Dār al-Ḥikma* to translate from Persian, wrote at least seven books (Ibn al-Nadīm, *Fihrist*, p. 274). All that survives of them is a fragment of the *Kitāb al-Nuhmaṭān* (or "*Yahubaṭān*") on questions relating to horoscopes (*Fihrist*, p. 238—239).

2. ISMĀ'ĪL B. 'ALĪ ... B. NAWBAKHT (235—311 = 849—923), the real political leader of the Imāmī party, who kept in close touch with the famous vizier 'Alī b. al-Furāt (whose father, Muḥammad Mūsā b. Ḥasan, we may note, had been a follower of the Nuṣairī heresy; cf. Nawbakhtī, *Firaḳ*, p. 78), and was also a theologian (cf. Massignon, *Passion d'al-Hallaj*, p. 142—159) who disputed with the learned Ṭhābit b. Ḳurra, the Mu'tazilī Djubbā'ī, and the mystic Hallāj; he also refuted, after their deaths, Abū 'l-Atāhiya, Abū 'Isā al-Warrāk and Ibn al-Rāwandī. Of his 32 works (Ibn al-Nadīm, p. 176; Ṭūsī, p. 57) only a fragment of the *Tanbīh* survives (in Ibn Babawaih, *Ghaiba*, p. 53—56) (cf. Ibn al-Nadīm, p. 176) which gives us the first outline of the Shī'a *ghaiba*.

3. ḤASAN B. MŪSĀ ... NAWBAKHTI, d. before 310 (922), classed in this family through his mother, sister of the preceding: an Imāmī theologian, student of Hellenistic philosophy, author of 44 works (Ritter, *l.c.*, p. 17—20; Eghbāl, p. 129—134) of which there survives, besides fragments of the *Radd 'ala 'l-Ghulāt* (in Khaṭīb, vi. 380) and of the *Ārā wa-Diyānāt* (*Murūdī*, ii. 156; Ibn al-Djawzī, *Talbis*, p. 42—43, 47, 49, 69, 74, 81—82, 88, 91), only one complete text, of very great value for our knowledge of the sects of the Shī'a, the *Kitāb Firaḳ al-Shī'a*, ed. H. Ritter (Istanbul 1931, vol. iv. of the *Bibl. Isl.*). In an interesting chapter (*op. cit.*, p. 143—161), A. Eghbāl has collected the passages of the *Firaḳ* found in a contemporary, Sa'd b. 'Abd Allāh Ash'arī (d. 299 = 911), which shows either plagiarism or the use by both of an earlier source.

(LOUIS MASSIGNON)

NAW'Ī, MUḤAMMAD RİPĀ of Khabūshān in the vicinity of Mashhad, a Persian poet. The son of a merchant, in his youth he spent some time in Kāshān where he studied under the Mawlānā Muḥtasham. Moving to Marw, he became intimate with the Ḥākim Nūr Muḥammad Khān there. Like the majority of Persian poets of the xvth century, however, he was attracted by the brilliant court of the Moghuls and went to India where at first he found a patron in the person of Mirzā Yūsuf Khān Mashhadī but soon afterwards entered the service of Khānkhānān Mirzā 'Abd al-Raḥīm and remained with him and with prince Dāniyāl till his death, which took place in Burhānpūr in 1019 (1610). Naw'ī's best work is his poem *Sūz u-Gudāz* ("Burning and Melting") which has a touching theme, the devotion of a Hindu princess who accompanies her late husband in death on the funeral pyre. It is written in excessively artificial language and distinguished by the originality of its subject, which had not been taken by any Persian poet before Naw'ī. Naw'ī's works were very highly esteemed in India, and he is said to have received 10,000 rupees, an elephant and a horse with valuable trappings for a *Sāḳi-nāma* dedicated to the Khānkhānān. His *Diwān*, which is entitled *Lubb al-Albāb*, has come down to us but has so far attracted little attention.

Bibliography: G. Ouseley, *Biographical Notices of Persian Poets*, London 1846, p. 161—166; Ethé, *G. I. Ph.*, ii. 254—255; Bada'ūnī, iii. 361; Blochmann, *Ā'in-i Akbarī*, p. 606; Rieu, *Catalogue*, p. 674^a; *Sūz u-Gudāz*, pr. Lucknow 1284 (at the end of the first part of the *Akbar-nāma*). It has been translated: *Burning and Melting: being the Sūz u-Gudāz of Muḥ. Rīzā Nau'ī of Khabūshān*. Translated into English by Mirza J. Dawud of Persia and Ananda K. Coomaraswamy of Ceylon, London 1912.

(E. BERTHELS)

NAWRŪZ (p.), New (Year's) Day, frequently represented in Arabic works in the form *Nairūz* (Kālkashandī, *Ṣubḥ al-A'shā*, ii. 408). It was the first day of the Persian solar year and is not represented in the Muslim lunar year (Mas'ūdī, *Murūdj*, iii. 416 sq.). In Achaemenid times the official year began with Nawrūz, when the sun entered the Zodiacal Sign of Aries (the vernal equinox). Popular and more ancient usage however would appear to have regarded the midsummer solstice as Nawrūz (Birūnī, *Chronology*, transl. Sachau, p. 185, 201). It was the time of harvest and was celebrated by popular rejoicings, but it also marked the date when the *kharrādī* was collected. The two different dates were retained in Persia proper and also in 'Irāk and Dīlbal under Islām, and Ḥamza al-Isfahānī states (*Ta'rīkh*, Berlin 1340, p. 104) that Nairūz in the first year of the Hīdjra fell on the 18th Ḥazīrān (June), which he erroneously equates with the 1st Dhu 'l-Ka'da. Confusion arose however because the intercalation of one day every four years which allowed the date to correspond with the position of the sun was omitted in Islām (Mas'ūdī, *Kitāb al-Tanbīh*, p. 215) and unscrupulous revenue officials found it to their advantage to keep to the false calendar date rather than to the correct traditional one because it permitted them to collect their dues earlier (Makrīzī, *Khiṭaṭ*, ed. Wiet, iv. 263 sq.). By the time of the Caliph Mutawakkil the date of collection of *kharrādī* had advanced by almost two

months and in 245 A. H. he fixed the date of Nairūz as the 17th Ḥazīrān, which approximated to the old time (Ṭabarī, iii. 1448; Birūnī, *Chronology*, p. 36 sq.). The reform had no lasting effect and the Caliph Mu'taḍid was compelled again to move the date which was fixed as the 11th Ḥazīrān (Ṭabarī, iii. 2143). Later again, in Sulṭān Malikshāh's reform of the calendar, the Persian astronomers proclaimed the vernal equinox as Nawrūz (Ibn al-Athīr, x. 34; 467 A. H.) and the first day of the new era fell on the 10th Ramaḍān 471 (March 15, 1079).

Nawrūz was adopted in Egypt as elsewhere and has been retained by the Copts as the New Year's Day (Makrīzī, *Khiṭaṭ*, iv. 241 sq.), but it now falls on September 10 or 11.

Popular festivities have marked Nawrūz wherever it has been celebrated. In Sāsānian Persia the kings held a great feast and it was customary for presents to be made to them while the people who gathered to make merry in the streets sprinkled each other with water and lit fires. Both in 'Irāk and Egypt these customs persisted in Muslim times (Ṭabarī, iii. 2163; Mas'ūdī, *Murūdj*, vii. 277; Makrīzī, *loc. cit.*; Kālkashandī, ii. 410) and although Mu'taḍid attempted to prevent the customary horseplay in the streets during the midsummer saturnalia he was unsuccessful (Ṭabarī, *loc. cit.*). In the various parts of the Turkish Empire the day was celebrated as a public holiday and in Persia it has throughout its history been marked by great festivities as the chief secular holiday of the year.

Mez, *Renaissance des Islams*, p. 400 sq.; Lane, *Thousand and One Nights*, ii. 496 sq. (he regards it as not improbable that Nawrūz originated from the Jewish Passover); Carra de Vaux, *Notice sur un Calendrier Turc*, in *Studies presented to E. G. Browne*, p. 106 sq.; A. V. W. Jackson, *Persia Past and Present*, p. 99 sq. (R. LEVY)

NAẒAR (A.) probably did not receive until the ninth century A. D. the meaning of research in the sense of scientific investigation as a translation of the Greek *ἡραφία*. With Aristotle (e.g. *Metaph.*, 1064 b 2) the philosophies were then divided into theoretical (*naẓariyya*) and practical (*'amaliyya*); the latter seek to obtain the useful or the good for man, the former pure truth, in physics, mathematics and metaphysics.

Nazar is primarily an epistemological conception and after the example of Ammonios Hermias, a pupil of Proclus, is dealt with among the Arabs in a work prefixed to the *Isagoge* of Porphyry (Προλεγόμενα τῆς φιλοσοφίας) [cf. the article ΜΑΝΤΙΚ]. Nazar is also discussed as an activity of the human *'aql* in psychology but in this case as a rule under synonyms like *fīkr*, *tafakkur* etc. [cf. NAḤS].

The history of this terminology has still to be written. In the oldest, still incomplete, logic (edited by 'Abd Allāh b. al-Muḳaffā' or his son Muḥammad) *'ilm* and *'amal* are already distinguished as branches of philosophy (*ḥikma*), but *'ilm* is defined as a *tabaṣṣur* and *tafakkur* of the *kalb* (i.e. of the mind) (cf. G. Furlani, *Di una presunta versione araba di alcuni scritti di Porfirio e di Aristotele*, in *R. R. A. L.*, ser. vi., vol. vi. [1926], p. 207).

The old speculative theologians of Islām were

perhaps more familiar with the distinction 'ilm ^{'aqlī} > ^{shar'ī} than with ^{naẓarī} > ^{'amālī}. The 'aql is generally recognised as a "root" of the Mu'tazilī system. The Zaidī al-Ḳāsim mentioned it (beginning of the third century A. H.) among his ^{uṣūl}: 'aql, Ḳur'ān and ^{sunna} (R. Strothmann, *Die Literatur der Zaiditen*, in *Isl.*, ii. [1911], p. 54). ^{Naẓar} was felt to be an innovation like ^{ra'y} and ^{ḳiyās} in ^{fiḳh}. The Hanbali school objected to the adoption of ^{naẓar} but its greatest representative Ibn Ḥazm admitted 'aql without hesitation — of course the 'aql created and equipped by God — as a source of knowledge. Not blind belief (^{taḳlīd}) nor deduction from the unknown (^{ḳiyās}) were to lead it to the acceptance of the Ḳur'ān, ^{sunna} and ^{idjīmā'}, but quite certain knowledge. There is nothing which Ibn Ḥazm insists upon so often and so emphatically as this; there is no other way to certainty than that of tracing to sensual perception (^{ḥiss}) and intuition of the intelligence ('aql). Indeed sensual perception is so much preferred by him that comprehension by the reason is called a sixth ^{idrāk} (*Kitāb al-Faṣl*, i. 4—7). The philosophical position of Ibn Ḥazm, which requires closer investigation, recalls Hellenistic eclecticism according to which all human cognition arises either from sensual perception or intuition or is derived from these sources through the intermediary of proof. Many however emphasise the direct evidence of sensual perception and reason, and regard the method of proof as a difficult and uncertain one. Hence we have from the Stoics onwards the emphasis laid on general agreement (Ar. ^{idjīmā'} and ^{idjtimā'}) as a criterion of truth. Only where there is no agreement is investigation necessary.

The dualistic epistemology of the eclectics (senses × reason) was very greatly modified in Islām by the penetration of the intellectual monism in the Neo-Platonic mysticism and Aristotelian logic. While different stages in human knowledge were distinguished, true knowledge was only to be attained by rational intuition and the intermediary activity of the mind. The main thing for the Neo-Platonist was intuition (^{naẓar}, ^{baṣar}) It is remarkable how in the Neo-Platonic *Theology of Aristotle* the latter is made to say (Arabic, ed. Dieterici, p. 163): "Plato recognised all things ^{bi-naẓar al-'aql} (intuition), ^{lā bi-mantīḳ wa-ḳiyās}", i. e. Plato as the divine perceives everything at once like God himself and pure 'aql. ^{Naẓar} in this sense of direct perception is constructed with ^{ilā}, in other cases however with ^{fī}. For ^{naẓar fī}, transmitted reflection of the human intelligence, the *Theology* generally uses ^{fīḳr} and ^{rawīya} and the world of the senses, with which our soul is associated, is called 'ālam ^{al-fīḳra wa 'l-rawīya}. Following the *Theology*, the Muslim mystics generally used ^{naẓar} for spiritual perception (cf. L. Massignon, *Essai sur les origines du lexique technique de la mystique musulmane*, Paris 1922, index).

In ^{Kalām} however, in the disputes of the theological sects, ^{naẓar} receives the dialectic meaning. Logical proof seems to have first been admitted into the ^{uṣūl al-dīn} by the Shī'ā. In his ^{maḳālāt} (ed. Ritter, i. 51 sq.) al-Ash'arī gives a survey of the different views of the eight parties of the ^{Rawāfiḍ fī 'l-naẓar wa 'l-ḳiyās}. According to him, groups 1—3 consider all cognitions (^{ma'ārīf}) as necessary (^{idjtirār}) (i. e. given with the mind itself or not given) so that ^{naẓar} and ^{ḳiyās} can add nothing to them; these as well as group 8,

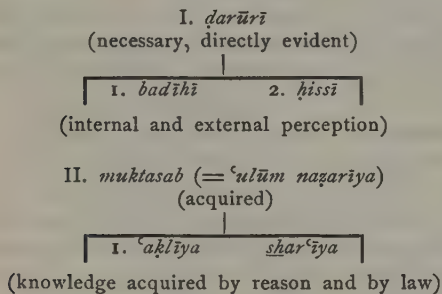

which traces all knowledge to the Prophet of God and the Imām, differ from the rest on this point. The other four recognise some kind of acquired knowledge (in both cases the reference is to the apprehension of God) as follows: 4 (the Ash'ab Hishām b. al-Ḥakam) by ^{naẓar wa 'l-istidlāl}; 5 (al-Ḥasan b. Mūsā) possibly by a kind of ^{ḳashb} which cannot be more exactly defined (cf. this ^{ḳashb} with the ^{ḳashb al-af'al} of the later Ash'arī school); 6 and 7 (anonymous) by ^{naẓar wa 'l-ḳiyās}, with appeal to the testimony (^{ḥudūdja}) of the 'aql. We are also told (p. 144) of a section of the Murdji'is that a belief (^{īmān}) without ^{naẓar} is in their opinion not a perfect belief.

Ash'arī himself is probably the best evidence of the fact that the speculation of the human 'aql was not regarded as a source (or method) of knowledge of God for the first time in his school but before him by several sects. ^{Naẓar} (like ^{ra'y} in ^{fiḳh}) was most probably applied to the activity of the mind of the reflecting theologian (besides ^{naẓar} we find synonyms like ^{baḥṭh}, ^{ḥads}, ^{ra'y}, ^{fahṣ}, ^{fīḳr}, ^{fīḳra}, ^{tafakkur}, ^{ta'ammul}, ^{ṭalab}; perhaps also others). The logical methods here used are called (perhaps here still synonyms) ^{ḳiyās} (deduction by analogy) and ^{istidlāl} (proof by circumstantial evidence). From what we know of ^{ḳiyās} in ^{fiḳh} (cf. the article ^{UṢŪL AL-FIḲH} by J. Schacht, and Snouck Hurgronje, *Verspr. Gesch.*, ii. 140 sq.) and of ^{ḳiyās} in medicine (see Mas'ūdi, Paris 1861—1877, iv. 40; vii. 172 sqq.), we have probably to think of a process which is a mixture of induction and deduction, often used very arbitrarily. Analogous cases, often superficially regarded as similar (cf. ^{Maḳāṭīḥ al-'Ulūm}, ed. v. Vloten, p. 8 sq.), were sought for, the ^{illa}, i. e. not the actual cause (^{causa}) but the reason (^{ratio}) in a higher conception of method or species, under which the further cases could be grouped. For Aristotle and his followers in Islām (Fārābī etc.) deduction had one meaning; they believed in causality or even in the creative activity of abstract thought. The great majority of Muslim theologians, jurists and physicians did not rise so far. It was not till the school of Ash'arī that the method of ^{naẓar} superficially grasped penetrated into ^{kalām} and ^{kalām} was defined as 'ilm ^{al-naẓar wa 'l-istidlāl}. Rejected at first by the majority, gradually tolerated and used as an instrument against heretics and sophists, ^{naẓar} in the orthodox school was finally recognised as a religious obligation.

Let us now turn back to the general conception of the 'ulūm ^{naẓariya}. Al-Fārābī (d. 950) distributed them from the philosophical point of view in a special treatise (^{Ḥāṣṣat al-'Ulūm}, Cairo n. d.) in a way which became the model for later times. It was he who first worked on the logic of Aristotle wherefore his school was often called that of the ^{Mantīḳiyyūn}. He assumed with Aristotle that the 'aql contained in itself the fundamental principles of all knowledge, the evidence of which had simply to be acknowledged. But the way of reflection and proof leads to the non-evident, the culmination of which, apodeictic proof (^{burhān}), is described in the "Second Analytic". From this eminence the branches of knowledge can be surveyed. After some observations on philology (cf. the Stoics) first and most fully logic — whether as instrument of philosophy or as a part of it is a matter of indifference. Logic itself is of course a ^{naẓar} with an object

of its own. Next come the science of physics, mathematics and metaphysics with main and subsidiary branches. Each is a *nazar*. But it is noted that for example among the physical sciences medicine is a mixture of theoretical and practical and similarly music and mathematical subjects. Metaphysics is however like logic purely theoretical. Finally the three practical sciences of Aristotle, ethics, economics and politics, are united under the head of political science, with the addition of *fiḥh* and *kalām*; al-Fārābī remarks that the science of *fiḥh* and the art (*ṣinā'a*) of *kalām* have to do partly with opinions (*ārā'*), partly with actions (*af'āl*).

In conclusion let us compare with this philosophical division that of the Aṣḥ'arī theologian 'Abd al-Kāhīr b. Tāhīr al-Baghdādī (d. 1037—1038) in his *Uṣūl al-Dīn*, Constantinople 1928, p. 8—14. After the distinction between divine knowledge and the knowledge possessed by other living creatures is laid down, the latter is classified as follows:

The 'ulūm *naẓariya* are further divided into four according to the way in which they are acquired:

1. *Istidlāl bi 'l-ʿaql min dīhat al-ḥiyās wa 'l-naẓar* (speculative theology);
2. *Ma'lūm min dīhat al-tadārib wa 'l-ādāt* (e.g. medicine);
3. *Ma'lūm min dīhat al-sharʿ* (legal science);
4. *Ma'lūm min dīhat al-ilhām* (prophetology).

Compared with the 'aql monism of Fārābī this division still looks rather eclectic. But from the xith to the xliith century A.D. philosophy and theology, without becoming one, were approaching one another more closely. Ibn Sīnā, who builds upon Fārābī, was the intermediary. Ghāzālī sought to combine the *naẓar ilā* of the Neo-Platonic mysticism with the *naẓar fī* of the rationalist thinkers, and Fakhr al-Dīn al-Rāzī appropriated the methods of proof of Aristotelian logic to a much greater extent than his theological predecessors.

NAZARETH. [See AL-NĀSIRA.]

AL-NĀZĪ'ĀT, title of sūra lxxix., taken from the opening word.

NĀZİM, properly MUṢṬAFĀ B. ISMĀ'IL, a notable Ottoman religious poet. The son of a Janissary, the inspector Yeni Baghçeli Ördök İsmā'il Agha, he was born in Constantinople and succeeded his father in his office, after rising through all the grades in the Janissary office: he became *shāgird*, *khalīfe*, *bash khalīfe* and finally in 1108 (1696) *yemīteri kâtibi*. He died in this year on the campaign against Belgrade.

Nāzīm wrote an extensive *Dīwān*, the poetical value of which is not very great but which contains much that is religious and mystical in its 550 *ghazels* and about 50 *ta'rīkh* of the end of the reign of Meḥmed IV.

Bibliography: Thureiyā, *Sidjill-i 'othmānī*, iv. 534; Hammer, *G.O.D.*, iii. 572—576; Basmaḍjian, *Essai sur l'histoire de la littérature ottomane*, Constantinople 1910, p. 127; Flügel, *Wiener Handschriften-Katalog*, i. 664—665.

(MENZEL)

NĀZİM, YAḤYĀ, the most important Ottoman religious poet of his period, as is apparent from his epithet *Na't-gū*, the singer of hymns. Born in 1059 (1649) in Kāsim Pasha in Constantinople, he entered the Serai as a boy where he received the education of the Enderūn and had the opportunity to acquire special proficiency in Arabic and Persian. He showed a talent for poetry and considerable musical ability. His beautiful voice and his work as a poet and composer gained him the favour of Sulṭān Murād IV. He was given important offices at the court as a result: the office of a *ḫoghush aghasī* to the *ki-tār-i ḫāṣṣe*; he next became *newbetdji bashī* and *kuru jemishdji bashī* and attained considerable influence. He then retired of his own accord and became *basar bashī*. Later he made the pilgrimage to Mecca. He remained in Medina as *mudjāwir* where he died at the age of 80 in 1139 (1726). According to another statement (Brusali Meḥmed Tāhīr), he died in Adrianople.

He flourished under Meḥmed IV and down to the reign of Aḥmed III. He was a member of the Mewlewī order. *Shāikh* Neshātī-i Mewlewī was his teacher in poetry and probably also in music. Nāzīm is the most religious poet of his period. He devoted the whole of his poetical talent to the *na't*, the hymn. His *Dīwān* therefore resembles a warrant of pardon (*berāt-i ghufrān*). He also gave special attention to the devotional forms of the *tewhīd*, *tahmīd* and *munādjāt*.

His *Dīwān*, printed in Constantinople in 1257 (1841), forms a thick volume of 500 pages, of which one third is devoted to the *na't* in the form of 60 *kaṣīda*'s, hundreds of *ghazels*'s, *kiṣ'a*'s, *terdji*'s and *terkīb*, *müsedde*'s and *mukhamme*'s, *rubā'ī* and a *methnewī* for the Prophet. The *Dīwān* is divided into five parts, each of which is in turn a kind of *Dīwān* in itself. He also wrote *medḥīye*'s for Meḥmed IV and Muṣṭafā II, Aḥmad III, Selīm Girai Khān, Muṣāhib Muṣṭafā Pasha and the vizier Aḥmad Pasha; also *ta'rīkh*'s in imitation of Ne'fī and Nābī and *sharkḥ*'s in imitation of Nedim.

Nāzīm is a clever technician who gives expression to his effort for variety and change, not in the matter but in the form. In all his works however, a deep religious belief, even fanaticism is marked. His poems are a true reflection of the inclination of the period for religion and Şūfism.

NÂZİM FARRUKH HUSAIN, a Persian poet. Mullā Nāzīm, son of Shāh Riḍā Sabzawārī, was born in Herāt about 1016 (1607) and spent the greater part of his life there. Little is known of his career, except that he made a journey to India and, after spending several years in Djāhāngīrnagar, returned to his native town where he died in 1081 (1670—1671). He was court poet of the Beglerbegis of Herāt and his greatest work, the *Yūsuf u-Zulaikḥā* begun in 1058 (1648) and finished in 1072 (1661—1662), was dedicated to one of these governors, 'Abbas Kūlī Khān Shāmlū. This, a poem of considerable length, is an imitation of Firdawsī's work of the same name and follows the original quite closely but endeavours to surpass it by using the most elegant language. Ethé calls the language of Nāzīm's images distorted and thinks that some of the details put in by him can only have a humorous effect on the reader. But it must be agreed that Nāzīm judged the taste of his period very well for his work became extremely popular, especially in Central Asia. While Firdawsī's poem is now known to only a few enthusiasts, manuscripts of Nāzīm's *Yūsuf u-Zulaikḥā* are still quite common in the bazaars of the larger cities of Central Asia as are those of the even more celebrated version of the same subject by Djāmī. His lyrical *Dīwān* is less well known, but it contains many excellent poems (especially ghazels) some of which are even at the present day sung by the classically trained singers of Bukhārā and Samarkand.

Bibliography: H. Ethé, *G. I. Ph.*, ii. 231—232; Rieu, *Catalogue*, p. 692b and 370a; *Yūsuf u-Zulaikḥā*, lith. Lucknow 1870.

(E. BERTHELS)

NÂZİR AL-MAZĀLİM (A.), "reviewer of wrongs". His office "combined the justice of the kādī with the power of the sovereign" and was instituted by the later Umayyads, who sat in person to receive petitions complaining of *ẓulm*. The early 'Abbāsids, from Mahdī to Muḥtadī, followed their example (Māwardī, p. 129; Baihaqī, *Kitāb al-Maḥāsīn wa'l-Masāwī*, ed. Schwally, p. 577; Mas'ūdī, *Murūdj*, viii. 21; Ṭabarī, iii. 1736), but after them the duty was undertaken by the vizier, whose failure to carry it out was regarded as a serious fault ('Arib, ed. de Goeje, p. 25). At Baghdād the Caliph Muḥtadīr ordered the *ṣāḥib al-shurṭa* to nominate faḳīhs who were to hear pleas in each of the maḥallas. The court of the Nāzīr concerned itself with: *a. ẓulm* committed by the Caliph's officers; *b. injustice* in the levying of taxes and *c. wrongful acts of kūtibs* in public offices. Other matters proper for the cognizance of the court were complaints by officials of non-payment of their salary or of excessive reduction of salary, the interests of *awḳāf* and the enforcement of decisions made by kādīs not strong enough to

have their judgments put into execution. The Nāzīr had much wider powers than the kādī. He could postpone decision on a case in order to consider and investigate evidence, a proceeding not open to the kādī, who is compelled to give judgment out of hand; he could use *irḥāb* (intimidation) to overawe a defendant into admission and could refer litigants to persons of responsibility who could act as arbitrators. The officer presiding, if he was the vizier or other highly placed official deputizing as Nāzīr for the sovereign, set aside a special day or days for the review of *maẓālīm*. The Nizām al-Mulk (*Siyāsat-nāma*, p. 10) regarded it as essential for the king to sit two days a week for the purpose, and in Egypt during the Fāṭimid rule, the vizier or the *ṣāḥib al-bāb* sat on two days of the week at the Golden Gate of the palace at Cairo. Complaints were there made orally if the petitioner lived at Fuṣṭāṭ or Miṣr and each plaint received was sent for necessary investigation to the *nā'ib* of the police or the kādī of the quarter concerned. If the person against whom complaint was made lived outside the two cities the petition was presented in writing.

Bibliography: Māwardī, ed. Enger, p. 129 sq.; Amedroz, in *J. R. A. S.*, 1911; Makrīzī, *Khitaṭ*, i. 402 sq.; Ḥarīrī, *Maḳāmāt*, Cairo 1300, ii. 42, with commentary of al-Sharīshī on *wālī 'l-djārā'im* and *al-ḥākim fī 'l-maẓālīm*.

(R. LEVY)

NAZMÎ, SHAIKH MEHMET B. RAMAZÂN, Ottoman poet and *Khālwetī Shaikh*. The son of a merchant named Ramazân b. Rustem, he was born in Constantinople in the *Ḳodja Muṣṭafā Pasha* quarter in 1032 (1622—1623). He became a disciple of 'Abd al-Aḥad al-Nūrī. In 1065 (1654—1655) he became *shaikh* (*pōst-nishīn*) in the *Khālwetī* monastery of Yawashdjē Mehmed Agha near *Shehr Emini*, later (1105 = 1693) also preacher (*wā'iz*) at the *Sultān Walīde* mosque. He died in 1112 (1700) and was buried in a special *türbe*. His son was 'Abd al-Raḥmān Rafī'a. Nazmī was considered a high authority on *Ḥadīth*. He wrote a number of works, none of which have been printed, namely: *Hadiyat al-Iḥkūwān* ("Present of the Brethren"): biographies of the seven greatest *Khālwetī* personalities (Yūsuf Maḥḥdūm; Muḥammad Raḳīye; Shāh-Kobād-i Shīrwānī; 'Abd al-Madḥid-i Shīrwānī; Shāms al-Dīn-i Sīwāsī; 'Abd al-Madḥid-i Sīwāsī; 'Abd al-Aḥad al-Nūrī) and some accounts of their successors.

His poetical works consist of the rhymed Turkish translation of the first book of the *Mathnawī* of Djalāl al-Dīn Rūmī, a *Dīwān* of the usual type (with many hymns and sacred songs); also the *Mi'yār al-Tarīqat* ("Touchstone of the Order").

Bibliography: Thureiyā, *Sidḡill-i 'oṭhmānī*, iv. 560; Hilmi, *Ziyāret-i Ewliyā*, Istanbul 1325, p. 120—121; Sāmī, *Ḳamūs al-A'lām*, vi. 4589—4590; Brusālī Mehmed Tāhīr, *Oṭhmānīl Müellifleri*, i. 175; Hammer, *G.O.D.*, iii. 596—597; Basmadjian, *Essai sur l'histoire de la littérature ottomane*, Constantinople 1910, p. 127.

(MENZEL)

NAZMÎ, MEHMET (according to the *Sidḡill-i 'oṭhmānī*: Nazmī Nizāmī), Ottoman poet of Adrianople in the period of Sulaimān al-Kānūnī. He was the son of a janissary, later himself became a janissary, then siliḥdār and sipāhī. He died in 996 (1588) in Adrianople, where he is buried in the *türbe* of *Shaikh Shudjā'*.

Nazmī possessed great poetic gifts and ability, which he displayed particularly in the clever and accurate imitation of other poets, in so-called *naẓīre's* (pl. *naẓā'ir*). He also himself wrote *ghazels*. He rendered a great service to Ottoman literary history by collecting an enormous anthology of the best Ottoman poems, arranged under the eight principal metres. This anthology contains 4,000 *ghazels* by 125 Turkish poets and *naẓīres* by himself in addition: *Madjma' al-Naẓā'ir*. He presented this work, which he brought down to the year 930 (1524), to the Sultān. Hammer deals fully with it, as it deserves.

He also wrote a *ghazel* with the rhyme *elif* on each *baḥr* of the *Risāle-i 'arūziye* of Waḥid-i Tabrizī.

Bibliography: Sehi, *Hesht Bihisht*, Istanbul 1325, p. 133; Thureiyā, *Sidjill-i 'othmānī*, iv. 560; Sāmi, *Kāmūs al-'Alām*, vi. 4589—4590; Brusali Mehmed Tāhir, *'Othmānī Mū'ellifi*, ii. 436; Hammer, *G.O.D.*, iii. 61—73.

(MENZEL)

AL-NAZZĀM, IBRĀHĪM B. SAIYĀR B. ḤĀNĪ' B. ISHĀQ, a Mu'tazilī theologian of the Baṣra school. Brought up in Baṣra, he spent the latter part of his life in Baghdād, where he died between 220 and 230 (835—845) while still, it seems, at the height of his powers. A brilliant poet, a philologist of note, and above all an extremely perspicacious and subtle dialectician, he is one of the most interesting figures in the culture of the 'Abbāsid period. He occupies a most important place in the development of Muslim ideas. He studied speculative theology in the *madjilis* of Abu 'l-Hudhail al-'Allāf, from which he soon separated to found an independent school. In Baṣra he vigorously continued the struggle waged by his teacher against Manichaeism but devoted his abilities mainly to the refutation of the Dahri philosophy, with which he was thoroughly acquainted. So far as we can judge, it was al-Nazzām who began the struggle, which was continued by Islām for centuries, against the philosophy of Asiatic Hellenism, the classic document in which is the *Tahāfut* of al-Ghazālī. In Baghdād he engaged in lively disputations with Murdjī and Djabri theologians, the traditionists and the *fuḳahā'*, submitting their views to a searching criticism which had considerable repercussions in the history of Sunni theology. On the other hand, his ideas seem to have had a considerable influence on the Mu'tazilī school of Baghdād in spite of the resistance which it offered to him. Al-Nazzām was above all a theologian. Two tendencies dominate his thought: zeal for *tawḥīd*, for the strictest monotheism, and zeal for the Qur'ān, which compelled him to set aside any other source of theology and ethics. His interest in religion was purely intellectual and emotion seems to have played a very limited part in it. His opponents described him as a Dahri; this is to misconceive completely the fundamental idea of his theological work; nevertheless it is quite true that it was the dispute with the Dahriya which imposed upon him the first principles of his dogmatics and which determined their structure, so much so that Islām in his hands assumed a rather strange form. His dogmatic extravagances brought down upon him the condemnation of almost the whole of the Muslim community and even of the Mu'tazila; it was however he who was the first to state several of the principal

problems of Sunni theology. His writings are lost but considerable fragments have been preserved, mainly in the works of his pupil al-Djāhiz. Many of the teachings which are attributed to him in books of writers on heresies were handed down by his pupils, not always correctly, as al-Khaiyāt tells us. The exposition of his theology given by al-Baghdādī in his *Kitāb al-Farq* probably goes back to Ibn al-Rāwandī; it is a typical example of misrepresentation and deliberately false interpretation. — On the main features of his theology and of his school, cf. the article AL-MU'TAZILA. Here we give a few observations on the problems of his theology.

1. *Aṣl al-tawḥīd*. Al-Nazzām's main interest here is to defend the Qur'ānic doctrine of the creation against the Dahriya which teaches the perpetual circulation of the elements and therefore the eternity of the material world. It is with this object that he develops the doctrine of the *zuhūr* and the *kumūn*, a strictly anti-Dahri thesis and one already adopted by Abu 'l-Hudhail al-'Allāf. His ideas regarding the body and its relations are the logical result of this teaching. The structure of these ideas is however strongly influenced by the polemic against Manichaeism, the fundamental problems of which al-Nazzām had studied deeply. In his positive demonstration of the dogma of the creation one occasionally thinks there are traces of Aristotelianism: the creation was a setting in motion and the created world is in a continual state of movement (even rest is defined as a form of movement). God is then himself immobile but at the same time the primordial moving power. The *tanzīh*, the distinction between the creator and creation, is carried a considerable distance. The divine attributes are represented to us by negations. The divine word is a body (therefore created) but that of man is an accident. The Qur'ān is miraculous because of the information it gives about the past and on account of the secrets which it reveals but not on account of its style, which men could have imitated if God had not prevented them (in reality there is no *mu'ārāfa* in al-Nazzām). Al-Nazzām fundamentally rejects the arbitrary interpretations of the Qur'ān given by the great authorities on Tradition, an 'Ikrima, a Kalbī, a Suddī or a Muḳātil b. Sulaimān; he demands a strictly literal exegesis. Prophethood has always been universal, i. e. all the prophets and not Muḥammad alone have been sent to the whole of humanity (against the traditionists; al-Nazzām thus did not deny the prophethood of Muḥammad).

2. *Aṣl al-'adl*. The freedom of the human will is restricted, according to al-Nazzām in a way that anticipates the Ash'ari theology. All the actions of a man are movements, therefore accidents and movements which relate only to the man himself; the effects which are realised outside of the man are not due to him but to the natural forces which God has placed in his body (denial of *tawallud*). Man is the *rūḥ*, which penetrates the body; the body in its turn represents an infirmity (*āfa*) of the *rūḥ*. Now it is the body, different from man in the strict sense, which sets in motion the action of which man (i. e. the *rūḥ*) is capable. It follows that man (the *rūḥ*) is capable of the action before it is realised (*al-istiṭā'a kalba 'l-f'i'*), but at the moment when it is realised, the man is not capable of it.

3. *Aṣl al-wa'd wa 'l-wa'id*. Al-Nazzām is very

keenly interested in practical problems of *fiqh*; we know his views and those of his school on the *ṣalāt*, on fraud and on ritual purity (in which connection he gives some very curious psychological explanations). But he is particularly concerned with the *uṣūl*. He waged a passionate campaign against the *aṣḥāb al-ra'y wa 'l-ḥiyās*, therefore against the Ḥanafis who were the representatives of the Murdjs. He flatly refused to admit *ra'y* and *ḥiyās* and did not shrink even from attacking the great men among the *ṣaḥāba* who in his opinion had been guilty of using them. He was in this way led to criticise violently the institution of the *idmā'* which however he admitted to a certain extent. Through all this he prepared the way for Dāwūd al-Zāhiri and the Zāhiriya school.

(H. S. NYBERG.)

NEBUCHADNEZZAR. [See BUKHṬ NAṢAR.]

NEDJD, the highlands of Arabia in contrast to the low-lying ground along the coast (*Tihāma*) or the depression (*Ḡhōr*). In the dialect of the Hudhail Nadjd is pronounced *Nudjd*. The exact application of this originally topographical conception is very differently understood and sometimes it means more generally the elevated country above the coastal plain or the extensive country, the upper part of which is formed by the *Tihāma* and the *Yaman* and the lower by *Syria* and the *ʿIrāk*, or the part of Arabia which stretches from the frontiers of al-Yamāma to al-Madīna and thence across the desert from al-Baṣra to Baḥrain on the Persian Gulf (Iṣṭakhri, Ibn Ḥawḳal) or the territory between the *ʿIrāk* (al-ʿUdhayb) and Dhāt ʿIrḳ (Ibn Khurdādhbih) or from the *ʿIrāk* to al-Tihāma (Ḳudāma) or the land which lies behind the so-called Ditch of Chosroes (Kisrā) as far as the Ḥarra (al-Bāhili), or lastly, the territory between the depression of the Wādī 'l-Rumma and the slopes of Dhāt ʿIrḳ (al-Aṣmāʿī). That originally the name was applied to the plateau only is evident not only from the definitions of the separate authors but also from the fact that Nadjd appears in combination with various place-names; thus al-Aṣmāʿī (Yāḳūt, iv. 745) knows of Nadjd Barḳ (in al-Yamāma), Nadjd ʿUfr, Nadjd Kabkab (near ʿArafāt), Nadjd Marīʿ (in the *Yaman*), al-Bakrī (ii. 574) besides the three last named mentions Nadjd al-Yaman, Yāḳūt (iv. 750 *sq.*) further mentions Nadjd al-Ḥidjāz, Nadjd Alwadḥ in the country of the Hudhail, Nadjd al-

Sharā, al-Hamdānī (p. 55) Nadjd Ḥimyar and Nadjd Madhīdj along with a number of places not otherwise known which are combined with Nadjd. Hamdānī (p. 177) further makes a distinction between upper Nadjd (*Nadjd al-Ulyā'*) which is regarded as Nadjd proper (*al-Nadjd*) and in which he includes the district (*kiṣra*) of Djurash and the town of Yabambam, and lower Nadjd (*Nadjd al-Sufā'*) which is described as *Arḍ Nadjd* and with the *Ḥidjāz* and al-ʿArūd forms Central Arabia (p. 1, 5 *sq.*, 36, 18 *sq.*), the territory in which pure Arabic is spoken (p. 136, 8 *sq.*). The original meaning is also seen in the dual Nadjdān, which, it is interesting to note, is used for two mountains in the Adja' range, as well as in the place-name Nadjdā Marīʿ and in the spring pasture ground Nadjdān in the land of the Khath'am mentioned by the poet Ḥumaid b. Thawr (Yāḳūt, iv. 745).

That the wide interpretation of the name Nadjd above given is not unjustified is shown by the foundation in the second half of the fifth century A.D. by Ḥārith, chief of the Kinda, of a short lived kingdom which extended from the Syrian *limes* and al-medina to al-Yamāma or from the hill of Ṭomiya in the N.E. on the Wādī 'l-Rumma to Dhāt ʿIrḳ. At a later date, the whole of al-Nadjd belonged to the administrative district of al-Yamāma (Yāḳūt, iv. 746).

The widest area to which the name Nadjd has ever been applied is probably that of the present kingdom of the same name which owes its origin to the Wahhābī chief ʿAbd al-ʿAzīz b. ʿAbd al-Rahmān Āl Saʿūd, who, as Amir of Nadjd conquered Riyāḍ in 1903, was chosen sultān of Nadjd and the adjoining lands in the summer of 1921, on Jan. 10, 1926 conquered the *Ḥidjāz* and on Jan. 19, 1927 was proclaimed king of Nadjd and its dependencies at Riyāḍ. The frontiers of his kingdom are: in the east, the Persian Gulf from Djafūra and Ḳaṭar to Rās al-Mish'ab, then the neutral zone between Nadjd and Kuwait from this promontory to Rās al-Ḳilliya; in the west the kingdom of the *Ḥidjāz*; in the south the line which runs from the port of Ḳunfudḥa on the Red Sea south of Abḥā in ʿAsīr and south of the Wādī 'l-Dawāsīr and includes Nadjran. The war at present going on between the king of Nadjd and the Imām of al-Yaman may perhaps alter this frontier, especially as Djawf in the *Yaman* has previously been a bone of contention. The northern frontier which was delineated by treaties between the ruler of Nadjd with the ʿIrāk and England on the one side (signed at ʿUḳair on Dec. 2, 1922) and Nadjd, Great Britain and Transjordan on the other (signed on Nov. 2, 1925 at Ḥadda in the *Ḥidjāz*) runs along the neutral zone between Nadjd and the ʿIrāk (29—30° N. Lat. and 45—46° East Long.) and is then continued in a line running N. and N.W. to the intersection of 39° E. Long. and 32° N. Lat. and leaves the Djabal ʿAnēze on its north, then S.W. to the Wādī Raḍīl and passing through in the S.E. the point where 38° East Long. and 30° N. Lat. intersect. The Wādī Sirḥān is thus still in Nadjd. This line continues towards the south from 25° to 38° East Long. and crosses the *Ḥidjāz* railway towards ʿAḳaba. The extent of the territory is estimated at 900,000 square miles and its population at 3,000,000. The capital is al-Riyāḍ; the more important towns are Buraida (Berēde), ʿAneiza (ʿAnēze), Ḥaʿel (Ḥayil), Tharmala,

Shakrā, Madjma'a, Huraimala (Harēmle), al-Hufhūf and al-Ḳaṭīf. The population, which with the exception of al-Ḥasā with 30,000 Shī'īs and a few Sunnīs has almost entirely adopted Wahhābism, belongs to the tribes of Muṭair (Meṭēr), Ḥarb, 'Utaiba ('Atēbe), Subai', Dawāsir, al-'Uḍjīmān, al-'Awāzim, al-Suhūl, Benī Murra and Ḳaṭṭān.

The North-Arabian Nadjd forms a part of the great desert plateau which is formed of primary rock with overlying sandstone and volcanic outbursts and has two great mountain ranges running through it; that in the north is about 40 miles long and at its northeast end some 4,500 feet high, known in ancient times as Djabal Taiy or Djabalā Taiy, i.e. Adja' and Salmā (Hamdānī, p. 125, 15 sq.), is now called Djabal Shammar or Djabal Idjā (Adja').

'Ammāriya or Djidd, which towers some 500 feet above the ridge usually 2,000—3,500 feet high. The long southern part of the Ṭuwaik is intersected by numerous wādīs which lead the water that falls in the rainy season to the Rub' al-Ḳhalī. Its most important part is the Aflādj, 40 miles long, with the oasis of Laila.

Nadjd is in the main steppe and desert. Nafūd and Dahna occupy the greater part of northern Nadjd while the Rub' al-Ḳhalī joins them on the S. E. There are no perennial streams in Nadjd so that the country has to rely upon subterranean channels of supply which are at various depths and have to be reached by wells. In the oasis of al-Ḳhardj the wells are from 20 to 40 feet deep, in Aflādj 50—60 feet, in Ḥa'il and al-Riyāḍ about 80 feet. Sometimes these springs form ponds, for

Map of Arabia with the new frontiers of Nadjd according to Amin Rihani

Both ranges, which rise out of a tableland levelled by weathering, are of granite. The Djabal Adja' stretches from N. N. E. to S. S. W., about 35 miles S. E. of it in approximately the same direction the Djabal Salmā, in front of which in the S. W. lies the Djabal Ramān, while S. E. of the Djabal Salmā lies the Ḥarra of Faïd, of volcanic origin.

S. E. of this rises the sandstone plateau, overlaid with limestone, of Djabal Ṭuwaik (Ṭuēk) running N. W. to S. E., which forms the western declivity of a plateau which has come into existence through weathering and slopes towards the Persian Gulf on the one side and the sands of the desert of Rub' al-Ḳhalī on the other. It begins S. E. of the district of al-Ḳaṣīm (S. E. of the Ḥarra) and stretches E. from al-Waṣm to al-'Arid with the town of al-Riyāḍ and then turns, west of the Ḳhardj oasis, S. S. W. towards the Wādī 'l-Dawāsir. The most important peak on this edge of the plateau is the Djabal

example in al-Ḳhardj the springs of which form three pools, the largest of which is 150 paces long and 80 broad (cf. the picture in Philby, ii., p. 34) while the springs of Aflādj feed a lake nearly a mile long and a quarter of a mile broad (Philby, ii., pl. at p. 86). These supplies sometimes dry up suddenly, probably because they have found a subterranean exit as has happened in the case of two water-holes in Aflādj and the two larger ponds in al-Ḳhardj. The hydrographic conditions of the country are therefore exceedingly dependent on the rainfall from the summer and winter rains. The former (*wasnī* or *maṭar al-ṣaif*) fall in August and September and particularly refresh the pastures which the summer sun has dried up, while the latter produce a springlike effect in the land on which they fall. The classic phrase *saḳā 'llāḥu Nadjidan min rabī'in wa-ṣaifin* (Bakrī, ii. 627) eloquently sums up this state of affairs. Heavy rain-falls were also observed in April 1871 in the central

Wādī 'l-Rumma and in May in 'Anēze between Djabal Salmā and 'Anēze (1884 Ch. Huber), and Philby (ii. 10) noticed thundershowers in May as well as drizzle, while Doughty met with hail at Khabra (near 'Anēze) in April. That the climate here cannot have changed very much is evident from Ibn Djubair who records very heavy showers in this district in April 1184 A.D. Huber met with rain in June 1884 between 'Anēze and Mecca, Sadlier at the end of July 1819 between al-Ḥasā and Dar'īya heavy thunderstorm and rain, which however was described by the natives as unprecedented. Philby (i. 141, 147) records thunder and rain in December. The rainwater collects in the hollows below the thick layer of sand and enables palms to grow and also, on chemically decomposed fertile soil, wheat and barley, vegetables and fruit-trees. The hot summer of course everywhere makes it necessary to water the crops from wells. On the other hand, the frequently very sudden flooding of the water-courses led in quite early times to the building of dams to hold back and store the water; such were built in the Wādī 'l-Rumma at 'Aneiza (Bakrī, i. 207; Yāqūt, iii. 738), Dar'īya (Bakrī, ii. 637) and on the road from al-Yamāma to 'Aneiza (al-Hamadḥānī, p. 174, 192). Doughty found remains of such dams in the Djabal Adja'.

The district of al-Sharaf is the richest part of al-Nadjd, and the valleys of the Wādī 'l-Djarir and Wādī 'l-Miāh are celebrated for their pastures. Here the early caliphs had vast grazing grounds (*himā*) e.g. in Dar'īya, al-Rabadha, Fa'id, al-Nir, Dhu 'l-Sharā' and Naḳī'. The most famous was that of Dar'īya, where the caliph 'Omar I secured an area six Arab miles in diameter as pasture for 300 horses and 30,000 camels for the army. 'Othmān extended this area until the diameter was ten miles. The 'Abbāsīd al-Mahdī abandoned it, as the policy of this dynasty was to neglect Arabia deliberately in contrast to the Umayyads who, for example, intensively colonised western Nadjd. In the sixth century A.D. Nadjd was still well wooded, and al-Sheruba, south of the Wādī 'l-Rumma, and Waḍjra were particularly celebrated in this respect, while at the present day they only possess scanty remnants of these forests. Many areas seem to have been ruined by drought or disastrous inundations (Philby, i., p. 115; ii., p. 9); the decline of al-Yamāma is probably due to the latter cause. Crops are sometimes damaged by sharp frosts — in winter (January) the temperature sometimes sinks from a maximum of 53° F. by day to below 23° and ice and snow have been occasionally seen at the higher levels — while the summer drought with a maximum temperature of 113° destroys the crops. The two most important wādīs are the Wādī 'l-Rumma about 650 miles long, which runs right across the plateau of North Arabia, rising in the Ḥarra of Khaibar and entering the Euphrates plain at Basra, and the Wādī 'l-Dawāsir. These have formed since ancient times the two main routes of traffic in Central Arabia.

It is with the object of improving agriculture that the king of Nadjd is endeavouring to keep the Bedū to the soil. Every tribe or clan has therefore been allotted a definite area of ground near a well where huts are being erected and the ground planted. These new settlements are called *hidra*. In the last ten years, since the revival of Wahhābism, about 70 of these colonies with

2,000—10,000 inhabitants have been established; the most important is Irtawiya built in 1912; Rihani (p. 198) gives a list of others. In this way not only is the cultivation of the land secured but the revenues of the state are increased; these consist of the *zakāt* (10% on movable property), the customs, a fifth in case of war and (formerly) £60,000 subsidy from England. The coins in circulation, in addition to the Maria Theresia dollar, are the English and Turkish sovereign, the Indian rupee and copper coins of 'Omān of the last century, 60 of which go to the dollar. The once famous gold mines of the Banū Sulaim at al-'Aḳīḳ, al-Mudjaira and Bisha (Hamdānī, p. 154, 4 sq.) are now no longer of importance and unlike al-Yaman, the country possesses no industries.

NEDROMA (Ar. NADRŪMA), pron. *Nedrūma*, and sometimes *Medrūma*, 40 miles S.W. of Tlemcen, has since the dawn of the modern period been the most important town in the hilly country between the sea on the north, the lower course of the Tāfnā on the east, the plain of Lālla Moḡhniya (Marnia) on the south and the Algero-Moroccan frontier on the west. It is the country known since the xvth century A.D. as the land of the Trāra, Berbers converted to Islām and Arab culture in the period of the Idrisids who were known in the middle ages as Kūmya. This little Berber bloc, speaking Arabic, forms with Nadrūma, which is as it were the heart of it, a whole so homogeneous that they cannot be dealt with separately.

I. Past History. We may reject the childish etymology *Ned-Roma* "resembling Rome" given by Leo Africanus (ed. Schefer, iii. 13). Nadrūma was first of all the name of a tribe, a section of the Kūmya family of the Berber stock of the Banū Fāten (Ibn Khaldūn, *Berbers*, transl. de Slane, i. 251). The name is mentioned by al-Baidhāḡ (ed. Lévi-Provençal, *Doc. inéd. d'Hist. Almoh.*, Paris 1928, p. 44; transl., p. 66) where we must understand by *al-kārya Nadrūma* "the people of the citadel (i.e.) the Nadrūma". This passage, written in the xiith century, would tend to show how the name of the tribe of the Nadrūma became attached to the little town which was then their principal centre.

Before this period however, Nadrūma was the name of the town, for al-Bakrī (xith century) gives it this name and gives us a brief description of it; he qualifies it as *madīna* "town" and not as simply *kārya*. In the time of al-Idrisi (cf. the *Bibl.*) in the xiith century, the town was a prosperous one surrounded by walls and had an important market. There is no doubt also — although these two geographers do not mention the fact — that Nadrūma had a mosque.

In the ixth century A.D., the Muslim geographer al-Ya'qubī (*Kitāb al-Buldān*, ed. de Goeje, p. 18 and transl., *Descr. al-Maghribi*, Leyden 1860, p. 117) mentions a considerable town inhabited by Berbers at the extreme boundary of the lands ruled by the descendants of the Idrisid Muḡammad b. Sulaimān. The name of this town, written in the Arabic texts فالوسين, might be Fālaūsen or Fāllaūsen, but with difficulty "Fellousen" (cf. R. Basset, *Nidromah et les Traras*, p. 7, N^o. 2) on account of the present day pronunciation of the word by the natives of the country. René Basset (*ibid.*) thinks this town could be identified with Nadrūma, built on the N.W. flank of mount Fāllaūsen (modern local pronunciation) — the Fillausen of the maps.

The Almoravids of the xith—xiith centuries gave Nadrūma an important mosque and a pulpit, in-

spired, G. Marçais says, by that of the Great Mosque of the Umayyads of Cordova as that of the Almohad Kutubiya of Marrākush was later to be. This fact alone would suffice to show the importance in the Almoravid period of this Muslim centre which must have been the greatest in the land of the Kūmya at this period.

Nadrūma had access to the sea by several small ports, the most important of which, Honain, which also served Tlemcen (cf. Marçais, *Honain*, in *R.A.*, 1928, p. 333—350) was however somewhat difficult of access from Nadrūma by the very steep N.W. flank of mount Tādjra. This town had therefore rather to use the port of Māsīn (al-Bakrī) which was only 10—12 miles away, easy of access at the end of a valley (Wādī Māsīn) north of Nadrūma.

In the Almohad period Nadrūma as well as all the land of the Kūmya, where 'Abd al-Mu'min, the first caliph of the dynasty, was born, must have been the object of special solicitude by these rulers, who were lords of Africa and Spain. Moreover it was on the Kūmya, the tribe in which they originated, that the Almohad caliphs relied for support — like all Muslim rulers —: these Berbers were the best auxiliaries in the conquests and the most reliable supports of the throne of Marrākush. Although the name of the Kūmya has now disappeared and has been replaced by that of Trāra, it would be too much, as we shall see, to think that the Kūmya tribes disappeared in the wars of the Almohads.

The name Trāra is quite recent; it appears, it seems, for the first time in a treaty of union — of which the Arabic text is given by R. Basset (*loc. cit.*, *App.*, p. 212—218) — between the Arab and Berber tribes of the N.W. of Oran and eastern Morocco, prepared in 955 (1548—1549) in anticipation of the struggle with the Spaniards, then lords of Tlemcen. In the text the Trāra are described as made up of many sections, the names of which are unfortunately not given. At later dates we again find this name of Trāra in various authors without being able to say to which it refers. As in the xith—xiith centuries, Nadrūma is still the capital and the principal town for these tribes.

Most of the Trāra tribes of to-day have preserved the names which the same Kūmya tribes bore in the time of the caliph 'Abd al-Mu'min.

This little Berber capital was undoubtedly never very large if we may judge by the traces still visible of its walls, which have hardly changed since the time of al-Bakrī. It appears in the history of the middle ages, as in modern times as one of the chief towns of the province of which Tlemcen was the capital, whose political and religious influence dominated it and whose destinies it followed.

When in the xiith—xvth centuries, Tlemcen being the capital of the 'Abdalwādid kingdom, Nadrūma, a peaceful town with a temperate climate, in a charming position, overlooking the blue sea a few miles away, became the country resort of the rulers and princes of the royal house. They had a fortified palace there (the *ḡaḡba*) of which considerable remains of the surrounding wall still stand as well as the walls of the buildings. It commanded the town, standing quite near it on the south, and its ruins are still called *ḡṣar eṣ-ṣolṭān*. It was to this place that Abū Ya'qūb Yūsuf, renouncing the royal throne of Tlemcen to the advantage of his two younger brothers Abū Sa'īd

and Abū Thābit, retired in 749 (1348) to live far from the court and politics in meditation and prayer (Ibn Khaldūn, *Berbères*, transl., iii. 422 sqq.; Yaḥyā b. Khaldūn, *Hist. des Rois de Tlemcen*, ed. and transl. A. Bel, Algiers 1903-1910-1913, ii. 14, 18).

It was here that his son Abū Hammū II (reigned at Tlemcen 1359-1389) lived with him and the latter's son was born, Abū Tāshfin II who dethroned his father and reigned after him (1389-1393).

This pious withdrawal of Abū Ya'qūb to Nadrūma was only to last about four years until the conquest of Tlemcen and Nadrūma by the Marinids of Fās in 1352.

No king and apparently no prince was ever buried at Nadrūma. There is however the mausoleum of a saint in the midst of the ruins of the palace. The individual whose tomb it is believed to mark is called "Sidi Sulṭān". Neither the name, nor history, which does not mention him, nor legend, which simply makes him come from Egypt at a remote period, tells us anything of value about him. Nevertheless, in view of the numerous similar examples of the creation of holy places sacred to saints by the Berbers, who are of a deeply religious nature, and in particular by the Berbers of Nadrūma and the Trāra, it is easy to reconstruct the process of the foundation of the mausoleum in question. The sojourn in the palace of Nadrūma of a great prince who had abandoned his rank for a life of devotion must have impressed the people of the time and long afterwards the spiritual merits of this "sulṭān" must have been related, as one who had certainly been touched by the grace of Allāh. When many years later the name and story of this devout king had been forgotten, the place where he had lived, this *ḡṣar eṣ-ḡolṭān*, this *ḡaṣba* as it is still called, although in ruins, impregnated with his sanctity — his *baraka* — remained a holy place. It was only a very short step from this to localise the centre of radiation of this *baraka* in a little sanctuary in which prayers could be addressed to the unknown saint who is alleged to be buried there. At the present day the little white dome covering the so-called tomb of Sidi Sulṭān under a very old wild olive tree is the goal of the pilgrimage of numerous women; they come there particularly to seek the cure of a sick child; they expect to obtain this by the fumigation of the invalid with leaves from the olive-tree. Men also visit it. Every year the negroes of Nadrūma (who say that Sidi Sulṭān was a descendant of Bilāl, the Prophet's *mu'adhḡin*) go there on a mass pilgrimage and sacrifice a bull calf; they hope thereby to obtain the regular rainfall needed by the district.

If we have dealt rather fully with this feature of the religious mentality of the people of Nadrūma, it is because it is a sign, among many others, of one of the most characteristic aspects of the religion of the Berbers and of those of Trāra. Maraboutism is so developed among them that René Basset in his study of Nadrūma and the Trāra has collected the names and sanctuaries of 296 holy men and 9 holy women, which is a large number for so small an area. This however does not prevent the people from observing as well as they can the ritual duties of Sunnī Islām and of zealously attending the many mosques in Nadrūma and in all the villages of the Trāra.

It has been been mainly since the xvth century,

during the great popular mystical movement which spread through all North Africa, that the people of Nadrūma and the Trāra have developed this cult of saints and placed all their trust in men of religion and Ṣūfism. Particular evidence of this was seen in the assembly on the banks of the Wardafu, on the borders of the land of the Trāra, of the tribes of the region of Nadrūma and the adjoining country when in 1548 the holy man al-Ya'qūbī, whose venerated *zāwiya* [q.v.] is a little to the west of Nadrūma, led them against the Spaniards who then held Tlemcen.

As a matter of fact the Spaniards who were established in Oran and Tlemcen were never able to occupy Nadrūma and the land of the Trāra. The Turks who finally occupied Tlemcen and the province were not always warmly welcomed there. On several occasions the sulṭān *sharifs* of Morocco were able to advance their frontiers to the lower Tāfnā. However the Turks ended by establishing their authority which lasted until the conquest of Algeria by the French. Nadrūma and the Trāra did not at once accept the rule of 'Abd al-Ḳādir; they preferred to be under the sulṭāns of Morocco. Later they took the side of the emir against the French and it was in these mountains that 'Abd al-Ḳādir often found a safe asylum when he was defeated, even after 1842 when the French occupied Nadrūma, and notably in 1845 at the time of the famous affair of Sidi Brāhīm (cf. P. Azan, *L'Emir Abd el Kadir*, Paris 1923, p. 207-214) a few miles west of Nadrūma.

II. The Present. Nadrūma, surrounded by gardens full of olive and other fruit-trees of various kinds, rises in terraces which lie on a well-marked hog's back sloping from N. to S. running from the Ḳaṣba; it is enclosed in a quadrilateral of about 15 to 20 hectares, which is still marked by the traces here and there of its old walls.

This town has preserved the appearance of a city of Western Islām with the Great Mosque dominating the houses with its high square minaret. A small square (*tarbi'a*) off which open the *sūks* gives a little open space for this building and the central quarter which also bears the name of *tarbi'a*. Other smaller mosques are in the different quarters but they are hardly to be distinguished from the surrounding houses because they do not have minarets or only a very low one hardly rising above the roof. The chief of these mosques is the *Djāmi' al-Ḳaddārin*, the "mosque of the potters", which is said to be the oldest of all. It and the Great Mosque are the only two in which the Friday *ḡhuṣba* is held. It is in the Banī Zid quarter in the S. W. of the town. In the Rās Ezzmā'a quarter in the S. W. are the chapels of Sidi Bū 'Alī and Lālla 'Ālya; those of the *Djāmi' Haddādin*, Dj. Arraiya, Dj. Sidi Syādī are in the quarter of Darb al-Sūḡ, to the north of the great mosque and town. At the hours of prayer all these mosques are filled with pious Muslims, many of whom possess a certain amount of Arab culture and religious knowledge; most of them are anxious to have a Muslim education and to give it to their children in addition to French education in the French elementary schools.

Petty traders of experience and agriculturists tilling their fields, the people of Nadrūma also include a considerable number of capable artisans. We shall here confine ourselves to mentioning two of the oldest and most important local industries

of Nadrūma: that of the weavers (*darrāzīn*) and that of the potters (*ḡaddārīn*).

The weavers of Nadrūma have retained their ancient loom with low warp without any modern improvement not even the picker, and all the old equipment of their ancestors, notably the warper (*na'ūra*) and spinning wheel (*roddāna*.) On the loom, material and method of working, one may compare what is done in Tlemcen in identical fashion (cf. A. Bel and P. Picard, *Le travail de la laine à Tlemcen*, Algiers 1913, p. 63 sq.). The weavers of Nadrūma now make only woollen blankets (*būrābaḡ*), white or decorated with stripes of colour, hooded cloaks with very short sleeves (*djallāba*), the white *ḡā'īḡ* for men (particularly old men here) which is a long piece of wool without seams, which is wrapped round the body in a certain way. Nadrūma makes several kinds of *ḡā'īḡ* (cf. *L'industrie de la laine*, loc. cit., p. 109).

The potters have for centuries from father to son had their ateliers in the upper part of the town in the S.E. beside the *Ḳaṣba*. They make pots and other articles on wheels (*ma'ūn*) of the usual type driven by the foot: cooking pots of rounded shape without handles called *ḡadra* (whence the name *ḡaddārīn* given to the potters), cooking dishes for ragouts (*ṭādjīn*) and for barley or wheat girdle cakes or different kinds of cakes (*maḡla*), portable ovens (*maḡjimar*), *ṡḡerrāda* which is in the form of an oven with an earthenware dome above it shaped like the bottom of an inverted pot on which is poured the liquid paste of these pancakes, as thin as paper, which on account of their thinness are called by the Beduins in Orania *rgāḡ* "slices" and in Nadrūma as in the towns are called by the old Arabic name of *ṡḡrīd*. When required the potters of Nadrūma also make other earthenware articles such as flower-pots (*mḡabḡḡa*) and the musical instrument called *agwal*, used by women, consisting of a large earthenware tube, one of the ends of which is closed by a skin stretched over it which is beaten.

The total population of the town of Nadrūma is 7,051 of whom 6,124 are Muslims, 850 Jews and about 200 Europeans (chiefly French). The Jews do not actually have a special quarter but they live almost entirely in the two streets of the Darb al-Sūḡ and in another in the Banī Zīd quarter; they are petty traders, labourers and artisans (it is they who make the saddles for the mules and asses). The majority are of Berber origin; they are usually poor. Although they only marry with one another and live apart from the Muḡammadans, the Jews live in houses quite like those of the Muḡammadans, lead the same kind of life and use an Arabic dialect among themselves.

The negroes (*'abīd*) who are not very numerous are called *gnawa* (Guineans) and live in a separate quarter in the west centre of the town. They are in very humble circumstances, stokers of the bakers' ovens or the furnaces of the baths, labourers and workmen. Although regarded as Muslims, their religious life is not at all regular and they are regarded, as elsewhere, as more or less of sorcerers.

The French element is very small; it consists almost entirely of officials and their families. They live by themselves in the public buildings (schools, gendarmerie etc.) and in European houses roofed with red tiles, which form an entirely distinct quarter outside the native town (to the N. and N.E.).

Nadrūma is the capital of a mixed commune. The civil administrator who lives there has under his authority the town and the Trāra tribes of the neighbourhood: *Djāla*, *Zāwīyat al-Mīra*, *Suwāḡliya*, in the West and N.N.W., *Banī Mnīr*, *B. Miṡḡal*, *B. Ḳhallād*, *B. 'Abēd*, in the N.E., E. or S.E. the population of which numbers 47,224 native Muslims and 83 Europeans.

The other Trāra tribes are not under Nadrūma: these are the *Msīrda*, in the extreme N.W. who belong to the mixed commune of Marnia; the *B. Warṡūṡ* and the *Ulḡaṡa ḡḡrāba*, to that of Remchi-Montagnac.

On Thursday which is the market-day there come into Nadrūma large numbers of people from all the country round; they bring in their stock, especially sheep, goats, cattle and mules and, according to the season, the produce of their fields and gardens (wheat and barley, almonds, carobs, figs, grapes, etc.) and of their flocks (wool and goat-skins, butter, curds etc.) as well as chickens, eggs and honey. The country artisans (men and women) bring in the articles they have manufactured (articles of woven grass, walking-sticks and little articles of wood carved with the knife with Berber designs), wool, articles of terracotta, notably Berber pottery decorated with geometrical designs, made by the women of *Msīrda* (and similar to the other Berber pottery made by the women of Kabylia, the *Tsūl* and elsewhere).

It is on market-day that one realises that Nadrūma is the economic centre of the whole district of the Trāra and sees the variety of products of the soil and industry of these Berbers.

The abundance and variety of these products are not due only to the activity of the inhabitants; the climate and the soil also help. The climate is fairly equable: tempered by the proximity of the sea it is never extreme as in the case of continental districts. For the rest, the height of the hills, while sufficient to encourage rainfall, is not very great: it does not exceed 3,500 feet at Fallausen and 1,200 at Nadrūma. It is therefore only in the very hardest winters that snow for brief periods whitens the summits of the range. As to the soils of this coast range, which, between the depression of the *Tāfnā* in the east and the neighbouring plains of the Moroccan frontier in the west, runs from the *Wād Muīlaḡ* (2 miles N. of Marnia) to the sea, they offer a certain variety in their nature and origin. Around the primary massif, which includes the highest peaks, Fallausen and *Tādjra*, are several eruptive islets (granite) and hills of secondary formation (Jurassic). The lower areas, especially the plains of the N.W., as far as the coast (where there are several old eruptive mamelons) and the depressions of the S.E. and E. along the *Tāfnā*, are middle Miocene formations.

The mountains also possess numerous perennial springs which feed little streams which irrigate the gardens; there are also various minerals, several of which have been recently or are still being exploited by Europeans.

It is due to the quality of the clay around Nadrūma and the granitic sand used for moulds that the pottery industry is one of the oldest and most prosperous in the town. The native vegetation is abundant and varied; in addition to the many varieties of trees of the highlands (notably sumach [*ṡiḡḡa*], the wood of which is exported

to Europe through the port of Nemours), we may mention many kinds of plants used for medicinal purposes or dyeing. It is for example thanks to the madder abundant in these regions and used by the natives for dyeing the dwarf palm leaf that the people of Ulhāsaghra are able to make a fine and famous straw work (men's hats with high crowns and broad brims called *māll* — baskets of various shapes all of dwarf palm leaves). All these articles are prettily decorated in red on the yellowish white foundation of the palm leaf; they are known and purchased by the natives of the whole of Orania and eastern Morocco.

It is also owing to the abundance of pasture in these hills that the rural dwellers, none of whom however are nomads, can raise so many flocks especially sheep. The wool from their flocks is almost entirely used in the country by the weavers of Nadrūma and by the country women who by their weaving, using the loom with a high rail like all the women in North Africa, make a considerable part of the family's woollen garments. All these women are excellent spinners; they have a great reputation for the fineness of their work.

Even from chickens — to feed which the country women in the autumn collect the red fruit of the mastic which is very abundant in this country — the people, who are greedy of gain, make a profit; thousands of eggs also are exported every month from Nadrūma via Nemours, to France and particularly to England.

Bibliography: Besides the works quoted cf. especially: al-Bakrī, *Description de l'Afrique septentrionale*, Arabic text, ed. de Slane, Algiers 1857 (republ. in 1911), p. 80; French transl. in *J. A.*, 1839, series v., xiii. 142–143; al-Idrīsī, *Description de l'Afrique et de l'Espagne*, transl. Dozy and de Goeje, Leyden 1866, text, p. 172; Fr. transl., p. 209; Leo Africanus, *Description de l'Afrique*, ed. Schefer, Paris 1898, iii. 12 sqq.; Marmol, *L'Afrique*, transl. Paris 1667, ii. 324–325; Canal, *Monographie de l'Arrond. de Tlemcen* (in *Bull. soc. d'arch. et de géolog. d'Oran*, 1888, viii. 62–65); René Basset, *Nédromah et les Traras*, Paris 1901; A. Bel, *Tlemcen et ses environs; Guide illustré du touriste*², Toulouse n.d., p. 92–94. — For the history cf. the *Bibl.* in the article 'ABDALWĀDIDS, completed by that under ZAYĀNIDS, adding the reference to al-Baidhāk, quoted above. For the rest and especially for the ancient period as well as for the modern, there is a very full bibliography in the notes and references in *Nédromah et les Traras* by R. Basset. (ALFRED BEL)

NEF'İ, the greatest satirist of the Ottomans. 'Omar Efendi whose nom de plume (*makhlas*) was Nef'î came from the village of Hasan Kāl'a near Erzerūm (Eastern Anatolia). Not much is known of his early life. He spent his early years in Erzerūm where the historian 'Alī [q. v.], who was a *defterdār* there, became acquainted with him. During the reign of Aḥmad I fate brought him to the capital Stambul where he worked for a time as a book-keeper. He failed in an attempt to gain the sultān's favour or that of his son, the unfortunate 'Othmān II, with some brilliant *kaşidas*. It was not till the reign of Murād IV that he gained the imperial favour but his malicious, sarcastic and indecent poems soon brought him into disgrace. He was appointed

to the poll-tax office and later again became a member of the sultān's circle. His irresistible impulse to make all the notables of the empire the butt of his mockery made him a host of enemies. A satire on Bairām Pasha, the sultān's brother-in-law and vizier, who had succeeded in being recalled from banishment and again attaining influence, cost him his life. The mufti gave his sanction to the execution of the great poet. With the sultān's consent he was shut up in the wood-cellar of the serāy, then strangled and his body thrown into the sea. The year of his death is 1044 (beg. June 27, 1634), not 1045 as Ḥādjī Khalifa, *Fedhleke*, ii. 183 wrongly says (cf. on the other hand his *Kashf al-Zunūn*, iii. 318 and 631 where the correct date is given).

Nef'î wrote Turkish and Persian with equal ease. His mastery of technique and natural poetical talent make him one of the greatest Ottoman poets; he is also undoubtedly one of the greatest, although hitherto little known satirists. The reason why he is so little known is that a scholarly edition with full annotations of his Turkish *Dīwān* entitled "Arrows of Fate", *Sihām-i Kaḍā*, has so far never been undertaken, so that at the present day hardly any one is able to understand the countless allusions to particular circumstances and the veiled attacks on the individuals dealt with. The publication of his poems demands a knowledge of the conditions of his period and particularly of life at court which it is hardly possible to attain and which it would be very difficult to gather from the existing sources. Many of his flashes of wit and allusions are very difficult to understand. Many of his poems are distinguished by an obscenity which can hardly be surpassed and however great may be their importance for the social history of his time, they are of little value as evidence of his poetic gifts. The "Arrows of Fate" are directed against almost every one prominent in politics and society in his time. In *G. O. D.*, iii. 241, J. v. Hammer has compiled a list of them. Some of his poems which pillory existing institutions, like the popular saints, the Kalendar-dervishes [q. v.] etc. are of value for social history. Hardly one important contemporary was able to escape his scorn and ridicule. They were all made targets for his "Arrows of Fate" without mercy. He attacked the jurists ('ulamā') particularly unsparingly. Nef'î's Turkish *Dīwān* has been several times printed: two parts at Būlak in 1253 and in 1269 at Stambul. Selections (with ample evidence of 'Abd al-Ḥamid's censorship!) were published by Abu 'l-Diyā' Tewfik in 1311 at Stambul. There are MSS. in European collections in London, Leyden and Vienna. Mr. Walther von der Porten now (1933) in Zurich owns two particularly beautiful and old MSS. A short *Sāḫi-nāme* by Nef'î is mentioned in the catalogue of MSS. of the Leipzig council library by H. L. Fleischer (p. 547^b). On his death, cf. Farā'idizāda, *Tārīkh-i gūshen-i Ma'ārif*, i., Stambul 1252, p. 668, and Na'imā, *Tārīkh*, ii. 489.

Bibliography: In addition to the sources mentioned cf. also Gibb, *Ottoman Poems*, p. 208 and *H. O. P.*, iii. 252 sqq.; the history of Na'imā (i. 586) and Brūsālī Meḥmed Ṭāhir, *'Othmānī Mü'ellifler*², ii. 441 sq. (according to which parts of his Persian *Dīwān* were published in the *Khasane-i Fünūn*).

(FRANZ BABINGER)

NEFTA, a town in the south of Tunisia, lies 15 miles W. of Tozeur on the isthmus which separates the depressions of the *Shoṭṭ al-Djarid* and the *Shoṭṭ Gharsa*. In the middle ages it was considered one of the principal centres of the land of *Qaṣṭiliya* [q. v.] along with al-Hamma, Taḳiyus and Tozeur, which was the capital. It was regarded as a very old town. Nefta as a matter of fact replaced the town of Nepte or Aggarsel-Nepte. The Roman town must now be buried in the sands close to the present town. We may presume that there still existed in the early centuries of the Muslim period visible traces of the old town. Al-Bakrī tells us that the town was built of large blocks of stone (*ṣakhr*). The author of the *Istibṣār* regards the wall which surrounds it as having been built by the ancients. The dam on the Wed Nefta is made of Roman blocks if it is not actually of Roman work (Tissot).

Memories of the pre-Islāmic past were also found among the people of Nefta. Its large population was regarded as consisting for the larger part of descendants of Christians (*Ya'qūbi*, *Istibṣār*) who must have retained their faith for a considerable period. Ibn Khaldūn (*Berbères*, i. 146, transl. i. 231) remarks on the presence of Christians in the province of *Qaṣṭiliya* at the end of the xivth century. The outlying position of this province perhaps explains the survival of a Christian colony, which was exceptional in Barbary. It is moreover worth noting that the attitude of the people of Nefta in religious matters has often been non-conformist. In the tenth century, according to Ibn Hawkal, *Khāridjism* still survived there; in the eleventh century, according to al-Bakrī, the people of Nefta still professed the *Shī'a* "so that this town is called Little Kūfa". We shall see that at the present day it is an important centre of maraboutism.

The remoteness of the capital assured Nefta, like other towns of the Djarid, a fairly regular political independence. Like al-Hamma and Tozeur, it was long (probably from the period of anarchy which followed the Hilālī invasion) governed by a council of notables, the president of which held the position of a feudal lord, indeed prince. In the xivth century this office was held by the family of the Banū Khālaf, who claimed to be of Ghassānid Arab origin. The Banū Khālaf and the people of the oasis whom they ruled maintained regular relations with the Sulaimid Arabs of the great tribe of *Qo'ub* who periodically frequented the country around. A tradition of reciprocal service united these immigrant nomads and settled natives, the nomads defending at need against the attempts of the central power the settled population who in turn assured them their subsistence and the provision of their supplies. The central power when it felt sufficiently strong naturally endeavoured to bring the Djarid under its authority again. Nefta thus underwent alternately periods of subjection and independence. In 744 (1343) the Hafsīd caliph Abū Bakr sent his son Abū 'l-Abbās who secured the submission of the people of Nefta by cutting down a part of their palm-trees and putting to death nearly the whole of the Banū Khālaf. A century later (845 = 1441) the caliph Abū 'Omar 'Othmān, having taken Nefta, sacked it, executed the chiefs of the Banū Khālaf and placed the town under a *kā'id* of his own choice.

If the partial destruction of the palm-trees — a classical procedure — had brought the people

of Nefta to terms, it was because these trees supplied the greater part of their income. Very abundant springs (the largest of which rising north of the town forms the Wed Nefta) assured and still assure the life of this splendid oasis. There is at the present day a forest of 273,000 palm-trees there. Nefta was however also a commercial town, a wealthy emporium and a centre of the exchange of goods. Before the establishment of the Protectorate, trade was mainly carried on at two periods of the year: at the beginning of spring, when the expeditionary force which had come from Tunis to collect taxes could guarantee the security of the routes and at the end of summer when the marauding Arabs had left the country to buy corn in the north.

Consisting of merchants and farmers with the important aristocracy of the *Shorfā* [q. v.], the population of Nefta (estimated at the present day at over 13,000) is distributed over eight quarters separated from one another by palm-groves. Each of the quarters has its mosque. Al-Bakrī tells us that Nefta in his day had already a great mosque, several smaller places of worship and many baths. The places of worship belonging to the *zāwiya* of the various brotherhoods are still characterized by their hemispherical or ovoid domes. The most important *zāwiya* is that of the *Qādiriya*, an influential centre of worship. The architecture of the houses, the decoration of their façades with relieves of brick, contribute to give to Nefta an imposing appearance which is also characteristic of Tozeur.

NEHĀWAND. [See NIHĀWAND.]

NERGISÎ, properly NERGIS-ZĀDE MEHMET EFENDI, an important and distinctive stylist of the old school, poet and calligrapher. Born about 1000 (1592) in Serajevo (Bosna Serai) the son of the *nā'ib* Nergis Aḥmad Efendi, he received his education in Constantinople where he attached himself as a pupil to Kāf-zāde Faizī 'Abd al-Ḥaiy. On the completion of his studies he served as *müderris* and *nā'ib* in Gabela, Mostar, Yeni Pazar (Novibazar), Elbasan, Banyaluka and Monastir. He was on intimate terms with the *Shaiḫh* al-Islām Yahyā Efendi. He travelled a great deal. Nergisî was appointed imperial historiographer (*wak'ā nūwīs*) when Murād IV set out for Baghdad on the campaign against Eriwan. He died on the march at Gebize (Gebze) on the Gulf of Izmid as the result of a fall from his horse and was buried there (1044 = 1634). The other statement (Ḥabīb and Riyāzī) that he was buried in Aiyūb is not at all probable.

Nergisi is celebrated less as a poet than as a stylist. His stilted and unnaturally affected style (*Nergisi lisāni*) and his bombastic, overladen language were regarded as unsurpassed models for the whole of the period fascinated by this stylistic foolishness. Even in the older stylists far more importance had been attached to the word than to the sense. But Nergisi completely sacrificed sense to sound and let it all disappear in bombast. He is the most perfect master of this style with a language even more florid than that of Waisi, whose *Siyer-i Nebi* he tries to outdo; his style is even more extravagant and artificial, more laden with rare words, *sedîc* expressions and obsolete similes than any other.

The most celebrated of his works is his *Khamsa* (Quintet). Originally this consisted only of the *Khamsa* of the *Nihālistān* (the quintet of "offshoots") which was composed in imitation of Sa'di's *Gulistan* and *Būstān* in Monastir. It consists of five parts (*nihāl* = offshoots), viz. stories of liberality and magnanimity; of love; legends; stories showing how every one gets the reward he deserves; lastly, legends glorifying virtue and penitence. The contemporary allusions in the very realistic tales, little influenced by superstition, are important.

This original *Khamsa* was later expanded into the great *Khamsa-i Nergisi* by the addition of four other pieces: 1. *Iksir-i Se'adet* (also called *Iksir-i Dewlet*: Elixir of Happiness), the translation of a portion of the *Kimīyā al-Sa'āda* of the Imām Ghazālī, which had already been translated by the poet Sīhābī. Only Nergisi's translation however has become celebrated. The obligations of social life are dealt with in stories. This work, which also appeared separately, is of value for its ethical teaching; 2. *Mashāḥḥ al-'Ushshāḥ* (the sorrows of lovers): love-stories, which Nergisi collected when Kādī of Elbasan. As several of the stories in it were later included in the *Nihālistān* this part looks very small in print; 3. *Ḳānūn al-Reshād* (canon of the straight path), a translation of the book written for the Gīngizid Sultān Muḥammad Khubābanda: *Akhḫlāk al-Saltāna*: the duties of a ruler, a kind of mirror for princes. It is prefaced by a panegyric (*medīḥa*) of Sultān Murād IV, the Shaikh al-Islām Es'ad Efendi and the two Ṣadrs of Rūm and Anatolia: Ghānī-zāde and 'Azmi-zāde; 4. *Ghazawāt-i Maslama*: the wars of religion waged by the Omaiyyad Maslama b. 'Abd al-Malik against the Greeks and Byzantium. Maslama on his different campaigns had advanced as far as Constantinople, which he besieged; on this occasion he built the 'Arab Mosque in Galata. The book is taken from a work of Muḥyi al-Dīn. The *Khamsa* was twice printed (Bulāk 1255 and Constantinople 1285).

Nergisi also left a collection of 50 letters: *Inshā'* or *Münshā'āt*, which were collected by Shaikh Mehmed b. Mehmed Shaikhī, the continuator of the *Shakā'ik al-Nu'māniye*.

Nergisi also wrote a historical work: *Waṣl al-kāmil fī Aḥwāl al-Waṣir al-'ādil*, five *waṣf* on the history of the governorship of the warlike Bosniak Murteza Paṣha, Paṣha of Ofen, who died in 1636; this was written in Banyaluka in 1038 (1628). The holograph of his work is in the Enderūn-i Humāyūn Library in the Rewān Kōshki. No work exists from his brief tenure of the office of imperial historiographer.

Nergisi was also a great calligrapher particularly celebrated for his speed in writing. There are works written by him in several libraries.

(MENZEL)

NESH'ET KHÖDJA SULAIMĀN, an Ottoman poet. He was born in Adrianople in 1148 (1735), the son of the poet Aḥmad Rafi' Efendi, then in exile; the latter is known as *Muṣāhib-i Shahryārī*. With his father, who had regained the sultān's favour by writing a *sharkh*, which met with general approval, he came to Constantinople. He also accompanied his father on a journey to the Hūdjāz and the young Hādjdjī, on his way back, joined the Mewlewī order in Ḳonya. After his father's death, he devoted himself to study, especially Persian, in order to understand the *Methnewī*. In Persian, which he came to love passionately, he attained a high degree of perfection with the result that he had more pupils than an ordinary school in his house in Mollā Gūrānī, where he taught Persian and expounded the *Methnewī* (*Methnewī-Khānīk*). He enjoyed great prestige among the people. Later he attached himself to the Naḫshbandī Shaikh Brusewī Emin Efendi. He held a fief and therefore took part in 1182 (1768) in the Russian campaign. He could use the sword as well as the pen. Nesh'et died in 1222 (1807) and was buried outside the Top Kapu.

He received the nom de plume of Nesh'et from Djūdī. Nesh'et was a moderate poet but an admirable teacher. No one would say an unkind word about him and they winked at his smoking the *čibuk* which was otherwise forbidden. He wrote poetry in Turkish and in Persian. Many of his pupils far surpassed him, such as Ghālib Dede. He left a *Dirwān* which was printed in two parts in Bulāk (1252 = 1836). His *Makhlāṣ-nāme's* (about 20 in the *Dirwān*) are distinctive in character; these are poems in which he bestowed epithets upon gifted pupils. In addition he left writings on the Naḫshiye: *Tūfān-i Ma'rifet*; *Tarḡamat al-Ishk*; *Maslak al-Anwār wa-Manba' al-Asrār*. His *Terdjeme-i Sharḥ-i dū Bait-i Mollā Djāmī* was printed at Constantinople in 1263. A biography of him by his pupil Pertew Efendi which was continued by Emin Efendi is said to exist.

(MENZEL)

NESHRI. MEHEMMED, an Ottoman historian, with the nom de plume (*makhlas*) of Neshri; his origin is not definitely known. According to Ewliyā Celebi (*Siyāhetnāma*, i. 247), he belonged to German-eli [q.v.]. 'Alī, *Kunh al-Akhbār*, v. 225 sketches the career of a certain Mewlānā Mehemmed b. Neshri among the 'ulamā' of Murād II. According to him, the latter came at an early age to Brussa, studied there at the Sultān Medrese, was appointed *müderres* there and died in Brussa. In view of the rarity of the name — indeed it is not otherwise known —, it is probable that this Mehemmed b. Neshri was the grandfather of the historian. As to the latter we know only that he was a teacher in Brussa and it may be assumed that he died there in 926 (1520).

Neshri wrote under the title *Djihān-numā* a history of the world in six parts, of which only the sixth, dealing with Ottoman history, seems to have survived. This, usually called *Ta'rikh al-i 'Othmān*, is obviously a compilation but the question is still unsettled whether Neshri was the compiler or whether he copied a compilation already in existence in order to add it as a sixth part (*hism*) to his own compilation on the history of the world (cf. P. Wittek, in *M. O. G.*, i. 130, who decides for the second hypothesis). There are suspicious echoes of the work of 'Ashīk Pasha-Zāde and of Bihishti's Chronicle (cf. F. Babinger, *G. O. W.*, p. 43 sq.) and it should perhaps be investigated whether the *meddāh* Neshri made a popular version of Bihishti's *Ta'rikh* which was written in an elevated style, or the stylist Bihishti rewrote the work of Neshri in elegant language. The sixth part of the *Djihān-numā* is divided into three sections (*ṭabaqāt*): *Ewlad-i Oghuz*, *Saldjuks of Rūm* and the *House of 'Othmān*. The history of the Ottomans is narrated down to the time of Bāyazid II; the work comes down only to the year 1485, that is, as far as his sources go, of which one went up to 1485. He concludes with a *qaṣida* in praise of the ruling sultān in the middle of the reign of Bāyazid II. Neshri had considerable influence on contemporary and later historiography and is frequently cited as a source, e.g. by 'Alī, Sa'd al-Dīn, *Ṣolāk-zāde* and *Münedjdīm-bāshī*. A full survey of the contents of the *Ta'rikh* of Neshri is given by Wittek, in *M. O. G.*, i. 77–150. It has so far not been published. There are a number of good manuscripts in existence, e.g. in the Bibliothèque Nationale in Paris (*Suppl. Turc.* No. 153, a very handsome MS.) and No. 1183 of the Charles Schefer collection, and in Vienna, *Nat. Bibl.*, No. 986 (cf. Flügel, *Kat.*, ii. 209). Specimens of his text have often been published; see a list of them in F. Babinger, *G. O. W.*, p. 39.

NESİMİ, SAIYID 'IMĀD AL-DĪN, known as Nesīmī, an early Ottoman poet and mystic, believed to have come from Nesīm near Baghdad, whence his name Nesīmī. As a place of this name no longer exists, it is not certain whether the *laqab* should not be derived simply from *nasīm* "zephyr, breath of wind". That Nesīmī was of Turkoman origin seems to be fairly certain

although the "Saiyid" before his name also points to Arab blood. Turkish was as familiar to him as Persian; for he wrote in both languages. Arabic poems are also ascribed to him. Little is known of his life; it fell in the reign of Murād I (1359–1390) as his biographers tell us. He was at first a member of the school of *Shaiikh Shibli* (247–334 = 861–945) but about 804 (1401) he became an enthusiastic follower of Faḍl Allāh Ḥurūfī [q.v.] with whom he was undoubtedly personally acquainted. He championed the views of his master with ardour and at the risk of his life. The poet Ref'i, author (811 = 1408) of the *Beshāret-nāme* [copies in London, cf. Rieu, *Cat.*, p. 164 sq. and Vienna, cf. Flügel, *Katal.*, p. 461 and 462 (two MSS., the second more complete)], and presumably a *Gendj-nāme* (in Vienna, cf. Flügel, *Kat.*, i. 720) was his pupil. A certain *Shāh Khāndān* who was a dervish mystic is mentioned as his full brother. Nesīmī met a cruel death in 820 (1417–1418) in Aleppo where he was flayed for his heretical poems on a *fetwā* of the extremely fanatical muftī. He is considered the greatest poet and preacher of the Ḥurūfī sect. His work consists of two collections of poems, one of which, the rarer, is in Persian and the other in Turkish. The Turkish *Diwān* consists of 250–300 ghazels and about 150 quatrains, but the existing MSS. differ considerably from the printed edition (Stambul 1298 = 1881). No scholarly edition has so far been undertaken. The Persian *Diwān* has not been examined at all. Nesīmī's spiritual influence on the dervish system of the earlier Ottoman empire was considerable. The pro-'Alid guilds in particular honour Nesīmī as one of their masters, testimony to whose far-reaching influence is found even in the earlier European travellers like Giov. Antonio Menavino (c. 1540; cf. F. Babinger, in *Isl.*, xi. 19, note 1, from which it is evident that Nicolas de Nicolay copied him and therefore cannot be regarded as an independent source, as Gibb, *H. O. P.*, i. 356 sq. thought) and Sir Paul Ricaut (xviith century; cf. Gibb, *H. O. P.*, i. 357 sqq.). Nesīmī's importance as a poet and mystic can only be estimated and realised in connection with a thorough study of the older Ḥurūfī texts, among which a most important one is that mentioned but not recognised by W. Pertsch, *Pers. Handschr. Berlin*, p. 264 sq. No. 221 by Saiyid 'Alī al-'Alā (d. 822 = 1419) because it might show the connection of the Ḥurūfiya with the Bektāshīya. Nesīmī's poems were made popular in earlier times, especially by the wandering *Kāendar* dervishes [q.v.] and were known to every one.

Bibliography: Gibb, *H. O. P.*, i. 343 sqq.; J. v. Hammer, *G. O. D.*, i. 124 sq.; also the Ottoman biographers of poets who however contribute practically nothing to the life history of Nesīmī. (FRANZ BABINGER)

NESTORIANS. The Christian community (*millet*) which we know as Nestorians is at the present day better known under the name of *'ashīrat* or *djilu*. Down to the war of 1914 they lived in the central part of Kurdistan which lies between Mawsil [see MÖŞUL], Wān and Urmiya [see URMİYA]. Their main nucleus was represented by the highland Nestorians, in practice independent, living in the inaccessible regions of the highlands on the middle course of the Great Zāb, Tiyārī, Tkūma, Tkhub, Djilū, Dizz, Uri, Salabekan, Bāz, etc. Outside of this national centre the Nestorians are

found scattered in enclaves among the Muḥammadan population, Kurd and Persian, of the adjoining districts: Gawar, Tergawar, Mergawar, Shamdinān [q. v.]; on the plateau of Urmiya (some sixty villages), in this town itself; finally in the north at Salamas, Bashkal'a Khoshāb and in the south in Mawṣil and around it (Alkosh etc.).

Geography. It may be useful here to touch on some of the salient features of the Nestorian country in the strict sense, which is but very little known. We mean by this the area on both sides of the middle course of the Great Zāb, in the part where it describes an arc towards the east, between 37° and 37° 30' N., 43° 30' and 44° E. In Layard (*Nineveh*, i.) we have a description of the Nestorian districts on the right bank: the upper Tiya'ri with Čumbi and the greater part of the Lower Tiya'ri with Ashita and Lizan. We shall give here a general account of those on the left bank, namely, going from N. to S. and from W. to E.: Dizz, Kiu, the eastern part of the Lower Tiya'ri, Tal, Walto, Tkūma (with Tkhub); further to the east, Djilū, Bāz and lastly Ištazīn. All these districts lie in the folds of the massif which the Turks know by the general name of Djilū Dāgh, but which for the natives has a number of summits. This massif of Djilū Dāgh to some degree forms a curve in the inverse direction of the arc of the Great Zāb.

History. The teaching of the Nestorians, who were very active missionaries, was at one time very widely disseminated in Asia. An inscription in Chinese and Syriac was discovered at Singanfu. At Travancore, in South India, there is still a Nestorian community in existence. It was under the Sāsānians that the Nestorians played an important part. It is true that under Shāpūr II (309-379), Yazdegird I (399-420) and Bahrām V (420-438) severe persecutions took place for various reasons, of which the extraordinary spread of the sect was not the least. On the other hand, purely political reasons, fear of Byzantine influence, made the Persian government distrustful of them. We know for example, that the Byzantine emperor demanded from Bahrām V and Khusrāw I the free exercise of the Christian religion. Permanent good relations between the Nestorian Church and the state therefore date only from the declaration of independence of the Eastern Syrian church under a Catholicos of Seleucia with a dyophysite confession of faith. The most flourishing period of Nestorianism was therefore in the reign of Hormizd IV and at the beginning of the reign of Khusrāw II, i. e. from 578 to 605 A. D. Under the influence of Gabriel of Siggār, who had gone over to the monophysites, Khusrāw II began to persecute the Nestorians; one result was that from 609 to 628, the year of Khusrāw's death, the position of Catholicos remained vacant. Two events in this period are of special importance to us. The first was the establishment of Christianity in Central Kurdistān, where we still find direct and indirect traces of it at every step: churches, monasteries, traditions, place-names. In the fifth century the faith gained ground daily among the people of the high plateaus of Irān proper and among the Kurds. Pethion (d. 447) conducted a very successful missionary campaign in these mountains, which was crowned by his martyrdom. Emulating him, Saba, the "teacher of the heathen", went among the Kurds, who were sun-worshippers.

His eloquence supported by numerous miracles gained many converts (J. Labourt, *Le Christianisme dans l'Empire Perse sous la Dynastie Sassanide*, Paris 1904). Let us not forget this first Nestorian advance into Kurdistān. The oldest Nestorian churches in Central Kurdistān date from the fourth and fifth centuries. These are Mār Zaya at Djilū; Mār Bīshu at Īl; Mār Saba (ruins) at Kočānis; Mārī Memo at Oramar. The monastery and church of Mār Saba at Ashita in Tiya'ri were also held in great veneration but we do not know their date. Secondly we must note here how relations were established between the Nestorians and Islām (Tor Andrae, *Der Ursprung des Islams und das Christentum*, Upsala 1926). The part played by the Nestorians at a certain period under the Sāsānians explains the conversion of the Yaman to Nestorianism at its conquest by the Persian general Wahriz in 597. It was in the Nestorian form that Christianity penetrated into Arabia in the zone of Persian influence, i. e. from Ḥaḍramawt to Palmyra. We know the names of six Nestorian bishoprics on the eastern shore of Arabia. The first to be founded was that of 'Omān (acts of Councils 424, 544, 576, 676). A Christian community on the island of Soḳoṭrā used to receive its priests from the Catholics of Persia. Relations with Persia were established by sea. By the time of Muḥammad the South Arabian church was already Nestorian. We have definite evidence of this in the fact that Saiyid, prince of Nedjran, came with the bishop Ishō'yāb to Muḥammad to seek favours. Bar Hebraeus who records the incident adds that the Prophet gave them a document ordering the Arabs to see that no injury was done to the Christians and to help them to rebuild their churches. The priests and monks were to be exempt from the poll-tax, which besides was not in general to exceed 4 *zuzē* for the poor and 12 for the state. According to another source, the bishop only wrote to Muḥammad. A passage in a letter of Ishō'yāb III (647-648) shows that the relations between Arabs and Nestorians were very good. This may be attributed to the fact that the Christology of the Nestorians was much more acceptable to the Muslims than that of the monophysites. Every Nestorian church in the east possessed its own version of the letter of protection alleged to have been given by the Prophet (cf. for example that given by George Dav. Malech in his *History of the Syrian Nation and the old Evangelical-Apostolic Church of the East*). In any case this letter did not prevent (see below) the proclamation of the *djihad* from which the Nestorians later suffered so much.

The life of the Nestorian Church during the period from the Muḥammadan conquest to the establishment of the Mongols need not detain us here, as it is part of the religious history of the Christian sects. We need only mention as particularly concerning Āḍharbāidjān that the Jacobite and Nestorian rites were rivals there. Thus from 630 to 1265 we have a line of Jacobite bishops. We know also (Assemani, *Bibl. Or.*, III/i. 707) of Nestorian bishoprics both to the east of Lake Urmiya and also in the country of Lake Wān and Central Kurdistān. It is not always easy to identify the names found there. We have good evidence of the antiquity of Nestorianism in Salamas where there is in the burial ground of Khosrāwā an epitaph of the viith century recording the name of Khosro Eskolāyā "the student Khusrāw" (cf.

Duval, *Dialecte néo-araméen*, 1883). Under the Mongols we find at first that the Nestorian priests (*arkaun*) were treated with consideration at the taking of Baghdād (Hammer, *Ichan*, ii. 152). We know also that Hülāgū's wife was a Christian: at the taking of Arbīl, the see of an important Nestorian metropolitan (Ādharbāidjān was also under it), the lances of the Mongol horsemen bore little crosses. Later, in proportion as the Mongols became converted to Islām, the Nestorians became subjected to persecution, and particularly after the invasion of Timūr they sought refuge in the mountains of Kurdistān from which they did not begin to emerge till the beginning of the xvth century when they spread eastwards towards the region of Urmiya and S. E. towards Mawṣil; Duval (*op. cit.*, p. 9, note 4) gives notes on the different residences of the Nestorian patriarchs after the taking of Baghdād in 1258. It was under the Patriarch Simeon IV in 1450, that an innovation was introduced, making the episcopate hereditary; this produced a schism in the Nestorian community in 1551 when Sulakha was elected in opposition to Simeon Bar Mama. From this dates the term "Chaldaeans" henceforth applied to these Nestorians who recognised the supremacy of Rome, while English and American writers speak constantly of the "Assyrians", and lastly the Nestorians themselves like to be called *Sūriāi*. In Russian the name used is *aisori*. In the second half of the xviii century, the bishop Mār Yūsif recognised the authority of Rome and received the title of Catholic Patriarch of Babylon and Chaldaea, while one of his near relatives, elected patriarch of the Nestorians and remaining faithful to this rite, was enthroned under the name, henceforth hereditary, of Mār Shim'un and at once set out for the mountains of Central Kurdistān, where his residence was sometimes at Kučanis and sometimes at Djulāmerk. Thus originated this quasi-autonomous community of Nestorian highlanders in which an ecclesiastical authority exists alongside of a purely tribal organisation. Indeed while the supreme power is in the hands of a hereditary Mār Shim'un (passing from uncle to nephew) having the title of *patriarka d-madenkha*, who was consecrated patriarch by the Metropolitan Mār Hnan'ishu, living in Dera Resh at Shamdinān, each tribe (*shahṭa*) had alongside of a bishop (*abūna*), the ecclesiastical chief, a *mālik* or lay chief, distinguished by peacock feathers fixed on his conical felt hat, a characteristic feature of dress. The custom of the men arranging their hair in little pigtails may also be mentioned. The *mālik* had power to declare war on another tribe and to conclude peace.

The tribal organisation and mode of life of these highlanders have caused some writers to give them the name of "Christian Kurds" (Garzoni, Lerch).

A. Wigram in the introduction to his *History of the Assyrian Church* thinks that some at least of the Christians of Hakkāri [cf. KURDS] are of Kurd origin although they deny it vigorously. On the other hand, there are Kurd tribes who remember that they were once Christians. Other writers (Grant), led astray perhaps by the theocratic aspect of Nestorian society, the names and certain Biblical traditions, see in them evidence in support of the hypothesis that the Nestorians are the descendants of the ten tribes of Israel. We know however which actually are the Jewish communities in Kurdistān, quite distinct from the Christian groups

in dress and customs. Only their language is also a Neo-Aramaic dialect. — The Highland Nestorians annually pay Mār Shim'un a contribution called *rish d-shita*. The arrears due to the Turkish treasury were simply left to mount up. Cuinet (p. 749—751), speaking of the autonomous tribes, gives the total of arrears as already 160,000 £T in his time. There was besides somewhere in the Nestorian country (cf. Lalayan, who gives a photograph) a "rock of the collector of taxes" marking the limit beyond which this official never risked going. — The relations of the Nestorian hillmen with their Kurdish neighbours were no worse than those of the highlanders with one another usually are. The interest of the tribe came before every consideration of religion, so that *ad hoc* alliances could be concluded between the Kurds and the Nestorians for joint action against their co-religionists.

"The grass grows quickly over the blood spilt in a just battle". A kind of fair play is therefore the ruling principle of the inter-tribal code. There are, it is true, exceptional cases. The pan-Islāmism of 'Abd al-Hamid had its unpleasant repercussions in Kurdistān; the Turkish officials appointed there after the revolution of 1907 only complicated the position still further. Since the affairs of the Nestorians and Kurds were conducted on a tribal basis, we find the door of the patriarch's residence open to Kurds and Nestorians indifferently, who come to settle their disputes and hospitality is offered to all alike. On the other hand, we find the Nestorians seeking the good offices of Shaikh Salim of Barzan known as the "Christian Shaikh", who was executed by the Turks in Mawṣil at the beginning of the War.

The Nestorians and the Djihād. Even before the official outbreak of hostilities between Russia and Turkey, in August 1914, the patriarch Mār Shim'un was invited by Djewdet Bey, the *wālī* of Wān, to come to see him. Presents were lavished upon him and assurances given that all the grievances of the Nestorians would be redressed. As a result of the proclamation of the *djihād* however, the atmosphere became heavy in Kurdistān. In November, Turkey entered the war and the persecution of the Nestorians of Albāk (Bashkal'a) began at once. In Persia fighting broke out between the Christians of the Urmiya region and the Bekzāde Kurds. At the end of 1914, the Russians evacuated Urmiya and Salamas. Those Christians who did not save themselves in time by going to Djulfā perished in large numbers. As to the Nestorians of the highlands, although the massacres and deportations of Armenians were at their height, the Turks endeavoured to attach the Patriarch to their side and to secure the loyalty of the Nestorians. Complete educational freedom, good rifles, subsidies and grants to the Patriarch and to the bishops and māliks, all these things were promised in vain. Mār Shim'un retired to the particularly inaccessible district of Dizz from which the Patriarch's personal bodyguard had always been recruited. About this time an "accidental" shot killed Mār Shim'un's uncle Nestorus, who was, it was said, urging a more conciliatory policy towards the Turks. After an interview, which decided matters, with the Russian commander at Muhāndjik, near Salamas, the Patriarch on May 10, 1915, issued the order for mobilisation. The fortune of war resulted in the Nestorians, at first encouraged by the Russian successes in Wān and Urmiya at the beginning

of the summer, being left to their own resources. To be brief, with the help of the Barzāni Kurds, the Turks sacked Tkhūma, Tiya'ri, Djilū and Bāz. We may note especially the destruction of the irrigation canals exactly as was done in Sargon's campaign in the same region. The famous church of Mār Zaia at Djilū, of the fourth century, was desecrated for the first time in its long history. Interesting *ex voto*, Chinese vases, brought there in early days by missionaries, disappeared. The inviolability enjoyed by Mār Zaia is said to have been due to a letter guaranteeing it written on a piece of cloth, attributed to the Prophet (cf. above). After this disaster the Nestorians withdrew to their summer pastures, at a height of 10,000 feet. This final trial was a painful one. Harassed by the Kurds, with insufficient food and no salt, the Nestorians nevertheless held out. The Patriarch, taking refuge on the plateau of Shina, endured privations which were even harder for him who could not eat meat (even the mother of the patriarch apparent must not eat meat). The Nestorian *ra'iat* of Gawar were massacred at this time under the orders of Nūri Bey. Finally in October 1915 a skilful retreat was carried through. The Kurds were actually holding the approaches to the Persian frontier. A detour was effected towards Albāk in the north via Kotranis (Berwar) and the bridges were burned after crossing the Great Zāb. The Kurds succeeded however in threatening the retreat by using the natural bridge of Hezekian, but were driven back by Mālik Khoshāba of Tiya'ri whose bravery is destined to become legendary. In the month of November the exodus of the Nestorians was completed and they were safe within the Russian lines at Salamas. The Russian authorities organised assistance for the refugees, who to the number of 40,000 were settled in the Persian districts of Khōi Salamas and Urmiya where they remained till 1918. After the departure of the Russians as a result of the revolution, the Nestorians formed detachments with the help of Russian munitions and instructors and opposed the advance into Ādharbāidjān of the Turks led by 'Alī Ihsān Pāshā. Towards the end of the summer of 1918, however, their munitions being exhausted, the Nestorians left the region of Urmiya via Suldūz-Sain Kafā-Bidjār for Hamadhān where the English forces then were. From there the refugees were sent to the concentration camp of Baḳuba near Baghdad. The Patriarch was no longer alive. Led into an ambush by the Shikāk Kurd chief Ismā'il Āghā Simkō, Mār Shim'ūn was treacherously assassinated at Kohne Shahr on March 4, 1918.

The Nestorian community is now living in scattered groups in the 'Irāk, Persia, Syria etc. The post-war history of the Nestorians is closely bound up with the problem of the wilāyet of Mawṣil, finally attached to the 'Irāk. The line adopted for the northern boundary of the wilāyet in question, however, leaves the Nestorian districts to Turkey and it is very unlikely that they can return there. The martial qualities of the Nestorians were used by the British authorities who raised four battalions from them, which were very useful especially at the beginning of their establishment in the 'Irāk.

In conclusion a few words should be said about the Nestorians of the region of Lake Urmiya. Those of Salamas believe (Duval, *op. cit.*) that they are aborigines converted in the early

centuries of our era. In 1883 there were however only fifteen Nestorian families, the remaining 3,000 having become Roman Catholics under the bishop Mār Ishō'yāb (d. 1789). As to the Nestorians of the plateau of Urmiya, they preserve a tradition according to which their immediate ancestors came down from the mountains five or six centuries ago, which corresponds very closely to historic fact. The Nestorians of Urmiya have been the object of lively competition among the missions, of which the Presbyterian was first established (1832). The Roman Catholic Lazarists followed in 1863 and finally an Orthodox mission, the brotherhood of Cyril and Methodius, began work in 1905. At one time shortly before the War, there were also Anglican and Catherian missions. The work of the missions has made quite appreciable modifications not only in the beliefs of this ancient Christian community but also in its life and customs. Although little information has been preserved on the subject, there is reason to believe that the Nestorians of Urmiya also lived under the authority of *māliks*, who were recognised by the Shāhs as the official representatives of the community. We have seen a number of *firmāns* preserved in the family of Dr. Johanna Malik. They were administered according to the old collection of canon law called *Sunhados* of which Shamaṣha Yūsif Kaleta published a new edition in 1916 at the American Mission Press.

This is probably only one of the versions of the Synodicon, which we know in the Abbé Chabot's edition with its wealth of learning. In the eyes of the Muslim authorities the Nestorians were *zimmi* (*dhimmi*; cf. *dhimma*) and their position was regulated by Muḥammadan law. With the coming of the missionaries, the position gradually changed. The *māliks* were replaced by *millet bāshi*, each dependent on his respective mission. The Persian governor had to appoint a *serperest*, an official whose special duty was to deal with foreigners and those under their protection. During the War a national council called *moṭwa* was organised, which dealt not only with the defence of Christian interests before the local authorities but, especially after the addition to their numbers of the Nestorians from Turkey, acquired a certain political character but later disappeared in the general débâcle. — In conclusion it should be mentioned that in the present article we have confined ourselves mainly to the Nestorian highlanders of Central Kurdistan. The historical phenomenon that we have been led to study in this connection is far from being so limited and simple, for it demands not only consideration of linguistic problems, the ramifications of which go back to a remote past through Aramaic, but also of facts of ethnology even less known which are implied in the idea of Nestorianism. Finally the geographical area is also enormous if we remember for example the epigraphic material from Russian Central Asia.

NEW'Ī, YAḤYĀ B. PIR 'ALĪ B. NAṢŪḤ, an Ottoman theologian and poet, with the nom de plume (*makhlas*) of New'ī, was born in Malghara (Rumelia), the son of *Shaiikh* Pir 'Alī in 940 (1533). Up to his tenth year he was taught by his learned father and then became a pupil of Karamānī-zāde Meḥammed Efendi. His fellow pupils were Bākī, the poet [q. v.] and Sa'd al-Din, the famous historian [q. v.]. He was an intimate friend

of the former. He joined the 'Ulemā', became müderris of Gallipoli in 973 (1565) and after filling several other offices became a teacher in the Medrese of Mihr u-Māh Sultān. In 998 (1598) he was appointed Kādī of Baghdad but before he could take up office Sultān Murād III appointed him tutor to his son Muṣṭafā and to the princes Bāyazid, 'Oṭmān and 'Abd Allāh. When after Murād III's death (1003 = 1595) the usual slaughter of the princes deprived him of all the charges, he retired completely from public life and lived on a pension granted him by the new sultān. He died at Stambul in Dhu 'l-Kā'da 1007 (June 1599) and was buried in the court of the *Shaiikh* Wefā' mosque. His son was New'ī-zāde 'Aṭā'ī [q. v.].

New'ī was a man of great learning and his encyclopædic knowledge was most clearly revealed in the best known of his works, the *Nat'īdj al-Funūn wa-Maḥāsin al-Mutūn*, in which he surveyed the twelve most important branches of learning; on it cf. [J. v. Hammer] *Encyklopädische Übersicht der Wissenschaften des Orients*, part i. (Leipzig 1804), p. 22 sqq. and the German translation of the story of Shādān and Beshir, *ibid.*, p. 24 sqq. which forms the concluding section of this work. Brūsālī Meḥammed Ṭāhir gives a list of other prose works in his '*Oṭmānī Mü'ellifler*', iii. 437 sq. with references to the libraries in which they are. In poetry New'ī imitated the style of his contemporary Bākī without however reaching his level. His poems which were collected in a scarce *Diwān* (MS. in Stambul, Ḥamīdiye library), lack ease and betray too readily the learned author who frequently makes his work difficult to understand with unusual words and obscure allusions. He tries his skill in different forms of verse, the kaṣīda, ghazal, and methnewī, without however attaining popularity in any one of them. His fame as a poet is completely overshadowed by that of his contemporary and friend Bākī. New'ī's high position as an author he owes to his learned work, particularly the already mentioned encyclopædia, which was very popular, as is evident from the numerous MSS. still in existence in European collections (e.g. Berlin, Bologna, Dresden, Leyden, London [3 copies], Upsala, Vienna). A *Sulaimān-nāme* by him (Paris, *Bib. Nat.*, cod. reg. 44, Cat. N^o. 308 und F. Babinger, *G. O. W.*, p. 76) does not seem to be mentioned by his biographers. His son New'ī-zāde 'Aṭā'ī wrote a very full life of him (p. 418—27 of the *dhail* to Ṭashköprü-zāde's work).

Bibliography: J. v. Hammer, *G. O. D.*, iii. 108; Gibb, *H. O. P.*, iii. 171 sqq.; Ḥājjdī Khālifa, *Fedh-leke*, i. 120 sqq., also the biographies of poets by Kīnall-zāde and 'Ahdī.

(FRANZ BABINGER)

NEW'Ī-ZĀDE 'AṬĀ'Ī, ('AṬĀ' ALLĀH, an Ottoman author and poet, better known as 'Aṭā'ī with the nom de plume New'ī-zāde, i.e. son of New'ī, was born in 991 (1583) in Stambul, as the son of the celebrated New'ī [q. v.]. After the death of his father from whom he received his early education, he placed himself under Kaḏzāde Faīḏ Allāh Efendi, the compiler of an anthology, and later under Akhi-zāde 'Abd al-Ḥalīm Efendi. He then joined the 'Ulemā' but did not attain any of the higher offices. After becoming a *mulāzim*, he was appointed a judge and served in this capacity in a number of Rumelian towns like Lofça, Silistria, Ruṣṣuk, Tirnovo, Monastir (Bitolj),

Trikkala and Üsküb (Skoplje). Soon after his retirement from this sphere of activity he died in 1041 (1634) in his native city of Stambul; here he was buried beside his father.

'Atā'ī is best known for his continuation (*dhail*) in Turkish of Tashköprüzade's *Shakā'ik al-Nu'māniya*. This work, entitled *Hadā'ik al-Hakā'ik fī Takmilat al-Shakā'ik* contains, in addition to a supplement to the *Shakā'ik* in which a place is given to many scholars of the time of Sulaimān and Selim II, overlooked by Tashköprüzade, the biographies of Ottoman 'Ulemā' and dervish *shaiḫs* down to the reign of Murād IV (on the contents see F. Babinger, *G.O.W.*, p. 172). Death prevented the author from continuing his work, which was taken up by others. 'Atā'ī's book contains 999 biographies. It is written in a very artificial style permeated with Persian, which was popular at the time. 'Atā'ī also enjoyed a great reputation as a poet. He wrote a quintet (*Khamsa*) on the contents of which see Gibb, *H.O.P.*, iii. 234 sqq. The *Hadā'ik al-Hakā'ik*, manuscripts of which are also common (cf. F. Babinger, *G.O.W.*, p. 172 to which may now be added Stambul, Lālā Ismā'īl, N^o. 339), was printed at Stambul (15 + 771 pp. 2°) in 1268. The poetry still awaits a printer. 'Atā'ī's significance as a prose writer is much greater than as a poet.

Bibliography: Cf. F. Babinger, *G.O.W.*, p. 171 sq. and the works there given, especially J. v. Hammer, *G.O.D.*, iii. 475; Gibb, *H.O.P.*, iii. 232 sqq.; Brockelmann, *G.A.L.*, ii. 427 (where he is wrongly, according to F. Wüstenfeld, *G.A.W.*, called Muhammad); Hādjīdjī Khalifa, *Fedhlike*, ii. 168; Riḍā, *Tedhkire*, p. 70 sq.; Muhibbī, *Khulāṣa*, Cairo 1284, iv. 263.

(FRANZ BABINGER)

NEWRES, the name of two Ottoman poets.

1. 'ABD AL-RAZZĀK known as Newres, or more accurately Newres-i Qadim, "Newres the Elder", to distinguish him from 'Othmān Newres [q. v.], came from Kirkük (near Baghdād) and was probably of Kurdish origin. He seems however to have come to Stambul at an early age to prosecute his studies. Here he became a *müderris* but in the year 1159 (1746) entered upon a legal career. According to the *Sidjill-i 'othmānī*, he held the office of *kādī* in Sarajevo and Kutahya. His sharp tongue which found particular expression in daring and malicious chronograms (*tawāriḫ*) earned him banishment to Rethymno (Crete) along with the poet Hashmet and then to Brussa; he was later, according to Wāṣif (*Ta'riḫ*, p. 211), sent back to Kutahya. In any case he died in Brussa in Shawwāl 1175 (May 1762) of a broken heart and was buried in the cemetery opposite the entrance to the mosque of Pir Üftade Muhammad the founder of the order of the *Djalwatiya*. 'Abd al-Razzāk Newres composed a *Diwān* in Persian and Turkish (pr. Stambul 1290 and we believe 1304), and also a history of the war with Nādir Shāh in 1143 (1730) in which he took part on the staff of Hekim-Oghlu 'Alī Pasha. The little book called *Tebriṭiye-i Hekim-Oghlu 'Alī Pasha* is written in ornate language and is of no historical value. The fair copy in the author's hand is preserved in the Berlin Staatsbibliothek (Cod. Or. 8° 2186). Newres also enjoyed the reputation of being a distinguished *munshi*. Excerpts from his *Inshā'* are given by J. v. Hammer in his *G.O.R.*, ix. 643 sq. His *Diwān* is called *Mabāligḥ*

al-Hikām which gives the year 1172 (1758) for its completion (cf. however a similarly titled work in Vienna: Flügel, *Cat.*, iii. 486, N^o. 1991!).

Bibliography: Cf. F. Babinger, *G.O.W.*, p. 294 sq. with further references. The promised very full bio-bibliography of Newres Efendi by Ibn al-Amin Maḥmūd Kemāl Bey has not yet appeared (1933).

2. 'OTHMĀN, called Newres or, to distinguish him from his older namesake, Newres-i Djedid, came from Chios. He held several military posts in the capital and died there in 1293 (1876) in retirement. He is buried in the Qarāja Ahmed cemetery in Skutari. His collected poems have been twice printed, Stambul 1257 and Stambul 1290 (by Yūsuf Kāmil Pasha) (*Diwān-i 'Othmān Newres*). In 1302 there was published at the suggestion of 'Abd al-Karīm Nādir Pasha in Stambul under the title *Ether-i Nādir* specimens of his prose and verse. A Turkish translation of the *Gulistan* by him exists in MS. 'Othmān Newres had a very thorough command of the three languages of Islām and wrote poetry in all three. His work however is hardly of permanent value.

Bibliography: Brūsālī Meḥammed Tāhir, '*Othmānī Mu'ellifler*', iii. 465 sq.

(FRANZ BABINGER)

NICEA. [See IZNİK.]

NIEBLA (AR. LABLA), a little town in the S. W. of Spain, 45 miles W. of Seville on the right bank of the Rio Tinto. Now much decayed, it has less than 2,000 inhabitants and is in the judicial district of Moguer, in the province of Huelva. It is the ancient Ilipla. In the Visigothic period it was the see of a bishop. In the Muslim period it enjoyed considerable prosperity. It formed part of the district of al-Sharaf (*Ajarafe*) and was also called al-Hamrā', "the red", no doubt from the colour of its ramparts and of the water of its river. It was particularly an olive-growing centre. The gentian was also cultivated there and deposits of alum and of sulphate of iron were worked.

Niebla was taken in 94 (713) by 'Abd al-'Aziz, son of Mūsā b. Nuṣair [q. v.]. In 149 (766) it was the starting point of the rising of Sa'īd al-Maṭarī al-Yahṣubī who seized Seville but was soon defeated and slain by the troops of 'Abd al-Rahmān I. The town in 230 (844) suffered from a visit of the Normans (*Madjūs*; q. v.). In 284 (897) it rebelled against the Umayyads: it was however retaken by force of arms in 304 (917) by order of 'Abd al-Rahmān al-Nāṣir by his general Badr b. Aḥmad. At the time of the fall of the Caliphate, it became the capital of a little kingdom formed in 414 (1024) by Abu 'l-'Abbās Aḥmad b. Yahyā al-Yahṣubī, who took the *laḡab* of Tādj al-Dawla, which also comprised the lands of Huelva and of Djabal al-'Uyūn (Gibraleon). This prince died in 433 (1041) and was succeeded by his brother Muhammad 'Izz al-Dawla. The 'Abbāsid sovereign of Seville al-Mu'taḍid [q. v.] soon displayed his desire to annex the principality of Niebla and made several raids into it. 'Izz al-Dawla had to abandon his capital and take refuge with the lord of Cordova Abu 'l-Walid Muhammad b. Djahwar in 443 (1051) leaving the power to his nephew Abū Naṣr Faṭḥ b. Khalaf b. Yahyā al-Yahṣubī Nāṣir al-Dawla, who at first bought peace from al-Mu'taḍid by paying him tribute but was forced two years later in 445 (1053) to abandon his

principality to the ruler of Seville and join his uncle in Cordova. Niebla passed a little later to the Almoravids [q.v.]. When the power of this dynasty was beginning to collapse in Spain, it became the headquarters of another rebel, Yūsuf b. Aḥmad al-Biṭrawshī (or al-Baṭrūdī), who in 540 (1146) finally submitted to the Almohad general Barrāz al-Masūfī and went five years later to Salā on the summons of 'Abd al-Mu'min. A few years later Yūsuf al-Biṭrawshī, maintained as governor of Niebla by the Almohads, rebelled and the town was retaken in 549 (1154) by the governor of Seville and of Cordova, Yahyā b. Yaghmur, who executed 8,000 of the inhabitants. This massacre was condemned by 'Abd al-Mu'min who had Yahyā brought in chains to Morocco and then exiled to Tlemcen.

Niebla remained under Muslim rule until 1257, when it was taken after six months siege by Alfonso X and became finally Christian.

(E. LÉVI-PROVENÇAL)

NIFFAR (NUFFAR), a ruined site in southern 'Irāk, in 32° 7' N. Lat. and 45° 10' East Long. (Greenw.), now in the qaḍā of 'Afek in the liwā al-Diwāniye. Niffar corresponds, as J. Oppert was the first to point out, to the town of Nippur well known from cuneiform inscriptions, one of the oldest and most important places in Babylonia. Its great importance was not political but religious, as the temple of the chief deity of the town formed a kind of central sanctuary or place of pilgrimage for the whole of Babylonia, to which almost all the important sovereigns of the period before Hammurapi, and Hammurapi himself, as well as the Kassite kings and many later rulers like Assurbanipal, dedicated gifts.

Nippur's period of greatest prosperity lay in the millenia before Hammurapi; but it remained an important city down to the last Babylonian and Achaemenid rulers and an important commercial centre with a very mixed population which gave it a somewhat cosmopolitan character. In the fifth century B.C., under Artaxerxes I and Darius II, we find in it an important business and banking house, the firm of Murashshū & Sons to whose activities many documents still bear eloquent testimony. Nippur still continued to flourish under the Seleucids and Arsacids as buildings of this period show, quite apart from the numismatic evidence. It is not directly mentioned by Greek or Roman writers, but the name of the district of Nippur may be concealed in *nipparene*, the name of a stone which Pliny (*Nat. Hist.*, xxxvii.

10, 175) says is of Persian (i. e. presumably Parthian?) origin.

In the Babylonian Talmud Nippur appears as Niphar (נִיפָר) and Nuphar (נִיפָר); the latter form corresponds to that which is now most usual: Nuffar. In the passage in question in the Babylonian Talmud (*Yōmā*, 10a) we read: *Kalneḥ* (כַּלְנֶה) is Naphur (Nuphar) Nīnpī (? (נִינְפִי); the qualification Nīnpī (?) is obscure; Daiches' explanation in *O.L.Z.*, xi. 539 as Ninib falls to the ground as the name of this deity is now known to read Ninurta. The basis of the equation *Kalneḥ* (Gen. x. 10) = Nippur is not yet satisfactory. A Babylonian place-name Kalnū has so far not been found in cuneiform inscriptions.

Nippur was also an inhabited place in Muslim times; for example we find it mentioned in 38 (659) on the occasion of a rising against the caliph 'Alī (Ṭabarī, ed. de Goeje, i. 3423, 3424) as well as during the Khāridjī troubles (*op. cit.*, ii. 929, 7); cf. also Yāqūt, ed. Wüstenfeld, iv. 275, 798 and Ibn al-Faḳīh, in *B.G.A.*, v. 210. In the later middle ages we find Niffar mentioned as a Nestorian bishopric in the chronicles of the Patriarchs (*Akhbār Faṭārika ḥursī al-Mashriq*, ed. Gismondi, Rome 1897 and 1899) of 'Amr b. Mattā (p. 83, 9, 95, 8) and of Mārī b. Sulaimān, in the period 900—1058 A.D. (cf. also Sachau, in *Abh. Pr. Ak. W.*, 1909, No. 1, p. 31). When the town was abandoned by its inhabitants and became completely desolate we do not know. It probably was the result of one of the Mongol invasions, that under Hülāgū or that under Timūr, which dealt their death-blow to so many flourishing places in Mesopotamia.

The ruins of Niffar are next to those of Babylon and al-Warkā' [q.v.] the most extensive in the whole of the Babylonian plain; they cover an area of almost 180 acres. The first European to visit them was W. K. Loftus who spent some time here in 1850 and came back again in 1854 (see the *Bibl.* for his report). A year later than Loftus, in Jan. 1851, Layard was in Niffar and spent two weeks digging but with little success because Layard, paying too little attention to the difference between Assyrian and Babylonian mounds, did not dig deep enough and only turned over the cemetery of a people who had settled here only in the last centuries of antiquity, under the Arsacids.

The University of Pennsylvania (Philadelphia) was the first to undertake a methodical investigation of the ruins and in four expeditions from 1888 to 1900 (1888—1889, 1889—1890, 1893—1896 and 1898—1900) under the leadership of Peters, Haynes and Hilprecht carried out excavations on a large scale. On the results of this intensive work see Hilprecht's full report in *Explorations* etc. (see *Bibl.*), p. 289 sq.

On the topography of Niffar see, in addition to the descriptions by Loftus and Layard, especially Peters, *op. cit.*, ii. 104 sq.; Hilprecht, *op. cit.*, p. 540 sq. and notably Fisher, *op. cit.*; cf. also King, *op. cit.*, p. 85—86. The American expedition also found an ancient Babylonian plan of Nippur which Hilprecht, *op. cit.*, p. 518 (reproduced in Zehnfund, *op. cit.*, p. 66) published; more distinct in Fisher, *op. cit.*, pl. i. This plan has been since 1926 in the possession of the University of Jena with the rest of Hilprecht's private Assyriological collection; see Zimmern, in *Z.A.*, xxxvii. 224.

The sight of the ruins is very impressive; they rise like a range of hills in close formation from 30—60 feet above the plain, culminating in the cone of Bint al-Amīr 95 feet high, the *ziggurat* of the chief temple.

The most imposing part of the whole eastern quarter is the *ziggurat* of Im-Kharsag, still 95 feet high, which the inhabitants for some reason now forgotten call Bint al-Amīr, the "prince's daughter". The triangular mound south of the sanctuary proper marks the site of the great temple library, about a twelfth of which, yielding some 23,000 cuneiform tablets and fragments, has been excavated. The western half of the inner city contains the residential quarters with the bazaars, business houses and private dwellings. Its history is still obscure as in the course of centuries it was repeatedly resettled. In the Parthian period a large cemetery extended over a considerable part of the clay buildings which had fallen to pieces there.

On Parthian buildings in Nippur, cf. Hilprecht, *op. cit.*, p. 554 sq. and do., *Der Bēl-Tempel in Nippur*, p. 31 sq.

In addition to the great Enlil temple E-kur there were a number of other highly venerated temples in Nippur.

According to the cuneiform inscriptions, Nippur must have in ancient times lain on the Euphrates itself or at least in its immediate vicinity (cf. e.g. *O. L. Z.*, XX, 142, note 1); this fact forces us to the assumption that this river in the Babylonian period must have taken a much more easterly course below Babylon than in the middle ages and present day. The inner city is divided into two parts by a canal now dry but once navigable, which the natives call *Shatt al-Nil*. This was an important watercourse which, according to Hilprecht, was in many places at one time 20—25 feet deep and 150—190 feet broad and which the modern inhabitants rightly describe not as a mere *nahr* (stream, canal) but as *shatt* (river).

According to the mediaeval Arab geographers *Nahr al-Nil* was the name of one of the canals led off from the Euphrates to the Tigris. It still survives in its entirety; as in the middle ages, it starts from Babylon and flows a little above 32° 30' N. Lat. in an almost straight line eastwards. The geographer Suhrāb (who used to be called Ibn Serapion; cf. iv., p. 1130a) writing in the fourth (tenth) century observes that this canal bears the name *Nahr al-Nil* only after passing the town of al-Nil (the modern ruins Niliye). At the present day it is called only *Shatt al-Nil* throughout its course. Somewhat east of Niliye a side-canal, now dry, branches off to the south for which, not only in its lower part where it flows by the ruins of Niffar but along its whole extent, the name *Shatt al-Nil*, the same as that of the main canal, was and is usual. Yākūt however says (iv. 77, 798) that Niffar lay not on the *Nahr al-Nil* but on the bank of the *Nahr al-Nars*, a canal dug, it is said, by the Sāsānian king Narsē b. Bahram (293—303 A.D.) which leaves the Euphrates at al-Hilla a little below the *Nahr al-Nil* and turns southeastward. It was presumably connected by a branch with the southern small canal of the same name which branches off from the *Nahr al-Nil*, so that the occurrence of the two names *Nahr al-Nil* and *Nahr al-Nars* for the river in Niffar is explained. It

should be noted also that the nomenclature of the Babylonian canals changed several times already in the middle ages. On the *Nahr al-Nil* or *Shatt al-Nil* and *Nahr al-Nars* see Loftus, *op. cit.*, p. 238; G. Le Strange, in *J. R. A. S.*, 1895, S. 256, 260—261 and do., in *The Lands of the East. Caliphate*, Cambridge 1905, p. 72—74; Streck, *Babylonien nach den arab. Geographien*, i. (Leyden 1900), p. 30 sq.; Herzfeld, in *Sarre-Herzfeld, Archäolog. Reise im Euphrat- und Tigrisgebiet*, i. (Berlin 1911), p. 234 sq.; Hāshim al-Sa'dī, *Djughrāfiyat al-ʿIrāk al-ḥaditha*², Baghdād 1927, p. 34, 35.

Below Niffar the *Shatt al-Nil* loses itself in the swamps of Hōr al-ʿAfeq. The *Shatt al-Kār* very probably forms its southern continuation.

If the "Euphrates of Nippur", as it is called in the cuneiform inscriptions, really represents the old course of this river, and not simply a branch of it, the modern *Shatt al-Nil* with its continuation, the *Shatt al-Kār*, probably corresponds to the bed of the Euphrates of Babylonian times. On the great changes in their courses which the rivers of Mesopotamia have undergone, cf. especially Fisher, *op. cit.*, p. 2 sq. Hilprecht, who is followed by others like Zehnpufund, Unger etc., thinks that the name of the canal, *Kabaru* (= the large) found in later texts from Nippur, corresponds to the "Euphrates of Nippur" of the older texts. He further compares it with the *Kebar* (כְּבַר) of Ezekiel (i. 1 etc.); see Hilprecht, *Explorations*, p. 412 and also in *Der Bēl-Tempel in Nippur*, p. 10. The identification of the *Kabaru* with the old bed of the Euphrates, i.e. the modern *Shatt al-Nil*, I do not consider proved; the *Kabaru* may also be a canal in the neighbourhood of Nippur.

West and Southwest of Niffar lies the very extensive Hōr al-ʿAfeq (on the meaning of Hōr see iii., p. 147^b).

AL-NIFFARĪ MUḤAMMAD IBN ʿABD AL-DJABBĀR. This mystic, whom the principal Ṣūfī biographers fail to mention, flourished in the ivth (xth) century, and, according to Ḥādjdjī Khalifa, died in the year 354 (965). His *nisba* refers to the town of Niffar [q. v.] in Mesopotamia, and one MS. of his works asserts that it was during his residence at Niffar and Nīl that he committed his thoughts to writing. Niffarī's literary reliquia consist of two books, the *Mawākif* and the *Mukhāṭabāt*, together with a number of fragments. It is improbable that Niffarī himself was responsible for the editing of his writings; according to his principal commentator, ʿAfīf al-Dīn al-Tilimsānī (d. 690 = 1291), either his son or his grandson collected his scattered writings and published them according to his own ordering. The *Mawākif* consists of 77 sections of varying length, made up for the most part of brief apothegms touching on the main aspects of Ṣūfī teaching, and purporting to be inspired and dictated by God; the *Mukhāṭabāt* is similar in content, and is divided into 56 sections. Niffarī's most characteristic contribution to mysticism is his doctrine of *wākfa*. This term, which would appear to be used by him in a peculiarly technical sense, implies a condition in the mystic which is accompanied by direct divine audition, and perhaps even automatic script. *Mawākif* is the name given to the state of the mystic in which *wākfa* is classed higher than *maʿrifa*, and *maʿrifa* is above ʿilm. The *wākif* is nearer to God than any other thing, and almost transcends the condition of *bashāriya*, being alone separated from all limitation. Niffarī definitely maintains the possibility of seeing God in this world; for he says that vision (*ruʾya*) in this world is a preparation for vision in the world to come. In several places Niffarī distinctly touches on the theory of the Mahdī, and indeed appears to identify himself with the Mahdī, if these passages are genuine; and this claim is seemingly in the mind of Zabīdī, when he describes Niffarī as *ṣāhib al-daʿawā wa ʿl-dalāl*. Tilimsānī however interprets these passages in an esoteric and highly mystical sense; and it does not accord with the general character of the author, that he should make for himself such extravagant claims. Niffarī shows himself in his writings to be a fearless and original thinker. While undoubtedly influenced by his great predecessor al-Ḥallādj, he acknowledges no obligations, and has a thorough conviction of the reality of his own mission.

(A. J. ARBERRY)

NİĞDE, a town in the Turkish sandjak (now wilāyet) of the same name in a fertile trough on the east edge of the Central Anatolian steppe. The town is first mentioned in the Turkish period; previously the chief town of the district was Tyana (Arab. Ṭawāna) but it is probable that the striking hill which commands the important road from Cilicia across the Taurus to Kaisariye

at its entrance to a pass over the mountains had a fortified settlement upon it in the pre-Turkish period. The old place-name may be the origin of the modern one, an older form of which was Nekide (Yāqūt, ed. Wüstenfeld, iv. 811: Nakidā; Ibn Bibī and others, also in inscriptions down to the xvth century: Nakida; the modern form

نیکد [in the new Turkish script: Niğde] is already

found in Ḥamd Allāh Muṣṭawfī, *Nuzhat*, in *G.M.S.*, xxiii./1, 99). In this particular district some villages have retained their ancient names (Andaval-Andabalis, Melegop-Malakopaia) and considerable numbers of descendants of the original Christian inhabitants survived until quite recently (R. M. Dawkins, *Modern Greek in Asia Minor*, Cambridge 1916, p. 16 sqq.).

Nigde is first mentioned in connection with the partition of Saldjūk territory among the sons of Kılıdj Arslān II (685 = 1189) when it was allotted as an independent lordship to Arslān Shāh (Ibn Bibī, ed. Houtsma, *Rec.*, iv. 11). Nigde had perhaps previously belonged to the Daniṣmandids but Ewliyā, iii. 189, cannot be taken as evidence of this. Kaikaʿus I granted Nigde to the Emīr-i Ākhōr Zain al-Dīn Bashāra (Ibn Bibī, p. 44) who shortly before his death built the important mosque of ʿAlāʾ al-Dīn here (620 = 1223). In the xiiith century Nigde was the headquarters (*ser-i leshkeri*) of one of the great military districts of the Saldjūks. Under Kılıdj Arslān IV, Ibn al-Khatīr Masʿūd held this office. At first an ally of the all powerful Muʿīn al-Dīn Perwāne, with whom he killed the sultān in 1264, he endeavoured to remove the young Kai-Khusraw III out of Perwāne's influence and brought him to Nigde (1276). But the help for which he had appealed to Egypt came too late and he succumbed to Perwāne who was supported by the Mongols (Ibn Bibī; Weil, *Gesch. d. Chalifen*, iv. 80 sq.). He built a well in Nigde opposite the ʿAlāʾ al-Dīn mosque (666 = 1268). Under the Ilkhāns there ruled in their name, or in the name of their Anatolian governor Eretna, Sunkur Agha who is known only from inscriptions and is, it is remarkable to note, not mentioned by Ibn Baṭṭūṭa who visited Nigde about 1333 (ed. Defrémery-Sanguinetti, ii. 286); he made himself independent after the death of Abū Saʿīd. He gave the town a large mosque on the wall of which facing the Bezistān is a Persian inscription, in which he grants Christian foreigners exemption from *djizya* and *kharāj* (736 = 1335). The Saldjūk princess Khudāwand Khātūn buried in 732 (1332) in her splendid türbe built in 712 (1312) on the other hand probably did not rule in Nigde although she resided there. She was, if the lady buried beside her in 1344 was her daughter, the wife of the emir Shudjāʿ al-Dīn who is mentioned as the father of the lady on her sarcophagus; he ruled according to al-ʿUmārī (ed. Taeschner, p. 31) in the Bulghardagh, where a wilāyet Shudjāʿ al-Dīn is still mentioned in Saʿd al-Dīn (i. 517 following Idris) and where lies Ulukīshla which, according to Ḥādjdjī Khalifa (*Djihānnūma*, p. 617), was also called Shudjāʿ al-Dīn. After the period of Sunkur's rule, Nigde probably passed directly to the Karamanoglu, who held it against the attacks of the Eretnid ʿAlāʾ al-Dīn ʿAlī (c. 1379) (ʿAziz b. Ardashir, *Bezm u-Rezm*, p. 141 sqq.). In 1390 Nigde surrendered with other Karamanian towns to the Ottomans but was restored to the Kara-

manids who defended it successfully against Kaḏī Burhān al-Dīn, lord of Kaisāriye and Siwās (*Bezm u-Rezm*, p. 424, 523). After Timūr's invasion the power of the Karamanids extended northwards as far as Deweli Qaraḥiṣār which previously belonged to Kaisāriye and for a time even to Kaisāriye itself. Niġde then ceased to be a frontier town. Apart from a temporary occupation by Egyptian troops in 1419 (Weil, v. 146 sqq.) it enjoyed peace and prosperity and the special care of the Karamanids who had one of the bulwarks of their power here till the end of the dynasty. A series of buildings, the first of which not only in time but also in size and quality is the Ak-Medrese of the year 1409, is evidence of their interest in the town. Niġde surrendered in 875 (1470) to the Ottoman general Iṣḥāk Paṣha who had the defences of the town restored. In 878 (1473) the Ottoman Sandjak-bey of Niġde, Koçi Bey, forced Deweli Qaraḥiṣār which still belonged to the Karamanoghlū to surrender to prince Muṣṭafā. The latter died on the way back at Niġde (Sa'd al-Dīn, i. 517, 550).

The sandjak of Niġde belonging to the beylerbeylik of Karaman, contained the kazās of Ürgüb, Bor, Deweli, Deweli Qaraḥiṣār and Ulukṣhla. When about 1720 the grand vizier Ibrāhīm Paṣha transformed his birthplace of Mushkara in the kazā of Ürgüb into the imposing town of Newshehir, the fiefs for the garrisons of the decayed fortresses of Niġde and Deweli Qaraḥiṣār were transferred to the new foundation (v. Hammer, *G.O.R.* 2, iv. 250 sq.). At the end of the Ottoman period the sandjak of Niġde, to which the kazā of Ak-serai also belonged, contained 148,700 Muslims and 49,551 Christians the latter mainly natives and mostly speaking Turkish. Niġde was the residence of the metropolitan of Konia. The town numbered at this time 11,526 inhabitants, in 1927 (after the exchange with Greece) only 9,463.

Niġde (now on the Kayseri-Ulukṣhla railway) consists of an upper town running north and south, now largely uninhabited (Tepe Wirāne) at the highest point of which in the north stands the imposing citadel, and the lower town (Shehr altı) which was also once surrounded by a wall. In the upper town is the 'Alā' al-Dīn mosque, one of the oldest mosques in Anatolia, with an architect's inscription in Persian. Before the gate of the upper town at its south end is the Gothic mosque of Sunkur (c. 1330) showing influences from Little Armenia and Cyprus, and the bazaar. West of and below it is the Karamanian Ak-Medrese of 1409. A little apart to the west of the town, separated by a broad road, running north and south is the modern quarter Qayabashī with a few remains of the old cemetery and a group of türbes among which that of Khudāwand Khātūn of the year 1312 is prominent.

NİHĀL ČAND LĀHAWRĪ, Indian man of letters, Hindū by religion, was born in Dīhli, but left it in early life and went to Lahore where he lived for a considerable time. Owing to this circumstance he called himself Lāhawri. Search for a livelihood led him to Calcutta. Here he was introduced to Dr. J. B. Gilchrist who asked him to translate into "Hindi rekhta" the story of Tādj al-Mulūk and Bakāwālī. He consented and thus became one of the famous band of Fort William translators. He made the translation from *Gul-i Bakāwālī*, a Persian rendering by Shaikh 'Izzat Ullāh, 1772, of an old Hindi story, which has been reproduced in Urdu verse by Dayā Shankar Kawl Nasīm [q. v.], in his wellknown mathnawī *Gulzār-i Nasīm*.

Nihāl Čand called his work *Madhhab-i 'Ishk*. It is in very good prose mixed with verse. The name gives the date 1217 (1802). Apart from the above mentioned facts nothing is known about the writer.

(T. GRAHAME BAILEY)

NİHĀWAND, a town in the old province of Hamadhān, with, at the present day, 5,000—6,000 inhabitants (de Morgan), at a height of 5,860 feet on the branch of the Gāmāsāb which comes from the S. E. from the vicinity of Burūdġird; the Gāmāsāb then runs W. to Bisūtūn. Nihāwand lies on the southern road which, coming from Kirmānshāh (Ibn Khurdādhbih, p. 198), leads into Central Persia (Iṣfahān) avoiding the massif of Alwand (Ὀπώνης) which rises W. of Hamadhān. Hence the importance of the town in the wars of Persia with her western neighbours.

The French excavations of 1931 (Dr. Contenau) have shown that the site of Nihāwand was inhabited from pre-historic times. The ceramics ("I-bis style") which have been found there, seem to be older than those of style I and II of Susa. Ptolemy VI, 2 knows of Νιφωάνδα and according to Ibn Faḳīh, p. 258 the town already existed before the Deluge. In the Sāsānian period the district of Nihāwand seems to have formed the fief of the Kārin family (Dināwari, p. 99). There was a fire-temple there. According to Ibn Faḳīh, p. 259 there could be seen on the mountains near Nihāwand two figures of snow in the form of a bull and a fish (similar talismans are said to have existed at Bitlis also cf. also the steles of *wishap* ["dragons", protectors of waters] in Armenia west of Lake Sewan which combine these symbols, *Zap.*, xxiii./3, 1916, p. 409). The same legend is reflected in the name of the river Gāmāsāb (*Gāwmāsī-āb* = "water of the bull and fish"; *māsī* is the Kurdish form of the Persian *māhī*).

Among the products of Nihāwand the Arab authors mention willow-wood which was used for polo-sticks (*ṣawālīdġa*), aromatic reeds (*ḥaṣabat al-dharīra* or *al-kumḥat al-'irākīya*) which were used like *ḥanūt* (a perfume put in coffins) and black clay used as wax for sealing letters. The district of Rūdāwar was under Nihāwand (cf. de Morgan, *Mission*, ii. 136: *Rūdīlāwar*) and was famous for its abundance of saffron (Iṣṭakhrī, p. 199). For a list of the places more or less dependent on Nihāwand, cf. Schwarz, *Iran* etc., p. 505—509.

In the Mongol period, the *Nushat al-Kulūb* mentions three districts of Nihāwand: Malāyir (now Dawlatābād), Isfīdhān (= Isbīdhahān, see below) and Dījahūk. (Nihāwand no longer forms part of the province of Hamadān; cf. Rabino, *Hamadan*, in *R. M. M.*, xliii., 1921, p. 221—227).

Near Nihāwand was fought the famous battle which decided the fate of the Iranian plateau and in which the Kūfī Nu'mān b. Muḳarrin defeated the Sāsānian generals. The commander-in-chief is given different names: Dhu 'l-Ḥadjībain Mardān-shāh (cf. Balādhuri, p. 303*; Marquart, *op. cit.*, p. 113 identifies him with the *darikpet* Khurrazād) or Fērōzān (cf. Ṭabari, i. 2608; the latter also gives the names of his generals: Zarduḳ, Bahman Dīādōya and the commander of the cavalry Anūshak). The Arab camp was at Isbīdhahān and that of the Persians at Wāykhurd (?). The sources do not agree about the date: Saif b. 'Omar (Ṭabari, i. 2615—2619) gives the end at the year 18 (639) or the beginning of 19 (640); cf. Wellhausen, *Skizzen und Vorarbeiten*, vi., 1899, p. 97, while Ibn Ishāq, Abū Ma'shar and Wāḳidī, followed by Caetani, *Annali dell' Islām*, iv., 1911, p. 474—504 put the battle in 21.

The district of Nihāwand (formerly called Māh-Bahrādhān or Māh-Dīnār) was finally incorporated in the possessions of the Baṣrians and called Māh-Baṣra ("the Media of Baṣra": Balādhuri, p. 306).

Nihāwand is often mentioned in the period of the wars between the Ṣafawids and the Ottomans. In 998 (1589) at the beginning of the reign of 'Abbās I, Cīghāla-Zāde built a fortress at Nihāwand ('*Ālam-ārā*, p. 273). After the death of Murād IV a rebellion took place among the garrison of Nihāwand; the Ottomans were driven out by the Shī'ī inhabitants. As a result in 1012 (1603) war again broke out with Turkey (*ibid.*, p. 440). In the spring of 1142 (1730) Nādir [q. v.] took Nihāwand again from the Turks.

(V. MINORSKY)

NIKĀH (A.), marriage (properly: sexual intercourse, but already in the Qur'ān used exclusively of the contract). Here we deal with marriage as a legal institution; for marriage customs see 'URS.

1. The essential features of the Muslim law of marriage go back to the customary law of the Arabs which previously existed. In this, although there were differences according to districts and the conditions of the individual cases, the regulations governing marriage were based upon the patriarchal system, which permitted the man very great freedom and still bore traces of an old matriarchal system. It is true that before the coming of Islām a higher conception of the marriage state had already begun to exist but the position of the woman was still a very unfavourable one. The marriage contract was made between the suitor and the "guardian" i.e. the father or the nearest male relative of the bride, the latter's consent

not being regarded as necessary. But even before Islām it had already become generally usual for the dowry to be given to the woman herself and not to the guardian. In marriage the woman was under the unrestricted authority of her husband, the only bounds to which were consideration for her family. Dissolution of the marriage rested entirely on the man's opinion; and even after his death his relatives could enforce claims upon his widow.

2. Islām reformed these old marriage laws in far-reaching fashion, while retaining their essential features; here as in other fields of social legislation Muḥammad's chief aim was the improvement of the woman's position. The regulations regarding marriage which are the most important in principle are laid down in the Qur'ān in Sūra iv. (of the period shortly after the battle of Uḥud): "3. If ye fear that ye cannot act justly to the orphans marr the women whom ye think good (to marry), by twos, threes or fours; but if ye fear (even then) not to be just then marry one only or (the slaves) whom you possess; this will be easier that ye be not unjust. Give the women their dowry freely; but if they voluntarily remit you a part of it, enjoy it and may it prosper you. — 26. Marry not the woman whom your fathers have married (except what is already past); for this is shameful and abominable and an evil way. 27. Forbidden to you are your mothers, your daughters, your sisters, your aunts paternal and maternal, the daughters of your brother and sister, your foster-mothers and foster-sisters, the mothers of your wives and the step-daughters who are in your care, born of your wives, with whom ye have had intercourse — but if ye have not had intercourse with them, it is not a sin for you — and the wives of the sons, who are your offspring, also that ye marry two sisters at the same time except what is already past; Allāh is gracious and merciful. 28. Further married women except (slaves) that you possess. This is ordained by Allāh for you. But he has permitted you to procure (wives) outside of these cases with your money in decency and not in fornication. To those of them that ye have enjoyed give their reward as their due, but it is no sin to make an agreement between you beyond the legal due. Allāh is allknowing and wise. 29. If however any one of you has not means sufficient to marry free believing women (let him marry) among your believing slaves, whom you possess; Allāh best knows (to distinguish) your faith. Marry them with the permission of their masters, and give them their dowry in kindness; they should be modest and not unchaste and take no lovers". Also Sūra ii. 220 (uncertain date), the prohibition of marriage with infidels, male or female (cf. Sūra lx. 10), Sūra xxviii. 49 (probably of the year 5), an exception in favour of the Prophet, and Sūra v. 7 (of the farewell pilgrimage in the year 10), permission of marriage with the women of the possessors of a scripture. Other passages of the Qur'ān which emphasise the moral side of marriage are Sūra xxiv. 3, 26, 32 and Sūra xxx. 20. In tradition various attitudes to marriage find expression; at the same time the positive enactments regulating it are supplemented in essential points. The most important is the limitation of the number of wives permitted at one time to four; although Sūra iv. 3 contains no such precise regulation, this interpretation of it must have predominated

very early, as in the traditions it is assumed rather than expressly demanded. The co-operation of the "guardian", the dowry and the consent of the woman is regarded as essential and competition with a rival the result of whose suit is still in doubt is forbidden.

3. The most important provisions of Muslim law (according to the *Shāfi* school) are the following. The marriage contract is concluded between the bridegroom and the bride's *walī* (guardian), who must be a free Muslim of age and of good character. The *walī* is in his turn bound to assist in carrying out the contract of marriage demanded by the woman, if the bridegroom fulfils certain legal conditions. The *walī* should be one of the following in this order: 1. the nearest male ascendant in the male line; 2. the nearest male relative in the male line among the descendants of the father; 3. do. among the descendants of the grandfather etc.; 4. in the case of a freed woman the *marḥūm* (manumitter) and if the case arises his male relatives in the order of heirs in intestacy [cf. *MIRĀTH*, 6, b]; 5. the representative of the public authority (*ḥākim*) appointed for the purpose; in many countries it is the *ḥādī* or his deputy. In place of the *ḥākim* the future husband and wife may agree to choose a *walī* and must do so if there is no authorised *ḥākim* in the place. The *walī* can only give the bride in marriage with her consent but in the case of a virgin silent consent is sufficient. The father or grandfather, however, has the right to marry his daughter or grand-daughter against her will, so long as she is a virgin (he is therefore called *walī muḍḍib*, *walī* with power of coercion); the exercise of this power is however very strictly regulated in the interest of the bride. As minors are not in a position to make a declaration of their wishes which is valid in law, they can only be married at all by a *walī muḍḍib*. According to the *Ḥanafis* on the other hand, every blood relative acting as *walī* is entitled to give a virgin under age in marriage without her consent; but a woman married in this way by another than her ascendant is entitled on coming of age to demand that her marriage be declared void (*faskh*) by the *ḥādī*. A bridegroom who is a minor may also be married by his *walī muḍḍib*. As a kind of equivalent for the rights which the husband acquires over the wife, he is bound to give her a bridal gift (*mahr*, *ṣadāq*) which is regarded as an essential part of the contract. The contracting parties are free to fix the *mahr*; it may consist of anything that has value in the eyes of the law; if it is not fixed at the conclusion of the contract and if the parties cannot agree upon it, we have a case for the *mahr al-mithl*, a bridal gift fixed by the *ḥādī* according to the circumstances of the bridegroom. It is not necessary to pay the *mahr* at once; frequently a portion is paid before the consummation of the marriage and the remainder only at the dissolution of the marriage by divorce or death. The wife's claim to the full *mahr* or the full *mahr al-mithl* arises only when the marriage has been consummated; if the marriage is previously dissolved by the man the wife can only claim half the *mahr* or a present (*mutʿa*) fixed arbitrarily by the man; these regulations go back to *Sūra ii. 237 sq.* (cf. xxxiii. 48). In form the marriage contract, which is usually prefaced by a solicitation (*khutba*), follows the usual scheme in Muslim contracts

with offer and acceptance; the *walī* of the bride is further recommended to deliver a pious address (*khutba*) on the occasion. The marriage must be concluded in the presence of at least two witnesses (*shāhid*), who possess the legal qualifications for a witness; their presence is here not simply, as in other contracts, evidence of the marriage but an essential element in its validity. On the other hand, no collaboration by the authorities is prescribed. But since great importance is usually attached to fulfilling the formalities of the marriage contract, upon which the validity of the marriage depends, it is usual not to carry through this important legal matter without the assistance of an experienced lawyer. We therefore everywhere find men whose profession this is and who usually act under the supervision of the *ḥādī*. The part they take is to pronounce the necessary formulae to the parties or even to act as authorised agents of one of them, usually the *walī* of the bride. The most important impediments to marriage are the following: 1. blood relationship, namely between the man and his female ascendants and descendants, his sisters, the female descendants of his brothers and sisters as well as his aunts and great-aunts; 2. foster-relationship which by extension of the *Kurʿānic* law by tradition is regarded as an impediment to marriage in the same degrees as blood relationship; 3. relationship by marriage, namely between a man and his mother-in-law, daughter-in-law, step-daughter etc. in the direct line; marriage with two sisters or with an aunt and niece at the same time is also forbidden; 4. the existence of a previous marriage, in the case of a woman without limitation (inclusive of the period of waiting after the dissolution of the marriage, *ʿidda*, q. v.) and in the case of a free man with the provision that he cannot be married to more than four women at once; 5. the existence of a threefold *ṭalāq* [q. v.] or of a *liʿān* [q. v.]; 6. social inequality; the man must not be by birth, profession etc. below the woman (unless both the woman and *walī* agree); a free Muslim can only marry another's slave girl if he cannot provide the bridal gift for a free woman, and the marriage between a master (or mistress) and his slave (or her slave) is quite impossible (a master is however permitted concubinage with his slave); 7. difference of religion; there is no exception to the prohibition of marriage between a Muslim woman and an infidel while the permission given in theory for marriage between Muslim men and the women of the possessors of a scripture is at least by the *Shāfi*is so restricted by conditions as to be prohibited in practice; 8. temporary obstacles such as the state of *iḥrām* [q. v.]. On the other hand, the law knows no minimum age for a legal marriage. If a marriage contract does not fulfil the legal requirements, it is invalid; the *Ḥanafis* and especially the *Mālikis* but not the *Shāfi*is distinguish in this case between invalid (*bāṭil*) and incorrect (*fāsīd*) according as the error affects an essential or unessential element in the contract; in the former case there is no marriage at all, in the second its validity may be attacked but (according to the *Mālikis*) consummation removes any defect. Marriage does not produce any community of property between husband and wife and the woman retains her complete freedom of dealing; but certain laws regarding inheritance come into operation [cf. *MIRĀTH*, 6, c]. The man alone has to bear the

expense of maintaining the household and is obliged to support his wife in a style befitting her station (*nafaqa*); if he should not be in a position to do so his wife may demand the dissolution of the marriage by *faskh* [q. v.]. The man can demand from his wife readiness for marital intercourse and obedience generally; if she is regularly disobedient, she loses her claim to support and may be chastised by the man. The latter however is expressly forbidden to take upon himself vows of continence (*ʾilāʾ* and *ḡihār*). Children are only regarded as legitimate if they are born at least six months after consummation of the marriage and not more than 4 years (the predominant *Shāfiʿi* view) after its dissolution; it is presumed that such children are begotten by the husband himself; the latter has the right to dispute his paternity by *ḥʾān* [q. v.]. Parentage can also be established by the husband's *ikrār* [q. v.], while both recognition and adoption of illegitimate children are impossible.

4. The laws regarding the rights and duties of husband and wife cannot be modified by the parties at the drawing-up of the contract. This can however be effected by the man pronouncing a conditional *talāk* [cf. TALĀK, vii.] immediately after the conclusion of the marriage contract; this shift to secure the position of the woman is particularly common among Indian Muslims. For the rest the couple are left to private agreements which need not be mentioned in the marriage contract. The actual position of the married woman is in all Muslim countries entirely dependent on local conditions and on many special circumstances. It is not a contradiction of this to say that the legal prescriptions regarding marriage are most carefully observed as a rule. In spite of certain ascetic tendencies Islām as a whole has been decidedly in favour of marriage. — In modern Islām the problem of the woman's position in marriage and polygamy is especially discussed between conservatives and adherents of modern social ideas. For the different views resulting from these conditions see the *Bibliography* cited below.

5. Alongside of the usual form of the old Arabian marriage which in spite of its laxity aimed at the foundation of a household and the procreation of children, there existed the temporary marriage in which the pair lived together temporarily for a period previously fixed. Such temporary marriages were entered upon mainly by men who found themselves staying for a time abroad. It is by no means certain that these are referred to in Sūra iv. 28, although the Muslim name of this arrangement (*muʿa* [q. v.], "marriage of pleasure") is based on the literal meaning of the verse; it is however certain from Tradition that Muḥammad really permitted *muʿa* to his followers especially on the longer campaigns. But the caliph ʿOmar strictly prohibited *muʿa* and regarded it as fornication (*zināʾ*) (a group of traditions already ascribes this prohibition to the Prophet). As a result, *muʿa* is permitted only among the *Shiʿis* but prohibited by the Sunnis. The latter have however practically the same arrangement; those who wish to live contrary to the law as husband and wife for a certain period simply agree to do so without stipulating it in the marriage contract.

NIKOPOLI(S), in Turkish spelling Nikbūli or

Nikbūli (in Ewliyā Ćelebi, vii. 463: نیکه بولی),

town on the southern bank of the Danube, at 43° 43' N., 24° 54' E. This Nikopolis, founded by Heraclius (c. 575–642), has often been confused, especially in mediæval literature, with Nikopolis *ad Istrum* or *ad Haemum*, founded by Trajan in 101 in commemoration of his victory over the Dacians (ruins recently excavated near modern Niküp in the upper valley of the Djantra by Mt. Haemus). The Byzantine Nikopolis is sometimes called Nikopolis Major to distinguish it from Trajan's Nikopolis and Nikopolis Minor on the opposite bank of the Danube near the Roumanian town of Tornu Magurele.

The importance of Nikopolis as a trade centre and military post is due chiefly to the command which it holds over the Osma and the Aluta, the two Danubian arteries reaching into the heart of Bulgaria and Roumania respectively. Situated on a naturally fortified plateau, it dominates the plains to the south, the Danube to the north, and the eastern gorge connecting the interior of Bulgaria with the river. The mediæval double walls and strong towers surrounding Nikopolis were destroyed by the Russians during their occupation of the city in 1810 and 1877.

Nikopolis was first captured from the Bulgarians in 791 (1389) by ʿAlī Pāshā Ćendereli [see ʿALĪ PĀSHĀ]. Seven years later, it was the scene of the famous battle in the Crusade which is called by its name. The acquisition of Bulgaria by the Turks and their continual irruptions north of the Danube into territories claimed by Hungary, together with a state of comparative peace in western Europe in the last decade of the xivth century, made it both necessary and possible for most Catholic countries to participate in the expedition. An army of about 100,000 crusaders (according to the most reliable estimates) from France, Burgundy, England, Germany, Italy, Spain, Hungary, Poland, Wallachia and Transylvania marched along the Danube, seized Widdin and Rahova, and finally set siege to Nikopolis while an allied Veneto-

Genoese fleet blockaded the city from the river. The siege lasted about fifteen days, during which Bāyazīd [q. v.] abandoned the siege of Constantinople, burnt the siege machinery, and summoned his Asiatic and European contingents to arms. A Turkish army of perhaps 110,000 men met at Adrianople and, marching through the Shipka Pass, descended into the valley of the Osmā and pitched their camp on the southern hill commanding the Nikopolis plain.

The battle took place on Monday, September 25, 1396, and the crusaders were completely routed owing to the superiority of Ottoman tactics and the dissensions amongst the leaders of the Christian host. Bāyazīd divided his army into two large sections. The first, consisting of two large bodies of irregular cavalry and of irregular infantry, occupied the slope of the hill. Between the cavalry vanguard and the foot rearguard of this section, the Turks planted a field of pointed stakes. Beyond the skyline on the other slope of the hill, hidden from their unsuspecting enemy, the second and more important section, consisting of Bāyazīd with his Sipāhis and Stephen Lazarović with his Serbs, watched for the right moment to advance against the exhausted Christians. These tactics proved to be effective when the Crusaders' vanguard of French and foreign auxiliaries defeated the Turkish irregular cavalry and, after forced dismounting to uproot the stakes, routed the irregular infantry and pursued them uphill to face the new and unseen forces. Meanwhile, a stampede of riderless horses produced confusion in the Crusaders' rear which comprised the Eastern European armies. Mircea and Laczković, who had no sympathy for Sigismund of Hungary, retired with their Wallachian and Transylvanian auxiliaries who constituted the left and right wings of the rearguard. After desperate fighting for the relief of the French and foreign contingents, the Hungarian nobles persuaded their king to board a Venetian galley and escape by way of Byzantium and the Morea to Dalmatia. The rest were either killed or captured, only to be massacred on the following day by Bāyazīd in order to avenge in this way the severe losses which he had sustained. A small number of nobles were, however, saved from the massacre for a ransom of 200,000 gold florins.

The immediate result of the Ottoman victory was the extension of the conquests into Greece and the submission of Wallachia to Ottoman suzerainty. More important, however, was the breathing-space it gave for the consolidation of the Turkish territories in Europe, which enabled the Ottoman empire to survive the critical struggles of the next decades.

In later history Nikopolis plays only a minor part. During the wars of the 19th century it was thrice captured by Russian armies (Sept. 1810; July 1829; July 1877), and by the Treaty of Berlin (July 13, 1878) was included in the tributary principality of Bulgaria.

NĪKSĀR, Neo-Caesarea, first mentioned by Pliny (vi. 3) so that it presumably arose under Tiberius, lies in the Anatolian wilāyet of Siwās [q. v.] 1,150 feet above sea-level. The town is picturesquely situated at the foot of a hill, crowned by the ruins of a mediaeval castle which was erected from the material provided by the numerous buildings of antiquity there. Here in remote antiquity was Cabira and after its decline Diospolis founded by Pompey, later called Sebaste. In Church history Nīksār is famous as the scene of a Council (314 A.D.) and as the birthplace of Gregory the miracle-worker. In the Muslim period it became important under the Saldjūks of whom numerous and important buildings have survived to the present day. It became more important under the Dānīshmandīya [q. v.] whose founder Malik Dānīshmand Aḥmad Ḡhāzī took Nīksār among other places. His grandson Muḥammad successfully resisted a siege by the emperor Manuel in Nīksār. His son Yaghībaṣān (537—562 = 1142—1166) of whom there survives an inscription of the year 552 (1157) died in 562 (1166) whereupon Nīksār was taken by the Byzantine emperor Manuel (Kinnamos, p. 296 sq., 300) although only for a short time. In 1397 Nīksār passed to the Ottomans and gradually lost its former importance. It remained noted for its very prolific orchards, celebrated already in Kāzwīnī's time (*Aṭṭār*, ed. Wüstenfeld, Göttingen 1848) the special produce of which, very large and sweet cherries, pears, figs etc., were famous at all times. Ewliyā Ćelebi (cf. *Siyāḥat-nāma*, ii. 389; v. 14; *Travels*, ii. 102 sqq.) who visited Nīksār in 1083 (1672) describes the town in his usual extravagant fashion, mentioning 70 schools, 7 monasteries, many mills and water-wheels and 500 shops with a large number of shoe-makers. The pomegranates there, he says, are the size of a man's head and weighed 1 okka. The remains of the Muslim period so far as they bear inscriptions, have been published by Ismā'īl Ḥaḳḳī, *Kitābeler* (Stambul 1345 = 1927), p. 58—73. The türbes (sepulchral cupolas) of Malik Ḡhāzī and of Ḥādjdjī Ćikrīk are worth mentioning; among old dervish monasteries there are the Ishīk-tekke and the Kolaḳ-tekke. Nīksār has often been visited and described by modern travellers. The population (c. 4,000) was before the war one quarter Christian; they were mainly engaged in the silk and rice trades.

(FRANZ BABINGER)

AL-NĪL, the river Nile. The Nile is one of the large rivers which from the beginning have belonged to the territory of Islām, and the valleys and deltas of which have favoured the development of an autonomous cultural centre in Islāmic civilisation. In the case of the Nile this centre has influenced at different times the cultural and political events in the Muḥammadan world. Thus the Nile has, during the Islāmic period, continued to play the same part as it did during the centuries that preceded the coming of Islām.

The name al-Nīl or, very often, Nīl Miṣr, goes back to the Greek name Νεῖλος and is found already in early Arabic literary sources, though it does not occur in the Qurʾān. (in Sūra xx. 39 the Nile may be meant by *al-yamm*). The Christian habit of calling the river Γεῆν, after one of the rivers of Paradise, as found in the works of Ephraim Syrus and Jacob of Edessa and in the Arabic-Christian author Agapius (*Patrologia Orientalis*, v. 596), is not followed by the Muḥammadans, who know only the Oxus under this name. Al-Zamakhshari (*Kitāb al-Amkina*, ed. Salverda de Grave, p. 127) mentions as another name al-Faīḍ, no doubt a poetical allusion to the yearly flood. Already in the Middle Ages, the word *baḥr* having come to acquire in Egyptian Arabic the meaning of "river", the Nile is also called al-Baḥr or Baḥr Miṣr (cf. al-Makrizī, ed. Wiet, i. 218), which is also the case with several separate parts of its river system, such as Baḥr Yūsuf or Baḥr al-Ḡhazal. In the Delta the different ramifications of the river are occasionally also called Nile, but where necessary the main stream (*amūd*) is distinguished from the minor branches (*dhirāʿ* or *khalidj*) and the canals (*turʿa*).

The geography of the Nile is treated here only from a historico-geographical point of view so far as the knowledge of Islāmic science is concerned. The geographical knowledge of the Nile among the Muḥammadans, so far as we can learn from their literary sources, is based partly on direct observation, but for the most part on legendary or pseudo-scientific traditions which go back to local beliefs or to classical science. For a long time during the Middle Ages the limit of Islāmic territory on the Nile was well fixed; it ended at the first cataract near the island of Bilāḳ (Philae) to the south of Uswān (Assouan); here began, since the treaty (*baḳṭ*) concluded by ʿAbd Allāh b. Abī Sarḥ with the Nubians, the Nubian territory, where for long centuries Christianity prevailed (al-Balādhurī, p. 236; Ibn ʿAbd al-Ḥakam, *Futūḥ Miṣr*, ed. Torrey, p. 188). The first locality on Nubian territory, where tribute was paid, was called al-Ḳaṣr (al-Masʿūdī, *Murūdj*, iii. 40, 41).

Historical tradition has preserved parts of the alleged correspondence between ʿAmr b. al-ʿĀṣ and the caliph ʿUmar on the subject of Egypt, then newly conquered; here the Nile is described as a river "whose course is blessed", while the flood and the inundations are praised in poetical terms (ʿUmar b. Muḥammad al-Kindī, *Faḍāʾil Miṣr*, ed. Østrup, p. 204; al-Dimashqī, ed. Mehren, p. 109). The same correspondence reveals the perhaps historical fact that ʿUmar did not wish to see the Arab army established in Alexandria, because

there would be then a great river between the army and the caliph (Ibn ʿAbd al-Ḥakam, p. 91; cf. also what is said on p. 128 about those who went to live in al-Dīja).

The principal towns by which the Nile passed in mediæval Egypt in Upper Egypt, between Uswān and al-Fuṣṭāt, were Atfū (Edfu, on the left), Isnā (Esne, l.), Armant (l.), Kūṣ (r.), al-Aḳsur (Luxor, r.), Kift (r.), Ikhmīm (Akhmīm, r.), Usyūt (Asyūt, Suyūt, l.), al-Ushmūnain (l.), Anṣina (r. opposite al-Ushmūnain), Ṭahā (l.), al-Ḳais (l.), Dalās (l.), Ahnās (l.) and Itfīḥ (Atfīḥ, r.). This succession of towns is given for the first time by al-Yaʿqūbī (*B. G. A.*, vii. 331—334), while Ibn Hawḳal (*B. G. A.*, ii. 95) is the first to give a table of the distance between these towns, expressed in *barids*, the entire distance being 21 days' journey (al-Idrisī, ed. Dozy and de Goeje, p. 52, gives 25 days' journey for the same distance). Shortly before al-Ushmūnain branched off on the left the canal that conducted the water to al-Faiyūm, which is known to Ibn al-Faḳīḥ (*B. G. A.*, vi. 74) as Nahr al-Lāhūn and to al-Idrisī (p. 50) as Khalidj al-Manḥi; this canal, which according to unanimous tradition was dug by Joseph, occurs already on the MS. map of the year 479 (1086) of Ibn Hawḳal in the Seray Library of Constantinople, N^o. 3346 (reproduction on fol. 658 of *Monumenta Africæ et Aegypti* by Youssef Kamāl). It is the Baḥr Yūsuf of our days; on it was situated al-Bahnasā. The banks of the Nile in Upper Egypt are not very completely described by the geographers; one finds repeated everywhere the assertion that the borders were cultivated without interruption between Uswān and al-Fuṣṭāt (cf. al-Iṣṭakhṛī, *B. G. A.*, i. 50), but that the width of the cultivated territory varied during the river's course, dependent on the greater or lesser distance of the two mountain ranges that border the stream. Ibn Hawḳal (MS. of Constantinople, cf. supra) describes two extremely narrow strips, one between Uswān and Atfū (now called Gebelein) and one between Isnā and Armant (now called Gebel Silsile). The curves in the course of the Nile, especially in the upper part of the Ṣāʾid, are not indicated on the maps of Iṣṭakhṛī and Ibn Hawḳal. The oldest extant Arab map of the Nile, however — which is at the same time the oldest Arab map that we know of —, gives clear indications that its sinuous course was a known fact. This map is found in the Strassburg MS. of the year 428 (1037) of al-Kh̲wārizmī's *Ṣūrat al-Ard* and has been reproduced in the edition of that text by H. v. Mīzk (*B. A. H. U. G.*, iii., Leipzig 1926). The representation of the Nile here is connected with the classical tradition of astronomical geography; al-Kh̲wārizmī himself, and after him Suhṛāb (Ibn Serapion) and Ibn Yūnus (MS. 143 Gol. of the University Library at Leyden, where on p. 136 a special table is given of the towns lying on the banks of the Nile) give exact indications as to the longitudes and latitudes of the Nile towns, but these indications need many very uncertain corrections to allow of the reconstruction of a map, as v. Mīzk has tried to do for al-Kh̲wārizmī in *Denkschr. Ak. Wiss. Wien*, lix., Vienna 1916 and J. Lelewel for Ibn Yūnus in pl. ii. of the Atlas annexed to his *Géographie du Moyen-âge*, Paris 1850. But the fact that the course of the Nile is from south to north is well known to all the Arabic sources, which often repeat the

assertion that the Nile is the only river in the world for which this is the case. Only the text of Ibn Ḥawḳal seems to imply that the Nile reached al-Fuṣṭāṭ from the S. E. (*B. G. A.*, ii. 96).

The Delta of the Nile begins to the north of al-Fuṣṭāṭ, where the distance between the two mountain ranges widens, while these hills themselves become lower and pass gradually into the desert. Immediately below al-Fuṣṭāṭ began the canal that was dug by 'Amr b. al-'Āṣ to link up the Nile with the Red Sea; this canal (*Khaliḍj Miṣr* or *Khaliḍj Amīr al-Mu'minīn*) was made in 23 (644) according to Muḥammad b. Yūsuf al-Kindī (cited by al-Maḳrīzī, *Khīṭaṭ*, Būlāḳ, ii. 143; cf. Yāqūt, ii. 466) and served for the conveyance of provisions to the Ḥijāz until the reign of 'Umar Ibn 'Abd al-'Azīz; afterwards it was neglected and even obstructed by the order of the caliph al-Manṣūr, so that, in the ivth (xth) century, it ended at *Dhanab al-Timsāh* in the lakes to the north of al-Ḳulzum (cf. al-Mas'ūdī, *Murūdj*, i. 147).

The two principal arms of the Nile in the Delta began about 12 miles to the north of al-Fuṣṭāṭ (a little further than nowadays, according to Guest) and had, as now, a great number of ramifications which communicated in many ways and ended for the greater part in the big lakes or lagoons stretching behind the sea coast from west to east; these lakes were called in the Middle Ages: Buḥairat Maryūt (behind Alexandria), B. Idkū, B. al-Barullus or B. al-Buṣṭim and the very large B. Tinnīs, which last contained a large number of islands with Tinnīs as the most important. On the land tongue, where the two main arms separated was situated the town of *Shāṭnāf*. The western arm went as now to the town of *Rashīd* (Rosette) after which it reached the sea; near the town of *Shābūr* a branch parted from this arm in the direction of Alexandria, ending in the Buḥairat Maryūt; this branch was only filled with water in the time of the flood (a very complete survey of the different "canals" of Alexandria by P. Kahle, in *Isl.*, xii. 83 sqq.). The eastern arm ran, as is still the case, past *Dimyāt* (Damiette) and reached the sea shortly afterwards; it had several branches that went to the Buḥairat Tinnīs, one of which continued one of the Nile mouths of antiquity. Though many sources, based on a pseudo-historical tradition, repeat after each other that there are seven Nile arms (Ibn 'Abd al-Ḥakam, p. 6; further al-Khwarizmi, *Qudāma*, *Suhrāb*, al-Mas'ūdī, Ibn Zūlāḳ), the more realistic authors (Ibn *Khurdādhbeh*, al-Ya'qūbī, Ibn Rusta, al-Iṣṭakhri, Ibn Ḥawḳal, al-Idrisi) only know of the two main arms. These were linked up by a canal system which, in the Middle Ages, differed considerably from the present situation. The chief sources from which we know them are Ibn Ḥawḳal and al-Idrisi, who give itineraries following the different branches, but as the places named in these itineraries have been identified only in part, an integral reconstruction is not yet possible (on this problem cf. R. Guest, *The Delta in the Middle Ages*, in *J. R. A. S.*, 1912, p. 941 sqq. and the map annexed to this article). The description in the text of *Suhrāb* (ed. v. Mzik, *B. A. H. U. G.*, v.) has little value as an endeavour to trace back to his time (xth century) the seven legendary arms; among these arms special attention is paid to the "arm of Saradūs", which, according to tradition, was dug by Ḥamān

(Ibn 'Abd al-Ḥakam, p. 6; cf. Guest, *loc. cit.*, p. 944 and Maspéro and Wiet, *Matériaux*, in *M. I. F. A. O.*, xxxvi., 104). Al-Maḳrīzī has preserved a detailed description of the canal system in the province of al-Buḥaira, to the east of Alexandria, from the *Kitāb al-Minhādj* of Abu 'l-Ḥasan al-Makhzūmī, who wrote in the thirteenth century (*M. I. F. A. O.*, xli., p. 167 sqq.). It seems possible that a study of the ancient maps (especially the Delta map of the Constantinople MS. of Ibn Ḥawḳal and the maps of al-Idrisi) may be useful for a more complete reconstruction of the mediæval situation.

The Nile arms have always been decisive for the administrative division of the Delta, which the sources call by the name of *Asfal al-Arḍ* or *Asfal Arḍ Miṣr*. The region to the east of the eastern branch was called al-Ḥawf; the texts of al-Iṣṭakhri and Ibn Ḥawḳal place al-Ḥawf to the north of the Nile, which may be understood in connection with the view referred to above that the Nile at al-Fuṣṭāṭ had a direction from S. E. to N. W. The region between the two main arms was called al-Rif (a name sometimes used for the entire Delta as well) or *Baṭn al-Rif*, while the country to the west of the western arm was called al-Buḥaira and later al-Ḥawf al-Ḡharbī, the original Ḥawf being called then al-Ḥawf al-Sharḳī. The three sections were divided into *kūras*, the limits of which were determined by the more important branches; the bigger administrative units of later times [cf. EGYPT] depended likewise on the river system. The present geographical aspect of the Delta is the result of the new irrigation works that began in the sixth century under Muḥammad 'Alī; the most conspicuous new canals are the Maḥmūdiyya canal, dug from Fūwa on the western arm to Alexandria, the Tawfiḳīya, Manūfiya and Buḥairīya canals that were completed in 1890, and the Ismā'īliya canal, which links up the Nile with the Suez canal.

As to the knowledge of the course of the Nile to the south of Egypt the Muḥammadan geographical literature begins rather late to give information based on direct observation. At first these sources content themselves with saying that the Nile comes from the country of the Nūba; for the rest there were ancient sources of a different kind that helped to complete the geographical conception of the course of the great river. This conception involved also the origin of the Nile, covered since antiquity by a veil of mystery. The real origin of the Nile always remained unknown to the Muḥammadan scholars and travellers. It is a curious fact, however, that the information on this subject which we find uniformly repeated in the Islāmic sources from the treatise of al-Khwarizmi (± 830 A. D.) gives an idea of the origin of the Nile which does not correspond entirely to the data furnished by the classical sources. This conception makes the Nile emerge from the Mountains of the Moon (*Djabal al-Qamar*) to the south of the equator; from this mountain come ten rivers, of which the first five and the second five reach respectively two lakes lying on the same latitude; from each lake one or more rivers flow to the north where they fall into a third lake and it is from this lake that the Nile of Egypt begins. This conception is largely schematized and corresponds only partly to Ptolemy's description of the Nile sources; Ptolemy

knows only of two lakes, not lying on the same latitude and does not speak of a great number of rivers coming from the Mountains of the Moon. The third lake especially is an innovation (cf. A. v. Mzik, in *Denkschr. Ak. Wiss. Wien*, lxxxix., p. 44); in later authors such as Ibn Sa'īd and al-Dimashkī this third lake is called Kūrā and may be connected with some notion of Lake Chad (the same authors change the name of Djabal al-Qamar into Djabal al-Qumr which pronunciation is commented on by al-Makrizī, ed. Wiet, i. 219), but this is not probable for the time of al-Khwarizmi; the knowledge of more equatorial lakes, however, may perhaps be traced to the experiences of the two centuries despatched by Nero to explore the Nile and who reached, according to Seneca, a marshy impassable region, which has been identified with the Baḥr al-Ghazal. The system described by al-Khwarizmi of the origin of the Nile is represented on the map in the Strassburg MS. and is repeated many times after him (Ibn Khurdādhbeh, Ibn al-Faḥīh, Qudāma, Suhrāb, al-Idrisi and later authors). Al-Mas'ūdī, in describing a map he has seen, does not speak of the third lake (*Murūdj*, i. 205, 206) and Ibn Rusta (*B. G. A.*, vii. 90) says that the Nile comes from a mountain called B-b-n and also knows only two lakes. Al-Iṣṭakhri and Ibn Ḥawḳal on the contrary, frankly admit that the origin of the Nile is unknown, which is also illustrated by their maps. Still the system of al-Khwarizmi continued to be a geographical dogma and is found as late as al-Suyūṭī. Al-Khwarizmi also took over from Ptolemy a western tributary of the Nile, which comes from a lake on the equator; this river is called by Ptolemy Astapos and may perhaps be identified with the Atbara. A later development, which connects with the Nile system a river that flows to the east in the Indian Ocean, is found for the first time in al-Mas'ūdī (*Murūdj*, i. 205, 206; ii. 383, 384); this view is later taken up again by Ibn Sa'īd and al-Dimashkī.

Another category of notions about the origins of the Nile is connected with the Jewish and Christian traditions which make the Nile come from Paradise. Mediæval cosmographical theory places Paradise in the extreme East, on the other side of the sea (cf. the maps of Beatus), so that the Nile, like the other rivers of Paradise would have to cross the sea. This state of things is actually described in an old tradition, probably of Jewish origin, of a man who went in search of the sources of the Nile and had to cross the sea, after which he reached Paradise (al-Mas'ūdī, *Murūdj*, i. 268, 269 and *Akhbār al-Zamān*, MS. Vienna, fol. 156a-b; al-Maḳḍisī, *B. G. A.*, iii. 21). With this origin in Paradise is perhaps connected the view, which all sources attribute to al-Djāhiz in his lost *Kitāb al-Buldān*, that the Nile and the Mibrān (Indus) have the same origin (cf. al-Mas'ūdī, *Tanbih*, *B. G. A.*, viii. 55), a view which is sarcastically criticized by al-Birūnī (*India*, p. 101). To the same origin may go back the idea, often found in Muḥammadan sources, that, when the Nile rises, all the rivers of the earth go down in level.

Thirdly there is a cycle of geographical conceptions which link up the western part of Africa with the river system of the Nile. Herodotus already had sought a western origin and Pliny quotes the *Lybica* of king Juba of Mauretania, who makes the Nile rise in western Mauretania. Mar-

quardt (*Benin-Sammlung*, p. 125 sqq.) has explained this view from a corruption of the name of the river Nuhul, which he identifies with the Wādī Nūl and which has its origin in the Mauritanian Atlas. Traces of this western Nile are to be found in Ibn al-Faḥīh (*B. G. A.*, v. 87) who, following an authority of the time of the conquest, places the origin of the Nile in al-Sūs al-Aḳṣā. Al-Bakrī for the first time identifies this western Nile with the river Niger, although we find already in al-Mas'ūdī the knowledge of a great river, far to the south of Sijilmāsa (*Murūdj*, iv. 92, 93). Al-Bakrī describes the Nile as passing through the territory of the Sūdān (ed. de Slane, p. 172) and enumerates a number of Berber and Sūdān tribes and their towns which border the river; the westernmost town is with him Ṣanghāra, followed in eastern direction by Takrūr, Sillā, Ghāna, Tiraḳḳā and finally the country of Kawkaw. After al-Bakrī a similar description is given by al-Idrisi, but this last author goes back to another source than al-Bakrī when he places the mouth of the Nile in the neighbourhood of the salt town Awlīl, thus identifying the lower course of this Nile with the Senegal (Marquardt, *loc. cit.*, p. 171). Al-Idrisi likewise shows himself informed on the course of the Nile to the east of Kawkaw, though he is in doubt if Kawkaw is situated on the Nile itself or on a side arm (ed. Dozy and de Goeje, p. 11); he finally derives this western Nile from the third of the big Nile lakes mentioned above, thus connecting the Nile of the Sūdān with the Nile of Egypt in one river system. So long as the complete text of al-Bakrī is not known, we cannot ascertain if this conception goes back already to that author. Al-Idrisi's Nile course is clearly indicated on his maps of the 1st—4th section of the first climate. After him it is especially Ibn Sa'īd who has described the western Nile in this way and he has been followed again by Abu 'l-Fidā'. Al-Dimashkī (ed. Mehren, p. 89) gives the same representation; this last author even makes the third lake, which he calls like Ibn Sa'īd the lake of Kūrā, give birth to three rivers: the Nile of the Sūdān, the Nile of Egypt, and a third river running in eastern direction towards Maḳdashū in the Zandj country on the Indian Ocean. This last river, which was also connected by al-Mas'ūdī with the Nile [cf. *supra*] is probably identical with the Webi river in Italian Somaliland.

While the geographical authors constructed in this way the Nile system with a good deal of credulity and imagination, the real knowledge of the Nile south of Egypt advanced but slowly. The southernmost point reached by the Arab conquerors was Dongola (al-Kindī, ed. Guest, p. 12) and it was well known that this town was situated on the Nile; its latitude and longitude are given by al-Khwarizmi and Suhrāb. Al-Ya'qūbī (*Ta'rikh*, ed. Houtsma, p. 217) knows that, in the country of the Nūba called 'Alwa, who live behind the Nūba called Muḳurra, the Nile divides into various branches; this same author, however, places Sind behind 'Alwa. Al-Mas'ūdī (*Murūdj*, iii. 31, 32) knows that the country of the Nūba is divided into two parts by the Nile. Ibn Ḥawḳal (Constantinople MS.) describes two places where there are cataracts (*djanādīl*), namely the one above Uswān, which is the "first cataract", and one near Dongola, of which it is not certain whether the "second" or the "third" cataract is meant. About the same time,

however, a traveller named Ibn Sulaim al-Uswānī wrote a valuable description of the middle Nile course, which has been preserved in al-Maḳrīzī's *Khīṭaṭ* (ed. Wiet, in *M.I.F.A.O.*, xlii. 252 sqq.). This Ibn Sulaim, on whom al-Maḳrīzī's *Kitāb al-Muḳaṭṭaʿ* gives some information (cf. Quatremère, *Mémoires sur l'Égypte*, ii.), had been sent by the Fāṭimid general Dījawhar to the king of the Nūba on a diplomatic errand, and was the author of a *Kitāb Akhbār al-Nūba wa 'l-Muḳurra wa 'Alwa wa 'l-Budja wa 'l-Nīl*, in which a detailed description is given of these countries. He says that the region between Uswān and Dunḳula is inhabited in the north by the Maris and more to the south by the Muḳurra; the northern part is barren and the great cataracts are correctly described. The country between Dunḳula and 'Alwa (this last spot is the region of *Khartūm*) is described as highly flourishing; the big winding of the Nile here is perfectly known to Ibn Sulaim. The Nile "is divided" then into seven rivers; from the description it is clear that the northern one of these rivers is the Atbara, coming from the east; further south the "White Nile" and the "Green Nile" join near the capital of 'Alwa and the "Green Nile", which comes from the east, is again the result of four rivers, one of which comes, as the author thinks, from the country of the Habasha, and one from the country of the Zandj; this last, incorrect, statement may have been influenced by learned tradition. Between the "White Nile" and the "Green Nile" there stretches a large island (*djazīra*, as it is still called on our maps), which has no limits in the south. This is about the only description in mediæval Islāmic literature that shows how far the knowledge of the middle Nile really went. Only little of it seems to have reached the systematic geographic treatises; al-Idrīsī, e.g., describes this part of the river in a way which only shows that he did not make good use of the inadequate sources that were at his disposal.

The exploration of the upper Nile and its sources since the end of the xviiith century was the work of European travellers. They discovered, or perhaps re-discovered, the real big Nile lakes and identified the Ruwenzori mountain range with the Moon Mountains, the name of which was found again by the explorer Speke in the name of the Unyamwezi country, the "country of the moon". A part of the exploration of the Nile was due, however, also to Egyptian initiative. The well-known military expedition of 1820—1822 under Muḥammad 'Alī's son Ismā'īl Pasha, during which the city of *Khartūm* was founded, established Egyptian domination in the Egyptian Sūdān and opened the way for further scientific exploration. In the years 1839—1842 three Egyptian expeditions went up the White Nile, and during the reign of Ismā'īl Pasha the Egyptian government repeatedly tried to cleanse the swamps of the White Nile above Sobat from the masses of vegetation (*sudd*) which hindered navigation.

The yearly flood of the Nile (*ziyāda*, *faiḍ*, *faiyaḍān*) is the phenomenon to which Egypt has been at all times indebted for its fertility and prosperity, as it provides, in compensation for the almost complete lack of rain in the country, a natural and almost regular irrigation for the lands on its borders and in the delta. It is the foundation of all cultural life and justifies entirely the attribute *mubārak* so often given to the river. On the same

account the Nile is considered, as well as the Euphrates, as a "believing" river (al-Maḳrīzī, ed. Wiet, *M. I. F. A. O.*, xxx. 218). The flood deeply influences the private and public life of villagers and townsfolk alike, and already the oldest Muḥammadan traditions about Egypt reflect the feelings of wonder and thankfulness that animated the people of Egypt before them (Ibn 'Abd al-Ḥakam, p. 109, 205). Having reached its lowest level towards the end of May at Assuan and in the middle of June at Cairo, the Nile begins to rise again, reaching its highest level in the beginning of September at Assuan and in the beginning of October at Cairo. This regularity brings about a similar regularity in the methods of irrigation in the several parts of Egypt, in the times of the sowing and reaping of the different crops and consequently in the modes of levying the land taxes (e.g. al-Maḳrīzī, ed. Būlāḳ, i. 270, which text comes from Ibn Ḥawḳal); all the dates referring to these occupations have always continued to be fixed according to the Coptic solar calendar.

There is much discussion in the literary sources about the causes of the flood. The most ancient belief, which at the same time corresponds best with reality, was that the flood is caused by heavy rainfalls in the countries where the Nile and its tributaries have their origin. This is expressed in a somewhat exaggerated way in a tradition that goes back to 'Abd Allāh b. 'Amr b. al-ʿĀṣ, according to which all the rivers of the world contribute, by divine order, with their waters to the flood of the Nile (Ibn 'Abd al-Ḥakam, *loc. cit.*, and p. 149). This implies the belief that all other rivers fall while the Nile rises, but, on the other hand, it is sometimes observed that other rivers also show the same phenomenon of rising and falling, especially the Indus, and this again is considered as a proof of the common origin of the two rivers (al-Maḳrīzī, ed. Wiet, *M.I.F.A.O.*, xxx. 227). There are, however, other views, which attribute the cause of the flood to the movement of the sea, or to the effect of the winds; these views have been inherited from sources of the pre-Muḥammadan period, among others from the treatise on the flood of the Nile attributed to Aristotle, and they are discussed and refuted at length in a special chapter of al-Maḳrīzī's *Khīṭaṭ* (*M. I. F. A. O.*, xxx. 236 sqq.).

Up to the xixth century the irrigation system of Egypt continued along the same lines. When the flood begins all the outlets on both sides of the main stream and its principal arms in the Delta are closed, to be opened again about the time of the highest flood, when the water level has reached the necessary height according to the different places. The most important of these yearly "openings" was that of the canal (*Khaliḍj*) of Cairo, which, until recent times, remained a public festival. In Cairo the flood is complete (*wafā' al-Nīl*), when it has reached 16 *dhīrāt*, generally in the first decade of the Coptic month of Mesore (about the midst of August), and this was proclaimed everywhere in the town (cf. the description by Lane, *Manners and Customs*, ii. 287 sqq. and E. Littmann, *Ein arabischer Text über die Nilschwelle*, *Festschrift Oppenheim*, Berlin 1933, p. 66 sqq., for older times, al-Ḳāḷashandī, iii. 516).

The height of the level of the Nile has been measured since olden times by the Nilometers [cf. *MIKYAS*]. Many of these *miḳyās* are recorded by the

sources, the southernmost being that of 'Alwa and the most celebrated the one of al-Fuṣṭāṭ, constructed by Usāma b. Zaid al-Tanūkhī about 92 (711) and often restored afterwards (a complete survey of all the *miḡyās* is given in Omar Toussoun, *Mémoire sur l'Histoire du Nil*, ii. 265 sqq.). These instruments generally were made of stone, with marks upon them, but they were sometimes of other material (e.g. a fig-tree near the monastery of Safanūf in Nubia; cf. Evetts, *Churches*, p. 262). The level necessary for the operations of irrigation varied in different places; in the capital the average level had to be 16 *dhirā'* above the lowest level of the Nile; if the flood surpassed 18 *dhirā'* it became dangerous, while a flood not exceeding 12 *dhirā'* meant famine (cf. e.g. al-Idrisi, p. 145, 146). In the history of Egypt the years after 444 (1052), and especially the year 451 (1059), are notorious for the famine and disaster caused by the failure or practical failure of the flood. A historical account of the flood from the years 152—1296 (769—1879) is given on p. 454 sqq. of Omar Toussoun, *Mémoire sur l'Histoire du Nil*, ii.

The regulation of the main stream and its branches are ascribed to the ancient Egyptian kings (al-Maḡrizī, on the authority of Ibn Wāṣif Shāh), but no real irrigation work of a wider scope existed in the Middle Ages and later except the famous canal system of al-Faiyūm [q.v.], which all the sources ascribe to the prophet Yūsuf. In the rest of Egypt the water was allowed to flow freely over the lands after the piercing of the dams, so that large areas were completely inundated for some time; the Arabic sources contain some vivid descriptions of the large stretches of water, above which rose the villages, communication between the villages being only possible by means of boats during that time of the year (al-Mas'ūdī, *Murūdj*, i. 162; Ibn 'Abd al-Ḥakam, p. 205). Since the reign of Muḥammad 'Alī new irrigation works have been planned with the aim of making the country more productive, a possibility at which already the mediæval authors hinted more than once. The first efforts, however, failed. About 1840 was begun the construction of a great barrier across the two arms of the Nile at the apex of the Delta, according to the plans of the French engineer Mouget, but this enterprise began to bear fruit only fifty years later when this barrage project, including the Tawfiḡiyya, Manūfiyya and Buḡairiyya canals, had been completed in 1890. The later great irrigation works were executed higher up the river, such as the great dam and locks at the head of the cataracts near Philae above Assuan, in 1902, which was raised again in 1912, and again in 1933. While allowing, on one side, a better regulation of the distribution of Nile water in Egypt, these barrages higher up enable at the same time a better irrigation of the borders to the south of Egypt. Herewith is connected the enormous barrage of Makwār, near Sennār on the Blue Nile above Kharṭūm, which permits the irrigation of the region called al-Djazīra, between the Blue Nile and the White Nile. This work was finished in 1925 and is meant to be completed by a similar barrage on the White Nile. In this way the control of the Nile waters has passed to a certain extent out of Egypt itself; it recalls the days of the great famine in 1059, when the Egyptians thought that the Nubians were holding up the flood of the Nile.

The same problem came up recently with regard to the new project of constructing a dam on the frontier of the Sūdān and the Belgian Congo and the question was raised whether this dam will prove a *fā'ida 'adjiila* or a *fā'ida 'adjiila* for Egypt (cf. the newspaper *al-Balāgh* of March 17, 1934).

It has already been shown how the flood of the Nile was the occasion of popular festivals such as the opening of the canal of Cairo. But in other respects also the Nile is connected with traditional customs of a religious character, which are to be traced back through the Greek-Christian period into very ancient times. When the Arabs conquered Egypt, the sacrifice of the "Nile Bride" was still in use; every year a richly apparelled young virgin was thrown into the Nile to obtain a plentiful inundation. According to a tradition first recorded by Ibn 'Abd al-Ḥakam (p. 150), this custom was abolished by 'Amr Ibn al-Āṣ and the Nile resumed its flood after a note of the caliph 'Umar had been thrown into it requiring the river to rise if the flood was willed by God. In later times a symbolic offering of a girl called *'Arūsāt al-Nīl* was still practised on the Coptic *'Id al-Ṣalīb* (Norden, *Travels in Egypt and Nubia*, 1757, p. 63—65); Lane (*Manners and Customs*, p. 290) mentions a round pillar of earth, near the dam of the canal of Cairo, which pillar was called *al-'Arūsa*. Another custom, practised formerly by Christians and Muḥammadans alike, was to bathe in the Nile on the eve of the Epiphany, in memory of the Baptism of Christ (cf. Evetts, *Churches*, p. 129). Al-Mas'ūdī (*Murūdj*, ii. 364 sqq.) describes this festival, which he calls *Lailat al-Ḡhiṭās*, for the year 330 (942). Lane (p. 363 sq.) describes the same ceremony, but in his time the Muḥammadans did not take part in it. But bathing in Nile water in general procures *baraka* (cf. W. Blackman, *The Fellāḥin of Upper Egypt*, p. 32 with regard to bathing in the Baḡr Yūsuf).

The quality of the Nile water is a matter of discussion in medical treatises. Avicenna (*al-Ḳānūn fi 'l-Ṭibb*, ed. Būlāḡ 1294, i. 98; cited by al-Maḡrizī) holds that the circumstance that a river flows from south to north has a bad influence on the water, especially when a south wind blows, and on this account he thinks that the abundant praise given to the Nile is exaggerated. The Egyptian physician Ibn Riḏwān (d. 453 = 1061) says that the Nile water reaches Egypt in a pure state, owing to the health in the country of the Sūdān, but that the water is spoilt by the impurities that mix with it on Egyptian soil (cited by al-Maḡrizī, *M.I.F.A.O.*, xxx. 275 sqq.). This same author describes very clearly the troubled condition of the water when the flood begins. He discusses likewise the influence of the Nile on the climate of Egypt and the medicinal properties of its water.

Other authors speak at length of the fauna of the Nile, giving especial attention to the fish. A very long list of fishes is given by al-Idrisi (p. 16 sqq.) with a description of their often curious qualities. The animals most frequently described by the geographers are, however, the crocodiles, and the animal called *saḡankūr*, which is said to be the result of a cross between a crocodile and a fish, but which seems to be in reality a kind of lizard.

The possibilities which the Nile afforded for navigation are best seen from the historical sources. Sea-going vessels do not seem ever to have entered

its arms, while the traffic on the river was maintained by small craft; various names of Nile boats occur in literature; in the ninth century the vessel called *dhahabiya* is especially known. In earlier times the term *zallāḍj* is used for a Nile boat (al-Kindī, *Kitāb al-Umarā'*, ed. Guest, p. 157; Dozy, *Supplément*, s. v.). The skill of the fishermen in their sailing boats on the lakes in the Delta is often recorded; on shallow places, however, as well as on the inundated lands, boats had to be moved by means of oars or poles. The rapids between Egypt and Nubia were, as nowadays, an insurmountable barrier to river traffic; the loads were conveyed along the shore to the other side of the falls (Ibn Hawkal, MS. Sulṭān Aḥmad Kōshk, N^o. 3346, fol. 86).

The cataracts above Assuan for a long time continued to form a barrier to the spread of Islām towards the countries bordering the Nile to the south of Egypt, which forms a curious contrast with the part played by the Nile in the introduction of Christianity into Nubia (cf. J. Kraus, *Die Anfänge des Christentums in Nubien*, Münster [Diss.] 1930). Islām penetrated only slowly into Nubia and became more generally disseminated in the Sudān only in the ninth century [cf. SUDĀN].

Something has been said already about the praises of the Nile and its descriptions in poetical terms, by which this river has contributed to Arabic literature. Al-Makrizī (*loc. cit.*, p. 270 sqq.) cites some fragments of poems in praise of the Nile and its flood; among the poets which he names are Tamīm Ibn al-Mu'izz [q. v.] (d. 985) and Ibn Ḳalāḳis (d. 1172). Further Yāḳūt (i. 592; iv. 865) cites some poems which he attributes to Umaiya b. Abi 'l-Ṣalt; this poet is probably Abu 'l-Ṣalt Umaiya b. 'Abd al-'Azīz (d. 1134) who wrote a treaty *al-Risāla al-Miṣriya*, from which also al-Makrizī makes quotations. The earliest Arabic poems on the Nile are probably those found in the *Diwān* of Ibn Ḳais al-Ruḳaiyāt [q. v.], the court poet of 'Abd al-'Azīz Ibn Marwān in the beginning of the eighth century. Several treatises have been especially devoted to the Nile. Ibn Zūlāḳ (d. 997) says in his *Faḍā'il Miṣr* (MS. arabe N^o. 1818 of the Bibliothèque Nationale at Paris, fol. 31r) that he has written a book on the importance and the salutary qualities of the Nile, which now seems to be lost. Further there are a treatise *Tabṣīrat al-Aḫyār fī Nīl Miṣr wa-Aḫḥawātihi min al-Anḥār* (MS. in Algiers; cf. Brockelmann, *G.A.L.*, ii. 506), and two short opuscula by Djalāl al-Dīn al-Maḥallī (d. 1459) and al-Suyūṭī, which are found together in the MS. Or. 1535 of the British Museum (Rieu, *Suppl.*, N^o. 1198; *G.A.L.*, ii. 114).

Bibliography: As the aim of the present article is to give only an account of the Nile from the point of view of Islām and its history, it seems superfluous to quote here even the most important modern works and articles belonging to the abundant bibliography of the Nile. The earlier Muḥammadan authors have all been named in the text; the later ones, such as Yāḳūt, 'Abd al-Laṭīf, Abu 'l-Fidā', al-Ḳalkashandī, al-Makrizī, al-Suyūṭī (*Husn al-Muḥādara*), al-Nuwairī and others are in most cases a compendium of earlier earlier views and statements. A very important later Muḥammadan source is *al-Khiṭaṭ al-Tawfiḳiyya* by 'Alī Bāshā Mubārak. The Muḥammadan literary sources have been used in the following works: Else Reitemeyer, *Beschreibung Aegyptens*

im Mittelalter, Leipzig 1903, p. 31—61; J. Maspero and G. Wiet, *Matériaux pour servir à la Géographie de l'Égypte*, in *M.I.F.A.O.*, xxxvi. 215 sqq.; and very profusely: Omar Toussoun, *Mémoire sur l'Histoire du Nil*, vols. i., ii., iii., in *Mémoires présentés à l'Institut d'Égypte*, viii., ix., x., Cairo 1925. The last of these three volumes contains a series of cartographical reconstructions. A number of ancient Muḥammadan maps of the Nile are to be found in the *Mappae Arabicae*, ed. Konrad Miller, Stuttgart 1926—1930, and more completely in vol. iii. of the *Monumenta Cartographica Africae et Aegypti* by Youssouf Kemal, as far as this work has appeared; in this same work all the geographical references to the Nile are also to be found in a chronological order. (J. H. KRAMERS)

NİLÜFER KHATUN, wife of Urḳhan and mother of Murād I, apparently the Greek name Nenuphar (i. e. Lotus-flower) (cf. J. v. Hammer, *G.O.R.*, i. 59), was the daughter of the lord of Yārḥiṣār (Anatolia, near Brussa; cf. Ḥādjī Khalifa, *Diḥānummā*, p. 659) and according to one story was betrothed to the lord of Belokoma (Bilejik). 'Oṭmān, the founder of the dynasty which bears his name, is said to have kidnapped and carried her off in 699 (1299) and to have destined her to be the wife of his son Urḳhan, then only 12 years old. Idris Bitlisi, and following him Neshri, tells the story of the rape but the Byzantine sources make no reference to it. Nīlūfer Khātun became the mother of Murād I and also of Sulaimān Pasha. The river which flows through the plain of Brussa bears the same name as also does the bridge over it in front of the town and monastery there. The bridge and monastery are said to have been endowed by Nīlūfer Khātun. Nothing more is known of her life. She was buried beside Urḳhan on the citadel of Brussa. That Ibn Baṭṭūta, ii. 323 sq. really means Nīlūfer Khātun by Bayalūn, (بيلون) Khātun, which both F. Giese (cf. *Z.S.*, ii., 1924, p. 263) and F. Taeschner (cf. *Isl.*, xx. 135) think to be obvious, as they take بيلون to be a corruption of نيلوفر, is however by no means proved, because Bayalūn is a name which occurs again in Ibn Baṭṭūta for a Byzantine princess (cf. ii. 393 sq.). Besides, the mention in Ibn Baṭṭūta who paid his respects to the princess at her court in Iznīk (c. 740 = 1339) is very brief. F. Taeschner suggests that Nīlūfer is a corruption of Olivera, while hitherto Nīlūfer (cf. Pers. *nīlūfer* "water lily" and Greek *Λουλούφερον* and *νούφερα* with the same meaning) has been derived from the Greek. Nīlūfer was and is also popularly known as Lulufer (e. g. in the early Ottoman chronicles) or Ulufur the river Ülfer Çai; cf. F. Taeschner, *op. cit.* p. 135 sq.

Bibliography: J. v. Hammer, *G.O.R.*, i. 59 sq.; *Sidḳill-i 'oṭmānī*, i. 86 (according to Neshri); F. Taeschner, in *Isl.*, xx. 133—137. (FRANZ BABINGER)

Nİ'MAT ALLĀH B. AḤMAD B. ḲADĪ MUBĀRAK, known as Khalīl Ṣūfī, author of a Persian-Turkish Dictionary, entitled *Lughat-i Ni'mat Allāh*. Born in Sofiā, where as an enameller he made a reputation as an artist, he moved to Constantinople and there entered the Nakṣbandī order. Association with the Nakṣbandī dervishes made him more closely acquainted with literature and

especially with Persian poetry. Nīmat Allāh decided to make accessible to others the knowledge he had acquired by an ardent study of Persian literature and thus arose his lexicographical work which he probably compiled at the instigation and with the assistance of the famous Kemāl Pasha-zāde (d. 940 = 1533). He died in 969 (1561—1562) and was buried in the court of the monastery at the Adrianople gate in Stambul. His work which survives in a considerable number of manuscripts is divided into three parts: verbs, particles and inflection, nouns. His sources were: 1. *Uḡnūm-i 'Adjam* (s. Uri, p. 291, N^o. 108); 2. *Kāsimā-yi Lutf Allāh Ḥalīmī* (Hādjdjī Khalifa, iv. 503); 3. *Wasīlā-yi Maḥāsīd* (Flügel, Vienna Catalogue, i. 197); 4. *Lughāt-i Karā-Ḥisāri* (Rieu, p. 513^a); 5. *Shihāb-i 'Adjam* (Hādjdjī Khalifa, vi. 91 and Leyden Catalogue, i. 100). Besides making careful use of these sources Nīmat Allāh added much independent material, of which his dialect notes and ethnographical observations are especially valuable. This work is of considerable scientific importance and deserves greater attention than it has so far received.

Bibliography: O. Blau, *Über Nīmatullah's persisch-türkisches Wörterbuch*, in *Z. D. M. G.*, xxxi. (1877), S. 484; Rieu, *Catalogue*, p. 514^b; Hādjdjī Khalifa, vi. 362. — Partly used by Golius for the Persian part of Castell's *Lexicon Heptaglotton*. The best MSS. are Dorn, St. Petersburg Catalogue, N^o. 431 (p. 426) and Fleischer, Dresden Catalogue, N^o. 182. (E. BERTHELS)

NĪMAT ALLĀH B. ḤABĪB ALLĀH HARAWĪ, a Persian historian. His father was for 35 years in the service of the Great Mughal Akbar (1556—1605) where he was a *khālīṣa* inspector. Nīmat Allāh himself was for 11 years historian to Djahāngir (1605—1628), then entered the service of Khān-Djahān whom he accompanied in 1018 (1609—1610) on the campaign against the Dekkan. Soon afterwards he became acquainted with Miyan-Haibat-Khān b. Salīm-Khān Kākar of Sāmāna who persuaded him to write a history of the reign of Khān-Djahān. Nīmat Allāh began his work in Malkāpūr in Dhu 'l-Hijjā 1020 (Feb. 1612) and finished it on the 10th Dhu 'l-Hijjā 1021 (Feb. 2, 1613). The work is dedicated to Khān-Djahān, is entitled *Tārīkh-i Khāndjahāni* and consists of a *muḥaddima*, 7 *bāb* and a *khātima*. It deals with the history of the Afghāns, beginning with their legendary descent from the Banū Ismā'īl and treats with special fullness of the history of Bahlūl Lodī, Shīr Shāh Sūr and Nawwāb Khān-Djahān Lodī. The last chapters are devoted to the genealogy of the Afghān tribes and the reign of Djahāngir. The *khātima* contains biographies of famous Afghān *shāikhs*. There is also an abbreviated version of the work entitled *Makhsūz-i Afghāni*.

Dorn, *History of the Afghans: translated from the Persian of Neamat Ullah*, in *Orient. Transl. Fund*, London 1829—1836. (E. BERTHELS)

NĪMAT ALLĀH WALĪ, a Persian mystic. Amir Nūr al-Dīn Nīmat Allāh, son of Mir 'Abd Allāh, and a descendant of the fifth imām of the Shī'a, Bākīr, the founder of the Nīmat Allāhī order, is highly esteemed in Persia as a great saint and wonder-worker. He was born in Ḥalab in

730—731 (1329—1330/1), spent his early years in the 'Irāq and went to Mecca at the age of 24 where he became a pupil and *khālīṣa* of the famous Shāikh 'Abd Allāh Yāfī' [see Yāfī']. After his teacher's death, he went to Samarkand, then visited Herāt and Yazd and finally settled in Māhān, 8 farsakhs from Kirmān, where he spent the last 25 years of his life and died on 22nd Rādjāb 834 (April 5, 1431). His tomb is still a popular place of pilgrimage (*ziyaratgāh*). In his lifetime he was held in great honour by all rulers and received particular marks of esteem from Shāh-Rukh. His grandsons migrated to India and were appointed to high office in the Deccan by 'Alā' al-Dīn Aḥmad-Shāh Bahmanī (1435—1457). Nīmat Allāh was a very prolific theorist of Ṣūfism and is said to have written over 500 *risālas* on different questions of Ṣūfī doctrine. About a hundred of these have come down to us and can be identified. They are for the most part quite short treatises, generally explanations of difficult passages in the classics of Ṣūfism like Ibn al-'Arabī, Fakhr al-Dīn 'Irāqī etc. His large *Diwān* of lyrics is more valuable; it contains much true poetry and is marked by a fervent sincerity.

Bibliography: H. Ethé, in *G. I. Ph.*, ii. 299, 301; Rieu, *Catalogue*, p. 43^a, 634^b, 641^b, 774^b, 829^a, 831^b, 869^b; E. G. Browne, *History of Persian Literature under Tatar Dominion*, Cambridge 1920, p. 463 sq.; *Diwān*, lith. Tih-rān 1276. A biography by Ṣān' Allāh Nīmat-Allāhī, *Sawāniḥ al-A'iyām fi Mushāhadāt al-A'wām mawṣūm bi-Silsilat al-'Arifin* (Persian), lith. Bombay 1307 (1890). See also Ḥabīb al-Siyar, iii. 3, 143 (where 25th Rādjāb is given as the date of his death) and Dawlatshāh (ed. Browne, p. 333—340), who however with his usual carelessness gives 827 as the date of his death. (E. BERTHELS)

NĪMAT KHĀN 'ĀLĪ, MİRZĀ NŪR AL-DĪN MUḤAMMAD, son of Ḥakīm Fath al-Dīn Shīrāzī, a Persian author, was born in India and came of a family several of whom had been distinguished physicians in their ancestral home in Shīrāz. He entered the service of the state under Shāh-Djahān (1628—1659) and was appointed keeper of the crown jewels with the title of *dārūgha-yi djawāhir-khāna*. He attained his highest honours under Awrangzēb (1659—1707) who gave him the title of Nīmat Khān (1104 = 1692—1693), which was later changed to Muḥarrab Khān and then to Dānīshmand Khān. He died at Dehli on the 1st Rabi' II 1122 (May 30, 1710). Nīmat Allāh who wrote under the *takhalluṣ* of 'Ālī, was exceedingly prolific and wrote a number of works in prose and verse of which the following are the most important: 1. *Waḳā'f-i Haidarābād*: a description of the siege of Haidarābād by Awrangzēb in 1097 (1685—1686). This work is characterized by a biting wit and describes the siege in a satirical form which procured the little book the greatest popularity; 2. *Djāng-nāma*, a chronicle which covers the last years of Awrangzēb's reign and the war which broke out after his death among his sons; 3. *Bahādur-shāh-nāma*, a chronicle of the two first years of the reign of Shāh 'Ālam Bahādur-Shāh (1707—1712); 4. *Ḥusn u-'Ishk*, also called *Katkhudāyī* or *Munākaha-yi Ḥusn u-'Ishk*, an allegorical love story, an imitation of the celebrated *Ḥusn u-Dil* of Fattāhī [q. v.]; 5. *Rāhat al-Kulūb*, satirical sketches of a number of contemporaries; 6. *Risāla-yi Hadjw-i Ḥukamā'*,

anecdotes of physicians and their incompetence; 7. *Khān-i Nīmat*, a work on cookery; 8. *Ruḡa'āt*, letters to Mirzā Mubārak Allāh Irādāt *Khān Wāḡīh*, Mirzā Muḥammad Sa'īd, the head of the imperial kitchen and others, which were very highly thought of as models of a choice style of letter-writing; 9. a lyrical *Diwān*; 10. a short *Mathnawī* without a title, which deals with the usual Šūfī ethical themes. This survey shows a great versatility on the part of Nīmat *Khān* but it must be pointed out that, with the exception of the satirical works which are really original and of great value for the characterisation of his age, none of them rises above the level of degenerate imitations of classical models.

Bibliography: H. Ethé, in *G. I. Ph.*, ii. 334, 336—338; Rieu, *Catalogue*, p. 268^a, 702^b, 703^a, 738^b, 744^b, 745^a, 796^a, 807^a, 938^b, 1021^a, 1049^b; *Diwān*, lith. Lucknow 1881; *Husn u-'Ishk*, Lucknow 1842, 1873, 1878—1880, 1899, Delhi 1844 (almost all editions have a commentary); *Waḡā'ī-i Haidarābād* or *Waḡā'ī-i Nīmat Khān*, lith. Lucknow 1844, 1848, 1859, Cawnpore 1870, 1878; *Bahādur-shāh-nāma* in H. Elliot, *History of India*, vii. 568; *Djāng-nāma*, *ibid.*, vii. 202. NIMRŪD. [See NAMRŪD.]

NIMRŪD, a ruined site in the ancient Assyria, the northern portion of the modern 'Irāk, about twenty miles south of Mōsul, in 36° 5' North Lat. and 43° 20' East Long. (Greenwich) in the angle formed by the Tigris and its tributary, the Upper or Great Zāb, six miles above the mouth of the latter. The plateau of Nimrūd rises abruptly from the surrounding country, and the great advantages of this situation caused a settlement to be made here already in remote antiquity. Excavations on the site have established the fact that the ruins there were those of the town of Kalakh (Kalkhu). This is already mentioned as Kelakh (Calah) in the Old Testament in a passage which is not absolutely unambiguous (Gen. x. 11—12), which says it was built either by Nimrod or Ashshur; the latter appears to me more intelligible. In Greek writers we find only the name of the district *Καλαχηνή* or *Καλακηνή* (cf. Pauly-Wissowa, *Real-encykl. der klass. Altertumswiss.*, x. 1530). It was no doubt its favourable strategical position that decided the Assyrian King Salmanassar I (c. 1280—1261) to raise it to be his royal residence alongside of the previous capital Ashshur (now Ḳal'at Sherkāṭ; q. v.).

We learn nothing from the cuneiform inscriptions about the decline of Kalkhu. Kalkhu probably fell about the same time as Nineveh after a stubborn resistance to the onslaught of the Median-Babylonian army. When Xenophon in 401 B. C. passed by the town, which he describes clearly, it was already a ruin.

So far as I know Kalakh is not mentioned in Syriac literature and in the Arab writers of the middle ages only incidentally and under wrong names. In Yāḳūt (ed. Wüstenfeld, i. 119, 16; iii. 113) we are told that al-Salāmiya is in the vicinity of the ruins of the town of Athūr, which can

only mean the ruins of Kalakh (cf. also ii., p. 184). At the present day the site is known only as Nimrūd, which so far as I know first appears in Niebuhr, who stayed in Mōsul in 1766, see his *Reisebeschr. nach Arabien und anderen umliegenden Ländern*, ii. (Copenhagen 1778), p. 355, 368. When this, now the usual, name arose is unknown; I consider it to be of modern origin. It should be noted that names like Nimrod, Tell Nimrod, etc. are not found in the geographical nomenclature of Mesopotamia and the 'Irāk in the middle ages, while they are several times met with at the present day.

The first European to give a brief account of the "ruined castle" of Nimrūd and the remains there was Niebuhr, although not from his own inspection. In 1821 Cl. Rich visited the site and gives the first detailed account of the ruins; in his posthumous work are the first pictures of cuneiform tablets discovered there. A few years before Layard, William Ainsworth examined the site. In 1843 Fletcher visited it. Layard, the real investigator of Nimrūd, twice examined the mounds of ruins in 1840 but it was not till 1845 that he was able to begin excavations, which were conducted in two great expeditions (1845—1847 and 1849—1851). Layard's reports were supplemented in many details by the notes, to which too little attention has so far been paid, by Sandreczki (see *Bibl.*) who spent a considerable time in Mōsul and its neighbourhood in 1850. After Layard's departure home, H. Rassam continued his work in Nimrūd. In 1873 G. Smith resumed Layard's work but only for a month. Finally Rassam on behalf of the British Museum again continued the earlier excavations for a period of five years (1878—1882).

Our study of the topography of Nimrūd must still be based on the large map of the vicinity of Nineveh and the whole area between the Tigris and Upper Zāb made by F. Jones in 1852, which the Royal Asiatic Society published in three sheets under the title *Vestiges of Assyria* (sheets 2 and 3 deal with Nimrūd). The commentary on these maps is the article by Jones, in *J. R. A. S.*, vol. xv. (see *Bibl.*).

The fairly comprehensive complex of ruins at Nimrūd forms in the main a rectangular plateau, out of which a triangular mass juts in the south-east giving the whole the appearance of an irregular hexagon. The longest side, which runs east and west, measures 7,000 feet and the northeast side 5,000 feet (in the southeast including the salient triangle 6,600 feet). The circumference of the whole area is six miles. Layard's investigations revealed that this extensive area marking the site of the town of Kalkhu was surrounded by a wall with towers. In the north he found fifty-eight, in the east fifty of these towers; in the south this wall of earth has now almost entirely disappeared (cf. Layard, *Discoveries* etc., p. 656). The length of the wall was seven miles, that is to say it was longer than the boundary of the whole ruined area because two arms were necessary to include the suburbs in the southeast.

The royal quarter in the southwest corner with the palaces and chief temples occupied a relatively small part of the area described. It lay on a terrace and was shut off from the rest of the town by a wall. To it also belonged the high cone-shaped mound in the northwest which is the dominating

feature of the landscape at Nimrūd. Its diameter is 550 feet in breadth and 600 in length and it still stands 130 feet above the level of the Tigris but must as a storied temple tower (*siḫkuratu*), have been originally about 160 feet high. The royal city is oblong in shape and has a circumference of over 2,000 yards; its west side measures 2,000—2,050 feet and its north side about 1,200 feet.

In the northwest part of the royal city stood the temple of Ninurta (formerly read Ninib), the chief centre of worship of this deity in Assyria. It had a storied tower, the builder of which, according to an inscription, was Salmanassar III, Xenophon's *ῥαπακὶς λυδίων*, now represented by the conical mound (cf. Streck, *op. cit.*, p. clxiv., cc., note 2 sq.; Lehmann-Haupt, *Materialien* etc., p. 20 sq. and do., *Armenien*, II/i. 251 sq.). Farther south on the same side was the so-called northwest (better: west) palace of Assurnāširpal II which Sargon II replaced by a new building. The sculptures with which its founder adorned it came for the most part to the British Museum (cf. *Reallexicon der Assyriologie*, i. 218). In the centre of the royal city but more to the south, Salmanassar III built the so-called central palace which at a later date was completely restored by Tiglatpileser III. The famous black obelisk came from it. This palace is less well preserved as Assarhaddon partly destroyed it when he took out Tiglatpileser III's reliefs to transport them to the new palace which he built in the southwest of the royal city. This southwest palace however remains unfinished as after a fire the building was not resumed; cf. Meissner and Rost, in *Beitr. zur Assyriol.*, iii. 191 sq.; *Reallex. der Assyriol.*, i. 202 and see also E. Unger, *Die Reliefs Tiglatpileasers III aus Nimrud*, Constantinople 1917.

In the south-east part of the royal quarter Assuretililāni built a palace and at the same time restored a temple of Nabū there which Adad-nirāri III had built and called after the chief sanctuary of this deity, E-zida in Borsippa (= Birs; q. v.). Here Rassam discovered a series of statues of Nabū dating from the time of Adadnirāri III which because they were found in *situ* were of topographical importance (cf. Streck, *op. cit.*, i, p. cc—ccii and ii. 272).

The eastern and north-eastern sides of the royal city have so far only been cursorily examined; probably they also conceal royal buildings.

Outside of the city walls, in the already mentioned triangle at the south-east corner, there are smaller mounds. Layard (*Discoveries*, p. 656) thought that the largest of these tells was perhaps once a fort or castle; he gives it the name of Tell Aḥūr (*op. cit.*, p. 165) on the authority of the local Arabs. Now it is true that — as already mentioned — in the Arab middle ages, the mounds of ruins near al-Salāmiya, i. e. the modern Nimrūd, were erroneously thought to be ruins of the town of Aḥūr. Educated Mōṣulans still held this view in the time of Rich (cf. Rich, *op. cit.*, ii. 131). I think nevertheless that Layard's name Tell Aḥūr for the mound or four mounds in question is due to a misunderstanding. In *Vestiges of Assyria*, sheet ii., Jones gives the name *Tall Yazār* for it, J. Oppert (*op. cit.*, i. 309) Tūlū Yazār, Sachau (*op. cit.*, p. 106) writes Tell Āzar, which is probably the name of a tribe (Yazār, *J. A.*, 1879, xiii. 224, 226).

The Tigris now runs about one and a half miles from Nimrūd but in Assyrian times it flowed directly past the walls of the town as distinct traces still prove (cf. thereon Jones in *J. R. A. S.*, xv. 342—343 = *Selections* etc., p. 446 sq.; Lehmann-Haupt, *Materialien*, p. 27 and his *Armenia*, II/i., 250 sq.). In the centre, between the still distinct ancient bed of the Tigris and the modern one, is a third bed which the river filled in the middle ages; this latter now bears the name of *Širūt Albū Debbān* (see Jones, *Vestiges* and *J. R. A. S.*, xv. 343 = *Selections*, p. 447) = "The road of Albū Debbān", apparently after a Beduin tribe (the explanation given by Jones is hardly tenable).

A quarter of an hour west of the ruined site of Nimrūd (called frequently al-Kal'a = the citadel) is an older settlement, the fair-sized village of (old) Nimrūd also called Derāwīsh. Still farther west, near the Tigris is a village also called (New) Nimrūd of more recent origin and a mile N. W. of it directly on the river the village of Na'ife. Again a mile N. W. are the remains of a dam first described by J. Macdonald Kinneir from personal observations (see his *Journey through Asia Minor, Armenia and Koordistan*, London 1818, p. 465). The natives call it *Sakr* or *Sukr Nimrūd* (see Kinneir, *loc. cit.*; Layard, *Nineveh*, i. 8) = Nimrod's Dam. Jones gives (*J. R. A. S.*, xv. 343 = *Selections*, p. 447 and *Vestiges of Assyria*, sheet ii.): *Ṣakhr* Nimrūd (= Nimrūd's Cliff); I suspect that he picked up the name wrongly (*ṣakhr* for *sakr* "dam"). At the same time we also have the name *Sikr al-Awāze* (Rich, *op. cit.*, ii. 129) or simply al-Awāze, Āwāy (Layard, *op. cit.*, i. 8, 365; Jones, *loc. cit.*) = "dam of noise" or "(the) noise" (*awāze* or *awah* from Persian *āwazidān*; see Vullers, *Lex. Pers.*, i. 56) and this second name owes its origin to the great noise caused by the waters breaking over the rocks here. The people of the vicinity say that there was once a bridge here. Probably a barrier of rock in the river was already used in ancient times as the foundation for a dam for irrigation purposes.

Still farther northwards about three miles from the ruins of Nimrūd lies Selāmiye on the Tigris, now a small village but in the middle ages as Yāḳūt, iii. 113 (al-Salāmiya; cf. also i. 119, 16) tells us, one of the most beautiful places in the region of Mōṣul. The modern Selāmiye lies in the southeast corner of an area covered with old ruins.

This Selāmiye may with great probability be identified with the Biblical Resen, numbered among the four Assyrian towns founded by Aššur (or Nimrod; cf. above) according to Gen. x. 11—12, and there located as lying between Nineveh and Kalakh (Calah). The assertion constantly made in learned works because of the words describing them "the same is a great city" and in view of passages in Jonah (i. 2; 3, 3—4; 4, 11) that these formed a gigantic tetrapolis linked together hardly deserves serious refutation.

The greater part of the finds at the English excavations at Nimrūd are in the British Museum where they are exhibited in the Assyrian transept, the Nimrud Gallery and in the Nimrud Central Saloon (cf. the *B. M. Guide* etc. [see *Bibl.*], p. 41 sq.). Nimrūd provided the British Museum with even greater treasures in sculptures (not inscriptions) than Koyunjik-Nineveh. Various objects from Layard's collection were left in Bombay on the way home and are now, with some pieces brought

by Rawlinson, in the possession of the Bombay Branch of the Royal Asiatic Society; on them see Karkaria in the *Journal B. R. A. S.*, xviii. (Bombay 1891), p. 97—107. A large series of sculptures came to the Louvre; cf. E. Pottier, *Catalogue des Antiquités Assyriennes* (Louvre), Paris 1924, p. 23, 49—63. There are also miscellaneous antiquities from Nimrūd in the national collections in Stambul, Berlin, Zürich and Leningrad (Hermitage); on a few finds by Lehmann-Haupt, see his *Materialien*, p. 22 sq.

The English excavators left the site without filling in or even roughly levelling the ground they had cut up. In the spring of 1920 the 'Irāk government however had the half exposed sculptures lifted and put in the new Museum in Baghdad. During my stay in Nimrūd (May 1928), I saw the sculptures lying on the bank of the Tigris ready to be moved (2 statues of Nabū, a colossal bull, fragments of another, an unfinished lion in stone, two great slabs with inscriptions of Assurnāširpal etc.).

NIMRÜD [See SISTĀN.]
NIRİZ, a place in Ādharbāidjān on the road from Marāgha [q. v.] to Urmīya [q. v.] south of the Lake of Urmīya. The stages on this route are still obscure. At about 15 farsakhs south of Marāgha was the station of Barza where the road bifurcated; the main road continued southward to Dinawar while the northwest went from Barza to Tiflis (2 farsakhs), thence to Djābarwān (6 farsakhs), thence to Niriz (4 farsakhs), thence to Urmīya (14 farsakhs); cf. Ibn Khurdādhbih, p. 121 (repeated by Kudāma with some variations); Muḥaddasī, p. 383.

The distance from Urmīya indicates that Niriz was in the vicinity of Suldūz [q. v.] which would find confirmation in the etymology from *ni-rēz* "flowing". Suldūz lies in the low plain, through which the Gādir flows to the Lake of Urmīya. At the present day the name Niriz is unknown, but a Kurd tribe of the region of Sa'udj-bulak [q. v.] bears the name of Nirizhī.

After the Arab conquest a family of Tā'i Arabs settled in Niriz. The first of these semi-independent chiefs was Murr b. 'Alī Mawṣilī who built a town at Niriz and enlarged the market of Djābarwān (cf. Balādhuri and Ya'qūbī, ii. 446). One of his sons, 'Alī, was among the rebels of 212 (827) whom the governor of Ādharbāidjān Muḥammad b. Ḥamid Ṭūsī deported to Baghdād, but 'Alī succeeded, it seems, in returning to his lands) cf. Ibn Khurdādhbih, p. 119). Abū Rudainī 'Omar b. 'Alī, appointed in 260 (873) governor of Ādharbāidjān by the caliph, made war on his predecessor 'Alī b. Aḥmad Azdī and killed him (Ṭabarī, iii. 1886). He was supported by the Khāridjīs. Cf. the account in *Pādshāhān-i gumnām*, Teherān 1929, ii. 27, 34.

In the 5th century Iṣṭakhri, p. 186 and Ibn Ḥawqal, p. 240 mention the Banū Rudainī as a dynasty already forgotten which had reigned over Dākharkān (read Djābarwān), Tabriz (read Niriz) and Ushnub al-Ādhariya [cf. Ushnū].

(V. MINORSKY)

AL-NISĀ², the "Women", the title of Sūra iv. of the Qur'ān; so-called because in the opening verses the position of women is dealt with. Nöldeke (*Geschichte des Qur'āns*, i. 195) thinks that the greater part belongs to the period between the end of the year 3 and the year 5 A. H.

This sūra contains many verses that were abrogated: among the principal we may mention 8—9 abrogated by 12; 10 abrogated by ii. 178; 20 abrogated by xxiv. 2; 33 abrogated by xxiv. 60 etc. . . .

It is also one of the most important sūras of the Qur'ān because many of the precepts formulated in it form the foundations for the Muḥammadan laws of marriage.

The sūra lacks unity, consisting as it does of a collection of verses of different origin and on different subjects. The following is a brief analysis of its contents: the creation of man; consanguinity; the care of orphans; rules for succession; marriage; relations of husband and wife; impediments to marriage; almsgiving; evidence; accidental homicide; holy war and the art of war; obedience to Allāh and to the Prophets; punishment of the unbelieving Jews and Christians.

Bibliography: Cf. the art. AL-NAHL and add: Ṭanṭāwī Dījawhari, *Tafsīr*, Cairo, 25 vol.; Aḥmad Ridda, *Tafsīr al-Manār*, Cairo, 9 vols. so far appeared. (MAURICE CHEMOUL)

NIṢĀB. [See ZAKĀT.]

NIṢĀN, the seventh month in the Syrian calendar. Its name is taken from the first month of the Jewish religious (seventh of the civil) year with the period of which it roughly coincides. It corresponds to April of the Roman year and like it has 30 days. On the 10th and 23rd Niṣān, according to al-Bīrūnī, the two first stations of the moon rise (the numbering of these two as first and second shows that the numbering was established by scholars for whom Niṣān was the first month) and the 15th and 16th set. In 1300 of the Seleucid era (989 A. D.), according to al-Bīrūnī, the stars of the 28th and 1st stations of the moon rose and those of the 14th and 15th set while the rising and setting of the 2nd and 16th stations of the moon took place in Aiyār.

Bibliography: al-Bīrūnī, *Āthār*, ed. Sachau, p. 60, 70, 347—349; cf. also the references under TAMMŪZ. (M. PLESSNER)

NISH (Serbian *Niš*), the second largest town in Serbia, now the capital of the banate of Morava in the kingdom of Yugoslavia, situated 650 feet above sea-level in a fertile plain surrounded by hills, on both sides of the Nišava not far from its junction with the Morava and an important centre of communications by rail and road, on the international route to Sofia-Istanbul or Salonika-Athens. The larger part of the town with the railway station lies on the left bank, the fortress is on the right. The two parts of the town are connected by four iron bridges (including a railway bridge), cover an area of 11 sq. m. and had in 1931 35,384 inhabitants of whom only 3.7% are Muslims. According to the latest (Dec. 1933) statistics of the Imām-registrar, Nish has 1,982 Muslims in 365 households, chiefly gipsies, while Muslims speaking Serbo-Croatian, Turkish and Albanian form the remainder. These gipsies call themselves Muslims, bear Muslim names, marry with Muslim rites but nevertheless observe at home some of the Serbian Orthodox Church feasts, visit the churches etc. There are a number of offices of the civil and military authorities in the town, including a district *shari'a* court. This court has existed only since Oct. 29, 1929, i. e. since the abolition of the old office of district mufti whose authority till then extended over the whole of Serbia. The authority of the new court extends over a part of that of the older (19 districts) while the remainder are under the *kaḍī* of Belgrade. The Muslims of Nish have also a district waḳf me'arif council (cf. i., p. 760), a common council (*džematski medžlis*) and a registration office (*imāmat*). There are said to have been 19 mosques in Nish in the last Turkish period (1878), only one of which now survives. The second last mosque of which the great minaret is still

standing, was destroyed as a result of the great floods of 1896. Nish has also Serbian Orthodox churches and a Roman Catholic church and a synagogue. Besides several colleges, it has a Hygienic Institute, two hospitals and a society for popular education. The town is making steady progress. Its whole history shows that Nish has always been an important strategic and commercial centre.

In antiquity Nish (Naissus, Niz, Nissa etc.) belonged at first to the Roman province Moesia Superior and later became the capital of Dardania.

Nish's greatest claim to fame is that it was the birthplace of Constantine the Great (306—337) and attained great prosperity in ancient times. The Romans had state munition works here.

In the time of the migrations of the Huns, Nish was taken after a vigorous resistance by Attila (434—453) and destroyed but rebuilt and refortified very soon afterwards by Justinian I (527—565). By the middle of the sixth century the first forces of the Slavs who had entered the Balkan peninsula in their endeavour to found states at the expense of the Byzantine empire appeared before Nish. Nish was thus in the ninth century usually in the hands of the Bulgars and until 1018 it belonged to a Slav state founded in Macedonia in 976 by the emperor Samuel. The Byzantines held it from 1018 to the end of the 11th century, when we find it described as large and prosperous; Idrīsī who calls it "Nisu" (also on his map of 1154, ed. K. Miller) lays special emphasis on the quantity and cheapness of food and the importance of its trade. But even then it did not enjoy peace. In 1072 the Hungarians reached the town on a marauding campaign; in 1096 its inhabitants had to defend themselves in a strenuous battle "at the Bridge" against the Crusaders in which the latter suffered very heavily, and in 1182 the town was taken by Bela III supported by Nemanja, the Serbian prince. A little later Nemanja took Nish and the whole country as far as Serdica (Sofia). The town suffered considerably in these troubled times. The Third Crusade (1189) found it almost empty and practically destroyed. In spite of this, Nemanja was able to receive the emperor Barbarossa in Nish with great ceremony. From this time on to the Turkish conquest Nish was generally in Serbian hands.

In the earlier Turkish chronicles (e.g. Shükru'llāh, Urudj b. 'Ādil, 'Āshīkpashazāde, Neshrī [Nöldeke], Anonymous Giese) there is no mention of the taking of Nish: Sa'd al-Din (i. 92—93), Ḥājjdī Khalīfa and Ewliyā Ćelebi, then von Hammer (*G.O.R.*, i. 157) and Lane-Poole (Turkey⁵, p. 40) on the other hand, assume that it took place in the reign of Murād I in 777 (1375—1376). The Serbian chronicles however definitely give 1386 and this year, which Gibbons has recently strongly urged as the correct date (*The Foundations of the Ottoman Empire*, Oxford 1916, p. 161—162), is now generally accepted.

During the Turkish period (1386—1878) Nish had chequered fortunes. In 1443 it was taken by the Christian army under king Vladislav III and John Hunyadi and destroyed. After the fall of Smederevo in 1459 the Serbian despotate became a Turkish province and Nish was even more securely in Turkish hands. For several days after June 20, 1521 a great fire raged in Nish which would have destroyed it completely if the Beglerbeg Aḥmad Pasha, who was leading an army against Hungary

at the time, had not come at the last moment to its assistance [F. Tauer, *Histoire de la campagne du Sultan Suleyman Ier contre Belgrade en 1521*, Prague 1924, p. 26 (Persian text), p. 31 (transl.)].

Western travellers who visited Nish in this period (Dernschwam, Contarini etc.) were not particularly attracted by it.

Turkish writers give us an idea of the appearance of Nish in the xviiith century. Hādjī Khālifa (c. 1648) describes it i. a. as a great town and kādīlīk in the sandjak of Sofia. The description which Ewliya Čelebi (c. 1660) gives is much fuller: it is a fortified town in the plain with 2,060 houses, 200 shops, three mosques (1. Ghāzī Khudāwendīgār; 2. Muşlī Efendi; 3. Husain Kethkhudā), 22 schools for children, several masjīds, darwish monasteries, fountains, baths, many vineyards and gardens etc.

On Sept. 23, 1689 Nish was taken by the Austrians under Ludwig of Baden but abandoned the very next year to the Turks (1690). In 1737 Nish was again taken by the Austrians under Seckendorf but left to the Turks again after two months occupation. It is to this period that the city owes its fortifications.

When in 1804 the Serbians under Karađorđe (đ = dj) rebelled against the Turks they soon won a number of successes and in 1809 were able to build redoubts against Nish, in which Stevan Sindelić, one of Karađorđe's vojvods, on May 31 blew up himself and the attacking Turks. Nish was nevertheless not relieved and the Turks built the so-called Čele-Kula ("tower of skulls") with the heads of the Serbians killed there, of which A. de Lamartine gave a moving description on his way home in 1833 (cf. *Voyage en Orient*, Paris 1859, p. 255—256). It was not till Jan. 11, 1878 that Nish, hitherto the capital of a Turkish *livā*, finally passed from the Turks. This induced many Muslims to migrate to Turkey.

Lying on the military road between Constantinople and Vienna and therefore exposed to every campaign Nish was by no means favourably situated to become a centre for the development of even a modest intellectual life. It appears, at least according to Gibb, that Nish has produced no Turkish poets or authors, except perhaps Sunbulzāde Wehbi (end of the xviiith century) who celebrated in song his meeting with the young Sara in the Turkish camp at Nish (*H.O.P.*, iv. 259). In Nish however, two Turks worked for a time who later were to become celebrated: 1. Aḥmad Luṭfī (1815—1907), afterwards imperial historiographer served in Vidin and Nish from April 1845 (*G.O.W.*, p. 384); 2. the famous statesman and author of the Turkish constitution of 1876, Midḥat Pasha [q. v.], was appointed governor of Nish and Prizren in 1861. In this capacity he saw to the building of a Serbian school (1864) in Nish.

Nish played an important part in the World War: first as the seat of the Serbian government and the Skupština (till Oct. 26, 1915) and then as the scene of a battle between the Germans who were strongly concentrated here and the Serbs in pursuit of them which ended in the capture of the town by the latter (Oct. 12, 1918).

NISHĀNDJĪ, secretary of state for the Sultān's tughra, chancellor.

The Saldjūks and Mamlūks already had special officials for drawing the tughra, the sultān's signature. As their official organisation was inherited in almost all its details by the Ottomans this post naturally was included. Its holder was called *nishāndjī* or *tewkī*. The *nishāndjī* held the same rank as the *defterdārs* [q. v.] and indeed even preceded them, for we find *defterdārs* promoted to *nishāndjis* but never a *nishāndjī* becoming a *defterdār*. The *nishāndjī* was included among the "pillars of the empire" (*erkān-i dewlet*). The part which he played varied in course of time. Besides being secretary of state for the imperial tughra (*nishān*) he had originally considerable legislative powers and he was called *muftī-i kānūn* (to distinguish him from the *muftī* proper, i. e. the *Shaiḫ al-Islām*). In his office the texts of the laws were prepared under his supervision. Most of the Ottoman codes of law (*kānūn*) as they have come down to us go back to *nishāndjis*. As they had besides the right to approve the contents of documents put before them for the imperial tughra, they had no slight influence on the business of administration. Of their official career we know that according to the *Kānūn-nāma* of Meḥammed II they had to be chosen from teachers acquainted with law (*müderris*), apparently because they had to display legislative ability, or from the *defterdārs* and *ru'asā' ul-küttāb*. As their authority diminished more and more in course of time, so did their influence, and finally they were limited to preparing the tughra. According to Mouradjea d'Ohsson (*Tableau de l'Empire Ottoman*, iii. 373), the *nishāndjis* received from the state a salary of 6,620 piastres. On their official dress, see v. Hammer, *G.O.R.*, viii. 431, according to whom they wore red in contrast to the other *khodjagiān* who wore violet.

(FRANZ BABINGER)

NISHĀNDJĪ. [See *DJĀLĀLZĀDE MUṢṬAFĀ ĀLEBĪ*; *KARAMĀNĪ MEHMED PAṢHĀ.*]

NISHĀPŪR, the most important of the four great cities of *Khurāsān* (*Nishāpūr*, *Marw*, *Herāt* and *Balkh*), one of the great towns of *Irān* in the middle ages.

The name goes back to the Persian *Nēw-Shāhpūhr* ('Fair *Shāpūr*'); in Armenian it is called *Niushapuh*, Arab. *Naisābūr* or *Nisābūr*, new Pers. *Nēshāpūr*, pronounced in the time of *Yāqūt*: *Nishāwūr*, now *Nishāpūr* (*Nöldeke*, *Ṭabarī*, p. 59, note 3; *G. Hoffmann*, *Auszüge* . . ., p. 61, note 530). The town occasionally bore the official title of honour, *Irānshahr*.

Nishāpūr was founded by *Shāhpūhr* I, son of *Ardashīr* I (*Hamza al-Isfahānī*, ed. *Gottwaldt*, p. 48), who had slain in this region the Turanian *Pahlīāk* (*Pālēzak*) (*Städteliste von Ērān*, § 13); some authors say it was not founded till the time of *Shāhpūhr* II (*Ṭabarī*, i. 840; al-*Tha'alibī*, ed. *Zotenberg*, p. 529).

In the wider sense the region of *Nishāpūr* comprised the districts of al-*Ṭabasain*, *Kūhistān*, *Nisā*, *Beward*, *Abarshahr*, *Djām*, *Bākhars*, *Tös*, *Zōzan* and *Ispārān* (*Yāqūbī*, ed. de *Goeje*, p. 278; cf. *Ṭabarī*, i. 2884); in the narrower sense *Nishāpūr* was the capital of the province of *Abarshahr* (Armen. *Apar ashkharkh*, the "district of the *Araxpov*"; *Marquart*, *Ērānshahr*, p. 74; do., *Catalogue of the Prov. Capitals of Ērānshahr*, p. 52), which was in turn divided into 13 *Rustāks* and 4 *Tassūdī* (names in *Iṣṭakhri*, p. 258; *Ibn Ḥawkal*, p. 313; *Ibn Khurdādhbih*, p. 24; *Yāqūbī*, p. 278; *Ibn Rusta*, p. 171). The latter were: in the west *Rēwand* (now *Riwand*), in the south al-*Shāmāt*, Pers. *Tak-Āb*, in the east *Pushfrōshan* (now *Pusht Farūsh*) and in the north *Māzūl* (now *Māsul*); cf. al-*Maqdisī*, p. 314—321.

In the *Rēwand* hills to the northwest of the town was one of the three most sacred fire-temples of the *Sāsānians*, that of the fire *Burzīn-Mihr* (*G. Hoffman*, *op. cit.*, p. 290). *Yazdādjiird* II (438—57) made *Nishāpūr* his usual residence.

In the year 30 (651) or 31 (652) the governor of *Baṣra*, 'Abd Allāh b. 'Amīr [q.v.], took *Nishāpūr* (*Ṭabarī*, i. 3305; *Balādhuri*, p. 404) whose governor *Kanārang* (*Xavapárvus*; *Marquart*, *Ērānshahr*, p. 75) capitulated. The town was then insignificant and had no garrison. During the fighting between 'Alī and Mu'āwīya (36—37 = 656—657) the Arabs were again driven out of *Nishāpūr* by a rising in *Khurāsān* and *Tukhāristān* (*Ṭabarī*, i. 3249, 3350; *Balādhuri*, p. 408; *Dinawari*, p. 163). *Perōz* III, the son of *Yazdādjiird* and of the daughter of *Kanārang* of *Nishāpūr*, is said to have lived for a period in *Nishāpūr*. *Khulaid* b. *Ka's* was sent in 37 by 'Alī against the rebellious town (*Dinawari*, *op. cit.*). Mu'āwīya reappointed 'Abd Allāh b. 'Amīr governor of *Baṣra* in 41 (661—662) and commissioned him to conquer *Khurāsān* and *Sidjīstān*. The latter in 42 (662—663) installed *Kais* b. al-*Haitham* al-*Sulamī* in *Nishāpūr* as governor of *Khurāsān*. *Ziyād* b. *Abī Sufyān* in 45 (665—666) made *Khulaid* b. 'Abd Allāh al-*Hanafi* governor of *Abarshahr* (*Nishāpūr*). 'Abd Allāh b. *Khāzim* rebelled in 683 against the *Umayyads*. He fell in 692 at *Marw* fighting against 'Abd al-*Malik*, whereupon *Umayyad* rule was restored in *Khurāsān*.

The prosperity of the city dates from the time when *Abu 'l-'Abbās* 'Abd Allāh b. *Tāhir* made it his capital in the third (ninth) century.

The founder of the *Šaffārid* dynasty, *Yāqūb* b. al-*Laith* b. Mu'addal, entered *Nishāpūr* on the 2nd *Šawwāl* 259 (Aug. 1, 873) and took *Muhammad* b. *Tāhir* prisoner (*Ṭabarī*, iii. 1881; *Gardīzi* in *Barthold*, *Turkestan down to the Mongol Invasion*, p. 217, note 6) but the latter soon regained his liberty and land. Only after *Yāqūb's* death was his brother 'Amr b. al-*Laith* granted the fiefs of *Khurāsān* and other districts. *Rāfi* b. *Harthama* in 882 took *Nishāpūr* from him (*Ṭabarī*, iii. 2039) and *Muhammad* b. *Tāhir* became viceroy of *Khurāsān* in 885 again; but in 279 (892) 'Amr was finally confirmed in office as governor and erected many buildings there. He finally fell in battle (899—901) with *Ismā'il* b. *Aḥmad*. The town thus passed to the *Sāmānids*, under whom it attained its greatest prosperity. It was the residence of the governor and commander-in-chief of the province of *Khurāsān* (*sipāh-sālār*).

The Arabic geographers describe *Nishāpūr* at this time as a thickly populated town divided into 42 wards, 1 *farsakh* in length and breadth (al-*Iṣṭakhri*, *B. G. A.*, i. 254) and consisting of the citadel, the city proper and an outer suburb in which was the chief mosque built by the *Šaffārid* 'Amr. Beside it was the public market called al-*Mu'askar*, the governor's palace, a second open place called *Maidān* al-*Husainiyyin* and the prison. The citadel had two gates and the city four: the Gate of the Bridge, the Gate on the road from *Ma'kil*, the Gate of the Fortress (*Bāb al-Kuhandiz*) and the Gate of the *Takin* Bridge. The suburbs also had walls with many gates. The best known market places were al-*Murabba'at* al-*Kabira* (near the Friday Mosque) and al-*Murabba'at* al-*Saghira*. The most important business streets were about fifty in number and ran across the city in straight lines intersecting at right angles; all kinds of wares were on sale in them (on the products and exports of *Nishāpūr* see *G. Le Strange*, *The Lands of the Eastern Caliphate*, p. 429 sq.). Numerous canals were led from the *Wādī Saghāwar*, which flowed down from the village of *Bushtankār* and drove 70 mills, from whence it passed near the city and provided the houses with an ample water supply. Gardens below the city were also watered in this way. The district of *Nishāpūr* was regarded as the most fertile in *Khurāsān*.

The town suffered many vicissitudes after this period. A great famine broke out there in 401 (1011). At the beginning of the xith century *Nishāpūr* was the centre of the pietist *Karrāmīs* led by the anchorite *Abū Bakr Muhammad* b. *Ishāk*. The *Saldjūk* *Tuğhrul-Beg* occupied the town in 1037 and made it his capital. *Alp Arslān* also seems to have lived there (cf. *Barhebraeus*, *Chron. Syr.*, ed. *Bedjan*, p. 243). In May 1142 the *Khwarizmshāh* *Atsiz* took the town for a time from the *Saldjūk* sultān *Sandjar*. When it was sacked by the *Ghuzz* in 548 (1153), the inhabitants fled, mainly to the suburb of *Shādyākh* (al-*Shādhayākh*) which was enlarged and fortified by the governor al-*Mu'aiyyid*. *Tuğhān-Shāh* *Abū Bakr* ruled the city 1174—1185 and his son *Sandjar Shāh* 1185—1187.

In May or June 1187 the *Khwarizmshāh* *Takish* took *Nishāpūr* and gave it to his eldest son *Malik-Shāh*. At the end of 1193 the latter received *Marw* and his brother *Qutb al-Dīn Muhammad* became governor of *Nishāpūr*. *Malik Shāh* died in 1197 in the neighbourhood of *Nishāpūr*. 'Alā' al-*Dīn* *Muhammad* (as *Qutb al-Dīn* called himself after

his father's death) took Marw and Nishāpūr in 1202 from Ghiyāth al-Dīn and his brother Shihāb al-Dīn.

In addition to the wars and rebellions (e.g. 1207—1208) which afflicted the town, it suffered from repeated earthquakes (540 = 1145, 605 = 1208, 679 = 1280). Yākūt who visited it in 613 (1216) but stayed in Shadyākḥ, still could see the damage done by the first earthquake and by the Ghuzz but nevertheless thought the town the finest in Khurāsān. The second earthquake was particularly severe; the inhabitants on this occasion fled for several days into the plain below the city.

In 618 (1221) the Mongols under Činghiz-Khān sacked the city completely. In the time of Ḥamd Allāh Mustawfī (c. 1340) and of Ibn Baṭṭūṭa (c. 1350) it had to some extent recovered. After each earthquake the inhabitants had rebuilt the town on a new site but it never regained its former importance.

According to the Georgian chronicle (transl. by Brosset, *Hist. de la Géorgie*, i. 472), the Georgian queen Tamar is said to have taken the city of Romguar between 1210 and 1212; Brosset identified this with the Maḥalla Ramdjār mentioned by Yākūt in the district of Nishāpūr (more probably a suburb of it). Here the patriarchs of Antioch, whose jurisdiction according to the Χρονολογικὸν σύντομον compiled in 854 (ed. Schöne in his edition of Eusebius I, app., p. 82 sq.) already at this time extended to Khurāsān (μέχρι τῆς ἑσπερίας ἐρήμου τοῦ Χωρσῶν), created about 1053 the catholicate of Πρωτοσύεως or Πρωτοσύεως ἡ τοῦ Περίου which, in name at least, still existed in 1365 (*Brief des antiochenischen Patriarchen Petros III. an Domenico von Grado und Aquileia*, ed. by Cornelius Will, *Acta et scripta quae de controversiis ecclesiae Graec. et Lat. saeculo XI composita extant*, Leipzig and Marburg 1861, p. 212, 32; *Notitia Antiochena*, ed. Gelzer, in *B.Z.*, i. 247, 2; Neilos Dopsch, ed. Parthey in Hieroclis *Synecdemus et Notitiae graecae episcopatum*, Berlin 1866, p. 271, 5; *Acta patriarchatus Constantinopolitani*, i. 207, 464—465; Pref., p. x.).

The modern Nishāpūr is in 36° 12' N. Lat. and 58° 40' East Long. (Greenwich) on the east side of a plain surrounded by hills. To the north and east of the town lies the ridge of Binālūd-Kūh, which separates it from the valley of Meshhed and Tūs. At its foot spring a number of streams, among them the Shūrah Rūd and the river of Dizbād (Ḥamd Allāh al-Mustawfī) which irrigate the lands of Nishāpūr and disappear in the salt desert to the west. North of the town in the mountains was the little lake of Čashmah Sabz out of which, according to al-Mustawfī, run two streams, one to the east and the other to the west. Northwest of Nishāpūr were the famous turquoise mines (*Ma'dīn*: the district is still called Bār-i Ma'den). In the S. E. of the town is shown the tomb of her celebrated sons 'Omar Khaiyām and Farid al-Dīn 'Aṭṭār.

A history of the 'ulamā' of Nishāpūr was completed in 8 volumes by Ḥakīm Abū 'Abd Allāh al-Baiyī' al-Nisābūrī (d. 405 = 1041; it was added by Yākūt and Ḥādjdjī Khalifa (ed. Flügel, ii. 155 sq.) and continued by 'Abd al-Ghāfir b. Ismā'il al-Fārisi down to the year 518. Al-Dhahabī produced an abbreviated version of al-Baiyī's work.

NISIB (نِزِيب and نِزِيب, in the modern Turkish orthography Nizip), an administrative district in the Turkish wilāyet of Ghāzī 'Aintāb (now officially Gazi Antep) which borders on Syria in the south. The little town lies not far from the right bank of the Euphrates, N. E. of Ḥalab (Aleppo). Nisib formerly belonged to northern Syria, to the sandjak of Urfa in the wilāyet of Ḥalab. According to the census of 1927, the whole district had 48,717 inhabitants of whom only 3,000—4,000 were in the town. Nisib is noted for its extensive olive groves and sesame fields, which extend to Kilis (in the same wilāyet but nearly on the Syrian frontier); in this zone the annual production of oil is estimated at 5 million kilos.

Ewliyā Čelebi visited Nisib in the xviith century and describes it as "an inhabited town in the middle of an unfertile district on the edge of a high hill, with inns, mosques, baths and a small market but without vineyards or gardens". Nisib at this period was the residence of a judge on the salary scale of 150 akçe.

During the war (1831—1840) between the Turks and Egypt under Mehmed 'Alī, Nisib became the scene of a celebrated battle. Ibrāhīm Pasha,

an adopted stepson and general of Meḥmed 'Alī, had crossed the Syrian frontier by the end of 1831 and after several victories advanced as far as Konya, where he inflicted such a defeat on the Turks at the end of 1832 that they had to cede by the peace of Kutāhia (1833) the whole of Syria to Meḥmed 'Alī and the government of Adana to Ibrāhīm himself, both recognising the sovereignty of the sultān. But neither the sultān nor Meḥmed 'Alī were satisfied with this and both made preparations for another war. For this purpose Maḥmūd II combined the four wilāyets of Diyārbakr, Kharpūt, Reḡka and Siwās under one governor with the title of vizier, Čerkes Hāfız Meḥmed Paṣha (on his career cf. *Sidjillī-i 'oṭhmānī*, ii. 99—100), and commanded him to cross the Euphrates at the beginning of 1839. It was not till some time later however that fighting actually began. Moltke and the military experts in Meḥmed's army then advised him not to cross the river but only to display his strength and frighten the Egyptian army into retreating; but Meḥmed Paṣha would not take this advice, crossed the Euphrates and fought a battle at Nisib, where he was completely defeated by Ibrāhīm Paṣha on June 24, 1839 (cf. also *infra*, iv., 299a).

Besides this great defeat on land, the Turks a few days later suffered an equally severe loss at sea. The traitorous Kapudān-i Deryā Aḥmad Fewzī Paṣha known as Firārī (i. e. "fugitive", "deserter"; details in *Sidjillī-i 'oṭhmānī*, i. 294—295) led the Turkish fleet, which was sent to Syrian waters at the time of the battle of Nisib, to Alexandria and handed it over to Meḥmed 'Alī. The Egyptians however were unable to take advantage of the victory at Nisib because the Great Powers intervened and Meḥmed 'Alī's aspirations were in 1841 limited to the hereditary governorship of Egypt. The defeat at Nisib led in the domestic politics of Turkey to the speedy proclamation of the *tanẓīmāt* [q. v.].

(FEHIM BAJRAKTAREVIĆ)

NISIBIS. [See NAŞIB.]

NĪYA (A.), intention. The acts of ceremonial law, obligatory or not, require to be preceded by a declaration by the performer, that he intends to perform such an act. This declaration, pronounced audibly or mentally, is called nīya. Without it, the act would be *bātil* [q. v.].

The nīya is required before the performance of the 'ibādāt, such as washing, bathing, prayer, alms, fasting, retreat, pilgrimage, sacrifice. "Ceremonial acts without nīya are not valid", says Ghazālī (*Iḥyā'*, Cairo 1282, iv. 316). Yet a survey of the opinions of the lawyers regarding the nīya in connection with each of the 'ibādāt would show, that there is only unanimity about the nīya as required before the *ṣalāt*.

Further the nīya must immediately precede the act, lest it should lose its character and become simple decision ('*azm*). It must accompany the act until the end (Abū Ishāḳ al-Shirāzī, *Tanbih*, ed. Juynboll, p. 3). Its seat is the heart, the central organ of intellect and attention. Lunatics, therefore, cannot pronounce a valid nīya.

So the nīya has become a legal act of its own. It is usually called obligatory, but in some cases, e. g. the washing of the dead, commendable. It can even be asked what the intention of the nīya is. According to al-Bādjūrī (i. 57), four conditions must be fulfilled in a nīya: who pronounces it, must be Muslim, *compos mentis*, well acquainted with the act he wants to perform, and having the purpose to perform this act. In some instances *aḏma'a* is used, where the later language has *nawā* (e. g. Nasā'ī, *Ṣiyām*, bāb 68; Tirmidhī, *Ṣawm*, bāb 33).

The term does not occur in the Qur'ān. It is found in canonical *ḥadīth*, but the passages show that it has not yet acquired in this literature the technical meaning and limitation described above. The development of this technical use appears to have taken place gradually, probably aided by Jewish influence. In Jewish law the *karwānā* has a function wholly analogous to the nīya. Al-Shāfi'ī († 204 = 820) appears to be acquainted with the nīya in its technical sense (*Kitāb al-Umm*). In canonical *ḥadīth* — i. e. the literature which, generally speaking, reflects the state of things up to the middle of the eighth century A. D. — neither the verb *nawā* nor the noun nīya appear to have any special technical connection with the 'ibādāt. On the contrary, nīya has here the common meaning of intention.

In this sense it is of great importance. Bukhārī opens his collection with a tradition, which in this place is apparently meant as a motto. It runs: "Works are in their intention only" (*innama 'l-a'māl bi 'l-nīya* or *bi 'l-nīyāt*). This tradition occurs frequently in the canonical collections. It constitutes a religious and moral criterion superior to that of the law. The value of an 'ibāda, even if performed in complete accordance with the precepts of the law, depends upon the intention of the performer, and if this intention should be sinful, the work would be valueless. "For", adds the tradition just mentioned, "every man receives only what he has intended"; or "his wages shall be in accordance with his intention" (Mālik, *Djanā'iz*, trad. 36). In answer to the question how long the *hiḏra* is open, tradition says: "There is no *hiḏra* after the capture of Mekka, only holy war and intention" (Bukhārī, *Manāḳib al-Anṣār*, bāb 45; *Djihad*, bāb 1, 27; Muslim, *Imāra*, trad. 85, 86 etc.). This higher criterion, once admitted, may suspend the law in several cases (cf. Snouck Hurgronje, *Islam und Phonograph*, in *T.B.G.K.W.*, xlii. 393 sqq. = *Verspr. Geschriften*, ii. 419 sqq.). So the intention, in this sense, becomes a work of its own, just as the intention in its juridical application. Good intention is taken into account by Allāh, even if not carried out; it heightens the value of the work. On the other hand, refraining from an evil intention is reckoned as a good work (Bukhārī, *Riḳāḳ*, bāb 31). In this connection the (post-canonical) tradition can be understood, according to which the intention of the faithful is better than his work (*Lisān al-ʿArab*, xx. 223; cf. Ghazālī, *Iḥyā'*, iv. 330 sqq. where this tradition

is discussed). In similar instances nīya comes near to the meaning of *ikhlaṣ* [q. v.].

(A. J. WENSINCK)

NĪYĀZĪ, an Ottoman poet and mystic. Shams al-Din Meḥemmed known as Mişri Efendi, **Shaiḫ** Mişri, whose *makhlaṣ* was Niyāzī, came from Aspūzi, the former summer capital of Malatia (cf. Ewliyā Čelebi, iv. 15; v. Moltke, *Reisebriefe*, p. 349), where his father was a Nakṣhabandī dervish. Niyāzī was born in 1027 (1617—1618). The statement occasionally found that Soghanlı was his birthplace is not correct. His father instructed him in the teaching of the order, then he went in 1048 (1638) to Diyārbakr, later to Mārdin where he studied for three years and finally to Cairo. There he joined the Kādirī order, travelled for seven years and finally settled down in the Anatolian village of Elmālī, once notorious as a centre of heresy, to devote himself to study under the famous Khalwetī Shaiḫ Umm-i Sinān (d. 1069 = 1658). He stayed with him for twelve years until he was sent by the Shaiḫ as his deputy to ʿUshshāk near Smyrna. After the death of his master he moved to Brussa where a pious citizen, Abdāl-Čelebi, built a hermitage for him. The fame of his sanctity and his gifts of prophecy spread more and more and finally reached the ears of the grandvizier Köprülü-zāde Aḥmad Paṣha, who invited him to Adrianople, entertained him with great honour for 40 days and finally sent him back to Brussa. When in 1083 (1672) the army set out for Kameniec in Podolia [q. v.], he was summoned to Adrianople where he had great audiences as a preacher. As he had allowed himself to drop obscure allusions (*kelimāt-i dīfīriye*) he gave umbrage and was banished to Lemnos. There he spent some years in exile until he received permission to return to Brussa. The fact that during his stay on the island it was spared Venetian attacks was interpreted as a miracle wrought by this holy man. But when he stirred up the people by "kabbalistic" preaching he was again banished to Lemnos in Şafar 1088 (May 1677). All kinds of prophecies which were fulfilled as well as the story that his coming had been foretold by Ibn al-ʿArabī [q. v.]s trengthened his reputation as a holy man and miracle-worker. He spent ten years on Lemnos until in 1101 (1689) the vizier Köprülü-zāde Muṣṭafā Paṣha allowed him to return to Brussa. In the next year he was summoned to Adrianople; he again excited the people by political utterances and mystical allusions so that the Kāʾimmaḳām ʿOṯmān Paṣha had him taken with all respect by a guard of Janissaries and Čawşes out of the mosque and sent directly via Gallipoli to Brussa. From there he was again banished to Lemnos but died on the 20th Radjāb 1105 (March 17, 1694). The date 1111 (1699) given by v. Hammer, *G. O. D.*, iii. 588 must therefore be wrong.

Unfortunately the contemporary notices give no information about the nature of the sermons by Niyāzī which gave offence from the political as well as religious point of view. The historian Demetrius Kantemir said Niyāzī was secretly a Christian. His *Diwān*, in Arabic and Turkish, does not justify this suggestion although the poem declared by v. Hammer (*G. O. D.*, iii. 589) to be apocryphal, given in translation by Kantemir, is really taken from his *Diwān*, as Gibb, *H. O. P.*, iii. 315 has proved. No study has yet been made of the *Diwān* or of Niyāzī's position in the religious life of Turkey generally.

The order founded by Niyāzī once possessed several monasteries on Greek soil, in Modoni, Negroponte (Eghriboz), Saloniki, Mytilene, also in Adrianople, Brussa and Smyrna. Cf. thereon the study by V. A. Gordlevsky, *Tarikat Mysri Niyazi*, in *Doklady Akademii Nauk S. S. S. R.*, 1929, p. 153—160.

The main source for the history of Niyāzī's life and work is the rare Turkish treatise of Morall-zāde Luṭfi (= Muṣṭafā Luṭfulāh), *Tuḥfat al-ʿaṣrī fi Manāḳib al-Miṣrī*, published at Brussa in 1308 (1890—1891).

Niyāzī's poems were repeatedly published 1254 and 1259 in Büllāk, also 1260 and 1291 in Stambul; cf. thereon J. v. Hammer, in *Wiener Jahrbücher*, lxxxv., p. 36 and *J. A.*, ser. 4, vol. viii., p. 261. On his numerous other works, only available in MSS., cf. Brūsālī Meḥemmed Ṭāhir, *ʿOṯmānī Muʿellifleri*, i. 173 sq. with references to where they are preserved.

Bibliography: In addition to the works mentioned by J. von Hammer, *G. O. D.*, iii. 587 sqq. and Gibb, *H. O. P.*, iii. 312 sqq. and Brūsālī Meḥemmed Ṭāhir, *ʿOṯmānī Muʿellifleri*, i. 172 sqq. cf. also the biographies of Ottoman poets by Shaiḫi, Salīm, ʿUshshākī-zāde etc.; Rāshid, *Tārīkh*, i. 89, 193; J. B. Brown, *The Darvishes*², London 1927, p. 203—205. — On Niyāzī's religious attitude cf. D. Kantemir, *Geschichte des osmanischen Reiches*, Hamburg 1745, p. 636 sq., 642 also Mouradgēa d'Oḥsson, *Tableau de l'Empire Ottoman*, iv. 626, also J. v. Hammer, *G. O. R.*, vi. 337, 364, 578; vii. 161 (his tomb on Lemnos); L. Massignon, *al-Hallaj, martyr mystique de l'Islam*, i., Paris 1922, p. 428 and 440. — The Vienna MS. N^o. 1928 (cf. Flügel, *Katal.*, iii. 474 sqq.) contains besides the *Diwān* many other works of Niyāzī; cf. thereon Rieu, *Catal. of Turk. MSS. in the Brit. Mus.*, p. 261. (FRANZ BABINGER)

NĪẒĀM AL-DĪN AḤMAD B. MUḤAMMAD MUḴĪM AL-HARAWĪ, a Persian historian, author of the celebrated *Ṭabaḳāt-i Akbarshāhi*. He was a descendant of the famous **shaiḫ** of Harāt, ʿAbd Allāh Anṣārī. His father Khōdjā MuḴīm Harawī was major-domo to Sulṭān Bābur (1526—1530) and later vizier to the governor of Guḍjarāt Mirzā ʿAskarī. Nīẓām al-Dīn himself held several high military offices under the Great Moghul Akbar and became in 1585 **Bakhshī** of Guḍjarāt and in 1593 even **Bakhshī** of the whole empire. According to Badāʾunī (ii. 397), he died on the 23rd Şafar 1003 (Oct. 18, 1594) aged 45. At his father's instigation he took up historical studies while quite a boy. His fondness for this subject increased as time went on and induced him to try writing himself. The lack of a complete history of India made him decide to fill the gap and thus arose

his celebrated work, called the *Ṭabaḳāt-i Akbar-shāhi* or *Ṭabaḳāt-i Akbarī* or *Ṭaʾrīkh-i Nizāmī* which was finished in 1001 (1593). Nizām al-Dīn used 27 different sources for this work, all of which he mentions by name and in this way produced a very thorough piece of work on which all his successors have relied. He deals with the history of India from the campaigns of Sabuktigin (977-978) to the 37th year of Akbar's reign (1593). The work is divided into a *muḳaddima* which deals with the Ghaznawids and nine *ṭabaḳa*: 1. the Sultāns of Delhi from Muʿizz al-Dīn Ghūrī to Akbar (574-1002 = 1178-1594); at the end of this part are biographies of famous men at Akbar's court, amirs, 'ulamā', poets, writers and *shāikhs*; 2. the rulers of the Deccan (748-1002 = 1347-1594); the Bahmanī, Nizām al-Mulkī, 'Adilshāhi and Kuṭb al-Mulkī; 3. the rulers of Guḍjarāt (793-980 = 1390-1572); 4. the rulers of Mālwa (809-977 = 1406-1569); 5. the rulers of Bengal (741-984 = 1340-1576); 6. the Sharḳī dynasty of Džawnpūr (784-881 = 1381-1476); 7. the rulers of Kašmīr (747-995 = 1346-1567); 8. the history of Sind from the Arab conquest (86) to 1001; 9. the history of Mūltān (847-932 = 1444-1525). The whole work was to have as a *khātima* a topographical description of India but it was apparently never finished by the author.

(E. BERTHELS)

NIZĀM AL-DĪN AWLIYĀ whose real name was MUHAMMAD B. AḤMAD B. 'ALĪ AL-BUKHĀRĪ AL-BADĀ'ŪNĪ was born at Badā'ūn in 636 (1238). He studied elementary Arabic literature with Mawlānā 'Alā' al-Dīn al-Uṣūlī al-Badā'ūnī and then went to Dehlī and became a pupil of Shams al-Mulk and Mawlānā Kamāl al-Dīn Zāhid. Later on he went, on the 15th Radjab 655 (July 29, 1257), to Adjudahn where he became a devoted disciple of Shāikh Farīd al-Dīn Mas'ūd Gandjī Shakar (died 664 = 1265), who nominated him as his Khālifa or spiritual successor in 656 (1258). Subsequently he returned to Dehlī and resided in an adjoining village Ghīyāthpūr which is now called "Nizām al-Dīn Awliya kī bastī" where he died in 725 (1325). He is regarded as one of the most celebrated saints of India and he is popularly known as *Sultān al-Awliyā* "the king of the saints" and *Maḥbūb Ilāhī* "the beloved of God". He was

as proficient in mysticism as he was in *Ḥadīth* (Traditions), *Tafsīr* (Commentary on the Qur'ān) and literature. His tomb is visited by innumerable Muhammadans from all parts of India during the time of his 'Urs (anniversary of his death). His works are the following: *Fawā'id al-Fu'ād*, utterances of the saints taken down from his lips by Ḥasan 'Alā'ī Sandjārī (cf. Rieu, *Cat. Brit. Mus.*, p. 972; Hādījī Khālifa, iv. 478); *Rāḥat al-Muḥibbin*, discourses of the saint uttered in several successive sittings during the year 689 and 690 A.H. and taken down by one of his disciples (cf. Rieu, *Persian Cat. Brit. Mus.*, p. 973).

(M. HIDAYET HOSAIN)

NIZĀM AL-MULK, ABŪ 'ALĪ AL-ḤASAN B. 'ALĪ B. IṢḤĀḲ AL-ṬŪSĪ, the celebrated minister of the Saldjūkid sultāns Alp Arslān [q.v.] and Malikshāh [q.v.]. According to most authorities, he was born on Friday 21 Dhu 'l-Ka'da 408 (April 10, 1018), though the sixth (twelfth) century *Taʾrīkh Baihaḳ*, which alone supplies us with detailed information about his family, places his birth in 410 (1019-1020). His birth-place was Rādkān, a village in the neighbourhood of Ṭūs, of which his father was revenue agent on behalf of the Ghaznawid government. Little is recorded of his early life. The *Waṣāyā* however (for a discussion of the credibility of which see *J.R.A.S.*, October 1931: "*The Sar-gudhash-i Sayyidnā*, etc.") contains several anecdotes of his childhood, and is also responsible for the statement that he became a pupil in Nishāpūr of a well known Shāfi'ī doctor Hibat Allāh al-Muwaffāḳ. On the defeat of Mas'ūd of Ghazna at Dandānkān in 431 (1040), when most of Khurāsān fell into the hands of the Saldjūkids, Nizām's father 'Alī fled from Ṭūs to Khurawdjird in his native Baihaḳ, and thence made his way to Ghazna. Nizām accompanied him, and whilst in Ghazna appears to have obtained a post in a government office. Within three or four years, however, he left the Ghaznawid for the Saldjūkid service, first attaching himself to Čaghri-beg's [q.v.] commandant in Balkh (which had fallen to a Saldjūkid force in 432 [1040-1041]), and later, probably about 445 (1053-1054), moving to Čaghri's own headquarters at Marw. It seems to have been now, or soon after, that he first entered the service of Alp Arslān (then acting as his father's lieutenant in eastern Khurāsān) under his wazīr, Abū 'Alī Aḥmad b. Shādhān. And he so far won Alp Arslān's regard as on Ibn Shādhān's death to be appointed wazīr in his stead (then, probably, receiving his best-known *laḳab*). During the period between the death of Čaghri-beg in 451 (1059) and that of Tughrl-beg in 455 (1063), therefore, Nizām had the administration of all Khurāsān in his hands.

The fame he thereby acquired, and the fact that by now Alp Arslān was firmly attached to him, played a considerable part in prompting Tughrl-beg's wazīr al-Kunduri, first, before his master's death, to scheme for the throne to pass to Čaghri's youngest son Sulaimān, and then, after it, to do his utmost to prevent Alp Arslān's accession. For he calculated that Alp Arslān, on becoming sultān, would retain Nizām rather than himself in office. In the event al-Kunduri, who

soon found himself too weak to oppose Alp Arslān, and thereupon sought to retrieve his position by acknowledging his claim, was retained in his post on the new sultān's first entry into Raiy. But a month later Alp Arslān suddenly dismissed him and handed over affairs to Nizām. Al-Kunduri was shortly afterwards banished to Marw al-Rūd, where ten months later he was beheaded. His execution was undoubtedly due to Nizām, whose fears he had aroused by appealing for help to Alp Arslān's wife.

During Alp Arslān's reign Nizām accompanied him on all his campaigns and journeys, which were almost uninterrupted. He was not present, however, at the famous battle of Manāzgird, having been sent ahead with the heavy baggage to Persia. On the other hand, Nizām sometimes undertook military operations on his own, as in the case of the reduction of Iṣṭakhr citadel in 459 (1067). Whose, his or Alp Arslān's, was the directing mind in matters of policy it is hard to determine. Its main points, however, appear to have been the following: first, the employment of the large numbers of Türkmens that had immigrated into Persia as a result of the Saldjūkid successes, in raids outside the *Dār al-Islām* and into Fāṭimid territory: hence the apparently strange circumstance that Alp Arslān's first enterprise after his accession, despite the precarious condition of the empire he had inherited, was a campaign in Georgia and Armenia; secondly a demonstration that the sultān's force was both irresistible and mobile, coupled with clemency and generally reinstatement for all rebels that should submit; thirdly the maintenance of local rulers, *Shi'ī* as well as *Sunni*, in their positions as vassals of the sultān, together with the employment of members of the Saldjūkid family as provincial governors; fourthly the obviation of a dispute over the succession by the appointment and public acknowledgement of Malikshāh, though he was not the sultān's eldest son, as his heir; and lastly the establishment of good relations with the 'Abbāsid caliph al-Kā'im [q. v.], as the sultān's nominal overlord.

Nizām al-Mulk did not really come into his own until after the assassination of Alp Arslān in 465 (1072). But thenceforward, for the next twenty years, he was the real ruler of the Saldjūkid empire. He succeeded from the outset in completely dominating the then eighteen-year-old Malikshāh, being assisted in this purpose by the defeat of Kāwurd-beg's attempt to secure the throne for himself (for which service Nizām received the title *atā-beg* [q. v.], thus bestowed for the first time). Indeed in one aspect the history of the reign resolves itself into repeated attempts by the young sultān to assert himself, always in vain.

Malikshāh undertook fewer campaigns and tours than his father, the prestige of the Saldjūkid arms now being such that few would risk rebellion, and warlike operations being left largely to the sultān's lieutenants, as they had not been under Alp Arslān. Nevertheless, from Iṣfahān, which had by now become the sultān's normal place of residence, Malikshāh visited the greater part of his empire accompanied by Nizām.

Policy continued on the same lines under Malikshāh as under his father. Nizām, however, was notably less tender than Alp Arslān had been to insubordinate members of the Saldjūkid family,

insisting at the outset on the execution of Kāwurd, and, later, on the blinding and imprisonment of Malikshāh's brother Takash.

Nizām also reversed during the earlier part of Malikshāh's reign the conciliatory policy originally pursued under Alp Arslān towards the caliph. He had been rewarded for the friendly attitude he first evinced — which formed a welcome contrast to that of al-Kunduri — by the receipt from al-Kā'im of two new *laqabs*, viz. *Kiwwām al-Dīn* and *Raḍī Amīr al-Mu'minīn* (the latter believed to be the earliest of this type in the case of a wazīr); and up to 460 (1068) his relations with the caliph's wazīr Fakhr al-Dawla Ibn Djahir [q. v.] became more and more cordial; so much so, indeed, that al-Kā'im in that year dismissed Ibn Djahir, chiefly on account of his too-subservient attitude to the Saldjūkid court. To secure this attitude in the caliph's wazīr was, however, the very aim of Nizām; and on Fakhr al-Dawla's dismissal he sought to impose a nominee of his own in a certain al-Rūdāwari, and subsequently in the latter's son Abū Shudjā'. Al-Kā'im, to avoid this, reappointed Fakhr al-Dawla, though on condition that his relations with the Saldjūkids should in future be more correct. In fact, they soon grew strained, till Nizām came to attribute any unwelcome event in Baghdād to Fakhr's influence. For many years matters were prevented from coming to a head by the tact of Fakhr's son, 'Amid al-Dawla [cf. IBN DJAHIR, 2], who won Nizām's favour so far as to marry in turn two of his daughters, Nafsā and Zubsaida; but in 471 (1078) Nizām demanded Fakhr's dismissal, which the caliph al-Muḩṭadī [q. v.] (who had succeeded in 467 [1075]) was obliged to grant. Nizām now hoped to obtain the office for his own son Mu'ayyid al-Mulk; but to this al-Muḩṭadī would not agree. Henceforward, accordingly, Nizām's dislike was deflected to al-Muḩṭadī himself, and to Abū Shudjā', his former protégé, whom the caliph now created deputy wazīr in an effort to conciliate him, leaving the wazīrate itself unoccupied till the next year, when he appointed 'Amid al-Dawla. But in 474 (1082) Nizām in turn demanded the dismissal and banishment of Abū Shudjā', and at the same time composed his quarrel with Fakhr al-Dawla, when the latter was sent on a mission to Iṣfahān, concerting with him a plan by which Fakhr should watch his interests at Baghdād. As a result al-Muḩṭadī, who gave in with a bad grace, lost all confidence in the Banū Djahir, and two years later replaced 'Amid al-Dawla with the offensive Abū Shudjā'; whereupon Fakhr and 'Amid fled to the Saldjūkid headquarters. Nizām, on this, vowed vengeance on al-Muḩṭadī, and at first seems even to have contemplated the abolition of the caliphate (see *Mir'āt al-Zamān*), as a prelude to which he commissioned Fakhr to conquer Diyār Bakr from the Marwānids [q. v.], the sole remaining *Sunni* tributaries of any consequence. The Marwānids were duly ousted by 478 (1085); whilst al-Muḩṭadī, on his side, showed himself consistently hostile to Nizām. But Nizām's feelings towards the caliph were in the following year completely transformed as a consequence of his first visit to Baghdād (for the wedding of al-Muḩṭadī to Malikshāh's daughter). The caliph received him very graciously; and thenceforward he became a champion of the caliphate in face of the enmity which developed between al-Muḩṭadī and Malikshāh as a result of the marriage.

The celebrity of Nizām al-Mulk is really due to the fact that he was in all but name a monarch, and ruled his empire with striking success. It was not his aim to innovate. On the contrary, it was to model the new state as closely as possible on that of the Ghaznawids, in which he had been born and brought up. His position was similar to that of his forerunners, the Barmakids [q. v.], and the notable Būyid wazīr Ismāʿīl b. ʿAbbād [q. v.]. All three may be said to have represented the old Persian civilization (progressively Islamicized, of course) in the face of a rise to empire of barbarian conquerors, Arab, Dailamī and now Türkmen. The monarchs were in each case equalled, if not surpassed, by their wazīrs, and most of all in the case of Nizām al-Mulk. For with him the invaders aspired to an emperor's position whilst still quite unacclimatized to their new habitat, so that his superiority in culture was the more marked (cf. Barthold, *Turkistan*, p. 308). But in revenge the Saldjūkids' lack of acclimatization stood in the way of a complete realization by Nizām al-Mulk of the now traditional Perso-Muslim state. Hence the lamentations that recur in the *Siyāset-Nāme*.

The *Siyāset-Nāme*, written by Nizām in 484 (1091), with the addition of eleven chapters in the following year, is in a sense a survey of what he had failed to accomplish. It scarcely touches upon the organization of the *diwān*, for instance, partly, it is true, because the book was intended as a monarch's primer, but also because Nizām, having absolute control of the *diwān*, as opposed to the *dargāh* (cf. again Barthold, p. 227), had succeeded, with the assistance of his two principal coadjutors, the *mustawfī* Sharaf al-Mulk and the *munshi*? Kamāl al-Dawla, in exactly modelling this, his special department, on traditional lines. Of the *dargāh*, on the other hand, Nizām complains that the sultāns failed to maintain a sufficient majesty. They were neither magnificent (though he approves their daily free provision of food), formal, nor awe-inspiring enough. At their court, accordingly, the formerly important offices of *hādhib*, *wakil* and *amīr-i ḥaras* had declined in prestige. Nor, as had his model potentates, would they maintain a sound intelligence service, whereby corruption might be revealed and rebellion forestalled. The *Siyāset-Nāme* consists in all of fifty chapters, of advice illustrated by historical anecdotes. The last eleven chapters, added shortly before the wazīr's assassination, deal with dangers that threatened the empire at the time of writing, in particular from the Ismāʿīlis (for a review of the work see Browne, *A Literary History of Persia*, ii. 210—217).

Nizām's situation resembled that of the Būyid administrators in another respect. He was faced, as they had been, with the problem of supporting a largely tribal army, and solved it likewise by a partial abandonment of the traditional tax-farming system of revenue collection for that of the *iqṭāʿ*, or fief [q. v.], whereby military commanders supported themselves and their troops on the yield of lands allotted to them. Since in the decay of the ʿAbbāsid power provincial *amīrs* had tended to assume the originally distinct and profitable office of *ʿamīl*, the way for this development had been paved. The Būyids had later attempted to restore the older system; but the establishment of numerous local minor dynasties

had favoured the new. Nizām now systematized it in the larger field open to him. In the *Siyāset-Nāme* he insists, however, on the necessity of limiting the rights of fief-holders to the collection of fixed dues, and of setting a short time-limit to their tenures (see on this subject Becker, *Steuerpacht und Lehnswesen*, in *Isl.*, v.).

In the absence of the intelligence service he desired, Nizām contrived to intimidate potential rebels and suppress local tyranny by a judicious display of the might and mobility of the Saldjūkid arms. He also insisted on the periodical appearance at court of local dynasts such as the Mazyadites [q. v.] and ʿOḡailids [q. v.], and proclaimed the sultān's accessibility to appeals for the redress of wrongs by means of notices circulated throughout the empire and exposed in public places (see al-Māfarriḡhī, *Maḥāsini Isfahān*). He also gained the powerful support of the ʿulamāʾ, especially those of the Shāfiʿī school, of which he was an ardent champion, by the institution of innumerable pious foundations, in particular of *madrasas*, the most celebrated being the Nizāmiya of Baghdad (opened 459 = 1067), the earliest west of Khurāsān; by the general abolition of *mukūs* (taxes unsanctioned by the *shariʿa*) in 479 (1086—1087); and by undertaking extensive public works particularly in connection with the *ḥadīdī*. After the Hīdjāz had returned from Fātimid to ʿAbbāsid allegiance in 468 (1076), he exerted himself to make the Irāk road safe from brigandage for pilgrims, as well as to diminish their expenses; and from the next year until that of his death the journey was accomplished without mishap. It was not until the second half of Malikshāh's reign that the full effects of Nizām's achievement made themselves felt. By 476 (1083—1084), however, such were the unwonted security of the roads and the low cost of living that reference is made to them in the annals.

Nizām al-Mulk was naturally much sought after as a patron. The poet al-Muʿizzī [q. v.] accuses him of having "no great opinion of poetry because he had no skill in it", and of paying "no attention to anyone but religious leaders and mystics" (see *Čahār Maḳāla*, transl., p. 46). But though his charity, which was profuse (see for example al-Subkī, iii. 41), went in large measure to men of religion — among them the most notable objects of his patronage being Abū Ishāḡ al-Shirāzī [q. v.] and al-Ghazālī [q. v.] —, he was clearly a lavish patron also of poets, as is testified by the *Dumyat al-Ḳaṣr* of al-Bāḡharzī [q. v.], the greater part of which is devoted to his panegyrists. In another sphere, the inauguration of the Djalālī calender [q. v.] in 466 (1074) was probably due to his encouragement, since at this time his ascendancy over Malikshāh was at its most complete.

For the first seven years of Malikshāh's reign Nizām's authority went altogether unchallenged. In 472 (1079—80), however, two Turkish officers of the court instigated Malikshāh into killing a protégé of the wazīr; and in 473 (1080—1081), again, the sultān insisted on disbanding a contingent of Armenian mercenaries against Nizām's advice. Malikshāh now began to hope, indeed, for the overthrow of his mentor, showing extraordinary favour to officials such as Ibn Bahmanyār and, later, Saiyid al-Ruʿasāʾ, who were bold enough to criticize him. Ibn Bahmanyār went so far as to attempt the wazīr's assassination (also 473),

whereas Saiyid al-Ru'asā' contented himself with words. But in each case Nizām was warned; and the culprits were blinded. In the case of Ibn Bahmanyār, in whose guilt a court jester named Dja'farak was also implicated, Malikshāh retaliated by contriving the murder of Nizām's eldest son Djamāl al-Mulk, who had taken Dja'farak's execution into his own hands (475 = 1082). After the fall of Saiyid al-Ru'asā' in 476 (1083—1084), however, the sultān left plotting till, some years later, a new favourite, Tādj al-Mulk, caught his fancy.

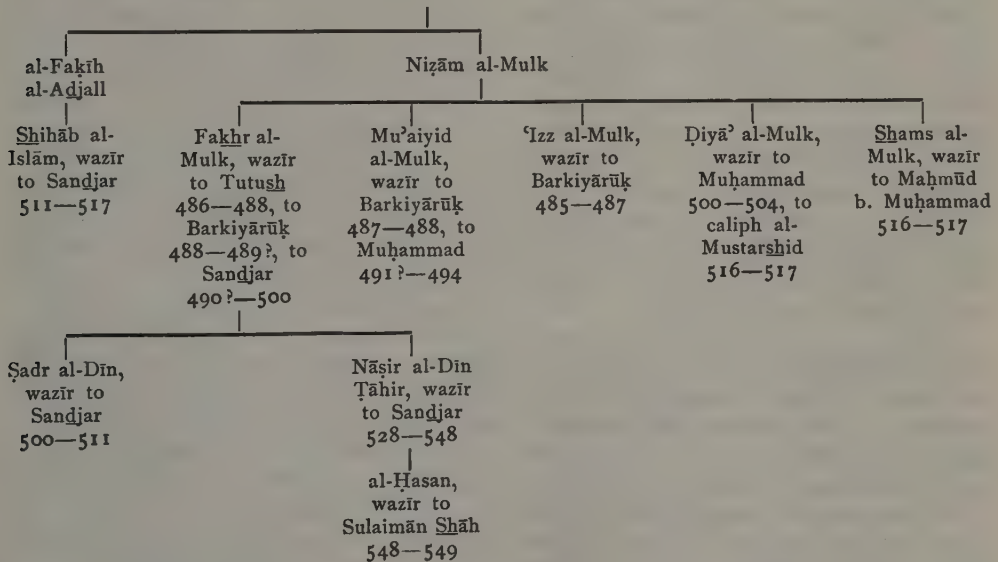

All went well with Nizām al-Mulk till 483 (1090—1091). In that year, however, occurred the first serious challenge to the Saldjūkid power, when al-Basra was sacked by a force of Karmātiāns; and almost simultaneously their co-sectary the Assassin leader al-Ḥasan b. al-Ṣabbāḥ [q. v.] obtained possession of the fortress of Alamūt, from which repeated attacks failed to dislodge him. Meanwhile, moreover, an awkward problem had arisen over the succession to the sultānate, on account of the death in turn of Malikshāh's two eldest sons, Dāwūd (474 = 1082) and Aḥmad (481 = 1088). These sons had both been children of the Karākhānid princess Terken Khātūn (see *Djāmi' al-Tawārikh*), who had borne the sultān a third son, Maḥmūd, in 480 (1087). She was eager for Maḥmūd to be formally declared heir. Nizām, however, was in favour of Barkiyārūk [q. v.], Malikshāh's eldest surviving son by a Saldjūkid princess. Hence Terken became his bitter enemy, and joined with Tādj al-Mulk, who was in her service, in instigating Malikshāh against the wazīr.

Tādj al-Mulk accused Nizām to the sultān, who by this time was in any case incensed with the

wazīr's championship of al-Muqtadī, of extravagant expenditure on the army and of nepotism; and Malikshāh's wrath was finally inflamed beyond bearing by an ungarded reply made by Nizām to a formal accusation of these practices. But even so he did not dare to dismiss him. (The earliest historian to assert that he was dismissed is Rashīd al-Dīn Faḍl Allāh, who appears to have misunderstood the purport of some verses by al-Naḥḥās quoted in the *Kāḥat al-Ṣudūr*, and really composed after Nizām's death).

Nizām al-Mulk was assassinated on 10th Ramaḍān 485 (October 14, 1092) near Siḥna, between Kanguwar and Bisutūn, as the court was on its way from Iṣfahān to Baghdād. His murderer, who was disguised as a Šūfī, was immediately killed, but is generally thought to have been an emissary of al-Ḥasan b. al-Ṣabbāḥ. Contemporaries, however, seem to have put the murder down to Malikshāh, who died suddenly less than a month later, and to Tādj al-Mulk, whom Nizām's retainers duly tracked down and killed within a year. And Rashīd al-Dīn combines the two theories, stating that the wazīr's enemies at court concerted it with the Assassins. The truth is therefore uncertain; but as Rashīd al-Dīn is one of the earliest historians to whom the Assassin records were available, his account would seem to deserve attention.

The extraordinary influence of Nizām al-Mulk is attested by the part played in affairs after his death by his relatives, despite the fact that only two appeared to have displayed much ability. For the next sixty years, except for a gap between 517 (1123) and 528 (1134), members of his family held office under princes of the Saldjūkid house.

Of Nizām's family Diyā' al-Mulk is remarkable as being his son by a Georgian princess, either the daughter or the niece of Bagrat I, formerly married, or at least betrothed, to Alp Arslān, after the campaign of 456 (1064).

(HAROLD BOWEN)

NIZĀM BADAQSHĪ studied law and *ḥadīth* under Mawlānā 'Iṣām al-Dīn Ibrāhīm and Mullā Sa'īd in his native land Badakhshān and was looked upon as one of the most learned men of his age. He was also the *murīd* (disciple) of Shaikh Husain of Khwārizm. His attainments procured him access to the court of Sulaimān, king of Badakhshān, who conferred upon him the title of Qādī Khān. Subsequently he left his master and went to India. At Khānpūr, he was introduced to the Emperor Akbar (963—1014 = 1556—1605). He received several presents, and was appointed *Parwānī* writer. Akbar soon discovered in him a man of great insight, and made him a "Commander of One Thousand" (*yak hazārī*). He also bestowed upon him the title of Ghāzī Khān after he had distinguished himself in several expeditions. He died in Oudh at the age of seventy in 992 (1584). He is the author of the following works: 1. *Hāshiyat Sharḥ al-'Aḳā'id*, a commentary on al-Taftāzānī's commentary on the 'Aḳā'id of al-Nasafī; 2. several treatises on Sūfism.

(M. HIDAYET HOSAIN)

NIZĀM-I DJEDĪD, "new decree", the reforms of Selīm III. Sulṭān Selīm III [q.v.], recognizing the necessity of a thorough reorganisation in certain departments of state, promulgated in 1793 under the name of *Nizām-i djedīd*, i.e. new decree, a series of measures for the reform of the feudal military system, the admiralty, the artillery and transport, a "vizeerate ordinance" for the governors of provinces, a law dealing with provincial taxation, another for the creation of a body of infantry raised and drilled on western lines, and lastly the institution of a special military fund from new sources of revenue, to provide the funds for the reforms. These revenues consisted of taxes on brandy, tobacco, coffee, silk, wool, sheep and the yields of the fiefs of holders of *timar* [q.v.] in Anatolia, who had neglected their duty in war and were therefore deprived of their fiefs. It was intended that the new body of infantry, *nizām-i djedīd askerī*, should number 12,000. To begin

with a model battalion of 1,600 men was raised, to be composed of volunteers. This body was formed of young men of different nationalities and religions, mostly Austrian or Russian deserters collected during the war with Russia. The result was that the force enjoyed little prestige and native Turks only joined it in small numbers, with the consequence that this corps, popularly called *lewena askerī*, consisted of only a few hundred men and was unable to attain to the strength of a battalion (1,600) until 1799. The Sulṭān's force trained and armed on European lines was limited to this body. The Sulṭān employed foreign officers, mainly from England, Sweden and Spain, to train the soldiers and see to the management of the arsenals, ship-building and fortifications. Large barracks and ammunition depots were built. The new revenue earmarked for military purposes which by 1797—1798 amounted to 60,000 purses, i.e. 48,000,000 francs (cf. Djewdet, *Tārīkh*, viii. 139 sq.), supplied the necessary funds. Internal difficulties, especially the ever increasing number of opponents of reform, prevented the Sulṭān from completely realising his plans. The name *Nizām-i djedīd* became more and more hateful to the people so that it was finally decided to abolish it altogether and to call the corps of regular troops *Sejmen* or *Segban*, i.e. "kennel-men". On Selīm's deposition it was disbanded. Under his successor Muṣṭafā [q.v.] the attempt was made to revive the *nizām-i djedīd*. The Austrian renegade Sulaimān Agha who had previously commanded the division quartered in Lewend Çiftlik was ordered to reconstitute it again secretly, but this effort met with no permanent success (cf. Zinkeisen, *G.O.R.*, vii. 552 sq.).

Bibliography: Zinkeisen, *G.O.R.*, vii. 323, 342, 458 sqq., 464, 471, 552; Jorga, *G.O.R.*, v. 117 sqq.; Carl v. Sax, *Geschichte des Machtverfalls der Türkei*, Vienna 1908, p. 133 sq.; Djewdet's [q.v.] history is the chief Turkish source. (FRANZ BABINGER)

NIZĀM SHĀH, title assumed in 895 (1490) by Malik Aḥmad Bahrī, founder of the Nizām Shāhī state of Aḥmadnagar [q.v.], one of the five independent sulṭānates which arose out of the ruins of the Bahmanī kingdom of the Dakhan towards the end of the fifteenth century. For a chronological list and genealogical table of these kings of Aḥmadnagar see *Cambridge History of India*, iii. 704—705; also Zambaur, *Manuel*, p. 298—299.

The second ruler, Burhān Nizām Shāh I (914—960 = 1509—1553), adopted, in 1537, the Shī'a form of Islām which, except for a brief period under Ismā'il when the Mahdawīs were in power, became the established religion of this kingdom. During Burhān's reign an unsuccessful attempt was made by the anti-Dakhani faction, known as the Foreigners, to place his brother, Rādjādī, upon the throne. The flight of the defeated rebel to Berār, combined with the refusal of 'Alā' al-Dīn 'Imād Shāh to surrender Pāthri, the home of Burhān's Brāhman ancestors, led to war with Berār and to the capture of Pāthri. It was a dispute as to the possession of Sholāpur, the chief bone of contention between Aḥmadnagar and the neighbouring kingdom of Bidjāpur, that caused Burhān to adopt the disastrous policy of joining forces with Sadāshivarāya of Vijaynagar, as a result of which the Hindu monarch was able to annex the Rāičūr Dōab to his dominions, while Burhān was successful in capturing the fortress of Sholāpur.

Burhān was succeeded, after a period of civil warfare, by his son Husain who reigned until 972 (1565). His reign, however, is of outstanding importance in the history of the Dakhan, for it was at this time that the Muslim rulers of this area, with the exception of Berār, irritated by the overbearing insolence of Sadāshīwarāya and realizing the strength of the Hindu menace in the south, combined to crush the military power of Vijayānagar at the battle of Tālikota (972 = 1565).

In the same year Husain was gathered to his fathers and his son, Murtaḍā NiẒām Shāh I (972—994 = 1565—1586), reigned in his stead. Murtaḍā, called *Diwāna* or Madman, neglected the affairs of his kingdom for a life of dissipation, the real power being in the hands of his ministers. An unsuccessful attempt was made during this reign to drive the Portuguese out of India, but the effort came too late, for, during the critical years when the Portuguese had been establishing themselves along the coast, the forces which might have united to hurl the invaders into the sea had been engaged in inglorious internecine conflicts. The most important event in this reign was the annexation of Berār, in 982 (1574).

The subsequent history of this dynasty, until the Mughal invasions of the Dakhan, is unimportant. Full details will be found in the pages of Firīshṭa, the contemporary chronicler. Despite the heroic efforts of the dowager queen, Čānd Bibī, the imperial forces conquered Aḥmadnagar in 1600. Nevertheless, it cannot be said that the incorporation of the NiẒām Shāhī dominions in the Mughal Empire was effective under Akbar. All attempts by his successor Djaḥāngir to complete his father's policy were frustrated by the organizing ability of Malik Ambar, an able Abyssinian minister, who was in charge of the affairs of Aḥmadnagar until his death in 1035 (1626). It was not until 1042 (1633), in the reign of Shāhjahān, that this kingdom was finally annexed, although for some years afterwards the Marāṭhā leader Shāhḍjī attempted to resuscitate the NiẒām Shāhī dynasty.

NIẒĀMĪ, NIẒĀM AL-DĪN ABŪ MUḤAMMAD ILYĀS B. YŪSUF, one of the greatest poets of Persia. He was born in Gandja, the later Elisavetpol in 535 (1140—1141). His parents died while he was still quite young so that the education of the boy and of his brother had to be undertaken by his uncle. From NiẒāmī's poems, it is apparent that his uncle very soon followed his parents to the grave. Nevertheless the two boys succeeded in getting an excellent education, for NiẒāmī's brother, who wrote under the pen-name of Kīwāmī Mutarrizī, attained a very high skill as a writer of *qaṣīdas* (an ingenious *qaṣīda* by him is given in Browne, *Lit. Hist. of Pers.*, ii. 47 sq.). NiẒāmī was thrice married and had a son named Muḥammad. The poet was interested in Sūfism and studied in Sūfī circles under a certain *Shaikh Akhū Farrukh Raihānī*. Nothing more is known about his career and it may be presumed that his life was relatively uneventful, as he says himself that he avoided the bustle of princes' courts and had a strictly ascetic conception of life. Never-

theless all his great poems are dedicated to rulers of his time and for one of them he even received the rents of the village of Ḥamdūniyān but it yielded him very little, he tells us. He died in 599 (1202—1203) aged 63½. Dawlatshāh gives the date of his death as 576 (1180—1181), which is however impossible as three of his poems were written after this year; this is probably an instance of the usual carelessness of this writer.

NiẒāmī's great work is his *Khamsa* or Quintette, a collection of five great epic poems, with different subjects. It is very possible that these poems were not collected under one title by the author himself, as Ḥamd Allāh Kazwīnī 25 years after NiẒāmī's death does not yet know his work as a collected whole, although he esteems it very highly and was perfectly acquainted with it. The *Khamsa* consists of the following parts: 1. *Makhzan al-Asrār* (561 = 1165—1166) dedicated to Ildigiz, Atābek of Ādharbāidjān. It is a didactic poem strongly permeated by the spirit of Sūfism. The principles inculcated are expounded by the insertion of short stories. In spite of a certain prosiness, the work is characterized by certain passages of remarkable beauty (e.g. chap. 5 "On old age") and played a prominent part in the history of Persian didactic poetry. 2. *Khusraw u Shirin* (571 = 1175—1176) dedicated to the sons of Ildigiz, Muḥammad and Kizil Arslān; unlike the first poem this is a romantic epic poem, based on historical incidents dealing with the story of the Sāsānian Khusraw Parwiz and coinciding in parts with the corresponding sections of the *Shāh-nāma*. The heroic element however here falls into the background to give free play to the romantic and especially to a penetrating psychological analysis. 3. *Lailā* (or as now pronounced *Laili*) *u-Madjnūn* (584 = 1188—1189) dedicated to the Shīrwānshāh Akhsitān Minūčehr. The subject was adopted at the request of the Shīrwānshāh. NiẒāmī was by no means satisfied with this choice; the love-story of the Beduin poet Kais al-Āmirī, known as Madjnūn [q.v.], seemed to him as dry "as the Arabian desert". Yet it is this very poem that is his greatest work, for it was an astonishing success and stimulated countless imitations, among them some of the pearls of Oriental poetry, such as the work of the same name of the Ādharbāidjān poet Fuḍūlī. Here the heroic style is completely dropped and we have a simple love-story, only occasionally interrupted by the clash of arms. 4. *Sikandar* or (*Iskandar*)-*nāma* (587 = 1191) divided into two parts which are known as *Ikkāl-nāma* or *Sharaf-nāma* and *Khirad-nāma* (or *Sikandar-nāma-yi barri* and *Sikandar-nāma-yi bahri*). The first version of the work was dedicated to 'Izz al-Dīn Mas'ūd I, Atābak of Moṣul. A revised version was offered by the poet to Nasrat al-Dīn Abū Bakr Bishkin, Atābak of Ādharbāidjān. NiẒāmī took the romance of Alexander as the foundation for his poem and treats it very much on the same lines as Firdawsī. The subject afforded ample opportunities to work in scientific and philosophical material, which NiẒāmī does very skilfully in the conversations between Alexander and his tutor Aristotle and other scholars. The work thus became a kind of encyclopædia, which touches on almost all branches of knowledge of the time. 5. *Haft Paikar* (595 = 1198—1199) dedicated to the same ruler as the previous poem. In this poem NiẒāmī again goes back to the popular Sāsānian hero Bahrām Gūr. But here again

it is not on his chivalrous adventures that stress is laid but on seven stories related to the hero by seven kings' daughters with whom he is in love. Each of these stories is associated with a day of the week, a planet and a colour. They form a masterpiece of Oriental story-telling which has never been surpassed and their grotesque and gruesome fantasy is particularly effective. As a master of fantasy, Nizāmī recalls E. T. A. Hoffmann and J. Callot and is able to make his readers visualise his wonderful pictures just as vividly as the European masters. Besides these large works, Nizāmī left a lyrical *Dīwān* of which only three MSS. are known (Bodleian, N^o. 618, 619 and Berlin, Pertsch Cat., N^o. 691) and which so far has received little attention. It contains no *kašidas* in the court style and is distinctly *Sūfi* in tone.

Nizāmī's works are of the greatest importance in the history of Persian literature. They mark the zenith of epic poetry in Persia, as in them for the first time the antithesis between the language of the lyric and the archaic style of the epic is overcome and the epic is brought into the milieu of the court style, which at this time was already fully developed in the lyric. The epic however at the same time loses its heroic character and devotes itself more and more to psychological characterisation at which Nizāmī was a master. The overloading with learning, which in time came to choke the action completely, is very noticeable.

Nizāmī's influence on the later poets was unusually strong. A whole series of important poets, among them men like Amīr Khusrāw Dihlawī, Khwādju Kirmānī, Kātibī, Djamī, Hātifī and even the great mystic Farīd al-Dīn 'Aṭṭār and the great master of *Ġhātāī* poetry Mīr 'Alī-Shīr Nawā'ī, tried their skill in *naḡiras* on Nizāmī's *Khamsa* (the number of poems in later writers rises to seven).

In spite of its great importance, so far critical editions of parts only of the *Khamsa* have appeared and we are dependent for the rest on bad Indian lithographs or manuscripts difficult of access. It is most desirable to put an end to this state of affairs and devote greater attention in Europe to the study of Nizāmī.

(E. BERTHELS)

NIZĀMĪ 'ARŪDĪ. Aḥmad B. 'Umar B. 'Alī took the *takhalluṣ* of Nizāmī and the honorific Naḡm al-Dīn (or Nizām al-Dīn); he was usually called 'Arūḍī (the "prosodist") to distinguish him from other Nizāmīs (particularly the great Nizāmī; cf. the anecdote quoted by E. G. Browne, *Lit. Hist. of Pers.*, ii. 339) According to Browne, Nizāmī is one of the most interesting and remarkable Persian writers of prose: "one of those who throw most light on the intimate life of Persian and Central Asian Courts in the xiith century of our era". He was a court poet who served faithfully the Ghōrid [q.v.] princes for 45 years (he would thus be born at the end of the xith century), according to what he tells us at the beginning of the *Āḡāh Maḡāla*, the only work by him that has come down to us. His verse has been lost, at least except for fragments; Dawlatshāh (ed. Browne, p. 60—61) only gives one couplet which does not seem to be by him. Awfi (*Lubāb*, ed. Browne, p. 207—208) quotes five poetical fragments (mostly occasional pieces) and adds that Nizāmī composed several *mathnawī*, the titles of which have not survived. The only biographical information we possess about Nizāmī comes from himself. In 504 (1110—1111) he was in Samarkand collecting traditions relating to the poet Rūdagi (*Āḡāh Maḡāla*, text, p. 33); in 506, he met Khāiyām in Balkh (*ibid.*, p. 63) and three years later he was living in Herāt (*ibid.*, p. 44); in the following year (510 = 1116—1117) finding himself in poverty in Nishāpūr (*ibid.*, p. 9), he went to Tūs in the hope of gaining the favour of Sulṭān Sandjar who was encamped outside the town (p. 40 sq.); in Tūs he visited the tomb of Firdawsī (p. 51) and collected information about him which he put in his book (p. 47 sq.). Encouraged by Mu'izzī, Sandjar's poet-laureate, he succeeded in attracting the prince's attention; his fame and fortune probably date from this time; in 512 we find him again at Nishāpūr (p. 69); and again in 514 when he heard from the lips of Mu'izzī an anecdote about Maḡmūd and Firdawsī (p. 50—51); in 530 he returned to this town and visited the tomb of Khāiyām (p. 63); in 547 he fled into hiding after the defeat of the Ghōrid army by Sandjar near Herāt (p. 87). His "Four Discourses" (*Āḡāh Maḡāla*) were probably written in 1156. For the remainder of his life we have no data. There is reason to believe he practised medicine and astrology (cf. text, p. 65 and 87). As to his poetry, in spite of the satisfaction he expresses with it, it is not

of the first rank, to judge by the fragments that survive; in any case it was very inferior to his prose, which Browne says is almost unequalled in Persian.

The *Cahār Maḳāla* consists of four discourses, each of which deals with one of the classes of men whom the author regards as indispensable in the service of Kings: secretaries, poets, astrologers and physicians. Each discourse begins with general considerations, which are followed by anecdotes, often from the writer's personal experience. The number of these anecdotes, which form the most interesting and valuable part of the book, is about forty; some give valuable information on the literary and scientific state of Persia. We may say that the "Four Discourses" (especially the second) and Awfī's *Lubāb* are the two old works which deal systematically with Persian poetry. Dawlatshāh made a great deal of use of it (cf. Browne, *Sources of Dawlatshāh*, in *J. R. A. S.*, 1899, p. 37—69). We may specially point out that it is to Nizāmī that we owe the earliest notice of Firdawsī and the only contemporary reference to Khayyām. On the other hand, we must point out the historical inaccuracy of certain passages, even in the case of events in which Nizāmī claims to have taken part. His book is mentioned or quoted by Awfī (*Lubāb*), Ibn Isfandiyyār (*Hist. of Tabaristan*), Mustawfī Kazwīnī (*Tārīkh-i Guzida*), Djāmī (*Silsilat al-Dhahab*), Ghaffārī (*Nigāristān*). Hādjdjī Khalifa speaks of a *Madjma' al-Nawādir* which he thinks is different from the *Cahār Maḳāla*; but Mirzā Muḥammad Kazwīnī has shown that this is another title of the same book.

Bibliography: Nizāmī 'Arūdī has been edited in full by Mirzā Muḥammad Kazwīnī and transl. by E. G. Browne (*G.M.S.*, xi, Pers. text, 1910; English transl., 1921) A lith. ed. appeared at Teheran (1305 = 1887). Cf. *G. I. Ph.*, ii, index; E. G. Browne, *Lit. Hist. of Persia*, ii, index; Hādjdjī Khalifa (ed. Flügel, No. 4348); Riżā Kulī-Khān, *Madjma' al-Fuṣṣḥā*, i. 635; Muḥammad Nizām al-Dīn, *Introd. to the Jawāmi' ul-hikayāt* (*G. M. S.*, index).

(H. MASSÉ)

NIZĀMĪ, ḤASAN, a Persian historian whose full name was ŠADR AL-DĪN MUḤAMMAD B. ḤASAN. Born in Nishāpūr, he went on the advice of his *shaiḫ* Muḥammad Kūfī to Ghaznī to give an opportunity to his remarkable talents as a stylist. A severe illness forced him to leave Ghaznī, and he went to Dihli where he obtained an appointment as court historian to the Pathān Sultāns and began in 602 (1206) his great historical work *Tādj al-Ma'āthir fī Tārīkh*, which brought him great fame. It deals with the history of the first three Pathān Sultāns of Dehli — Muḥammad b. Sām (588—602 = 1192—1206), Kuṭb al-Dīn Aibak (602—607 = 1206—1210) and Shams al-Dīn Iltutmish (607—633 = 1210—1235). The book begins with the capture of Adjmir by Mu'izz al-Dīn in 587 (1191) and ends with the appointment of Nāṣir al-Dīn Muḥammad as governor of Lahore (614 = 1217). An Appendix contains a panegyric of Iltutmish and his campaigns of conquest. The work was very highly esteemed in the Muslim east as a model of elegant style. It is written in high flowing and difficult language and has a large number of poetical passages inserted in it. It is only with difficulty that the historical facts can be extricated from the medley of rhetoric but

nevertheless the book is of undeniable value for the history of India and Afghānistān.

Rosen, *Indices alphabet. codicum mss. persicorum . . . in Bibl. Imper. Literarum Universitatis Petropolitanae*, St. Petersburg 1888, p. 12, No. 578. On the biography of the author see also Mirkhond (lith. Bombay), i. 7.

(E. BERTHELIS)

NIZĀM-ŠAHĪ (i. e. *Ilā-yi Nizām-shāhī* "ambassador of Nizām-Shāh" of the Dakhan), a Persian historian whose real name was Khūrshāh b. Kuḅād al-Ḥusainī. Born in the Persian 'Irāk, he entered the service of Sultān Burhān [cf. NIZĀM-ŠAHĪ]. The latter being converted to the Shī'a sent Khūrshāh as ambassador to Tahmāsp-Shāh Ṣafawī. Reaching Raiy in Radjab 952 (Sept. 1545), he accompanied the Shāh to Georgia and Shirwān during the campaign of 953 (1546) against Alkāš-Mirzā. He stayed in Persia till 971 (1563), perhaps with occasional breaks. He died at Golconda on the 15th Dhū 'l-Ka'da 972 (June 24, 1564).

Khūrshāh's chief work is the *Tārīkh-i Ilā-yi Nizām-shāh*, a general history from the time of Adam based on such sources as Tabarī, Baidāwī, *Tārīkh-i guzida*, *Zafar-nāma*, *Ḥabīb al-Siyar*, the "Memoirs of Shāh-Tahmāsp" etc. The book is divided into a preface and seven *maḳāla*, each of which is again divided into several *guz'āt*. The most important part of this work is that which refers to the reign of Tahmāsp-Shāh (in the Brit. Mus. MS. Or. 153, written in 972 = 1565, the events come down to 969) and to the local dynasties of the Caspian provinces: Māzandarān, Gilān, Shirwān. The two manuscripts in the British Museum show differences in their contents: Add. 23,513 (written in 1095 = 1684) has passages added by some continuator and taken from the *Djihan-ārā* of Aḥmad b. Muḥammad Ghaffārī. The later additions of Or. 153 come down as late as 1200.

According to Firishṭa, "Shāh Khūrshāh", during the reign of Ibrāhīm Kuṭb-Shāh of the Deccan (957—988) also wrote a history of the Kuṭb-Shāhis [q. v.]. It is difficult to reconcile this with a continuous stay in Persia from 952 to 971.

Bibliography: Rieu, *Catalogue*, p. 107—111; Schefer, in his *Chrestomathie persane*, ii., 1885, p. 64—133 (notes 65—133) printed the sections relating to the Caspian provinces.

(V. MINORSKY)

NIZĀR B. MA'ADD, common ancestor of the greater part of the Arab tribes of the north, according to the accepted genealogical system. Genealogy: Nizār b. Ma'add b. 'Adnān (Wüstenfeld, *Geneal. Tabellen*, A. 3). His mother, Mu'āna bint Djahla, was descended from the pre-Arab race of the Djurhum. Genealogical legend which has preserved mythological features and folklore relating to several eponyms of Arab tribes is almost silent on the subject of Nizār (an etymological fable about his name: *Tādj al-'Arūs*, iii. 563, 15—17 from the *Rawḍ al-Unf* of al-Suhaili [i. 8, 8—10] is without doubt of very late origin as is shown by the connection which is established

with the prophetic mission of Muhammad; the same etymology from *nazzr* "insignificant" is further found in Ibn Duraid, *Kitāb al-Ishṭikāq*, p. 20, 6; *Mufaḍḍaliyyāt*, ed. Lyall, p. 763, 16, without the story in question). Tradition has more to say about his four sons Rabi', Muḍar, Anmār, Iyād and about the partition of the paternal heritage among them, in connection with which they visited the *Djurihumī ḥakam* al-Af'ā. Their adventures on the journey (they are able to describe minutely the appearance of a camel they have never seen from the traces it has left) form the subject of a popular story which has parallels among other peoples; its object is to make the origins of the *ḥiyāfa* go back to the most remote period (al-Mufaḍḍal b. Salama, *al-Fakhir*, p. 155—156 and the sources there quoted; Ṭabari, i. 1108—1110 etc.); it perhaps is of interest to note that the story was known to Voltaire who introduced it into his *Zadig*.

As Robertson Smith showed half a century ago (*Kinship and Marriage in Early Arabia*², p. 5 sqq., 283—289) and as Goldziher has confirmed by numerous quotations (*Muhammedanische Studien*, i. 78—92), the name Nizār only appears late in Arab poetry while that of Ma'add (which is found as early as the Byzantine historians Procopius and Nonnosus) appears quite early in it, although its ethnic character is rather vague (as to that of 'Adnān, still more comprehensive, one of the oldest historians of Arab poetry, Muḥammad b. Sallām, d. 230 = 844—845, had already pointed out that his name was almost unknown in ancient poetry, *Ṭabaḳāt al-Shu'arā'*, ed. Hell, p. 5, 1; cf. Ibn 'Abd al-Barr, *al-Iṣṭikāq 'alā Ḳabā'il al-Ru'āḥ*, Cairo 1350, p. 48). Before the Umayyad period the only trace we find of the use of Nizār as an ethnic is in a verse of the pre-Islamic poet Biṣr b. Abī Ḳhāzim (in the *Mufaḍḍaliyyāt*, p. 667, 15) and in another of Ka'b b. Zuhair (in Ṭabari, i. 1106, 10); in the verse of Ḥassān b. Ṭhābit, ed. Hirschfeld, lx. 2, the reference is to another Nizār, son of Ma'īṣ b. 'Āmir b. Lu'ayy (Wüstenfeld, *Tabellen*, P. 15) belonging to the *Ḳuraysh*. The line in Umayya b. Abī 'l-Ṣalt, ed. Schulthess, U, i. 10, in which the descent of the Ṭhāḳif from Nizār is celebrated, is apocryphal and is connected with the well known dispute regarding the origin of the Ṭhāḳif. The story of the verdict of al-Aḳra' b. Ḥābis al-Tamīmī in favour of *Djarir* b. 'Abd Allāh al-Baḍjalī against Ḳhālīd b. Arṭāh al-Kalbī (*Naḳḁ'id*, ed. Bevan, p. 141—142; cf. Ibn Hishām, *Sira*, ed. Wüstenfeld, p. 50) in which there is a reference to Nizār and which is placed before Islām, is not less suspect; its object is to defend the northern origin of the Baḍjila (descendants of Anmār), often disputed, as well as that of their brethren the *Ḳhath'am* [q. v.], and to refuse the same origin to the Kalb, descendants of the *Ḳuḍā'a*, to which it was attributed just at the time of the strife that raged around the succession to Yazīd I. The *radjaz* quoted by Ibn Hishām, *Sira*, p. 49 (and often elsewhere; they are sometimes attributed to 'Amr b. Murra al-Djūhanī, a contemporary of the Prophet, and sometimes to a certain al-Aflaḥ b. al-Ya'būb, otherwise unknown) in which we find used with reference to *Ḳuḍā'a*, the verb *tanazzara* "to announce oneself to be descended from Nizār" may be regarded as apocryphal. No stress need be laid on the isolated reference in al-Balāḍhurī (*Futūḥ*, ed. de Goeje, p. 276, 16) to the quarters

(*khīṭa'*) of the Banū Nizār in *Kūfa* contrasted with those of the *Yamanī*; his language simply reflects the position in the author's time or that of his sources, later than the great revolution of the first century A. H.

It is only from this period, and to be more exact after the battle of Mardj Rāhiṭ (65 = 684 won by the Kalb over the *Ḳais*, that we begin to find the name Nizār recurring with increasing frequency; it occurs mainly in the political poetry: *Djarir*, al-Farazdaq, al-Aḳḥṭal, al-Ḳuṭāmī, Zufar b. al-Ḥārith use it to designate the common source of the tribes of the north, contrasting it with the terms "Yaman" or "Ḳaḥṭān". The expression *Ibnā Nizārīn* "the two sons of Nizār" becomes regular; it indicates the Muḍar (*Ḳais 'Ailān*) and the Rabi'a as belonging to one ethnic group; they were previously regarded as unrelated to one another. The tribes descended from Anmār (cf. above) and Iyād (the fourth son of Nizār; but other sources make him a son of Ma'add) appear only rarely as members of the group. This is what the genealogical systematisation seeks to explain by alleged migrations of Anmār and Iyād into the groups of *Yamanī* tribes.

But the application of the term Nizār continued to remain vague, more so than those of *Ḳais*, Muḍar and Rabi'a which represent very large groups but more precise than that of Ma'add, of which it tends to take the place. This is due to the fact that the term Nizār corresponds to a political ideal rather than to a historical reality; in the latter the reigning dynasty, claiming descent from *Ḳuraysh* (themselves, consequently, *Nizārīs*) had as their henchmen the Kalb, one of the most powerful *Yamanī* tribes, while the *Azd*, another tribe of the south, bound to the policy of their most illustrious representatives, the *Muhallabids*, were sometimes on the side of the Umayyads and sometimes against them. It was this complicated position that gave rise to the attempt to separate the *Ḳuḍā'a* (i. e. the Kalb) from the southern stock in order to make them descendants of Nizār. The story told in *Aghānī*, xi. 160—161, al-Bakrī, *Mu'djam*, ed. Wüstenfeld, p. 14—15 is intended to explain the separation of the *Ḳuḍā'a* from the rest of the Nizār as a result of the murder of the *Nizārī* *Yadhkur* b. 'Anaza by the *Ḳuḍā'i* *Ḥazīma* b. Naḥd. The lines in *Djarir* (*Naḳḁ'id*, p. 994) sum up very completely the way in which the *Ḳuḍā'a*-Kalb were connected with the Nizār, while elsewhere (e. g. *ibid.*, p. 261: al-Farazdaq) *Ḳuḍā'a* and Nizār are opposed. Later, at the end of the Umayyad period and especially in the period of the struggle in *Ḳhurāsān* which was the prelude to the fall of the dynasty, Nizār (also in the form *Nizārīya*) became the regular designation which was contrasted with *Yamanīya*: henceforth the Banū Nizār were to be the representatives of northern Arabism; as early as the period of decline of the Umayyads, the poet al-Kumait b. Zaid al-Asadī [q. v.] had composed a long poem, the *Mudhahhaba*, exalting the Nizār at the expense of the *Ḳaḥṭān*; nearly a century later, the *Yamanī* *Di'bīl* [q. v.] replied to him; these poetical jousts on which the *aṣābiya*, nationalist fanaticism, of the two great ethnic groups of the Arabs was nourished, continued down to quite a late date, especially among the *Zaidīs* of the *Yaman*.

From what has been said it is evident that we cannot speak of Nizār as of a tribe having had

a real historical existence nor, as is the case with the Ma'add, as a comprehensive term indicating an effective grouping together of a number of tribes of different origin. Nizār is simply a fictitious invention, a label intended to serve political interests. One must however ask whence the name came and what were the precedents which suggested its use in the sense above outlined. The problem has not yet been thoroughly studied and perhaps we do not possess the material necessary to solve it. It is possible that the history of the four sons of Nizār (cf. above), a popular story the nature and diffusion of which seem to take it back to a very early period and which originally had nothing to do with genealogical tradition, supplied the names on which the *nassābūn* later gave their imagination free play. But this is a pure supposition which would have to be confirmed by definite proofs.

(G. LEVI DELLA VIDA)

NIZĀR B. AL-MUSTAṢṢIR, Fāṭimid claimant, born 10th Rabi' I 437 (Sept. 26, 1045). On the death of his father, having been displaced by his youngest brother al-Musta'li [q. v.], Nizār fled to Alexandria, took the title of al-Muṣṭafā li-Dīn Allāh, and rose in revolt early in 488 (1095) with the assistance of the governor, Naṣr al-Dawla Aftakin, who was jealous of al-Afḍal, and the population of the city. He was at first successful in driving back al-Afḍal and advanced as far as the outskirts of Cairo, supported by Arab auxiliaries. Al-Afḍal again took the field against him, and after a short siege in Alexandria he surrendered towards the end of the same year, was taken to Cairo, and there immured by order of al-Musta'li.

By the Ismā'īlī organization in Persia [see the art. AL-ḤASAN B. AL-ŠABBĀḤ], Nizār was recognized as the rightful successor of al-Mustaṣṣir, and this, with its offshoots in Syria, formed a new group (*al-da'wa al-djādida*), opposed to the Musta'lian group (*al-da'wa al-ḥadima*), now known as *Khōdjas* [q. v.] and *Bohorās* [q. v.] respectively. A party of the Nizāriya at first held to the belief that Nizār was not dead and would return as the Mahdī or in company with him, but the majority held that the line of Nizār was continued by the Grand Masters of Alamūt.

NOAH. [See NUḤ.]

NOVIBAZAR or YEŇI BAZAR is the name of a former (down to 1912) Turkish sandjak in what was once the wilāyet of Kosovo; it now belongs to Jugo-Slavia. The district through which the river Lim flows and which is therefore also called the Lim district (area 7,350 sq. km. with 168,000 inhabitants of whom $\frac{3}{4}$ are Christian Serbs and $\frac{1}{4}$ Muhammadan Albanians), was bounded on the north by Bosnia and separated Serbia from

Montenegro. The importance of Novibazar was for military reasons as it secured communications between Bosnia and Rumelia and at the same time prevented communication between Serbia and Montenegro. By art. 85 of the Treaty of Berlin, Austria-Hungary held the western part of the sandjak (the Lim district) from Sept. 1879 to 1908, namely the towns of Plevlje (Turk. Tashlīdja), Prijepolje and Bjelopolje with a garrison of some 3,000 men, while the southern part, the kaṣā of Mitrovica, was returned to the Turks. After it was handed over in 1908, Novibazar formed a bone of contention between Turkey, Serbia and Montenegro. In 1912 the sandjak was conquered by Montenegro (Bjelopolje Oct. 12, Tusi Oct. 14, Berane Oct. 16, Gusinje Oct. 20, Plevlje Oct. 28) and Serbia (Novibazar Oct. 23, Sjenica Oct. 24) and in 1913 divided between the two countries.

The district forms with Zeta the ancestral home of former Serbia and roughly corresponds to the ancient Rascia. The chief town Novibazar (in the official spelling Novipazar) 1800 feet above sea-level on the Rashka, is now an impoverished place of 11,000 inhabitants with miserable houses and poor streets. In the middle ages however, it was of considerable importance as the imposing remains of churches monasteries and baths around it show. Not far from it lie the ruins of the town of Ras, of importance in the time of the old Serbian Kingdom and already mentioned in Byzantine history in the ixth century ('Párov), where the Nemanjid prince Stephen held his court for a time. The settlement of Pazarište or Trgoviste there was called by the Turks Eski Bazar, "Old Market". A *subaṣhi* is mentioned as being there in 1459 after the conquest of the land by the Turks (1456) and in 1461 a *kaḍi*. The Turks then founded a New Market not far away, YeŇi Bazar, which soon became the capital of the whole district. The Ragusa historian Lucari says the founder of Novibazar was Eŝe, i. e. undoubtedly İsa-Beg (1444—c. 1460, from 1453 governor of Sarajevo), son of İshāk-Beg (1414—1444), both of whom were governors in Üsküb (Skoplje) and were among the most important Turkish leaders of the time. The foundation of Novibazar must have taken place about 1460 for a year later we find mention for the first time in the archives of Ragusa of Ragusan merchants in Novibazar. In 1467 we already find a *kaḍi* and a *subaṣhi* in Novibazar. The town from the end of the xvth century was frequently visited and described by western travellers as it lay on the old trade route from Ragusa (Dubrovnik) to Niš. The knight Arnold v. Harff mentions Novibazar about 1499 as Nuewemarschet, Jean Chesneau (cf. *Le voyage de Monsieur d'Aramon*, ed. Ch. Schefer, Paris 1887, p. 11) describes Novibazar as *ville non fermée, assez marchande*. While these and other travellers of the xvth century like Benedict Kuripešić (1530; cf. Benedikt Curipeschitz, *Itinerarium der Botschaftsreise des Jos. v. Lamberg*, etc., ed. by Eleonore Gräfin Lamberg-Schwarzenburg, Innsbruck 1910, p. 41 sq.), Catarino Zeno (1550, in his *Descrizione del viazo de Constantinopoli*, 1550 in the *Starine* of the Yugoslav Academy of Agram, vol. x.) and Melchior v. Seydlitz (1555, in his *Gründlichen Beschreibung der Wallfahrt*, Görlitz 1580) were very little impressed by Novibazar, Paolo Contarini (1580, in his *Diario del viaggio da Venezia a Constantinopoli*, Venice 1856: *nozze Grimani-Francanzoni*) and the Sieur de

Stochove (c. 1630, cf. *Voyage du Sieur de Stochove fait es années 1630, 1631, 1632, 1633*, Brussels 1643, p. 30: at second hand and not from his own observation) and also Louis de Hayes, Sieur de Courmenin (1621, in his *Voiage de Levant Fait par le commandement du Roy en l'année 1621 par Le Sieur D[e] C[ourmenin]*, Paris 1624) devote far more attention to it. P. Contarini spent a day of rest in the caravanserai of Novibazar (*Novo Bazar*) which he found was a town with 6,000 Turkish and 100 Christian houses. He mentions the Ragusan settlement and the 16 mosques, the very long bazaar in which artisans of all kinds offered their wares for sale (mostly articles of iron from the adjoining Gluhavica in the S. E. of Novibazar which was as early as 1396 the seat of an Ottoman judge and had a customs house). The Sieur de Stochove describes *La ville de Geni Basar, qui en Turc veut dire nouveau marché, elle est située sur la petite rivière de Rasca en un lieu hault et bas, ce qui en rend la veüe fort agreable, son circuit est de demy lieue sans estre enfermé de murailles, cest la ville la plus considerable que l'on trouve depuis la frontiere* (i. e. the Dalmatian-Bosnian frontier). Louis de Hayes in 1621 found İgni Bazar (i. e. Yeñi Bazar) a pleasant place with one storey houses. It was under the governor of Bosnia and had a judge who was under the Chief Kādi of Sarajevo [q. v.]. The description given by the traveller Ewliya Çelebi [q. v.] of his visit to Novibazar (1660) (v. 544 sqq.) is as usual full of exaggerations. He says there were 45 quarters in Novibazar, 23 large and 11 small mosques, 5 medreses and 2 monasteries. Of the mosques he mentions the Altun mosque and the mosque of Ghāzī 'Isā-Beg formerly a church, and the Taşköprü mosque and mosque of "Hādjī-i mühterem" (?). The bazaar had 1,110 shops, and there were 7 churches of the "Serbs, Bulgars and Latins" in Novibazar. He particularly praises the white unmixed bread and 48 kinds of apples and 35 of pears. Among the notabilities of the time Hādjī-i İbrāhīm Efendi, who had "cleansed" the roads to Bosnia and Herzegovina and erected bridges and rest-houses, and Dhu 'l-Fiḳār-Zāde Maḥmūd Agha receive words of praise. Both had palaces (*serāy*) in Novibazar.

In consequence of its exceedingly important military position and as the key to Bosnia for Turkey in Europe (cf. F. Kanitz, *Serbien*, Leipzig 1868, p. 200 sq.) Novibazar has frequently played a part in military history. In 1689 it was occupied under the Margrave of Baden; but the Christian inhabitants, disillusioned by the tyrannical attitude of the garrison, the excesses of the imperial armies, the heavy taxation, the intolerance shown the orthodox clergy and the partisanship for the Roman Catholic church, soon turned against their new masters and very soon Novibazar with the whole of Old Serbia again passed to the Ottomans. In 1737 Novibazar was again occupied for a few months by the imperial forces, but as a result of the careless leadership of the generals fell with Nish again into Turkish hands and this settled the disastrous result of the war for Austria (cf. F. Kanitz, *op. cit.*, p. 203 sq. and the Turkish description of the Bosnian campaign, from the pen of the kādi of Novi, 'Omar Efendi [q. v.], e. g. in the German version by J. N. v. Dubsky, Vienna 1879, p. 134 sqq. or the English by C. Fraser, London 1830, p. 49 sqq.). It is remarkable that the defences of Novibazar in the Turkish period were never

what the strategic importance of the place demanded (cf. the description in A. Boué, *Die Europäische Türkei*, vol. i., Vienna 1889, p. 549). In view of the stubborn defiance and steady opposition of the people, the Ottoman authorities — Novibazar was the seat of a ka'im-makām [q. v.] — had a difficult time. General Hasan Pasha who was to carry out the disarming in 1880, was killed in the street in a rising and those guilty were never brought to book. Unpopular officials were as a rule simply driven out. As the Porte feared continuous fighting with the rebellious population of the sandjak it never decided to undertake a regular military expedition against them. The result was that all branches of administration, trade, agriculture and industry gradually went to pieces. From the xviiith century therefore Novibazar was always a place of little importance. Nor did it revive under the semi-independent feudal lords of the family of Ferhadagić (*Ferhād-oghullar?*). Of the remains of Muslim times in Novibazar may be mentioned the fortress (*ka'a*) built in 1103 (1690) in the reign of Sulṭān Aḥmad II. The surrounding buildings as a rule date only from the time of 'Abd al-Ḥamid II. Historically most interesting is the Altun 'Alem Mosque built by Ghāzī 'Isā-Beg (see above), the founder of Novibazar. Behind it lie the wretched ruins of the extensive konağ of the erstwhile feudal lord of Novibazar, Aiyūb Pasha (d. 1243 = 1821). Of other Muslim houses of prayer may be mentioned the mosques of Muşliḥ al-Din Efendi, first mu'eddhin of the conqueror Meḥmed II, of Ghāzī Sinān-Beg and of Aiyūb Pasha. — The capital of the sandjak of Novibazar in modern times was the little town of Sjenica (cf. K. Oestreich, *Reisen im Vilajet Kosovo*, in the *Verhandlungen der Gesellsch. für Erdkunde zu Berlin*, vol. xxvi., 1899, p. 319).

NÜBA, name of a country [and people?] to the South of Egypt. The names Nubia, Nubian, Nūba are commonly used without scientific precision and it is only in the linguistic sense that they have an unambiguous meaning. The frontier separating Nubia from Egypt proper is well defined as the first cataract of the Nile in the neighbourhood of Aswān, and the area where Nubian is spoken nowadays ends in the vicinity of the 18th parallel, but the southern limit of Nubia is sometimes placed as far south as the junction of the Atbara and the Nile or even the confluence of the two Niles. Nubia is often sub-divided into Lower Nubia

from Aswān to Wādī Halfa and Upper Nubia from Wādī Halfa southwards, but neither term has any political or administrative significance.

The medieval Arabic writers are equally vague about the southern extent of Nubia: the region immediately bordering on Egypt, which bore the name of Maris, seems to have been regarded as Nubia *par excellence*; to the south of it lay Muḳarra with its capital at Dongola (Dunḳula, Dumḳula), and beyond this the kingdom of 'Alwa the capital of which was Sōba, near the site of the modern Kharṭūm. According to the tenth-century author 'Abd Allāh b. Aḥmad b. Salīm (Sulaimī, quoted by Maḳrīzī) Maris and Muḳarra had distinct languages, and the frontier between them was situated three post-stations (*barīd*) to the south of the Third Cataract; politically, however, Maris formed part of Muḳarra and this probably accounts for the fact that Ibn Salīm immediately afterwards places the commencement of Muḳarra at a day's journey from Aswān. The frontier between Muḳarra and 'Alwa was the district of al-Abwāb, a name still in use for the country round Kabūshiya in Berber province. 'Alwa is generally placed outside Nubia, and the preamble to the treaty which governed the political relations between Nubians and Arabs makes its provisions incumbent on "the chief of the Nubians and all people of his dominions . . . from the frontier of Aswān to the frontier of 'Alwa"; yet Mas'ūdi speaks of 'Alwa as part of Nubia and states that it is under the political suzerainty of Muḳarra. According to Yāqūt, Nubia extends along the Nile a distance of eighty days journey, Dongola being situated halfway at forty days distance from Aswān; of 'Alwa he speaks, with obvious exaggeration of the distance, as a people beyond Nubia three months' journey from the king of the Nūba, whose official title is "king of Muḳarra and Nūba".

The modern conventional division of the population of the northern Sūdān into Nubian, Bedja, and Arab is in the main a linguistic one and does not correspond to any clearly-marked racial divisions. The "Nubian" type, itself a hybrid one, which dates back to the age of pre-dynastic Egypt, is most purely preserved in the Kenūz, Maḥas, and Sukkot, who between them compose the so-called Barābra, though even here a considerable element of alien admixture must be recognised. The Nubian-speaking Danāḡla (Danāḡila), on the other hand, are scarcely distinguishable from the rest of the Danāḡla-Dja'liyyīn-group (see MacMichael, *History*, i. 197 *sqq.*) which includes a number of Arabic-speaking tribes extending from Dongola province to the neighbourhood of Kharṭūm; the origin of this group must be sought in a fusion of the original Nubian element with the Arabs who poured into the Sūdān in the middle ages and eventually brought about the fall of the Christian kingdoms of Dongola and 'Alwa. The numerous Danāḡla colonies on the Blue and White Niles have given up their language in favour of Arabic, and the same applies to a branch of the Maḥas, settled since the sixteenth century in the neighbourhood of Kharṭūm, who now claim to be descended from the Khazraḡ of Arabia. Throughout the northern Sūdān the original Nubian stratum has coalesced with the Arabs to such an extent that it is no longer possible to separate the two strains. This fusion has also affected the groups which still speak Nubian, though the Barābra may

be said to have maintained a separate identity and to have absorbed the foreign elements rather than the reverse. The Danāḡla repudiate the appellation Nubian, and the term Barābra is used only by Egyptians and other foreigners, while the people themselves prefer to call themselves by their tribal names (Kenūz, Maḥas, Sukkot). It is only in recent times that they have begun to develop a national sentiment as Nubians and to make occasional use of the name.

Language. The Nubian language can scarcely be indigenous to the Nile Valley, and it is in no way connected with the language of the Meroitic inscriptions which preceded it in that area. The problem of its linguistic grouping has not been satisfactorily solved: both Hamitic and Sudānic features are present, and L. Reinisch (*Die sprachliche Stellung des Nuba*, Vienna 1911) regards it as a connecting link between the two groups. G. W. Murray (*Sudan Notes and Records*, vol. iii.) suggests the conclusion that in the remote past Dinka-Shilluk, Bari-Masai, and Nubian had a common origin, and that they all have to a greater or lesser degree been permeated by Hamitic influence. W. Meinhof (*Eine Studienfahrt nach Kordofan*) definitely classes Nubian as a Hamitic language.

The following branches are distinguished:

a. Nilotic Nubian (the language of the Barābra and Danāḡla) with three dialects: Kenzī, Maḥasī, and Dongolāwī; the first and the third, though separated geographically, form a single dialect group. A fourth dialect distinguished by Reinisch (Fadidja, Fadikḳa) is stated by Lepsius to be only a variety of Maḥasī.

ḡ. Hill Nubian spoken by a number of negroid tribes in the present province of Kordofan. The area in question is inhabited by a medley of tribes of different linguistic and racial stocks, and it is only in the case of the Nubian-speaking groups (mainly in the north) that the appellation Nūba is justified. The best known dialect is that of Dilling (Delen). A form of Hill Nubian is also spoken by the people of Djebel Midōb in northern Dārḡūr.

On the problem of the racial and historical connexion between Hill Nuba and Nilotic Nubians, see below.

c. The isolated dialect of the Birked tribe in Dārḡūr designated by Zyhlarz as South-West Nubian.

d. Old Nubian, the literary language of medieval Nubia. The examples which have survived belong to the viiith—xith centuries and consist of homiletic and edifying pieces intended for the common people, as distinct from strictly theological literature for which Greek was employed. The language of these texts approximates most closely to modern Maḥasī, although the provenance of the existing remains is the northernmost part of Nubia where Kenzī is spoken. Scanty remains from Upper Nubia justify the conclusion that Nubian (perhaps in a form more closely connected with the Hill dialects) was also used for literary purposes in the kingdom of 'Alwa.

Modern Nubian has no literature apart from biblical translations produced under European influence. The Danāḡla and Barābra use only Arabic for written communications and for literary purposes.

History. In speaking of the early history of the country the name Nubia is misleading, as there is no evidence of its use in ancient Egypt as a tribal or geographical name. To the Egyptians Lower Nubia was known as Wawat, and Upper

Nubia as *Kash* (the Biblical *Kush*) which corresponds to the classical Ethiopia. From the earliest times there existed relations of trade, conquest, and cultural influence between Egypt and its southern neighbour, and under the Middle Empire the Egyptian penetration of what is now Dongola province led to the development of a special local civilisation based on the culture of Egypt, but deeply affected by local forms, materials and customs. Under the New Empire Wawat and *Kash* were governed by Egyptian viceroys, and Napata (Djebel Barkal) became an important centre of the cult of Amon-Ra. Later Napata was the capital of an independent Ethiopian kingdom which, in its turn, conquered Egypt, and five kings of Napata sat on the throne of the Pharaohs (the 25th dynasty, B. C. 730–663). Subsequently the centre of gravity shifted southwards and Meroë, about 130 miles north of *Khartūm*, was the capital of a kingdom which still preserved the elements of a civilisation based on that of Egypt, though the isolation of the country, which was now almost complete, led to a rapid decline. In circumstances of which we have no detailed knowledge, the character of the population was modified owing to the pressure of negroid elements from Kordofan and the *Djazira*, and cultural contact with the north diminished to such an extent that to the Hellenistic-Roman world Ethiopia was but vaguely known, as indeed was the case of medieval Nubia in its relation to the Muslim world. Byzantine missionaries, however, introduced Christianity in the sixth century, at which period the two kingdoms of *Mukarra* and 'Alwa were already in existence: the *Maccurritae*, we are told by the chronicler, became Christians in 569 and the *Alo-daeans* in 580, and an embassy of the *Maccurritae* visited Constantinople in 573.

The name Nubian appears for the first time in the Hellenistic-Roman age and the earliest occurrence seems to be in Eratosthenes (quoted by Strabo, xvii.) who speaks of the *Noubai* as "a great race living in Lybia on the left side of the course of the Nile extending from Meroë to the bends of the river". In this passage, as well as in other references in Greek and Latin writers, Nubians are clearly distinguished from Lybians, Ethiopians, and other Meroitic folk, and as late as ca. 550 A. D. a kinglet of Lower Nubia speaks of himself as βασιλίσκος Νουβιδων και θλων των Αιθιοπων. It is not until the Muslim period that Nubia is found to have replaced Ethiopia as the name for the whole of the riverain country to the south of Egypt.

Of the events which brought about this change of name (no doubt signifying a change in language and in the ethnical character of the people) there is no historical record. From the linguistic evidence it is probable enough that the name originally belongs to the negroids of Kordofan, and that the *Noubai* (*Noubades*, *Nobatae*) of the classical writers were immigrants from the southwest who, as a result of political ascendancy, imposed their language on the Ethiopians of the Nile valley. The fact, however, cannot be disregarded that the modern Hill Nuba are strikingly dissimilar in physical character and culture to the mainly Hamitic *Barābra*-*Danāgla*, and on this ground the possibility of a racial connexion of the two groups has been challenged by C. G. Seligman and H. A. MacMichael (see esp. MacMichael, *History*, i.

14 sq.). Yet it is certain that the separation of the dialects must have taken place at a comparatively early date (before Christianity); the presence of "Nubian" speech in Kordofan can therefore not be explained as the result of *Danāgla* settlement in recent times. For a discussion of this vexed question see Ernst Zyhlarz, *Zur Stellung des Darfur-Nubischen*, in *WZKM*, vol. xxxv; and S. Hillelson, *Nubian Origins*, in *Sudan Notes and Records*, vol. xiii. (1930). What can be said with certainty is that the Arab conquerors of Egypt found on their southern frontier a population mainly Hamitic in the north, but containing negroid elements which increased in importance in the south. These people were Jacobite Christians, and they used Nubian as the language of government and letters.

Yāqūt quotes two sayings ascribed to the prophet in which Nubians are praised as faithful friends and useful slaves, but there can hardly have been any contact between Arabs and Nubians before the two invasions (A. D. 641–642 and 651–652) the second of which carried the Arabs as far as Dongola [q. v.]. As a result of these raids the relations between Muslims and Nubians were regulated by a treaty which ordained a system of mutual tolerance and non-interference; the tribute of slaves (*baḳṭ* [q. v.] from *πάκτοι*) which the Nubians undertook to pay annually was not so much a sign of submission as the basis for an exchange of commodities. Intercourse between the two countries, whether commercial or political, remained very restricted, and the interests of the Arabs to the south of Egypt were in the main confined to the exploitation of the mines of al-'Allāḳī, which affected the *Beḳja* rather than the Nubians. An invasion of Upper Egypt, said to have been undertaken by the Nubian king Kyriakos in A. D. 737 (or between 744 and 750) is recorded only on the doubtful evidence of Christian writers and ignored by Muslim historians. Minor raids occurred from time to time, and the "tribute" was occasionally withheld, but on the whole relations were peaceful. Muslims began to penetrate into Nubia at an early date, presumably for purposes of trade, and as early as the tenth century they are said to have had a special lodging-place (*rabaḳ*) in the capital of 'Alwa. According to a Syrian writer (quoted by Mez, *Renaissance des Islams*, p. 32), Nubians resident in the lands of the caliphate remitted taxes to their own king and enjoyed the privilege of an autonomous jurisdiction. Further evidence of friendly relations is found in an account of an embassy to Baghdād in the time of al-Mutawakkil when a Nubian prince was honourably entertained.

Of internal conditions in Nubia we know very little; there are no native sources of information and Muslim accounts throw light only on special periods and occasional contacts. The fullest descriptive accounts, both dating from the tenth century A. D., are those of Mas'ūdi (ii. 362; iii. 31–34, 39–43) and Ibn Salīm (Sulaim?) who wrote an account of "Nubia, *Mukarra*, 'Alwa, the *Budja*, and the Nile", of which extensive fragments are extant in the *Khīṭaṭ* of Maḳrīzī (ed. Wiet, vol. iii., ch. xxx. sqq.).

During the reign of Saladin Nubian affairs come into some prominence owing to the support given by the semi-Nubian Banū Kanz (on whom see below) to a Fāṭimid pretender, and Lower Nubia was

invaded by Saladin's brother Tūrān-Shāh (1172—1173) who pillaged Ibrim and took many captives, but reported unfavourably on the resources of the country with the result that a planned annexation was not proceeded with. Soon afterwards (about 1208), the Armenian Abū Šālih composed his account of the Churches and Monasteries of Egypt (ed. and translated by B. T. A. Evetts and A. J. Butler, Oxford 1895) which contains some interesting details about Maris, Muḡarra, and 'Alwa, but must be used with caution owing to the confusion in the writer's mind between Nubia and Abyssinia and his uncritical use of older authorities.

The factors which brought about the disintegration of the Nubian kingdom and the islāmisation of the country were the immigration of Arab tribes, the rise of the Banū Kanz, and the intervention in Nubian affairs of the Mamlūk rulers of Egypt, especially during the reigns of al-Ẓāhir Baibars [q. v.] and al-Manṣūr Ḳalā'ūn [q. v.].

The Banū Kanz are first heard of in 1020 when the Fātimid caliph al-Ḥākim, as a reward for services rendered, conferred the hereditary title of *Kanz al-Dawla* on Abū Makārim Hibat-Allāh, a chief of the Rabi'a Arabs who had settled on the borderland between Egypt and the Sūdān. Already in the tenth century the Rabi'a had gained control of the mines of al-'Allāḳi and imposed their rule on the Bedja with whom they allied themselves by intermarriage. Another section, settled near Aswān, fraternized with the local Nubians, and the tribe, formed by this amalgamation and ruled by the Kanz al-Dawla dynasty, came to be known as the Banū Kanz; they are represented by the Kenūz of the present day. During the reign of the Mamlūks they were virtually in independent control of Upper Egypt, alternately in alliance with or in revolt against the Mamlūk government, and though repressed at times with a heavy hand, they remained a powerful tribe until the Ottoman conquest of Egypt. Before this event, however, they had played their part, together with nomad Arabs and Mamlūk troops, in the destruction of Nubian independence.

The Bahrite Mamlūks, for reasons not apparent in our sources, departed from the traditional policy of Muslim Egypt, and actively intervened in Nubian affairs. The pretext for the expeditions undertaken by the generals of Baibars and Ḳalā'ūn were non-payment of the tribute and, more frequently, the championship of Nubian pretenders who had solicited Egyptian support in order to gain the throne. On several occasions such protégés of the Mamlūk government were installed in Dongola only to lose the throne again as soon as the Egyptian troops withdrew [see the article DONGOLA]. A formal treaty concluded with one of these kings virtually established an Egyptian protectorate. Meanwhile the disintegration of the kingdom went on under the pressure of Arab immigration, and Arab chiefs who married into the royal house took advantage of the matrilinear line of succession to grasp at the throne. The age-long Christianity of Nubia was gradually undermined and in the ninth century Muslim kings begin to appear: the first king to bear a Muslim name was 'Abd Allāh b. Sanbū who was installed in 1316 and after a short reign lost the throne to a Kanz al-Dawla. From the *Kitāb al-Ta'rif* of Aḥmad b. Yaḥyā b. Faḍl Allāh, written some time between 1340 and 1349, we learn that at this date Christian kings

still alternated with Muslims, and Ibn Baṭṭūta in 1352 (iv. 396) speaks of the Nubians as Christians, but mentions a Muslim king (Ibn Kanz al-Din). Of the conversion of the common people we have no details; no doubt it was brought about by the absorption of the native inhabitants, or those who survived, in the Arab tribes.

The immigration itself has left little trace in the pages of the historians, though the outlines of the process can be reconstructed from occasional references and from oral tradition. The nomads who had entered Egypt in the wake of the first conquest can never have found that country congenial to their mode of life, and the rise of non-Arab dynasties tended to make conditions still less attractive, while the Sūdān seemed to offer all the advantages, from the nomads' point of view, that Egypt denied. For a long time the kingdom of Dongola formed an effective barrier to southward expansion, but a gradual infiltration of Arabs must have begun at a comparatively early date, even though the end of the process was not accomplished for several centuries.

The early stages of the movement are seen in the conditions depicted in the story of Abū 'Abd al-Raḥmān al-'Umari, the events of which are laid in the reign of Ibn Ṭulūn (Maḡrīzi's *Kitāb al-Muḡaffā*, quoted by Quatremère, ii. 59–80). Arabs of Rabi'a and Djuhaina, led into the Sūdān by that adventurous prince, have fraternized with the Bedja and exploit the mines of the Eastern Desert, but the Nile is forbidden them and Nubia is too strong to be attempted by force of arms. A fratricidal struggle in the Nubian royal house provides an opportunity for an alliance between the Arabs and a princely pretender to the throne. Acts of unblushing treachery are committed on both sides and in the end the Arabs have the worst of the encounter. The end of the process is seen in the fourteenth century. "The kingdom of Nubia had now to all intents and purposes ceased to exist and such kings as reigned in name were puppets of the Arab tribes. . . . It is from this period, the early years of the fourteenth century, that the immigration of most of the camel-owning nomads of the Sūdān dates. Generally speaking, it seems, the Djuhaina and their allies, most of whom we may be sure were Fezāra, loosed their hordes southwards and westwards, leaving the Bani Kanz and Ikrima in northern Nubia and Upper Egypt" (MacMichael, *loc. cit.*, p. 187).

Of 'Alwa nothing is heard at this period, but no doubt the course of events was similar to that in the northern kingdom, and already in the time of Ibn Ḳaldūn (1332–1406) we hear of branches of Djuhaina "close to the Abyssinians", that is to say no doubt on the upper reaches of the Blue Nile in the southern Djaḡira. The kingdom of 'Alwa nevertheless lingered on precariously and Nubian Christianity was still a living memory in the time of the Portuguese Alvarez (1520–1527), but about the year 1500 Sōba fell to an alliance of Ḳawāsma Arabs (a branch of Rufā'a-Djuhaina) and the negroid Fundj [q. v.] who here for the first time appear in history.

The fifteenth century is almost completely barren of records relating to Nubia, and the historical memory of the present inhabitants remembers little of pre-Fundj days. With the coming of the Fundj, who soon extended their influence to Dongola, the history of Nubia is merged in that of the

Sūdān, and the Nubians, now Muslims and deeply affected by racial mixture with their conquerors, survive only as a linguistic minority on the northern fringe of their ancient kingdom.

Lower Nubia, however, was politically separated from the Fundj kingdom by Selim I who annexed the country south of Aswān as far as the neighbourhood of the Third Cataract, and garrisoned it with Turkish and Bosnian mercenaries (called Ghuzz by the people of the Sūdān). From these, many of the modern Barābra claim to be descended.

The Barābra-Danāgla of the present day (in the Egyptian province of Aswān and the Sūdān provinces of Halfa and Dongola) are a peaceful race of cultivators and skilful boatmen of the Nile. Owing to the poverty of their country and aided by an enterprising disposition, large numbers seek their livelihood in Egypt and the Sūdān where they are found everywhere engaged in various forms of menial employment. The Danāgla have also spread all over the Sūdān as traders, and in the nineteenth century they played an important part, together with their rivals, the Dja'liyin, in the opening-up of the Upper Nile and the Bahr al-Ghazāl where they adventured as slave-traders, sailors, and mercenary troops.

The men are generally bilingual in Nubian and Arabic which latter they speak ungrammatically and with an accent of their own. Those in foreign employment show themselves remarkably adaptable to alien ideas, at the same time they are tenacious of their own customs and clannish to a degree. Under modern conditions they are keen to take advantage of educational facilities, and show an aptitude for the educated professions. In the past they have made no important contribution to the intellectual and spiritual life of Islām and produced no scholars of note. *Dhu 'l-Nūn* the mystic [q. v.] is said to have been of Nubian origin, but he is generally called "the Egyptian". The most remarkable figure of their race is Muḥammad Aḥmad [q. v.], the Mahdi of the Sūdān (died 1885), who was a Dongolāwī, though his family claim to be sharifs. The Barābra and Danāgla are generally devout Muslims, and most of them belong to the Mirghaniya (*Khatmiya*) *ṭariqa*.

NŪBANDADJĀN. [See *SHULISTĀN.*]

NŪBĀR PASHA (1825-1899), an Egyptian statesman, who played a most prominent part in Egyptian politics in the sixteenth century. Summoned by his uncle Boghos Bey, the Minister of Foreign Affairs and of Commerce under Muḥammad 'Alī, he came to Egypt in 1842 at the age of 17 and entered the government service as second secretary to the Viceroy. In 1848 he accompanied Ibrāhīm Pasha to Europe as secretary and interpreter. Under Sa'īd, Nūbār began to play a part in public life. His independent spirit, his methodical and precise mind were revealed in the organisation of the Egyptian railways which he put in order in the space of six months (1857).

But it was under Ismā'īl that he fully revealed his gifts as a negotiator and diplomatist. He was however not called upon to play a national part because of his Armenian origin and his ignorance of the language of the country. Raised to the rank of Pasha at the beginning of the reign (1863) he hastened to take advantage of the support and advanced views of the Viceroy to carry through a great scheme: to encourage externally the independence of Egypt and its development not in Asia — this was Ibrāhīm's idea — but in Africa where her destinies summoned her, and at home the regeneration of Egypt with the help of Europe. From the first Nūbār Pasha grasped the great truths of the Egyptian question. But if the conception was grandiose, the execution of the scheme proved difficult on account of the confusion of interests and the European jealousies. These inherent difficulties in the Egyptian problem proved impediments to many solutions and the policy of reform frequently had to twist its way round obstacles of all kinds.

On the smallest matters Egypt had to wage an unequal struggle with Europe. Nūbār conducted the struggle on three fronts at the same time, on three fundamental questions.

The question of the Suez Canal. On Ismā'īl's accession the Company formed a state within the state and constituted in the very heart of Egypt a kind of colony, as a result of the lands it had obtained along the sea canal and the fresh water canals which were linked up with it. Nūbār conducted negotiations in Constantinople and in Paris with the object of securing the territorial sovereignty of Egypt. His activity ended in the famous decision of the Emperor Napoleon III on July 6, 1864, who ordered Egypt to pay the Company 84,000,000 francs to regain her rights. This enormous indemnity was nevertheless far from bringing about a final settlement.

The question of judicial reforms. Nubār used often to say: "Give Egypt water and justice and the country will be happy and prosperous". But in order to place justice on a sound footing so that it could protect the native against the government and the European who was exploiting him and particularly against the arbitrary decisions of the consuls, each of whom laid down his own law to the governed and governors alike, Nubār thought of organising a mixed system of justice composed of Egyptian and European elements and thus establishing uniformity of jurisdiction, legislation and executive action. As a result of the systematic opposition of France and of certain powers interested in maintaining the "privileges", the mixed tribunals were not established till 1875 after ten years of striving and of waiting endured by the government.

The question of autonomy. The territorial servitudes inflicted by the Suez Canal and the system of capitulations did not prevent Nubār from remembering the political restrictions imposed by Turkey, the suzerain power. From 1863 to 1873 Nubār endeavoured to extract from Constantinople by negotiation and bribery privileges which would enable the work of progress to develop freely. After the firmans of 1866 and 1867, Egypt obtained the famous firman of 1873 which constituted a new charter conferring on the viceroy the title of Khedive [q. v.], hereditary succession to the throne in direct line from father to son, an increase in the army — limited to 18,000 in 1840 — and lastly the right to conclude loans and commercial treaties with the Powers.

But the error made by Nubār and the Khedive was to consolidate Egyptian independence in theory but not in practice. Nubār was anxious for the introduction of capital and European enterprise: a beneficial idea but also dangerous because the Khedive, encouraged by his minister, became involved without due consideration in a disastrous series of loans. The various enterprises which arose with the rapid development of the resources of the country had to be put in the hands of companies like the Steam Navigation Company, the Sudan Company, the Agricultural and the Trading Companies, in which Nubār, Oppenheim, Dervieu and others were the chief directors. The failures of the companies were liquidated by Egypt which made good all losses. The collaboration of Nubār with these financiers brought an atmosphere of suspicion into the good understanding between the minister and the Khedive, as did the negotiations conducted by him to conclude loans in Paris and elsewhere.

But the tragic side of the question lay in the accumulation of a debt of £90,000,000 which opened the gates of the Delta to foreign control. There is no doubt that Nubār had always resolutely opposed any foreign interference. Down to 1875, during the little time that he was actually in Egypt — he was often on missions to Europe — Nubār endeavoured to act as a check on absolute rule and to oppose all European interference from wherever it came. He was not popular either in England or France. He was rightly distrusted in the entourage of the Khedive also.

Towards the end of 1875 an event took place which modified his attitude. England having taken the unusual step of intervening in Egypt to defend the private interests of some of her capitalists and

sending a mission under Mr. Cave to conduct an enquiry in the country, Nubār, with his remarkable political instinct, felt the immediate danger of such interference and resolved to oppose it by all means. He was able to provoke the intervention of the consuls-general of Russia and Germany, who offered the Khedive the support of their governments. Ismā'il declined this offer, which was a grave political error. He went further and communicated with the English consul and did not scruple to sacrifice his minister.

Nubār had to hand in his resignation on Jan. 5, 1876 and to leave Egypt on March 21. Henceforth he swore a bitter feud against his master and his attitude gradually changed and inclined to England. In deciding to undermine the personal authority of the ruler, and allying himself with the foreigner, without being able to fix in advance how far the alliance was to go, in a word in wishing to humble his sovereign, Nubār weakened his country for the benefit of England. For it was to the government of England that he appealed in 1876 to intervene, acting on the pretext that intervention was here inevitable as a result of the enormous debts contracted by Egypt and that England's action would be of more benefit to Egypt than that of any other power. The result was that England finally imposed on the Khedive both Nubār and her complete control by extorting from him the rescript of Aug. 28, 1878 which established a "responsible ministry" presided over nominally by Nubār but in effect by Rivers Wilson as Minister of Finance and de Blignières as Minister of Public Works. This dangerous innovation — the formation of a European ministry not responsible to the Khedive whose authority was now negligible, and installed in the heart of the country to support European policy and high finance — aroused the Egyptians from their lethargy and created general discontent. The Khedive became at once popular and his cause was identified with that of the nation. The result was the outbreak of Feb. 18, 1879 which removed Nubār from power. A new European ministry presided over by the crown prince was formed but the evil remained. Finally Ismā'il, emboldened by public opinion, dismissed the European ministers (April 7) and formed a national ministry under Sharif Pasha. But the Powers — and Nubār's doings in Europe were not without influence on their decision — decided on the ruin of the Khedive and succeeded with the help of Turkey in deposing him (June 26).

Two years after the English occupation, Nubār returned to Egypt to form a ministry after the resignation of Sharif Pasha as a protest against the evacuation of the Sūdān by Egypt, dictated by England. Nubār endeavoured in vain to come to terms with England and to put a check on her policy of practically depriving Egypt of her territory in Africa (Jan. 1884—June 1888).

He again formed a ministry (April 16, 1894) but he soon had to submit to the control of the English councillor in the Ministry of the Interior, and seeing himself powerless against Lord Cromer's policy which aimed at controlling the whole of the administration he had quickly to retire from the scene (Nov. 1895).

Nubār then went to Europe to compile his memoirs — still unpublished — and peacefully await his end. He was, to sum up, a great minister, a statesman who made mistakes, it is true, but

the fates were against him: 1875 marks the final blocking of his great policy. We must not however forget the early struggles in which he extorted from Europe and from Turkey piece by piece rights and privileges which constituted a great boon to his country.

NUBUWWA. [See NABI.]

NŪḤ, the Noah of the Bible, is a particularly popular figure in the Qur'an and in Muslim legend. Tha'labi gives 15 virtues by which Nūḥ is distinguished among the prophets. The Bible does not regard Noah as a prophet. In the Qur'an Nūḥ is the first prophet of punishment, who is followed by Hūd, Šāliḥ, Iṭṭ, Šu'aib and Mūsā. Ibrāhīm is one of his following (*Šif'a*) (Sūra xxxvii. 81). He is the perspicuous admonisher (*nadhīr muḥim*, xi. 27; lxxi. 2), the *rasūl amīn* "the true messenger of God" (xxvi. 107), the '*abd šakūr*', "the grateful servant of God" (xvii. 3). Allāh enters into a covenant with Nūḥ just as with Muḥammad, Ibrāhīm, Mūsā and 'Isā (xxxiii. 7). Peace and blessings are promised him (xi. 50). Muḥammad is fond of seeing himself reflected in the earlier prophets. In the case of Nūḥ, the Muslim Qur'an exegetes have already noticed this (see Grünbaum, *Neue Beiträge*, p. 90). Muḥammad puts into the mouth of Nūḥ things that he would himself like to say and into the mouths of his opponents what he himself has heard from his. Nūḥ is reproached with being only one of the people (x. 72—74). God should rather have sent an angel (xxiii. 24). Nūḥ is wrong (vii. 58), is lying, deceiving (vii. 62), is possessed by *djinn* (liv. 9), only the lowest join him (xi. 29; xxvi. 111). When Nūḥ replies: "it is grievous to you that I live among you, I seek no reward, my reward is with Allāh (x. 72—74; xi. 31); I do not claim to possess Allāh's treasures, to know his secrets, to be an angel and I cannot say to those whom ye despise, God shall not give you any good" (xi. 31—33), we have here an echo of Muḥammad's defence and embarrassment about many of his followers. Muḥammad pictures events as follows: Allāh sends Nūḥ to the sinful people. Sūra lxxi. which bears his name, gives one of these sermons threatening punishment for which other analogies can be found. The people scorn him. Allāh commands him to build an ark by divine inspiration. Then the "chaldron boils" (xi. 42; xxiii. 27). The waters drown everything; only two of every kind of living creature are saved and the believers whom Nūḥ takes into the ark with him. But there were very few who believed. Nūḥ appeals even to his son in vain; the latter takes refuge on a mountain but is drowned. When Nūḥ bids the waters be still, the ark lands on mount *Djūdī* (q. v.; xi. 27—51). Not only Noah's son but also his wife (with Lūt's wife) are sinners (lxvi. 10). From the *Haggada* is developed, as Geiger shows, the following elements of this Qur'anic legend of Nūḥ: 1. Nūḥ appears as a prophet and admonisher; 2. his people laugh at the ark; 3. his family is punished with hot water (main passages:

Talm. Sanhedrin, 108^{ab}; *Gen. Rabba*, xxix.—xxxvi.).

The post-Qur'anic legend of Nūḥ as in other cases fills up the gaps, gives the names of those not mentioned in the Qur'an, makes many links e. g. connects Nūḥ with Feridūn of the Persian epic although it is pointed out that the Magi (Persians) do not know the story of the flood. Nūḥ's wife is called Waliya and her sin is that she described Nūḥ to his people as *maḍjūn*. The names of Nūḥ's sons, Sām, Hām, Yāfiṭh are known to Qur'an exegesis from the Bible but it also gives the name of Nūḥ's sinful son who perished in the flood: Kana'an, "whom the Arabs call Yām". Muḥammad's statement that Nūḥ was 950 years of age at the time of the flood (*ṭūf'ān*) (xxix. 13, 14) is probably based on Gen. ix. 39 which says Nūḥ lived 950 years in all, but on the other hand, it serves as a basis for calculations which make Nūḥ the first *mu'ammār*; according to the *Kitāb al-Mu'ammārīn* of Abū Ḥatīm al-Sidjīstānī (ed. Goldziher, p. 1), who begins his book with Nūḥ, he lived 1,450 years. Yet in his dying hour he describes his life as a house with two doors in which one goes in through one to the other. Muslim legend knows the Biblical story of Nūḥ, his times and his sons, but embellishes it greatly and in al-Kisā'ī it becomes a romance. From the union of Kābil's and Sheth's descendants arises a sinful people which rejects Nūḥ's warnings. He therefore at God's command builds the ark from trees which he has himself planted. As he is hammering and building the people mock him: "once a prophet, now a carpenter?", "a ship for the mainland?". The ark had a head and tail like a cock, a body like a bird (Tha'labi). How was the ark built? At the wish of the apostles, Jesus arouses Sām (or Hām) b. Nūḥ from the dead and he describes the ark and its arrangements: in the lower storey were the quadrupeds, in the next the human beings and in the top the birds. Nūḥ brought the ant into the ark first and the ass last, it was slow because Iblīs was clinging to his tail. Nūḥ called out impatiently: "come in even if Satan is with thee"; so Iblīs also had to be taken in. The pig arose out of the tail of the elephant and the cat from the lion. How could the goat exist alongside of the wolf, or the dove beside the birds of prey? God tamed their instincts. The number of human beings in the ark varies in legend between seven and eighty. 'Udj b. 'Anāk was also saved along with the believers. Kābil's race was drowned. Nūḥ also took Adam's body with him which was used to separate the women from the men. For in the ark continence was ordered, for man and beast. Only Hām transgressed and for this was punished with a black skin. The whole world was covered with water and only the Harām (in al-Kisā'ī, also the site of the sanctuary in Jerusalem) was spared; the Ka'ba was taken up into heaven and Djibril concealed the Black Stone (according to al-Kisā'ī the stone was snow white until the Flood). Nūḥ sent out the raven but finding some carrion it forgot Nūḥ; then he sent the dove which brought back an olive leaf in its bill and mud on its feet; as a reward it was given its collar and became a domestic bird. On the day of 'Āshūrā' every one came out of the ark, men and beasts fasted and gave thanks to Allāh.

There are many contacts with the *Haggada*: the

(different, it is true) partitioning of the ark, Nūh's anxiety about the animals, Hām's sin and punishment (*Sanhedrin*, 108a b). The story that the giant 'Ūg escaped the Flood is also taken from the *Haggada* [see 'Uḏ B. 'ANAK]. But Muslim legend goes farther than the Bible and Haggada, like Muḥammad who sees himself in Nūh.

(BERNHARD HELLER)

NÜH, the name of two Sāmānids. 1. ABŪ MUḤAMMAD NÜH I b. NAṢR b. AḤMAD, called al-Amīr al-Hamīd, succeeded his father [see NAṢR]; but the real ruler was the pious theologian Abū 'l-Faḍl Muḥammad b. Aḥmad al-Sulamī. The latter long refused to take the title of "wazīr" but finally succumbed to Nūh's pressing representations, and took much less interest in the business of government than in his devotional exercises and theological studies which earned him the name of "al-Hākim al-Shahīd". There were also by this time unmistakable symptoms of decline. In 332 (943–944) 'Abd Allāh b. al-Ashkām rebelled in Khwārizm and Nūh set out with an army from Bukhārā towards Merw. But when 'Abd Allāh placed himself under the protection of the ruler of the Turks, whose son was a prisoner in Bukhārā, peace was restored by the release of the Turkish prince and the surrender of 'Abd Allāh who was pardoned by Nūh. Much more trouble was caused to the Sāmānid dynasty by the rebel governor of Khurāsān, Abū 'Alī b. Muḥtāj. Shortly after his accession Nūh had sent him with an army against al-Rayī to take this town from the Būyid Rukn al-Dawla. A section of his troops deserted him on the way however and when he encountered Rukn al-Dawla three farsakhs from al-Rayī the majority of his Kurd troops went over to the enemy. Abū 'Alī was defeated and had to return to Naisābūr. In Djumādā II 333 (January–February 945), he again advanced against Rayī by order of Nūh; on this occasion Rukn al-Dawla did not meet him but took to flight, and in Ramaḍān (April–May) Abū 'Alī took the town and the surrounding country. In the meanwhile his enemies in Khurāsān took advantage of his absence to libel him to Nūh, whereupon the latter replaced him by Ibrāhīm b. Sīmdjūr; but Abū 'Alī was not inclined to let this happen and on account of financial difficulties the government could not enforce its orders. As the troops were not paid regularly they blamed the vizier and said he was in collusion with Abū 'Alī. In the end the discontent increased to such a degree that Nūh was unable to protect the vizier and in Djumādā I 335 (Nov.–Dec. 946) he was put to death. As early as

Ramaḍān 334 (April–May 946) Abū 'Alī had summoned Nūh's uncle Ibrāhīm b. Aḥmad from al-Mawṣil and when Abū 'Alī approached Merw, the government troops went over to him, while Nūh fled to Bukhārā. In Djumādā I 335 (Nov.–Dec. 946) Abū 'Alī entered Merw and in the following month Bukhārā, where the people paid homage to Ibrāhīm as their ruler, after Nūh had fled to Samarḳand. But Abū 'Alī did not remain long in Bukhārā. Under pretext of going to Samarḳand, he left the town and made his way to Ṣaghāniyān; which he entered in Sha'bān (Feb.–March, 947). After Ibrāhīm, who with a brother of Nūh's, Abū Dja'far Muḥammad, had remained in Bukhārā, had begun negotiations with Nūh or, according to another story, had been defeated in open battle by him, Nūh entered Bukhārā in Ramaḍān of the same year (March–April 947) where he put to death one of the leading personalities, the chamberlain Toḡhān, and blinded Ibrāhīm along with two of his own brothers, Abū Dja'far Muḥammad and Abū Muḥammad Aḥmad. But the details are variously given; cf. Ibn al-Aṭhīr, *al-Kāmil*, viii. 348, where it is said after a very full description of events based on the Khurāsān historians: "The 'Irākīs give a different version", followed by a brief account of the same events from the 'Irākī point of view; cf. also Barthold, *Turkestan*, p. 247.

Manṣūr I b. Qarategin was then appointed governor of Khurāsān and sent with an army against Merw, where a follower of Abū 'Alī named Abū Aḥmad Muḥammad b. 'Alī al-Qazwīnī was in control. The latter submitted on Manṣūr's approach and was brought to Bukhārā. Here Nūh at first received him kindly but when he discovered that he could not rely on al-Qazwīnī he had him put to death. Peace between the government and the ambitious Abū 'Alī did not last long. When the latter learned that Nūh was preparing for war he left Ṣaghāniyān and went to Balkh; he then advanced against Bukhārā once again. A battle was fought at Khardjang in Djumādā I 336 (Nov.–Dec. 947); Abū 'Alī was defeated and returned to Ṣaghāniyān. After some time a rumour spread that Nūh intended to attack him once more, whereupon Abū 'Alī again mobilized his followers. Balkh and Tokhārīstān fell into his hands; in Rabi' I 337 (Sept.–Oct. 948) however, he came into conflict with the government troops and suffered a defeat. The latter sacked Ṣaghāniyān but when they were cut off from communication with Bukhārā, Nūh had to open negotiations for peace and in Djumādā II of the same year (Dec. 948–Jan. 949) peace was made. The Oriental sources give no details of the terms of the treaty; at any rate, Abū 'Alī's son Abū 'l-Muza'far 'Abd Allāh was sent to Bukhārā as a hostage and there received with great distinction while Abū 'Alī remained in Ṣaghāniyān. Since Manṣūr b. Qarategin could not maintain discipline among the troops in Khurāsān he repeatedly asked Nūh to relieve him of his office. The latter therefore promised Abū 'Alī to restore him to his old post and when Manṣūr died in Rabi' I 340 (Aug.–Sept. 951) Abū 'Alī was appointed his successor. In Ramaḍān (Jan.–Feb. 952) he left Ṣaghāniyān, the administration of which he gave to his son Abū Manṣūr Naṣr b. Aḥmad, then went to Merw and arrived at Naisābūr in Dhu 'l-Hijja (April–May 952). He restored order in Khurāsān, but when by Nūh's orders he attacked the Būyid Rukn

al-Dawla and his achievements did not come up to expectations, he was dismissed and Abū Saʿīd Bakr b. Mālīk al-Farḡānī appointed his successor, whereupon Abū ʿAlī sought refuge with Rukn al-Dawla. On Nūḥ's dealings with the Būyids see the article WAṢḤMĠŪR B. ZIYĀR. Nūḥ died in Rabiʿ II 343 (Aug. 954), and his son ʿAbd al-Malik succeeded him.

SĀMĀNIDS.

2. NŪḤ II B. MAṆṢŪR B. NŪḤ, called al-Manṣūr or al-Raḍī, ascended the throne at the age of 13 after the death of his father in Shawwāl 366 (June 977). The government was at first in the hands of his mother and the able vizier Abū ʿl-Ḥusain ʿAbd Allāh b. Aḥmad al-ʿUtbi, who assumed office in Rabiʿ II 367 (Nov.—Dec. 977). In 371 (981—982) the powerful Sipahsālār in Khurāsān Abū ʿl-Ḥasan Muḥammad b. Ibrāhīm b. Simḍjūr, who according to Ibn al-Aṭṭār's description of him "only obeyed when he pleased" (*lā yuṭī illā fī-mā yurīd*), was dismissed and Ḥusām al-Dawla Abū ʿl-ʿAbbās Tāsh, a devoted servant of the vizier, put in his place. But the rule of the vizier did not last long; the Sāmānid armies were defeated by the Būyids and the vizier himself murdered at the instigation of Ibn Simḍjūr. When Tāsh went to Bukhārā in order to restore order there, Ibn Simḍjūr joined forces with the former Mamlūk Fāʾik, who had taken part in the war against the Būyids and offered him his assistance in the conquest of Khurāsān; they then met in Naisābūr and seized the country around it. When Tāsh heard of this he went to Merw and entered into negotiations with the two allies with the result that it was agreed that Tāsh should retain the supreme command along with Naisābūr while Fāʾik was to get Balkh and Ibn Simḍjūr's son Abū ʿAlī was to receive Herāt. After some time, in 373 (983—984) or 376 (986), ʿAbd Allāh b. Muḥammad b. ʿUzair was appointed vizier. The latter was hostile to the ʿUtbi family and at once dismissed Tāsh and restored Ibn Simḍjūr to the supreme command in Khurāsān. Some officers indeed appealed for Tāsh but their representations were of no avail with the vizier, who was supported by Nūḥ's mother. Equally unsuccessful were the efforts of the former Sipahsālār to enforce his claims by force of arms against Ibn Simḍjūr and Fāʾik, although he was supported by the two Būyids, Fakhr al-Dawla and Sharaf al-Dawla b. ʿAḍud al-Dawla. Tāsh was defeated and fled to Djurdjān where he died in 377 (987—988) of the plague or, according to another statement, of poison. In Dhū ʿl-Hijja 378 (March 990) Ibn Simḍjūr also died and was succeeded by his son Abū ʿAlī, who was jealous of Fāʾik and wished to get him out of the way. When he resorted to arms Fāʾik could not resist him but fled to Merwarrūdḥ. Abū ʿAlī then was recognised as governor of all

the provinces south of the Amū-Daryā and soon made himself independent of the central government in Bukhārā while Fāʾik took possession of Balkh. The amīr Abū ʿl-Ḥārith Muḥammad b. Aḥmad b. Farīḡhūn, whom Nūḥ sent against him, was defeated and joined Fāʾik against the lord of Ṣaghāniyān, Tāhir b. Faḍl. The latter could not resist the combined forces of the allies; he himself was slain and his army scattered. In addition, there was the intervention of foreign rulers in the domestic affairs of the kingdom. Abū ʿAlī turned to the Qarakhānid Bughrā-Khān and arranged with him for a partition of the Sāmānid kingdom by which Bughrā-Khān was to have Transoxania and Abū ʿAlī Khurāsān. As a result Bughrā-Khān appeared in Bukhārā in Rabiʿ I 382 (May 992) but soon withdrew and died on the way back to Turkestan [cf. the article BUGHRA-KHĀN]. After Nūḥ, who had had to evacuate his capital, had returned, Fāʾik again appeared on the scene. On the approach of Bughrā-Khān he had been sent against him, but, as we are told, presumably correctly, deliberately allowed himself to be defeated, whereupon he submitted and was rewarded by Bughrā-Khān with the governorship of Tirmidh and Balkh. After the return of Nūḥ he made an alliance with Abū ʿAlī whereupon the helpless Sāmānid decided to appeal for help to the Ghaznawid Sabuktegin [cf. the article SĀMĀNIDS]. After a time Abū ʿAlī and Fāʾik, who had taken refuge with the Būyid Fakhr al-Dawla in Djurdjān, wished to return to Khurāsān (386 = 995). At first they had some success but when they encountered Sabuktegin near Tūs, they suffered a decisive defeat and fled to Āmul. They then sent messengers to Bukhārā to appeal for pardon. The authorities turned a deaf ear to Fāʾik's appeal but declared themselves ready to restore Abū ʿAlī to favour. Fāʾik therefore fled to the Qarakhānids, while Abū ʿAlī after many vicissitudes finally made his peace with the authorities in Bukhārā through the intervention of the amīr Abū ʿl-ʿAbbās Maʾmūn b. Muḥammad in Gurgāndj. He was at first received very kindly but later thrown into prison with several of his brothers and officers. At the same time, a raid by the Qarakhānids forced Nūḥ again to appeal to Sabuktegin who was then in Balkh. The latter at once invaded Transoxania with a large army; but when he demanded that Nūḥ should join forces with him, Nūḥ refused on the advice of the vizier ʿAbd Allāh b. ʿUzair. Sabuktegin was not at all pleased and Nūḥ had not only to give in but also to hand over the vizier and Abū ʿAlī, whereupon the vizierate was given to Abū Naṣr Aḥmad b. Muḥammad b. Abi Zaid. Sabuktegin imprisoned Abū ʿAlī and Ibn ʿUzair in Gardiz. The former died in 387 (997) in prison while the vizier was afterwards released. At the conclusion of peace, Sabuktegin and the Qarakhānids agreed that the steppe of Kaṭwān should be the frontier between the Sāmānids and the Qarakhānids. Fāʾik was also recognised as governor of Samarḳand. Sabuktegin ruled as an independent sovereign in Khurāsān; in Transoxania the vizier Abū Naṣr endeavoured to restore order by force but after a few months he was murdered and Nūḥ appointed as his successor Abū ʿl-Muzaḥfar Muḥammad b. Ibrāhīm al-Barghashī. Nūḥ died in Raddjab 387 (July 997) and was succeeded by his son Abū ʿl-Ḥārith Maṅṣūr.

(K. V. ZETTERSTÉEN)

NUḤ B. MUṢṬAFĀ, an Ottoman theologian and translator, was born in Anatolia but migrated while still quite young to Cairo where he studied all branches of theology and attained a high reputation. He died there in 1070 (1659). He wrote a series of theological treatises, some of which are detailed by Brockelmann, *G.A.L.*, ii. 314. His most important work however is his free translation and edition of *Shahrasṭānī's* celebrated work on the sects, *Terdjeme-i Milāl we-Niḥāl* which he prepared at the suggestion of a prominent Cairo citizen named Yūsuf Efendi. It exists in manuscript in Berlin (cf. Pertsch, *Kat.*, p. 157 sq.), Gotha (Pertsch, *Kat.*, p. 76), London (cf. Rieu, *Cat.*, p. 35 sq.), Upsala (cf. Tornberg, *Codices*, p. 213), Vienna (cf. Flügel, *Kat.*, ii. 199) etc. and was printed in Cairo in 1263. On the considerable differences between this Turkish translation and the original Arabic cf. Rieu in the British Museum Catalogue, p. 35b. In his *Mémoire sur deux coffrets gnostiques du moyen âge, du Cabinet de M. le Duc de Blacas* (Paris 1832), p. 28 sqq., J. v. Hammer gave some extracts from the latter part of the work. He also wrote on it in the *Wiener Jahrbücher*, lxxi., p. 50 and ci. 4.

In 1150 (1741) a certain Yūsuf Efendi wrote a life of Nuḥ b. Muṣṭafā which exists in MS. in Cairo (*Cat.*, vii. 364).

(FRANZ BABINGER)

AL-NUKHAILA, a town in the 'Irāk, near al-Kūfa. It is known mainly from the accounts of the battle of Qādisiyya. From the statements collected by Yāqūt regarding its position it appears that two different places of this name had later to be distinguished, namely one near Kūfa on the road to Syria, which is several times mentioned in the time of the Caliphs 'Alī and Mu'āwiya and another, a watering station between al-Mughitha and al-'Aqaba, 3 mil from al-Hufair, to the right of the road to Mecca. Several encounters took place there during the second battle of Qādisiyya. According to al-Khalīl in al-Bakrī, this al-Nukhaila was in the Syrian steppe (al-Bādiya); Ibn al-Faḥīh also seems to be thinking of this region. Caetani assumes that the reference in both cases is to the same place on the edge of the desert. According to Musil, it perhaps corresponds to the modern Khān Ibn Nkhaila about 14 miles S. S. E. of Kerbelā and 40 miles N. N. W. of al-Kūfa.

AL-NUKRA, a plain west of the Djebel Ḥawrān on the border of Trachonitis in Transjordan. The name *al-Nukra* ("the cavity") is quite modern. It is applied to an area, which includes the two districts of al-Baḥṭaniya (with its chief town Adhri'āt) and Ḥawrān (west of the hills of the same name), i. e. the whole northern half of Transjordan. In the wider sense al-Nukra includes all the country from al-Ledjā', Djaidūr and al-Balkā' to the foot of the Djebel Ḥawrān, in the narrower sense only the southern part of this; in any case it stretches from al-Ṣanamēn to the Djebel al-Durūz (Ḥawrān). To al-Nukra belong Mu'atbin or Mu'tabin, Tubnā (now Tibne), al-Maḥadīdja, Obṭā', 'Olmā, al-Musaifira and al-Faddain already mentioned in Syriac texts of the pre-Muslim period.

NUMAIR B. 'AMIR B. ṢAṢA'A, an Arab tribe (Wüstenfeld, *Geneal. Tabellen*, F 15) inhabiting the western heights of al-Yamāma and those between this region and al-Ḥimā Dāriya: a bare and difficult country the nature of which explains the rude and savage character of the Numair. Their name like that of Namr and Anmār borne by other ethnic groups (there are also in the list of Arab tribes a number of other clans with the name Numair: among the Asad, the Tamīm, the Dju'fi, the Hamdān etc.) is no doubt connected with *nimr*, the Arabian panther; we know the deductions made by Robertson Smith from this fact and from other similar cases, to prove the existence of a system of totemism among the early Arabs (*Kinship and Marriage in early Arabia*, second ed., p. 234). His theory is now abandoned.

The geographical dictionaries of al-Bakrī and Yāqūt mention a large number of places in the land of the Numair, especially their wells, and often even record a change of ownership from one tribe to another (e. g. Yāqūt, *Mu'djam*, iii. 802: the well of Ghisl, which formerly belonged to the Tamīmī clans of the Kulaib b. Yarbū', later passed to Numair); this wealth of references does not however mean that the Numair played an important part in the history of Arabia. It is only due to the fact that the country of the Numair is typically Beduin in its scenery and lends itself to description by poets. The Numair besides were much intermixed with the neighbouring tribes (especially the Tamīm, Bāhila and Qushair) and the boundaries of their territory were rather vague.

The Numair, a poor tribe without natural wealth, have always been brigands. The part they took in the pre-Islamic wars was a very modest one and they appear very rarely alongside of the other groups of the great tribe of 'Amir b. Ṣaṣa'a (they hardly played any part in the battle of Fai al-Riḥ against the Banu 'l-Hārith b. Ka'b and their allies, *Nakẓ'id*, ed. Bevan, p. 469–472). It is to

this isolation that they owe the privilege of being known as one of the *Djamarāt al-ʿArab*, i. e. a tribe which never allied itself with others (al-Mubarrad, *Kāmil*, ed. Wright, p. 372; *Naḳāʾid*, p. 946; *Mufaḍḍaliyyāt*, ed. Lyall, p. 841; on the different tribes to which this title is given, cf. *Tādī al-Arūs*, iii. 107); the other designation of the Numair "the *Aḥmās* of the Banū ʿĀmir", also gives them a special place within the great tribe from which they sprang; it indicates that they were thought not to have the same mother as the other clans of the Banū ʿĀmir (*Mufaḍḍaliyyāt*, p. 259, 12-15 = 771, 2-4; the source is the *Djāmharā* of Ibn al-Kalbī, Brit. Mus. MSS., fol. 120^b—121^a). Neither during the life of the Prophet, nor at the beginning of the caliphate did the Numair make any stir; they appear neither as partisans nor as enemies of Islām. It is only from the Umayyad period that the name begins to appear in histories, but only to record their insubordination to the central power or their exploits as brigands; in the caliphate of ʿAbd al-Malik their refusal to pay tribute brought a punitive expedition against them (al-Balādhuri, *Futūḥ*, p. 139; cf. *Aghānī*, xvii. 112—113; xix. 120—121). Another expedition of the same kind but on a larger scale was that sent against them under the famous general of the caliph al-Mutawakkil, Bughā al-Kābir, in 232 (846) to put an end to their systematic plundering; it ended in the complete dispersal of the tribe (Ṭabarī, iii. 1357—1363); a most interesting account of Beduin customs including on p. 1361 a detailed list of the Numair clans only one of which, the Banū ʿĀmir b. Numair, devoted itself to agriculture and grazing, while the others lived only by brigandage). It appears however that the Numair soon resumed their old habits and another expedition was sent against them with the same object as the earlier ones in the ivth century A. H. by the Ḥamdānid Saif al-Dawla (Yāqūt, *Muʿdjam*, iv. 378).

An event of little importance in itself has given the Numair considerable fame in literary history, although little flattering to them: this is the satire directed against them by the poet *Djarir* which is one of the most famous examples of the invective of the *ḥidjāʾ* (especially the hemistich: "Cast down thine eyes: thou belongest to the Numair"). The occasion of it was the unfortunate intervention of the Numairi poet al-Rāʾī in favour of al-Farazdaq in the celebrated feud between him and *Djarir* (*Naḳāʾid*, p. 427—451, N^o. 53; *Aghānī*, vii. 49—50; xx. 169—171 etc.). The memory of this quarrel survived for a very long time. It was probably no accident that the man who urged the emir Bughā to the expedition against the Numair was the great-grandson of *Djarir*, the poet ʿUmāra b. ʿAḳil b. Bilāl b. *Djarir*; the Numair moreover had slain four of his uncles (Ibn Ḳutaiba, *Shiʿr*, ed. de Goeje, p. 284, where we must read B. Dinna [b. ʿAbd Allāh b. Numair] in place of B. Dabba). The enmity between the family of *Djarir* and the Numair was probably revived by the proximity of the latter to the tribe of the poet, the Banū Kulāib b. Yarbūʿ.

To the Numair belonged notable poets — in addition to al-Rāʾī and his son *Djandal* — like Abū Ḥaiya (in the early ʿAbbāsīd period) and *Djirān* al-ʿAwd whose *Diwān* was recently published (Cairo 1350 = 1931, publications of the Egyptian Library).

(G. LEVI DELLA VIDA)

AL-NU'MĀN B. BASHĪR AL-ANŠĀRĪ, governor of al-Kūfa and Ḥims. According to some Muslim authorities, al-Nu'mān was the first *anšārī* to be born after the *Hidjra*. His father Bashīr b. Sa'd [q. v.] was one of the most distinguished of the Companions of the Prophet, and his mother, ʿAmra bint Rawāḥa, was the sister of the much respected ʿAbd Allāh b. Rawāḥa [q. v.]. After the assassination of ʿOthmān, Nu'mān, who was devoted to him, refused to pay homage to ʿAlī. According to some stories which seem rather apocryphal, he brought the bloodstained shirt of the Caliph, according to others, the fingers cut from the hand of his wife Nāʾila to Damascus and these relics were exhibited by Mu'āwiya in the mosque. In the battle of Ṣiffin [q. v.] he faithfully stood by Mu'āwiya and he was always a favourite with him while the other *anšār* were kept at a suitable distance from the Umayyad court. In the year 39 (659—660) al-Nu'mān by order of Mu'āwiya undertook an expedition against Mālik b. Ka'b al-Arḥabī, who had occupied in ʿAlī's name ʿAin al-Tamr on the frontier between Syria and Mesopotamia and began to besiege it but had to retire without accomplishing anything. Twenty years later he was given the governorship of al-Kūfa. He was not really fitted for this post, because his pronounced antipathy to ʿAlī and his followers did not suit the *Shiʿī* population of the town. In addition he did not conceal his sympathy with the *anšār*, who were attacked by Yazid b. Mu'āwiya's favourite al-Akḥṭal [q. v.], but freely expressed his opinion on the insult offered to his fellow tribesmen. After Yazid had come to the throne in 60 (April 680), he nevertheless left al-Nu'mān in office; but the latter did not long remain there. Al-Nu'mān is described as an ascetic and he knew the teachings of the *Qurʾān* thoroughly. But his asceticism was not of the strictest type, and his interest in musical entertainments was regarded as evidence of lack of dignity. In policy he proved very tolerant so long as it did not come to an open rising. When Muslim b. ʿAḳil, Ḥusain's partisan, appeared in al-Kūfa to ascertain the feelings of the people and found a number who were ready to pay homage to Ḥusain, al-Nu'mān adopted a neutral attitude and took no steps to check the vigorous propaganda. As a result the followers of the Umayyads in al-Kūfa wrote to the Caliph and called his attention to the fact that the threatening situation demanded a man of vigour who would be able to carry out the government's orders, while al-Nu'mān out of real or feigned weakness was letting things take their course and only urging people to keep calm. When al-Yazid was discussing this with his councillors, notably the influential Ibn Sarḍūn, the latter showed him a document signed by Mu'āwiya shortly before his death, containing the appointment of the then governor of al-Basra ʿUbad Allāh b. Ziyād [q. v.] to the same office in al-Kūfa. In spite of his antipathy to the proposal, Yazid carried out his father's wish and made ʿUbad Allāh governor of al-Kūfa without removing him from his post in al-Basra, whereupon al-Nu'mān hastened back to Syria. When the people of Medina rebelled

at the beginning of the year 63 (682) and drove all the Umayyads out of the town, Yazīd wished to see what tact would do before resorting to arms and sent a mission to Medīna under al-Nu'mān to show the people the futility of armed resistance and to bring them to their senses. The mission was also instructed to go on to Mecca to induce the stubborn 'Abd Allāh b. al-Zubair to pay homage. Al-Nu'mān's warnings and threats had no effect on his countrymen however and there was nothing left for the Caliph but to subdue the rebels in the two holy cities [see the article YAZĪD B. MU'AWIYA] by force of arms. After the death of Yazīd in Rabi' I 64 (Nov. 683) al-Nu'mān who had in the meanwhile become governor of Ḥimṣ declared openly for 'Abd Allāh b. al-Zubair. In Dhū 'l-Ḥijja of the same year (July–Aug. 684) or in Muḥarram 65 (Aug.–Sept. 684) however, the latter's leading follower al-Daḥḥāk b. Ḳais al-Fihrī [q. v.] was defeated at Mardj Rāhiṭ [q. v.] and thus the fate of al-Nu'mān was also decided. He attempted to save himself by flight but was overtaken and killed. According to the Arab historians, the town of Ma'arrat al-Nu'mān takes its name from Nu'mān b. Bashīr.

(K. V. ZETTERSTEEN)

AL-NU'MĀN B. AL-MUNDHIR (with the kunya Abū Ḳābūs or Abū Ḳubais) was the last "king" of the house of the Lakhmids of al-Ḥīra [cf. LAKHM]. He is certainly the best known to the Arabs but not by any means therefore the most important of the dynasty. He is often mentioned by the poets, according to circumstances a subject of panegyrics or of lampoons. His best known court poet was al-Nābigha al-Dhubayānī [q. v.]; on his relationship with 'Adī b. Zaid al-'Ibādī see below.

His fame among the Arabs does not mean that we know a great deal about his life and activities. What we can get from the poetry is of very little historical value and what the historians tell us about him is of almost less value. Arab tradition about the house of Lakhmids is generally speaking of the same nature as that of the partly contemporary houses of Ḡhassān and Kinda. In addition there is the complication produced by the frequent confusion of different people of the same name in the stories. What is to be found in non-Arab sources, although more reliable, is too trifling and accidental to build a historical narrative upon. The material has been collected by Nöldeke in his *Geschichte der Perser und Araber zur Zeit der Sasaniden* and G. Rothstein, *Die Dynastie der*

Lahmiden in al-Ḥīra and critically studied as far as possible.

The "kings" of al-Ḥīra were vassals of the Persian Great Kings and were installed by them, and given the task of keeping together the Arab population of the marches and the desert Arabs, their dependents, and thus to protect the empire against raids and plunder by the Beduins. Al-Nu'mān is said to have reigned 580–602 A. D. or perhaps a little later. His father was al-Mundhir b. Hind, one of the three sons of the famous princess of the house of Kinda, who came to the throne in succession. His mother however was of humble origin; she was, it is said, the daughter of a goldsmith near Medīna, a fact which the enemies of the king made good play within their lampoons on him. After the death of his father al-Mundhir, the Great King (Hormizd IV) is said to have hesitated for a time to fill the throne. Al-Nu'mān's final appointment is said only to have been made through the influence and cunning of the Arab poet 'Adī b. Zaid al-'Ibādī [q. v.] who was secretary for Arab affairs to the Great King and whose family were devoted to al-Nu'mān.

No really important events are known of the reign of al-Nu'mān. Mention is made of hostilities with Arab tribes and anecdotes of his life recorded. At first a pagan, like all his male ancestors, he was baptised which did not prevent him remaining a polygamist. But there had previously been Christians in his family. His grandmother Hind above mentioned founded a monastery [cf. AL-ḤĪRA] and his sister of the same name (others say daughter) was a nun. Towards the end of his life he had the poet 'Adī b. Zaid put to death as his enemies had poisoned him against him. But he is said to have helped a son of the poet to obtain the same influential position with the Great King (Khusraw II) as his father had held. He himself was not long afterwards made prisoner by the Great King — it is said as a result of the machinations of this son of 'Adī — and died in prison. There are all sorts of legends giving details of his end.

(A. MOBERG)

AL-NU'MĀN B. THĀBIT. [See ABU ḤANĪFA.] AL-NU'MĀN B. ABĪ 'ABD ALLĀH MUḤAMMAD B. MANṢŪR B. AḤMAD B. ḤAIYŪN AL-TAMĪMĪ AL-ISMA'ĪLĪ AL-MAGHRIBĪ ABU ḤANĪFA, the greatest of Ismā'īlī jurists and a protagonist of the early Fātimids in Egypt. Nu'mān appears to have been derived from a Mālikī stock in Ḳairawān, adopting the Ismā'īlī faith early in life. The exact date of his birth is not known, but it is probable that he was born in the last decades of the third century of the Hījra. He began his service of the Fātimids by entering the service of al-Mahdī (first Fātimid caliph), and served him for the last nine years of his life, i. e., 313–322 A. H. Thereafter he continued to serve al-Ḳā'im (second Fātimid caliph) for the whole of his life. During this time al-Nu'mān was concerned chiefly with the study of history, philosophy and jurisprudence, and the composition of his numerous works. Just prior to al-Ḳā'im's death, which occurred in 335 (946), he was appointed a *ḳāḍī*. His rank rose during the time of Manṣūr (third Fātimid caliph) and he reached his

zenith in the time of the fourth Fātimid caliph, al-Mu'izz (died 365 = 976), whom he predeceased by two years. Officially he does not seem to have been appointed *qāḍī 'l-kuḍāt*, a designation given for the first time to al-Nu'mān's elder son 'Alī; but during the reign of al-Mu'izz, al-Nu'mān acquired great power and was in effect the highest judicial functionary of the realm, and one of the most important figures in the hierarchy of the *Da'wa* (pronounced *Da'wat* by the Ismā'īlis).

Qāḍī al-Nu'mān was a man of great talent, learning and accomplishments: learned as a scholar, prolific as an author, upright as a judge. Not many external facts of his life are known. Possibly he was a recluse immersed in juristic and philosophical studies, and engaged in the composition of his numerous works. He was the founder of and is rightly regarded as the greatest exponent of Ismā'īli jurisprudence. According to the Ismā'īli tradition, he wrote nothing without consulting the Imāms who were his contemporaries; and his greatest work, the *Da'ā'im al-Islām* (The Pillars of Islām), is regarded as almost the joint work of Imām al-Mu'izz and Qāḍī al-Nu'mān, and therefore of the highest authority. It was the official *corpus juris* after the time of al-Mu'izz throughout the Fātimid empire. In addition to being a jurist, some of his other works are also considered as standard works by the Ismā'īli doctors and are still eagerly studied, for example, *Asās al-Ta'wīl* and *Ta'wīl al-Da'ā'im* (*ta'wīl*), *Sharḥ al-Akḥbār* and *Ifṭitāḥ al-Da'wa* (*akḥbār*), and *al-Madǧālis wa 'l-Musāyārāt* (*wa'z*).

Al-Nu'mān was the founder of a distinguished family of *qāḍīs*, and both of his sons, 'Alī and Muḥammad, attained the rank of chief *qāḍīs*, *qāḍī 'l-kuḍāt*.

Qāḍī al-Nu'mān died at Old-Cairo (Miṣr) on Friday, the 29th of Djumādā II, 363 (March 27, 974).

Al-Nu'mān was a prolific and versatile author, and the names of 44 of his works have come down to us. Out of these, 22 are totally lost; 18 are wholly, and 4 partially, preserved by the Western Ismā'īlis of India. Instead of giving a complete list of his works, which may be found elsewhere, I am only classifying them according to subjects, mentioning the most important of them: A. Fikḥ: 14 works (*Kitāb al-Idāḥ*, *Da'ā'im al-Islām*, *Mukhtaṣar al-Āṭḥār*); B. Munāẓara: 5 works; C. Ta'wīl (Allegorical Interpretation): 3 works (*Asās al-Ta'wīl*, *Ta'wīl al-Da'ā'im*); D. Ḥaḳā'iq (Esoteric Philosophy): 4 works; E. 'Aḳā'id (Dogmatics): 6 works (*al-Ḳaṣida al-mukḥṭara*); F. Akḥbār al-Sira: 3 works (*Sharḥ al-Akḥbār*); G. Ta'riḳḥ: 2 works (*Ifṭitāḥ al-Da'wa*); H. Wa'z: 3 works (*al-Madǧālis wa 'l-Musāyārāt*); I. Miscellaneous: 4 works.

Bibliography: An account of the life and works of Qāḍī al-Nu'mān may be found in the *J. R. A. S.* for 1934, January number, p. 1—32. Brief accounts may also be found in A. A. Fyzee, *Ismaili Law of Wills* (Oxford 1933), p. 9—14, and Ivanow, *Guide to Ismaili Literature* (Royal Asiatic Society, London 1933), p. 37—40.

(FYZEE)

NŪN, the twenty-fifth letter of the Arabic alphabet, with the numerical value of 50, belonging to the group of liquids (*al-hurūf al-dhālqiya*), and as such subject to numerous changes and assimilations; cf. the *Bibliography*.

NŪR (A.), light, synonym *ḡaww*, also *ḡu'* and *ḡiyā'* (the latter sometimes used in the plural). According to some authors, *ḡaww* (*ḡiyā'*) has a more intensive meaning than *nūr* (cf. Lane, *Arabic-English Dictionary*, s. v. *ḡaww*); this idea has its foundation in *Qur'ān* x. 5, where the sun is called *ḡiyā'* and the moon *nūr*. The further deduction from this passage that *ḡiyā'* is used for the light of light producing bodies (sun) and *nūr* on the other hand for the reflected light in bodies which do not emit light (moon), is not correct, if we remember the primitive knowledge of natural science possessed by the Arabs in the time of Muḥammad, nor is there any proof of it in later literature. The works on natural science and cosmology of the Arabs in the best period of the middle ages (Ibn al-Haiṭham, Ḳazwīnī and later writers) in the great majority of cases use the term *ḡaww* and it therefore seems justified to claim this word as a technical term in mathematics and physics.

Besides dealing with the subject in his *Optics* (*Kitāb al-Manāẓir*) Ibn al-Haiṭham devoted a special treatise to it entitled *Ḳawl al-Ḥasan b. al-Ḥusain b. al-Haiṭham fi 'l-Ḍaw'* which has been published with a German translation by J. Baermann in the *Z. D. M. G.*, xxxvi. [1882], 195—237, from which we take the following details:

As regards light, two kinds of bodies are distinguished, luminous (including the stars and fire) and non-luminous (dark); the non-luminous are again divided into opaque and transparent, the latter again into such as are transparent in all parts like air, water, glass, crystal etc. and such as only admit the light partly but the material of which is really opaque, such as thin cloth.

The light of luminous bodies is an essential quality of the body, the reflected light of a body in itself dark on the other hand is an accidental quality of the body.

In the opinion of mathematicians all the phenomena of light are of one and the same character; they consist of a heat from fire which is in the luminous bodies themselves. This is evident from the fact that one can concentrate rays of light from the brightest luminous body, the sun, by means of a burning-glass on one point and thus set all inflammable bodies alight and that the air and other bodies affected by the light of the sun become warm. Light and heat are thus identified or regarded as equivalent. The intensity of light, like that of heat, diminishes as the distance from the source increases.

Every luminous body whether its light is one of its essential qualities (direct) or accidental (reflected), illuminates any body placed opposite it, i. e. it sends its light out in all directions. All bodies whether transparent or opaque possess the power of absorbing light, the former have further

the power of transmitting it again; that a transparent body (air,¹ water, etc.) also has the power of absorbing light is evident from the fact that the light becomes visible in it if it is cut with an opaque body: the light must therefore have already been in it.

The penetration of light into a transparent body takes place along straight lines (proof: the sun's rays in the dust-filled air of a dark room). This transmission of light in straight lines is an essential feature of light itself, not of the transparent body, for otherwise there must be in the latter specially marked lines along which the light travels; such a hypothesis is however disproved by admitting two or more rays of light at the same time into a dark room and watching them.

The ray is defined as light travelling along a straight line. The early mathematicians were of the opinion that the process of seeing consisted in the transmission of a ray from the eye of the observer to the object seen and the reflection from it back to the eye. Opposed to this is Ibn al-Haiṭham's view that the body seen — luminous or opaque — sends out rays in all directions from all points of which those going towards the eye of the observer collect in it and are perceived as the image of the body (cf. *Optics*, book i. 23: "Visio non fit radiis a visu emissis" and also book ii. 23).

There is no absolutely transparent body; on the contrary, every body even the transparent reflects a part of the light which strikes it (explanation of the phenomena of twilight). According to Aristotle, the heavens possess the highest and most perfect degree of transparency. Ibn al-Haiṭham challenges this statement and shows from a use of the theory of the mathematician Abū Sa'd al-'Alā b. Suhail, which is based on the well known rules of the fraction of light in passing through media of different densities, that the transparency has no limits and that for every transparent body an even more transparent one can be found.

An explanation of the origin of the halo around the moon, of the rainbow, its shape and its colours, and of the rainbow to be seen at night in the steamladen atmosphere of the bath, is given by Kaẓwīnī in his *Cosmography*, i. (*ʿAdāib al-Makhlūqāt*, ed. Wüstenfeld, Göttingen 1849, p. 100 sq.; transl. Ethé, Leipzig 1868, p. 205 sqq.). Kaẓwīnī in his discussion replaces the raindrops by small looking-glasses; Ibn al-Haiṭham, on the other hand, deals with the problem in a much more conclusive fashion by assuming a single or double reflection of light in spheres (cf. E. Wiedemann, *Wied. Ann.*, vol. xxxix., 1890, p. 575).

Bibliography: References given in the article. (WILLY HARTNER)

The doctrine that God is light and reveals himself as such in the world and to man is very old and widely disseminated in Oriental religions as well as in Hellenistic gnosis and philosophy. We cannot here go into the early history; it will be sufficient to refer to some parallels in the Old and New Testaments, e.g. Gen. i. 3; Isaiah, lx. 1, 19; Zech., iv.; John, i. 4—9; iii. 19; v. 35; viii. 12; xii. 35 and Rev., xxi. 23 sq.

How Muḥammad became acquainted with this teaching we do not know, but the Qurʾān has its "light" verses [notably Sūra xxiv. 35, the "light verse" proper; cf. with it Sūra xxxiii. 45 (Muḥammad as lamp); lxi. 8 sq. (Allāh's light); lxiv.

8 (the light sent down = revelation)]. The light verse runs (as translated by Goldziher, in *Koran-auslegung*, p. 183 sq.): "Allāh is the light of the heavens and of the earth; his light is like a niche in which there is a lamp; the lamp is in a glass and the glass is like a shining star; it is lit from a blessed tree, an olive-tree, neither an eastern nor a western one; its oil almost shines alone even if no fire touches it; light upon light. Allāh leads to his light whom he will, and Allāh creates allegories for man, and Allāh knows all things".

From the context it is clear that we have to think of the light of religious knowledge, of the truth which Allāh communicates through his Prophet to his creatures especially the believers (cf. also Sūra xxiii. 40). It is pure light, light upon light, which has nothing to do with fire (*nār*), which is lit from an olive tree, perhaps not of this world (cf. however A. J. Wensinck, *Tree and Bird as cosmological Symbols in Western Asia*, in *Verh. Ak. Amst.*, 1921, p. 27 sq.). Lastly it is Allāh as the all-knowing who instructs men and leads them to the light of his revelation (cf. Sūra lxiv. 8). It is clear that we have here traces of gnostic imagery but those rationalist theologians, who — whether to avoid any comparison of the creature with God or to oppose the fantastic mystics — interpreted the light of Allāh as a symbol of his good guidance probably diverged less from the sense of the Qurʾān than most of the metaphysicians of light. Passages are very frequent in the Qurʾān in which Allāh appears as the Knowing (*ʿalīm*) and the Guiding (*hādī*). One did not need to look far for an exegesis on these lines. As Aṣḥ'arī observes (*Maḳālāt*, ed. Ritter, ii. 534) the Mu'tazilī al-Ḥusain al-Naǧīdār interpreted the light verse to mean that God guides the inhabitants of heaven and earth. The Zaidīs also interpreted the light as Allāh's good guidance [cf. the article *SHI'Ā*].

From ca. 100 A. H. we find references to a prophetic doctrine of *nūr*, and gradually to a more general metaphysics of light, i. e. the doctrine that God is essentially light, the prime light and as such the source of all being, all life and all knowledge. Especially among the mystics in whose emotional thinking, being, name and image coalesced, this speculation developed. Meditation on the Qurʾān, Persian stimuli, gnostic-Hermetic writings, lastly and most tenaciously, Hellenistic philosophy provided the material for new ideas. Ḳumait (d. 743) had already sung of the light emanating through Adam via Muḥammad into the family of 'Alī [cf. the article *SHI'Ā*]. The doctrine of light was dialectically expounded by Sahl al-Tustarī (d. 896) (see also Massignon, *Textes ind.*, p. 39 and the article *SAHL AL-TUSTARĪ*).

The first representatives of a metaphysics of light in Islām readily fell under the suspicion of Manichaeism, i. e. of the dualism of *nūr* and *zulma* (darkness) as the eternal principles. The tradition of Tirmidhī that Allāh created in darkness [cf. the article *KHALĪQ*] must have aroused misgivings. The physician Rāzī (d. 923 or 932), although a Hellenistic philosopher, adopted ideas from Persia and was for this refuted or cursed by various theologians and philosophers. Many mystics also (e.g. Ḥallādj; according to Massignon, *Passion*, p. 150 sq. wrongly) were accused of this dualism.

But the speculations about *nūr* found a powerful support from the ninth century in the monistic doctrine of light of the Neo-Platonists (we do not

know of any Persian monism of light) which was compatible with the monism of Islām. The father of this doctrine is Plato, who in his *Politeia*, 506 D sqq. compares the idea of the good in the supersensual world with Helios as the light of the physical world. The contrast is not therefore between light and darkness but between the world of ideas or mind and its copy, the physical world of bodies, in the upper world pure light, in the lower world light more or less mixed with darkness. Among the Neo-Platonists the idea of the good = the highest God = pure light. This identification was also facilitated by the fact that according to Aristotle's conception light is nothing corporeal (*De anima*, ii. 7, 418^b: [φῶς]... οὐτε πῦρ οὐδ' ἀέρας σῶμα οὐδ' ἀπορροή σώματος). From the context which is however not all clear, it appears that Aristotle regarded light as an effective force (ἐνεργεῖα). This is however of no importance here. Many Aristotelian forces and Platonic ideas are described by Neo-Pythagoreans and Neo-Platonists sometimes as forces and sometimes as substances (spiritual). With Aristotle σκότος (darkness) was conceived not as something positive but as στέρσις (privatio, the absence of light).

From this developed the doctrine which we find in the Arabic "Theology of Aristotle". Not far from the beginning (ed. Dieterici, p. 3) it is said: the power of light (*ḥuwwa nūriya*) is communicated by the prime cause, the creator, to the 'aql and by the 'aql to the world soul, then from the 'aql through the world soul to nature and from the world soul through nature to things which originate and decay. The whole process of this creative development proceeds without movement and timelessly. But God who causes the force of light to pour forth is also light (*nūr*; occasional synonyms: *ḥusn*, *baḥā*), the "prime light" (p. 51) or (p. 44) the "light of lights". Light (p. 51) is essentially in God, not a quality (*ṣifa*) for God has no qualities but works through his being (*ḥuwwa*) alone. The light flows through the whole world, particularly the world of men. From the supersensual original (p. 150), the first man (*insān 'aqlī*), it flows over the second man (*insān nafsānī*) and from him to the third (*insān dīsmānī*). These are the originals of the so-called real men. Light is of course found in its purest form in the souls of the wise and the good (p. 51). It should be noted also that *nūr* as a spiritual force (*rūḥānī*, 'aqlī) is distinguished from fire (*nār*) which is said to be only a force in matter with definite quality (p. 85). Fire of course like everything else has its supersensual original. But this is more connected with life than with light.

The elevation of the soul to the divine world of light corresponds to the creative descent of light (p. 8). When the soul has passed on its return beyond the world of the 'aql, it sees there the pure light and the beauty of God, the goal of all mystics.

Although the author of the *Liber de causis* is of the opinion that nothing can be predicated regarding God, yet he has to call him the prime cause and more exactly pure light (§ 5, ed. Bardenheuer, p. 69) and as such the origin of all being and all knowledge (in God is *wudūd* = *ma'rifa*; see § 23, p. 103).

The light emanated by God may, if it is regarded as an independent entity, be placed at various parts of the system. Most philosophers and theologians connect it with the *rūḥ* or 'aql or identify

it with them, sometimes also with life (*ḥayāt*), but this must be more closely investigated.

The great philosophers in Islām, Fārābī and Ibn Sīnā, connected the doctrine of light with the 'aql in metaphysics as well as in psychology. Fārābī is fond of using many synonyms for the light of God and the 'aql (*baḥā*) etc.; see e. g. *Der Mustersaat*, ed. Dieterici, p. 13 sqq.). In the biography of Fārābī in Ibn Abī Uṣāibi'a (*'Uyūn*, ed. Müller, ii. 134—140) a prayer is attributed to him in which God is invoked as the "prime cause of things and light of the earth and of heaven". Ibn Sīnā like Fārābī takes up the doctrine of light in theology and further develops it. In his psychological writings he regards the light as a link of the soul and body (cf. Sahl al-Tustarī who places *nūr* between *rūḥ* and *fin* in the four elements of man). In the *Kitāb al-Iṣḥārāt* (ed. Forget, Leyden 1892, p. 126 sq.) he even reads the whole metaphysical doctrine of the 'aql of the Aristotelians into the light verse of the Qur'an. Light is the 'aql bi 'l-'iḥ, fire the 'aql fa'āl and so on. Allāh's *nūr* is therefore like the *nous* of Aristotle! This discovery of Ibn Sīnā's was incorporated in the pious reflections of Ghāzālī (in *Ma'āridī al-Kuds fī Mad'aridī Ma'rifat al-Nafs*, Cairo 1927, p. 58 sq.).

The best expositions of the further developments of speculation on *nūr*, especially among the gnostics and mystics, are in Massignon's articles KARMAṬIANS and TAṢAWWUF.

(TJ. DE BOER)

NÜR ALLĀH AL-SAIYID B. AL-SAIYID SHARIF AL-MAR'ASHI AL-HUSAINI AL-SHUSHUTARI, commonly called Qāḍī Nūr Allāh, was born in 956 (1549). He was descended from an illustrious family of the Mar'ashī Saiyids and settled in Shushutar. He left his native place for India and settled in Lāhore where he attracted the notice of Ḥakīm Abu 'l-Faṭḥ (d. 997 = 1588) and through his presentation to Emperor Akbar (963—1014 = 1556—1605), he was appointed Qāḍī of Lāhore in lieu of al-Shaikh Mu'in (d. 995 = 1586). 'Abd al-Qādir Badā'ūnī, iii. 137, says that he was, "although a Shī'ah, a just, pious and learned man. He was flogged to death in 1019 (1610), on account of his religious opinions, by the order of the Emperor Djahāngīr (1014—1037 = 1605—1628). He is regarded as *al-Shahīd al-Thālith*, "the third martyr", by the Shī'is and his tomb in Akbarābād is visited by numerous Shī'as from all parts of India.

He is the author of innumerable works of which the following may be quoted: 1. *Ḥāshiyā 'ala 'l-Baidāwī*, a supercommentary to al-Baidāwī's commentary on the Qur'an, entitled *Anwār al-Tanzīl*: Asiatic Society of Bengal MSS., *List of the Government Collection*, p. 16; 2. *Ḥāshiyā Sharḥ Djadīd 'ala 'l-Tadwīd*, glosses to Kūshdjī's commentary on Naṣīr al-Dīn al-Ṭūsī's Compendium of metaphysics and theology, entitled *Tadwīd al-Kalām*: Loth, Ind. Off., N^o. 471, xv.; 3. *Iḥkāk al-Ḥaḥḥ wa-l-ḥaḥ al-Baṭīl*, a polemical work against Sunnism written in reply to Faḍl b. Rūzbahān's work entitled *Ibḥāl al-Baṭīl*, a treatise in refutation

of the *Kashf al-Haḡḡ wa-Nahḡ al-Ṣiḡḡ* by Ḥasan b. Yūsuf b. ʿAlī al-Ḥallī: Bankipore Library, *Khudā Bakhsh* Cat. vol. 14, p. 172. Ferangī Maḥall Library, Lucknow, f. 108; Rāmpūr Library, p. 281; Asiatic Society of Bengal (List of Arabic MSS., p. 23); 4. *Maḡālis al-Muʿminin*, biographies of famous *Shiʿas* from the beginning of Islām to the rise of the Ṣafawī dynasty in Persian: Bankipore Library Cat., p. 766; Asiatic Society of Bengal Cat., p. 59; Ethé, Ind. Off., No. 704 and Rieu, *Cat. of Persian MSS. in the Brit. Mus.*, p. 337^a. Printed in Tiḥrān 1268.

NÜR AL-DAWLA. [See DUBAIS.]

NÜR AL-DĪN MUḤAMMAD, an Ortoḡid. He was the son and successor of Fakhr al-Dīn Karā-Arslān, lord of Ḥiṣn Kaifā and of a considerable part of Diyār Bakr (Ibn al-Athīr, *Kāmil*, ed. Tornberg, xi. 217) who, according to Ibn al-Athīr (xi. 207), died in 562 (1166—1167) but according to the numismatic evidence may have lived till 570 or 571 (van Berchem, *Abh. Ges. Wiss. Gött.*, N. F., vol. IX/iii., 1907, p. 143, note 3). Nūr al-Dīn married the daughter of Sulṭān Ḳīlḡdj Arslān but when he treated her disgracefully, his father-in-law was very angry and threatened him with war. In consequence Nūr al-Dīn appealed for help to Ṣalāḡ al-Dīn who after fruitless negotiations took the field against Ḳīlḡdj Arslān in 576. Nūr al-Dīn came to him in his camp on the Gök-şū (this should be the reading in Barhebraeus, *Chron. Syr.*, ed. Bedjan, p. 356) and was received by him with great honour. Soon afterwards his father-in-law made peace with him and with Ṣalāḡ al-Dīn. When the latter in 578 took the field against ʿIzz al-Dīn of al-Mawṣil, Nūr al-Dīn showed himself at once ready to pay homage to him and assist him at the siege of al-Mawṣil. The powerful Aiyūbid rewarded him with the important town of ʿAmid, which he took in the following year (579) and gave him (Ibn al-Athīr, xi. 324). Of all the wealth collected in this town Ṣalāḡ al-Dīn only took for himself the 1,040,000 volumes which its library is said to have contained (Barhebraeus, *op. cit.*, p. 362). In the following year (580), Nūr al-Dīn took part in the unsuccessful siege of al-Karak (Barhebraeus, p. 364). When Saladin in 581 (1185—1186) again advanced against al-Mawṣil, in place of Nūr al-Dīn who was ill, his brother ʿImād al-Dīn accompanied him. Nūr al-Dīn died soon afterwards and left to his son Kuṭb al-Dīn Sukmān II rule over Ḥiṣn Kaifā and ʿAmid. ʿImād al-Dīn on hearing of his brother's death hurried from Ṣalāḡ al-Dīn's camp before al-Mawṣil to Ḥiṣn Kaifā but found his nephew already fully installed here. He therefore seized the fortress of Khartabirt where he became the founder of a branch of the Ortoḡids.

(E. HONIGMANN)

NÜR AL-DĪN ABU ʿL-ḲĀSIM MAḤMŪD B. ʿIMĀD AL-DĪN ZENGĪ, called AL-MĀLIK AL-ʿĀDIL, a tābeg of Ḥalab and Damascus. Nūr al-Dīn was born in Shawwāl 511 (Febr. 1118) and took part

under his father in the siege of Ḳalʿat Djaʿbar where the latter was murdered in Rabīʿ II 541 (Sept. 1146). His kingdom was then divided between his two sons, Saif al-Dīn Ghāzī [q. v.] who took possession of al-Mawṣil, and Nūr al-Dīn who established himself in Ḥalab. Scarcely had the news of ʿImād al-Dīn's death reached Joscelin II who lived in Tell Bāshir [q. v.] than the latter entered into negotiations with the people of Edessa, mainly Armenians, the chief stronghold of the Crusaders, which ʿImād al-Dīn had taken shortly before and assured himself of their cooperation in his proposed attack on the city. He was thus able to occupy the city without difficulty and its Muslim garrison took refuge in the citadel. When Nūr al-Dīn heard this he hurried thither by forced marches; Joscelin fled and Edessa fell into the hands of Nūr al-Dīn who wreaked a terrible vengeance on the treacherous Christians, laid the city completely waste and left only a few citizens in it. In the following year he invaded the district of Ḥalab and took from the Christians Artāḡ and Kafarlāthā and several other places. The news of the fall of Edessa in 539 (1144) made a tremendous impression in Europe and induced the Pope Eugenius III on Dec. 1, 1145 to send a letter to Louis VII and the knights of France in which he demanded a new crusade and in the spring of 1146 to send St. Bernard of Clairvaux to preach the crusade. He was listened to with enthusiasm; on receiving the Pope's message Louis had already declared himself ready to take the crusader's vow and finally the Hohenstaufen Conrad III was also won over. In the first half of the year 1147 the two kings set out and after great difficulties and considerable losses through starvation, epidemics and enemy attacks, the European armies joined one another in Palestine in the spring of 1148. It was decided to attack Damascus which was then nominally in the power of the Burid Muḡjir al-Dīn Abaḡ b. Muḥammad although the real ruler was one of his Mamlūks named Muʿin al-Dīn Anar. In Rabīʿ I 543 (July 1148) the Christians began the siege of the town from the southwest. The first few days were spent in heavy fighting with great losses on both sides. In the meanwhile Muʿin al-Dīn had appealed for assistance to Saif al-Dīn Ghāzī. The latter set out with a large army and was joined on the way by his brother Nūr al-Dīn. Before giving the hard pressed Muʿin al-Dīn the assistance he desired he sent him a letter in which he demanded the surrender of the town to his deputy in order to have a base in case of a defeat; but if he was victorious he would leave the town at once. But as Muʿin al-Dīn did not trust him completely he endeavoured instead to frighten the Christians by threats and declared that if they did not retreat he would hand over the town to Saif al-Dīn who would certainly drive the invaders completely out of Syria. These representations, supported by the gold of Damascus, did not fail to influence the eastern leaders who were able to appreciate the situation much better than their European allies. But as they had not the courage to propose that the siege should be at once abandoned, they suggested in the council of war held in the night of the July 26—27, 1148 that the camp should be moved from west to east because, they said, the walls on this side were not so strong and the attack would not be impeded by gardens. The besiegers followed the

advice of those possessing local knowledge but soon saw that they had been deceived because the terrain on the east side offered even greater difficulties in every respect and there was therefore nothing left for them but to withdraw in order to resume the siege another time. When Bertrand, the son of Count Alfonso of Toulouse who had just died, took the fortress of al-ʿArma and threatened the district of Tripoli Count Raymond of Tripoli appealed to Nūr al-Dīn and Muʿīn al-Dīn who had joined one another in Baalbek; the two Muslim leaders supported by a contingent sent by Saif al-Dīn hurried to his help. Bertrand had to surrender; the fortress was destroyed and he himself taken prisoner. The Christians then prepared to invade the district of Ḥalab; Nūr al-Dīn however anticipated them, defeated them at Yaḡhrā taking much booty, which he divided among his brother Saif al-Dīn, the caliph al-Muḥtafi and the Saldjūk sultān Masʿūd. At the beginning of the following year (May 1149) Nūr al-Dīn invaded the region of Antākīya, laid waste the country with the suburb of Ḥārim and laid siege to the fortress of Innib. Prince Raymond of Antioch hastened up with a small army to attack Nūr al-Dīn but was enticed into an ambush and fell in the fight. Nūr al-Dīn then went with his victorious forces doing great damage as he went, close up to Antioch in order to inspire the inhabitants with terror, and on his way back took Ḥārim and forced the strong fortress of Fāmiya (Apamea) near Ḥamāt to surrender. About the same time Saif al-Dīn died and his brother and successor Kutb al-Dīn Mawdūd prepared to fight Nūr al-Dīn, but the dispute was settled amicably [cf. the article MAWDŪD]. Soon afterwards (545 = 1151 or 546 = 1151-1152) Nūr al-Dīn succeeded in capturing his enemy Joscelin II of Edessa. The latter had previously won a victory over Nūr al-Dīn and treated him very scornfully. When one night he was travelling with only a few followers to Antioch he was surprised by a troop of Turkomans in the pay of Nūr al-Dīn and brought to Ḥalab where he remained a prisoner till his death, while Nūr al-Dīn gradually took all the fortresses belonging to the country of Edessa. In order to split up the Christian forces and to bring some relief to the Muslims besieged in ʿAṣkalān, he made an agreement with his enemy, the prince of Damascus, Muḍjir al-Dīn Abaḳ, and in Ṣafar 548 (May 1153) they both appeared before the walls of Bāniyās [q. v.]. But when the irresolute Muḍjir al-Dīn would undertake no serious steps against the Christians, they soon abandoned the siege and separated without having achieved anything. When ʿAṣkalān, was forced to capitulate after an eight months siege the Christians began to cast covetous eyes on the great and wealthy city of Damascus, especially as Muḍjir al-Dīn acted almost as if he were their vassal. In order to thwart their plans, Nūr al-Dīn endeavoured to gain over Muḍjir al-Dīn by pretended friendship and by making false charges against them persuaded him to get rid of his chief emīrs so that Muḍjir al-Dīn thus lost his most reliable friends. When Nūr al-Dīn suddenly appeared before the gates of the city they were opened to him by his friends in Damascus as had been prearranged. Muḍjir al-Dīn took refuge in the citadel and summoned the Christians to his assistance but surrendered the city before help arrived (Ṣafar 549 = April 1154). In compensation he received Ḥimṣ. There he

began to intrigue against Nūr al-Dīn and the latter offered him Bālis instead; Muḍjir al-Dīn however was not satisfied, but settled in Baghdād where he remained till his death as a protégé of the caliph al-Muḥtafi. In 551 (1156) Nūr al-Dīn made a peace with Baldwin III of Jerusalem, whereby the latter gave up the annual tribute which Damascus had had to pay him since the time of Muḍjir al-Dīn and ceded the half of the lands of Ḥārim. In spite of this about the end of the year 551 (Feb. 1157) Baldwin fell upon a defenceless encampment of Arabs and Turkomans in the neighbourhood of Bāniyās, took the men prisoners and carried off their cattle. As a result the war broke out again and the Christians were defeated, some on the Euphrates by the governor of Damascus, Asad al-Dīn Shirkūh, some in the vicinity of Damascus by Nūr al-Dīn's brother, the emīr Nāṣir al-Dīn. Many prisoners were brought to Damascus and put to death by Nūr al-Dīn's orders in revenge for the Muslims killed at Bāniyās. Nūr al-Dīn then attacked Bāniyās and destroyed the town but could not take the citadel; he retired on the approach of Baldwin. The latter rebuilt the ruined town, dismissed a number of his troops and intended to return to Tiberias, but was surprised on the way by Nūr al-Dīn and suffered a disastrous defeat (Djumādā I 552 = end of June 1157). Another attempt by Nūr al-Dīn to take the town was also unsuccessful; he again raised the siege on the approach of Baldwin. Very soon afterwards he fell very ill and a rumour spread that he had died. The Christians thereupon attacked Shaizar [q. v.] which had been severely damaged by an earthquake, and had along with Baalbek shortly before fallen into the hands of Nūr al-Dīn. The attack failed however owing to the jealousies among the Frankish leaders. On the other hand, they were successful after two months siege in taking Ḥārim in the following year and in inflicting a severe defeat on Nūr al-Dīn on the Jordan (Djumādā 553 = July 1158). About the same time the emperor Manuel I Comnenos appeared in Syria to chastise the rebel governor of Cilicia and prince Raynald of Antioch who had undertaken an expedition against Cyprus. After receiving the submission of the princes, the emperor resolved to join Baldwin in an attack on Ḥalab at the beginning of 1159. Nūr al-Dīn however escaped the danger which threatened him by releasing the Christian prisoners. He then concluded a truce for four months with Baldwin, took Ḥarrān and al-Raḳqa from his brother Nāṣir al-Dīn and invaded the lands of sultān Kīlīdī Arslān II [q. v.]; but when Baldwin began to lay waste Nūr al-Dīn's territory, the latter hurried back to Ḥalab and Baldwin retired. About this time conditions in Egypt began to attract the attention of Nūr al-Dīn and from the year 556 (1161) his history is so closely bound up with that of Saladin that it is sufficient to refer to the article on the latter for the main facts. Only the following need be added here. In 558 (1163) Nūr al-Dīn had planned an invasion of the county of Tripoli and encamped before Ḥiṣn al-Akrād [q. v.] and was preparing to storm it when he was suddenly attacked by the Christians. His troops who were quite unprepared were scattered and Nūr al-Dīn himself only escaped with difficulty. Nevertheless he succeeded by exerting all his efforts in raising a new army in a short time with which he again advanced on Ḥārim. After

winning a decisive victory over the Christian relief force, he took Hārim by storm (Ramaḍān 558 = Aug. 1163) and a few months later also forced Bāniyās to surrender. When the atābeg of Mawṣil, Nūr al-Dīn's brother Ḳuṭb al-Dīn Mawḍūd, at the end of 565 (Sept. 1170) died and his younger son Saif al-Dīn Ghāzī was chosen successor by the emīrs, Nūr al-Dīn went there and said that Saif al-Dīn should have al-Mawṣil but was to give Sindjār to his elder brother 'Imād al-Dīn Zangī. In 568 (1173) he invaded Asia Minor and took several towns; on his relations with the Saldjūk sultān there see the article *KLIPJ ARSLĀN II*. While he was still on this expedition, an envoy arrived from the 'Abbāsīd caliph of Baghdād bearing a diploma recognising Nūr al-Dīn as lord of al-Mawṣil, al-Djazīra, Irbil, Khilāt, Syria, Egypt and Ḳonya. He died on 11th Shawwāl 569 (May 15, 1174) in Damascus of a disease of the larynx (*'illat al-khawwānīk*) and was buried in the citadel; his body was later brought to the madrasa founded by him at the entrance to the Sūḳ Khawwāṣīn.

With reference to Nūr al-Dīn, Ibn al-Aṭhīr, xi. 265 says: "I have studied the careers of the rulers of the past but from the time of the legitimate caliphs and 'Omar b. 'Abd al-'Azīz I have found none who led a purer life or had greater enthusiasm for righteousness". As a pious Muslim convinced of the truth of the Prophet's mission, he was always eager to follow out in exact detail the many prescriptions of the Ḳur'ān and the Sunna regarding the conduct of believers in private and public life. He was distinguished by a remarkable love of justice which was seen for example in the fact that he would never punish on mere suspicion alone and was able to check any arbitrariness on the part of the lower courts also, and avarice and selfishness were entirely foreign to his character. He never gave way to the temptation always at hand to enrich himself at the expense of the treasury; on the contrary, he applied the proceeds of the booty taken in war to pious foundations and public works for the benefit of Islām. Among the important cities of Syria the fortifications of which were renovated by him, Ibn al-Aṭhīr mentions (xi. 267) the following: Damascus, Ḥims, Ḥamāt, Ḥalab, Shaizar and Baalbek, and mosques, schools, hospitals and caravanserais were built everywhere. On his great activity as a builder cf. the article DAMASCUS; cf. also Fleischer, *Miḥā'il Miṣāka's Cultur-Statistik von Damascus* (Kleinere Schriften, iii. 306 sqq.). He was also a generous patron of scholars in whom he took great interest; on the battlefield he earned the admiration of his soldiers by his personal bravery, which was coupled with unusual talent as a general. If on the other hand he was guilty of acts which are not quite compatible with humane warfare, like the massacre in Edessa on the recapture of the town and the slaughter of the Christian prisoners in Damascus after Baldwin's attack on the defenceless Muslims at Bāniyās, it should be remembered that this was no breach of the practice of war of the time. The constant aim of his efforts was the expulsion of the Christians from Syria and Palestine and to this object he remained faithful throughout his life. In the political history of Syria and Mesopotamia, Nūr al-Dīn played an unusually important part and laid a firm foundation on which Saladin was later able to build.

NŪR AL-DĪN ABU 'L-ḤARITH ARSLĀN SHĀH B. MAS'UD B. MAWḌUD B. ZANGĪ, called AL-MALIK AL-'ĀDIL, lord of al-Mawṣil. After the death of his father [q. v.] in Sha'bān 589 (Aug. 1193) Nūr al-Dīn succeeded him; the real ruler however in the early years of his tenure of office was the governor of the citadel, the eunuch Muḍjahid al-Dīn Ḳaimaz al-Zainī, who is described not only as a pious and learned man but as an official much concerned with the welfare of the people. He died in Rabi' I 595 (Jan. 1199) or, according to another statement, in Ṣafar of the same year (Dec. 1198). Many buildings, such as mosques, monasteries, schools and bridges, which the city of al-Mawṣil owes to him, are evidence of his interest in the welfare of the community. When the officials of Nūr al-Dīn's uncle, the lord of Sindjār, 'Imād al-Dīn Zangī b. Mawḍūd, seized several places in the neighbourhood of Naṣībīn, but really belonging to the territory of al-Mawṣil, Nūr al-Dīn after long and fruitless negotiations decided to seize the town of Naṣībīn. 'Imād al-Dīn then died and was succeeded by his son Ḳuṭb al-Dīn Muḥammad. The change in the throne caused Nūr al-Dīn to hasten; in Djumādā I 594 (March–April 1198) he set out with a large army. Ḳuṭb al-Dīn was defeated and turned to the Aiyūbid al-'Ādil [q. v.] with an appeal for help while Nūr al-Dīn established himself in Naṣībīn; but his army melted away through sickness and death and on the approach of al-'Ādil he evacuated the town and returned to al-Mawṣil (Ramaḍān 594 = July–Aug. 1198) whereupon al-'Ādil laid siege to Mārdīn. In Muḥarram 595 (Nov. 1198) the ruler of Egypt al-'Azīz died and when his successor al-Aḫḫāl recalled al-'Ādil's Egyptian troops and also made an alliance with Nūr al-Dīn, al-'Ādil had to withdraw and leave the conduct of the siege of Mārdīn to his son al-Kāmil [q. v.]. Nūr al-Dīn then took the field and along with his two cousins Ḳuṭb al-Dīn Muḥammad and Sindjār Shāh b. Ghāzī, lord of Djazīrat b. 'Omar, encamped before Dunaisir [q. v.]. After two months there they moved their camp to Ḥarzam between Dunaisir and Mārdīn. In the meanwhile, the inhabitants of Mārdīn had exhausted their supplies; in addition devastating epidemics

broke out which still further reduced the ranks of the defenders; the commander therefore sent a message to al-Kāmil and declared himself ready to surrender the town within a definite period on condition that he was allowed to import sufficient food. Al-Kāmil agreed but with the arrival of Nūr al-Dīn the people of Mārdīn plucked up their courage and resolved to continue the struggle. Al-Kāmil might almost have taken the town by treachery; although Ẓuṭb al-Dīn pretended to be devoted to Nūr al-Dīn he was really secretly attached to al-Kāmil and had promised him to take to flight at once in case of an encounter. When the troops were drawn up for battle he was placed in such a position however that there was no possibility of escape on the narrow battlefield. Al-Kāmil was defeated and fled to Damascus to his father (Shawwāl 595 = Aug. 1199). As to Nūr al-Dīn, he fell sick and could not follow up his victory but returned to al-Mawṣil. After he had recovered from his illness, he went in Sha'bān 597 (May-June 1201) with Ẓuṭb al-Dīn to Ḥarrān to resume the struggle with al-ʿĀdil. When he reached Ra's al-ʿAin, envoys came to him from al-Malik al-Fa'iz b. al-ʿĀdil who lived in Ḥarrān to seek peace and as he knew that the other Aiyūbids wished to make peace with al-ʿĀdil and deadly epidemics had broken out among his troops, he granted their request for a return to the *status quo* and returned to al-Mawṣil. In the year 600 (1203-1204), Ẓuṭb al-Dīn openly paid homage to al-ʿĀdil and had the *khutba* read in his name; Nūr al-Dīn could not permit this and took possession of Naṣībīn except the citadel. This also would probably have fallen into his hands if the news that the lord of Irbīl, Muẓaffar al-Dīn Kökbūri [q. v.], had invaded the territory of al-Mawṣil in his absence and had wrought great havoc, had not forced him to return. After he had ascertained that the accounts that had reached him were much exaggerated he turned his attention to Tell A'far which belonged to Sindjār and laid siege to it. But fortune did not favour him. It is true that he succeeded in taking Tell A'far; then a number of Mesopotamian princes allied themselves with Ẓuṭb al-Dīn and Nūr al-Dīn could not face their combined strength. When it came to a battle he was completely routed and had to surrender Tell A'far and make peace (beg. 601 = late summer 1204). The relations between Nūr al-Dīn and Ẓuṭb al-Dīn had never been particularly friendly and matters did not improve when Nūr al-Dīn gave his daughter in marriage to one of al-ʿĀdil's sons. On the occasion of this union of the two dynasties, Nūr al-Dīn's viziers proposed to him to conclude an alliance with al-ʿĀdil so that he might himself take possession of Djazīrat Ibn ʿOmar which was under the rule of Mu'izz al-Dīn Maḥmūd b. Sindjār Shāh and that al-ʿĀdil should occupy Ẓuṭb al-Dīn's territory. This plan which was entirely in keeping with Nūr al-Dīn's desires was also approved by al-ʿĀdil and the latter undertook a campaign against the east. On this campaign in a short time he took al-Khābūr and Naṣībīn and besieged Sindjār. While Ẓuṭb al-Dīn was preparing to fight to defend his capital, Nūr al-Dīn equipped an army which was to join al-ʿĀdil's. Then a sudden change took place in the political situation. The lord of Irbīl, Muẓaffar al-Dīn Kökbūri, who had promised Ẓuṭb al-Dīn to intervene with al-ʿĀdil on his behalf but had been unsuccessful, now proposed to Nūr al-Dīn to

join him against al-ʿĀdil. Nūr al-Dīn agreed and when the Aiyūbid ruler of Ḥalab al-Malik al-Ẓāhir and the Saldjūk Sultān of Konya Kaikhusraw I b. Kılıç Arslan [q. v.] joined the alliance and al-ʿĀdil was further ordered by the ʿAbbāsīd caliph al-Nāṣir [q. v.] to abandon his hostile plans, he had finally to yield, especially as his emirs had no inclination to continue the campaign. In the end Ẓuṭb al-Dīn was left in possession of Sindjār and al-ʿĀdil returned to Ḥarrān. Nūr al-Dīn died at the end of Radjab 607 (Jan. 1211) and was succeeded by his son al-Malik al-Ḳāhir ʿIzz al-Dīn Mas'ūd.

(K. V. ZETTERSTÉEN)

NÜR DJAHĀN, name given to Mihr al-Nisāʾ, the famous queen of Djahāngīr, the Mughal Emperor. She was born at Kandahār in 1577 when her father, Ghiyāth Beg, was migrating from Persia to Hindustān (*Maʿāthir al-Umarāʾ*, i. 129). In the reign of Akbar she was married to ʿAlī Kulī Beg, a Persian who had rendered distinguished military service to the Emperor and who, because of his bravery, was known as Shīr Afgan. The assassination of her first husband will always remain a matter of controversy, some regarding it as a repetition of the story of David and Uriah, others holding the view that he had been suspected of disloyalty. It was not however until four years later, in 1611, that she became, at the age of thirty-four, the wife of Djahāngīr. In the eleventh year of that monarch's reign her name was changed from Nūr Maḥall to Nūr Djahān (*Tuzuk-i Djahāngīr*, ed. Rogers and Beveridge, i. 319).

An extraordinarily beautiful woman, well-versed in Persian literature in an age when few women were cultured, ambitious and masterful, she entirely dominated her husband, until eventually Djahāngīr was king in name only. The chroniclers record that she sometimes sat in the *jharokā*, that coins were struck in her name, and that she even dared to issue *farmāns* (*Iqbāl-nāma*, p. 54-57). She became the leader of fashion and is said to have invented the *ʿatr-i Djahāngīrī*, a special kind of rose-water. Her style in gowns, veils, brocade, lace, and her *farsh-i ʿandamī* (carpets of sandalwood colour) were known throughout the length and breadth of Hindustān.

Ablly assisted in political affairs by her father, now known as ʿItimād al-Dawla, and her brother, Āsaf Khān, she dispensed all patronage thus falling foul of the older nobility led by Mahābat Khān. The history of the last years of Djahāngīr's reign is the history of Nūr Djahān's efforts at paving the way for the succession of her son-in-law, Prince Shahriyār. But the death of her father, combined with the fact that Āsaf Khān was supporting the claim of his own son-in-law, Prince Khurram, considerably weakened her power. On the death of Djahāngīr, in 1627, she was completely outwitted by Āsaf Khān, her candidate was defeated, and Prince Khurram ascended the throne as Shāh Djahān. The last eighteen years

of this remarkable woman's life during the reign of Shāh Djahān are unimportant to the historian of Mughal India.

Bibliography: Mu'tamid Khān, *Iqbāl-nāma Djahāngīrī*, Calcutta 1865; Shāhnawāz Khān, *Ma'āthir al-Umarā'*, in *Bibliotheca Indica*, i. 127-134; Beni Prasad, *History of Jahangir*, 1922. (C. COLLIN DAVIES)

NŪR MUHAMMADĪ, the technical term for the pre-existence of the soul of the Prophet Muḥammad; the predestined essence of the last of the prophets is said to have been created first of all, in the form of a dense and luminous point; all the predestined souls are said to have emanated from this.

Among the Sunnīs, the idea first appears among the mystics in the third century A.H., then gradually begins to dominate popular worship (cf. Sahl Tustarī and Ḥakīm Tirmidhī, in our *Recueil* . . . , 1929, p. 34, N^o. 39 and p. 39); Abū Bakr Wasiṭī, whose *Hā Mim al-Kidām* should be identified with ch. i. of the *Tawāsin* of Ḥallādj (cf. our *Passion*, p. 830-840) expounds it. According to Kilānī, Muḥammad is "the image in the pupil which is in the centre of the eye of creation" (*insān 'ain al-wuḍūd*); this is what Ibn 'Arabī calls the *ḥaḳīqa muḥammadiya* the pre-eternal conception of which is celebrated by the poets Ṣaṣārī, Witri and the mystic Djazūlī; hence Muḥammad's immaculate pedigree since Adam (cf. the poems on the *Mawlid*). Orthodoxy has always carefully placed the doctrine of the uncreated Kur'ān above this cult. Popular legend among the *Ḥashwīya* has reduced and materialised this devotion: in showing the model of the body of the Prophet kneaded from a handful of earth from Paradise with from the spring Tasnīm which makes it shine like a white pearl. But it is certain that it is a question here primarily of a gnostic pre-existence, an intellectual substance of the nature of the angels as is evident from the antiquity of the equation *nūr* = *ʿaql*, borrowed by Tirmidhī from the Ismāʿīlīs [cf. *ʿAQL*].

Among the Shīʿīs, this doctrine appears earlier and with more logical coherence; among the extremists, who explain this "prophetic light", either as a "spirit" transmitted from age to age and from elect to elect, or as spermatric germ (Traducianism) inherited from male to male. At the beginning of the second century Mughira and Djābir taught the primogeniture of the luminous shadow (*zill*, opposed to *shabāḥ* "dark body") of Muḥammad. It is a fundamental dogma of Ismāʿīlism from its beginning (*al-sābiq nūr maḥd* = *al-mīm*); it is found again extended through solidarity to all the 'Alids or to all the Ṭālibīs with the gift of sinlessness among the Nusairīs and even among many pious Imāmī writers (Kulīnī, *Kūfī*, p. 116).

The authors of this doctrine derive it from the Kur'ān (*āyat al-nūr*: xxiv. 35; the *taṣliya*; the connexion between the two terms of the *shahāda*) effectively interpreted by the old ḥadīths (*durra baiḍā*; *lawlāka*) as proving that Muḥammad is "the first (by *taḳdīr*, *waṣla*, *khālīk*) and the last" (by *idjād*, *nubuwwa*, *ba'ṭh*). But it certainly required for its development the stimulus of Christian gnostic and Manichæan antecedents.

NŪRBAKHSHĪYA, religious sect or order called after Muḥammad b. Muḥammad b. 'Abd Allāh, called Nūrbakhsh (795-869 A.H.).

1. Life of the founder. Of this person there is a detailed biography in the work *Madjālis al-Mu'minin* of Nūr Allāh al-Shustarī (Bodleian MS., Ous. 366; see also Brit. Mus. Catalogue of Persian MSS.), chiefly based on a work (*taḥkīra*) by Muḥammad b. Muḥammad al-Samarḳandī. His father was born in Kaṭīf, and his grandfather in al-Hass, whence in some *ghazals* he styles himself Laḥsawī. His father migrated to Kā'in in Kūhistān, where his son was born. The latter became a disciple of Ishāq al-Khutlānī, himself a disciple of Saiyid 'Alī al-Hamadḥānī (whose biography is published in *Khasinat al-Asfiya*, Lucknow 1322, ii. 293). Ishāq in obedience to a dream gave his pupil the name Nūrbakhsh ("light-gift"), and conferred on him the *khirka* of 'Alī al-Hamadḥānī. In virtue of his supposed descent from the Imām Mūsā al-Kāzīm he received the title Mahdī, and was proclaimed Caliph by a number of followers; indeed in the heading of his *Ghazals* (Brit. Mus. Add. 16,779) he is styled "Imām and Caliph over all the Muslims". In a letter to a disciple (Brit. Mus. Add. 7,688) he claims mastery of all sciences, religious and secular; he could have taught Plato mathematics, etc. He calls on the people of his time to take pride in such a contemporary and display activity in his cause. These pretensions were taken seriously by the Sultān Shāh-rukh (Timūrid, 807-850), whose viceroy Bāyazīd arrested him at Kuh-Tirī "a fortress in the neighbourhood of Khutlān", whither he had gone in 826; he was sent to Herāt and thence to Shīrāz, where he was released by Ibrāhīm Sultān; after travelling to Baṣra, Hilla, Baghdād and the (Shīʿī) Sanctuaries, he went to Kurdistān, where he was again proclaimed Caliph, and coins were struck in his name. He was again arrested by Shāh-rukh's order, and brought to Ādharbāidjān; he made his escape and after much suffering reached Khalkhāl, where he was recaptured, and sent back to Shāh-rukh, who despatched him to Herāt, where he had to mount the pulpit and abjure the caliphate. In 848 he was released on condition that he confined his activities to teaching; but, having incurred suspicion, he was sent to Tabriz, thence to Shirwān, and thence to Gilān.

After Shāh-rukh's death he was set free, and took up his residence in a village Sulfan in the neighbourhood of Raiy, where he died.

2. His doctrines. In his poems (*ghazal*, *mathnawī* and *rubāʿī*), he insists on his personal importance, but also emphasizes the Shīʿī pantheism, e.g. "We have washed away the impress of other from the tablet of existences; we have seen that the world is qualities and an identical substance". Prose works by him were a *Risāla-i 'Aḳida* probably in Persian, and a treatise on Law, in Arabic, called *al-Fiḥ al-Aḥwaṭ*. Neither of these appears to have reached Europe. The extracts from the latter given in the *Madjālis* are Shīʿī in character. The *imām* besides possessing numerous virtues must be a descendant of 'Alī and Fāṭima; this is sufficient for "the lesser *djihad*", but for "the greater" he must also be a *walī* perfect in the *maḳāmāt* of that dignity. The *mut'a* marriage is lawful, since it was so certainly in the Prophet's time, and the writer had been commanded to abolish innovations and revive the practice of the Prophet's

time. He rejects the expedient called 'awl in dealing with deceased persons' estates, as being neither in the Kur'ān nor the Sunna.

3. Later history of the sect. The *Madjālis* names two successors (*khalīfa*) of Nūrbakhsh: Shams al-Dīn Muḥammad b. Yahyā al-Lahdjānī al-Gilānī, called Asīrī, the author of a *Diwān* of which there is a copy in the Brit. Mus.; this person built a *khanqāh* in Shirāz; and Nūrbakhsh's son Shāh Kāsim Faīdqakhsh, first heard of in 'Irāq, whence by permission of the Āq-Kuyunlu Sultān Ya'qūb (884—896) he was allowed to go to Khurāsān to cure Ḥusain Mirzā, the governor, of an ailment by his *baraka*. His religious opinions won him the favour of Ismā'īl the Safawid (907—930). According to Firīshṭa, who cites the *Zafar-nāme*, a disciple of Shāh Kāsim, named Mir Shams al-Dīn went from 'Irāq to Kashmīr about 902, where he was received with high honour by Fāth Khān, who made over to him the confiscated lands which had formerly fallen to the crown. In a short time many of the Kashmīris, particularly those of the tribe Čuk, became converts to the Nūrbakhshī sect (Firīshṭa, transl. Briggs, Calcutta 1910). The Kashmīris had previously been Sunnī of the Ḥanafī rite according to Mirzā Ḥusain (author of *Tārīkh-i Rashīdī*, transl. E. D. Ross, London 1895, p. 435), who when he came into possession of the country asked the opinion of the 'ulamā of Hindustān about *al-Fīkh al-Aḥwaṭ*; as they condemned it as heretical, he persecuted and endeavoured to extirpate the sect (about 950). His confused and fanatical account of it has misled some European writers. It survived his persecution, and according to J. Biddulph, *Tribes of the Hindoo Koosh* (Calcutta 1880) it numbers over 20,000 followers, most of whom are to be found in Shigar and Khapolor of Baltistān. A few of the sect, he adds, are now to be found in Kishtwar, to which place they were deported by Golab Sing when he conquered Baltistān.

The work last cited contains some details about their practices; its account is, however, mixed with fables, and without access to the *Fīkh Aḥwaṭ* it is difficult to estimate the justice of the assertion that the system is "an attempt to form a *via media* between Shī'ī and Sunnī doctrines".

Bibliography: references are given above.
(D. S. MARGOLIOUTH)

NŪRĪ, a common name in the Near East for a member of certain Gipsy tribes. A more correct vocalization would perhaps be *Nawarī* (so Hava, Steingass, etc.), with plural *Nawar*. Minor sky [above, iii. 38] gives *Nawara*. By displacement of accent we also find the plural form as *Nawār* (e.g. in Jaussen, *Coutumes des Arabes*, p. 90, and British Admiralty's *Handbooks, Syria* [1919], p. 196, *Arabia* [1916], p. 92, 94). In Persia the current name for Gipsy is *Lōrī*, *Lūrī*, or *Lūlī* [q.v.]. It is not unlikely that by a natural phonetic transformation the form *nūrī* derives from *lūrī*, which, it has been suggested, originally denoted an inhabitant of the town of al-Rūr (or Arūr) in Sind. Quatremère advanced the theory (*Hist. des Sultans Mamlouks*, I./ii., note 5) that the name *nūrī* arose

from the Arabic *nūr* (fire) [he gives the form نور] because these vagrants were usually seen carrying a brazier or a lantern. Even to-day many of the *Nawar* earn their living as itinerant smiths. But it is more probable that the correct etymology is

to be found in some Sanskrit dialect of N. W. India, the original home of the Gipsy tribes.

In the various countries of the Orient in which Gipsy families are located, we find several designations for them used. The older name, now much restricted in use, was *Zuṭṭ* [see *zoṭṭ*] or *Jatt*. The Turkish name Čingana passed into European languages under such forms as Σινάβος, Tzigane, Zingaro, Czigany, Zigeuner, etc. Dozy (*Supplément aux Dictionnaires Arabes*, i. 605), quoting Caussin de Perceval, records the occasional use of the name *Zandjiya*, but this is inexact [cf. art. *ZANDJ*]. The commonest names, apart from those already mentioned, seem to be *Nawar* and *Kurbat* or *Ghurbat* (particularly in N. Syria and Persia), *Ghagar* and *Halab* (especially in Egypt and N. Africa) and *Dūman* (in Mesopotamia). For other sub-divisions reference may be made to the bibliography, and particularly to E. Littmann's *Zigeuner-Arabisch*, which is an excellent summary of the whole subject, particularly on the linguistic side.

The collecting of data regarding the Gipsy tribes of the Orient is by no means easy. Even experienced orientalists and travellers have reached different conclusions regarding them. For example Lane (in his *Modern Egyptians*, London 1836, ii. 108) in spite of his profound knowledge of Egypt, asserted that there were few Gipsies in the land, while numbers of well-educated natives to-day, are still unaware of the presence of these tribes in their midst. The statistics of Massignon's *Annuaire musulman* (Paris 1925, p. 115) however, gives the number of Gipsies in Egypt as two per cent of the population, consisting, namely, of two tribes of *Ghagar* and *Nawar* respectively, and four tribes of *Halab*.

The Gipsies as a rule seem, chameleon-like, to take their creed, such as it is, from their surroundings. In Muslim countries these tribes usually profess Islām, in so far as they may be said to profess any religious views, many of them, indeed, being very superstitious and reported to be scoundrels and vagabonds. The same applies to the Muslim Gipsies of what was formerly European Turkey (Admiralty's *Handbook of Turkey in Europe* [1917], p. 62). In the Balkans many of them are Greek-Orthodox.

Persian and Arabic writers preserve for us the tradition that tribes of *Jats* (or *Zuṭṭ*) from the Punjab were conveyed westwards by command of the Sāsānian monarch Bahram Gūr (420—438 A.D.) and their descendants proved a troublesome problem some centuries later for the Caliph of Baghdād. Once more numbers of them were dispersed to the borders of Syria, where many of them were captured by the Byzantines, and thus found their way into the Eastern Roman Empire, thence to continue their migrations to other ends of the East and West. Many of them are even said to have risen to high rank, e.g. al-Sarī b. al-Ḥakam b. Yūsuf al-Zuṭṭī, governor of Egypt (200—205 A.H.), while it has been supposed that the famous Barmecide family at the court of Hārūn al-Rashīd were of similar Gipsy origin. The name *Barāmika* is actually the designation in Egypt of a class of public dancers (*Ghawāzī*) of low moral character and conduct who have been regarded as of Gipsy blood. The question, however, is doubtful (see L. Bouvat, *Les Barmecides d'après les historiens arabes et persans*, Paris 1912, p. 110, 125).

The German traveller Seetzen and the American

missionary Eli Smith gathered valuable material in the Near East regarding those nomadic peoples which proved useful to later scholars. They were followed by Capt. Newbold (1856) on the Gypsies of Egypt, Syria and Persia; von Kremer, Austrian Consul at Cairo, on the Egyptian Gypsies (1863); Sykes (1902) dealt with the Persian Gypsies, while an excellent treatise appeared in 1914 from the pen of R. A. S. Macalister on the Language of the Nawar or Zutt, the Nomad Smiths of Palestine. Macalister in this work had the rather difficult task of reducing to writing a language almost completely unknown, and interpreting and analysing the Nūrī stories and folk-elements recounted to him by members of the Nūrī settlement north of the Damascus Gate in Jerusalem. He employed several of these Nawar in the course of his excavations there. A small Syrian Gypsy vocabulary received by Miss G. G. Everest of Bairūt from a friend at Damascus was also published in the *Journal of the Gypsy Lore Soc.*, Jan. 1890, in an article by F. H. Groome. The philological aspect of the question has received, in recent years, the attention of scholars such as E. Galtier and E. Littmann (see *Bibliography*).

In Egypt the Halab (sing. Ḥalabī) are to be found mostly in Lower Egypt carrying on their special occupations at the various markets and *mawālīd*, as traders in camels, horses and cattle. Their womenfolk are noted seeresses and medicine-women, practicing all the arts of sorcery (*sihr*): sand-divination (*ḡarb al-raml*), shell-divination (*ḡarb al-saḡ'a*), bibliomancy (*fath al-Kitāb*) etc. Their tribal subdivisions are variously given by Galtier (p. 7) and Newbold (p. 291). Their name suggests some connection with Aleppo (Ḥalab), but they themselves proudly claim a South Arabian ancestry their tribal chronicle being the popular broad-sheet production, *Ta'rikh Zir Sālim*.

The Ghagar Gypsy tribe, however, have a rather unsavoury reputation, a fact that is reflected in the modern Egyptian Arabic verb *ghaggar* "to be abusive". Their speech has fewer foreign ingredients and Galtier is of the opinion that they are more recent arrivals in the Nile Valley, probably wanderers from Constantinople. The argot of the Egyptian Gypsies is called *al-Sim*, and in modern colloquial Arabic in Egypt "to speak in enigmas" is *yatakallim bi 'l-Sim*.

The word Nūrī in Egypt is almost synonymous with thief, and their thieving propensities are libellously associated in a popular proverb with the inhabitants of Damanhūr [q. v.] (*alf Nūrī wa-lā Damanhūrī*). According to the age-old policy of setting a thief to catch a thief, the Nawar are often recruited as estate watchmen (*ghuffār*).

Their pursuits and proclivities are varied in the extreme. Besides the myriad occupations of enchanters, amulet-sellers, quack-doctors, snake-eaters and astrologers many of them travel about as hawkers, metal-workers, animal-trainers, professional tumblers, rope-dancers, acrobats, monkey-leaders, musicians and ballad-singers, while some are employed to circumcise Muslim girls, to tattoo lips and chins, and to bore ears and nostrils.

NUṢAIRĪ, the name of an extreme Shī'a sect in Syria.

I. The etymology of the name is disputed: *a.* contemptuous diminutive from *naṣrānī* "Christian", in allusion to certain ritual similarities (Renan); *b.* corruption of *naserīnī*, Latin name in Pliny for a Syrian tetrarchy of the first century near Edessa (but the name is still found uncorrupted *in situ*: it is the *Djār'at al-Nāṣirān*, which is crossed in going from Tell Kallākh to Homṣ, between the bridge called "Achan Keupru" and the lake of Homṣ; cf. British G. S. map of 1/250,000, *Homs-Beirut sheet*, 1918); *c.* *nisba* from a village near Kūfa, Naṣurāyā (Barhebraeus; cf. de Sacy, *Druzes*, i., p. clxxvii. and Ṭabarī, iii. 2128); *nisba* from an eponym: a fictitious Shī'ī martyr, son of 'Alī (according to the 'Alī-Ilāhis), or a freedman of 'Alī's or vizier of Mu'āwiya (Dussaud, p. 10); or rather Ibn Nuṣair, i.e. Muḥammad b. Nuṣair Namīrī 'Abdī (= of the 'Abd al-Kais, a Bakr clan), whom we shall find below as the first theologian of the sect.

As a matter of fact this name adopted from the time of Khaṣībī (d. 346 A.H.) by these sectarians, previously called *Namīriya* (Nawbakhtī, *Firaḡ*, p. 78; Ash'arī, *Maḡ*, i. 15) and who called themselves *mu'minūn*, has been applied since Sam'ānī (s.v.) and 'Umāra (ed. Derenbourg, p. 145, 286) not to a district only partly converted in the north of Syria, but to an extreme Shī'a sect also found in Egypt and along the Euphrates. This etymology, that of all the Muslim heresiographers, from the

Shi'ī Ibn al-Ghāḍā'irī (d. 411 A.H.) and the Sunni Ibn Ḥazm, has been and is the most probable.

II. The term has three acceptations: administrative, social and religious.

a. Administration: it is the "mountain of the Ansariye" of Syria (formerly Djabal Lukkām), the former *liwā* of Latakia to the east of the Orontes which has been extended to the south and since 1920 has become the state of the Alawīs (6,500 sq. km.; 334,173 inhabitants end of 1933 of whom 213,066 are Nuṣairīs, 61,817 Sunnīs in the north of Ṣahyūn and at Bāniyās, 5,669 Ismā'īlīs at Qadmūs and Maṣyaf, 53,604 Christians, mainly Orthodox at al-Ḥiṣn and to the north of Ṭarṭūs), capital Latakia (22,000): divided into two sandjaks and 8 qazās: Latakia, Ṣahyūn (Haffa), Djabala, Ṭarṭūs, Marḳab (Banias), 'Imrāniya (Tell Kallakh), Ṣāfiṭā, al-Ḥiṣn (Maṣyaf); a country of patient and industrious agriculturalists (tobacco, silkworms). Its place-names studied by M. Hartmann (*Z.D.P.V.*, xiv. [1891], 151—255) for the north (villages, not cantons of which there is a list in [Delattre] *Répertoire alphabétique*, Latakia [Raghā'ib press], Dec. 1933), show an old stratum of names, in part Aramaic and later vocational Arabic without any definite local religious traits except for modern Shi'a influences, beneath which one can hardly see the pagan or Christian culture of the substratum (cf. on the contrary, Lebanon). The study of the district from the point of view of ethnology and folklore has hardly begun; certain prohibitions regarding food have been noted (Niebuhr, *loc. cit.*; Dupont, in *J.A.P.*, 1824, p. 134; *Bākūra*, p. 57), some general (camels, hares, eels and catfish) and others special to the *Ṣamsiya* (female or maimed animals, gazelles, pig, crab, shellfish, pumpkins, *bāmiya*, tomatoes). The only domestic art is basket-making.

b. Socially, the name covers tribes of different origins, almost all speaking Arabic, who have adopted the Nuṣairī teaching:

1. in the state of the Alawīs (213,000): the nucleus seems to be descended from Yemen clans of Hamdān and Kinda (Ya'qūbī, in *B.G.A.*, vii. 324), Ghassān, Bahrā and Tanūkh (Hamdānī, *Ṣīfa*, p. 132) early converted to the Shi'a, from the Tiberiad and the Djabal 'Amīl (where there are still Metwalīs) to Aleppo, increased by immigrants from Taiy (end of the ninth century) and from Ghassān who at the time the Crusaders were being driven back came with their emir Ḥasan b. Makzūn (d. 638 = 1240, ancestor of the Ḥaddādīn), from Mount Sindjār, and imposed on the district their ruling families, their clans and ethnical structure (M. E. Ghālib, *Tawīl*, p. 356). The following is the present day list of the principal clans (*ashkā'ir*) (map in *R.M.M.*, xlix. 6; cf. *ibid.*, xxxvi. 278; and *Tawīl*, p. 349—52) grouped in 4 confederations: Kalbiya (at Qardāha; with Nawāṣira, Karāhila, Djullaiqiya, Rashāwina, Shalāhima, Rasālina, Djurdiya, Bait al-Shilf, Bait Muḥammad and Darāwisa); Khaiyāṭīn (at Marḳab: with Ṣarāmita, Makḥālisa, Faḳāwira, 'Amāmira [mixed with 'Abd al-Kais]); Ḥaddādīn (clan of the emir Ḥasan b. Makzūn: with Mahālība, Banī 'Alī, Yashūṭiya, 'Atāriya, Mashālība); and Matāwira (with Numailiyya, Sawārik of Aleppo, Ṣawārima, Maḥāriza who claim to be Hāshimīs, and Bashā-righa). From the xiii century their political history has been a series of persecutions by invaders (the Crusades; Baibars who covered the country with mosques; legend of Durrat al-Ṣadaf, daughter of

Sa'īd al-Anṣār [tomb at Aleppo] who instigated Timūr to sack Damascus; massacres under Selim I) and civil wars, both among the clans themselves and against the Ismā'īlīs of Qadmūs (lost, and retaken for a brief period in 1808 by the Maḥāriza) and of Maṣyaf, allied with the Turks;

2. in the sandjak of Alexandretta (58,000: at Antioch 1/3), Djuwaidiye, Suwaidiye, 'Aidiye, Djililiye; with two deputies in Parliament;

3. in the State of Syria (29,693): at Ḥamāh and at Ḥomṣ with one deputy; in two quarters of Aleppo; near Djisr, and to the north of lake Hule ('Ain Fit: 3,060);

4. in Palestine (2,000): to the north of Nablus; 5. in Cilicia from the xvth century (at Tarsus and Adana: 80,000 in 1921 now turkicised);

6. along the Euphrates. In Kurdistān and in Persia, there are ultra-Shi'a elements who have similar views and are called Nuṣairīs (among the 'Alī-lāhīs or Ahl-i Ḥaḳḳ; q.v.);

7. in Lebanon, there were some down to the xvth century (in Kisrawān).

III. c. Religion: it is the religious teaching of the Nuṣairī sect that we have to study more particularly here.

Cosmogony and eschatology. According to the Nuṣairīs there is immediately below the ineffable divinity a spiritual world of heavenly beings (or stars), which emanates from him in the following hierarchy: *Ism*, *Bāb* and other *Ahl al-Marātīb* (of the first seven classes); it is the "great luminous world" (*'ālam kabīr nūrānī*); when they appear here below it is to lead back gradually to heaven the "little luminous world", fallen beings, half materialized, imprisoned in the bodies which are their tombs; this operation revives them and brings them back to heaven to form the seven last classes of the *Ahl al-Marātīb* (119,000 out of a total of 124,000 = the traditional number of the prophets); next comes the "little world of darkness" (*ḡulmānī*), extinguished lights, souls that damnation materializes (*kuṃṣān al-masūkhīya*) in the bodies of women and animals; and lastly the "great world of darkness" composed of all the "adversaries" (*aḍḍād*) of the great luminous world; demons, who after innumerable metamorphoses in corpses of murdered men or slaughtered animals still quivering after death, are reduced to inert or passive matter (forged metals etc.). Just as the fall takes place through seven stages (doubts about divine appearances), so does the return to the heaven of the elect go through seven cycles or *adwār* of divine emanations.

Theory of revelation. The pure divinity (*ghaib*), the object of adoration, being ineffable his first emanation is the Name (*Ism*), the articulating prophetic voice (*Nāṭiq*), the signification (*Ma'nā*) of divine authority; such was the primitive teaching, that of Abu 'l-Khaṭṭāb, the common teacher of the Ismā'īlīs and the Nuṣairīs. But his disciple Maimūn Qaddāh, thinking that the enunciation by the divinity of an object which manifests him, is of greater importance than its signification which is a mute idea, detached the *Ma'nā* from pure divinity, identified it with the *Ṣamit* (the "silent" imām; opposed to *Nāṭiq*) and placed it as a mere accident, below the substance, the *Ism*. Then, by reaction, other Khaṭṭābiya like Bashshār, Sha'irī, retaining the equation *Ma'nā* = *Ṣamit*, reestablished the *Ma'nā* before the *Ism*. And, as Abu 'l-Khaṭṭāb had taught that in the Muḥammadiya cycle, the

signification (*ma'nawīya*) of the ineffable divinity was expressed through five privileged *Asmā'* (Muḥammad, 'Alī, Fāṭim [=the masculine form of Fāṭima, for as we have seen women have no souls; this explains why they may form part of the offering of hospitality among initiates], Ḥasan and Ḥusain, announcing equivalently its mysterious Unity), this group of Five equals, in which we recognise the Five of the *mubāhala* (q.v.; cf. our, *Salmān Pāk*, N^o. 7 of the *Soc. des Etudes Iraniennes*, 1933, p. 40—42) became in the hands of his pupil Maimūn a descending series of five terrestrial terms (symmetrical with the five spiritual terms, and inferior to them, the Druzes say): *Nāṭik* (= *Mīm*), *Asās* (= *Ain*), *Dā'i*, *Ma'dhūm*, *Mukāsir*: whence the *Mīm*, the *Khāridjī* Wardjalānī remarks, has the priority [cf. NUR MUḤAMMAD]. While according to *Bashshār*, the five were equal and became Muḥammad, Fāṭim, Ḥasan, Ḥusain, Muḥ(as)sin; 'Alī being thought to surpass them was identified by hyperdulia and against all logic with the *Ma'nā*. It is this last list that the Nuṣairīs have adopted. And this is the origin of their "god 'Alī" for whom there is no need to seek antecedents in the Syrian pagan pantheon or in a Druze emanation. *Bashshār* and the *Ulyā'iya* (or *'Ainiya*) copied by the Nuṣairīs have simply copied the Ḳarmāṭian list of Maimūn, by inverting the order of priority between *Mīm* and *'Ain*, and making the *Ṣamit* (= *Ma'nā*) the superiors of the *Nāṭik* (= *Ism*). The following is the double list (*Ism* in italics): *a*. in the seven cycles (*adwār*, *qibāb* personified by women among the poets) of the *zuhūrāt dhātīya*: 1. Hābil, *Adam*; 2. Nūh, *Shith* (sic!); 3. Yūsuf, *Ya'qūb*; 4. Yūsha', *Mūsā*; 5. Aṣaf, *Sulaimān*; 6. Shīm'ūn, *'Isā*; 7. 'Alī (= Abū Turāb, Amīr al-Nahl), *Muḥammad*. *Khāṣībī* allows that there were 44 (= 63-19) other *zuhūrāt* (*mithliya*) during these seven cycles; *b*. in the *saṭr al-a'imma* (= the twelve classical imāms substituted for the early list of Ibn Nuṣair [which we shall see later] by *Khāṣībī*) each imām is promoted *ma'nā* after having been the *ism* of his predecessor. The mode of appearance of the two divine emanations localised behind the screen (*taghyīb*, *ihṭidjāb*) of a phantomlike body (*ḥamṣ al-zuhūr*, *ma'din al-ishāra*), is a reality for the faith of the Nuṣairīs; this body is the support of a momentary illumination for the believer; while for the Druze nominalism it is only a mirage (*sarāb*) and for the *Ishākiya*, a real body, transfigured by a gradual sanctification.

Theory of catechesis. Abū 'l-Khaṭṭāb had taught that the Five persons of the *Ism* were pointed out to the believers by one or more inspired angelic intermediaries (*asbāb*, *rūḥāniyūn*; of whom the first was Salsal or al-Sīn = Salmān in the Muḥammadiya cycle; cf. our study, p. 36). These initiators became, with his disciple Maimūn, the five spiritual symmetricals of the *Asmā'* (*aḳl* = Salmān; *nafs* = Miḳdād; *djadd* = Abū Dharr; *fath* = ['Uthmān b.] Maẓ'ūn; *khayāl* = ['Ammār] b. Yāsir: corr. thus N^o. 60 of the Druze catechism). While among the Nuṣairīs, these five initiators remained equal and far below the *Ism*, became the five *Aitām* (Miḳdād, Abū Dharr, 'Abd Allāh b. Rawāḥa, 'Uthmān b. Maẓ'ūn and Ḳanbar), Salmān being thought to be above them was placed third as *Bāb* after the *Ma'nā* and the *Ism*. Such was the origin of the Nuṣairī triad, *'Ain-Mīm-Sin* (= *Ma'nā-Ism-Bāb*) in which there is no need to see an original pagan Syrian triad of Sun, Moon and Sky; this astrological correspondence, a favourite subject with

Nuṣairī poets, found its way into the *Shī'a* catechism of Kūfa under the influence of the Sabaeans of Ḥarrān; the assimilation, in the spiritual, of the sun to Muḥammad and of the moon to 'Alī (the moon, like the imām, is the regulator of canonical acts; cf. our, *Salmān*, p. 36, N^o. 4) appears at Kūfa with Mughira (d. 119 A.H.). In any case if pagan survivals are at the basis of astral gnosticism, as Dussaud suggests, it is not among the uneducated peasants (*Djabal Lukkām*) but among the town-dwellers in Ḥarrān that they have been able to survive.

The following is a list of the personifications of the *Bāb*: *a*. in the seven cycles (they are really only six, Salmān, the long-lived = Rūzbih): the *maḳāmāt*: 1. Djibrāyil; 2. Yāyil; 3. Ḥām b. Kūsh; 4. Dān b. Aṣhawū; 5. 'Abd Allāh b. Sim'an; 6. Rūzbih. *b*. In the *saṭr al-a'imma* (here are only eleven): the *maṭālīf*: 1. Salmān; 2. Ḳais b. Waraka Riyāḥī (= Safina); 3. Rushaid Hadjarī (d. ca. 58 A.D.); 4. Kankar b. Abī Khālid Kābilī; 5. Yahyā b. Mu'ammār b. Umm al-Ṭawil (d. ca. 83 A.D.); 6. Djābir b. Yazid Dju'fi (d. 128); 7. Abū 'l-Khaṭṭāb Muḥammad b. Abī Zainab Miḳlāṣ Asadī Kāhili (d. 138; cf. *Kashī*, p. 191); 8. Mufaḍḍal b. 'Umar Dju'fi (d. ca. 170); 9. Muḥammad b. Mufaḍḍal Dju'fi; 10. 'Umar b. al-Furāt (Dju'fi; killed in 203 A.D. by Ibrāhīm b. al-Mahdi); 11. Muḥammad b. Nuṣair 'Abdi (*Bāb* ca. 245, d. 270). Beginning with N^o. 7, these individuals have actually played the part of party leaders (Nrs. 9—10 had as rival Muḥammad b. Sinān). A nephew of N^o. 10, grandfather of the vizier Ibn al-Furāt, was the principal supporter of Ibn Nuṣair.

Below the *Bāb* are the Five *Aitām*, whom he associates as lords of the elements (*muwakkalūn bi-maṣāliḥ al-'alam*) with his role of Demiurge engendering souls by initiation. The list of Nuṣairī *aitām* given above should be compared (as well as that of the Druze *ḥudūd* "wise virgins" of Salmān; like the Nuṣairī *aitām* are the *dadjadjāt* of the *Diḳ al-'Arṣh* = Salmān) with the lists of Garmyi (Astarābādī, *Manḥadij*, p. 225) and of the Khattābiya of the Pamirs (*R. E. I.*, 1932, p. 442, transl. Ivanow).

IV. Initiation. This has three degrees (*nadjīb*, *naḳīb*, *imām*); the first consists of a solemn pledge (*'iḳād*, *khiṭāb* with *ṭalāk mu'allak*; cf. SURADJIYA) to reveal nothing of this spiritual marriage (*nikāḥ al-samā'*) in which the word of the initiator fertilizes the soul of the initiate in three seances, the ritual of which is related to that of the other extreme *Shī'a* sects (and of the *futuwwet-nāme*) and through them and the Sabaeans of Ḥarrān to the old mysteries of Central Asia (cf. SHADD; Dussaud, p. 106-119; *Bāk*, p. 2-7, 82). The cup of wine (called *'abd al-nūr*, Cat. N^o. 91), the anticipation of Paradise, is partaken of at it.

The initiatory teaching is essentially an ultra-*Shī'a* symbolism (*ta'wil*) of the seven canonical rites (*da'ā'im*) of Islām which are personified: 1. *ṣalāt*: the five *awḳāt* by Muḥammad (= *zuhr*; same among the *Ishākiya*), Fāṭim, Ḥasan, Ḥusain and Muḥsin (= *fajr*; among the Druzes as among the Khattābiya of the Pamirs by the *nudjabā'*, the *nuḳabā'*, Abū Dharr, Miḳdād, Salmān). Similarly the 17 (then 51) *rak'a*; 2. *ṣawm*: the secret guarded regarding 30 names of men (days) and thirty of women (nights of Ramaḍān); 3. *zakāt*: by Salmān; 4. *ḥajj*: the "sacred land 12 miles around", this is the sect; Bait = the *ism*; the Black

Stone = *Mikdād*; the 7 *ashwāt* = the 7 cycles; 5. *djihad* = the maledictions upon the *addād* (*Bāk.*, p. 44) and the discipline of the mystery; 6. *walāya* = devotion to the 'Alids and hatred of their adversaries; 7. the *shahāda*: referred to the formula '*ain-mim-sin*'. The *Kur'an* is an initiation to devotion to 'Alī; it was Salmān (under the name of *Djibrāyil*) who taught it to Muḥammad.

The annual festivals include: the *Shi'a* lunar festivals: *Fiṭr*, *Adḥā*, *Ghadir*, *Mubāhala*, *Firāsh*, 'Ashūrā, 9th Rabi' I (martyrdom of 'Omar) and 15th *Shahbān* (death of Salmān); then certain solar festivals: *Nawrūz* and *Mihrdjān*, Christmas and Epiphany, 17th *Adḥār*, St. Barbara. Certain liturgies (*ḥuddās*) pertain to these festivals and are wrongly called "masses" (*Ḥuddās al-Ṭib*, *al-Bakhūr*, *al-Ishāra*).

V. History of the Sect. All the initiatory isnaḍs of the sect go back from *Khaṣībī* to Ibn Nušair through two intermediaries, Muḥammad b. *Djunbulā* and Muḥammad al-Djannān al-Djunbulānī. Of Ibn Nušair, a notable of Baṣra, teacher of 'Aiyāshī, we know that in 245 A. H. he proclaimed himself the *bāb* of the tenth *Shi'i* imām 'Alī Naḳī and of his eldest son Muḥammad who died before him in 249, the year of the *ghaiba* of the Mahdi, according to Ibn Nušair (Ibn Bābawaih, *Ghaiba*, p. 62, l. 12, taken from *Nawbakhtī*, *Firaḳ*, p. 77, 83; such was still the belief of the Ḥamdānīd emir Abū Firās, *Diwān*, 1873, p. 39). It is only *Khaṣībī* who says that Ibn Nušair joining the eleventh imām (Nūri, *Nafas*, p. 144) had taken for mahdi his son Muḥammad b. Ḥasan.

Of the two successors of Ibn Nušair we only know that the second, like *Khaṣībī*, belonged to *Djunbulā* between Kūfa and Wāsiṭ, the centre of the Zandj and *Qarmāṭian* rebels (Tabari, iii. 1517, 1925, 2198; Mas'ūdī, *Tanbih*, p. 391), native place of Ibn Waḥshiyya. Ḥusain b. Ḥamdān *Khaṣībī* (vocalisation attested by *Dhahabī*, *Mushtabih*; in Persia and the 'Irāk wrongly now pointed Ḥadīnī) died in 346 (957) or 358 (968) at Aleppo (tomb to the north called *Shaiḫh Bairāk*); he was the real founder of the Nušairis; he lived, like his patrons the Ḥamdānids, between Kūfa (in 344, according to Astarābādī, *loc. cit.*, p. 112) and Aleppo; he dedicated to them his *Hidāya*; cf. his *Risāla Rāstbāshīya* (*Ṭawil*, p. 196 sqq., 240, 257). Among his 51 disciples the best known is Muḥammad b. 'Alī *Djillī* of *Djilliye* near Antioch where the chief of the *Haidaris* still lives. His direct disciple was Sa'īd Maimūn Ṭabarānī (d. 427 = 1035), a prolific polemicist against the chief of the *Ishākiya* of Latakia, Abū Dahība Ismā'il b. *Khallād*. After him mention is made of 'Ismat al-Dawla, Ḥātim Ṭawbānī (c. 700 = 1300; Paris MS. 1450, fol. 112a; *Ṭawil*, p. 315), author of the *Risāla Kubrūsiya*, Ḥasan Adjrūd of 'Ana, died at Latakia in 836 (1432) (*Ṭawil*, p. 317); lastly several heads of parties, the *Qamarī* poet Muḥammad b. Yūnus Kalāzī (1011 = 1602), who lived near Antioch, 'Alī Mākhūsi, Naṣir Naiṣāfi, Yūsuf 'Ubaidī. In this connection we may note that the four alleged Nušairī sects reduce themselves to two; that of the north (*Shamsiyya* because it is *Mimiyya*, *Shamāliyya* = *Haidaris*, from the name of 'Alī Haidarī, its head in the ixth [xvth] century = *Ghaibiyya*) and that of the south (*Kibliyya*, for it is dominant there), which is 'Aniyya, then *Qamarīyya*.

The spiritual organisation is quite distinct from the political among the Nušairis. The four *muḥaddam* mentioned by Niebuhr in 1780 (at Bahlūliye

near Latakia, Simerian-Khwābī, Sāfitā and *Djabal Kalbiye*) were temporal rulers. In 1914, there were two spiritual leaders, the *baghībāshī* (*shamsī*) in Cilicia and the *khādīm ahl al-bait* (*qamarī*) at *Qaradāḥa* (in 1933: Sliman al-Aḥmad of the Numailātiya). From 1920 the *Djāfarī Shi'i* *qādis* of the south have found their way among the Nušairis. In the last ten years a shepherd of the 'Amāmira, Sliman Murshid, has been trying to found a new sect to the north of Maṣyaf.

VI. Bibliography: 1. Nušairī and Muḥammadan sources: there is no canon of the Nušairī initiatory writings, as for the Druzes (cf. de Sacy and Seybold); but Catafago has given a list (*J.A.P.*, 1876) of 40 esoteric works, of which 29 are theological and 11 poetical (specimens translated by Huart, in *J.A.P.*, 1879); we may mention N^o. 20, *Kitāb al-Madīmū* (= 16 liturgical sūras; text in *Bāk.*, p. 7—34 and Dussaud, p. 181—189 with transl.) and N^o. 19, *Kitāb Madīmū al-A'yād* of A. S. M. Ṭabarānī: anal. in *J.A.P.*, 1848 and in *R.M.M.*, xlix. 57—60. This list might be supplemented (apocrypha in Paris MSS. 1449—1450 etc.) for there is a bio-bibliographical collection of the writers of the sect, similar to that of the *Ismā'ili* writers published by Ivanow. Nušairī writers make free use of moderate *Shi'a* works (Mufid is quoted by Ṭabarānī) and have even written some; e.g. the *Hidāya* of *Khaṣībī* which is still read in Persia. Two Nušairī catechisms have been studied: *Ta'lim Diyānat al-Nuṣairiyya*, in 101 questions (Paris MS. 6182; anal. by Wolf, *Z.D.M.G.*, iii. 302—309 where N^o. 88 is lacking), modern, directed against the Christians; and the old formulary by A. Baitār (anal. by Niebuhr, *Reisen*, ii. 440—444). An unimportant disclosure (but not without more or less biased errors) of the Nušairī rites was published in 1863 at Bairūt by a convert to Christianity, Sulaimān of Adana (he was assassinated): the *Bākūra Sulaimāniyya* (119 pp.; part transl. Salisbury, in *J.A.O.S.*, 1868, p. 227—308; cf. *Ṭawil*, p. 386; the first part is taken from an authentic manual used where there is not a lodge of initiation; cf. MS. Taimur, 'Ak., N^o. 564). A popular history, in places containing a good deal of romance but documented (without exact references), was published by Mehmed Emin Ghālib (d. 1932), of the Āl al-Ṭawil of Adana: *Ta'rikh al-'Alawiyyin*, pr. Taraḳkī, Latakia 1343 (1924), 478 pp. Two refutations are well known; a Druze one by Ḥamza (*Risāla dāmigha*, N^o. xvi. of the canon; perhaps refuting N^o. 9 of Catafago's list), and a Sunni by Ibn Taimiyya (*fatwā*, p. 94—102 of the *Madīmū*, Cairo 1323; transl. Guyard, in *J.A.P.*, ser. 6, vol. xviii., 1871, p. 158).

2. Western works: The fundamental work is that of R. Dussaud, *Histoire et religion des Nusairis*, Paris 1900, 35 + 213 pp. (cf. Goldziher, in *A.R.W.*, 1901, p. 85—96), the excellent bibliography in which comes down to 1899. There are also important articles by H. Lammens (in *Etudes religieuses*, Paris 1899, p. 461; *R.O.C.*, 1899, p. 572; 1900, p. 99, 303, 423; 1901, p. 33; 1902, p. 442; 1903, p. 149; *J.A.P.*, 1915, p. 139—159; cf. his *Syrie*, 1921, i. 184), a resume of Dussaud by R. Basset (in *Hastings' E.R.E.*, ix. [1917], 417—419), maps, lists and photos, especially by General Nieger, publ. by L. Massignon, in *R.M.M.*, xxxvi. (1920), p. 271—280 and xlix. (1922), p. 1—69; since Dussaud only popular articles have appeared: G. Samné, *La Syrie*, 1921, p. 337—342; J. de la Roche (in "*La Géographie*",

xxxviii. [1922], p. 279, and "Asie française", 1931, p. 166; A. Brun (in "La Géographie", xliii. [1925], p. 153); P. May, *L'Alaouite* (plate, Bairūt, [1931]); Paul Jacquot, *L'Etat des Alaouites* (second ed., 1929, 1931, 264 pp.); Ed. Helsey (articles in "Le Journal", Paris, April 4, 1931 *sqq.*); E. Janot, *Des croisades au mandat*, Lyons 1934. In connection with the present population of Antioch, Weulersse has studied the Nušairi town-dwellers there (*Bull. Inst. fr. Damas*, 1934).

3. In Arabic the only recent studies are: Kurdalī, *Khiṭaṭ al-Shām*, vol. vi. (1928), p. 258—268; and Kāmil Ghazṭī, *Nahr al-Dhahab* (Aleppo 1342 A.D., vol. i., p. 204—205); cf. also the Bairūt press (*Ahrār*, Sept. 19, 1930) and that of Damascus (*Aṭṭam*, March 29, 1933). (LOUIS MASSIGNON)

NUŠB, standing stone, especially one which is held sacred. The root is the same as in the Hebrew *maššēba*, Phoenician *nšb* and *mšbt* and South Arabian *nšb*, *mšb*. On the explanation of the Arabic forms the philologists are not agreed. They usually regard *nūšb* as a singular with the plural *anšāb*, but others pronounce it *nūšub* and consider it the plural of *našb* or *nišāb*. In addition to these forms Arabic has also from the same root the substantives *manšab* and *našiba*.

In answer to the much discussed question of the ideas associated with standing stones, Arabia only makes one contribution, in as much as it is evident that the fundamental conception was that of a dwelling place of the deity (*bet-el*). Of several of the old Arab deities we are told that they were rocks or blocks of stone, i. e. that they were incarnate or present in them. Whether this was always so or whether this form of worship developed out of stones placed upon graves (e. g. *Ḥamāsa*, p. 562, l. 8 and the use of *našiba* in the sense of tombstones) where the stones were originally memorials, is a question which cannot be dealt with here. We need only mention that the theory of worship of the dead breaks down if the deity has its abode in a tree, like al-ʿUzzā of Nakhlā in a samura tree (umbrella acacia). Examples of the presence of a deity in a stone are given in the articles *DHU ʿL-SHARĀ*, *AL-LĀT* and *MANĀT*. Other examples are *Dhu ʿl-Khalaṣa*, *al-Fals*, *al-Djalsad*, *Saʿd*. The worship associated with such stones usually consisted in sprinkling them with the blood of sacrifices. Thus Zuhair, 10, 24 speaks of a sacrificial stone, *manšab al-ʿitr*, the top of which was red with blood; a wounded and bleeding man is compared to a red *nūšb* (Ibn Saʿd, iv./1, 162, 4); among forbidden foods, *Sūra* v. 4 includes what is slaughtered 'ala ʿl-nūšb; and al-ʿAṣhā (*Morgenländische Forschungen*, p. 258) warns against worshipping a *dha ʿl-mušubi ʿl-manšūba* (? read *manšūbi*) with sacrifices; cf. also Mutalammis, ed. Vollers, 2, 1. The words of *Sūra* lxx. 43, which say that the resurrected stream out of their graves as if they were running (*yūṣḩūna*) to a *nūšb* (other readings *našb* or *nūšub*) refer to a characteristic feature of the worship. In view of the prominent part played by stones in the worship of the early Arabs, it is natural that Muḥammad should have included *anšāb* among things prohibited to the believers like wine, maisir etc. (*Sūra*, v. 92) for the worship associated with them was one of the principal forms of idolatry.

The smearing of the *anšāb* with blood recalls the well known statement in Herodotos iii. 8 regarding the ancient Arabian ceremony of con-

cluding alliances. There is however an essential difference. In the first place there is no question of any act of worship and further we are told that the participants put their blood on seven stones lying between them, and called upon the two Gods Orotalt and Alilat [q. v.]. The stones were not here conceived to be habitations of the gods but owed their merit to the number seven which was the important thing on taking oaths.

Bibliography: Ibn Hishām, p. 51; Wellhausen, *Reste arabischen Heidentums*, p. 101, 141; Baudissin, in *Z. D. M. G.*, lvii. 830; Goldziher, *Muhammedanische Studien*, i. 230 *sqq.*

(FR. BUHL)

AL-NÜSHĀDIR, also *nūshādir*, *navushādir*, Sanskrit *navasudara*, Chin. *nao-sha*, sal-ammoniac. The etymology of the word is uncertain; perhaps it comes from the Pahlavi *anōsh-ādar* "immortal fire" as we find the form *anūshādhur* in Syriac.

The oldest references to the occurrence of sal-ammoniac in a natural state are in the reports of Chinese embassies of the vith—vith centuries, which were the subject of very full investigation in connection with a geological problem, the question of volcanoes in Central Asia by H. J. von Klaproth, A. von Humboldt and C. Ritter, in the first third of the xixth century. The reference was to mountains of fire, Pe-Shan on the northern slopes of the Tien-Shan south of Kuldja, Ho-Chou on the south side of the Tien-Shan near Turfan and the sulphur pits of Urumtsi. The mountain Pe-Shan was said to pour forth fire and smoke continually; on one side of it all the stones burn, and are melted and then after flowing some miles solidify again. *Nao-sha* and sulphur were obtained there for medicinal purposes but the stones could only be collected in winter when the cold had cooled the ground. A. von Humboldt and C. Ritter do not accept a reference to the burning of coal by which sal-ammoniac and sulphur are obtained. The statement that the volcanoes of Central Asia produce sal-ammoniac in immense quantities is found in G. Bischof and even G. von Richthofen still held the volcano theory. The botanist and geographer Regel who travelled in these regions about 1879 was the first to dispute the existence of volcanoes. After Nansen, Le Coq and others had been unable to confirm the existence of volcanoes but established the fact that there were large deposits of coal on the surface, the old sources in Central Asia are now generally attributed to the burning of coal.

Almost all the Arab geographers who refer to Central Asia, from al-Masʿūdī, al-Iṣṭakhṛī, Ibn Ḥawḩal, to Yāḩūt and al-Kazwīnī, give fantastic stories about the method by which sal-ammoniac is procured in the Buttam hills east of Samarkand. Here again the details suggest the burning of the earth rather than volcanic exhalations. The Persian traveller Nāṣir-i Khushraw however mentions deposits of sal-ammoniac and sulphur at Demāwend and Ibn Ḥawḩal is acquainted with the volcanic sal-ammoniac of Etna; the latter was still exported to Spain in the xiiith century. At an earlier date they had begun to procure sal-ammoniac from the soot of camel dung. This product remained into modern times an important import by the Venetian traders and was only driven from the market by the modern cheap methods of production from gas liquor etc.

The use of sal-ammoniac as a remedy in cases of

inflammation of the throat etc. is already mentioned by Sahl b. Rabbān al-Ṭabarī. Ibn al-Baitār also quotes from other authors all kinds of remarkable uses of it, on which no stress need be laid. Djabir b. Ḥaiyān reckons sal-ammoniac among the poisons, which is true of large doses.

The part played by sal-ammoniac in alchemy is much more important. Djabir b. Ḥaiyān adds it as a fourth to the three πνεύματα of the Greeks, quicksilver, sulphur and sulphide of arsenic (AsS or As₂S₃), and it is used by all Persian-Arab alchemists in countless recipes. The preparation of carbonate of ammonia through distillation of hair, blood and other materials is already fully described in the "Seventy Books" and other works of Djabir. These methods seem to have given the stimulus to the discovery of the Egyptian method of obtaining sal-ammoniac. All these things came with alchemy to Spain and thence into western alchemy.

In the earliest Latin translations sal-ammoniac is still called *nesciador*, *misadir* etc., i. e. transliterations of the Arabic name. The general term *al-ʿUḡāb* is also found in the forms *alocab*, *alocaph* or translated by *aquila*. The identification of this salt with the salt of the oasis of Ammon already mentioned by Herodotus is first found in Syriac authors and lexicographers.

NUṢṬATĀBĪ. [See SİSTĀN.]

AL-NUWĀIRĪ. **SHIHĀB AL-DĪN AḤMAD B. ʿABD AL-WAḤHĀB AL-BAKRĪ AL-KINDĪ AL-ŠHĀFĪʿĪ**, Arab historiographer, born on the 21st Dhu 'l-Ka'da 677 (April 5, 1279) in Upper Egypt (probably in al-Kūs), died on the 21st Ramaḍān 732 (June 17, 1332) in Cairo, author of one of the three best known encyclopædias of the Mamlūk period (the others are by al-Umarī and al-Kāḷashandī). His father before him had been an official (*al-Kātib*) of note (628–699 = 1231–1300); the son filled several offices at the court of Sulṭān al-Malik al-Nāṣir (Muḥammad b. Ḳalāʾūn), whose favourite he was. He was for a time *Nāṣir al-Djais̄h* in Tripolis (Syria) and later *Nāṣir al-Diwān* in the Egyptian provinces of al-Dakḡaliya and al-Murtāḡhiya. His monumental work *Nihāyat al-Arab fī Funūn al-Adab* which was dedicated to al-Malik al-Nāṣir was a result of his administrative activities. As he says in the preface, at the beginning of his literary career he was almost exclusively concerned with *kitāba* (i. 2) and only later took up *adab* (i. 3); he wished to sum up in his encyclopædia all the knowledge that was indispensable for a first class *kātib*. The book is divided into five sections called *funūn*, each *fann* has five parts, each *ḡism* has a different number of chapters (*abwāb*) varying from two to fourteen. The first *fann* is devoted to heaven and earth, the second to man, the third to the flora and the fifth to history (full list of con-

tents: vol. i., p. 4–25; also in de Goeje, *Catalogus*², i. 5–14; cf. also Ḥādjdjī Khalifa, ed. Flügel, iv. 397–398, No. 14069). The division is unequal; the last *ḡism* of the fifth *fann*, which is devoted to Muslim history fills almost half the work, which runs to nearly 9,000 printed pages. In addition to the division according to subjects, the book is divided into volumes: the last, the 31st discovered by Aḥmad Zakī Pashā, contains the history of Egypt down to the death of the author in 731. From the dates of the separate parts and volumes it is evident that he devoted no less than twenty years to his book (cf. e. g. de Goeje, *Catalogus*², i. 16 where the year 714 is given; vol. i., p. 416: year 721; vol. v., p. 335: year 722 or Weil, *op. cit.*, xv.: year 725 etc.). In the earlier parts later additions are often found (e. g. vol. i., p. 13, 9–10; 15, 4–5; 20, 6–9). For contemporary history Nuwairī's book is of the first importance; in other parts its value depends on that of his sources. Its extent and mansidedness will only be appreciated when the edition is complete and a study like that of Björkman on al-Kāḷashandī *Ṣubḡ al-Aʿshā* has been undertaken. Al-Nuwairī himself makes no claim to originality; like the majority of Arabic encyclopædists, he expressly says that he follows his predecessors and places the whole responsibility on them (i. 26). Owing to the existence of many manuscripts of separate parts, European scholarship early became acquainted with al-Nuwairī; he is already mentioned by d'Herbelot (1625–1695) in his *Bibliothèque Orientale* (Maestricht 1776, p. 670). In the collections made by Golius and Warner some fine copies came to Leyden (including holographs) (W. M. C. Juynboll, *Zeventiende eeuwse Boefenaars van het Arabisch in Nederland*, Utrecht 1931, p. 178; *Catalogus*², i. 5–18, No. 5) and attracted great attention in the xviiith century. One of the first to study him was J. Heyman (d. 1737) whose *Nowairiana* — not too fortunate excerpts and notes — is in manuscript in Leyden (*Catalogus*², i. 18, No. 6; on Heyman see Reiske, *Prodidagmata*, in J. B. Köhler's *Abulfedae Tabula Syriae*, Leipzig 1766, p. 233 and Jan Nat, *De studie van de oostersche Talen in Nederland in de 18e en de 19e eeuw*, Purmerend 1929, p. 25–26). In general in the xviiith and early xixth centuries too much stress was laid on the account of pre-Muḥammadan history in al-Nuwairī (Schultens, *Monumenta*, 1740, *Historia*, 1786; Reiske, *Prodidagmata*, 1766, p. 232–234, *Primae lineae*, ed. Wüstenfeld, 1847; Rasmussen, *Historia praecipuorum arabum regnorum*, Copenhagen 1817, p. 81–124 etc.). Later investigation showed that with the existence of older sources, al-Nuwairī was only of secondary importance (see Mittwoch, *Proelia arabum paganorum*, Berlin 1899, p. 26–30; G. Olinder, *The Kings of Kinda*, Lund 1927, p. 19 etc.). Of considerable importance are the parts which deal with later, especially contemporary, history and historical geography; in the course of the xixth century they were frequently appealed to and excerpts edited or translated by Silvestre de Sacy, de Slane, Deffrémery, v. Hammer, Quatremère, Weil, Tiesenhausen, Amari, etc. One of the latest studies of a section of his work is the two volume *Historia de los musulmanes de España y Africa. Texto árabe y traducción española* de M. Gaspar Remiro (Granada 1917–1919; cf. Angel González Palencia, *Historia de la literatura árabe-española*, Barcelona 1928, p. 162–163). Aḥmad Zakī Pashā

deserves honourable mention for the interest he (died July 5, 1934) has aroused in the study of Nuwairi in modern times. With great industry and perseverance he has collected photographs of all 31 parts of the *Nihāyat al-Arab* frequently from autographs, and these are now deposited in the Royal Library in Cairo. As a result of his efforts, a complete edition was undertaken in 1923 and ten volumes are now available in the handsome and imposing edition of the *Dār al-Kutub al-Miṣriyya*, which affords a sound basis for the general estimation of the value of the book.

Al-Nuwairi was not only an official but also a fine calligrapher: he was able to copy as many as 80 pages a day. He himself made at least four or five copies of his own encyclopædia and sold them at 2,000 dirhems each. He made eight copies of the *Ṣaḥīḥ* of Bukhārī at 1,000 dirhems each. He was also famous as a bookbinder.

NUZHA. [See Mi'ZAF.]

O¹⁾

AL-OBOLLA was in the middle ages a large town in the canal region of the Tigris Delta, east of al-Baṣra. It was situated on the right bank of the Tigris and on the north side of the large canal called Nahr al-Obolla, which was the main waterway from al-Baṣra in a southeastern direction to the Tigris and further to 'Abbādān and the sea. The length of this canal is generally given as four *farsakhs* or two *barīds* (al-Maḳḍisī). Al-Obolla can be identified with 'Απολόγῳ Ἐμπόριον, mentioned in the *Periplus Maris Erythraei* (*Geogr. Graeci Minores*, i. 285) as lying near the coast. In a story told by al-Mas'ūdī (*Murūdj*, iii. 364) there is still a reminiscence of the period before the foundation of al-Baṣra, when al-Obolla was the only seaport in the Tigris estuary. The earlier Arab authors, in discussing the ancient administrative division of lower Babylonia in Sāsānian times and the foundations of towns by the Sāsānian kings, identify al-Obolla with other places, such as Dast-Maisān (Ibn Khurdādhbih, in *B. G. A.*, vi. 7) or Bahman Ardāshīr (Ṭabarī, i. 687), although these provinces must be sought on the opposite bank of the Tigris; Euty chius (in Migne, *Patrologia Graeca*, iii. 911) likewise makes al-Obolla a foundation of Ardāshīr I (cf. on this question: H. H. Schaefer, in *Isl.*, xiv. 27 sq.). Ibn Khurdādhbih, p. 7 quotes an Arabic poem of a contemporary of Muḥammad, where al-Obolla is mentioned. In the story of the conquests the town is reported to have been captured by 'Otba b. Ghazwān in the year 12 (633) and this conqueror described it to the caliph 'Omar as the "port of al-Baḥrain, 'Omān, al-Hind and al-Ṣīn" (al-Balādhurī, p. 341). This conquest enabled the Arabs to seize the opposite bank of the river (Dast-Maisān) and the so-called Euphrates

country. After the rise of al-Baṣra, al-Obolla became of secondary importance, but throughout the 'Abbāsīd caliphate it remained a large town. It was further from the sea than it had been, but still the effects of the tide were perceptible even above al-Obolla. All the great geographical authors of the xth—xiith century give a longer or shorter notice of this place. Its environs are described in very laudatory terms (cf. Yāḳūt, i. 97); the borders of the Nahr al-Obolla were one large garden (Ibn Ḥawḳal, in *B. G. A.*, ii. 160). The part of the Tigris opposite al-Obolla was important for navigation; in earlier 'Abbāsīd times there had been here a dangerous whirlpool, which had been eliminated by sinking a large quantity of stone in the water at the expense of an 'Abbāsīd princess. Here was erected a beacon light which is described by al-Idrīsī (ed. Jaubert, i. 364). Al-Obolla was in this period even larger than al-Baṣra, according to Maḳḍisī (in *B. G. A.*, iii. 118), and the place was noted for linen goods and also, as appears from al-Ya'qūbī (in *B. G. A.*, vii. 360), for its shipbuilding. Naṣīr-i Khusrāw, who visited the place in 443 (1051), gives likewise a vivid description of its beautiful surroundings (Berlin 1341, p. 133). On the other hand, al-Obolla does not seem to have been an important strategical point; occasionally it was occupied, as in 331 (942) by the governor of 'Omān in his action against the Barīdī brothers in Baṣra (cf. Miskawaih, ed. Amedroz, ii. 46), but as the events showed it was far from being an important bulwark of that city. After the xiiith century the general decline of those regions seems to have brought about the gradual disappearance of the place; Ibn Baṭṭūṭa (ii. 17 sq.) calls it only a village and the *Nushat al-Ḳulūb*

1) See also U.

(p. 38) knows only the Nahr al-Obolla, but does not mention the place itself. About this time it must have disappeared; later mentions (as late as the *Djihan-Gushā* of Hādjdjī Khalifa, p. 453) reproduce only obsolete geographical traditions.

(J. H. KRAMERS)

OCHIALY, Turkish corsair and admiral in the xvth century. He was born in a village of Calabria called Licastelli, about 1500, as, at the time of his death in 1587, he is said to have been over ninety years old. Ochialy is the name by which he is known in Italian sources of the time; the Turkish sources call him Uludj 'Alī, which name probably was given to him in Northern Africa. It may be the Arabic plural *'ulūdī* (from *'ilādī*), denoting his foreign descent (Hammer, *G.O.R.* 2, ii. 481, 751 gives conflicting statements). After being a captured galley slave, he became a Muḥammadan and entered on a long maritime career in the Mediterranean. According to the *Sidjill-i 'othmānī* (iii. 502), he became Tersāne Kapudānī in 961 (1554). He owed his rise to his connection with the famous admiral Törghud Re'īs, whose lieutenant he was. With Törghud he was at Djerba during Charles V's expedition against this island, and in 1565 both took part in the abortive expedition against Malta, where Törghud was killed. Then, until 1568, he was the latter's successor as viceroy of Tripolis, after which he was appointed in the same capacity to Algiers, as successor of Şāliḥ Pasha. During this time he extended the Algerian territory towards the west and, in 1567, he temporarily took Tunis from the last Ḥafṣid sultān and his Spanish protectors. Cervantes mentions him as king of Algiers in chapter xxxix. of his *Don Quixote*. In the following year Uludj 'Alī took part in maritime expeditions against the Venetians and the Maltese. His chief exploit is connected with the battle of Lepanto [q. v.], in September 1571, where he commanded the left wing of the Ottoman fleet. His success in bringing a part of the fleet safely to Constantinople after the defeat procured him the dignity of Kapudān Pasha, the former grand admiral Mu'eddhin-Zāde 'Alī having perished at Lepanto. On this occasion the name Uludj 'Alī is said to have been changed into Kılıdī 'Alī. He remained in this office until his death and commanded a series of predatory expeditions in the Mediterranean, participating i. a. in the reconquest of Tunis and La Goulette in 1574, along with the *ser'asker* Sinān Pasha [q. v.]. The inner political changes did not affect his favour with government circles. His last official activity was to bring the new Khān of the Crimea to Kaffa to install him in place of the deposed Khān. Ochialy displayed considerable activity in ship-building, especially after the débâcle of Lepanto; in addition he was the builder of the Topkhāne Djāmi'ī at Galata, and of a *ḥammām* in the sultān's palace. When he died unexpectedly in his own mosque (15th Radjab 995 = June 21, 1587) he left an enormous fortune, which fell to the state.

Bibliography: The chief Turkish historical sources are the *Ta'riḫ* of Selanikī, and the *Tuḥfat al-Kibār* by Hādjdjī Khalifa. A contemporary western source is: Pierre de Bourdeille de Brantôme, *Vies des hommes illustres et grands*

capitaines étrangers, 1594. — Further the historical works of von Hammer, Zinkeisen and Jorga, and E. Hamilton Currey, *Sea-wolves of the Mediterranean*, London 1910, p. 344 sqq.; Ḥafīz Ḥusain al-Aiwānserāyī, *Ḥadīqat al-Djāwāmi'*, ii. 59. (J. H. KRAMERS)

OCCSONOBA, the old name of the circle (*kūra*) in al-Andalus corresponding to the present Portuguese province of Algarve of which Silves [q. v.; Ar. *Shilb*] was the capital. The geographers and historians transliterate this place name in the forms Ukhūnuba and Ukhshūnuba; we also find the wrong forms Ushkūniya and Ushkūnya, the result of graphic errors. The name Osconoba seems also sometimes to be applied to a town which would be the old Santa Maria de Algarve [q. v.] now Faro. On the authority of an epigraphical reference it has however been identified with Milreu (Estoy) by Hübner (*CIL*, ii. 3—4, 781—785).

OFEN. [See BUDAPEST.]

OGHUL, a word common to all the Turkish languages, meaning "son", "child", "descendant". In this connection attention may be called to certain formations, such as *odjak oghlu*, "son of good house", *kul oghlu*, which used to be applied to the sons of the Janissaries. *Oghul* is very frequently found in family names where it takes the place of the Persian *zāde* or the Arabic *ibn*, e. g. Ḥekim-oghlu or Ḥekim-zāde for Ibn al-Ḥekim or Ramaḍān-oghul for Ramaḍān-zāde or Ibn Ramaḍān (where it should be remembered that the Arabic *ibn* does not mean exclusively "son" but "descendant"). An incomplete survey of such formations in an early period is to be found in *Sidjill-i 'othmānī*, iv. 778—812. — The new law on family names will give rise to numerous forms where *oghul* is combined with names and crafts.

Cognate is *oghlan*, "boy", "young man", "servant", a word also found in certain compounds, e. g. *iç oghlan*, "sultān's page" *dil oghlan*, "language-boy", "interpreter". From *oghlan* we also get *uhlan*, the name for light cavalry.

(FRANZ BABINGER)

OHOD, a mountain about three miles north of Medīna, celebrated for the battle fought there in the year 3 which ended unfavourably for Muḥammad. It is a part of the great range of hills which runs from north to south but here spreads to the east over the plain and thus forms an independent group of hills. The rocky walls surmounted by a rectangular plateau — without peaks, Yāqūt says — "which rise like masses of iron" (Burton) above the plain are quite destitute of trees and plants and only the face of the south wall is broken by a ravine which played a decisive part of the battle. The country round is stony and covered with gravel but farther south there are a few cornfields and gardens watered by a brook, but these are sometimes flooded by sudden rainstorms so that the pilgrims coming from the town cannot reach the hill. The Meccans who had

set out to avenge the defeat at Badr were encamped at the already mentioned cornfields at al-ʿIrd or al-Djurf, which were then full of ripe corn and supplied food for their animals. Muḥammad who against his will and against the advice of the elders was forced to leave the town and meet the enemy in the open field, went unhindered past the enemy camp and drew up his troops at the foot of the hill with their backs to it: a strategy no less peculiar than that of the enemy. At first it looked as if the enthusiasm of his followers would secure him a victory like that of Badr. But when the archers, whom the Prophet had placed upon the hill with distinct orders to prevent a flank attack by the enemy and not to leave their positions, were unable to restrain themselves when they saw the Meccan camp being pillaged and hurried up to see what they could get, Khālīd b. al-Walīd's quick eye at once saw the weak spot and when he attacked it, the tables were quickly turned. When the rumour spread that Muḥammad had fallen, the Muslims began to give way, and finally the flight became general. In reality the Prophet was only wounded, and some of his followers succeeded in concealing him in the ravine. Fortunately the Meccans, little experienced in warfare, did not know how to follow up their victory and began to go home. The Prophet was in this way saved from the worst but he had to lament the loss of many of his followers, including his uncle Ḥamza [q. v.], a loss which he felt particularly. It is not easy to get a clear idea of the treatment of the fallen as the traditions differ very much. It is said that the Medinese at first brought their dead to Medina but the Prophet soon forbade this; some mention a common grave in which those who knew the Qurʾān were put in the first row; but according to others the martyrs were buried singly or in twos and threes and some authorities say that the alleged common graves of the martyrs of Ohod are really those of beduins who died of hunger in the reign of ʿOmar (Wākīdī, transl. Wellhausen, p. 143). All accounts however agree in their tendency to glorify Ḥamza. The Prophet is said to have uttered the *takbīr* over him first; the bodies of the other dead are said to have been placed beside him one by one and Muḥammad prayed over him 70 times, as he included him in the prayer with each new corpse. Every year afterwards the Prophet went to Ohod, to visit his and the other graves and the early caliphs did so also. Muḥammad is said to have ordered that the women in lamenting the death of every Anṣārī should begin with a lament for Ḥamza. In this way Ohod became one of the most prominent places of pilgrimage of the Muḥammadans. A mosque was built over Ḥamza's tomb and it is mentioned by Muḥaddasī; it lay behind a well near the graves of the other martyrs. We have a brief description by Ibn Džubair in the viith (xiith) century. He mentions first of all Ḥamza's mosque on the south side of the hill 3 miles north of Medina; a mosque is built at his grave with the grave in an open space to the north of it. Opposite lay the other graves of martyrs and opposite them again was the cave where the Prophet took shelter on the lower part of the hill. Around the graves of the martyrs is a low wall of red earth ascribed to Ḥamza at which the people seek a blessing. The best modern

description is that of Burckhardt who visited the place in 1814 after its devastation by the Wahhābīs. From his description we may quote the following: "About one mile from the town stands a ruined edifice of stones and bricks, where a short prayer is recited in remembrance of Muḥammad having here put on his coat of mail, when he went to engage the enemy. Farther on is a large stone, upon which it is said that Muḥammad leaned for a few minutes on his way to Ohod.... To the east of this torrent, the ground leading towards the mountain is barren, stony, with a mound, on the slope of which stands a mosque, surrounded by about a dozen ruined houses, once the pleasure villas of wealthy towns-people; near them is a cistern, filled by rain water. The mosque is a square solid edifice of small dimensions. Its dome was thrown down by the Wahhābīs but they spared the tomb. The mosque encloses the tomb of Ḥamza and those of his principal men who were slain in the battle; namely, Muṣʿab b. ʿUmair, Djaʿfar b. Shammās (not mentioned in the traditions) and ʿAbd Allāh b. Djaḥsh. The tombs are in a small open yard, and, like those of the Baḳīʿ, are mere heaps of earth, with a few loose stones placed around them. Beside them is a small portico, which serves as a mosque. A little further on, towards the mountain, which is only a gunshot distance, a small cupola marks the place where Muḥammad was struck in battle by a stone.... At a short distance from this cupola, which like all the rest has been demolished, are the tombs of twelve other partisans of the Prophet, who were killed in the battle.... The people of Medina frequently visit Ohod, pitching their tents in the ruined houses, where they remain a few days, especially convalescents, who during their illness had made a vow to slaughter a sheep in honour of Ḥamza if they recovered. Once a year (in July, I believe), the inhabitants flock thither in crowds, and remain for three days, as if they were the feast days of the saint. Regular markets are then kept there: and this visit forms one of the principal public amusements of the town". In modern times Wavell records that the opening of the railway to Medina in 1906 produced a disturbance among the beduins which resulted among other things in the Banū ʿAlī, whose duty it was to protect the pilgrims visiting the tomb of Ḥamza, while putting no obstacles in their way, declining to take any responsibility. The Wahhābīs who now rule in northern Arabia permit pilgrimage but as at all the holy places forbid actual worship.

'OKAILIDS, a dynasty of al-Mawṣil. The Banū ʿOkail belonged to the great Beduin tribe of ʿAmir b. Ṣaʿsaʿa. From their original home in Central Arabia they spread in course of time in different directions and among their better known subdivisions were the Banū Khafāja [q. v.] and the Muntafik [q. v.]. In the fourth century of the

Hidjra the Banū ‘Oḳail in Syria and Irāk were tributary to the Ḥamdānids and when the latter were no longer able to maintain themselves in al-Mawṣil the city passed to the ‘Oḳailids. The Kurd chief Bādḥ, the founder of the dynasty of the Marwānids [q. v.], endeavoured to bring al-Mawṣil under his rule whereupon the two Ḥamdānid brothers Abū Ṭāhir Ibrāhīm and Abū ‘Abd Allāh al-Ḥusain appealed for help to the emir of the Banū ‘Oḳail, Abū ‘l-Dḥawwād Muḥammad b. al-Musaiyib. The latter at once announced his readiness to assist them and was given as a reward Djazīrat b. ‘Omar, Naṣībīn and the town of Balad. After the death of Bādḥ in battle (380 = 990–991) his sister’s son Abū ‘Alī al-Ḥasan continued the war with success. Abū ‘Abd Allāh was taken prisoner and when Abū Ṭāhir went to Naṣībīn to seek the protection of Abū ‘l-Dḥawwād, the latter took him, his son and several of his retainers prisoners, put them to death and then occupied al-Mawṣil. He then submitted nominally to the Būyid Bahā’ al-Dawla [q. v.] and persuaded him to send a representative to al-Mawṣil. But the latter did not play a part of any importance. Bahā’ al-Dawla’s efforts to make his influence felt in al-Mawṣil did not have the success he desired. Abū ‘l-Dḥawwād remained the real ruler. He died in 386 or 387 (996–997) and was succeeded by his brother al-Muḳallad [q. v.]. The latter was assassinated in Ṣafar 391 (Dec. 1000–Jan. 1001) and his eldest son Karwāsh [q. v.] was recognised as emir of al-Mawṣil. After holding office for fifty years, he was deposed by his brother Abū Kāmil Baraka [cf. KARWĀSH] in 442 (1050–1051) and on the latter’s death in the next year 443 (1051–1052) the rule passed to his nephew Kuraish b. Badrān [q. v.]. The latter was succeeded in 453 (1061) by his son Muslim [q. v.] under whom the territory of the ‘Oḳailids attained its greatest extent; their power then declined rapidly. On Muslim’s death (478 = 1085) his brother Ibrāhīm who had been languishing in prison for years was set free and proclaimed emir of al-Mawṣil. In 482 (1089–1090) however, the Saldjūk sultān Malikshāh invited him to come and give an account of his stewardship, and as soon as he appeared he was thrown into prison and Fakhr al-Dawla b. Djāhir [q. v.] sent as governor to al-Mawṣil. Only after Malikshāh’s death (Shawwāl 485 = November 1092) was Ibrāhīm set free and returned to al-Mawṣil. In the meanwhile Muslim’s widow Ṣafiya who was also the aunt of Malikshāh, had married Ibrāhīm, and on the death of Malikshāh she went with ‘Alī, her son by Muslim, to al-Mawṣil. But as Muḥammad, another son of Muslim’s, also coveted the city, its inhabitants split up into two parties and when it came to fighting, Muḥammad had to take to flight, while ‘Alī occupied al-Mawṣil. As soon as Ibrāhīm heard of this he began negotiations with Ṣafiya and received from her the town of Balad which Malikshāh had given her as a fief. The Saldjūk prince Tutuṣh [q. v.] then demanded that Ibrāhīm should recognise him as sultān and when the latter refused, the decision was left to arms. In Rabi’ I 486 (April 1093) the two armies met near al-Mawṣil; Ibrāhīm was taken prisoner and put to death and Tutuṣh occupied al-Mawṣil where he installed ‘Alī b. Muslim as governor. It was however not long before his brother Muḥammad b. Muslim endeavoured to dispute his power. He asked the emir Kurbuḳa

[q. v.] to help him against his brother and the result was that he lost his life while ‘Alī had to give up al-Mawṣil (Dhu ‘l-Ḳa‘da 489 = Oct.—Nov. 1096).

In addition to the emirs of al-Mawṣil, several ‘Oḳailid dignitaries are mentioned in history. In 479 (1086–1087) Salim b. Mālik b. Badrān b. al-Muḳallad surrendered Ḥalab to sultān Malikshāh and received in return the fortress of Dja‘bar [q. v.] to which al-Raḳka was soon added and these remained almost without interruption in the possession of his descendants until 564 (1168–1169) when his grandson Mālik b. ‘Alī b. Salim ceded them to Nūr al-Dīn Maḥmūd b. Zangī.

Another branch was established in Takrīt [q. v.]. According to Ibn al-Athīr, x. 289, where a short sketch of the history of this town is given down to the year 500 (1106–1107), the ‘Oḳailid Rāfi b. al-Ḥusain died in 427 (1036) as lord of Takrīt. His nephew Abū Man’a Khāmīs b. al-Taghlib then inherited his governorship. After the latter’s death in 435 (1043–1044) he was succeeded by his son Abū Ghāshshām. The latter was suddenly attacked in 444 (1052–1053) by his brother ‘Isā and thrown into prison and ‘Isā seized the power. In 448 (1056–1057) ‘Isā died and soon afterwards his son Naṣr died also. ‘Isā’s widow Amīra then had Abū Ghāshshām, who was still in prison, murdered and installed a governor named Abū ‘l-Ghanā‘im in Takrīt but he handed the town over to the Saldjūk sultān Tuḡhrīl beg.

‘Oḳailid governors are also occasionally found in other towns, like ‘Ana, Ḥaditha, Hit and ‘Ukbarā. After the extinction of the dynasty in Mesopotamia and the ‘Irāk the ‘Oḳailids withdrew to Bahrain.

(K. V. ZETTERSTÉEN)

‘OḲĀZ, name of an oasis situated between Ṭā’if and Nakhla. The Arab philologists derive the name from the root meaning ‘to retain’, in the middle forms ‘to assemble’ or from the meaning of ‘concourse’. Both interpretations are based on the fact that ‘Oḳāz was primarily celebrated for its annual fair, which was held on the 1st–20th Dhu‘l-Ḳa‘da and was at the same time an official occasion of *mufākhara*, i.e. a gathering of tribes or rather of groups and individuals belonging to the same tribe where individuals competed for honours and for the honour of their tribe.

These assemblies to which poets came to recite their poems, were also great fairs, at which merchandise was exchanged. That of ‘Oḳāz was followed by those of Madianna (last ten days of Dhu ‘l-Ḳa‘da), of Dhu‘l-Madīz (1st–8th Dhu‘l-Hijja)

and those which accompanied the great pilgrimage. These weeks formed the climax of public life in pre-Islāmic Arabia — the truce of the sacred months making discussion of the political affairs of the tribes of the Ḥidjāz possible. The Tamīm took no part in them. Islām by condemning hereditary and individual feuds was the cause of the decline of the *mawāsim* [cf. MAWSIM].

Muḥammad was on his way to the fair of 'Okāz with a few of his companions when at Nakhla(a) the *djinn* heard the Qur'ān being recited and were struck with admiration as we are told in the Qur'ān (sūra lxxii. 1 *sqq.*; xlvi. 28 *sqq.*) and *ḥadīth* (Bukhārī, *Adhān*, bāb 105; *Tafsīr*, sūra lxxii., bāb 1; Muslim, *Ṣalāt*, trad. 149; Tirmidhī, *Tafsīr*, sūra lxxii., trad. 1).

'Okāz is also noted for the fighting which took place there at the beginning of Islām.

(A. J. WENSINCK)

'OĖBA B. NĀFI' B. 'ABD KAIS AL-KURASHI AL-FIHRI, the famous general of the first century A.H. who endeavoured by consolidating the first successes of the Arab conquest in North Africa to put an end to the resistance of the Berbers but finally perished after a troubled career at the hands of African rebels.

The data supplied by the historians regarding the career of 'OĖba are relatively abundant but like all that relates to the beginnings of the expansion of Islām in North Africa have frequently to be taken with caution. They come from later traditions, and W. Marçais has clearly demonstrated the particular bias which they represent (*Le passé de l'Algérie musulmane*, in *Histoire et Historiens de l'Algérie*, Paris 1931, p. 150). It is certain as regards 'OĖba that the essentials of what the Maghribī historians have preserved about him are of eastern origin and in addition the most circumstantial accounts of his career that we possess are from the pens of eastern authors: Ibn 'Abd al-Ḥakam and al-Nuwairī. The only authority for the African tradition regarding 'OĖba so far known is his descendant Abu 'l-Muhādjir. The information, at once detailed and new, found in a Maghribī MS. (cf. *Bibliography*) about 'OĖba's raid into the south of Morocco seems fairly reliable up to a certain point from the very fact of its precision. Use of it after a critical study seems likely to throw doubt upon the statements hitherto regarded as reliable regarding the progress and chronology of the Arab conquest of Northwest Africa, such as are given in studies, already antiquated like Fournel (*Les Berbers, Etude sur la conquête de l'Afrique par les Arabes*, Paris 1875), or more recent and more distinguished works but also based on unchecked translations like that of E. F. Gautier (*Les siècles obscurs du Maghreb*, Paris 1927).

This is why in the present state of our knowledge we shall here confine ourselves to tracing a sketch

of 'OĖba b. Nāfi's activities in North Africa which need not be considered final on all points.

'OĖba was born in the last years of the Prophet's life and was through his mother the nephew of 'Amr b. al-'Ās [q. v.], the celebrated conqueror of Egypt, who shortly before his death in 43 (663) gave him the supreme command in Ifrikiya. According to a story, difficult to verify, 'OĖba at that time was directing his attention to the Sūdān and establishing Islām by force of arms at Ghadāmes. But this was only a raid and not a regular occupation of the country. It was not till some years later that we find him preparing for a new expedition, no doubt better equipped than the others. This was the expedition of 50 (670) in which he founded the military stronghold of al-Ḳairawān [q. v.] in the middle of the province of Byzacene. For this expedition 'OĖba had at his disposal a force of 10,000 horsemen which was gradually increased by the accession of Berbers converted to Islām; with the help of this force he was able not only to attack the Byzantines who continued to hold out in the towns of the coast of Ifrikiya but also the Berbers. The foundation of Ḳairawān, forming a strong base for the Arab troops, seems to have very much facilitated if not the occupation and pacification of Ifrikiya, at least its conversion to the religion of and obedience to the authority of the invaders. But it was not 'OĖba who gathered the fruits of this spread of Islām. Ifrikiya remained a dependency of the province of Egypt; the new governor Maslama b. Makhlad al-Anṣārī dismissed 'OĖba in 53 (675) and replaced him by one of his own clients, Abu 'l-Muhādjir, who very soon undertook a raid on Algiers, and according to Ibn Khaldūn got as far as Tlemcen [q. v.]. On his return to the east, 'OĖba is reputed to have complained to the caliph Mu'āwiya of the way in which he had been treated by the governor of Egypt and a little later Mu'āwiya's successor restored him his governorship.

This second appointment of 'OĖba to Ifrikiya may be put with certainty in 62 (682). His enemy, the governor Abu 'l-Muhādjir, had in the course of his raid defeated the Berber chief Kusaila [q. v.] who became a Muslim and it was on these two that 'OĖba wreaked his vengeance in his turn. He put them into chains and carried them with him wherever he went. At the same time he prepared an expedition on a larger scale than the previous one the stages of which can be traced from the narrative of Ibn Khaldūn. 'OĖba's army, preceded by an advance guard under Zuhair b. Kais al-Balawī, advanced from Ḳairawān into the Central Maghrib, at first encountering in the Zāb and again in Tāhart Berber and Byzantine elements which he defeated and received tribute from. He finally reached the region of Tangier. The chief of the Ghumāra, Ilyān (Julian?), submitted to the Arab leader and became his military adviser. He dissuaded him from crossing the Straits of Gibraltar and undertaking the conquest of Spain and pointed out the danger threatening the Arab troops from the great body of still unconverted Berbers in the Great Atlas and Sūs [q. v.]; 'OĖba therefore turned his attention to the Berbers. First of all he occupied the massif of the Zarhūn, took the town of Ūlilī (Volubilis), crossed the Middle Atlas and advanced through the Dra (Dar'a) and Sūs, the inhabitants of which he pursued up to the desert of the Lamtūna. He

then turned to the Atlantic coast, reached the land of Safi and began to subject the Berber bloc of the Maṣmūda of the Djebel Daran (Great Atlas) then that of the Anti-Atlas as far as Tārūdānt [q.v.].

But however brilliant they seemed these successes led nowhere. An advance no matter how brilliant through a country meant nothing if it was not followed by an occupation which ‘Oḳba was not able to secure. But when he and his army turned homewards, he does not seem to have realised that all would have to be done again. Kusaila escaped from him and organised resistance, making use alike of the fondness for fighting of his Berber compatriots and the discipline and technical skill of the Byzantine garrisons in the country. ‘Oḳba trusting to his good fortune did not see the danger. Reaching the Zāb, at Thubunae (Ṭubna) he went so far as to divide his army into several contingents which he sent off in succession on the road to Ḳairawān. Trusting the Berbers, who had submitted to him, he had only a small body of Arabs with him when he set out from Ṭubna for the Awrās [q.v.]. But he was soon surrounded by Kusaila's bands on the borders of the Sahara at Tahūda and fell with 300 of his companions in 63 (683). His grave and that of his companions is still pointed out at the same place and forms the centre of a little village which bears his name: Saiyidi ‘Uḳba (vulg. Sidi ‘Oḳba), a few miles S.E. of Biskra, not far from the old site of Tahūda.

(E. LÉVI-PROVENÇAL)

AL-‘OLAIMĪ, ABU ‘L-YUMN ‘ABD AL-RAḤMĀN B. MUḤAMMAD MUḌJĪR AL-DĪN AL-‘OMARĪ AL-ḤANBALĪ AL-MAḲDISĪ, an Arab historian, born on the 13th Dhū ‘l-Ḳa‘da 860 (Oct. 13, 1456) in Jerusalem, studied from 880 (1476) in Cairo, became in 889 (1484) ḳāḍī in Ramla and in 891 (1486) chief ḳāḍī in Jerusalem. He retired in 922 (1516) and died in 928 (1522) in Jerusalem.

His best known work is a history of Jerusalem and Hebron, which he began on the 25th Dhū ‘l-Hijja 900 (Sept. 17, 1494) and finished on the 17th Ramaḍān 901 (May 31, 1495), entitled *al-Ins* (= *Anis*, which is sometimes found in the MSS. in place of it and is sometimes corrupted to *Uns*) *al-djālī bi-Ta’riḫ al-Ḳuds wa ‘l-Khalīl*. For the earlier period he takes almost everything out of *Shihāb al-Dīn al-Maḳdisī*'s (d. 765 = 1364) *Muthir al-Gharām ilā Ziyārat al-Ḳuds wa ‘l-Sha‘m* (cf. C. König, *Der Kitāb Muthir* etc., Leipzig Diss. 1896, p. 20) and supplements it mainly with biographical data. The work which exists in numerous MSS. (see *Cat. Cod. Ar. Lugd. Bat.*, 2nd ed., N^o. 957; Brockelmann, *G.A.L.*, ii. 43, and also Paris N^o. 4922, 5759—60, 5999, 6303; Aya Sofia, N^o. 2976; Ḳilič ‘Alī Pasha, N^o. 729; Bankipore, xv. 1084—1085, etc.) was first made known in Europe through extracts in the *Journal des Étrangers*, 1754, April, p. 2—45, and then through Hammer's *Fundgruben*, ii.—v. From the printed edition, Cairo 1283, H. Sauvaire translated *Histoire de Jérusalem et d'Hébron depuis Adam jusqu'à la fin du XV^{ème} siècle*, *Fragments de la chronique de Moudjiraddyn*, Paris 1876. At the end of his work the author announces his intention of continuing it when able to do so. This continuation is found in Leyden N^o. 953 down to 914 and in Oxford (see *Cat.*, i. 853, 2) and in the Ḳhālidiya in Jerusalem (see A. L. Mayer, in *Journ. Pal. Or. Soc.*, xi. 1—13). Probably before he wrote his great work, he had written a general history with special reference to Jerusalem and continued it down to the year 896 (1491); this survives in a MS. in the British Museum, Suppl. N^o. 488 without title and is perhaps identical with the *al-Ta’riḫ al-muṭabar fī Anbā’ man ‘abar* mentioned by Ḥāḍjdi Ḳhalifa, ii. 150; v. 619. To the *Ṭabaḳāt al-Ḥanābila* of ‘Abd al-Raḥmān b. Aḥmad b. Radjab (d. 795 = 1393) he wrote a continuation *al-Manḥadj al-aḥmad fī Tarāḍjim Aṣḥāb al-Imām*, MSS. Berlin N^o. 10043, Laleli N^o. 2083 (see Spies, *Beiträge*, 15), in the possession of J. E. Sarkis (*Cat.* 1928, p. 48, 15; photo in Cairo, *Fihris*², v. 372). Kamāl al-Dīn Muḥammad b. Muḥammad Sharif al-Ghazzī (d. 1214 = 1799—1800) wrote a continuation of this down to the year 1207 (1792—1793) and on this and the original work Muḥammad Djamīl b. ‘Omar al-Shaṭṭī al-Baghḍādī in 1325 (1907) based his *Mukhtaṣar Ṭabaḳāt al-Hanābila*, Damascus 1339 (see *R.A.A.D.*, i. 160). Whether the al-‘Olaimi who is mentioned in Dāwūd al-Mawṣilī, *Makḥṭūṭāt al-Mawṣil*, p. 152, 24 as the author of a commentary on the *Divān* of Ibn al-Fāriḍ is the same as our author, is a question which it is impossible to decide with our present knowledge.

Bibliography: Wüstenfeld, *Geschichtsschreiber der Araber*, p. 512.

(C. BROCKELMANN)

OLČAITU KHUDĀBANDA, eighth *Ilkhān* of Persia, reigned from 1304 till 1317. He was, like his predecessor Ghāzān, a son of Arghūn and a great-grandson of Hülāgū. At his acces-

sion he was 24 years of age. In his youth he had been given the surname of Kharbanda, for which different explanations are given (cf. the poem by Rashīd al-Dīn reproduced on p. 46 of E. G. Browne, *A Literary History of Persia*, iii. p. 46 sq. and Ibn Baṭṭūta, ii. 115), but E. Blochet, in his *Introduction à l'histoire des Mongols* (G.M.S., xii. 51), has explained the name as a Mongolian word, meaning "the third". The Byzantine historian Pachymeres calls him Χαριπαντράς (ed. Bonn 1835, ii. 459). His mother Uruk Khātūn had him baptized as a Christian, but under the influence of one of his wives he afterwards embraced Islām and received the name Muḥammad, while his surname was changed to Khudābanda. In addition he took the *laqab* of Ghīyāth al-Dunyā wa 'l-Dīn. When Ghāzān died, Olcāitu was absent with an army on the Indian frontier of the empire, but there was no difficulty about the succession, as a possible claimant, his cousin Ālafrank, had been killed previously. Olcāitu continued the traditional warfare of his predecessors with the Mamlūk Empire and their friendly relations with European Christian powers; some of the letters addressed by him to the Pope Clement V and the English King Edward II are still extant; these letters were brought by his Christian envoy Thomas Ilduči, who, in contradiction to the facts, kept up the fiction that his master was a Christian. Olcāitu likewise sent a military expedition to relieve the Byzantine Emperor Michael Palaeologos by dividing the force of the Turks in Asia Minor, but this aid was of little avail (Pachymeres, ii. 588). Against the Mamluks Olcāitu himself conducted a campaign during which the town of Raḥba on the Euphrates was besieged in vain (1313). The authority of the government in the interior was strengthened by the conquest of Dīlān in 1307 and in the same year by the conquest of Herāt from the vassal Kurt dynasty. In 705 (1305—1306) Olcāitu made the recently founded town of Sulṭāniya [q. v.] the capital of his empire, on the occasion of the birth of his son and successor Abū Sa'īd. Prosperity was increased by the laws of Ghāzān, whose canon was promulgated again by Olcāitu, and also by the able administration of the famous historian Rashīd al-Dīn [q. v.]; the latter's colleague and rival Sa'īd al-Dīn was executed in 1312 through the intrigues of 'Alī Shāh, who took his place. The dispute which soon arose between the two ministers made the sultān in 1315 assign to each of them the administration of half of the empire. The attitude of Olcāitu towards Islām deserves special notice. After first showing preference for the Shī'a (cf. the story of Majīd al-Dīn of Shirāz told by Ibn Baṭṭūta, ii. 57 sqq.), he became an adherent of the Sunna. Then, after an attempt to introduce the Shāfi'i instead of the Ḥanafī *madhhab*, he finally decided again to join the Shī'a, after having visited the tomb of 'Alī; one of his coins affords proof of this. — Olcāitu is described as a virtuous, liberal ruler; he showed interest in the observatory of Marāgha, where Aṣīl al-Dīn, Naṣīr al-Dīn's son, was appointed astronomer-royal. He likewise favoured the literary-historical activity of Rashīd al-Dīn and the historian Waṣṣāf. He died at Sulṭāniya on December 16, 1316; afterwards Rashīd al-Dīn was accused of having caused his death. In Sulṭāniya his tomb is still to be seen.

Bibliography: Contemporary sources are

the *Tārīkh-i Waṣṣāf*, lith. Bombay 1269, and a continuation of Rashīd al-Dīn's *Djāmi' al-Tawārīkh*, which continuation is found in several manuscripts, but has not yet been edited. Further the *Tārīkh-i Guzida* by Ḥamd Allāh Mustawfi and the later Persian works. — Of European works must be mentioned: D'Ohsson, *Histoire des Mongols*, iv. 478—598; J. von Hammer-Purgstall, *Geschichte der Ilchane*, Darmstadt 1843, ii. 178—251; H. Howorth, *History of the Mongols*, iii. 534—584; E. Blochet, *Introduction à l'histoire des Mongols*, in G.M.S., xii., Leyden—London 1910, *passim*. — For Olcāitu's coins: Stanley Lane-Poole's *Catalogue*, vi. 44 sqq.

(J. H. KRAMERS)

'OMĀN, a nominally independent state on the Persian Gulf under the protectorate of England. Its extent has varied considerably in the course of its history. While Iṣṭakhri, for example, who gives 'Omān an extent of 300 parasangs, includes the district of Mahra in it, Idrīsī describes the latter as an independent country. In the northwest 'Omān was bounded by the province of al-Baḥrain or al-Hadjar, in the south by Yaman and Ḥaḍramūt. The sultanate reached its greatest extent under Sulṭān Ibn Mālik b. al-'Arab b. Sulṭān, under whom 'Omān not only included the territory from Rās al-Ḥadd to Djuḥfār, but also al-Baḥrain and other possessions, particularly on the African coast where his son Saif conquered Kilwa and Zanzibar. 'Omān at the present day includes the whole south-eastern part of Arabia with a strip about 500 miles long on the south coast of the Peninsula including the land of Doḥār. By the decision of the International Court at the Hague in 1905 in a dispute between England and France regarding the granting of the French flag to owners of sailing-ships in Maṣkaṭ, the southern boundary was fixed at Rās Sakar and the coast as far as Khōr Kalbe reckoned to 'Omān, while at the same time the sultān's claim to the peninsula of Rās Masandum from Rās Dibba to Tibba was expressly recognised by both powers. This of course does not prevent the actual power of the sultān barely extending beyond the coast district of Maṣkaṭ and Bāṭina. The population of 'Omān is estimated at half a million but that of 'Omān proper at 34,300 only. As regards creed the 'Ibāḍīs are preponderant particularly in the south, but the northern districts are inhabited mainly by Sunnis. The capital is Maṣkaṭ [q. v.] while at an earlier period Ṣuḥār [q. v.] was regarded as the most important town in the country.

The following details of the distribution of the population may be given: the thickly populated district of Bāṭina has 105,000, the Wādī Samā'il 2,800, Maṣkaṭ 10,000, Maṭraḥ 11,000, Ṣūr 12,000, Ṣuḥār 7,500. 'Omān for administrative purposes is divided into four districts: 1. Dja'lān, the land of the Benī Abū 'Alī and all the land south of Bed'ā; 2. 'Omān proper from Bed'ā to Makiniya; 3. Durra from the latter place to al-Bureimī and 4. al-Bāṭina, the narrow strip of coast from Sib to Khōr Fakḳān. The characteristic feature of the orography of the country is a mountain range which runs from Maṣkaṭ in a southern direction as far as Ṣūr close to the coast but runs a considerable distance inland north of Maṣkaṭ and thus leaves space for the fertile low-lying land on the coast, al-Bāṭina, which is in

a way comparable to al-Tihāma in the Yaman, although it never attains the same width, being only from 20 to 30 miles across. South of Rustāk just below 23° Lat., almost at right-angles to the former, is a second range, higher in its highest parts, known as *Djebel Akhdar* which with 10,000 feet is the greatest height in the country. It runs parallel to the coast as far as Rās Masandum and sends off a second range which runs to Rās al-Khēme. The most fertile part of ‘Omān is the already mentioned low-lying coast land of al-Bāṭina where in addition to intensive cultivation of the date-palm, wheat is grown and all kinds of fruits flourish. The Arab geographers praised the dates of ‘Omān and al-Asma’i was not wrong in comparing ‘Omān to a garden. Among the fruits special mention is made of bananas, pomegranates, and nebek (lotus nebk). A considerable part of ‘Omān however is quite unsuited for agriculture; for example the part bordering on the desert zone of Arabia which however contains a few fertile oases among the mountains, for example on the way from Benī Abū ‘Alī to Nezwa. These oases are watered by subterranean deposits as was long ago pointed out by Ibn al-Faḥīḥ; where the water is not too deep below the surface or there are subterranean channels, springs supply the necessary water to the fields. The climate of ‘Omān suffers from the great heat, which is only to some degree tempered by the refreshing winds from the sea; in Maskat the maximum in July and August is 91°—88° F. The rainy season is in winter from October to March, but the rains seldom fall more than three or four days in a month; among the mountains heavy storms occur and the snow sometimes lies. In Maskat the annual rainfall is 3 to 6 inches.

The cereals grown are wheat, dhura, some rice, the fruits, tamarinds, mango, bananas, pomegranates, quinces, pistachios, agrumi, grapes, almonds, figs, walnuts, water-melons, apricots and cherries, while cotton, sugar-cane and indigo are cultivated. Stockraising is now mainly confined to horned cattle; at one time ‘Omān was celebrated for its strong, swift camels and asses. The Arab geographers (Ibn al-Faḥīḥ) praise ‘Omān’s wealth in fish, which supplied the food of large sections of the community (especially in al-Bāṭina). Industry, once very flourishing, is now confined to weaving on a modest scale in Maskat, Nezwa and ‘Ibri, dyeing in the two last-named towns and the making of weapons in Maskat. Idrisi mentions the pearl-fisheries of Šūr below Cape al-Mahdġama and in Damār. The pearl-fisheries now produce about half the revenue of Bahrain (10–15,000,000 rupees). The Arab philologists (Ibn al-A‘rabi) derive the name ‘Omān from *‘amāna* with the meaning “to stay continually in one place”. According to others the name goes back to ‘Omān b. Ibrāhīm al-Khalil, who built the town of ‘Omān; this is of significance in as much as the classical writers know of a town called *Omana* (Pliny, *Nat. hist.*, vi. 149) and *‘Ομανον ἐμπόριον* (Ptolemy, vi. 7, 36), this has been identified with Šuḥār which was later regarded as the most important trading centre. Al-Muḥaddasi (p. 35) compared ‘Omān with ‘Aden and Egypt for importance in the world’s trade and called it and Šīraf [q. v.] the forecourt of China (p. 426). This does not seem however to have much benefited the people of ‘Omān, for

they were regarded as dishonest, wicked and deceitful merchants; indeed Ibn al-Faḥīḥ (p. 92) describes them in much coarser language. The prosperity coming from the trade and agriculture is evident from the huge yield from taxation, 300,000 dinārs in the ‘Abbāsīd period. A dirhem a year was paid on each palm-tree (Muḥaddasi, p. 105).

For the early history of ‘Omān, Huart’s account may be consulted.

The relations of England with the country have been of great importance to ‘Omān. They began in 1798 with a treaty between the East India Co. and the sultān by which the French and Dutch were excluded from the territory for the duration of the war, and this was followed in 1800 by the granting of permission for the E. I. C. to have an agent permanently resident in Maskat. By the treaties made by the French with Saiyid Sa‘īd b. Sultān in 1807 and 1808, this resident was joined by a French Consular agent. But French prestige suffered a severe blow when Mauritius was occupied by the English in 1810. In 1839 a commercial treaty was concluded between England and Maskat, modelled on one concluded in 1833 between the U. S. A. and ‘Omān. In 1844 there followed a commercial treaty with France, which secured this country the most favoured nation clause and freedom to trade in Maskat for its subjects. In 1862 came the Anglo-French guarantee of the independence of ‘Omān, but England was able to secure a predominating influence in ‘Omān by vigorously supporting the sultān at various crises and by paying him a subsidy. In 1891 the sultān declared in a treaty of friendship, which also regulated questions of trade and navigation between the two countries, and was binding upon himself and his successors, that he would not cede any of his territory in any way to any power other than England. When then, in 1898, the sultān in contravention of this agreement wished to allow France to have a coaling-station in his territory, he had to withdraw the concession on receiving an ultimatum from England; France was compensated with a coaling station in Mukallā [q. v.]. The dispute assumed a more serious aspect which arose out of the practice of the French consul in Maskat giving ships’ papers and French flags to Maskat ships which abused the privilege to carry arms and slaves. The dispute was settled by the International Court at The Hague, the decision being that only those ship-owners who had received permits before January 2, 1892 were allowed to retain them. The result was that in 1917 only 12 ships of ‘Omān were allowed to carry the French flag. The result has been the practical exclusion of French influence from ‘Omān, and the securing of English predominance.

‘OMAR B. ‘ABD AL-‘AZĪZ B. MARWĀN B. AL-ḤAKAM, ABŪ ḤAFṢ AL-AṢḤADĪJ, Umayyad caliph. He was born in Medina in the year 63 (682–683). His father ‘Abd al-‘Azīz [q. v.] had been for many years governor of Egypt; through his mother he was descended from ‘Omar I. She was Umm ‘Aṣīm bint ‘Aṣīm b. ‘Omar b. al-Khaṭṭāb. He spent the greater part of his life in Medina. He was sent there by his father from Egypt to receive a fitting education in the city of the Prophet and remained there till the death of his father in 85 (704). His uncle, the caliph ‘Abd al-Malik, then took him to Damascus and married him to his daughter Fāṭima. In Rabī‘ I 87 (Feb.–March 706) ‘Omar was appointed governor of the Ḥijāz by al-Walid I and he settled in Medina again. Unlike other governors who were as a rule very arbitrary, ‘Omar immediately on his arrival in the city formed an advisory council of ten pious authorities on tradition with whom he discussed all important matters, and further empowered them to keep a watchful eye on his subordinates. In other respects also, his patriotic rule was for the good of his subjects. But in the long run the all powerful Ḥadīdjādī [q. v.] was not pleased with ‘Omar’s mild rule because many ‘Irākīs fled to the two sacred cities in order to escape the hard lot for which they had to be prepared in their native land. Under pressure from him ‘Omar was recalled in 93 (711–712) without however being disgraced. After the death in Dābiḳ [q. v.] in Ṣafar 99 (Sept.–Oct. 717) of Sulaimān b. ‘Abd al-Malik who had intended him to succeed him, the autocratic theologian Raḍjā b. Haiwa assembled the Umayyads in the mosque and without mentioning any name demanded that they should pay homage to whomsoever Sulaimān should have mentioned in his will. Only when they had paid homage, did he announce the death of the caliph and the name of the successor designate. As ‘Omar belonged to a collateral line and had nevertheless been preferred to the two sons of ‘Abd al-Malik, Yazīd and Hishām, it is not a matter for surprise that the latter at first raised objections to the choice of his cousin as commander of the faithful; but he

was soon appeased and ‘Omar ascended the throne without encountering any serious opposition.

As a caliph, ‘Omar stands apart; he was distinguished from his predecessors and successors alike. Inspired by a true piety, although not entirely free from bigotry, he was very conscious of his responsibility to God and always endeavoured to further what he believed to be the right and conscientiously to do his duty as a ruler. In his private life he was distinguished by the greatest simplicity and frugality, although he is said to have lived no less luxuriously than other Umayyad princes before his accession. Poets who praised the delights of wordly pleasures were therefore not particularly popular at his court.

‘Omar laid no special stress on military glory, and his reign which only lasted two and a half years was poor in military events. The siege of Constantinople was raised on his accession to the throne; but it is uncertain whether the Muslim army was actually withdrawn by him. In Mesopotamia he allowed the people of Ṭuranda to evacuate their town whereupon they settled in the adjoining Malatya and Ṭuranda was destroyed. In the far West the Muslim armies crossed the Pyrenees, invaded Southern France and returned to Spain laden with rich booty. On a later campaign which is usually but not quite certainly attributed to the reign of ‘Omar, they captured Narbonne, fortified it, and used it for a time as their headquarters. ‘Omar however by no means felt obliged to spread Islām by the sword; he rather sought by peaceful missionary activity to win members of other creeds to the faith of the Prophet and in case of conversion by this means demanded no tribute. This method proved particularly successful and suitable among the Berbers and it is even said that there was not a single Berber left unconverted to Islām in the governorship of Ismā‘īl b. ‘Abd Allāh appointed by him. In a similar way were converted the princes of Sind when ‘Omar’s governor ‘Amr b. Muslim al-Bāhili invited them to adopt Islām and promised them complete equality with Muslims; but under Hishām they lapsed again.

His interests were primarily in home affairs. He had the untrustworthy governor of Khurāsān Yazīd b. al-Muhallab [q. v.] arrested and his post given to al-Djarrāḥ b. ‘Abd Allāh al-Ḥakami. In other cases also, the most important offices were filled with men whom ‘Omar thought to be capable and just. He adopted a kindly attitude to the ‘Alids. The practice introduced by Mu‘āwiya of publicly cursing ‘Alī in the service in the mosque was abolished by ‘Omar. It is said that when he was a boy and his father was appointed governor of Egypt he begged him to forbid the customary cursing of ‘Alī and received the reply that such a step although laudable in itself would be against the interests of the Umayyad dynasty and might give support to the ‘Alid claims to the caliphate. ‘Omar gave up in favour of the ‘Alids the oasis of Fadak [q. v.] which had originally been the private property of Muḥammad but was then declared a state domain and had finally become the property of the Umayyads. After his accession he decided that it should revert to its original use and according to one story expressly ordered that it should be handed over to the descendants of Fāṭima as the heirs of the Prophet. He also restored to the family of Ṭalḥa their property in Mecca, which ‘Abd al-Malik had

taken from them and abolished the addition to the tithe which had been levied by a former governor of the Yaman, Muḥammad b. Yūsuf, a brother of al-Ḥadīdjādī. In general he laid great stress on compensating those who had in any way been subjected to illegal extortions; but, as is obvious, this principle, while it testifies to the caliph's love of justice, was often applied, according to Ibn Sa‘d, v. 252, uncritically (*bi-ghair al-baiyina al-kāfi’a*) and in the long run could not be beneficial to the treasury and was destined to have serious consequences.

As a devout Muslim he was gracious to members of other creeds in so far as this was possible without a breach of the principles of Islām. Christians, Jews, and fire-worshippers, were allowed to retain their synagogues, churches, and temples but not to build any new ones. In Damascus, al-Walid [q. v.] had taken down the basilika of John the Baptist and incorporated the site in the mosque of the Umayyads. When ‘Omar came to the throne, the Christians complained to him that the church had been taken from them whereupon ‘Omar ordered the governor to restore them the site of the addition to the mosque. But as the people of Damascus would not agree to this, the matter was settled with ‘Omar's approval by the churches outside the town, notably that of St. Thomas which belonged *de facto* to the Muslims and not by treaty because the Ghūṭa [q. v.] had been conquered by the sword and not surrendered by capitulation, being handed over to the Christians on condition that they abandoned all claims for the future on the Church of St. John. While ‘Omar endeavoured to protect his Muslim subjects from being abused, he was also anxious that his Christian subjects should not be crushed by oppressive taxation. In Aila and in Cyprus the tribute settled by treaty had been increased: ‘Omar reduced it to the original amount. In al-Yaman the Christians of Najrān had made a treaty with the Prophet which guaranteed them complete security in their land on payment of an annual tribute of 2,000 robes (*ḥulla*) each of the value of 40 dirhams. This treaty had been broken by ‘Omar I. Nevertheless, they had to pay the full tribute until ‘Othmān reduced it by 200 robes. Mu‘āwiya or, according to another story, his son Yazīd granted them a further reduction of 200 robes because their numbers had been much reduced by death and conversions to Islām (on this see Lammens, *Le califat de Yazīd Ier*, p. 346 sqq.). But when ‘Abd al-Raḥmān b. Muḥammad b. al-Ash‘ath [q. v.] rebelled against al-Ḥadīdjādī, the latter raised the total tribute to 1,800 robes because he suspected the Najrānians of being in secret agreement with the rebels. In the meanwhile however, their numbers had sunk from 40,000 to 4,000 and when they appealed to ‘Omar to alleviate their hard lot he reduced the taxation to one tenth and demanded only 200 instead of 2,000 or 8,000 dirhams.

One of ‘Omar's most important measures was his reform of the taxation. The comprehensive administrative system of ‘Omar I which proved excellent for the conditions in his day, was now no longer suitable to the demands of the time. The treasury was continually suffering from the ever increasing conversion to Islām of non-Arabs who had paid tribute and their consequent exemption from taxation and in addition many of the new converts settled in the large cities instead of remaining at home and tilling the fields, so that

agriculture lost much of the labour it required. To overcome this difficulty al-Ḥadīdjādī had imposed the *khara‘i* also upon Muslim landowners who were not paying tribute and prohibited immigration into the cities. This aroused general dissatisfaction but this did not worry him. ‘Omar, on the other hand, adhered to the principle that Muslims should pay no tribute. He further propounded, no doubt by agreement with those learned in the law in Medina, the theory that conquered land was the common property of the Muslim community and therefore could not be broken up and transformed by sale to Muslims into immune private property. Consequently in the year 100 (718—719), he forbade Muslims to buy land which should pay tribute; but he did not make this legislation retrospective and he placed no obstacles in the way of the immigration of new converts into the cities. Further, just claims upon the treasury for compensation for services rendered were never refused: he granted the Mawālī in Khurāsān, who had fought against the unbelievers, pay and exemption from taxation just like Muslim soldiers. He thus furthered the amalgamation of the various elements in the caliph's empire and although his system of reformed taxation did not survive because the principle of the inalienability of tribute-paying land could not be permanently maintained, he did his best to clear up the existing financial muddle.

The historians of the older school described ‘Omar as an unpractical idealist, who pursued purely Utopian ideals as a result of his theological preconceptions, without paying any heed to actual conditions, and only modern research has put his work in its true light. His reign was spared trouble from the Khāridjīs but hidden forces were working in secret which were to bring about the fall of the Umayyad dynasty.

‘Omar died after an illness of 20 days in Rajab 101 (Feb. 720) and was buried in Dair Sim‘ān near Ḥalab. He was succeeded by his cousin Yazīd b. ‘Abd al-Malik [q. v.].

Very much influenced since his boyhood by pious authorities on tradition, he was one of the authorities in this field and regarded, although wrongly, after his death as one of the first collectors of Sunna. In course of time a whole cycle of pious legends gathered round his name which were quite devoid of any historical foundation. For example we are told (Ibn Sa‘d, v. 301, l. 17) that a roll of parchment fell from heaven upon the men who were filling up his grave which assured him security from the flames of hell (*amān min Allāh li-‘Omar b. ‘Abd al-‘Azīz min al-nūr*). Even the biased historians of the ‘Abbāsīd period who as a rule run down the Umayyads on every possible occasion in favour of the ‘Abbāsīds make an exception in his case and give him the highest praise. His tomb was also left undisturbed when those of the other Umayyads were desecrated after the triumph of the ‘Abbāsīds.

'OMAR [B. 'ABD ALLĀH] B. ABĪ RABĪ'A, "undeniably the greatest love-poet of the Arabs" (Rückert), born, according to tradition, on the 26th Dhu 'l-Hijja 26 (beginning of Nov. 644), died in 93 (712) or 101 (719). His biography, like those of other poets who are regarded as representatives of a particular form of poetry (e.g. Abū Nuwās with his drinking songs), is much encumbered by legend; he was regarded as the great love-poet and imitations by his contemporaries and the works of later poets were readily ascribed to him. It is only the brilliant monograph by P. Schwarz that has made it possible to separate the really historical matter in his biography and in his poems. It may be regarded as certain that he belonged to the *Qurayshī* clan of *Makhzūm*; his father 'Abd Allāh, a prosperous Meccan merchant, amassed a great fortune by importing the drugs of South Arabia. For a time he was governor of Djanad in the Yaman; Omar's mother was a "Himyarite" from Ḥaḍramawt. The poet as the possessor of a large fortune was able to lead a carefree life; his youth he probably spent in Medina and his manhood mainly in Mecca. He travelled in South Arabia, Syria and Mesopotamia. There are all kinds of legends about his death which it seems did not take place in his native land. His traditional biography is mainly filled with stories of his relations with various ladies, chiefly of the house of the Umayyads. These stories are literary inventions rather than historical facts. The stories of his meetings with emirs and caliphs of the house of Umayyad seem also suspicious: he is said to have been punished along with the poet al-Aḥwas by 'Omar II and to have had to promise to write no more poetry.

We learn very little from his poems of the political history of the period or of the events of every day life. He was the first townsman poet in Arabic. His poems reflect the bright social activity of town life. This is the fundamental distinction between him and the celebrated triad of Umayyad poets, al-Akḥṭal [q. v.], Djarir [q. v.] and al-Farazdaq [q. v.] as well as between him and the half legendary representatives of the Beduin love poetry of the period like Djamīl [q. v.]. In him there is no trace of the court poet or tribal bard; he hardly ever describes journeys, and still more rarely fighting. The poetry of wine is quite strange to him. All his poems are records of his own experiences and pictures of his emotions. We need not always imagine that they are historically accurate but the expression of feeling is undoubtedly true to life.

The persons in his poems are "sensitive, aimable creatures, full of individuality. They reveal their souls, they act, they speak. Dramatic scenes, full of feeling stand out vividly before the reader's eyes" (Schwarz). In the form of his verse also 'Omar is a gifted poetical genius who writes without difficulty. His verse flows easily and naturally in simple language. His prosody differs from that of the Beduin poets; although he uses the same metres, he does not prefer those most popular in the old poetry (*basīf* or *ṭawīl*) but flexible and light metres (*khafīf*, *ramal*, *mutakārib*, *munsarīḥ*). That he did not feel himself bound by tradition is shown by some traces of strophic verse in his poems. It would be a mistake to see in 'Omar the first love-poet of the Arabs. But he was the first to bring this form to perfection. The roots of this genre are to be found not so much in the introductory parts of the old Arabic *qaṣidas* as in the love-poems, which were particularly cultivated in South Arabia (perhaps not without Persian influence). A study of the surviving fragments of Waddāḥ al-Yaman, a contemporary of 'Omar which has been long in preparation by V. Ebermann, will perhaps shed new light on this point.

'Omar attained great popularity with his contemporaries and in the following generations, chiefly among singers, wits and men of letters. But his popularity among learned men was hampered by two things: his simple language offered very few "testi di lingua" in comparison with poets like, e.g. al-Farazdaq, and the matter of his poems was little suited for study in schools, especially in religious and bigoted circles. The renaissance of Arabic literature in modern times has brought about a change; besides several monographs devoted to him, special chapters are devoted to him in the text books. 'Omar b. Abī Rabī'a is now so to speak rehabilitated among the Arabs and recognised as a great poet.

'OMAR B. AIYÜB. [See ḤAMĀ and AIYÜBIDS supplement.]

'OMAR B. 'ALĪ (SHARAF AL-DĪN) AL-MIṢRĪ AL-SA'DĪ, generally known as IBN AL-FĀRĪD, a celebrated Ṣūfī poet. The name al-Fārīd (notary) refers to the profession of his father, who belonged to Ḥamāt but migrated to Cairo, where 'Omar was born in 576 or, more probably, in 577. In early youth he studied Shāfi'ī law and *Ḥadīth*; then came his conversion to Ṣūfism, and for many years he led the life of a solitary devotee, first among the hills (al-Muḳaṭṭam) to the east of Cairo and afterwards in the Ḥidjāz. On his return to Cairo he was venerated as a saint till his death in 632, and his tomb beneath al-Muḳaṭṭam is still frequented. The *Diwān* of Ibn al-Fārīd, though small, is one of the most original in Arabic literature. Possibly the minor odes, which exhibit a style of great delicacy and beauty and a more or less copious use of rhetorical artifices, were composed in order to be sung with musical accompaniment at Ṣūfī concerts (Nallino, in *R.S.O.*, viii. 17); in these the outer and inner meanings are so interwoven that they may be read either as love-poems — a fact to which they owe their wide popularity in the East — or as mystical hymns. But the *Diwān* also includes two purely mystical odes: 1. the *Khāmriya* or Wine Ode, describing the "intoxication" produced by the "wine" of Divine Love, and 2. the *Naẓm al-Sulūk* or "Pilgrim's Progress", a poem containing 760 verses, which is often called *al-Tā'iyyat al-kubrā* to distinguish it from a much shorter ode rhyming in the same letter. In this famous *qaṣida*, nearly equal in length to all the rest of the *Diwān* together, Ibn al-Fārīd depicts his own experience as a Ṣūfī. The result is not only a unique masterpiece of Arabic poetry but a document of surpassing interest to every student of mysticism (for a résumé of the contents, see Nicholson, *Studies in Islamic Mysticism*, p. 195—199). Its whole character is psychological rather than speculative; though some passages are pantheistic in feeling and expression, it bears little or no trace of the intellectualism which marks the system of Ibn al-'Arabi; and the charges of heresy brought against the poet do not appear to be justified. Among Ṣūfis the *Tā'iyya* occupies the position of a classic, and many commentaries have been written on it.

Bibliography: Brockelmann, *G.A.L.*, i. 262. — A life of the poet, written by his grandson 'Alī, the first editor of the *Diwān*, has been printed as an introduction to the edition of Rushaiyid b. Ghālib al-Dahdāh (Marseille 1853). See also Ibn Khallikān, ed. Wüstenfeld, N° 511; *Shadharāt al-Dhahab* (*J.R.A.S.*, 1906, pt. iv., p. 800 sqq.), and the references given by Di Matteo (see below) and Nallino, *loc. cit.*, p. 8. — Translations of the *Tā'iyyat al-kubrā*: Von Hammer, *Das arabishe hohe Lied der Liebe*, Vienna 1854 (Arabic text and German verse-translation; the latter is worthless); Di Matteo (Rome 1917); Nicholson, *Studies in Islamic Mysticism*, Cambridge 1921, ch. iii., "The Odes of Ibn al-Fārīd", p. 199—266 (with explanatory notes). The fullest critical study of Ibn al-Fārīd is that by Nallino in his review of Di Matteo's version, in *R.S.O.*, viii. 1—106 and 501—562. (R. A. NICHOLSON)

'OMAR (ABU DJA'FAR) B. ḤAFṢ was appointed governor of the province of Ifrīkiya by the 'Abbāsīd caliph al-Manṣūr in 151 (768). He belonged to a family which in the time of the Umayyads had furnished a number of high officials to the state. One of his uncles, al-Muhallab b. Abī

Ṣufra, had attained fame as governor of Khurāsān under 'Abd al-Mālik b. Marwān. 'Omar whose bravery was celebrated had himself held a command in the eastern provinces: he had been given the Persian epithet of *Hasarmerd* "1,000 men".

The difficult situation in Ifrīkiya at the time justified the choice of an energetic governor. Barbary had gone over almost entirely to various sects of the Khāridjī heresy. The chief leader of the movement was the Ṣūfī Abū Qurra. The Arab *djund* showed little enthusiasm to fight the rebels and besides, it was much divided by old tribal rivalries.

'Omar b. Ḥafṣ, appointed by the caliph, brought with him 500 horsemen. He cleverly won the hearts of the people of Kairawān and was able to secure the country over three years of peace. Al-Manṣūr having given him orders to strengthen the defences of Ṭobna [q. v.], an old town, the strategic position of which on the western borders of the empire was becoming so important, 'Omar went there with some contingents of the *djund*. Ifrīkiya being thus denuded of troops, the Berbers rose and 'Omar's lieutenant Ḥabīb al-Muhallabī was killed. This initial success encouraged the rebels who concentrated a large force around Tripoli under an 'Ibādī chief. Al-Djunaid b. Bash-shār, who had assumed command at Kairawān after Ḥabīb's death, asked for reinforcements from 'Omar b. Ḥafṣ. He received them but was defeated. The insurrection now became general. Kairawān was again besieged and soon 'Omar himself who had only 15,500 men under him was besieged in Ṭobna by several Khāridjī armies, 'Ibādī, and Ṣūfī united under the command of Abū Qurra and numbering over 73,000 (the figures given are of course not at all reliable). 'Omar wished to cut his way through his opponents but his companions prevented him. He then tried to bribe Abū Qurra to leave his allies and offered him 60,000 dirhams but the offer was rejected. 'Omar then turned to his brother (or son) and obtained for 4,000 dirhams the secession of the Ṣūfis. Abū Qurra had then to withdraw. 'Omar b. Ḥafṣ, thus rid of his enemies, sent a corps against the 'Ibādī Ibn Rustam who had to take refuge in Tāhert (Tiaret) [q. v.].

'Omar was again at work in strengthening the defences of Ṭobna when he learned of the critical situation of Kairawān. The town blockaded for eight months by the 'Ibādī Abū Ḥākīm was in dire straits. With 700 men of the *djund*, he hurried to Ifrīkiya but instead of marching on Kairawān he took the road for Tunis, enticing the Berbers after him. He succeeded in getting supplies into Kairawān which he then entered himself. The siege was resumed with fighting every day. Food again became very scarce. 'Omar b. Ḥafṣ wished to send two chiefs of the *djund* to procure supplies but they refused to go. He then decided to make a sortie himself which meant certain death, without awaiting the reinforcements of 60,000 men which the caliph was sending him. Throwing himself on the enemy "like a camel mad with rage" he fell on the 15th *Dhu 'l-Hidjja* 154 (Nov. 27, 771).

‘OMAR B. ḤAFṢŪN, leader of a famous rebellion in Spain, who at the end of the ninth century A.D. held out for years against the Umayyad emirs of Cordova and in the end was only brought to book by the caliph ‘Abd al-Raḥmān III al-Nāṣir [cf. UMAIYADS]. His full name was ‘OMAR B. ḤAFṢ B. ‘OMAR B. DJĀFAR called al-Islāmī, from his conversion from Christianity to Islām and he claimed descent from an ancestor named Alfonso who had the title of count (*comes*). ‘Omar’s father Ḥafṣ or with the specifically Spanish suffix (*-ūn*), Ḥafṣūn, was thus the grandson of a Visigothic lord who had become a Muslim and lived on the income from his lands at Iznate (Ḥiṣn Awṭ) in the region of Ronda [q.v.] in the south of Spain in the middle of the ixth century A.D. His son while still quite young displayed a very violent temper and as a result of a crime committed by him against the person of one of his neighbours, had to escape for a time to North Africa, and spent some time at Tāhert [q.v.]. He only returned home to rebel at once against the Umayyad emir of Cordova. Having gathered around him a small body of followers he established himself in 267 (880) in a ruined fortress

Bobastro (Ar. *بشترو*; q.v.). which he restored. Dozy has identified this castle with el Castellón, to the south of Campillos, between Teba and Antequera, relying on the discovery at this place of an inscription, mentioning the *municipium Singiliense Barbastrense*, while Simonet thinks that its site corresponds to las Mesas de Villaverde, a little farther south between Ardales and Carratraca. Excavations have recently been begun in the district in order to find the ruins of Bobastro. Whatever be the real position of the castle, we know that it commanded the valley of the Guadalhorce in the direction of Malaga and from there Ibn Ḥafṣūn could disturb a considerable part of the territory of the *kūra* of Reiyo, which a governor dependent on Cordova was supposed to rule. ‘Omar having had several successes, the governor tried to bring him to reason but without success and he lost his post. His successor was no more fortunate. Soon Ibn Ḥafṣūn was exercising complete authority over all the inhabitants of the mountainous region which extends from Ronda towards Grenada, Malaga and Algeciras. The Umayyad emir Muḥammad b. ‘Abd al-Raḥmān, had to organise a regular expedition against him the command of which was entrusted to his vizier Ḥāshim b. ‘Abd al-‘Aziz. Ibn Ḥafṣūn submitted and went to Cordova to offer his services to the Umayyad emir in 270 (883). But his submission did not last long; in the following year the rebel had regained the mountains of Bobastro and took by storm the castle in which Ḥāshim had put a strong garrison.

From this time on Ibn Ḥafṣūn begins to play the part of a champion in the nationalist movement in the south of the peninsula, where he put himself at the head of all the malcontents, whether Christians or neo-Muslims (*muwalladūn*). The rapid growth of his rebellion did not fail to disturb greatly the Umayyad emir whose position each day became more precarious. The task of bringing Ibn Ḥafṣūn to book was given to the heir-presumptive al-Mundhir b. Muḥammad, who laid siege to one of the rebel’s principal supporters Ḥārith b. Ḥamdūn al-Rifā‘ī in his castle of Alhama. But

in 273 (886) the emir Muḥammad died and al-Mundhir had to go back to Cordova to be proclaimed in his place. Ibn Ḥafṣūn seized the opportunity to organise resistance in all the mountainous districts of Southern Spain and had himself recognised as leader of the rising by all the inhabitants.

On ascending the throne al-Mundhir found himself faced by a critical situation. But he at once took the necessary steps with great energy. There were continual encounters between the rebels and the loyalist troops; in the end al-Mundhir set out in person to lay siege to Bobastro, but after the siege had lasted forty days he died, undoubtedly poisoned at the instigation of his brother ‘Abd Allāh who succeeded him.

The new emir displayed no less energy than his brother. Ibn Ḥafṣūn had profited by events to increase his influence and according to the chroniclers the land which he ruled was only separated from Cordova by a day’s journey. After a truce which only lasted a few months, ‘Abd Allāh and Ibn Ḥafṣūn resumed the struggle. The Umayyad emir at first devoted his attention to two rebel chiefs, Sawwār b. Ḥamdūn and Sa‘īd b. Djūdī, whom he conquered, while Ibn Ḥafṣūn was collecting a considerable army at Polei [q.v.]. But ‘Abd Allāh with a superior army defeated him, put him to flight and took Polei in 278 (891), then Ecija [q.v.] and finally laid siege to Bobastro again. But the rising of the Banū ‘I-Ḥadjidjādī in Seville created a diversion in favour of Ibn Ḥafṣūn, who from now on seems to have received at least the moral support of the Fāṭimids of Ifrikiya.

The rest of the reign of ‘Abd Allāh passed without any great successes being obtained. It would take too long to detail here all the negotiations followed by agreements, more or less observed, which went on during these very troubled years. But the most striking gesture of the rebel was to repudiate Islām openly and, in order to have the more complete support of the Christians of Andalusia and Cordova, to return to the religion of his ancestors. Ibn Ḥafṣūn then took the name of Samuel and proclaimed himself not only the leader of the Spanish nationalist movement but the champion at the same time of a regular crusade against Islām.

The situation was then very critical when ‘Abd Allāh’s successor, his grandson ‘Abd al-Raḥmān III al-Nāṣir, mounted the throne of the emirate of Cordova in 300 (912). Without delay the new sovereign saw that it was necessary before all else to dispose of this threat which was steadily increasing in magnitude. Not only the future of his dynasty was at stake but also that of Islām in Spain. For several years he made his preparations with the greatest care and displayed exceptional tenacity. The mountain districts of Andalusia were blockaded, attacked and reduced in turn. Ibn Ḥafṣūn, more and more surrounded in the Serrania de Ronda, finally died in 306 (918) leaving to his sons the task of continuing the resistance.

According to some chroniclers, Ibn Ḥafṣūn in the last years of his life, seeing the futility of his efforts, submitted to ‘Abd al-Raḥmān III and even gave him one of his sons as a hostage. He is himself said to have taken part in the campaigns against the Christians of the north in the Umayyad army.

In any case after the death of the aged rebel,

the ruler of Cordova, now favoured by circumstances, set himself to neutralise completely the influence of the sons of Ibn Ḥaḥṣūn. The eldest, *Dja'far*, was attacked at Belda and finally fell a victim to a plot. The second, 'Abd al-Raḥmān, after holding out for a time at Torrox and at Almuñecar, met his death in an encounter at San Vicente. The third son, Ḥaḥṣ, was besieged by 'Abd al-Raḥmān himself in Bobastro and surrendered in 316 (928) to serve in the Umayyad ranks in Galicia. The final capture of Bobastro marked the last stage in a rebellion of unexampled extent, the suppression of which had been the main care of three Umayyad rulers. It was the crowning achievement of the efforts of 'Abd al-Raḥmān III al-Nāṣir to secure the complete consolidation of his territory before beginning the attempt to advance its frontiers to the north.

'OMAR B. HUBAIRA. [See IBN HUBAIRA, i. *supra*, ii. 388a.]

'OMAR IBN AL-KHAṬṬĀB, the second Caliph, one of the greatest figures of the early days of Islām and the founder of the Arab empire. Religious legend has naturally in the case of 'Omar, as with other heroes and saints of Islām, filled his biography with a mass of apocryphal details. Nevertheless the main characteristics of his personality are revealed to historical research with sufficient clearness for it to be possible to understand his character and assign him his place in the formation of Islām. Like many other people whose strongest characteristic is an energy of will, 'Omar began by being the declared enemy of the cause which he was later to support with all his strength. Legend has perhaps somewhat coloured the stories of 'Omar's persecution of the early Muslims and exaggerates in representing his conversion as the sudden result of his having overheard some verses of the Qur'ān read in the house of his sister Fāṭima, who with her husband, Sa'īd b. Zaid, had early

given ear to the Prophet's preaching. It is from this sudden reversal of his attitude as well as perhaps from the fact that it was under 'Omar that Islām became a world phenomenon, from the simple incident in Arab history that it originally was, that 'Omar has earned the epithet of the "St. Paul of Islām" which the west has given him. In reality there is nothing in common between the two, except the stubborn energy with which they later championed the cause against which they originally fought. As with all great converts, we have in his case only an example of change of polarisation of the same exclusive and uncompromising attitude which, recognising no middle course, is as impetuous in devotion as in hatred. Tradition places the conversion of 'Omar in his 26th year, four years before the Hidjra. It is probable that the round figure of 30 which we thus get as the age of 'Omar at the beginning of the new era has something artificial about it. But he was in any case certainly in the flower of his vigour when he began his new career of apostle of Islām. Besides, at first his support was only personal and legend has no doubt exaggerated its importance. 'Omar was not able to assist the new religion through the power of his clan (he belonged to the Banū 'Adī b. Ka'b who being only Quraysh al-Zawāhir enjoyed no influence in the political life of the merchant republic) and his position with regard to his fellow-citizens was in no way outstanding. Even if it is true that, as tradition has it, as soon as 'Omar joined the community of the faithful, the latter's faith in its ultimate triumph was increased, his intervention certainly had no influence on the events which led to the migration to Medina. It is only in this town alongside of the Prophet and apparently through the prestige of his initiative and strength of will that 'Omar without holding any official position began to be the real organiser of the new theocratic state. His part was that of councillor rather than of soldier; although he took part in the battles of Badr, Ohod and later ones, practically nothing is recorded of his military exploits, accounts of which are so abundant in the case of 'Alī and other Companions. Tradition which traces to his initiative no less than three Qur'ānic revelations (ii. 119: on the worship of the *maḥām Ibrāhīm* beside the Ka'ba; xxxiii. 53: on the veiling of the Prophet's wives; lxvi. 6: on the threat of punishment to the same women) is probably not only true but may even record only a few of the cases in which a suggestion from 'Omar stimulated the Prophet's inspiration. What is remarkable about 'Omar in the Medina period is his perfect agreement with Abū Bakr, a concord which — a surprising thing and one which is a tribute to the two great champions of Islām — was never disturbed by jealousy. The fact that 'Omar like Abū Bakr, also became the father-in-law of the Prophet through the marriage of his daughter Ḥaḥṣa, did not arouse the slightest feelings of rivalry in him; on the contrary it was he who on the death of Muḥammad thrust the caliphate upon Abū Bakr. The ingenious theory put forward by Lammens (*M. F. O. B.*, iv. 113 sq. and reproduced in *Etudes sur le siècle des Omayyades*) about the "triumvirate Abū Bakr, 'Omar, Abū 'Obaida b. al-Djarrāh" (these three individuals united by a bond of intimate friendship are said to have dominated and so to speak monopolised the authority of the Prophet, controlling him either by direct action or through

his wives, ‘Ā’isha bint Abī Bakr and Ḥafṣa bint ‘Omar may be to some extent correct but should not be pushed too far. It is beyond question that ‘Omar, the greatest brain of the three, was able in the lifetime of Muḥammad as well as during the brief caliphate of Abū Bakr to resist the temptation to come too much into the foreground. But as soon as the first caliph was dead the power naturally passed to him.

The question whether the dying Abū Bakr designated ‘Omar as his successor has been the subject of much discussion by the theorists of Muslim constitutional law. As a matter of fact, there does not seem to have been any formal act of investiture which would in any case have been of no value for it would have been quite out of keeping with Arab custom. ‘Omar assumed power *de facto* and the recognition which was at once given him by the majority of the Companions assured him the exercise of it in a way quite similar to that in which the nomination of the emīr in the tribes took place, who, as we know, was only firmly seated when the individual approval of the members of the tribe had been asked and obtained after he had effectively assumed power. Such a system however primitive gave no trouble, except when the feeling between two parties was acute; this is what happened at the election of ‘Alī. Against ‘Omar there was only the dissatisfaction of the “legitimet” party of ‘Alī and the Anṣār who had however been defeated too recently when Abū Bakr had become caliph to feel like organising a regular opposition.

‘Omar at the beginning of his rule found that the great expansion by conquest had already begun; he had perhaps contributed more than any other to its beginning in his capacity as adviser to his predecessor. This is not the place to discuss once more the traditional story of the Arab conquests, nor to subject to a revision the well-known thesis of Caetani on their origin and character. This thesis has seemed to lessen considerably the importance of ‘Omar’s personal action and to take from him the glory of having been their initiator and director, according to a strategic plan conceived in advance of the campaigns against the Byzantine empire and Persia. In reality there is reason to marvel that a simple citizen of Mecca should have been capable of controlling with an undisputed singleness of command undisciplined levies of Beduins, scattered over a vast area and should have been able to keep control over their chiefs who were practically the sole masters of the position. If the military victories were not due directly to ‘Omar it was certainly to him that the credit should go of never having lost control of his generals and above all of having been able to make use of the powerful and talented family of the Omayyads, without however allowing them to have a free hand. His quarrel with Khālīd b. al-Walīd who, after having won the most brilliant victories for Islām, was dismissed and died in oblivion, gives us an idea of the political talent of ‘Omar and the extent of his authority. The knowledge of the limits of his power (which is the mark of political genius) caused him to treat the wily ‘Amr b. al-‘Āṣ with tact and to leave him the initiative in the conquest of Egypt. But he was careful at the same time to put at his side an old Companion of the Prophet, al-Zubair, as a check upon him. He was careful in general

(and the appointment of al-Zubair was no exception to the rule) not to appoint to high commands respected Companions whose ambition he had cause to fear. He preferred to watch them from close at hand and to satisfy their parvenu desires with the revenues of the great royal domains of the ‘Irāḳ and Syria which he assigned to them [cf. ḲATĪ‘A and ṬALḤA]. If tradition has done justice to ‘Omar’s strength of will, it should be remembered that he also knew how to employ with success gentler and simple methods.

The caliphate of ‘Omar which is marked by the complete transformation of the Muslim state, is regarded by tradition as the period in which all the political institutions by which it was later ruled had their origin. That there has been in tradition a process of idealisation which centred in a single individual a complicated development extending over several generations is what historical criticism has not failed to recognise. But the part played by ‘Omar was nevertheless a great one. The regulations for his non-Muslim subjects, the institution of a register of those having the right to military pensions (the *dīwān*), the founding of military centres out of which were to grow the future great cities of Islām, the creation of the office of *qāḍī* were all his work, and it is also to him that a series of ordinances goes back, religious (the prayer of the month of Ramaḍān, the obligatory pilgrimage) as well as civil and penal (the era of the Hījra, the punishment of drunkenness, and stoning as a punishment for adultery; in connection with the last it looks as if he did not hesitate to interpolate a verse in the text of the *Qur’ān*; cf. Nöldeke-Schwally, *Geschichte des Qur’āns*, i. 248—251). If it is true that several of these institutions, particularly those of a fiscal character, were rather of the nature of provisional regulations than definitive legislation and if it is also true that the fiscal business continued to be carried on by Persian and Byzantine officials and that the coins continued to be struck with the types of both empires, we cannot however refuse the title of political genius to the ruler who was able to impress a stamp of unity and permanence upon the variegated and confused elements which went to make up the new Muslim state.

In spite of the autocratic character of ‘Omar’s rule, his caliphate has nothing of the monarchical character about it. It is further distinguished from that of Abū Bakr by a deeper feeling of its permanent character. Thus for the title of *khalīfa* which conveys the idea of deputy, there was substituted that of *amīr al-mu’minīn* (which ‘Omar is said to have assumed in the year 19), in which the character of sovereign is more marked; at the same time the religious character in it becomes more distinct. Indeed one might say that ‘Omar was inclined to renew, naturally with a shade of difference, the theocratic regime of the time of the Prophet; being neither able nor willing, it must be remembered, to pose as a prophet, he yet knew how to take advantage of the intimacy in which he had lived with the Prophet to legislate in the spirit of the latter and to give to his own measures an almost supernatural origin. It is perhaps this which tradition is trying to express when it makes Muḥammad say: “If God had wished that there should have been another prophet after me, ‘Omar would have been he”

(cf. al-Muḥibb al-Ṭabarī, *Manāḳib al-ʿAshara*, i. 199); we can easily understand how such an attitude was only possible through the surprising prestige of 'Omar (it ceased with him; the theory of the transmission of prophetic powers was only revived later by the Shī'a).

Tradition shows us 'Omar feared rather than loved. This feeling must have been a real one but it should be pointed out that it was only to his high moral character that 'Omar owed the respect which he inspired, for the physical force at his command was not great. The opposition to him (to that of 'Alī there was later added that of a number of the old Companions) did not dare to display itself publicly. The man in whom 'Omar confided, perhaps his successor *in pectore*, was the third member of the "triumvirate", Abū 'Ubaida. When he died, a victim of the great plague of the year 18, it does not seem that 'Omar had thought of the question of the succession. He was still, besides, at the height of his powers (53, according to the age accepted by tradition) when he fell on the 26th Dhu 'l-Hijja 23 (Nov. 3, 644) by the dagger of Abū Lu'lu'a, a Christian slave of al-Mughira b. Shu'ba, governor of Baṣra. The motive which tradition gives to the murder is the very heavy tax against which the slave had appealed in vain to the caliph; according to Caetani, the murderer was only the unconscious instrument of a conspiracy of the Companions tired of the caliph's tyranny. It is certain that one of the latter's sons, the unstable 'Ubaid Allāh who fell in the battle of Siffin (in 37 A. H.), cherished this suspicion but there is really no reason to believe that it was well founded (cf. the remarks made by the writer on Caetani's views in *R.S.O.*, iv., 1912, p. 1059—1061). The history of murders of sovereigns shows that cases of assassination from personal vengeance are just as frequent as those with political motives. We may suppose that if he had lived to a greater age 'Omar would have provided for the succession — his farseeing mind would have undoubtedly shown him the necessity of settling this question which is always, in states not ruled by the dynastic principle, the crucial test of their vitality. He was not spared to do this and the plan of an elective council formed of the six oldest Companions (*shūra*) which resulted in the election of 'Othmān even if 'Omar had nominated him on his deathbed (which is denied with good arguments by critical historians) could only be a temporary expedient.

In going to rejoin his two dear friends, the Prophet and Abū Bakr, in the delights of Paradise, 'Omar could contemplate with satisfaction the work that he had accomplished. He was really, as has been said, the second founder of Islām, he who gave the edifice erected by the religious inspiration of Muḥammad, its social and political framework. But it must be added that the formidable problems raised by the enormous and rapid expansion of Islām did not receive their final solution from him. In particular the question of the relations between the early converts and the first helpers, the Anṣār, and the newcomers from the Meccan aristocracy and the question of the subordination to the central power of the Arab forces scattered over the immense territory of the empire, although still latent, presented difficulties and dangers of the utmost gravity. It was 'Omar's successor, 'Othmān, who had to face them without possessing

in the slightest degree the necessary qualities to overcome them.

While orthodox tradition reveres in 'Omar not only the great ruler but also one of the most typical models of all the virtues of Islām (cf. a list of his merits in the work of al-Muḥibb al-Ṭabarī, *al-Riyāḍ al-nādira fī Manāḳib al-ʿAshara*, Cairo 1327), the Shī'a has never concealed its antipathy to him who was the first to thwart the claims of 'Alī (cf. Goldziher, in *W. Z. K. M.*, xv. 321 sqq.). The ṣūfī teaching although it exalts the ascetic austerity of the life of 'Omar, has very little to do with him: besides this type of puritan lends itself very little to mystical speculations whether in its historical reality or in its idealisation in legend.

Bibliography: All the historical material is to be found collected in L. Caetani, *Annali dell' Islām*, iii.—vi. (Milan 1909—1912); vol. v. contains the historical synthesis of his caliphate and vi. the general Index. The material contained in the works on Ḥadīth, which has only been partly utilised by Caetani, is collected by A. J. Wensinck, *A Handbook of early Muhammadan Tradition*, Leyden 1927, p. 234—236, s.v. 'Umar.

(G. LEVI DELLA VIDA)

'OMAR EFENDI, an Ottoman historian, according to popular tradition originally called Elkazović or Čaušević, belonged to Bosnisch-Novī (Bosanski-Novī). Of his career we only know that he was acting as kādī in his native town when fierce fighting broke out on Bosnian soil between the Imperial troops and those of Ḥakīm-Oghlu 'Alī Paṣha (1150 = 1737). 'Omar Efendi at this time wrote a vivid account of the happenings in Bosnia from the beginning of Muḥarram 1149 (May 1736) to the end of Džumādā I 1152 (end of March 1739); written in a smooth easy style, this work is of considerable importance for social history. It seems to have been called *Ghazarawāt-i Ḥakīm-Oghlu 'Alī Paṣha* but is usually quoted as *Ghazarawāt-i Diyār-i Bosna*, and sometimes as *Ghazarawāt-nāme-i Bānālūkā* (i. e. Banjaluka in Bosnia). As a reward for this literary effort, 'Omar Efendi was promoted to be one of the six judges (*rütbe-i wela-i sitte*). Of his further life and death nothing more is known. It is certain that he ended his days in Bosnisch-Novī and was buried there. The site of his grave is still pointed out but the tombstone has disappeared.

'Omar Efendi's little book is fairly common in MSS. (usually copies of the first printed text); cf. F. Babinger, *G. O. W.*, p. 277, to which we may now add: Agram, South Slav Akad. der Wiss., coll. Babinger, N^o. 390 and 391 as well as N^o. 631, iv. (here called *Ghazarawāt-nāme-i Bānālūkā*). The printer Ibrāhīm Muterfiḳā [q. v.] revised and corrected 'Omar Efendi's narrative (cf. Ḥanifzāde in Ḥādjdī Khalīfa, N^o. 14533: *Ghazarawāt-i Diyār-i Bosna*) and published it under the title *Aḥwāl-i Ghazarawāt der Diyār-i Bosna* (8 + 62 p., Stambul 1154; cf. F. Babinger, *Stambuler Buchwesen im 18. Jahrh.*, Leipzig 1919, p. 17). On later editions cf. F. Babinger, *G. O. W.*, p. 277. The book is also accessible in a rather bad German translation and a not very successful English one, cf. *G. O. W.*, S. 277.

(FRANZ BABINGER)

‘OMAR KHAİYĀM, famous Persian scientist and poet of the Saldjūḳ period (d. in 526 = 1132).

Biography. Although reliable information on Khaiyām is still scarce we cannot underestimate the importance of the sources at present available.

In his Algebra he calls himself Abu ‘l-Faḥḥ ‘Omar b. Ibrāhīm al-Khaiyāmī and in his verses seems to use Khaiyām (“tent-maker”) as his *takhal-lus*. It is likely that this nickname refers to the profession of his ancestors. W. Litten, in his pamphlet *Was bedeuten Chajjām? Warum hat O. Chajjām ... gerade diesen Dichternamen gewählt?*, Berlin 1930 (25 p.), has suggested the possibility of a technical interpretation of Khaiyām as “poet, expert in metrics” (cf. Shams al-Dīn Muḥammad b. Kaīs, *Ma‘djam*, in *G. M. S.*, p. 13—16), where metrical terms are explained by the names of different parts of the tent (*bait* in Arabic both “house > tent” and “verse”). However, in the well-known quatrains, such as *Khaiyām ki khāima-hā-yi ḥikmat midūkhī* the reference is evidently to “tents” and not to “verses”.

‘Omar was a Khurāsānian, from Nishāpūr or its neighbourhood. The date of his birth is unknown. He was already famous as a mathematician in 467 (1074—1075) when with Abu ‘l-Muzaḥfir Asfīzārī and Maimūn b. Naḍīb Wāsiṭī (cf. Ibn al-Aṭhīr, x. 67, under the year 467) he was invited by Malik-Shāh to collaborate in the reform of the Persian calendar [cf. DJALĀLĪ]. In 506 (1112—1113) Nizāmī-yi ‘Arūḍī met ‘Omar, whom he calls *Hudjdjat al-Haḳḳ*, in Balkh and in 530 (1135—1136) visited his grave in the Hīra cemetery of Nishāpūr “it then being four (variant: *some!*) years since he died”. Consequently the probable date of Khaiyām’s death would be 526 (1132). (On Khaiyām’s grave beside the shrine of Muḥammad Maḥrūk see Muḥammad Hasan, *Maṭla‘ al-Shams*, iii. [Tehran 1303 = 1886], p. 101, 173; Sir P. Sykes, *A pilgrimage to the tomb of ‘Omar Khayyām*, in *Travel and Exploration*, London, Sept. 1909, ii. 129—138, and Williams Jackson, *From Constantinople to the Home of ‘Omar Khayyām*, New York 1911, p. 240—245. See also a picture in the *Times*, July 16, 1934). On the occasion of Firdawsī’s millenary (Oct. 1934) the Persian Government took the occasion also to erect a new monument of white marble over Khaiyām’s tomb).

Nizāmī-yi ‘Arūḍī’s *Čahār Maḳāla*, written ca. 551 (1156), remains the oldest contemporary witness to ‘Omar. The second and even more important biographer is Abu ‘l-Hasan ‘Alī Baihaḳī [q. v.; died 565 (1169)]; the relevant passages, already known through quotations in Shahrāzūrī, have been translated by Jacob and Wiedemann, *Zu ‘Omer-i Chajjām*, in *Isl.*, iii. (1912), p. 42—62 (English transl. of the principal passage by Sir E. D. Ross and H. A. R. Gibb, in *B. S. O. S.*, v., p. 467—473). Baihaḳī calls ‘Omar *al-Dastūr al-Failasūf Hudjdjat al-Islām ‘Omar b. Ibrāhīm al-Khaiyām*. He says that he had a disagreeable character and was not so nice to his pupils as for example Asfīzārī. However, when in 507 (1113) Baihaḳī (at that time only 8 years old; cf. Yāḳūt, *Irshād al-Arīb*, v. 208) visited ‘Omar, the latter

examined him in Arabic poetry and geometry and expressed his satisfaction. Malik-Shāh (cf. also *Čahār Maḳāla*, p. 63) and the [Karakhānīd] Shams al-Mulūk of Bukhārā (d. 472 = 1179) were particularly kind to ‘Omar but Saṇḍjār had a grudge against him. Among the persons who had direct intercourse with ‘Omar are mentioned Abū Ḥāmid Muḥammad al-Ghazālī and the learned prince of the Kākoyid dynasty Farāmarz b. ‘Alī b. Farāmarz. In different sciences ‘Omar was a follower of Abū ‘Alī b. Sinā (Avicenna). Though he was a scholar in philosophy, jurisprudence and history he was no prolific writer and of his works Baihaḳī mentions only a short treatise on physics (*Mukhtaṣar fi ‘l-Ṭabī‘iyyāt*), a treatise on Existence (*Fi ‘l-Wudūd*) and a treatise on Being and Obligation (*al-Kawn wa ‘l-Taklīf*). In the *Kharīdat al-Kasr* of ‘Imād al-Dīn al-Kātib al-Iṣfahānī (written in 572 [1176—1177]) Khaiyām is mentioned as an incomparable scholar of his time enjoying a proverbial reputation (*bihī yudrab al-maḥal*). Khaḳānī (d. 595 = 1198—1199) refers to him once in a verse. Among the later sources may be mentioned Shaikh Naḍīm al-Dīn’s *Mirṣād al-Iḥād* (620 = 1223—1224) where ‘Omar is called “an unhappy philosopher, atheist and materialist”. Kifī, *Ta’rīkh al-Hukamā*, ed. Lippert, p. 243—244 [the passage first utilised by Woeckje], represents Khaiyām as a follower of Greek learning [cf. BAIHAḲĪ]. Shahrāzūrī’s *Nuṣṣat al-Arwāḥ* (xiiith century) chiefly repeats Baihaḳī. Rashīd al-Dīn in his *Djāmī‘ al-Tawārīkh* is the earliest authority known for the tale of three schoolfellows: Nizām al-Mulk, Ḥasanī Šabbāḥ and Khaiyām. The chronological discrepancy involved by this story was already noticed by A. Müller: Nizām al-Mulk was born in 408 (1017) and there are no indications that Khaiyām [or Ḥasanī Šabbāḥ] died at the age of more than 100 years (cf. A. Müller, *Der Islam im Morgen- und Abendland*, ii. 97, 111; Browne, *A Liter. Hist. of Persia*, iii. 190—193. On the different explanations of the legend see Houtsma’s preface to al-Bundārī, p. xiv., note 2; Muḥammad-Khān Kazwīnī in Browne’s translation of the *Čahār Maḳāla*, p. 138 and latterly H. Bowen, in *J. R. A. S.*, Oct. 1931, p. 771—782). However, the facts remain that Nizām al-Mulk must have met Ḥasanī Šabbāḥ (cf. Ibn al-Aṭhīr, x. 110 [year 494]) and that Khaiyām in his metaphysical treatise dispassionately mentions the Ismā‘īl among the searchers for metaphysical truth, but the authorship of the treatise is suspect.

Khaiyām as a scientist. Khaiyām’s scientific activities for a long time eclipsed his poetical renown and in 1848 Reinaud in his learned introduction to Abu ‘l-Fidā’s *Geography* wrote: “malheureusement, ‘Omar alliait avec l’astronomie le goût de la poésie et du plaisir”.

On the reform of the calendar for which Khaiyām is responsible jointly with his colleagues, cf. DJALĀLĪ.

MSS. of Khaiyām’s principal work on Algebra exist in Leyden, Paris and the India Office (see Woeckje, *L’algèbre d’Omer Alkhayyami publiée, traduite et accompagnée d’extraits de mss. inédits*, p. 1851). Khaiyām’s introduction to his researches on Euclid’s axioms (*Muṣāḍarāt*) has been translated by Jacob and Wiedemann, in *Isl.*, iii. (MS. in Leyden). The treatise *Mushkilāt al-Hisāb* exists in Munich. G. Sartori, *Introduction to the History of Science*, Washington 1927, i. 759—761, calls Khaiyām “one of the greatest mathematicians of

mediaeval times. His Algebra contains geometric and algebraic solutions of equations of the second degree; an admirable classification of equations, including the cubic; a systematic attempt to solve them all and partial geometric solutions of most of them. His classification of equations... is based on... the number of different terms which they include... thus ‘Omar recognises 13 different forms of cubic equations.... Binomial development when the exponent is a positive integer. Study of the postulates and generalities of Euclid” (cf. also W. E. Story, *Omar as Mathematician*, Boston 1918 [17 pages]). In physics Khaiyām’s researches were devoted to the specific weight of silver and gold (MS. in Gotha; see Wiedemann, *Über Bestimmung der spezifischen Gewichte* [Beitrag 8], in *S.B.P.M.S. Ergl.*, xxxviii. [1906], p. 170—173). The *Ta’rikh-i Alfī* (written about 1000 = 1591) quotes the names of the *Mizān al-Hikam* “on the methods of ascertaining the value of objects studded with precious stones without taking the latter out” [perhaps the same work on specific weight] and of the *Lawāzim al-Amkina* “on the methods of determining the orientation and the cause of the difference of climate of various countries”.

Of metaphysical works of Khaiyām a MS. of the above mentioned treatise on Existence is in Berlin and a MS. of a little Persian treatise (*Dar ‘Ilm-i Kulliyāt*) in Paris. Of the latter Christensen has translated several chapters, *Un traité de métaphysique de ‘Omar Khayyām*, in *M.O.*, i. (1908), p. 1—16. This treatise, of the contents of which Christensen has a poor opinion, is dedicated to a certain Fakhr al-Milla wa ‘l-Dīn Mu‘ayyad al-Mulk, probably one of Nizām al-Mulk’s sons.

Finally must be mentioned the *Nawrūz-nāma* of which the existence was first revealed by F. Rosen, *The Quatrains of O. Khayyām newly translated*, London 1930, p. 5—18. The text based on the unique Berlin MS. [Rosen: 1365 A.D.; Muḥammad Khān Kazwīnī: “not later than the viith century of the Hijra”] was published with notes and a glossary by Muḥdjab Mīnowī, Tīhrān 1933. This treatise is a presentation pamphlet written at the request of a friend. The matters referring to Nawrūz [q.v.] occupy only 19 pages out of 77; the rest is taken up by such subjects as gold, horses, falcons, wine, beautiful faces. The treatise does not show any deep knowledge in the compiler and its authorship, for several reasons, cannot be considered as finally established. An incomplete copy of the same treatise (perhaps the first 43 pages out of 77 of the printed edition exists in the British Museum, Add. 23,568, fol 86b—101b: *Risāla dar taḥkik-i Nawruz* [anonymous]).

For lists of Khaiyām’s scientific works see Brockelmann, *G. A. L.*, i. 471; Suter, *Die Mathematiker und Astronomen der Araber*, 1900, p. 112; Muḥammad Khān Kazwīnī, notes to the *Čahār Maqāla*, p. 220—221; Csillik, *op. cit.*, introduction (21 names are quoted of which some are only Persian equivalents of Arabic titles).

In a very detailed book *Khayyām, ōr uske sawānih wa-taḥānif pur naqīdāna naẓar*, published in Hindustani by Saiyid Sulaimān Nadwī, ‘Azamgarh 1933 (508 pages), the following scientific works ascribed to Khaiyām have been reproduced: *Risālat al-Kawn wa ‘l-Taklīf* (with further polemics on the subject); *Risālat al-Wudjūd* (published in

Cairo under the name of *Ḍiyā’ al-‘aklī*); *Risālat al-Wudjūd* also called *al-Awṣāf li ‘l-Mawṣūfāt*; *Risālat fi Kulliyāt-i Wudjūd* (in Persian); *Mizān al-Hikam*.

Khaiyām as a poet. Already ‘Imād al-Dīn Iṣfahānī in his *Khariḍat al-Ḳasr* (572 = 1172) mentions Khaiyām among the poets of Khurāsān and quotes four Arabic verses of his. Naḍīm al-Dīn Rāzī cites two quatrains in Persian. Shahrāzūrī gives three Arabic fragments (?) numbering respectively 4, 6 and 3 verses [while the Persian translation of Shahrāzūrī, finished in 1011 (1602), substitutes for them 2 Persian quatrains]; that of 6 verses belongs to the same poem as the verses quoted by ‘Imād al-Dīn. Kiftī reproduces exactly the latter’s quotation. Djuwainī (658 = 1260), i. 128, puts a Persian quatrain into the mouth of Saiyid ‘Izz al-Dīn who was counting the victims of the Mongol invasion in Khwārizm in 618 (1221). One quatrain is found in the *Ta’rikh-i Guzida*, in *G. M. S.*, p. 818. From 741 (1340) we possess 13 quatrains preserved in the *Mu’nis al-Ahrār*. The MS. edited by F. Rosen contains 329 quatrains but its date 721 (1321) is certainly wrong. The other oldest collections of the ixth (xvth) century are:

Sambul A S 1032	861	(1456—1457)
		131 quatrains;
" NO 3892	865	(1460—1461)
		315 quatrains;
Oxford Bodl. Ouseley 140	865	(1460—1461)
		158 quatrains.

Later the number of *rubā’iyāt* in some MSS. rapidly rises: the MS. in Vienna (Flügel, *Handschriften*, i. 496, N^o. 507) dated 957 (1550), has 482 *rubā’i*, that of the Bankipūr Public Library, dated 961 (1553—1554), 604 *rubā’i*, till finally in the Lucknow edition of A.D. 1894 one finds 770 *rubā’i*. Miss Jessie E. Cadell (*Fraser’s Magazine*, May 1879) is said to have collected from all available sources 1,200 quatrains; see the list of the MSS. in Csillik, *op. cit.*, p. 37—39.

Already in Th. Hyde’s *Veterum Persarum... religionis historia*, Oxford 1700, p. 529—30, there is found a Latin translation of Khaiyām’s quatrain *Ay, sūkhṭa-yi sūkhṭa-yi sūkhṭamī*. For the first time several Persian quatrains were published in a Persian grammar compiled by F. Dombay in Vienna in 1804. Khaiyām’s renown in Europe, however, was long based on his scientific activities and it is noteworthy that his Treatise on Algebra was translated in 1851, while the first edition of Fitz-Gerald’s famous version of the quatrains was published in 1859, the French edition by Nicolas in 1867, and only since the second edition of Fitz-Gerald’s version in 1868 has the wave of admiration for Khaiyām swept through western lands.

Critical studies of the text started only in 1897 when Żukowsky published his article ‘*Omar Khayyām i transtwuuyshchīya četveroostishīya*, in *al-Muzaḥaffariya*, a presentation volume to Baron V. Rosen, St. Petersburg 1897, p. 324—363 [made more widely accessible in an early (abridged) translation by Sir E. D. Ross, in *J. R. A. S.*, xxiii., 1898, p. 349—366]. Żukowsky’s merits consist in: 1. rendering accessible some old texts on Khaiyām’s biography entirely unknown up to that time, and 2. shattering the uncritical belief in the authenticity of the existing collections of quatrains. Żukowsky showed that 82 out of 464 quatrains included in Nicolas’ edition are found also in the *diwāns* of

39 other authors (and sometimes simultaneously in the *diwāns* of several poets). He then divided these 82 quatrains into different subject groups and thought that the proportion thus obtained would (in inverse order!) serve as a hint for the characteristics of Khaiyām. For example, the interpolations of epicurean character represent 33⁰/₁₀₀, and those which give expression to Muslim free-thinking 29⁰/₁₀₀. Therefore, the safest way is to take as a basis the least interpolated groups “of which the authenticity has been shattered the least”. Consequently Żukowsky attaches a particular importance to the “mystic šūfism” in Khaiyām’s poetry. This theory (which puzzled Christensen, *Recherches*, p. 10, and misled Hartmann, in *W.Z.K.M.*, xvii. 367) is certainly insufficient both psychologically and statistically, for it is not the percentage of interpolations but that of the remaining quatrains which is of importance. So Żukowsky’s discovery of a high proportion of “wandering” quatrains is valuable only as a negative principle (cf. Barthold, in *Zap.*, xxv. 403–404). The thoroughness of Żukowsky’s work is shown by the fact that the later researches by E. D. Ross and Christensen resulted in the raising of the total number of ascertained “wandering” quatrains only to 108.

In his *Recherches sur les Rubāʿiyāt de ‘Omar Hayyām*, Heidelberg 1904, Christensen went one stage farther. Stating how rapidly the number of quatrains increased since the date of the Bodleian MS. (only a century later the Bankipūr MS. contains 604 quatrains!), he postulated a similar process for the time separating that MS. from Khaiyām’s death (over three centuries): “how many quatrains there would remain attributable to Khaiyām? A *diwān* is transmitted tolerably intact, whereas a collection of *rubāʿi* is much more exposed to tampering”. Consequently “there exist no criteria [of genuineness] both as regards the form and the matter” of the quatrains (p. 32). Christensen admitted only the probability that the twelve *rubāʿi* containing Khaiyām’s name and the two quoted by Nadīm al-Dīn Rāzī had some chance of being genuine. [But even one of the 12 quatrains of the first category has a variant ascribed to Afḡal-i Kāshī!]. The more optimistic conclusions of Christensen are that those 14 quatrains “contain, so to speak, in nucleus all the *rubāʿiyāt*” and that in general the poetical and historical importance of the *rubāʿiyāt* must be severed from the question of their authorship. As Khaiyām wrote in the national Persian spirit the later addition kept “within the same cycle of ideas” (see the 14 quatrains above mentioned). Only the few mystical and erotic quatrains seem to be interpolations foreign to Khaiyām’s nature. In a following chapter Christensen studies the historical traits of the Persian national character and winds up by saying that “Khaiyām’s spirit is the Persian spirit as it existed in the Middle Ages, and as in substance it is nowadays” (p. 89). This part of Christensen’s reasoning must be inevitably accepted *cum grano salis*, such matters admitting unfortunately no final demonstration. A further step in the study of Khaiyām’s text was the discovery by Muḥammad Khān Kazwīnī of 13 quatrains in the anthology *Muʿnis al-Ahrār* (composed and copied in 714 = 1340; see Sir D. Ross, in *B.S.O.S.*, iv/iii., p. 433–439). F. Rosen, in the Persian preface to his new edition (1925) of the *Rubāʿiyāt* (also in German, *Zur Textfrage der Vierzeiler ‘Omars des Zeltmachers*,

in *Z. D. M. G.*, 1926, p. 285–313), criticised the exaggerations of the theory of “wandering” quatrains but authenticated only 23 *rubāʿi* (those quoted by Rāzī, Djuwainī etc., six of those containing the name of Khaiyām and 13 of the *Muʿnis al-Ahrār*). Finally, after a new revision of all the materials available, Christensen in his *Critical Studies in the Rubāʿiyāt of ‘Umar-i Khayyām*, Copenhagen 1927, offered a new criterion to ascertain the genuineness of the quatrains. He divided (p. 19) the collections of quatrains into three categories: those in which the quatrains are disposed without any alphabetical arrangement, those with single alphabetical arrangement (i. e., in groups according to the final letter of the rhyme) and those with double alphabetical arrangement (under each rhyme letter the quatrains disposed in the order of the first letter, of the beginning word). He takes the first arrangement as the oldest and of this group mentions five specimens: one bearing the apparently false date 721 (1321), one dated 902 (1496) etc. The double alphabetical arrangement is already found in the Bodleian MS. and the single alphabetical one must be presumably older. Moreover Christensen noticed that in different collections (of the first and second class) there were found series of quatrains “in the same, longer or shorter succession” (p. 13). Though the comparison of the non-alphabetical group led “to a purely negative result” (p. 27) as regards the establishing of a textual tradition, Christensen suggests that in some cases (MSS. dated 1528 and 1540) the principle underlying the non-alphabetical arrangement was the disposition according to the contents. Moreover he thinks that we may “learn something by studying the total stock of the texts” (p. 27) and consequently (p. 39) lays down an elaborate system of rules based upon the number of times a given *rubāʿi* is found in different groups of MSS. This system being strictly enforced entails considerable changes in the former views on the subject: thus out of the six best attested quatrains containing Khaiyām’s name one is proclaimed spurious, one uncertain and four genuine (p. 40). Finally 121 quatrains which have stood the test are taken as a basis for a new characteristic of ‘Omar.

The new method, in spite of its mathematical character, greatly depends on the materials utilised by its author. H. Ritter in his important review of Christensen’s work (*Zur Frage der Echtheit der Vierzeiler ‘Omar Chayyāms*, in *O. L. Z.*, 1929, N^o. 3, col. 156–163) has quoted 7 ancient MSS. found in Constantinople. Of these the two oldest (that of 861 = 1456 containing 131 quatrains, and that of 865 = 1461 containing 315 quatrains) are non-alphabetical while that of 876 (1471–1472) containing 320 quatrains is alphabetical. This fact is partially in favour of Christensen’s views but the order in the two non-alphabetical MSS. is different from that of BNI (the oldest of the non-alphabetical MSS. quoted by Christensen, dated 902 = 1496–1497 and containing 213 quatrains). On the other hand, the MS. of 865, contemporary with the famous Bodleian MS., contains double the number of the latter’s quatrains. Lastly two of the MSS. mentioned by H. Ritter contain each 478 quatrains in a special arrangement by Yer (بر) Aḥmad b. Ḥusain al-Rašhīdī al-Tabrizī, who in 867 (1462–1463) arranged the quatrains

in nine chapters according to their subjects. This fact, Ritter thinks, may be responsible for the traces of a similar arrangement in the two later MSS. (dated 1528 and 1540) mentioned by Christensen [on Tabriz's redaction a paper was read by M. F. M. Kōprülü-zāde at the Orientalists Congress at Oxford; it was also known to Ḥusain Dānīsh; v. i.]. So H. Ritter falls back upon Christensen's conclusions of 1904 and in a somewhat modified form insists on the practical impossibility of authenticating this or that of *Khayyām's* quatrains. The *rubā'iyāt* have been transmitted by methods typical of popular songs (typische Volksliedüberlieferung); they express the popular feeling of the masses (Volksempfindung) which opposed the official religious and literary spirit of foreign origin. As now we happen to speak of a truly "*Khayyāmic*" quatrain, so historically the particular genre must have been associated with the great savant, and Christensen's attribution of his selection of quatrains to 'Omar can be understood only in the sense of a collective name for all what is looked upon as a manifestation of a peculiar tradition (Einzelüberlieferung).

Finally must be mentioned the discovery of a MS. dated 1423 and containing 206 quatrains announced by Maḥfūz al-Ḥaḥḥ at the meeting of the Asiatic Society of Bengal, on April 5, 1932, and H. H. Schaefer's paper *Der geschichtliche und der mythische 'Omar Chajjām*, read at the Orientalistentag held at Bonn at the end of August 1934. Schaefer is extremely and perhaps excessively sceptical as regards the attribution of the quatrains to 'Omar *Khayyām*. He concludes by saying that "*Khayyām's* name must be struck out of the history of Persian literature". He also doubts the authenticity of the treatise published by Christensen and the *Naurūs-nāma*. Schaefer's paper will appear in book form. For a resumé see *Z. D. M. G.*, xiii./2, 1934, p. *25—*28.

Conclusions. The upshot of the preceding study is that we possess nothing approaching a *recensio recepta* of *Khayyām's* poetical works. What should we say, if for characteristics of a historical personality we had his correspondence in which scarcely a single letter could be authenticated and many were decidedly spurious? Taking, for instance, the important point of "mystic *Šūfism*" we find that Žukowsky makes a strong point of it in *Khayyām's* poetry, while Christensen denies its importance, though in support of this insufficiently attested tendency one could quote *Khayyām's* metaphysical treatise in which the most honourable place is reserved to the *Šūfī* seekers of Truth (cf. Rosen, 1926).

The striking contradictions in the ideas and feelings expressed in the *Rubā'iyāt* have struck all those who have written on *Khayyām* and the characteristic trait of the "type associated with *Khayyām*" seems to be precisely the alternation of sarcastic pessimism and epicurean hedonism, of the consciousness of frailty of our contingent existence and the joyful motto of *carpe diem*. Nevertheless it must be admitted that the pessimistic side of *Khayyām's* poetry is better attested by the quotations in the older biographers and, what is more, by the Arabic verses of 'Omar *Khayyām* which may have suffered in transmission but which certainly could not be imitated by popular tradition (F. Rosen has utilised the Arabic verses in his penetrating study of 1926).

FitzGerald's version. *Khayyām's* popularity among large circles of the public is chiefly due to the English version by E. FitzGerald [1809—1883]. This paraphrase of exceptional poetical merits, consisting in the second edition of 110 quatrains [third edition: 101], cannot, however, be taken for a translation in the strict sense of the word. E. Heron-Allen who most carefully compared the English and Persian texts (*Some side-light upon FitzGerald's poem "The Rubā'iyāt of 'O. Khayyām"*, 1898) has established that 49 quatrains are faithful paraphrases of single *rubā'ī*; 44 are traceable to more than one *rubā'ī*; 2 are inspired by the *rubā'ī* found only in Nicolas' edition; 2 reflect the "whole spirit" of the original; 2 are traceable exclusively to 'Aṭṭār; 2 are inspired by *Khayyām* but influenced by Ḥāfiẓ and 3 (only in the first two editions) could not be identified. As manifestations of the almost religious feeling with which the admirers treat FitzGerald's version may be mentioned the 'Omar *Khayyām* Club, founded in London in 1892 (and its numerous imitations in the U. S. A.), as well as J. R. Tutin's book, *A concordance to FitzGerald's translations*, London 1900.

Bibliography: See the works mentioned in the present article. For the older bibliography see H. Ethé, in *G. I. Ph.*, ii. 275—277; Browne, *A Literary History of Persia*, 1906, ii. 246—259; Krīmsky, *Istoriya Persii* (*Trudi po vostokovedeniyu*, xvi., tome i., No. 4), Moscow 1909, p. 358—390. Last in date and very complete is A. G. Potter, *A bibliography of the Rubā'iyāt of 'Omar Khayyām, together with kindred matter in prose and verse pertaining thereto* [second edition], London 1929, 314 pp. [contains 1,308 printed items and mentions over 50 principal MSS. and 35 editions of the text].

More important articles on *Khayyām* are P. Horn, *Gesch. d. persischen Literatur*, Leipzig 1901, p. 150—155; E. D. Ross' introduction (p. 1—91) to H. B. Batson's edition of FitzGerald's version, London 1901; R. A. Nicholson's introduction to FitzGerald's version (printed by A. and C. Black), London 1909 (numerous reprints); Muḥammad Khān Kazwīnī, notes to his edition of the *Caḥār Maḥala*, in *G. M. S.*, 1910, p. 209—228 and 359, resumé in E. G. Browne's translation, 1921, p. 134—139; E. Bertels, *Öcherk istorii persidskoy literatury*, Leningrad 1828, p. 44—45.

The principal European editions of the Persian text are J. B. Nicolas (with a French translation), Paris 1867; E. H. Whinfield (with an English translation), London 1882, 1893 etc.; E. Heron-Allen (facsimile of the Bodleian MS. of 865 = 1460 with an English translation), London 1898; F. Rosen, Berlin, Kavian Press, 1304 = 1925; Ḥusain Dānīsh with a translation and an interesting introduction in Turkish, second edition, Constantinople 1346 = 1927; Christensen, *Critical Studies* (v. s.) with a complete comparative table of the quatrains in the principal collections; B. Csillik, *Les manuscrits mineurs des Rubā'iyāt de 'Omar Khayyām dans la Bibl. Nationale, textes originaux des mss.*, Suppl. Persan 1777, 826, 745, 793, 1481, 1425, 1817, 1327, 1458, published as No. 2 of the *Travaux de la Bibl. Universitaire de Suedg*, viii. (French introduction) + 69 (Hungarian introduction) + 85 p. (Persian text) [a very thorough study].

Translations into principal European languages: into English see above, Whinfield, Heron-Allen, Christensen, J. Payne, 1898; F. Rosen, *The quatrains newly translated*, London 1930; into German: A. von Schack, Stuttgart 1878; Bodenstein, Breslau 1881; F. Rosen, *Die Sinnsprüche Omars des Zeltmachers* (several editions); into French: see above Nicolas, Ch. Grolleau, Paris 1902; Claude Anet [in collaboration with Muḥammad Khān Ḳazwīnī], Paris 1920 (144 quatrains). Cf. also the extensive collection of translations into English, French, German, Italian and Danish edited by N. H. Dole, Boston and London 1898, 2 vols., clxxix. + 655 p. Single quatrains have been translated into most of European and extra-European languages, Basque, Yiddish and Gypsy included. Modern Arabic translations: Aḥmad Ḥāmid al-Ṣarrāf, Baghdād 1350 (1931) (with lengthy introduction); al-Saiyid Aḥmad al-Ṣāfi al-Nadjaḥ, Dimishḳ 1350. (V. MINORSKY)

'OMĀRA B. ABI 'L-ḤASAN 'ALĪ B. ZAIDĀN AL-ḤAKĀMĪ AL-YAMANĪ, an Arab man of letters born in 515 (1121) in Marṭān on the Wādī Wasā' in the district of al-Zarā'ib in the Tihāmat al-Yaman, executed on Ramaḍān 2, 569 (April 6, 1174) in Cairo by orders of Ṣalāḥ al-Dīn [cf. the article SALADIN]. In that period the Yaman, broken up into many little principalities, was suffering severely from continual civil wars. Traditional learning was still in a flourishing condition however, especially in the large towns. In 530 (1136) 'Omāra was sent by his father to Zabīd, where he studied, especially Shāfi'ī law, under 'Abd Allāh b. al-Abbār and others. In the year 535 he was given his teacher's diploma (*idjāza*), visited his parents and taught for three years in the madrasa of Zabīd. While civil war was raging with particular violence in Zabīd, he spent some time in the coast town of 'Anbara where he was on intimate terms with one of the pretenders, 'Alī b. Maḥdī [q. v.]. Returning to Zabīd, he continued his studies and in the years 538—548 engaged in trading between Zabīd and 'Aden which brought him into contact with the Banū Nadjaḥ, a dynasty of Abyssinian origin reigning in Zabīd. In the year 538 (1143) he went on his first ḥajj with some members of the dynasty. In 'Aden he entered literary circles and was able to develop his poetic gifts. The rivalry between the Nadjaḥids and the Zurā'ids who ruled in 'Aden provoked intrigues against him which threatened his life and forced him to leave the Yaman. In 549 (1155) he went on pilgrimage to Mecca and was sent by the Sharif Ḳasim b. Ḥashim on a mission to the Fāṭimids in Egypt. Returning to Mecca in the same year, he visited Zabīd and 'Aden for the last time in 551 (1156) and in 552 (1157) again made the ḥajj. Sent on a mission a second time, he settled permanently in Egypt. He said himself that he came here to seek "position and fortune" (*al-lubn 'l-djāha wa 'l-māla*: *Diwān*, i. 287); his later life is typical of the Arab *adīb*. Although he held for some time the title of ḳāḍī, he devoted himself exclusively to working as a court poet. His ḳaṣidas of praise were dedicated not so often to the last Fāṭimid caliphs *fainéants* al-Fa'iz [q. v.] (d. 555 = 1160) and al-ʿAḍid [q. v.] (d. 567 = 1171) as to their autocratic viziers, who changed on the stage like marionettes: Ṭalā'ī^c b. Ruzzik

[q. v.] (d. 556 = 1161), Ruzzik (d. 558 = 1163), Dirghām [q. v.] (d. 559 = 1164) and Shirkūh [q. v.] (d. 564 = 1169). In the continued changes at court, 'Omāra managed always to hold his position. When Ṣalāḥ al-Dīn came to power first as vizier, he addressed to him in 1169 an appeal in verse which appears to have had the desired effect. With the end of the dynasty his position became difficult; 'Omāra was neither a Shī'ī nor an Ismā'īlī (cf. however Imād al-Dīn in Derenbourg, I, 399 or al-Djanadī, *ibid.*, ii. 546—547) but his sympathies inclined to the Fāṭimids and he openly expressed them in a popular ḳaṣida of lament. Very soon afterwards he took part in a conspiracy, the object of which was the restoration of the Fāṭimids, was crucified along with other participants and buried in the cemetery of Cairo.

Among his contemporaries 'Omāra was especially renowned as an authority on law; in Zabīd he was known as *al-Faraḍī*, in al-Yaman as *al-Faḳīh* (see al-Djanadī in Derenbourg, ii. 546); several textbooks compiled by him on *al-farā'id* were popular in his native land in his lifetime (see *al-Nukat* in Derenbourg, i. 23). Nothing of his legal work has survived and we only know him as a literary man of very ordinary type. His works are of considerable importance for the history of his own time, but Derenbourg much exaggerates their literary value. The most interesting is perhaps *al-Nukat al-aṣriya fī Akhbār al-Wuzarā' al-Miṣriya* (ed. by Derenbourg, i. 5—154; ii. 503—511) which contains many autobiographical details, an anthology of his verse and notes on the contemporary Egyptian viziers. It begins in the year 558 (1162) and comes down to the death of Shāwar (564 = 1169). He dedicated his history of al-Yaman to the Ḳāḍī al-Fāḍil [q. v.] (1135—1200); it was begun at his suggestion in 563 and finished in the following year (ed. by H. C. Kay). Based on the same plan as a work of his predecessor, the emīr of Zabīd Djaiyāsh b. Nadjaḥ (d. 498 = 1158), called *al-Mufid fī Akhbār Zabīd*, which has not come down to us, it is known as the *Tārīkh al-Yaman*. Its importance lies mainly in what he tells from his own experience or from hearsay. Of less interest are his *Tarassulāt*, nine in number (ed. Derenbourg, ii. 431—490). They show the influence of the famous *Rasā'il* of al-Ḳāḍī al-Fāḍil, being in rhymed prose filled with all kinds of stylistic figures. His anthology of the poets of Arabia, particularly of al-Yaman, has not come down to us but was much used by Imād al-Dīn in his *Kharīdat al-Ḳaṣr*. Of his *Diwān* (ed. by Derenbourg, i. 155—394; ii. 405—429, 511—539) no proper edition exists and all the known manuscripts differ in their contents and are not all complete. His famous ḳaṣida of lamentation for the Fāṭimids for example is known not from his own *Diwān* but from the separate MSS. and other sources (in addition to the texts from Ibn Wāṣil and al-Maḳrīzī given by Derenbourg, ii. 612—616 see now al-Ḳalkaṣhandī, *Subḥ al-Aṣḥā*, iii., Cairo 1914, p. 530—532). As a poet 'Omāra was entirely in the tradition of the later 'Abbāsīd school. His models in the panegyric style he found in Bashshār, Miḥyār and al-Buḥtūrī (*Diwān*, i. 266—267); to these may be added Abū Tammām (the Arab critics had already noticed this; cf. e.g. Ibn al-Aṭhīr, *al-Mathal al-sā'ir*, Cairo 1282, p. 409) and al-Mutanabbī. The influence of the last named is particularly marked,

not only in his verses, but also in many passages in his letters. As regards subject, his poems are mainly *qaṣīdas* of praise or lamentation. Satires (*hiǧāʿ*) are rare as he had once promised his father never to insult a Muslim (Derenbourg, ii. 791). This of course did not prevent him from mocking officials of Christian origin in epigrams which are quite obscene (*Diwān*, i. 312, 331); in keeping with the taste of his time we frequently find in his *Diwān* pornographic lines (i. 383, 393; ii. 421, No. 343). The form of his poetry follows tradition in matter and composition; only a few *muwawshshahāt* are attributed to him (*Diwān*, i. 388—391; to be added in M. Hartmann, *Das arabische Strophengedicht*, i., Weimar 1897).

V.*, ser. iv., vol. xi); important Arabic sources are given in the original by Derenbourg, i. 395—399; ii. 491—502, 541—652 (a good many additions can now be made, e.g. al-Yāfi'i, *Mir'āt al-Djanān*, iii., Haidarābād 1338, p. 390—392); F. Wüstenfeld, *Geschichte der Fatimiden-Chalifen*, Göttingen 1881, p. 344—347; do., *Die Geschichtsschreiber der Araber und ihre Werke*, Göttingen 1882, p. 90—91, No. 263; P. Casanova, *Les derniers Fatimides*, in *M. I. F. A. O.*, vi., part 3, Cairo 1893, p. 420, 431, 441; Brockelmann, *G. A. L.*, i. 333—334; Kh. al-Zurukli, *al-'Ālam*, ii., Cairo 1927, p. 709—710; J. E. Sarkis, *Dictionnaire encyclopédique de bibliographie arabe* (Arabic), Cairo [1929], p. 1377—1379. — It is to be hoped that the revival of interest in Ismā'īlī literature will throw further light on 'Omāra's activity in the last days of the Fatimids. (IGN. KRATSKHOSKY)

OMDURMAN (UMM DURMĀN), a town of the Anglo-Egyptian Sūdān situated on the west bank of the main Nile immediately below the junction of the Blue and White Niles. A seven-span steel bridge built in 1925—1928 connects Omdurman with Khartūm [q. v.], and the two towns (together with Khartūm North on the right bank of the Blue Nile) form for practical purposes a single city; but whereas Khartūm as the seat of the government and the centre of foreign commerce has acquired a European character blended of British and Levantine elements, Omdurman remains the focus of native life and of the internal trade of the Sūdān. The inhabitants number some 110,000, of whom the great majority are natives drawn from every part of the country.

The importance of Omdurman is of very recent origin: it started as an insignificant village in the territory of the Fithāb (a branch of the Djamū'iya tribe) and is first mentioned as the dwelling-place of an ascetic and "holy man", Ḥamad b. Muḥammad generally known as Ḥamad

Walad Umm Maryūm, who lived from 1646 to 1730 A. D. (see MacMichael, *History of the Arabs in the Sudan*, ii. 277). The site first became important when it was fortified by Gordon for the defence of Khartūm against the Darwish army of Muḥammad Aḥmad [q. v.] who captured it on January 15, 1885, ten days before the fall and sack of Khartūm. Under Muḥammad Aḥmad's successor, the khalifa 'Abdullāhi, Omdurman was the capital of the Mahdist state and the religious centre of the new sect. The Mahdi's tomb, a domed building designed by an Egyptian captive, was erected in the middle of the new settlement which henceforth was known as Buḳ'at al-Mahdi, the [holy] place of the Mahdi, and by the khalifa's ordinance the duty of visiting the tomb was substituted for the orthodox pilgrimage to Mecca. In order to consolidate his personal rule the khalifa induced large numbers of his fellow-tribesmen, the Ta'aisha and other Baḳḳāra from the western Sūdān, to settle in Omdurman where they could support themselves only through the spoliation of the riverain population; this migration was described as a *hiǧra* in accordance with the Mahdist practice of establishing analogies between the life of Muḥammad Aḥmad and his companions and the early history of Islām. The population of Omdurman was further swelled by the enforced settlement of large numbers of tribesmen from all parts of the country whom the khalifa desired to concentrate at his own headquarters for political or military reasons. The town grew up in a haphazard fashion and, apart from the houses of the khalifa and his principal amirs, consisted of a straggling mass of straw huts covering a length of about six miles from south to north. The khalifa's "mosque" was a vast open space in the centre of the town enclosed by brick walls. For a graphic description of Omdurman under the khalifa's rule see Sir Rudolf von Slatin's *Fire and Sword in the Sudan*.

The reconquest of the Sūdān by the Anglo-Egyptian forces under Sir Herbert (later Lord) Kitchener was completed by the battle of Omdurman on September 2, 1898, the scene of which was near the village of Kerreri a few miles to the north of the town. Under the new administration the town has acquired such modern features as regularly laid-out streets, tramways and electric light. The houses of the well-to-do townspeople and the government buildings are built of brick and stone, but a large part of the town still consists of the rectangular mud buildings which are characteristic of the northern Sūdān, and the life of the busy markets preserves its Oriental and African character. Associated with the principal mosque there is an institution known as *al-ma'had al-'ilmī*, presided over by a *shaiikh al-'ulamā*, which provides instruction in the traditional subjects of Muslim learning. The *kaḍīs* employed in Muslim law courts are however drawn from students of the Gordon College in Khartūm. For secular education Omdurman possesses a government intermediate school and several *kuttābs* (government elementary schools) as well as a number of schools maintained by missionary societies and by private enterprise.

often reprinted); *Report on the Administration, Finances and Condition of the Sudan* (H. M. Stationery Office, London 1925, and annually).

(S. HILLELSON)

ORĀMĀR, URMAR. The administrative geography of Turkey speaks sometimes of the *kaḏā* of Urmār containing two *nāhiya*, Djlulur and Ishāzin, with 32 townships and 25,910 inhabitants (cf. Cuinet, *Turquie d'Asie*, ii. 756), sometimes of a *nāhiya* of this name forming part of the *kaḏā* of Gawar, in the sandjak of Hakkari, in the wilāyet of Wān [q. v.]. We incline rather to the second definition, having visited this district, lost in the middle of Central Kurdistan. Not only has Orāmār not the importance of a *kaḏā* but the two *nāhiya* attributed to it are inhabited exclusively by Nestorians [q. v.] the one, Djlū, being autonomous while Orāmār is at present at least purely Kurdish and an appanage of the house of Mālā Miri, a tribe of Duskani Zhūri and not Heriki (Cuinet, *op. cit.*): a further proof of the inaccuracy of the Turkish statements regarding this part of Kurdistan. The boundaries of Orāmār are on the north Ishāzin and Gawar; on the south Rēkān; on the west Djlū, Bāz and Tkūma [cf. NESTORIANS] and Artush; in the east Sāt [cf. SHAMDINĀN]. Orāmār situated at a height of 5,520 feet (cf. Dickson) is a group of hamlets scattered on the two sides of a rocky mountain spur above the Rūbārī Shīn. On the spur itself which is called Gaparānī Zhēr, at the place named Gire Būti, is the capital of the group and the residence of the *aghās*, the Nāw Gund or "the middle of the town". A large cemetery occupies the promontory at the end of the spur. The name Gire Būti which we explain as the "hill of the idol" seems to indicate the antiquity of the settlement. The fact that the slopes separated by the Gaparān are very carefully cultivated and present a complicated system of little terraces each of which is a field or tiny kitchen garden, leads one to believe that man chose this site for habitation a long time ago, perhaps simply on account of its extreme isolation in the centre of a wild country.

Orography. On the general character of the country see the article NESTORIANS. Orāmār is at east end of the curve traced by the system of the Djlū Dāgh. According to Dickson, the chains and valleys of Turkish Kurdistan run roughly along the parallels of latitude and take a south-eastern direction as they approach the Persian frontier and at the point where they change their axis form a complicated system of heights and valleys. The most complicated part near the centre of the change of axis in question may be called Harki-Orāmār.

Road system. Although they are really nothing but tracks used for intertribal communications, it is nevertheless interesting to indicate the directions to connect the routes with the road-system which we have studied at Rawāndīz and Shamdinān [cf. these articles] which must have played a more prominent part in ancient times. Orāmār is connected with Gawar via Shamsiki, the pass of Baštazin, 'Alī Kānī, Bāzīgā and Dizza. It is a road which shows traces of works undertaken at the more dangerous places. To the south the road going through a very narrow defile leads first to Nerwa (cf. below) where it forks: 1. to the west, by the district of Artush, via Bīri-Či-Titim and the district of Nirwei via Willa and Pīri Halāna, this last place being

on the left bank of the Great Zāb opposite Suriya on the road from 'Akrā; 2. to the east, by the district of Rekāni, via Bezālī-Sahādja and Awi Marik (water course) to Barzān and Bahri Ras on the left bank of the Great Zāb opposite Bira Kepran, also on the road from Akrā. A third road goes from Nerwa to Nehri, the centre of Shamdinān, via Razga, the heights of Peramizi (frontier of the three tribes — Rekāni, Harki, Duskāni), Deri, defile of Harki (Shiwa Harki), Begor, Mazra, Nehri. — It is to be hoped that with the final delimitation of the boundary between Turkey and the 'Irāk, this region will be properly surveyed and mapped and will no longer as at present show so many blanks and inaccuracies on the maps (cf. *Asie Française*, Oct.-Nov. 1926, treaty of delimitation).

Ethnography. The following Kurdish tribes may be mentioned in Orāmār itself and in the vicinity with ramifications inevitable as a result of the Kurd migrations. After the name of each tribe we give in brackets that of the district and the number of households: Duskānī Zhūri (Orāmār, 2,000); Nirwei (Nerwa, *kaḏā* of Amādiya, 800); Dīri (Gawar and Gelia Dīri, 1,000); Peniānīsh (between Gawar and Djlūmerk, and the part of the Pīrhulki, near Baškāl'a, 4,000); Duskānī Zhēri (*kaḏā* Dehuk, 2,000); Mizūri Zhēri (*ibid.*, 5,000); Berwāri (*ibid.*, 4,000); Guwei, nomads (wintering at Dehuk; summering at Gawar and Orāmār, 1,400); Čeli (Djlūmerk, 6,000); Artūshi (summering at Firashin; wintering at Beriei Zhengār, 6,000); Artūshi (sedentary: Albāk, 1,000; Nurdīz, 1,000); parts of Artūshi: Gewdan, Mām Khōran, Zhirki (around Djlūmerk, 6,000).

History. There are so far as we know no texts mentioning Orāmār except this brief note in the *Mir'at al-Buldān* (Tīhrān, p. 22): *Urmār bi-damm-i arwal wa-sukūn-i thānī iakī az aškā-i Adharbaidjān ast dar āndjā djam'i kathīr birāie djaṅg wa-mudāfā'i Sa'id ibn al-'Aš djam' shudand Sa'id Djarir ibn 'Abd Al-lā al-Badjalī rā bi djaṅg-i ān djam'at mamūr kard wa-Djarir ān djam'at rā munhazim wa-sarkada-i ishkān rā bi dār zad.* — We may note here: 1. the reading Urmār which corresponds to the pronunciation of the Highland Nestorians for the first part *Ur* but differs from it in giving an *a* and not an *ā* for the second (in Kurdish the pronunciation is Horāmār with the characteristic aspiration); 2. the qualification al-Badjalī which is to be connected with Badjil, a Kurd village in the neighbourhood known for its family of Shaikh Badjilī; 3. the fact that the date of this event is not indicated. Orāmār however like all this part of Central Kurdistan must have had a rich history full of associations with the history of Christianity in these regions. Here we give a description of the Nestorian church of Māri Mamū which is in the village of the same name in Orāmār and has not been previously described; Dickson mentions it; as to Cuinet (*op. cit.*, ii. 757) he says that "the 40 Nestorians rayas domiciled in Orāmār are entrusted with the care of the two Nestorian churches in the Kurdish town (sic!)". The second church called that of Mār Daniil at Nāw Gund (cf. above) has been turned into a mosque within the memory of the present generation. The Nestorian charm uttered at the sight of a snake in order to escape its bite mentions the two saints: *Māri Mamū Mār Daniil kipa 'l-huwa hiṣh* ("M. M., M. D., the stone on the snake"). For legend says

that the saint Mārī Mamū escaped from martyrdom in the time of Julian the apostate at Caesarea in Cappadocia and took refuge in the mountains where he collected the reptiles and shut them up under a flagstone over which was built the church which bears his name (cf. *Acta Martyrum et Sanctorum*, ed. Bedjan, vii, 1896). The life of the saint however contains no mention of Orāmār or of reptiles but it does attribute to him certain powers over wild animals. The version collected by Dickson seems to differ too much from the life of the saint. Dickson thinks that the church was erected on the site of an Assyrian *zikkurat*. In any case the following is the description of the sanctuary which is guarded by the Nestorian family bearing the title of Serdar Bi Mārī Mamū. Were it not for a very little door adorned in the upper part with a Nestorian cross and two circles within which is the same cross, one would not suppose that the building of rough stone in the form of a parallelepiped was a church. In the semi-darkness of the interior one can see that a quarter of the area is taken up by the sanctuary which his separated from the nave by a wall in which are two doors. Through that on the left one approaches the altar proper represented by a stone over three feet high and about two broad half built into the wall with rounded edges and narrowing towards the top. Above this altar is an embrasure which admits a little light; on the left in the wall is a small niche. From the sanctuary a door through a stone wall leads into another chamber in which there is a primitive baptistry carved out of the rock and a little lower on the same base a hearth (*tanura*) for the preparation of the unleavened bread. In front of this part set aside for the divine offices, there are two pulpits also in stone for the liturgical books and for the Gospels and the cross. The bells are replaced by two metal plates hung from a rod connecting the two walls at the bottom of the vaulting. There are no sacred images. The dimensions of the church are 40 feet long, 17 broad and 16 high. According to the legend, the reptiles shut up beneath the altar would come out if the family of guardians were deprived of their secular privileges. The dust from the walls possesses virtues against the bites of mad dogs, the stings of snakes and scorpions, etc. — We have very little certain information about the Nestorian churches of Kurdistan, some of which, that of Mār Bishu on the Persian frontier (Tergawar), that of Mār Zaia at Djilī, that of Mār Sawa at Aṣḥita as well as the ruins at Kučanis must with Mār Mamū go back to a high antiquity between the ivth and vth centuries, for it is to this period that we are told we must put the coming of the first missionaries, Mār Awgin, Mār Bishu etc. The plan of Mārī Mamū may be compared with that of Mār Bishu given by Heazell (*Kurds and Christians*), while in W. A. Wigram (*The Assyrians and their Neighbours*, London 1929) is a sketch of the interior of the church of Mār Shalitha at Kučanis. In any case there is reason to believe that Orāmār was once inhabited by Christians. A local tradition even suggests that the ancestor of the modern *aghās* came long ago into this Christian district and by stratagems and intrigues succeeded in driving out its inhabitants. The toponymy of Orāmār seems to confirm this. The etymology of the name Orāmār itself would also seem to be Aramaic. — We owe to Mgr. Graffin the interpretation of the name as

Ur-mār "citadel of the master" (cf. *Ur-shalim*). This explanation would be corroborated by the inaccessible character of the region. It would confirm at the same time our supposition that this district was inhabited at a very early date. — There are similar place-names elsewhere in the region: Ora Bishu, one of the slopes of Kiria Tawka (cf. above); Orishu, a village beyond Gelia Nu; Uri, a Nestorian clan; finally Urmiya itself.

Bibliography: The only works with which we are acquainted are listed in our joint study with E. B. Soane, *Suto and Tato, a Kurdish text with transl. and notes*, in *B. S. O. S.*, iii., p. 1. — In the review of the Geographical Society of Paris appeared in 1935 our study on *Le système routier du Kurdistan*, containing besides many geographical details a general view of Orāmār from a rare photograph.

(B. NIKITINE)

ORAN (WAHRĀN), a sea-port town on the coast of Algeria (33° 44' N. Lat.; 0° 39' W. Long.). The anchorage which is protected on the west by the heights of the Aidour, the extreme end of the little range of the Murdjadio, and the bay of Mars al-Kabir, 10 miles distant, was probably the Portus Divini mentioned in the *Itinerary* of Antoninus. According to the Arab writers however, the town was founded, like a number of other towns on the same coast, by Andalusians: at the beginning of the tenth century (c. 290 A.H.) a band of these émigrés came there under the leadership of two chiefs in the service of the Umayyads of Cordova, Muḥammad b. Abī 'Awn, and Muḥammad b. 'Abdūn who concluded a treaty with the families of the Berber tribe of the Azdādja settled in the district.

Seven years after its foundation, Oran, which the agents of the Umayyads had no doubt wished to make a base for the enterprises of their masters, felt the repercussions of the rivalry between the Umayyads and the Fāṭimids of Kairawān. A body of soldiers sent by the latter and supported by the Azdādja Berbers seized the town and burned it. Rebuilt, Oran was placed under the authority of the Fāṭimid governor of Tiyyāret. Throughout the fourth century (tenth A.D.) it was held alternately by the Fāṭimids and Umayyads and was taken and re-taken and destroyed (notably in 910 and 954) and rebuilt by expeditionary corps or Berber chiefs representing the two rival caliphs. In spite of these vicissitudes, the town enjoyed great economic prosperity as a result of its position on the coast. The geographer Ibn Hawḳal, who visited it in the second half of the tenth century, thought that there was not a more sheltered port in the whole of Barbary. The commercial relations with Spain were considerable. (The town however at this date was under the authority of ZĪRĪ B. MANĀD [cf. ZĪRĪDS], a vassal of the Fāṭimids). Large quantities of wheat were exported from it. The country around was well cultivated. The river (Wādī Rehī, now covered over in its passage through the town) served to irrigate the fine gardens.

In the eleventh century, Oran belonged to the Banū Khazer, a branch of the Maghrāwa Zenāta who ruled in Tlemcen. It was from them that the Almoravid Yūsuf b. Tāshfin took the town when he conquered the Central Maghrib in 473 (1081). 63 years later it was to be the scene of the drama in which Almoravid power met its end.

On Ramaḍān 27, 539 (March 23, 1145) the second last emir of the dynasty, Tāshfin b. 'Alī, defeated near Tlemcen by the Almohads, died there. Three days later the town passed to the Almohads.

Under its new masters the town prospered. Idrīsī described it as surrounded by a good wall of earth and possessing well-furnished bazaars. The harbour which was supplemented by that of Mars al-Kabir was within easy reach of Almeria. It had a naval arsenal and 'Abd al-Mu'min built ships there.

The part which it played in commerce with Spain became still more important when the 'Abd al-Wāḍids [q. v.] replaced the Almohads in the Central Maghrib. Oran was, along with Honain, to the east of the modern Nemours, a port of Tlemcen. The wealth of the capital depended on the possession of these ports and on the safety and liberty of traffic on the roads which led to them. This explains why throughout the xivth century when the Marinids came to besiege Tlemcen, they sent a force against the coasts to try to take Honain and Oran. In 748 (1347) the Marinid Abu 'l-Ḥasan built two forts there.

At the beginning of the xvth century, the Castilians, continuing the work of the Reconquista on the Berber coast, endeavoured to take Oran, which had now become a dangerous centre of piracy. They were only able to take Mars al-Kabir in 1505 and Oran in 1509. On May 17, Pedro Navarro entered the town, massacred 4,000 Muslims and sent off 8,000 prisoners. Cardinal Ximenes who had organised the expedition came in person to take possession of the new conquest. Wishing to develop their success the Spaniards interfered in the quarrels of the last 'Abd al-Wāḍid kings of Tlemcen. They gave their support to one of these princes who had lost his throne and this provoked the intervention of 'Arūḍī [q. v.], the Turkish corsair of Algiers. The latter having been defeated and killed, the 'Abd al-Wāḍid Abū 'Abd Allāh was restored to the throne of Tlemcen by the Christians in 1543 and became their vassal. The other expeditions planned from Oran as a base produced little result and were ended by the disastrous expedition of the Count Alcaudete against Mostaganem in 1558. The Spaniards were at Oran, as elsewhere, practically confined within their walls, badly supplied by their Berber allies (los Moros de Paz), exposed to famine, plague and the attacks of the Berbers supported by the Turks; they nevertheless held it till 1708. After a siege of five months, they capitulated and the Bey of Mascara Bū Shalāgham took possession of it in the name of the Dey of Algiers.

At the end of twenty-four years of Turkish rule the Spaniards re-entered the town. The Count of Montemar, having routed the Arabs who held the coast, entered the town which was undefended in 1732. Bū Shalāgham tried in vain to re-take it. At last in 1791 after a terrible earthquake in which almost 2,000 perished and which was followed by an attack by the Bey of Mascara, Muḥammad al-Kabir, the king of Spain Charles VI agreed to surrender Oran to the Dey of Algiers; some 70 or 80 Spanish families remained in it however. The town restored to Islām became the residence of the Bey of the West and remained so till 1830. On Jan. 4, 1831, the French, already masters of Mars al-Kabir, entered Oran.

The town has developed immensely since then.

The population, which was 3,800 in 1832, is now over 166,000. Of this total the Muslims number at least 25,000. They live mainly in the southern quarter known as the "village nègre". Among the Europeans the element of Spanish origin is considerable.

There is little trace of its Muḥammadan past in Oran. The Spanish period has left more, notably the old fortress with its gateway adorned with vigorously carved coats of arms.

ORFA (Greek Edessa, Syr. Orhāi, Armen. Ufhay, Ar. al-Ruhā?), an important town in Diyār Muḍar, the ancient Osrhoëne.

The origin of the town, which must have existed before the Macedonian conquest, is lost in obscurity. Repeated attempts to prove the existence of the name in Assyrian times (E. Honigmann, *Urfa keilinschriftlich nachweisbar?*, in Z. A., N. F., v. 1930, p. 301 sq.) have so far failed. The original name was probably 'Oppōy which has survived in that of the spring Καλλιρρόη, which lay below the walls of the town, and in that of the district of Osrhoëne (cf. 'Oppā in Isid. Charac., i., ed. Müller, in G. G. M., i. 246; 'Ορροηνή, Steph. Byz., s. Βάρνα; Arabes Oroei, Plin., Nat. Hist., v. 85; vi. 25, 129; in inscriptions *Orrheni*, C. I. L., vi. 1797; their land was called in Syriac *Bēth Orhāyē*: Cureton, *Spicil. Syr.*, p. 20). A derivation of the Syriac *Orhāi* from the Arabic *Wurhāi* (a *fu'lāi*-form from *wariha*, "rich in water") as proposed by Markwart (in E. Herzfeld, in Z. D. M. G., lxxviii., 1914, p. 665 sq.) can hardly be accepted; as little probable is that from Orhāi, the alleged first ruler and eponym of the town.

Edessa was refounded by Seleucus I on the site of an older settlement (Euseb.-Hieron., *Chron.*, ed. Helm, p. 127) and renamed by Antiochos IV 'Αντιόχεια ἐπὶ Καλλιρρόη (Plin., Nat. Hist., v. 86: ... *Edessam quae quondam Antiochia dicebatur, Callirrhoen a fonte nominatam*; coins in Babelon, *Rois de Syrie*, ciii.; Head, *Histor. num.*, 2, p. 814 and Hill, *Greek Coins of Arabia in the British Museum*, London 1922, p. cxiv.-cviii. and 91-119). It received its Hellenistic name very probably from that of the capital of Macedonia (the ancient Aigai, now Vodena) and the wealth of water may have contributed to the choice of the name (Steph. Byz.: 'Εδεσσα, πόλις Συρίας, διὰ τὴν τῶν ὑδάτων ῥύμην οὕτω κληθεῖσα ἀπὸ τῆς ἐν Μακεδονίᾳ; Nöldeke, *Hermes*, v. 459, wished to emend οὕτω to 'Ορ-ρῶν, but cf. *Εδεσσα* from *εἶδω* = *ἔδω*, *voda*, from which Vodena is derived: G. Hoffmann, *Die Makedonen*, Göttingen 1906, p. 257; J. Marquart, *loc. cit.*, p. 665 sq.; W. Tomaschek, in S. B. Ak. Wien,

cccc., 1893, treatise ii., p. 5). According to Malalas, the town was also called Ἀντιόχεια ἡ μὲζοβαρβαρος (p. 418 sq., ed. Bonn).

In the pre-Christian period Edessa, like Ḥarrān, was the centre of a planet-cult. Edessenes called Venus "Bath Nikkal" (*Doctrina Addaei*, p. 24), i. e. "the daughter of Ningal" (G. Hoffmann, in *Z. A.*, xi., 1896, p. 258—260, § 11; Winckworth, in *Journal of Theol. Stud.*, xxv. 402).

Before the foundation of the Osrhoëne kingdom, the town seems to have been an unimportant place under the Seleucids (to 139 B. C.). Its earlier history is quite unknown. The kings of Osrhoëne, whom the Romans regarded as Arabs (Tacit., *Ann.*, xii. 12, 14; Plin., *Nat. Hist.*, v. 85: *Arabiam Orrhoëon*), bore Nabataean (Ma'nū, Bakrū, 'Abdū, Sahrū, Gebar'ū, Aryū), Arab (Abgar, Maz'ūr, Wā'il) or Parthian (Phradasht, Pharnataspaṭ or Parthamaspatēs) names. From the end of the first century A. D. the dynasty was closely related by inter-marriage to that of Adiabene (Duval, *Hist. d'Édesse*, p. 27 sq.) which then ruled Nisibis also (Josephus, *Ant. Jud.*, xx. 68).

The names and chronology of the kings or, as the Greeks called them, toparchs or phylarchs of Edesse (Osrhoëne) are known from the "Edessene Chronicle" (composed about 540 A. D.) and the "Chronicle of Zuḡnūn" (near Āmid; preserved in the same Cod. Vat. Syr. 162) written about 775 A. D. According to the "Edessene Chronicle", the dynasty ruled for 352 years, and began in 133—132 B. C. with Orhāi bar Hewyā but according to v. Gutschmid, rather with Aryū (*Doctr. Addaei*, ed. Phillips, p. 47), whose name is not to be regarded as Iranian (v. Gutschmid, in *Mém. de l'Acad. Imp. des Scienc. de St. Pétersb.*, series vii., xxxv., 1887, p. 19), but as Semitic ("Lion") (Duval, *Hist. d'Édesse*, p. 26 sq.).

The list of toparchs which has been corrected by von Gutschmid from historical references and coins is as follows: they were under Parthian suzerainty at first (down to 87 B. C.):

Aryū (132—127 B. C.); 'Abdū bar Maz'ūr (127—120); Phradasht bar Gebar'ū (120—115); Bakrū I bar Phradasht (115—112); Bakrū II bar Bakrū (alone 112—94; together with Ma'nū I 94; with Abgar I Pēkā 94—92); Abgar I (alone 92—68), in whose reign the kingdom passed for a short time to Tigranes of Armenia; Abgar II (Ariamnes?) bar Abgar, of the family of Maz'ūr, hence in Florus III, 11, 7 and Ruf. Fest., *Brev.*, 17: Mazorus, Mazzares etc. (68—53), who entered into friendly relations with Rome about 65—64. After the battle of Carrhae there was an interregnum of one year (53—52). Ma'nū II Allāhā (Theos, 52—34); Paḡuri (34—29); Abgar III (29—26); Abgar IV Sumākā (26—23); Ma'nū III Saphlū (23—4 B. C.); Abgar V Ukkāmā (4 B. C.—7 A. D.); Ma'nū IV bar Ma'nū (7—13 A. D.); Cumont found in the citadel of Bīredjik an epitaph in Syriac of 6 A. D. (?) of Zārbian, commandant of Bīrthā and governor for the toparch Ma'nū bar Ma'nū (Kugener, in *R.S.O.*, i., 1908, p. 587; Cumont, *Études syriennes*, Paris 1917, p. 144); Abgar V Ukkāmā (for the second time: 13—50); Ma'nū V bar Abgar (50—57); Ma'nū VI bar Abgar (57—71); Abgar VI bar Ma'nū (71—91), under whom the Senator Ma'nū bar Ma'nū had a sepulchral tower built for himself in Serrin on the Euphrates (B. Moritz, *Inscriften aus Syrien, Mesopotamien und Kleinasien*, ed. Oppenheim, Leipzig 1913, p. 163 sq.); interregnum of

18 years (91—109; rule of Sanatrūces of Adiabene, nephew of Abgar, over Edessa?); Abgar VII bar Izaṭ (109—116).

After the great rebellion of 116 the town was taken by Lucius Quietus and burned. There followed a brief interregnum under Roman rule (116—118). Īlur (or Valud) and Pharnataspaṭ (118—122), then Pharnataspaṭ alone (122—123); Ma'nū VII bar Izaṭ (123—139); Ma'nū VIII bar Ma'nū (139—163). In the Parthian war of Lucius Verus, Edessa was besieged by the Romans in 163—164 and surrendered to them after the murder of the Parthian garrison. During the war the ruler was Wā'il bar Sahrū (163—165). After the conclusion of peace (165) Edessa passed under Roman protection; Abgar VIII (165—167); Ma'nū VIII Φιλαρῳμαιος (for the second time 167—179); Abgar IX bar Ma'nū (on coins: Α. Αἴλιος Σεπτίμιος Μέγας Ἀβγαρος; 179—214), under whom occurred the first great inundation of Edessa (Nov. 201) which destroyed his palace; a winter palace was thereupon built in the Tebārā quarter. The official account of the catastrophe and of the measures taken by the king is preserved in the "Edessene Chronicle" from documents in the royal archives. Abgar was in Rome perhaps in 202 where he was received with all honour by Septimius Severus. Christianity is said to have been made the state religion in his time (which has however not been proved: Gomperz, *Archäol.-epigraph. Mitt. aus Österr.-Ungarn*, xix. 154—157); according to legend Abgar V Ukkāmā had become a Christian in the year 29 or 32 (R. A. Lipsius, *Die edessenische Abgarsage kritisch untersucht*, Brunswick 1880). A friend of Abgar IX was the Christian scholar Bardaisān (Βαρδαισάνης, 154—222 A. D.); Sex. Julius Africanus is also said to have spent some time at his court (Ps.-Moses Khoren., *Hist.*, ii. 10). The cult of Thar'athā was exterminated by Abgar IX with great rigour. Abgar then ruled along with Severus Abgar X bar Abgar as co-ruler (214—216); both were put in chains by the emperor Antoninus Caracalla in 216. The emperor spent the winter in Edessa which was now created a Roman *colonia* and on Apr. 8, 217 he was murdered on his way from there to Carrhae.

After the fall of the kingdom of Edessa, according to the "Chronicle of Zuḡnūn", Ma'nū IX bar Abgar ruled for another 26 years (216—242); but he probably lived during this time in Rome and was only nominal ruler.

When the Sāsānians Ardashīr and Shāhpuhr I disputed Osrhoëne with the Romans, Gordian III again set up a member of the old family as king in Edessa. According to the coins, Abgar XI Phrahates reigned from 242—244; he was probably a son of (Antoninus) Ma'nū. Returning to Rome, he erected a tombstone there to his wife Hódāa with inscription (*C. I. L.*, vi. 1797).

After the royal house had adopted Christianity, Edessa became along with Adiabene the centre of literary activity in Syriac (east Aram.) (cf. Duval, *Hist. d'Édesse*, p. 107 sq. and the histories of Syriac literature by Wright, Duval and Baumstark).

Edessa became a Roman city from the time of Gordian (244); after his death, it is true, Philip the Arabian handed over Mesopotamia as far as the Euphrates to the Parthians; but the Roman garrisons remained in the country (Mommsen, *R.G.*, v. 422). Shāhpuhr I besieged Edessa in 260, and the emperor Valerian was taken prisoner by the Persians not far from here about this time. The

town then belonged for a time (till 273) to the kingdom of Palmyra under Odainath and Zenobia.

After the peace of 363 Aphrem (Ephraim; d. June 9, 373) of Nisibis moved to Edessa and founded there the "Persian school"; the emperor Valens banished the Orthodox from Edessa as Arians in Sept. 373 and they only returned after his death in 378. The monasteries on the sacred hill at Edessa were plundered by the Huns in 396 and Aphrem's nephew 'Absamyā composed laments upon this.

It is only from the beginning of the third century that we know the names of bishops of the town; these begin with Palūt (c. 200) and among them are Rabbūlā, the enemy of the Nestorians (411—435), his opponent and successor Hībā (435—457) and in the sixth century the founder of the Severian "Jacobites", James Baradaïos (Ya'qōb Būrde'ānā, d. 578), but later persecutions of the Christians led to the martyrdoms, much embellished by legend, of the "Edessa professors" Sharbīl and Barsamyā (250 A.D.), Shemōnā, Gūryā, and Habbīb (309—310). The legend of the "man of God from the city of Rome" (St. Alexius) is put in the period of Rabbūlā.

Edessa became the capital and ecclesiastical metropolis of the eparchy of Osrhoëne. There were seven bishoprics under it in 451: *Μαρκούπολις* (Syriac Hiklā de-Ṣaiyādā, "temple of the hunter"), *Κάρραι* (Ḥarrān), *Κιρκέσιον*, *Βίρζα* (now Biredjik), *Καλλίνικος*, *Κωνσταντίνη* (Tellā, Tellā de-Mawzelath), and that of the *Ταϊγῆ* (Schulthess, in *Abh. G. W. Gött.*, N.S., x., 1908, No. 2, p. 134). Later were added *Βάρτινα* (Sarūdī), *Θελαμάρρον* (Tellmahrē), *Ἡμερία* (Syr. Imerin), *Δαύσαρα* (Arab. Kal'at Dja'bar), *Νέα Οὐαλεντία* and *Μαραζά* (Syr. Ma'rāthā; cf. *B. Z.*, xxv., 1924, p. 73 sq., 77 sq.).

The emperor Zeno in 489 finally closed the "school of the Persians" after the Nestorians had already with their leader Narsai been driven out of Edessa in 457 (Baumstark, *Gesch. d. syr. Lit.*, p. 104, note 12, p. 109, note 10).

The war with the Persians (502—506) in the reign of Anastasius is described in the Syriac chronicle by an Edessene, the author of which is wrongly said to be Joshua (Ishō) Stylites. After Amida had fallen in 503, *Καῳᾶθ* besieged Edessa but could not take it (Procopius, *Bell. Pers.*, ii. 13). The undisciplined Gothic troops, who were to defend it, plundered it like enemies and practically the whole of Osrhoëne was depopulated. After the fourth inundation of the town (525 A.D.; see below) the emperor Justin I restored it and gave it the name of *Ἰουστινούπολις* (Malalas, ed. Bonn, p. 419; Euagrius, *Hist. eccl.*, iv. 8; Hallier's quite unfounded doubts, *Texte u. Unters.*, ix/i. 130, are repeated by Ed. Meyer, *R. E.*, s. v. *Edessa*, No. 2, etc.). Khusrāw I in May 540 on his way back from Syria encamped in front of the city but retired on receiving 200 pounds of gold (*Chr. of Edessa*, ch. 105; Nöldeke, *Tabari*, p. 239). His stubborn siege in 544 proved without success. According to a late legend, the wondrous powers of the *εἰκὼν ἀχειροποιήτος*, which were rediscovered at this time, saved the city from the enemy.

In the sixth century the whole of Syria and Mesopotamia was won for the Monophysites. In Edessa Stephanos bar Šudaile, who, influenced by Origen, preached a pantheistic doctrine, found many followers. In 580 Hormizd IV sent the general

Ādharmahan against the Byzantines but he retreated after a three days' siege of Edessa. Khusrāw II who had been previously in Edessa on his flight to Mauritius, conquered the town in 609 (*Chron. Pasch.*, ed. Bonn, p. 699; Cedren., ed. Bonn, i. 714; Theoph. contin., ed. Bonn, p. 432) after it had previously gone over to him for a time under the Byzantine general Narses, and deported a large number of Jacobites to Khūrāsān and Sidjistan (Barhebraeus, *Chron. eccl.*, ii. 125). After his victories over Persia, Heraclius in 628 restored orthodoxy in Edessa, and banished the prominent Jacobite families.

On the topography of the town Syriac and Greek authors supply us with a good deal of information. Edessa lay at the intersection of the road from Samosata (Samsāt) to Carrhae (Ḥarrān) with the great trade route between east and west from the Euphrates at Zeugma-Balkis and Bīrthā-Biredjik via Mārdin and Naṣībīn to the Tigris. The *Antonine Itinerary* knows (p. 184—192) two roads from Germaniceia via Zeugma, one from there via Samosata and one from Callicome to Edessa. The town lay in a hollow surrounded on three sides by mountains and open on the southeast on the river *Σιγρὸς* (Syr. *Daiṣān*, "the Leaper"), the modern *Kara Koyūn* or *Nahr el-Kut*. This river which with the *Djullāb* flows into the *Balikh*, in the past, according to the *Edessene Chronicle*, four times inundated the town and wrought great havoc (in Nov. 201, May 303, March 18, 413 and April 22, 525) until the emperor Justinian had a canal dug to drain off the flood water north of the town (Procopius, *De aed.*, ii. 7, 2 sq.; *Anecd.*, 18, 38). We hear again in 668 and 743 of floods however (*Theoph. Chron.*, ed. de Boor, p. 537; *Chronicle of Zuḡnin*, under the year 743). The town was surrounded by a double wall. This enclosed on the southwest the citadel which stood on a spur of the *Nimrūd-Dāgh* and was overshadowed by this mountain; Justinian therefore had its walls strengthened on this side. At the western end of the citadel are two columns one of which, according to its inscription, was put up by queen Shalmat, the daughter of Ma'nū (Sachau, in *Z. D. M. G.*, xxxvi. 153 sqq.). On a large open place in the citadel called *Bēth Tebārā*, Abgar IX after the inundation of 201 had a winter palace built (cf. above) and the aristocracy of the town moved their quarters to the adjoining upper market called *Bēth Saḥrāyē*. There was also a large altar there which was still standing in Christian times, and probably also the royal archives (*ἀρχαῖον*; *Bēth Uhdānā*). Below the citadel there were two ponds inside the town. The larger fed by a spring, the fish in which were considered sacred like those in the lake of Bambyke (Manbidj), corresponded to the old spring *Καλλιβρόν*, the modern Birket Ibrāhīm. South of it lay the smaller pond 'Ain Zilka. In the town stood the council house (*ἀντιφορος*), a gallery built in 497 (*περίπατος*), several public baths (*δημόσια*), a theatre, a hospital and the hippodrome. The six gates were called: the Gate of *Bēth Shemesh* and the Gate of *Barlāhā* (*Βαρλααὺ πύλαι*; Procop., *Bell. Pers.*, ii. 27, 44) in the north, the Gate of the Caves which led to the catacombs in the west, the Gate of the Hours (*Shā'ē*, probably the *Σολῆνας πύλαι* of Procopius, *Bell. Pers.*, loc. cit.; cf. Duval, *Hist. d'Édesse*, p. 207, note 1) in the southwest, the Great Gate in the south and the Gate of the Theatre in the east (Duval, p. 14).

At a later date, the Arabs only mention four gates: that of Ḥarrān, the Great Gate, the Gate of Sab'a and the Water Gate. The "Old Church" several times destroyed by floods stood near the "Tetrapylon" and the square of Bēth-Shabtā (Barhebraeus, *Chron. eccl.*, i. 359). The Syriac authors mention many other churches within and without the town (Duval, *loc. cit.*, p. 16 sq.; Baumstark, in *O. C.*, iv. 164—183).

In the Nimrūd-Dagh west of the town caves were hewn out of the rock in very early times; there also were the mausoleums of the kings, that of the bishop Abshelāmā bar Abgar and, 2½ hours from the town, that of Amathshemesh (Ἀμασσομήσης), wife of Σάπεδος, son of Δάνοχος. Numerous anchorites had their cells in the "sacred mountain" and many monks their monasteries on it. It is probably τὸ Ἐτόριον (read Ἐτραύριον "Cross Hill" as at Antioch) ὅρος on which the monk Aswānā (Ἀσών) had his visions (Philoxenos, *Letter to Patricius*, under the wrong title: Ishāk of Niniveh, *Letter to Symeon from Θαυμαστὸν ὅρος*, in *Nova Patrum Bibliotheca*, ed. Angelo Mai, viii., Rome 1871, p. 186, ch. 39; cf. Baumstark, *Gesch. d. syr. Lit.*, p. 29, 142, note 10; 225, note 2). Another hill was called in the Christian period Rāmāthā de-Bēth Alāhā Kiklā (Symeon Metaphrastes, Migne, *Patr. Graec.*, cxvi., col. 141: Βιζελανικλῆ). In the vicinity of Edessa were the villages of Bokhain, Serrin, Kubbē and Kefar Şelem or Negbath. Two aqueducts restored in the year 505 brought down from Tell Zimā and Mawdūd supplied the town with spring water (Ps.-Joshua Stylites, col. 59 sq., 62, 87). The position of these villages and of the buildings in Edessa can as a rule no longer be ascertained exactly (plans of ancient Edessa: by G. Hoffmann, who corrected the old sketches by Carsten Niebuhr [1780] in Wright, *Chron. of Joshua Stylites*, 1882; better in F. C. Burkitt, *Euphemia and the Goths*, London 1913, p. 46).

Abū 'Ubaida in 637 sent 'Iyād b. Ghanm to al-Djazīra. After the Greek governor Joannes Kateas, who had endeavoured to save Osrhoëne by paying tribute, had been dismissed by the emperor Heraclius and the general Ptolemaios put in his place, al-Ruhā' (Edessa) had to surrender in 639 like the other towns of Mesopotamia (al-Balādhuri, ed. de Goeje, p. 172—175; Ibn al-Athīr, ed. Tornberg, ii. 414—417; Yāqūt, s. v. *al-Djazīra*; Khwārizmī, ed. Baethgen, *Fragmente syr. u. arab. Historiker*, Leipzig 1884, p. 16, 110 = *Abh. K. M.*, viii., No. 3; Theophanes, ed. de Boor, p. 517, 521). The town now lost its political and very soon also its religious significance and sank to the level of a second rate provincial town. Its last bishop of note, Jacob of Edessa, spent only four years (684—687) and a later period again of four months in his office (708). The Maronite Theophilus of Edessa (d. 785) wrote a "Chronicle of the World" and translated into Syriac the "two Books of Homer about Ilion".

Al-Ruhā', like al-Rakka, Ḥarrān and Ḳarkisiya, is usually reckoned to Diyār Muḍar (Ibn al-Athīr, viii. 218; al-Yāqūbi, i. 177; M. Hartmann, *Bohtān*, p. 88, note 2 and 3 = *M. V. A. G.*, 1897, i. 28). In 67 (686—687) al-Ruhā', Ḥarrān and Sumaisā' formed the wilāyet, which Ibrāhīm b. al-Aṣhtar granted to Ḥatīm b. al-Nu'mān (Ibn al-Athīr, iv. 218).

The "old church" of the Christians was destroyed by two earthquakes (April 3, 679 and 718). In 737 a Greek named Baṣḥīr appeared in Ḥarrān

and gave himself out to be "Tiberias the son of Constantine"; he was believed at first but was later exposed and executed in al-Ruhā' (Barhebraeus, *Chron. syr.*, ed. Bedjan, p. 119). In 133 (750—751) the town was the scene of fighting between Abū Djāfar, afterwards the caliph al-Manṣūr, and the followers of the Umayyads, Ishāk b. Muslim al-ʿUkailī and his brother Bakkār, who only gave in after the death of Marwān (Ibn al-Athīr, v. 333 sq.). But continual revolts broke out again in al-Djazīra (Ibn al-Athīr, v. 370 sq.); in the reign of al-Manṣūr, for example, the governor of al-Ruhā' of the same name, the builder of Ḥiṣn Manṣūr, was executed in al-Rakka in 141 (758—759) (al-Balādhuri, p. 192). When Ḥārūn al-Raṣhid passed through al-Ruhā', an attempt was made to cast suspicion upon the Christians and it was said that the Byzantine emperor used to come to the city every year secretly in order to pray in their churches; but the caliph saw that these were slanders. The Gūmayē (from al-Djūma, the valley of 'Afrin in Syria), who, with the Telmaḥrayē and Ruṣāfāyē, were one of the leading families of al-Ruhā', suffered a good deal however from his covetousness (Barhebraeus, *Chron. syr.*, p. 130). In 812 the Christians were only able to save the unprotected town from being plundered by the rebels Naṣr b. Shabath and 'Amr by paying 5,000 zūzē; Abū Shaikh therefore fortified al-Ruhā' at the expense of the citizens (Barhebraeus, p. 136 sq.). At the beginning of his reign al-Ma'mūn sent his general Ṭāhir to al-Ruhā', where his Persian soldiers were besieged by the two rebels, but offered a successful resistance supported by the inhabitants among whom was Mār Dionysios of Tellmaḥrē (Barhebraeus, p. 139). Ṭāhir, who himself had fled from his mutinous soldiers to Kallinikos, won the rebels over to his side and made 'Abd al-A'lā governor of al-Ruhā'; he oppressed the town very much (Barhebraeus, p. 139 sq.). Muḥammad b. Ṭāhir who governed al-Djazīra in 825 persecuted the Christians in al-Ruhā' as did the governors under al-Mu'taṣim and his successors.

In 331 (942—943) the Byzantines occupied Diyārbakr, Arzan, Dārā and Rās 'Ain, advanced on Naṣibin and demanded from the people of al-Ruhā' the holy picture of Christ called *μανδύλιον* (*al-Ikōnat al-Mandil*); with the approval of the caliph al-Muttaḳi it was handed over in return for the release of 200 Muslim prisoners and the promise to leave the town undisturbed in future (Yahyā b. Sa'īd al-Anṭākī, ed. Kračkovskij-Vasil'ev, in *Patrol. Orient.*, xviii. 730—732; Ṭhabīb b. Sinān, ed. Baethgen, *op. cit.*, p. 90, 145). The picture reached Constantinople on Aug. 15, 944 where it was brought with great ceremony into the Church of St. Sophia and the imperial palace (cf. in addition to Yahyā, *loc. cit.*; al-Mas'ūdi, *Murūdj al-Dhahab*, ii. 331; Ibn al-Athīr, viii. 302 and an oration ascribed to Constantine Porphyrogenetos on the εἰκὼν ἀχειροποιήτος or *De imagine Edessena*, ed. Migne, *Patrol. Graec.*, cxliii., col. 432, better ed. v. Dobschütz, *Christusbilder*, in *Texte u. Untersuch.*, xviii.). But by 338 (949—950) this treaty was broken by Saif al-Dawla who together with the inhabitants of al-Ruhā' made a raid on al-Maṣṣīsa (Yahyā, *op. cit.*, p. 732). Under the Domestikos Leon the Byzantines in 348 (959—960) entered Diyār Bakr and advanced on al-Ruhā' (Ibn al-Athīr, viii. 393). The emperor Nicephoros Phocas towards the end of 357 (967—

968) advanced on Diyār Muḍar, Maiyāfāriḳin and Kafartūḥā (Yahyā, p. 815). According to Ibn al-Aṭḥir (viii. 454 *infra*), al-Ruhā' was burned to the ground in Muḥarram 361 (Oct.–Nov. 971) and troops left in al-Djazīra. One should rather read Muḥarram 362 and take the reference to be to the campaign of John Tzimiskēs, unless there is a confusion between Edessa and Emesa (Himṣ) which was burned in 969 (Barhebraeus, *Chron. syr.*, p. 190).

Ibn Hawkal in 978 refers to over 300 churches in al-Ruhā' and al-Maḳḍisi reckons the cathedral, the ceilings of which were richly decorated with mosaics, among the four wonders of the world.

Down to 416 (1025–1026) the town belonged to the chief of the Banū Numair, 'Uṭair. The latter installed Aḥmad b. Muḥammad as *nā'ib* there but afterwards had him assassinated. The inhabitants thereupon rebelled and offered the town to Naṣr al-Dawla the Marwānid of Diyārbakr (Greek Ἀπομερμάνης), who had it occupied by Zangī. After the murder of 'Uṭair and the death of Zangī (418 = 1027), Naṣr al-Dawla gave 'Uṭair's son one tower of al-Ruhā' and another to Ṣhabāl's son (Ibn al-Aṭḥir, ix. 244). The former (according to others a Turk Salmān, Σαλαμάνης, appointed governor, who was hard pressed by 'Uṭair's widow) then sold the fortress for 20,000 dārīcs and four villages to the Byzantine Protospatharios Georgios Maniakes, son of Gudēlios, who lived in Samosata; he appeared suddenly one night and occupied three towers. After a vain attempt by the emir of Maiyāfāriḳin to drive him out again in which the town, which was still inhabited by many Christians, was sacked and burned (winter of 1030–1031), Maniakes again occupied the citadel and the town (Ibn al-Aṭḥir, ix. 281 *bis*; Michael Syrus, ed. Chabot, iii. 147; Barhebraeus, *Chron. syr.*, p. 214; Aristakēs Lastivertci, c. 7, p. 24 *sq.*; Mattēos Urhayec'i, ed. 1898, c. 43, p. 58–62 = transl. Dulaurier, p. 46–49; Kedren-Skylitz., ed. Bonn, ii. 500; the accounts of the events preceding the surrender differ very much). Edessa under Maniakes seems to have enjoyed a certain amount of independence from Byzantium, as he sent an annual tribute thither (Kedrenos-Skylitzes, p. 502).

In Radjab 427 (May 1036) the Patrikios of Edessa became a prisoner of the Numairī Ibn Waṭṭḥāb and his many allies; the town was plundered but the fortress remained in the hands of the Greek garrison (Ibn al-Aṭḥir, ix. 305; Barhebraeus, *Chron. syr.*, p. 217). By the peace of 1037 the emperor again received complete possession of Edessa which was refortified (Ibn al-Aṭḥir, ix. 313; Barhebraeus, p. 221).

According to the Armenian sources, Maniakes was followed by Apuk'ap or Ἀέων Λεπενδρινός, then by the Iberian Βαρασβατζέ as strategos of Edessa; in 1059 Ἰωάννης ὁ Δουκίτης was Katepano of the town. In 1065–1066 and 1066–1067 the Turks under the Khurāsān-Sālār attacked the town and Alp Arslān besieged it for fifty days in 1070; it was defended by Wasil (son of the Bulgar king Alōsian?). After the victory of Manazkert Edessa was to be handed over to the sultān but the defeated emperor Romanos Diogenēs had no longer any authority over it, and its Kapetano Paulos went to his successor in Constantinople (Skylitzes, ed. Bonn, p. 702). In 1081–1082 Edessa was again besieged by an emir named Khuraw in vain. After the death of Wasil the Armenian Smbat

became lord of Edessa and six months later (Sept. 23, 1083) Philaretos Brachamios succeeded him. But he lost it in 1086–1087 when in his absence his deputy was murdered and the town handed over to Sultān Malikshāh. The latter appointed the emir Buzān governor of al-Ruhā' and Harrān. When the latter had fallen in 1094 fighting against Tutuṣh, Alpyārūḳ, general of the sultān of Dimashk and Ḥalab, occupied the town but it was not plundered by his army as he was poisoned by a Greek dancing-girl called Galī. Then the Armenian Kuropalates T'oros (Theodoros), son of Het'um, took the citadel. When in 1097–1098 Count Baldwin captured Tell Bāshir T'oros asked him to come to al-Ruhā' to assist him against their joint enemies and received him with joy but was shortly afterwards treacherously murdered by him (Mattēos of Edessa, ed. 1898, p. 260–262 = transl. Dulaurier, p. 218–221; *Anonym. Syriac Chronicle of 1203–1204* in Chabot, *C.-R. Acad. Inscr. Lettr.*, 1918, p. 431 *sqq.*).

From 1098 the Latins ruled for half a century the "county of Edessa" to which also belonged Sumaisāt and Sarūdj (1098 Baldwin I; 1100 Baldwin II; 1119 Joscelin I; 1131 Joscelin II). The town suffered a great deal under them. On Dec. 23, 1144 'Imād al-Dīn Zangī of al-Mawṣil took it (a detailed description of these events in the *Anonymous Syriac Chronicle of 1203–1204*, ed. Chabot, in *C.S.C.O.*, series iii., vol. xv., p. 118–126; transl. Chabot, *Une épiŕode de l'histoire des Croisades*, in *Mélanges Schlumberger*, i., Paris 1924, p. 171–179). Under Joscelin II and Baldwin of Kaisūm the Franks again attempted to retake the town in Oct. 1046 and succeeded in entering it by night, but six days later Nūr al-Dīn appeared with 10,000 Turks, and soon occupied and sacked it; the inhabitants were put to death or carried into slavery. Baldwin was killed and Joscelin escaped to Sumaisāt (Barhebraeus, p. 311 *sq.*). The fall of this eastern bulwark of the Crusaders aroused horror everywhere; in Europe it led to the Second Crusade. The Syrian Dionysios bar Ṣalībī as Diaconus wrote an "oration" and two poetic *mēmnrē* about the destruction of the town. Three similar pieces were written by Basilios Abu 'l-Faradj b. Shummānā, the favourite of Zangī; he had also written a history of the town of Orḥāi (Baumstark, *Gesch. d. syr. Lit.*, p. 293, 298).

After the death of Nūr al-Dīn his nephew Saif al-Dīn Ghāzī took the town in 1174; in 1182 it fell to Saladin who later handed it over to al-Malik al-Manṣūr. When Malik al-'Ādil died in 1218, his son Malik al-Ashraf Sharāf al-Dīn Mūsā became lord of al-Ruhā', Harrān and Khilāt. In June 1234 the town was taken by the army of 'Alā' al-Dīn Kaikubād and its inhabitants deported to Asia Minor (Kamāl al-Dīn, transl. Blochet, in *R.O.L.*, v. 88; Barhebraeus, *Chron. syr.*, p. 468). But it was retaken within four months by Malik al-Kāmil. In 1244 the Tatars passed through the district of al-Ruhā' and in 1260 the Mongols under Hülāgū. The people of al-Ruhā' and Harrān surrendered voluntarily to him but those of Sarūdj were all put to death (Barhebraeus, *Chron. syr.*, p. 509; *Chron. arab.*, ed. Bairūt, p. 486).

In the time of Abu 'l-Fida' al-Ruhā' was in ruins. Ḥamd Allāh al-Mustawfī about 1340 could still see isolated ruins of the main buildings. According to al-Ḳāḷqashandī, the town had been

rebuilt by his time (c. 1400) and repopulated and was in a prosperous state. In connection with the campaigns of Timūr, who conquered al-Djazira in 1393, al-Ruha is repeatedly mentioned in the *ẓafar-nāma* of Sharaf al-Din 'Alī Yazdī (written in 828 = 1425).

The Ottomans finally took the town, to which they gave the name of Orfa, in 1637 during Murād IV's war with Persia.

To-day Orfa (Urfa) has nearly 30,000 inhabitants. It is the capital of a wilāyat of the same name numbering a little more than 200,000 souls. The town is 550 m. above sea-level.

(E. HONIGMANN)

ORIHUELA, Arab. *Uryūla*, a town in Eastern Spain (Levante), 15 miles N. E. of Murcia, the capital of an administrative area (*partido*) and the see of a bishop, contains with its adjoining country, which is thickly populated, 35,000 inhabitants. It was conquered by the Muslims at the same time as the other towns of the *kūra* of Todmīr [q. v.] and was for a long time the capital of this *kūra* before it had to give way to Murcia. Its history was that of the latter town as long as it remained Muslim. It was however for a very brief period in the middle of the vith century A. H. (middle of the xith century A. D.) the capital of a petty independent state ruled by the Kādi Aḥmad b. 'Abd al-Raḥmān b. 'Alī b. 'Āsim.

ORISSA (ODRA-DEÇA), a part of the modern Indian province of Bihār and Orissa, has an area of 13,706 square miles and a population of 5,306,142, of which only 124,463 profess the Muslim faith. For administrative purposes it is divided into the five districts of Cuttack, Balasore, Puri, Angul and Sambalpur. There are in addition twenty-four native states, the Orissa feudatory states, with a population of 4,465,385, the Muḥammadans numbering only 17,100 (Census of India, 1931).

Modern Orissa, which embraces the deltas of the Mahānadi and neighbouring rivers, extends from the Bay of Bengal to the borders of the Central Provinces and from the river Subarnarekha to the Čilka Lake. In the past its inaccessibility proved its salvation for, while the coastal strip was sometimes conquered, the highlands of the interior remained under semi-independent or tributary chiefs. It was included in the ancient kingdom of Kalinga, the sole conquest of the peace-loving Aḷoka, but, with the disintegration of the Maurya empire, once more passed to the Kalinga kings. Until the eleventh century the history of this area is extremely confused. Those interested in the solving of chronological puzzles would do well to consult the first volume of Banerji's *History of Orissa*.

Certain parts of modern Orissa were annexed to the empire of Muḥammad b. Tughluḳ and were included in the province of Džādjānagar. The real conqueror of Orissa, however, was Akbar's famous general Rādā Mān Singh, who took it from the Afghāns of Bengal, who had obtained a temporary footing in the country. Under Akbar it was administered as part of the *šūba* of Bengal, for it was not until the reign of Džahāngir that it became a separate province. With the decline of the Mughal empire Orissa fell into the hands of the Bhonslā Marāṭhās of Nāḡpur [q. v.]. Although it nominally passed to the British by the dīwānī grant of 1765 it was not finally conquered until the year 1803.

With the exception of the district of Sambalpur, the territory now known as Orissa was administered along with Bengal until October 1905, and with

West Bengal until March 1912, when Bihār and Orissa were formed into a separate province. Orissa has always been a stronghold of Hinduism and the temple of Djagannāth still draws thousands of pilgrims to the sands of Puri.

Hunter, *Orissa*, 2 vols., London 1872; *Journal of the Bihar and Orissa Research Society*; Cobden Ramsay, *Feudatory States of Orissa*, Calcutta 1910; H. C. Ray, *The Dynastic History of Northern India*, vol. i., Calcutta 1931; *Report of the Orissa Committee*, 2 vols., Calcutta 1932; J. Sarkar, *Studies in Aurangzib's Reign. Orissa in the Seventeenth Century*, Calcutta 1933; A. Stirling, *An Account of Orissa Proper or Cuttack*, Calcutta 1904; G. A. Toynbee, *Sketch of the History of Orissa from 1803—1828*, Calcutta 1873; the *Mādala Pāñji*, an ancient record on palm leaves preserved in the Djagannāth temple at Puri appears to have little historical value.

(C. COLLIN DAVIES)

ORKHAN or URKHAN (UR-KHAN?) was the eldest son of the emīr 'Othmān [q. v.], the founder of the Ottoman dynasty. His mother was Malkhatun, the daughter of Shaikh Ede-Ball of the village of Itburnu near Eski-Shehir. The year of his birth is not known and indeed the whole chronology of his reign leaves much to be desired. Ottoman sources say he was born in 687 (beg. Feb. 6, 1288); according to others, he was born as early as 680 (beg. Apr. 22, 1281). The first date which probably goes back to Hādijī Khalifa's Takwīm has most in its favour. We know very little about his youth. When barely twelve years old he was married in 699 (1299) to the daughter of the lord of Yār-Ḥiṣār named Nilüfer-Khatun [q. v.], a Greek girl, who was betrothed to the lord of Belokoma (Biledjīk). From this union were born among others his sons Murād, who succeeded him, and Sulaimān Pasha. Orkhan was nearly 40 when he ascended the throne in, it is said, Ramaḍān 726 (Aug. 1326). According to tradition, Orkhan offered his brother 'Alā' al-Dīn 'Alī (usually called 'Alā' al-Dīn only; cf. *Isl.*, xi. 20, note 3) a portion of the ancestral possessions but the latter is said to have been content with the vizierate. This story strongly resembles that of Moses and Aaron as given in the Kur'ān (xx. 30) and is probably intended to give a historical foundation for the office of vizier. 'Alā' al-Dīn 'Alī was also the first to bear the title *pasha* [q. v.] which then passed to Orkhan's son Sulaimān and was inherited from him by Ḳara Khalil.

Orkhan's rule may be divided into two periods: that from 1326 to 1344 when he was establishing the Ottoman power in Asia Minor, creating the army and becoming the founder of the Ottoman empire; and the period from 1344 to his death in 1359—1360 during which he was preparing to gain a footing in Thrace and Macedonia and to extend his rule on European soil. He laid the foundations for the later empire of the Ottomans and is to be regarded as its real creator.

Orkhan had already showed his ability as a conqueror in the lifetime of his father. Shortly before the latter's death of gout at the age of about 70 he had taken Brussa without bloodshed. It now became the capital of the kingdom. Nicaea

and Nicomedia were now the next objectives of Ottoman arms. He was assisted by a number of able leaders of whom the best known were Köse Mikhāl [see MIKHAL-OGHLU], Aḳçe Ḳodja, Konur-Alp, 'Abd al-Rahmān Ghāzī, Ḳara 'Alī, Ḳara Mursāl. With their help he carried through all his enterprises with the greatest success. Before taking these two cities, Orkhan first of all secured possession of the most northerly peninsula of Bithynia, which is enclosed on the north by the Black Sea, on the south by the Gulf of Nicomedia and on the west by the Bosphorus. The two strongly fortified fortresses of Semendra and Aidos which guarded the military road from Constantinople to Nicomedia were taken. The town and district of Semendra were given in feudal tenure to the general Aḳçe Ḳodja and henceforth known as Ḳodja-İli. The fall of these strong places was followed by the subjection of most of the little towns on the coast on both sides of the Gulf of Nicomedia, of which the fort of Hereke offered most resistance. Ḳara Mursāl conquered the land on the southern coast by occupying Yalowa, famous for its medicinal baths, and the district of Ḳara Mursāl which bears his name. As Orkhan's vassal, he pledged himself to maintain a small fleet to protect the coast so that communication by sea between Constantinople and Nicomedia was entirely stopped. Orkhan now took the field against Nicomedia in person. The town was taken without any special difficulty after the hill fort of Koyun-Ḥiṣār had fallen. While the emperor Andronikos abandoned Nicomedia, he prepared to defend the old seat of the Palaeologi, Nicaea. At the beginning of 1330, the Byzantines moved over to the Asiatic shore and in the vicinity of the little coast town of Philokrene in Mesothynia, now Tawshandjil, a battle was fought about which there are no records in the Ottoman sources while the Byzantine historians (Kantakuzenos, ed. Bonn, i. 341 sq.; Nikephoros Gregoras, ed. Bonn, i. 434; cf. thereon Phrantzes and Chalcocondyles) show obvious errors and deliberate perversions of the facts. The defeat of the Byzantines at Philokrene meant the end of any hope of saving Nicaea. The inhabitants did not even attempt a serious resistance but hurried to swear fealty to Orkhan. The city, upon which Orkhan lavished all kinds of endowments, soon became one of the most flourishing and prosperous towns in the Ottoman empire after its period of tribulation. Nicaea, now Iznik [q. v.], became celebrated as a centre of Muslim intellectual life especially through its medreses. In 1333 Orkhan's son Sulaimān undertook a campaign into the still independent country north of the Sangaris (Sakarya) with the towns of Goinik, Modrene and Tarakdjī, which he occupied almost without striking a blow. All Orkhan's victories and conquests had so far been won at the expense of the Greeks and there had been no warlike encounters with the little principalities which had arisen in Anatolia out of the Saldjūk empire. The adjacent country of Ḳarasi [q. v.] where in 1335 the succession had given rise to a dispute between two brothers, the youngest of whom, Tursun, was living at Orkhan's court, came first. Orkhan's help was called upon by Tursun against his older brother (named Timūr-khān?) and he invaded Ḳarasi on receiving certain assurances. On the way he took Ulubad, Kirmastī [q. v.] and Mikhālīdī along with the castles of Koilos and Ailos. Balikesrī was surrendered to Orkhan

without a blow and the resistance shown was limited to Berghama. This town also soon passed into Ottoman hands as a return for the leniency shown by Orkhan to the lord of Karasi when the latter had treacherously disposed of his younger brother (736 = 1336). Hādījī Il-beghī, the vizier of the last prince of Karasi, was entrusted with the administration of the newly won territory, and as his councillors Edje-Beg and Ewrenos [q.v.] were appointed. After the fall of Berghama Orkhan was engaged in consolidating his rule by systematic regulations and arranging for the administration of the now considerably enlarged Ottoman kingdom. He seems to have been the first to organize his rule on Anatolian soil (on this cf. the full account in Zinkeisen, *G. O. R.*, i. 118 sqq.) in which his brother 'Alā' al-Dīn 'Alī played a prominent part until after his death in 1333 his place was taken by his nephew Sulaimān. In 728 (1328) 'Alā' al-Dīn is said to have induced his brother to set up the first mints (according to Sa'd al-Dīn). In this year the first gold and silver was struck in Orkhan's name and replaced the Saldjūk coins which had previously been current throughout the Ottoman empire. A regulation regarding dress produced a strict distinction between ranks and classes, and the army was completely reorganised in keeping with the new conditions by Čendereli K̄halil [q.v.]. In 1330 the corps of Janisaries [q.v.] was founded, the Turkish infantry composed of youths of Christian birth and associated with Hādījī Bektash [q.v.]. But the irregular infantry also, the 'Azabs, was put on a better footing and the feudal cavalry (*akindjī*) developed in keeping with the objects of the new empire. At the same time Orkhan founded numerous mosques, monasteries and schools and the foundations which he elevated everywhere in the newly conquered territory bear witness to the great attention which he gave to matters of religion. The dervish system which at this time was at the height of its development — the order of the Bektashī seems to have arisen in the reign of Orkhan — had undoubtedly a great patron in Orkhan as is seen by the number of cells and monasteries of holy men in his capital Brussa, who had come from the east during his reign to find asylum in the Ottoman empire. The religious life of Islām under Orkhan, which had a marked 'Alid, not to say Shī'a, stamp, is one of the most remarkable phenomena in the history of religion and still requires elucidation in essential points through special studies.

In Orkhan's reign we have the beginnings of friendly and peaceful intercourse between Ottomans and Byzantines, although we also have an alternation of peace and war, of enmity and alliance (cf. J. v. Hammer, *G. O. R.*, i. 126). Ottoman troops were repeatedly summoned to the assistance of the Byzantine emperors and when Orkhan ascended the throne, Turkish hordes had already crossed the straits three times, without success it is true, and without leaving the slightest trace on European soil (cf. J. v. Hammer, *G. O. R.*, i. 120 sqq. and Zinkeisen, *G. O. R.*, i. 184 sqq.). There obviously was no idea of establishing Ottoman power on the other side of the Dardanelles in these raids and the Byzantine emperor paid very little attention to them. But in course of time there arose out of these casual enterprises more and more regularly organised expeditions by the petty dynasts of Anatolia. For example the ruler of Aidīn-eli [q.v.],

Umur-Beg, one of the most brilliant, if very little known, figures of the time, had undoubtedly intended to develop systematically his repeated raids into Europe. Orkhan himself is said in 1333 to have concluded a treaty with the emperor Andronicus at the time of the siege of Nicomedia, by which he bound himself not to disturb further the towns of Asia Minor which were under Byzantine suzerainty (cf. Kantakuzenos, ed. Bonn, i. 446). The increasing weakness of Byzantium and the growing power of the Ottomans soon however deprived any such agreement of its binding force. Already in 1337 Orkhan had tried to effect a landing near Constantinople with a fleet of 36 ships; his intention must have been to attack the capital and establish himself in Thrace. The Ottomans suffered a disastrous defeat and escaped with one ship only. The dynastic troubles which broke out soon afterwards in Constantinople when the Grand Domestikos Kantakuzenos became emperor and joint ruler with John Palaeologus, brought about a rapprochement between Orkhan and Kantakuzenos. Umur-Beg renewed his efforts to gain a footing on European soil, but, in spite of the expenditure of men and ships, they remained unavailing. Orkhan maintained an attitude of watchfulness. The empress Anna, mother of the young emperor John Palaeologus, induced him to send a force to help her against her rival Kantakuzenos. The latter saw the increasing danger and after this force had come to a miserable end endeavoured with all his power to win Orkhan over for his own plans. In return for 6,000 soldiers he offered him his daughter Theodora, who was still a minor, as a wife in January 1345 (cf. Kantakuzenos, iii. 31; ed. Bonn, p. 498; Dukas, 9, ed. Bonn, p. 33 sq.; Chalcoe, i. 24) and in May 1346 the wedding was celebrated with great splendour in Selymbria (Kantakuzenos, iii. 95, p. 585 sq.; Nikeph. Gregoras, xv. 5, p. 762 sq.; Dukas, 9, p. 35; according to Nikeph. the bride's name was Maria, cf. i. 762, certainly a mistake). It is worth noting that Orkhan's bride did not abandon her religion but remained a devout Christian (cf. Kantakuzenos, ed. Bonn, p. 588; Zinkeisen, *G. O. R.*, i. 201 sqq.) and acquired great merit by purchasing numerous Christian slaves and sending them home to freedom. The prince K̄halil Čelebi, who later became a prisoner of the Genoese and when very young married a daughter of the emperor John V, was probably the result of this union (cf. Jorga, *G. O. R.*, i. 201). The alliance with the Ottomans was to cost Kantakuzenos dear. When, shortly after the wedding, Orkhan sent him 10,000 men to help in his fight with the Serbian prince Stjepan Dušan, the Turks turned against the Byzantines and returned with vast booty from Europe to Asia. This breach of faith did not deter Kantakuzenos from again asking for assistance from his son-in-law in 1349. But this time also the army of 20,000 men, summoned unexpectedly back to Anatolia, recrossed the Dardanelles after burning and plundering all the way. Besides these two invasions of Europe by request the continual raids of the Anatolian hordes went on and the sufferings of the people of Thrace became intolerable. Orkhan took advantage of this uncertainty to carry out his long cherished plan of establishing the Ottomans permanently in Europe. His son Sulaimān Pasha in 1356 was ordered to cross the Dardanelles. The crossing was successfully carried through at the fortress of Tzympe (the modern

Djimenlik). In 759 (1357) Kallipolis (now Gallipoli) was taken by the Ottomans. The sudden death in 760 (1358) of the conqueror Sulaimān Pasha, who was buried not in Brussa but in Bulair on Thracian soil, put an end for the time to any further advance by the Ottomans. Hādījī Il-beghi and Edje-Beg conducted raids into the interior, it is true, but no effort was made to extend Ottoman power. Orkhan died very soon after Sulaimān. The date of his death is not exactly known. The most probable statement is that which says he died at the beginning of 761 (beg. Nov. 23, 1359). The statement (taken by K. J. Jiriček from a Slav chronicle) that Orkhan lived till March 1362, after the capture of Adrianople, has no claim to credence (cf. *Archiv für slav. Phil.*, xiv. [1892], p. 260), although Oskar Halecki, *Un Empereur de Byzance à Rome* (Warsaw 1932 = *Travaux historiques de la Société des Sciences et des Lettres de Varsovie*, vol. viii.), p. 74, note 3, based on C. Jireček, *loc. cit.*, and *Byz. Zeitschr.*, xviii. (1909), p. 582 sq. is inclined to accept the year 1362. That the Byzantine annals (cf. especially p. 392) edited by Jos. Müller, in *Sitzungsber. d. k. k. Ak. d. Wiss.*, Vienna 1853, ix. are in favour of such a supposition cannot be disputed as well as the fact that the Florentine chronicler Matteo Villani (cf. Muratori, *Rerum Ital. Script.*, xiv., p. 672 sq.) puts "Orcam's" first actions still in November 1361. If Murād I is justly called the "conqueror of Adrianople" the year of his father's, i. e. Orkhan's death must be fixed earlier as the taking of this town in spring 1361 (cf. thereon F. Babinger, in *M. O. G.*, ii. 311 sqq.) can now be taken for granted (cf. thereon the fact not noted in *M. O. G.*, that, according to O. Halecki, *loc. cit.*, p. 75, the capture of Adrianople became known in Venice on March 14, 1361). — Orkhan was buried beside his father in Brussa (cf. J. v. Hammer, *G. O. R.*, i. 157 sq. with a description of what his personal appearance is said to have been).

Bibliography: Contemporary Ottoman sources have so far not come to light. Of the Byzantine chroniclers the most important is Orkhan's father-in-law Kantakuzenos although his bias makes it necessary to use him with great caution. Nikephoros Gregoras is much more to be believed. The crossing of the Ottomans into Europe in the sixteenth century has been critically studied by Joh. Draesecke, in the *Neues Jahrbuch für das klassische Altertum*, vol. xxxi., p. 7. sqq. The whole period of Orkhan's reign has recently been dealt with in not always reliable fashion by H. A. Gibbons (d. 1934), *The Foundation of the Ottoman Empire*, Oxford 1916, p. 54—109. Further sources are indicated in the works of J. v. Hammer, Zinkeisen and Jorga. (FRANZ BABINGER)

ORMUZ. [See HORMUZ.]

ORTOKIDS (URTKIDS), a Turkmen dynasty, branches of which ruled in Mārdīn, Hışn Kaifā and Khartabirt.

When the Saldjūk sultān of Damascus, Tutush, conquered Jerusalem in 479 he appointed as governor of the town his officer Urtuğ b. Aksab, who had already served under Malikshāh and had taken part in the siege of Āmid in 477. He was succeeded in 484 (1091) by his sons Sukmān and İlghāzī. After the Holy City had been taken for the Fātimids in Sha'bān 489 (1096) by al-Afdāl b. Badr al-Djamālī, Sukmān went to al-Ruhā and

İlghāzī to his lands in the 'Irāq. In 495 (1101) Sultān Muḥammad made İlghāzī his commissioner (Shahna) in Baghdad.

A. Hışn Kaifā. Mu'in al-Dawla Sukmān I (cf. iv., p. 510) assisted Mūsā when he was besieged by Djakarmish in al-Mawṣil and as a reward received from him in 495 (1101) 10,000 dinārs and the town of Hışn Kaifā (Ibn al-Athīr, x. 234—236). He had already owned Sarūdī since 488 and in 498 or shortly before, Mārdīn also fell into his hands (Abu 'l-Fidā' ed. Reiske, iii. 350—353). Along with Djakarmish, Sukmān took Count Baldwin and his brother Joscelin prisoners at Harrān. After his death in 498 his son İbrāhīm ruled in Hışn Kaifā while Mārdīn passed to his brother İlghāzī in 502. In Hışn Kaifā, İbrāhīm was succeeded first by his brother Rukn al-Dawla Dāwūd (who is mentioned in 508 and again in 541; Ibn al-Athīr, x. 352 sq.; xi. 73), then by the latter's son Fakhr al-Dīn Karā-Arslān who ascended the throne about 543 and probably died in 562 (or perhaps not till 570) (van Berchem, in *Abh. G. W. Gött.*, N. S., ix/iii., 1907, p. 143, note 3). He ruled over Hışn Kaifā and a considerable part of Diyārbakr (Ibn al-Athīr, xi. 217); to him or his father we probably owe the bridge over the Tigris at Hışn Kaifā [q. v.]. After his death he was succeeded by his son Nūr al-Dīn Muḥammad. When Şalāh al-Dīn in 578 came to Diyārbakr, Nūr al-Dīn was ready to pay homage to him and to assist him at the siege of al-Mawṣil. As a reward he was next year given the valuable town of Āmid (579). He died in 581 and was succeeded by his son Kuṭb al-Dīn Sukmān II who lost his life in 597 from a fall (Ibn al-Athīr, xii. 112). Before his death he had designated as his successor a Mamlūk named Ayās, as he hated his brother al-Malik al-Şālih Nāşir al-Dīn Maḥmūd, whom strict Sunnis condemned as a philosopher and heretic. But Maḥmūd seized Āmid when the emirs asked him to do so (Ibn al-Athīr, xii. 112). He recognised the suzerainty of the Aiyūbids 'Adil and Kāmil and of the Saldjūk Kaikā'ūs. On an Āmid inscription of the year 605 (1208—1209) he calls himself sultān of Diyārbakr, al-Rūm and al-Arman (van Berchem, *op. cit.*, p. 147). After his death in 619 he was succeeded by his son al-Malik al-Mas'ūd Mawdūd (Ibn al-Athīr, xii. 260). According to a coin of 628, Hışn Kaifā then belonged to the ruler of Mārdīn. The lands of the Ortokids had already been much diminished by the attacks of the Saldjūk sultāns of Rūm when in 629 (1231) the Aiyūbid al-Kāmil advanced against Āmid and took it with the towns that belonged to it, including Hışn Kaifā (Abu 'l-Fidā', iv. 393) which, if this statement is correct, had therefore again been taken by Mawdūd from his relative. Al-Kāmil's son, al-Malik al-Şālih, remained in possession of Āmid and Kaifā. In 639 he had to cede Āmid to the allied armies of Ḥalab and Rūm, while he retained Kaifā (Kamāl al-Dīn, *History of Aleppo*, transl. E. Blochet, p. 219 = *R. O. L.*, vi. 16). Mawdūd remained in prison until the death of al-Kāmil in 635; he then escaped and found refuge with al-Muzaffar of Ḥamā until his death probably during the Tatar inroads (Abu 'l-Fidā', iv. 393).

B. Mārdīn. On the death of its governor Lu'lu' the city of Ḥalab submitted voluntarily in 1117—1118 to Nađīm al-Dīn İlghāzī I [q. v.], who had since 502 (1108) been lord of Mārdīn. İlghāzī

Shams al-Dīn Dāwūd, about 693 by his brother Najm al-Dīn Ghāzī II al-Mansūr, in 712 by his son 'Imād al-Dīn 'Alī Alpi al-'Adil, then by his brother Shams al-Dīn Šālih, in 765 by his son Ahmad al-Mansūr, in 769 by his son Maḥmūd al-Šālih, in 769 by his uncle Dāwūd al-Muẓaffar, in 778 by the latter's son Majd al-Dīn 'Isā al-Zāhir, and lastly by the latter's brother Šālih (809–811 = 1406–1408). After Timūr had taken Mārdīn, the ownership of the town passed to the Kara-Koyunli.

To the territory of the Ortokids of Mārdīn belonged at least down to the time of Najm al-Dīn Ghāzī II the town of Dunaisir (q.v., now Kōç Hişār), according to coins found in the neighbourhood near Tell Ermen (E. Sachau, in *Abh. Pr. Ak. W.*, 1880, phil.-hist. Kl., treatise ii., p. 80).

C. *Khartabirt* (*Kharpūt*). *Khartabirt* is found as early as 515 in the possession of the Ortokid Balak b. Bahrām, who held it till 518. His relative Sulaimān then occupied it but he seems to have died in the same year. It then belonged successively to Dāwūd of Hişn Kaifā and his son Kara-Arslān and grandson Muḥammad. There is an inscription (dated 561 = 1165–1166) of Fakhr al-Dīn Kara-Arslān commemorating a building in *Kharpūt* (van Berchem, in *Abh. G. W. Gött.*, ix/iii., 1907, p. 142 sq., No. 9). After the death of Nūr al-Dīn Muḥammad in 581 (1185–1186) his brother 'Imād al-Dīn Abū Bakr founded an independent dynasty there as Lane-Poole was the first to show (*Essay on the Urtukis*, in *Num. Chron.*, N.S., xiii., 1873) (van Berchem, *op. cit.*, p. 144, note 1). At his brother's death he was in Šalāh al-Dīn's camp before al-Mawşil and at once set off for Hişn Kaifā on hearing the news to claim his inheritance. But his nephew Sukmān II had already taken possession of the fortress and had been recognised by Šalāh al-Dīn. The uncle had therefore to be content with *Khartabirt* (Ibn al-Athīr, xi. 339). Abū Bakr must have died in 600 at latest for Maḥmūd of Kaifā and Āmid unsuccessfully besieged his son Nizām al-Dīn in *Khartabirt* in 601 (Ibn al-Athīr, xii. 132). This last Ortokid of *Khartabirt* is said to have been called Nizām al-Dīn Abū Bakr; according to the inscription on a bronze mirror in the Blacas collection in Paris, his name was more probably Nizām al-Dīn Ibrāhīm, unless we have to see in Abū Bakr a (childless) brother of Ibrāhīm (van Berchem, *op. cit.*). Ibrāhīm had two sons: 'Izz al-Dīn Ahmad mentioned in a manuscript of 685 written in his reign and al-Khiḍr named on the above mentioned mirror, father of Nūr al-Dīn Abū 'l-Faḍl Ortok-Šāh who ruled at an unknown time and unnamed place. *Khartabirt* probably remained in possession of the Ortokids only down to 631. At least the town was taken in this year by Sultān Kaiḡubād I.

Coins. Four mints are named on the coins of the Ortokids: al-Hişn or Kaifā, i.e. Hişn Kaifā, Āmid, Mārdīn and Dunaisir. The strong influence of trade with Byzantium is seen on the coins in a remarkable fashion: we find on them not only rulers' heads taken from ancient coins and no longer understood but also the Virgin Mary, Christ and the Greek inscription Emmanuel on them.

OSMAN DIGNA [see 'OTHMĀN ABŪ BAKR DIGNA.]

OSRŪSHANA, the name of a district in Transoxania. The form *Osrūshana* is the best known although Yākūt (i. 245) says that *Oshrūsana* is preferable. In the Persian versions of the text of al-Iṣṭakhṛī and in the Persian text of the *Hudūd al-'Ālam* (ed. Barthold) we find more often *Surūshana* while Ibn Khurdādhbih sometimes has *Shurūsana*; the original form may have been *Srōshana*. This district lies to the north-east of Samarkand between this town and *Khodjand*, to the south of the Sir Daryā (Saiḥūn) so that it forms the approach to the valley of Farghāna; on the north west it is bounded by the steppe. The southern part is occupied by the mountains of Buttām which run along the upper course of the Zār-Afshān; these hills are generally regarded as forming part of *Osrūshana*. The geographical information about this region is based almost exclusively on the geographers of the tenth century; the later geographers down to Ḥājjdī Khalifa only repeat what their predecessors have said: it appears therefore that the name *Osrūshana* had fallen into disuse before the end of the middle ages. As a result of its numerous streams, which flow into the Sir Daryā, it was at one time a rich country visited by many travellers because the route to Farghāna lay through it. The geographers describe several roads from Samarkand to *Khodjand* all of which passed through the towns of Sābāt and Zāmin, the name of which still survives. The principal town — in which in the tenth century the governor lived — was in all probability called *Nawmāndj-kath* — this must be the basis of the more or less uncertain readings of a number of manuscripts (cf. especially Balādhuri, p. 420); the form *Bundjikat* given by Yākūt (i. 744; but see also iv. 307 where the name is *Kunb*) and adopted by Barthold is a late corruption; it lay a little to the south of the great road and was identified in 1894 by W. Barthold with the ruins called *Shahristān* to the south of the present town of Ura Tube; these ruins were examined a little later by P. S. Skvarsky. The geographers describe the town in detail. Two other towns of some importance were Zāmin and Dizak, and a number of other places are recorded;

there were also rural areas without towns, while al-Ya'qūbī (*B.G.A.*, vii. 294) says that there were 400 fortresses in the country. In the tenth century there was an important market-place called Marsamanda. There is some further geographical information about the country in the *Bābur-nāma*.

At the time when the first Arab invasion of the country took place under Qutaiba b. Muslim (712—714), Osrūshana was inhabited by an Iranian population, ruled by its own princes who bore the title of *afshin* (Ibn Khurdādhbih, p. 40). The first invasion did not result in conquest; in 737 the Turkish enemies of the governor Asad fell back on Osrūshana (Tabari, ii. 1613). Naṣr b. Saiyār [q. v.] subdued the country incompletely in 739 (Balādhuri, p. 429; Tabari, ii. 1694) and the Afshin again made a nominal submission to al-Mahdī (Ya'qūbī, *Ta'rikh*, ii. 479). Under al-Ma'mūn the country had to be conquered again but soon a new expedition was necessary in 822. On this last occasion the Muslim army was guided by Ḥaidar, the son of the Afshin Kāwūs, who on account of dynastic troubles had sought refuge in Baghdād. This time the submission was complete; Kāwūs abdicated and Ḥaidar succeeded him, later to become one of the great nobles of the court of Baghdād under al-Mu'taṣim where he was known as Afshin [q. v.]. The dynasty of the Sādjids of Ādharbāidjān was also descended from the royal family. His dynasty continued to reign until 893 (coin of the last ruler Sair b. 'Abd Allāh of 279 [892] in the Hermitage in Leningrad); after this date the country becomes a province of the Sāmānids and ceases to have an independent existence while the Iranian element was almost entirely replaced by the Turkish.

Bibliography: The geographical descriptions (Ibn Khurdādhbih, al-Ya'qūbī, al-Iṣṭakhrī, Ibn Hawqāl, al-Maḳḍisī) have been analysed and utilised by W. Barthold, *Turkestan down to the Mongol Conquest*, 2nd ed., in *G. M. S.*, N. S., v., London 1928, p. 165—169. — The second part of the same book contains all the historical references (cf. index); cf. also Le Strange, *The Lands of the Eastern Caliphate*, p. 473 sqq.

(J. H. KRAMERS)

OSTĀDĪH (P.), master, teacher, artisan. This word has passed into Arabic, with the plural *ostādhiṇ, asātidha*. It also means eunuch, musician, merchant's ledger, in the modern language particularly teacher. Combined with *dār* the form *ostādār*, "master of the house", major-domo, was applied to one of the great dignitaries of the Mamlūk sultāns [q. v.]. We also find the abbreviated forms *ostā, ostā, oṣṭā*, plural *ostawāt, ostawāt, oṣṭawāt*, which in Cairo is applied to coachmen.

(A. J. WENSINCK)

OSTĀDSIS, the name of the leader of a religious movement in Khurāsān, directed against the Abbāsids. The rising began in 150 (767) and spread rapidly in the districts of Herāt, Bādghīs, Gandj-Rustāk and Sijjīstān; the sources say that it had 300,000 adherents. The first opposition it met with was at Marw al-Rūdh but the rebels killed the Arab leader al-Adjītham with a number of his officers. On hearing this, the caliph al-Manṣūr sent his general Khāzīm b. Khuzaima to his son al-Mahdī at Nisābūr and the latter ordered Khāzīm to attack the rebels with 20,000 men.

After several checks due to the treachery of subordinates, Khāzīm entrenched himself in a camp at a place, the name of which is not given, and by a number of strategic movements and with the help of reinforcements from Tukhāristān succeeded in defeating the rebels, of whom large numbers were slain. Ostādsīs escaped to the mountains but was captured in the course of the following year. The 30,000 who accompanied him were set free but he and his sons were sent to Baghdād and executed. The rising of Ostādsīs was of a religious character: he represented himself as a prophet and exhorted the people to *kufir* (Tabari, iii. 773); he was one of a series of heretical rebel leaders who appeared in Khurāsān after the death of Abū Muslim [q. v.] like Sinbādīh the Magian, Bih-afrid [q. v.], Yūsuf al-Barm, and al-Mukannā. It is probable that his views were based on Zoroastrian doctrines. The name of the leader is given by Tabari as Ustādīh-Sis, "Lord Sis"; the name Sis is found in several Iranian names (cf. Justi, *Altiran. Namenbuch*, p. 336; Mani's successor was called, according to the *Fihrist*, p. 334: Sis al-Imām and in the Greek sources: Sisinnios). On the other hand this heretic numbered among his adherents, according to the *Kitāb al-Bad' wa'l-Ta'rikh* (ed. Huart, vi. 86), a large number of Ghuzz Turks, as was the case also with the rebel Ishāk al-Turk, who saw in Abū Muslim an incarnation of the deity. In al-Ya'qūbī's story it is said that Ostādsīs declined to recognise al-Mahdī as heir apparent, but the most astonishing statement is that of Ibn al-Athīr, who says that Ostādsīs was the father of Marādīl, wife of Hārūn al-Rashid and mother of al-Ma'mūn, and that Ghālib, son of Ostādsīs and maternal uncle of al-Ma'mūn, assassinated the latter's vizier, the famous al-Faql b. Sahl known as Dhu'l-Riyāsatain. It is impossible to say what can be at the basis of this story but perhaps we may see in it a tradition from a Persian source the object of which was to give al-Ma'mūn a royal or even saintly pedigree. The rising of Ostādsīs broke out about half a millenium after the foundation of the Parthian dynasty and one of its bases was Sijjīstān which may have made this leader be regarded as one of the "saviours" (*saoshyant*) expected in Zoroastrian religious tradition (cf. G. van Vloten, *Recherches sur la domination arabe*, in *Verh. Ak. Amst.*, i. 3, 1894, p. 68).

(J. H. KRAMERS)

'OTBA B. GHAZWĀN B. AL-ḤARITH B. DĪĀBIR B. WAḤB (or WUḤAIB) B. NUSAIB ABU 'UBAID ALLĀH or ABU GHAZWĀN AL-MĀZINĪ, belonged to the tribe of Kais 'Ailān, *halif* of the Nawfal or of the 'Abd Shams, one of the oldest Companions of the Prophet, "the seventh of the Seven", i. e. the seventh to adopt Islām and one who had shared in the sufferings to which the first believers had been exposed in Mecca. He took part in both hidjras, the battle of Badr, and in most of the battles and expeditions of the Prophet. — He is best known as the founder of Baṣra. In the caliphate of 'Omar he first of all conducted an expedition which ended in the capture of Obolla. 'Omar then appointed him agent (*'amil*) in "the country of India", i. e. the borderland between Arabia and Persian territory with orders to begin a campaign in the Sawād [q. v.]. He made

his headquarters at a hamlet called *Khuraiba*, where he built all that was necessary for a military base: a mosque (cf. iii., p. 318), a residence for the governor, quarters for the soldiers, their families and all that goes to make a rising town. This was the nucleus of al-Baṣra [q. v.]. The order of events and the chronology generally are far from being settled; the years given vary between 14 and 17. The years 15 and 17 are given for his death. Having performed the pilgrimage, he asked 'Omar to be allowed to resign his governorship but 'Omar refused to permit it. He then prayed God to spare him from returning to Baṣra. On the way back he fell dead from his camel at the age of 57. Another tradition is given by Ibn Sa'd [cf. *Bibl.*]. He was succeeded by al-Mughira b. Shu'ba [q. v.].

(A. J. WENSINCK)

'OTBA B. RABĪ' A B. 'ABD SHAMS B. 'ABD MANĀF ABU 'L-WALID, one of the chiefs of the tribe of *Quraysh*, who refused to follow Muḥammad. He met his death in the battle of Badr. His daughter Hind was the wife of Abū Sufyān [q. v.].

Shocked by the number of adherents of Muḥammad, 'Otba having consulted the other chiefs of the *Quraysh*, went to the Prophet to offer him anything he would care to ask if he would only abandon his propaganda. According to the traditional story, Muḥammad in reply only repeated a part of *Sūra XLI*, which made such an impression on him that the effect was still visible when he rejoined his friends, whom he advised not to importune Muḥammad any more. — Tradition puts him in a similar light when it represents him as one of those who on the eve of the battle of Badr endeavoured in vain to persuade the *Quraysh* to withdraw. He himself was mortally wounded in the battle and his body was thrown into the common ditch (*kaṭib*). Muḥammad is said to have thought highly of his gifts.

(A. J. WENSINCK)
'OTHMÂN I, very often called 'Othmān Ghāzī, founder of the dynasty of Ottoman sultāns and the first in the traditional series of the members of the dynasty. We are only imperfectly acquainted with the life and personality of this founder of a great empire but we may conclude from the fact that his name

has remained attached to the dynasty of the 'Othmān Oghullarī or Āl-i 'Othmān and is later found in the description of the empire and its inhabitants as 'Othmānī or 'Othmānī, that behind the name of 'Othmān there lies a powerful personality. The most extensive source of information about him is Turkish historical literature and particularly its ancient chronicles, the *Tawārīkh-i Āl-i 'Othmān*, representing the oldest tradition, along with a few poetical compositions of an epic nature dating from the end of the xivth century, like the latter part of the *Iskandar-nāme* of Aḥmedi. The study of the ancient chronicles reveals to us that although they certainly contain some good historical traditions, they are loaded with additions of a legendary character. These additions are explained by the enormous expansion of the power of the earlier Ottoman princes within less than a century of the death of its founder. As often happens in such cases the obscure history of the ancestor was embellished with details of a legendary character foreshadowing the greatness of his descendants. On the other hand, all the chronicles show a tendency to establish a historical connection between the power of the Saldjuks of Asia Minor and that of the first Ottoman rulers by making Ertoghrl or 'Othmān be invested with certain powers by Sultān Ālā' al-Dīn (II). These relations are more than doubtful. A third feature of the traditional accounts of 'Othmān's career, which we find in all the chronicles, is the explanation of a number of geographical names by connecting them with events which took place in the glorious period of the founder of the dynasty. There is further the tendency which we find pushed to its greatest extent in the chronicle of 'Ashīk Pasha Zāde to attribute to 'Othmān events which belong to the tradition of Ertoghrl, like the prophetic dream regarding the greatness of the posterity of 'Othmān and the daughter of Shaikh Edebalī, and the capture of the castle of *Ḳaradja Hışār*; in the same way the chronicles put many feats of arms of Orkhān like the taking of *Brusa* and even the conquest of *Ḳodja Ili* to the reign of 'Othmān, who had then long been an invalid "with a disease of the limbs". While in the chronicles we can still distinguish with some probability the non-historical features, pragmatic Ottoman historiography, with which 'Ashīk Pasha Zāde and Idrīs Bidlisī form the transition, represents these traditions as historical facts. Among the Byzantine historians, Pachymeres and Nicephoros Gregoras alone have preserved historical features independent of the Ottoman tradition, which clearly shows its influence in the later Byzantines (Phrantzes, Ducas, Chalcocondylas). Quite legendary stories of 'Othmān are also found in the hagiographic literature (cf. *Das Vilāyet-Nāme des Hāggi Bektasch*, transl. E. Gross, in *Türk. Bibl.*, xxv., Leipzig 1925, p. 133 sqq.).

According to unanimous tradition, 'Othmān was one of the sons of Ertoghrl [q. v.] whom he succeeded as chief of a semi-nomad Turkish clan which had its winter camp at *Söğüd* [q. v.] in the valley of the *Ḳara Şu*. The date of Ertoghrl's death is uncertain; later sources vary between 1264 and 1282. At this time *Ḳaradja Hışār* and *Eski Şehir* [q. v.] situated considerably to the south of *Söğüd* were perhaps already in the possession of this clan. They formed the frontier district bordering with the lands of the *Germiyan-*

Oghlu. ‘Othmān in the first phase of his career extended this cradle of Ottoman power to the north by taking the fortresses of Inegöl, Khar-mendjik, Biledjik, Yār Hīṣār and Köprü Hīṣār, which had hitherto been in the hands of the Byzantine feudal lords. This country consists of mountains and valleys lying to the west of the course of the Saḳarya [q. v.] and ends in the north in the plain of Yeñi Şehir; the capture of the last place seems to have been of great military importance as it became a base of operations for future conquests (cf. the map *Das Stammgebiet der Osmanen*, attached to the article *Anatolische Forschungen*, by F. Taeschner, in *Z.D.M.G.*, N.S., vii. 83 sqq.). Von Hammer, *G.O.R.* 2, i. 69 thinks the enumeration by Pachymeres (ed. Bonn 1835, ii. 413) of the fortresses taken by the Turks corresponds pretty well with the conquests of ‘Othmān. It is perhaps to this first stage of conquests that belongs the first recital of the *khutba* at Karadja Hīṣār in the name of ‘Othmān by Tursun Faḳīh. The chronicles put this event in 689 (1290). During this time the newly conquered territory seems to have received an increase of population from the side of the Germiyan (‘Ashīk Paṣha Zāde, ed. Giese, p. 20). The second phase in ‘Othmān’s career is that in which from his base at Yeñi Şehir he continued his conquests in the westerly direction towards Brusa and in a northern direction towards Iznīk. The Turks were not strong enough to take these towns but they ravaged the country round. According to the chronicles, there was a battle between ‘Othmān’s Turks and a confederation of lords (*taḳwūr*) of Brusa, Iznīk and several other places at Koyun Hīṣār, near Iznīk, in which the Turks were victorious; this battle has been identified since von Hammer’s time with the battle of Baphaeon, in which, according to Pachymeres (ii. 337), the heterarch Mouzalon was defeated in 1301 as a result of the impetuous onslaught of the Turkish cavalry. This victory enabled Lefke and Aḳ Hīṣār on the Saḳarya to be taken and in the west Tricoccia between Iznīk and Brusa (Pachymeres, ii. 637). In connection with this last victory (in 1308) Pachymeres mentions a personal feud between ‘Othmān and the Byzantine princess Maria, sister of the emperor Andronicus, who lived in Nicaea. She had been promised in marriage to the İlkḫān Olḳaitu Khudābanda [q. v.] and had threatened ‘Othmān with the latter’s intervention. In this second period the Turks extended their conquests as far as Ulubād (Leopadion) to the west of Brusa. The third phase is that in which ‘Othmān no longer took part personally in the military expeditions although, according to tradition, he was still alive. It was Orkhān [q. v.] and his companions in arms who continued the conquests. The first enterprise of Orkhān was the expulsion of a horde of Tatars who had invaded the district of Eski Şehir (perhaps sent by the Mongol allies of Byzantium). In the latest stage, ‘Othmān devoted himself to the closer encirclement of Iznīk and Brusa. This last town finally fell in 726 (1326), according to the chronicles, shortly before the death of ‘Othmān who is said to have received the good news just before he died in Söğüd. The sources are not agreed as to whether ‘Othmān was buried at Söğüd or Brusa. This last town has however for a very long time claimed to have a *türbe* of ‘Othmān.

From the very beginning of his reign ‘Othmān

was surrounded by a group of devoted followers, consisting in part of his brothers and their sons and in part of allies like Shaikh Edebalı — whose daughter Mālkhātun (in the two versions of Urudj Beg her name is Rābi’a) became the wife of ‘Othmān and the mother of his sons Orkhān and ‘Alā’ al-Dīn — and the Byzantine lord of Khirmendjik, Köse Mīkhal [q. v.] who later became a Muslim. The chronicles record how ‘Othmān divided among his friends the civil and military administration of the places he conquered. As to ‘Othmān’s foreign policy, it seems that his relations with the Germiyan Oghlu were not very friendly; it was from their territory that Eski Şehir was exposed to the invasions of the Tatars. The chronicle of ‘Ashīk Paṣha Zāde tells us that he had other independent Turkish allies like Şamsama Ça’uşh with whom he made raids across the Saḳarya.

The chronology of the career of ‘Othmān is uncertain. It is a pure fiction to say his reign began in 700 (1300); this is connected with the popular belief that at the end of each century a new conqueror makes his appearance (cf. ‘Ālī, *Kunh al-Akhbār*, v. 3). Neither does the statement made by several chroniclers that at his death ‘Othmān had reigned nineteen years (*beylik etti*) agree with other records. Perhaps however it gives a hint that his death took place long before the traditional date. The importance of the career of ‘Othmān has attracted research into the true nature of the expansion of the little Turkish clan and the power of its first chief. It has been suggested (Gibbons) that it was the conversion of ‘Othmān to Islām which gave the first impetus to expansion, but that is little probable as most of the available facts suggest a milieu already Muslim; ‘Othmān did just what a number of other Turkish chiefs were doing in Asia Minor about the same time. ‘Othmān’s name, which looks strange among the Turkish names of the members of his family (the name of his grandfather Sulaimān Shāh excepted), has also been the subject of study. While the chroniclers all write ‘Othmān (like the few coins of Orkhān, cf. *T. O. E. M.*, viii. 48 and an inscription of Orkhān at Brusa; cf. *T. O. E. M.*, v. 318 sqq.), Pachymeres has the form Ἀτμαῦν and Nicephoros Gregoras (ed. Bonn 1829, i. 539) Ἀτρουῦν. Some Arabic sources (Ibn Baṭṭūta, ii. 321; Ibn Khaldūn, *Ibar*, v. 562) give ‘Othmāndjik (Ibn Faḳl Allāh al-‘Umari, however, has Tāman) and the Italian historian Donado da Lezze (*Historia Turchesca*, Bucarest 1910, p. 4) says that Ottoman was the son of Zich. Now some traditions make the founder of the dynasty be born in the town of ‘Othmāndjik to the south of Sinope (Ewliya Çelebi, ii. 179) which may be a hint of the origin of the name. Moreover, the text of the chronicle of Urudj Beg (p. 6), taken in combination with other texts, shows that Ertoghṛul had three sons with Turkish names which might even make one suppose that ‘Othmān was not a son of Ertoghṛul (cf. J. H. Kramers, *Wer war Osman?*, in *A.O.*, vi. 242 sqq.; W. L. Langer and R. P. Blake, *The Rise of the Ottoman Turks and its historical Background*, in *American Hist. Review*, 1932, p. 496). ‘Othmān Ghāzi then may have belonged to one of the corporations of *ghāzi*’s or *akhi*’s as did several members of his entourage like Edebalı and his nephew Akhi Ḥasan (‘Ashīk Paṣha Zāde, p. 28), corporations which at this period represented a Muslim element more civilised

and more orthodox than the semi-nomad Turks.

Bibliography: The Turkish chroniclers quoted in the text are those of Neshri (ed. Nöldeke, in *Z. D. M. G.*, xiii. 194 sqq.), ‘Ashk Pasha Zāde (ed. Giese, Leipzig 1929), Urūdī Beg (ed. Babinger, Hannover 1925) and the *Anonymous Giese* (Breslau 1922). All the general Ottoman histories give the history of ‘Othmān (*G. O. W.*) as do the histories by v. Hammer, Jorga and Zinkeisen. A careful historical investigation is found on p. 11—53 of H. A. Gibbons, *The Foundation of the Ottoman Empire*, Oxford 1916. (J. H. KRAMERS)

‘OTHMĀN II, sixteenth sultān of the Ottoman empire, was born on the 19th Dju-mādā II 1012 (Nov. 15, 1603; cf. *Sidjill-i ‘othmānī*, i. 56), the son of Sultān Aḥmad I. After the death of his father in Nov. 1617, the brother of the latter had been proclaimed sultān as Muṣṭafā I [q. v.] but ‘Othmān, taking advantage of the weak character of his uncle and supported by the mufti Es’ad Efendi and the Kızlar Agha Muṣṭafā, seized the throne on Feb. 26, 1618 by a coup d’état. The youth of the new sultān at first assured the promoters of the coup d’état of considerable influence. To them was due the replacement of Khalil Pasha as grand vizier by Oküz Mehmed Pasha [q. v.] in Jan. 1619. Khalil had just concluded a treaty of peace with Shāh ‘Abbās I of Persia, after a campaign which had been indecisive. The relations with the other powers, Austria and Venice, with which the capitulations were renewed, were also peaceful. But after, in Jan. 1620, Mehmed Pasha had been replaced by the very influential favourite Güzel-dje ‘Alī Pasha [q. v.] who removed from the court all possible rivals, the chances of war increased. This time it was a war with Poland which broke out through the intrigues of the wojwod of Moldavia. In the battle of Yassy on Sept. 20, 1620, the Polish army was annihilated by the ser-asker Iskender Pasha. The grand vizier, who held office mainly by satisfying the avarice of the young sultān, never lost an occasion to irritate and provoke the enmity of Austria and Venice. He died on March 9, 1621 and under his successor Ḥusain Pasha of Okhri, ‘Othmān II took part in person in the campaign of 1621 against Poland. This campaign ended in a check for the Turks and the Tartars, who, with great losses, had in vain tried to storm the fortified Polish camp on the Dniester near Choczim. A preliminary peace was signed under the same conditions as before under Sulaimān I and the sultān appointed a new grand vizier Dilāwer-Zāde Ḥusain Pasha. Since the time when ‘Othmān, still considerably under the influence of the Kızlar Agha Sulaimān and his Khodja Molla ‘Omer, had begun to act independently, he had not been able to gain the sympathy of the army on account of his brutal treatment of the Janissaries, nor of the people chiefly as a result of his avarice, nor of the *ulamā*. The latter were particularly horrified at the sultān’s wish to take four legitimate wives from the free classes of his entourage; he actually married the daughter of the Mufti Es’ad. His unpopularity increased still further when he wished to put himself at the head of an army to fight Fakhr al-Dīn, the Emīr of the Druses, and to go on and make the pilgrimage to Mecca. Preparations had already been made for this expedition when on May 18, 1622 a mutiny broke out among the Janissaries

and Sipahis who plundered the house of Molla ‘Omer. Next day the rebels secured the cooperation of the chief *ulamā* and demanded the heads of the Kızlar Agha, the Khodja, the grand vizier, and three other high officials. ‘Othmān at first refused but after the rebels had forced the third wall of the palace he had to sacrifice the grand vizier and the Kızlar Agha. But in the meanwhile his uncle Muṣṭafā had been brought out from his seclusion in the ḥarem to be proclaimed sultān. ‘Othmān tried during the night to secure his throne through the influence of the Agha of the Janissaries, but the latter was killed on the following morning and he became the prisoner of the Janissaries who took him to their barracks. The rebels had no intentions against his life but in the meanwhile the direction of affairs had passed to Dāwūd Pasha, the favourite and son-in-law of Māh-Peiker, the mother of Sultān Muṣṭafā. Dāwūd Pasha being appointed grand vizier had ‘Othmān taken to the castle of Yedi Kule where he was put to death in the evening of May 20, 1622. He was buried in the *türbe* of his father Aḥmad I. — ‘Othmān is praised for his skill as a horseman and for his intelligence. He was also a poet with the *makhlas* of Fārisī. He was the first of three sultāns to lose his life in a rising, the others being Ibrāhīm and Selim III.

Bibliography: The Turkish sources are the works of Na’imā, Peçewī, Hasan Bey Zāde, the *Rawḍat al-Abrār* of Kara Ćelebi Zade, and the *Fedhileke* of Hādjdī Khalifa. — The *Wak’a-i Sultān ‘Othmān Khān* of Tūghī is specially devoted to the deposition of ‘Othmān (transl. by A. Galland; cf. *G. O. W.*, p. 157), while his whole reign is described in a *Shahname* by Nādirī (*G. O. W.*, p. 169). Among contemporary western accounts: the *Relazioni* quoted by von Hammer, in the note on p. 806 of *G. O. R.* 2, ii. and that of Sir Thomas Roe. Cf. also the general histories by von Hammer, Zinkeisen and Jorga. (J. H. KRAMERS)

‘OTHMĀN III, twenty-fifth sultān of the Ottoman Empire and son of Muṣṭafā II, succeeded his brother Maḥmūd I on Dec. 14, 1754. He was born on Jan. 2, 1699 (*Sidjill-i ‘othmānī*, i. 56) and had therefore reached an advanced age when he was called to the throne. No events of political importance took place in his reign. The period of peace which had begun with the peace of Belgrade in 1739 continued; at home only a series of seditious outbreaks in the frontier provinces indicated the weakness of the Empire. In the absence of any outstanding personality the sultān was able to rule as he pleased, but his activities were practically confined to changing his grand vizier frequently (six times). His favourite Siliḥdār ‘Alī Pāshā, grand vizier from Aug. 24 to Oct. 22, 1755, had his career terminated by execution. The appointment on Dec. 13, 1756 of Rāghib Pasha [q. v.] was an important one, as for five years this great statesman showed himself an excellent administrator of the empire under Muṣṭafā III. ‘Othmān III’s other activities were the suppression of cafés, of the liberty of women to show themselves in public and the regulation of the dress of his non-Muslim subjects. His name is associated with the great mosque of Nūr-i ‘Othmānī, which had been begun by Maḥmūd I and was solemnly opened in Dec. 1755. The reign of this sultān is remembered

for the great fires in the capital in 1755 and 1756. He died on Oct. 30, 1757 and was buried, like Maḥmūd I, in the tomb of the Veñi Džami'.

Bibliography: The *Tārīkh* of Wāṣif is the principal source. The reign is described in the great histories of von Hammer, Zinkeisen and Jorga.

(J. H. KRAMERS)

'OTHMĀN B. 'AFFĀN, the third caliph (23—35 = 644—655). He belonged to the great Meccan family of the Banū Umayya and to the branch descended from Abū 'l-'Āṣi, whose grandson he was (cf. the genealogy in Wüstenfeld, *Geneal. Tabellen*, U, 23). This makes his prompt acceptance of the teaching of Muḥammad quite noteworthy; he became a convert, if not at the very beginning of the Prophet's mission, at least at a very early date, several years before the Hidjra. 'Oṯmān was a rich merchant and an accomplished man of the world; tradition, which likes to represent him as a model of beauty and elegance and deals to a degree which borders on exaggeration with his toilet, may be correct, simply because it is unusual. Whatever was the exact motive that induced him to embrace a cause of which no one could then have possibly foreseen the success is a question that can never be answered with certainty. One set of historical traditions connects his conversion with his marriage to Muḥammad's daughter Ruḳaiya but other sources, probably with more justice, put this marriage after his conversion. The conversion of 'Oṯmān, the first Muslim of high social rank, must have made a sensation and contributed to the success of the new religion, but his personal efforts on behalf of Islām were never remarkable. His indolent character, which was however accompanied by a very living faith and great good nature, is another feature ascribed by tradition to 'Oṯmān and it is unlikely that we have here an invention intended to excuse the inaction of this caliph against his lying officials; just because lack of energy and initiative is evident in 'Oṯmān from the very beginning of his career, this defect must have been a real one. 'Oṯmān is believed to have taken part in the two migrations to Abyssinia and then joined the *muhājirūn* in Medina; but he did not take part in the battle of Badr (it is alleged that he had to attend to a sick wife; the Prophet however regarded him as present and allotted him his share of the booty). After the death of Ruḳaiya the Prophet's alliance with 'Oṯmān was renewed by his marriage with another daughter, Umm Kulṯhum; the doubts raised by Lammens (*Fāṭima et les filles de Mahomet*, Rome 1912, p. 3—5) regarding the actuality of this marriage do not seem to be justified; there is no reason to think that Muḥammad did not lay great stress on this alliance with the only member of the Meccan aristocracy of whom the Muslim community could so far boast.

During the lifetime of the Prophet and those of the caliphs Abū Bakr and 'Omar, the part played by 'Oṯmān was a very humble one; how did it happen then that the council (*shūrā*) appointed by 'Omar on his deathbed chose him as successor to the second caliph? The sources dealing with the history of this laborious conclave have been minutely analysed by Caetani; but it is only too evident that the mysteries of these secret deliberations are never destined to be revealed to historical criticism. What it seems possible to affirm is that, as often happened in the papal

conclaves, the most outstanding candidates ruled one another out; for example 'Alī whose election would have meant the negation of 'Omar's policy; or al-Zubair and Ṭalḥa, also it seems opponents of 'Omar and whose ambition and covetousness was feared. If among the three who remained, Sa'd b. Abī Waḳḳās, 'Abd al-Raḥmān b. 'Awf and 'Oṯmān, it was the latter who was chosen, it may be thought that even more than his relationship to the Prophet it was his being a member of the Umayyad clan that proved the decisive argument in his favour. The Umayyads had already regained in the lifetime of the Prophet, and especially during the caliphate of 'Omar, a part of the position they held during the Džāhiliya. There is no need to think as some one has done that Abū Sufyān, the head of the family, was the *deus ex machina* of policy during the first twenty years of the caliphate, and it would be naive to represent the Umayyads as having formed a kind of secret committee dealing with the Islāmic state as it pleased. In reality it was not so much to their noble birth as to a real talent for affairs possessed by several of their members that the Umayyads owed their influence. But this was counterbalanced in the time of 'Omar by the part played by other elements and especially by the oldest Companions. The strong personality of the second caliph had been able to maintain equilibrium among a number of heterogeneous elements, often in opposition to them.

It was otherwise with 'Oṯmān. In reality, as Wellhausen pointed out and Caetani has expounded at length, 'Oṯmān only followed and developed the policy of 'Omar. The difficulties he encountered were only the results of the policy of his predecessor. But it was just here that the difference in their talents became apparent.

The tragedy which put a bloody end to the reign of 'Oṯmān and opened up the period of civil wars has caused the greatest embarrassment to the Arab historians, forced to record the series of grievances which the adversaries of 'Oṯmān raised against his rule and faced with the alternative of either acknowledging that the caliph had sinned against the laws of Islām or that his accusers, among whom were some of the most venerated patriarchs of the faith, had either lied or been deceived. It is owing to this painful dilemma (out of which orthodox tradition extricated itself by means of the theory of the "excusable error" and other subtle distinctions) that there has been preserved for us the long list of these grievances (which are given in great detail for example in Muḥibb al-Dīn al-Ṭabarī, *al-Riyāḍ al-nāḍira fī Manāḳib al-'Ashara*, Cairo 1327, ii. 137—152). The first and perhaps the gravest charge against him is that he appointed members of his family to the governorships in the provinces; if Syria had already been long in the hands of the Umayyad Mu'āwiya b. Abī Sufyān, 'Oṯmān replaced Abū Mūsā al-Ash'arī and Sa'd b. Abī Waḳḳās at Baṣra and Kūfa respectively by his two relatives 'Abd Allāh b. 'Āmir b. Kuraiz and al-Walid b. 'Uḳba, his half-brother; when the latter was dismissed, having been involved in a scandal, he was replaced by another Umayyad, Sa'd b. al-'Ās, to whom is attributed the celebrated saying: "The *Sawād* of Kūfa is the garden of the *Quraysh*". Egypt, the first conqueror of which, 'Amr b. al-'Ās, seemed to deserve the right to hold the governorship for

life fell to ‘Abd Allāh b. Sa’d b. Abī Sarh, who was not an Umayyad, but whose Muslim past was, to say the least, suspicious. Finally the caliph’s intimate adviser to whom tradition likes to ascribe a baneful influence, was Marwān b. al-Ḥakam b. Abī ‘l-‘Āṣī, first cousin of the caliph, who had recalled his father from the exile to which the Prophet had condemned him. It cannot be denied that these measures of ‘Othmān were not entirely free from nepotism; but we must recognise in them a deeper motive: the intention of establishing unity of government and administration, which was being threatened by the excess of independence which the governors enjoyed. It was practically the same end that ‘Omar had had in view but the latter had succeeded by his energy and prestige in imposing his authority even on governors who belonged to other tribes and clans. ‘Othmān thought he could obtain the same results by using officials connected with him by ties of blood; he was not successful; the parts were reversed and it was the caliph who was under the influence of his relatives (perhaps however to a less extent than the official historians say); besides, popular discontent ascribed solely to this cause the troubles that arose, which were probably quite independent of the personality of the officials. Indeed (and it is one of Caetani’s great merits that he has called attention to this) the *diwān* system instituted by ‘Omar demanded that the plunder taken in war should increase steadily in perpetuity, the regular receipts from the taxation of the *Ahl al-Dhimma* not sufficing for the new recruits who hastened to the provinces from the depths of Arabia. From this came the stimulus to the expeditions which in the caliphate of ‘Omar never ceased to push forward the frontiers of the Arab empire: such were the conquest of the last provinces of the Sāsānian empire (the dynasty of which became extinct with the murder of the last king Yazdagird III), the occupation of Armenia, a series of expeditions along the north coast of Africa, into Nubia, into Asia Minor, and by sea into the eastern basin of the Mediterranean. If we sum up the conquests made or begun by the Arabs in the caliphate of ‘Othmān we shall see that if they do not show the swift expansion of those that took place under ‘Omar, they are nevertheless impressive as they mark on one side the conclusion of the initial stage of the Arab empire and on the other the preliminary to the second period of expansion, that of the Umayyads.

Nevertheless the booty produced by these expeditions was perhaps not so great as had been hoped; besides, ‘Othmān — this is another of the grievances against him — instead of assigning it entirely to the soldiers, reserved a share for his governors and for the members of his family, by developing the system of fiefs (*katā‘i*), which ‘Omar had already made great use of. In this again, we should recognise not a simple scheme for enriching his relations but perhaps rather a conscientious attempt to form domains for the state in contrast to the communistic system of dividing all the booty among the combatants. The Islāmic empire was tending from an innate necessity to give itself a regular administration, for which the Byzantine and Persian afforded models. What ‘Omar had already begun, what the Umayyads to some extent accomplished and the ‘Abbāsids realised, the transformation of the incoherent and anarchistic grouping of the tribes into an absolute monarchy of oriental

type, was also ‘Othmān’s programme. He may be reproached with not having chosen the means best fitted to realise it and described as not being fit for a task of this magnitude; but his plan was a reasonable one and only meant following up ‘Omar’s ideal. Besides, the economic crisis, the inevitable consequence of the sudden enriching of the Arab masses, very soon forced the state to make economies and to cut down the military pensions; this not unnaturally increased the number of malcontents.

One of the steps which contributed very greatly to stirring up against ‘Othmān the religious element, formed of the old Companions of humble or even servile origin (such as ‘Ammār b. Yāsir, Abū Dharr, ‘Abd Allāh b. Mas‘ūd etc.), whose influence upon the masses was very strong, was the official edition of the *Qur’ān* (cf. Nöldeke-Schwally, *Geschichte des Qur’āns*, ii. 47–119). What was found most odious in this process was the destruction of the provincial copies. ‘Othmān was no doubt urged to this step by considerations of a religious and liturgical nature, but nevertheless the dominant motive may have been a political one. The *ḥurrā*, who were the receptacles and of course also the expositors of the sacred text, exercised for this reason a tremendous influence on the masses, which made them to some degree independent of the central power, the latter having no way of checking whether the *Qur’ān* passages used by the *ḥurrā* were authentic or not. In depriving them of this weapon and making itself the monopolist of divine revelation, the government was endeavouring to realise unity and to establish its absolute power over the state: but it is only very natural that the opposition to this tendency should have accused the caliph of having mutilated and destroyed the divine word.

‘Othmān therefore made himself enemies in very different quarters: the turbulent elements of the *amṣār* [see *MIṢR*] faced with economic difficulties and disposed to accuse the caliph of confiscating for his own benefit the property of the Muslims; growing pietism to which the assertion of the authority of the state seemed a breach of the principles of equality laid down by the Prophet; lastly the former governors who had been dismissed and the great Companions who, removed from power, were striving for it with all their might: such were Ṭalḥa, al-Zubair and ‘Alī. It may be asked if ‘Othmān, while following the line of conduct imposed upon him, as we have seen, by the necessities of state and the example of his predecessor, could have avoided the fate which overtook him and which so profoundly disturbed the unity of Islām. Although the answer to this kind of question cannot be a definite one in the field of history, it may be supposed that a more intelligent mind and a more energetic temperament than that of the third caliph (or to be more definite a real political genius such as Mu‘āwīya would undoubtedly have revealed if he had then been at the head of the government) might perhaps have overcome these difficulties. Perhaps also his adviser Marwān, who was thirty years later to face a situation not less difficult, lacked as yet experience and prudence. In any case, ‘Othmān, incapable in himself, was also badly advised and the Umayyads, whom he had overwhelmed with riches and honours, thought more of themselves than of their relative in the hour of danger.

The course of development of events can only be briefly indicated here. Tradition divides quite artificially the caliphate of ‘Othmān into two periods of equal length: six years (23—29) of good government and six (30—35) of illegality and confusion. The change is represented symbolically by the loss of the seal of the Prophet which ‘Othmān, according to the story, dropped into the well of ‘Aris in the year 30. It is in any case a fact that it was just at this period that the first movements of rebellion began in the ‘Irāk, the region which was suffering most from the economic crisis and the one where the turbulent elements were the most numerous. The episode of Abū Dharr, one of the precursors of asceticism in Islām, exiled to Syria with several of his companions, and later sent to Rabadha to die there in destitution, although embellished by legend is characteristic as showing the attitude of the growing pietism to the secular transformation of the caliphate. Much more serious troubles broke out in Kūfa in 32—33, led by the *ḡurra*, who combined a religious character with political activity and gathered round them a number of doubtful elements. In spite of severe measures taken against them, the recalcitrant elements succeeded in procuring the deposition of Sa‘id b. al-‘Āṣ who was replaced by the former governor of Baṣra, Abū Mūsā al-Ash‘ari, himself a pietist and opponent of ‘Othmān; Kūfa was henceforth no longer under the central government. Similarly in Egypt, Ibn Abī Sarḥ had to yield to the violence of a group led by the young Muḥammad b. Abī Hudhaifa who although an adopted son of ‘Othmān took the side of his opponents. It seems that the wily ‘Amr b. al-‘Āṣ who had retired to Palestine after his dismissal was secretly encouraging the revolutionary movement in Egypt. The storm which had been brewing for some time burst at the end of the year 35 when bodies of rebels advanced on Medina from the provinces. The first to arrive were the Egyptians; dramatic interviews took place between them and the caliph; the grievances against ‘Othmān were expounded with great bitterness of language. But the rebels were disarmed by the humble and conciliatory attitude of the caliph who gave in to all their demands, promised to annul his previous measures and to change his governors; the Egyptians left satisfied. But suddenly, on the way back at the halting-place of al-‘Arish, a messenger of ‘Othmān’s was seized and a letter found upon him from ‘Othmān to Ibn Abī Sarḥ confiscated which contained an order to put to death or mutilate the leaders of the movement on their return. The latter turned back furious and retraced their steps to Medina, determined on vengeance. ‘Othmān denied that the letter was genuine, and even insinuated that it had been forged by his enemies in order to ruin him. Although official tradition shows a tendency to attribute this forgery to Marwān, there is also the trace of other versions and even of one (preserved by al-Balādhuri alone), which says that ‘Othmān suspected ‘Alī; this, by the way, is what Caetani had suspected without knowing of this text (*Annali*, viii., p. 159). Whatever we may think of this suspicious episode (we know well that the manufacture of false documents intended to bring ruin upon an adversary who cannot be defeated otherwise has been regularly practised in ancient as well as modern times), it is certain that, while it was the immediate cause of the

tragic end of ‘Othmān, events had already begun to move. A regular siege of ‘Othmān’s house was set up; the conduct of the old Companions who remained in veiled opposition was of the most hypocritical character; without having the courage to share in the deposition of the caliph by violence, and without the desire to help him against the rebels, they, ‘Alī in particular, maintained an attitude of malevolent neutrality. ‘Ā’isha, the widow of the Prophet, who had conducted a violent campaign against ‘Othmān, preferred to slip away at the last moment on the pretext of a pilgrimage to Mecca. Reduced to the last extremity, ‘Othmān mustered all his dignity and refused to abdicate. After a siege, the length of which is given differently in the different sources, a number of men penetrated into the house in the last days of 35 (June 656) led by Muḥammad b. Abī Bakr (the son of the first caliph and brother of ‘Ā’isha) who raised his hand against ‘Othmān. We do not know if it was he or another (tradition gives several names and it is evident that the exact details were obscure from the first) who gave the coup de grâce to the caliph. His blood flowed, it is said, upon the copy of the *Qur’ān* which he was reading when attacked; his wife, the Kalbī Nā’ila bint al-Furāṣa, was wounded. The house was pillaged. During the night the body was buried with the greatest secrecy by his wife and some friends. The troops sent by Mu‘āwiya from Syria (too late, says tradition, accusing him of duplicity) received the news of the murder when half way there and quickly returned home.

We know how the new caliph was elected in the midst of tumult and terror (cf. Caetani, *Annali*, ix. 321—342); it shows, the author of this article thinks, that there was no previous arrangement among the principal Companions, each of whom probably thought he could deal with events as they arose. The election of ‘Alī was without doubt due, even more than to the prestige given him by his close relationship and alliance with the Prophet, to the support of the Anṣār who in the confusion in the Umayyad party had resumed control over their own town. But the new government from the first was destined to be challenged either by the unsuccessful rivals or by Mu‘āwiya, the only one of the Umayyad governors who had remained master of his province. Political unity, and soon also the religious unity, of Islām was now at an end and the period of schisms and civil wars had begun. The caliphate of ‘Othmān and its bloody end mark a turning point in Muslim history and give to the third caliph an importance which his true personality, a somewhat mediocre one at best, would never have merited.

Bibliography: The sources and earlier works are collected and summed up in Caetani, *Annali dell’Islām*, vii. and viii., Milan 1914—1918 (cf. also by the same author *Chronographia Islamica*, p. 279—388). The only historical text of importance still unpublished, the *Ansāb al-Ashraf* of al-Balādhuri, is in course of publication by the University of Jerusalem. The part relating to ‘Othmān, edited by D. S. F. Goitein (who has lent the writer proofs) corrects and complements on many points the material already available but does not supply much that is new. We may also expect shortly the publication of the long biography of ‘Othmān in the *Ta’rikh*

Dimashq of Ibn ‘Asākir, vol. viii. The *ḥadīths* relating to ‘Oṭhmān are given in A. J. Wensinck, *A Handbook of early Muhammadan Tradition*, Leyden 1927, p. 239–240.

(LEVI DELLA VIDA)

‘OTHMĀN B. MAZ‘ŪN B. ḤABĪB . . . ABU ‘L-SĀ‘IB of the Kuraish clan of D̲j̲umah, one of the earliest Companions of Muḥammad, the thirteenth man to adopt Islām. He took part in the hijra to Abyssinia, returned, like some other refugees, on the false news of a reconciliation between Muḥammad and his pagan enemies and became for some time the client of al-Walid b. al-Mughira. Soon he renounced this privilege, because he preferred to bear his share in the insults offered to his co-religionists in Mecca. On a quarrel between ‘Oṭhmān and the poet Labid see Ibn Hishām, p. 343–344.

‘Oṭhmān took part in the hijra to Medina where he found lodging with Umm al-A‘lā. When Muḥammad formed pairs of “brothers” between the Muhājirūn and Anṣār, ‘Oṭhmān was associated with Abu ‘l-Ḥarith b. al-Taiyihān. He took part in the battle of Badr and died in the following year, 3 A. H.; according to other accounts in the year 4. He was the first Muslim buried in Baḳī‘ al-Gharkād. The affection in which Muḥammad held him was seen in the grief he showed at the sight of his corpse. Nevertheless Muḥammad is said to have reproved his widow Khuwaila bint Ḥakīm al-Sulaimiya for using language, more natural than theological, and saying her dead husband was one of the inhabitants of Paradise.

In Tradition ‘Oṭhmān is the most characteristic representative of the ascetic tendencies which were not entirely foreign to primitive Islām. He abstained from wine before this beverage was prohibited. He neglected his wife who did not fail to complain to ‘Ā‘isha whereupon Muḥammad tried to divert him from a too rigorous asceticism by suggesting that he should follow his example. The tradition is also very well known according to which he asked Muḥammad to permit him to castrate himself, a request which the Prophet did not at all consider with favour.

OTHMĀN DAN FODIO. [See PUL.]

‘OTHMĀN ABŪ BAKR DIGNA (DIGNA), governor and general of the Mahdiyya in the Eastern Sūdān from 1883 onwards, born in Sawākin about 1840 (cf. Shuḳair, iii. 200; Dietrich, p. 50), was according to some a descendant of Kurds of Diyār Bakr who had come in 1517 under Sultān Selim to Sawākin and intermarried with the Hadendowa. The resulting family of the Dignāi (Diknāi) settled in Erkowit (Arkuwait) west of Sawākin. Shuḳair mentions several relations of ‘Oṭhmān: two brothers, Muḥammad Mūsā and the slave dealer ‘Alī, a half-brother Aḥmad Digna, two nephews, Madanī b. ‘Alī and Muḥammad Fāi, emīr of Kassala. ‘Oṭhmān gave them appointments

in the army and in the administration. Aḥmad Digna and Madanī both fell in fighting in the Eastern Sūdān.

Down to the outbreak of the Mahdist rising, ‘Oṭhmān was a trader, dealing especially in slaves between the Hīdjāz and the Sūdān. The prohibition of the slave-trade by the Egyptian government in 1877 affected not only his livelihood and his liberty — he and his brother ‘Alī suffered a period of imprisonment in D̲j̲idda — but also his religious conviction that the slave-trade was a permitted one. Even then his religious fanaticism displayed itself in his joining the ecstatic begging order of the Madjādhib. On hearing of the coming of the Mahdī Muḥammad Aḥmad [q.v.], “he migrated to him” (*ḥad̲j̲ara*), met him shortly after the fall of el-Obeid (al-Ubaiyid) in 1883 and took the oath of obedience to him (*bai‘a*). Henceforth he was blindly devoted to the Mahdiyya and retained his allegiance to it until his imprisonment.

It is evidence of the Mahdī’s keen judgment that he at once recognised ‘Oṭhmān’s extraordinary abilities and in a proclamation to the tribes of the eastern Sūdān on May 8, 1883 (in Shuḳair, iii. 201 sqq.) appointed him governor-general (*‘amil ‘amm*) over the till then peaceful tribes of the Bejd̲j̲a, between the Atbara and the Red Sea (with the towns of Sawākin, Ṭōkar and Kassala). These tribes who did not speak Arabic and had never been ruled by an Arab, readily gave obedience to their kinsman ‘Oṭhmān who was not only well known to them through years of friendly commerce but also knew their language and ways.

‘Oṭhmān’s activity from 1883 to 1900 falls into two periods. In the first (1883–1891) as leader of the Mahdist rising in the eastern Sūdān he carried out the important task of protecting the eastern frontier of the Mahdiyya against the Anglo-Egyptian government, which made it possible for the Mahdī to concentrate his forces on the Nile. In the second period (till 1900) after the loss of the eastern Sūdān, he was still general of the Mahdiyya along with others in the service of the Khālifa ‘Abdullāhi against the English under Kitchener.

I. The events of the first period which he opened from Erkowit with the encounter at Sinkāt on Aug. 5, 1883 were at first concerned with Sawākin. The details of this fighting are given by Shuḳair, iii. 200 sqq., 323 sqq., 400 sqq., 538 sqq., 601 sqq. The main object was not so much the taking of Sawākin and other towns as the command of the roads between Sawākin and Berber, the shortest and most convenient route to the Nile. ‘Oṭhmān is entitled to the merit of having for seven years successfully closed this road to the government. In contrast to this, the results of the actual fighting were of little significance on either side. ‘Oṭhmān defeated the Egyptians under Maḥmūd Pāshā at el-Tēb (Nov. 5, 1883), destroyed an Egyptian expedition at al-Tamanīb (Dec. 1883), undertook the siege of Sawākin, Sinkāt and Ṭōkar, defeated Baker Pāshā in a second battle at el-Tēb (Feb. 4, 1884), on Feb. 8 forced Sinkāt to surrender and on Feb. 24 Ṭōkar, but on Feb. 29, 1884 suffered a severe defeat at el-Tēb and again on March 13 and 27 at Tamāi at the hands of General Graham, which checked him for a time but did not cause him to withdraw. It was not till March 1885 that he began new operations from Tamāi, Tell Hashim and Ṭōkar, with little success

because the tribes which composed his army threatened to disperse, fearing English intervention. Nevertheless, he succeeded again and again in inspiring the undisciplined masses with enthusiasm, not least by the fact that he transferred the centre of his activities to Kassala and Abyssinia. The years 1884—1885 mark the zenith of his career. He incited the people of Kassala by Mahdist pamphlets; after the death of the Mahdī on June 22, 1885 and the fall of Kassala he was sent there by the *Khalifa* 'Abdullāhī, as the only higher official of the Mahdī (not related to the *Khalifa*) who had remained in his position, and from there waged war on the Amārār and the Abyssinians. He compensated himself for the failure of his Abyssinian campaign by a savage treatment of the people of Kassala. As he was continually threatening Sawākin and even went so far as to draw trenches round the town and begin a regular siege from Handūb, Kitchener, who was then in command at Sawākin, forced him after a series of defeats to retire to Tōkar. 'Othmān's popularity now began to decline. The tribes became alienated by his strictness and severity and the continual warfare. The exhaustion of the Mahdists was so great that the *Khalifa* allowed 'Othmān to resume trading between Sawākin and the Mahdiyya via Handūb, but this was stopped on the opening of the final struggle between the Mahdists and the Anglo-Egyptian government, and the result was famine among the Mahdists. The oppression of Kassala by Muḥammad Fāi, sent there as emir by his uncle 'Othmān, induced the *Khalifa* to summon 'Othmān to Omdurmān [q. v.]. He returned with full approval of his conduct and with new military powers but was completely defeated by Holved Smith Pāshā who finally took Tōkar in Feb. 1891; the tribes scattered, 'Othmān fled abandoned by everyone to the mountains between Kassala and Berber. The country between the Atbara and the Red Sea was lost to the Mahdists; Berber and Kassala were open to the English and Italians. 'Othmān was banished by the *Khalifa* to Adārāma on the Atbara, where in addition to busying himself with agriculture he endeavoured to raise a new army which was to hold the Atbara line.

II. When at the beginning of the decisive campaign against the Mahdiyya, Kitchener conquered Berber in 1897, 'Othmān came to the front again. He led an army over the Nile at Shendi and joined his fellow-general Maḥmūd. They were both defeated and Maḥmūd was taken prisoner. In the battle that followed at Omdurmān (Sept. 2, 1898) he attempted in vain to check the flight of the dervishes with a strong force between the Surghām hills and the Nile. After the defeat he accompanied the *Khalifa* on his flight until the latter's death at Gadīd (Nov. 24, 1899), refused to surrender, escaped across the White Nile and Atbara into the Werriba mountains and endeavoured with the help of the *Shaiḫ* of the *Djamilāb* to cross the Red Sea into the *Ḥidjāz*. Through the treachery of the *Shaiḫ* he fell into the hands of the authorities of Sawākin on Jan. 18, 1900, and was sent to prison in Damietta where *Shuḳair* saw and spoke with him in 1903 (see *Bibl.*). To the kindness of the Royal Egyptian Embassy in Berlin I owe the following data of 'Othmān's later life: 'Othmān's imprisonment took place on Jan. 12, 1900; he was brought to Rosetta, from there to Tūra near Cairo, finally, out of climatic reasons, to Wādī Ḥalfa. After some years his lot was relieved; he was

allowed to retain his property in Berber, but did not take any interest therein. In 1924, at a great age, he made the pilgrimage to Mecca; after his return to Wādī Ḥalfa he settled outside the town, where he died in 1926; he was buried there.

'Othmān Digna was the model of a primitive unbroken nature. He was the type of the fanatical Mahdist, noteworthy as the only non-Arab to hold high office in the Mahdiyya. He was an imposing figure as described by *Shuḳair*, iii. 200 (German by Dietrich, p. 49). Not only did he know the languages of the tribes placed under him but he also spoke and wrote Arabic fluently (a specimen of his concise style is given by *Shuḳair*, iii. 206 sq.). Courage verging on foolhardiness and cleverness which seized upon the slightest advantage, strictness to the verge of cruelty, and a stubbornness in following up his goal, from which even the severest defeats could not turn him, were combined in him with an ecstatic piety — *Shuḳair* described his ecstatic fits in prison (iii. 669) — and an ascetic mode of living. From the time of the coming of the Mahdī he went without sandals and shoes and used riding-beasts only for longer journeys. He was therefore, along with Wad Naḍjūmī and Abū 'Andja, the most important Mahdist general and the most dreaded enemy of the government.

(ERNST LUDWIG DIETRICH)

'OTHMĀNDJĪK, the chief town in a *qaḍā* of the sandjak of Amasia in the wilāyet of Siwas [q. v.] in Turkey in Asia, lies in a picturesque position at the foot of a volcanic hill which rises straight out of the plain and is crowned by a castle which formerly commanded the celebrated bridge said to have been built by Bāyazīd I. The settlement is probably very old as is evident from the numerous rock chambers cut out of the cliffs. The number of inhabitants according to Maercker (1893) was about 5,000 and they lived in 920 houses. It is connected by road with Merzifun in the east and with Tosia in the west. The importance of the place however lies entirely in the part it has played in history. The name 'Othmāndjīk is connected with that of 'Othmān I [q. v.], the founder of the Ottoman dynasty, and it is said that 'Othmān I took his name from this place which had been granted him as a fief. This suggestion, which is found as early as the xvth century (probably for the first time in the *Geschicht von der Turkey* of Meister Jörg v. Nürnberg, Memmingen n. d. but about 1496, and again in Spandugino, van Busbeek etc.), has little claim to credibility although it has been revived in modern times e. g., by Cl. Huart, in *J. A.*, ser. 11, vol. ix., 1917, p. 345 sqq. and by J. H. Kramers, in *Acta Orient.*, vi., 1927, p. 242 sqq.; cf. thereon W. L. Langer and R. P. Blake, in *American Historical Review*, xxxvii. (1932), 496, note with other references. It is probable that 'Othmān is the arabicised form of a Turkish name which may have sounded something like Atman, Azman and we must not forget Ibn Baṭṭūṭa's assertion that the founder of the dynasty called himself 'Othmāndjīk, i. e. "Little 'Othmān" to distinguish himself from the third caliph. The

Turkish sources are contradictory: Hādjdī Khalīfa says that the town of ‘Othmāndjīk took its name from the fact that in the xth (1) century a leader named ‘Othmān conquered it, Ewliyā Čelebi (1647–1648) says (ii. 180 sqq.) that many see in ‘Othmāndjīk the birth-place of the emir ‘Othmān. This opinion had become the current one about the middle of the xviith century, as may be seen from a passage in *Les Voyages et Observations* of François le Gouz (Paris 1653, p. 65). The place does not appear in the clearer light of history till 1392 when it was taken by Bāyazīd I from the lord of Kastamuni, Bāyazīd Kötürüm, and definitely incorporated in the Ottoman empire. The fact is worth mentioning that there was evidently a considerable Bektāshī settlement here at an early date and the tomb of the famous Bektāshī saint Koyun Baba [q. v.] in ‘Othmāndjīk has always been much visited. The inhabitants according to Hādjdī Khalīfa belonged almost entirely to the order of the Bektāshīs. Cf. on this point in 1546 *Le Voyage de Monsieur d’Aramon*, ed. Ch. Schefer, Paris 1887, p. 66 (where Cochiny-Baba should be read Koyun-Baba). — Makarius of Antioch mentions a place called ‘Othmāndjīk near Mar’ash. He visited the site where there was said to have been formerly a large town of this name also called Osman Dada (= ‘Othmān Dede?) (*Travels*, ii. 453 sqq.).

Mordtmann, in *Z. D. M. G.*, xxx. 467 sqq.

(FRANZ BABINGER)

‘OTHMĀN-ZĀDE AHMED TA’IB, a notable Ottoman poet, scholar and historian of the end of the xviith and first third of the xviiith century. The son of the *rūs-nāmedjī* (māliye *tenkeredjī*) of the pious foundations, ‘Othmān Efendi, he took up a theological career. The year of his birth is not recorded. From 1099 (1687) he held the post of *müderris* in various medreses in Constantinople. At intervals he also worked in other places. For example in 1107 (1695) he went to Damascus with Kemānesh Mehmed Pasha when the latter was appointed governor there. In 1124 (1712) he was appointed *müderris* at the Sulaimāniye, a post he had aimed at from the very beginning. He then went as chief judge (*Haleb mollāsı*) to Aleppo in 1126 (1716) and lastly as *Mişr mollāsı* (chief justice of Cairo) to Cairo, where he died at the end of his year of office on the 2nd Ramaḍān 1136 (May 25, 1724). According to Brusall Mehmed Tāhir, there is in existence a biography of ‘Othmān-zāde composed by Ibn al-Emin Maḥmūd Kemāl Bey.

‘Othmān-zāde was regarded by his contemporaries as the most important poet of his period. He was particularly celebrated for his chronograms (*tā’rīkh*)

and *kiṭ’a*. A chronogram on the birth of prince Ibrāhīm (1133 = 1720–1721) made such an impression on Sultān Aḥmad III (1115–1143 = 1703–1730) that he gave ‘Othmān-zāde the title “king of poets” (*malik [sultān] al-shu‘arā’*) and granted him a special *khaff*. ‘Othmān-zāde left behind him a *diwān* of the usual type (*müretteb diwān*) which consists of 12 *kaşıdas*, 32 chronograms and 77 *ghazels*. Along with these are isolated poems, e. g. a satire (*hidiv*) on Thāḳib Efendi composed in 1124 (1712). He also wrote in verse a commentary on the 40 *ḥadīths* entitled *Sharḥ-i Ḥadīth-i arba’in*, which is also known as *Şiḫḫat-ābād*; it was written in 1128 (1715).

It is however to his prose works that he owes his fame with posterity, especially his historical works, some of which are still popular and valuable at the present day. The most important is his biographical collection *Ḥadīkat al-Wuzarā’*, a most estimable and still important collection of lives of the first 92 grand viziers of the Ottoman empire, from ‘Alā’ al-Dīn ‘Alī Pasha to Rāmī Mehmed Pasha who was dismissed in 1115 (1703). The work was composed six years before his death. It was printed at Constantinople in 1271 (1854). ‘Othmān-zāde’s idea was later taken up by others. His biographical collection was continued by: Dilāwer Agha-zāde ‘Omar Efendi (‘Omar Waḥid), a friend of Rāḡhib Pasha’s who wrote a *Dhail-i Ḥadīkat al-Wuzarā’*, also called *Idjmāl-i Manāḳib-i Wuzarā’-i ‘izām* or *Gül-i Zibā*, which covers the period from the grand vizier Kōwanos Aḥmad Pasha to Sa’id Mehmed Pasha; also by Aḥmad Djāwid Bey, who compiled a continuation entitled *Wird al-Muṭarrā* which covers the period 1112–1217 (1758–1802), from Rāḡhib Pasha to Yūsuf Ziyā Pasha, the conqueror of Egypt; finally by ‘Abd al-Fettāḥ Şheḫkāt-i Baghdādī entitled *Berk-i sebṣ*, covering the period 1217–1271 (1802–1854), from Ziyā al-Dīn Yūsuf Pasha to ‘Alemdār Muṣṭafā Pasha.

All three continuations are printed as an appendix to the *Ḥadīkat* of ‘Othmān-zāde, while the later continuation by Rif’at Efendi: *Wird al-Haḳā’ik* appeared in a lithograph separately while the continuation by Mehmed Sa’id Şhehri-zāde entitled: *Dhail-i Ḥadīkat al-Wuzarā’* or *Gül-i Zibā* or *Gülshan-i Mulūk*, which deals with 31 grand viziers from Nishāndjī Aḥmad or Siliḡdār Mehmed Pasha to Sa’id Mehmed Pasha, is still only available in MSS.

The two sketches of Turkish history by ‘Othmān-zāde also attained great popularity. The longer: *Idjmāl-i Manāḳib* (or *Tewārīkh*)-i *Salāṭin-i ‘Alī* ‘Othmān deals with the first 24 Ottoman sultāns, from the founder of the dynasty to Aḥmad III. The shorter version: *Fihrist-i Şāḡhān* or *Fihrist-i Şāḡhān-i ‘Alī* ‘Othmān or *Mukhtāṣar-i Tā’rīkh-i Salāṭin* or *Tuḡfat al-Mulūk* or *Ḥadīkat al-Mulūk* covers the period from ‘Othmān to Muṣṭafā II. The number of varying titles shows the popularity of the work. The book, sometime quoted as *Faḳḳāl-i ‘Alī* ‘Othmān, dedicated to Dāmād Ibrāhīm Pasha, seems to be only a variant title of one of these books.

In the year of his death (1136 = 1724) ‘Othmān-zāde wrote a history of Fādīl Aḥmad Pasha entitled: *Tā’rīkh-i Fādīl Aḥmed Pasha*, which like most of his works is only accessible in MSS. The *Munāḡara-i Dewletain* (struggle between the two kingdoms) in the form of questions and answers is also dedicated to Ibrāhīm Pasha (MS. in Vienna)

and is an interesting contribution to the very highly developed *munāṣara* literature.

As further independent works may be mentioned: *Idjās Naṣā’ih al-Ḥukamā’* and *Tuḥfat al-Nu’mān*. Here we may mention his anthology *Djāmi’ al-Laṭā’if* (a collection of anecdotes, jests etc.). His stylistic collection *Munsha’āt-i Tā’ib Efendi* was intended for practical purposes; it is a collection of letters in three *fasl* and a concluding chapter.

His extracts from and editions and translations of other works are very numerous. The greater part of his work is collected in his *Kulliyāt* with an introduction by Aḥmad Ḥanif-zāde. Some titles cited by von Hammer and Brusall Mehmed Ṭāhir which apparently go back to Ḥanif-zāde, the continuator of the *Kashf al-Zunūn* of Ḥājjdji Khalifa, are probably not correct and refer to double or subsidiary titles. — Translations by him are: *Mashāriḥ al-Anwār* and *Mashāriḥ Sherif*, the latter entitled: *Tawālī’ al-Maṭālī’* on *ḥadīth*. — Extracts from or versions of other works are: *Akhṭāk-i Muḥsinī* (or *Mukhtaṣar-i Akhṭāk-i Muḥsinī* or *Khulāṣat al-Akhṭāk*) from the Ethics of Ḥunain b. ‘Alī Kāshifī, who is known as Wā’iz al-Herewī (d. 910 = 1504). The actual work which was written in Persian for Mirzā Muḥsin b. Ḥusain al-Baikara was translated by Pīr Mehmed known as Gharamī, with the title *Anīs al-‘Arifin* in 974 (1566); *Akhṭāk-i ‘Alā’i*, an extract from the work of ‘Alī b. ‘Amr Allāh, known as Ibn Ḥinā’ī (Kīnālī-zāde) which was written for the Emir al-Umarā’ of Shām, ‘Alī Pasha, and therefore called after him; the *Manāḳib-i Imām-i aṣṣam*, i. e. of Abū Ḥanifa. We also have from his pen a synopsis of the *Humāyūn-nāme*. The *Anwār-i Suhailī*, the Persian version of Ibn Muḳaffa’s Arabic version from the original Indian (Pahlawī) of Bidpāi was the work of Ḥusain Wā’iz Kāshifī, court-preacher to Ḥusain Baikara of Herāt. This *Anwār-i Suhailī* was translated into Ottoman Turkish by ‘Abd al-Wāṣī’ ‘Alī Mollā ‘Alī Čelebi b. Šālih, known as ‘Alī Wāṣī’ or Šālih-zāde al-Rūmī with the title *Humāyūn-nāme* and dedicated to Sulṭān Sulaimān. ‘Othmān-zāde abbreviated the *Humāyūn-nāme* to about a third of its length. This version was printed in Constantinople in 1256 under the title *Thimār al-Asmār*. In the *Kulliyāt* this extract is entitled *Zubdet al-Naṣā’ih*.

The version of the *Naṣā’ih* (*Naṣiḥat*) *al-Mulūk* of Re’īs Efendi Sarf ‘Abd Allāh entitled *Talkhīṣ al-Ḥikam* is also described as a synopsis of the *Humāyūn-nāme*. A synopsis of the *Madjālīs al-Akhbār* of ‘Alī is also attributed to ‘Othmān-zāde.

(TH. MENZEL)

OTRĀR, a town on the right bank of the Sir Daryā (Saiḥūn), a little south of its

tributary the Aris. The name is found as a geographical term for the first time in Yāqūt (i. 310) as Uṭrār but Ṭabarī (iii. 815—816) already knows of a prince called Uṭrār-banda as a rebel vassal of the Caliph al-Ma’mūn. The place that Maḳdisī calls Tarār Zarākh (*B G A*, iii. 263, 274) in the district of Isbīdjab must be quite a different place. Otrār may perhaps be the same as the capital of the district of Fārāb [q. v.], a town which replaced the older one of Kadar (mentioned by Iṣṭakhri and Ibn Ḥawḳal) and called Fārāb by Maḳdisī (Bārāb on p. 273). The town of Otrār acquired a melancholy fame through the part it played at the time of Činghiz Khān’s invasion. It was then a frontier town of the empire of the Khwārizmshāh Muḥammad, who had captured it in 1210 from the Kara Khitāy. The town was at that time under the command of Tādj al-Din Bilkā Khān who was giving trouble to his new ruler. In 1218, there came to Otrār a great caravan of 450 people (Djuwainī), all Muslims, sent by the conquering Mongol to open up commercial and peaceful relations with the Muḥammadan empire. Detained at first by the commandant Inālčik, either because he thought they were spies or simply because he coveted their wealth, they were later all massacred and the commandant seized their merchandise. One source (Nasawī) throws upon the sulṭān a part of the responsibility for this deed; in any case when an ambassador came from Činghiz Khān to complain of the outrage and demand the surrender of Inālčik, he refused to hand him over and put the envoy to death. This made war inevitable. In 1219, Činghiz Khān appeared with a Mongol army on the Sir Daryā and laid siege to Otrār. The town was taken after several months’ siege and Inālčik was captured and sent to Karaḳorum to be executed. It was from Otrār that the Mongol armies set out which conquered the empire of the Khwārizmshāhs. Otrār still existed at the beginning of the xvth century for Timūr Lang died there in 1405 (‘Alī Yazdī, *Zafar-nāme*, ii. 646). The site of Otrār is now only indicated by ruins.

Bibliography: The massacre and capture of Otrār are narrated by the historians: al-Djuwainī, *Tārīkh-i Djihān-gushā*, in *G M S*, i. 61 sqq.; al-Djuzjdjānī, *Ṭabaḳāt-i Nāsiri*, ed. Nassau Lees, p. 272, 967; al-Nasawī, ed. Houdas, p. 34 sqq.; Ibn al-Aṭhīr, ed. Tornberg, xii. 239 sqq.; Rashīd al-Dīn, *Djāmi’ al-Tawārīkh*, vol. i. (ed. Berezin). — Cf. also the histories of the Mongols by d’Ohsson, von Hammer and Howorth, and W. Barthold, *Turkestan down to the Mongol Invasion*², in *G M S*, N. S., v. 177 and *passim* in the historical section; G. Le Strange, *The Lands of the Eastern Caliphate*, p. 485.

(J. H. KRAMERS)

OU DH (AWADH), a district now forming part of the United Provinces of modern India, has an area of 24,154 square miles and a population of 12,794,979, of which 11,870,266 are to be found in the rural districts (Census of India, 1931).

From very early times Oudh and the neighbouring countries of the great alluvial plain of northern India have been the peculiar home of Hindu civilization. The ancient Hindu kingdom of Kosala corresponded very nearly to the present province of Oudh. Its capital, Ayodhyā, the modern Ajodhyā on the river Gogrā, is supposed to have been the residence of Daṣaratha, the father of Rāma whose

exploits are recorded in the *Rāmāyana*. Here too arose a number of religious reactions against the sacerdotalism and the social exclusiveness of Brāhmanism.

Apart from plundering raids, such as Maḥmūd of Ghazni's attack upon Manaiç and the doubtful exploits of Sālār Mas'ūd Ghāzī recorded in the *Mir'at-i Mas'ūdī* of 'Abd al-Rahmān Cishtī, it was not until the last decade of the twelfth century, in the days of Kuṭb al-Dīn Aibak [see AIBEG], that the Muslim invaders established themselves in Oudh and annexed it to the Dihli Sulṭānate. It definitely formed a province of Muḥammad b. Tughluq's extensive empire, but, towards the close of the fourteenth century, it was absorbed by the Sharḳī kingdom of Džawnpūr [q. v.]. Under the Lodis [q. v.] it was once more part of the Sulṭānate.

In the days of Akbar [q. v.] it formed a *šūba* of his empire, extending from the Ganges on the south-west to the Gandak on the north-east, and from the river Sai in the south to the Tarai of Nepāl in the north. According to Abu 'l-Faḍl, it was divided into five sarkārs and thirty-eight parganas (*Ā'in-i Akbarī*, in *Bibliotheca Indica*, ii. 170—177 [tr. Jarrett], 1891). Local traditions in Oudh, however, conflict with the Muslim accounts and declare that the Rājput chiefs maintained their authority practically intact throughout the Mughal period (W. C. Bennett, *The Chief Clans of the Roy Bareilly District*, 1895). The weakness of the central government under Awrangzib's successors gave the nawābs of Oudh an opportunity of asserting their independence, although nominally they still acknowledged the authority of the Mughal emperor.

Sa'ādāt Khān Burhān al-Mulk, the real founder of the Oudh dynasty, was descended from a respectable Saiyid family of Nishāpūr (*Muntakhab al-Lubāb* of Khāfī Khān, ii. 902). During his nawābship (1722—1739) he both maintained internal order and extended his dominions so as to embrace Benares, Ghāzipūr, Džawnpūr and Čunār. His successor, Šafdar Džang (1739—1754), was appointed wazīr of the empire in the year 1748. It was he who invited the Marāṭhās to assist him against the Rohillas, the engagements entered into at that time forming the basis of later Marāṭhā claims on Rohilkhand. His son and successor, the nawāb-wazīr Shudjā' al-Dawla (1754—1775), came into conflict with the rising power of the English East India Company and was totally defeated at Baksar in 1764. This left Oudh at the disposal of the Company. By the treaty of Allāhābād (1765) Oudh was restored to Shudjā' al-Dawla with the exception of Kora and Allāhābād, which were given to the emperor for the upkeep of his dignity. British relations with this buffer state between Bengal and the Marāṭhās were placed on a firmer footing by the treaty of Benares (1773) which fixed the subsidy for British troops at 210,000 rupees a month. At the same time Kora and Allāhābād were sold to the ruler of Oudh for fifty lakhs of rupees, because the emperor had deserted the Company and surrendered these districts to the Marāṭhās.

The accession of the incapable Āsaf al-Dawla (1775—1797) enabled the hostile majority on Warren Hastings's council to raise the subsidy to 260,000 rupees per mensem and to force the new nawāb to cede Benares, Džawnpūr and Ghāzipūr in full sovereignty to the Company. At Čunār, in

1781, Hastings attempted to reform the wazīr's administration and to afford him relief by reducing the number of English troops in Oudh. His share in the resumption of the *džāgīrs* and in the sequestration of the treasures of the bēgams of Oudh formed one of the charges against him on impeachment.

In 1801 Lord Wellesley forced Sa'ādāt 'Alī Khān (1798—1814) to cede the whole of Rohilkhand and part of the Dōāb, the revenues of which were devoted to the payment of the subsidiary force. Sa'ādāt 'Alī Khān was succeeded by his eldest son, Ghāzī al-Dīn Ḥaidar, who was the first ruler of Oudh to assume the title of king. The remaining kings of Oudh were Nāṣir al-Dīn Ḥaidar (1827—1837), Muḥammad 'Alī Shāh (1837—1842), Amdjad 'Alī Shāh (1842—1847) and Wāḍjid 'Alī Shāh (1847—1856).

It was a provision of the treaty of 1801 that the ruler of Oudh should introduce into his country a system of administration conducive to the prosperity of his subjects and calculated to secure their lives and property. In spite of repeated warnings nothing was done and misgovernment continued unchecked. On these grounds Oudh was annexed by Lord Dalhousie in 1856. Wāḍjid 'Alī Shāh received a pension and was allowed to reside at Calcutta where he died in 1887, his title expiring with him.

On annexation Oudh was controlled by a Chief Commissioner, until, in 1877, both Agra and Oudh were placed under the same administrator, who was known as the Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh. The title of Chief Commissioner was dropped on the formation of the United Provinces of Agra and Oudh in 1902. It was not, however, until 1921 that this administration was raised to the status of a Governor's province.

The first land revenue settlement after annexation was carried out with a lack of consideration for the great taluqdārī families of the province, who were ousted from the greater part of their estates. This was reversed after the Mutiny when Canning reverted to a taluqdārī settlement and confirmed the rights of the taluqdārs by sanads.

To-day in Oudh Muḥammadans are to be found chiefly where they held sway in the past, their preference for urban life explaining their presence in the chief towns. Although the population is predominantly Hindu it is interesting to note that in the last decade Muslims have increased nearly twice as rapidly as Hindus. This is largely the result of social customs which permit Muslim widows to remarry and do not favour early marriages. Conversion has not affected these figures, for the *tabligh* movement on the part of Muslims was countered by the *shuddhī* and *sangathan* movements on the part of Hindus.

OUJDA (WADJDA), a town in Eastern Morocco, eight miles from the Algerian frontier in the southern part of the vast plain of Angad. It was founded in 384 (994) by ZIRI b. 'Aṭiya chief of the great Zenāta tribe of the Maghrāwa [q. v.]. We shall give a résumé of the events that led up to its foundation. In the course of the fighting between the Ṣanḥādja and the Zenāta, the latter had been driven towards the extreme Maghrib. Supporters of the Umayyads of Cordova, they had loyally defended their imperial policy in Barbary, especially in the time of the great minister Ibn Abi 'Āmir al-Manṣūr. ZIRI b. 'Aṭiya al-Maghrāwī, who had proved himself a particularly valuable ally, was allowed to occupy with his tribe the environs of Fās. He seized the opportunity to expel from the city the Banī Ifran, another family of the Zenāta who had established themselves there. Not however having full confidence in the Umayyad minister, of whose policy he disapproved, and not feeling secure in the vicinity of or in the town of Fās, and wishing to be in touch with the central Maghrib which was the real country of his tribe, he founded the town of Oudja and garrisoned it with his troops; he brought his possessions there and put one of his relatives in it as governor. The foresight of the founder was justified; in 424 (1033) the Banī Ifran having reoccupied Fās the emir Hammāma, one of the successors of ZIRI, took refuge in Oudja.

According to al-Bakrī, about the middle of the xth century (after 440 = 1048), a new quarter surrounded by a wall was added to the original nucleus by a chief of the Ourtaghnm (?). The great mosque was outside of the two towns.

During the period of Umayyad expansion Yūsuf b. Tāshfin occupied Oudja in 472 (1079). In the middle of the xiith century it became an Almohad town. In the reign of the Almohad al-Nāṣir, when the Banū Ghāniya, hoping to restore the power of the Almoravids, came from the south of Tunisia and extended their ravages into the region of Tlemcen, the fortifications of Oudja were repaired and strengthened (*Ḳirās*, p. 203; transl. p. 194).

It was however mainly after the installation of the 'Abd al-Wādids in Tlemcen [q. v.] that the town of Oudja "the bulwark of the frontier which separates the central from the extreme Maghrib" (Ibn Khaldūn) was summoned to play an important strategic part. Belonging to the kingdom of Tlemcen, it was the first place encountered by the Marinids of Fās when they invaded the lands of their hereditary enemies and the first victim of their attacks. In 670 (1271)

the Marinid Abū Yūsuf having defeated Yaghmurāsan, the king of Tlemcen, near Oudja, laid the town in ruins. In 695 (1296) the Marinid Abū Ya'qūb having fortified his own frontier town of Taurirt seized Oudja and destroyed its defences. In the following year he seems to have wished to make Oudja a base for his future expeditions. Herebuilt it; he erected a palace there, a citadel and a great mosque (probably that which still exists) and began the siege of Tlemcen which lasted eight years. In 714 (1314) the Marinid Abū Sa'īd delivered a fierce attack on Oudja which resisted and, presumably leaving troops in front of it to immobilise the garrison, he went on towards Tlemcen. In 735 (1335) Abū 'l-Ḥasan besieged Oudja: it was taken and the fortifications dismantled. In 772 (1371), Tlemcen being been occupied by the Marinids and Oudja being also in their hands, the Arab tribes of the region took the side of the dispossessed 'Abd al-Wādids and laid siege to the town.

If these Arabs, the Dhawi 'Ubaid Allāh of the great tribe of Ma'kil, were on this occasion supporting the cause of Tlemcen, it was not always so. They were for a long time on the side of the Marinids and were a serious danger to the 'Abd al-Wādids on whose frontiers they were.

The tribes of the region, Arab as well as Berber, were also closely involved in the fighting in the xvth down to the xixth century between the Turks of Algeria and the Moroccan sultāns. In the town itself there were clans which supported each side. Authority passed from one side to the other, but it was only a relative authority, enjoyed precariously and intermittently. "When peace reigned in the Maghrib and the sultān's orders were fully carried out, Oudja formed part of his empire; if on the other hand the country was troubled and the power of the sovereign weakened, Oudja went with the province of Tlemcen and belonged to the Turks" (Voinot). One of the few periods during which the authority of the shērīf was firmly established in this remote province was the reign of Mūlāy Ismā'īl (1082—1139 = 1672—1727), who brought to Oudja Arabs from the south of Marrākesh, formed them into a *djish* [q. v.], strengthened the defences of the town, built several *ḥaṣbas* around it and organised the tribes of the plain. After his death the country lapsed into insecurity and anarchy. The Turks reappeared. Finally in 1795, a Sherifin force again took possession of Oudja which henceforth remained under Moroccan rule. An 'āmil (governor) represented the sultān in it.

In 1844 after the battle of Isly, the town was temporarily occupied by the French as a punishment for the help given to 'Abd al-Ḳādir by the sultān. The French troops reappeared there in 1859 and finally occupied it in 1907.

Oudja, a town of old Morocco, where local government was non-existent had become a haunt of smugglers and fugitives from Algerian justice; it has been cleansed of all suspicious elements. The town, surrounded by its wall which however only dates from 1896, is surrounded by modern suburbs and beautiful gardens. The population is now about 30,000 of whom half are Europeans.

OXUS. [See ĀMŪ DARYĀ.]

P

PĀ' (*pe*); *bā'-i fārsī* or *bā'-i 'adjamī*: the *bā'* with three points subscript, invented for Persian as supplement to the soft Arabic *bā'* and to represent the hard labial. It is sometimes interchangeable with *bā'* (e. g. *asp* and *asb*, *dabir* and *dapīr*) and, more frequently, with *fā'* (e. g. *sapīd* and *safīd*, *Pārs* and *Fārs*). The regular use of the letter in manuscripts is comparatively modern, but it is found in good ones of the viii–xiii century while at the same time it is often omitted in manuscripts of much later date (*G. I. Ph.*, i/iv., p. 74).

(R. LEVY)

PĀDISHĀH, the name for Muslim rulers, especially emperors. The Persian term *pād-i shāh*, i. e. (according to M. Bittner in E. Oberhummer, *Die Türken und das Osmanische Reich*, Leipzig 1917, p. 105) "lord who is a royalty" in which the root *pad* is connected with Sanskrit *patis*, lord, husband, fem. *patni*, Greek *πόρνια*, *deo-pōria*, Lat. *potens* (G. Curtius, *Griech. Etymol.*, p. 377), was originally a title reserved exclusively for the sovereign, which in course of time and as a result of the long intercourse of the Ottomans with the states of the west also came to be approved for certain western rulers. In the correspondence of the Porte with the western powers, the grand vizier Kuyudju Murād Paşa (d. Aug. 5, 1612) probably for the first time applied the title *pādishāh* to the Austrian emperor Rudolf II. At the conference of Nemirow (1737) Russia demanded the title for its Czars (cf. J. v. Hammer, *G. O. R.*, vii. 488) and claimed it again at the negotiations at Bucharest (1773; cf. *ibid.*, viii. 412). When *pādishāh* came to be applied to the sultān, the *pādishāh-i ʿalī* 'Othmān, does not seem to be exactly known. In any case it is found in conjunction with all kinds of rhyming words as early as the beginning of the xvth century in Ottoman documents. *Pādishāh* therefore may have come to be used towards the end of the xvth century, presumably instead of *khunkār* (from *khudāwendkār*; cf. *J. A.*, ser. ii., vol. xv., p. 276 and 572), an obsolete word, as well as *sultān* (cf. *Isl.*, xi. 70) already found in dervish Sūfism, and was regularly used till the end of the sultānate (cf. the cry of *pādishāhimiz ʿok* or *biñ yaşa* with which the sultān was until quite lately greeted by his troops and subjects).

Horn, *Grundriss der neupersischen Etymologie*, Strassburg 1893, p. 61, N^o 266 (where however another derivation is given, from Old Persian *pad*, protector, and *shāh*, ruler; cf. thereon Horn, in *G. I. Ph.*, i/i. 274,

309 and i/ii. 41, 88, 97, 159, where the Old Persian, Pahlavi etc. forms are given).

(FRANZ BABINGER)

PADRI. "Padries" or "Padaries", also "Pedaries" is the name given in Dutch literature to the people who wished to carry through by force a reformation of Islām in the early decades of the xixth century in Minangkabau (Central Sumatra). In explanation of this expression it may be said that, according to one opinion, the word is connected with Pedir, a harbour on the north coast of Sumatra, while, according to another, it corresponds to the word *padri* (Port. *padre*) used in several Indonesian languages meaning "Christian clergyman", whether Roman Catholic or Protestant. The first derivation cannot be supported, but the second is probably correct. It may be that Malays, when asked by Dutchmen after the troubles, accommodated themselves to the linguistic level of the interrogators by designating the instigators as *padri* as they laid special stress on the religious life. Such a case would not be unique in dealings of Dutchmen with natives. The Dutchmen then adopted the word and retained it; it also occurs sometimes as *pidari* in native sources. The usual native name however for the people called *padri* by us was *urang putih*—"white men", a common term among Indonesian peoples for those who take their religious duties with particular seriousness and are distinguished by their white robes (van Ronkel, in *Indische Gids*, 1915, ii. 1103). In the official reports and Dutch colonial literature of the time, those who did not join the Padris are called "Malays", a misleading designation as the Padris were also Malays. Padris and non-Padris were of the same stock. A better name for those who held by the old customs is the "Adat party"; they formed the party who on every occasion tried to base their action on the traditional usage.

The Minangkabauans or Minangkabau Malays inhabit the central Sumatran highlands between about 1/2° N. lat. and 1/2° S. lat. From this mountainous country they have extended eastwards over the highlands which form the transition to the eastern Sumatran lowlands. To the west they reached the coast of the Indian ocean. Here there are several harbours which gave a connection with the outer world. It is generally supposed that the country was converted to Islām from Atjeh. The Atjehnese held several points on the coast when the Dutch and English Trading Companies established themselves here.

Islām was firmly established in the country when the activity of the Padris began. There was a burning zeal for the faith, in certain circles at

least. In 1785, a spiritual leader came down from the mountains with some thousands of followers and disciples in order to circumcise the Christian population of the port of Padang, then the principle possession of the Dutch, and force them to adopt Islām (*T. B. G. K. W.*, v. 55). The Minangkabauans managed to combine a strongly Muḥammadan outlook with the retention on a large scale of their old popular institutions. Matriarchy still prevails among them. The administration of a village is conducted by the leading heads of families, the various *suku*, i.e. union of families of different descent in common council. The form of government is republican. Every matter of any importance is considered by all the prominent families, their chiefs and other leading men (*mupakè'*, Ar. *muwāḩaka*). It is a wearisome process, not calculated for speedy decisions. A society organised on these lines is naturally at a disadvantage against vigorous and powerful attacks.

In the beginning of the sixth century three Minangkabau pilgrims came home. They had seen Wāḩḩābī rule in Mecca (after 1806). Filled with the puritan zeal of the Wāḩḩābīs, they set out to purify the religion of their own land. They were able to win over to their views a prominent theologian of the central district of Agam named Tuanku nan Rëntjèh (*tuanku* is a title for a theologian). He at once set to work. He first of all insisted on the exact observance of the law, particularly in ceremonial. Popular customs which in his opinion were contrary to the *shari'a* were attacked, such as cock-fighting, which was associated with betting and was the most popular pastime of the people, dice, drinking of palm-wine, opium-smoking, betel-chewing, filing the teeth, wearing long nails, smoking tobacco. All these were forbidden. The prohibition of interest was insisted upon. The men were to cut their hair, let the beard grow and wear white clothes in the Arab style. The women were to wear veils. Finally the Padris dealt a blow to the matriachal institutions by taking their women into their houses with them (de Stuers, i. 183, footnote 3). The prohibition of tobacco seems to be directly taken from Wāḩḩābī practice, while the other prohibitions and commands all find a place in the Shāfi'i school. It is also evident from Tuanku nan Rëntjèh's attitude that he did not intend to institute Wāḩḩābism. In the same district of Agam lived a highly respected and very influential teacher: Tuanku Kotā tuā; he was *guru tarikat* (Ar. *ṭarīqa*), a master of mysticism; to what order he belonged is not known. Mysticism of a popular kind is much cultivated in Minangkabau; Tuanku nan Rëntjèh turned to him, not to quarrel with him but to seek his cooperation. The Tuanku Kotā tuā agreed that a strict observance of the law should be aimed at; but when Tuanku nan Rëntjèh insisted that if any one did not perform the *ṣalāt* correctly he was a *murtadd* and was liable to the penalty of death as *ḥadd*, Tuanku Kotā tuā met him with the milder doctrine that the *murtadd* should not be put to death, unless every effort to bring him to the true faith had failed, a case which however did not exist and was not to be expected. Tuanku nan Rëntjèh now went his own way. After the Minangkabau custom, he summoned an assembly which was to approve his views. He met with enthusiastic approval from the theologians but with opposition from the chiefs;

for the latter recognised at once that the Padri demands attacked their positions and would overthrow the whole social system. Tuanku nan Rëntjèh went vigorously forward. With his own hand he stabbed his mother's sister whom he caught smoking: the body was thrown into the forest and not allowed to be buried. The effect was considerable; his followers applauded the deed, his silent or open enemies shrank back; he who had done such an unprecedented thing as not to heed the bonds of blood must be acting under a higher inspiration: it was not cruelty but self-sacrifice; the reformation went on with fanatical zeal. Whoever omitted a *ṣalāt* had to pay a fine; for a second offence the punishment was death. Opponents were overcome by force, their villages burned, themselves killed or made slaves or at least made to pay an indemnity. Soon the greater part of Agam and of the district of Tuanku Kotā tuā were in his power. Several villages which had already yielded to pressure and adopted the stricter teaching of Tuanku Kotā tuā were also plundered and burned. In the end the doings of his followers were too much for the leader and he retired after about eight years. It was only at a later date when the Dutch troops entered the country that he again placed himself at the head of the movement. He died in 1832.

The procedure adopted by Tuanku nan Rëntjèh was as follows: after a village had been taken, he appointed on his own authority an *imām* and a *kali* (Ar. *ḩaḩī*); the former was head of the mosque and had control of all religious matters; the sphere of activity of the *kali* is not quite clear. In any case, this proceeding was revolutionary; by constitutional law the offices were hereditary with certain limitations; important decisions could only be made by *mupakè'* (see above).

Another teacher, Tuanku Pasaman, also called Tuanku Lintau, was active in the south east in the district of Lintau. Less well known than Tuanku nan Rëntjèh he in no way yielded to him in fanatical ardour. Lintau was soon in his power. He then entered the adjoining territory of Tanah Data(r). Here in the old capital lived in the faded glory of their former greatness the descendants of the royal house of Minangkabau. Well led, their power might have resulted in a restoration of their former greatness. Tuanku Lintau had them all murdered, except one who escaped across the frontier. Burning and murdering, he brought the whole land under his rule.

A third centre of Padri activity was Alahan-pandjang in the north. The movement began here at the same time as in Agam and Lintau. Very soon there came to the front here a man who is best known by his later name of Tuanku Imām, first as an adviser and then as the leading figure. We possess exceptionally a native source for the life and deeds of this important figure. Quite recently a Malay work, a kind of biography written by one of his sons, has been discovered and published (see Ronkel, *Indische Gids*, 1915). The Padris of Alahanpandjang began by building a fortress which they called Bondjol. Here the strict doctrine was observed and it was the central position of their power from which they sent out expeditions in all directions. Invited by sympathisers they would go to a village, subject it, appoint a *kali* and *imām*, as Tuanku nan Rëntjèh did, and return to Bondjol with rich booty. The bio-

graphy relates that campaigns were undertaken at intervals of about a year. This was the period of Tuanku Imam's rise to be *imām* "for in many matters he was *imām*, *imām* in religion, *imām* in all matters requiring intelligence and reflection so that all quarrels and disputes were finally brought to him". — Four men were sent to Mecca to guarantee the purity of the doctrine. After a long time they returned, even more strict. There was not yet regular spiritual intercourse with Mecca. Pilgrims were very few in number.

As soon as the Padris had overcome or driven away the supporters of the Adat, the latter tried to involve the English who had occupied Padang in 1795 in their agitation, but they could get no help from them. It was not till 1818 that the first post was established in the highlands by Sir Stamford Raffles. But its weak garrison could effect nothing; it was attacked by the Padris but without success. When in 1819 Padang was again handed over to the Dutch, they maintained and strengthened this post. In 1822 the offensive was assumed and lasted with some interruptions for 15 years. The Dutch colonial government troops were as a rule superior to the natives in the fighting but the attacks of the latter were continually resumed. Finally in 1832 all activity by the Padris stopped. Tuanku Imam, who had till then held out in Bondjol, surrendered. He then secretly prepared a rising which broke out in the beginning of 1833. The Dutch colonial troops who were distributed in small detachments over the entire country were almost wiped out. It soon became clear that members of the party who had invited the foreigners into the country were on the side of the Padris. Historians have shown that errors of policy by the military leaders and the not always tactful conduct of officers and men contributed to produce this misfortune. The truth of this cannot be disputed, but it should be pointed out to explain the altered attitude of many Malays that the very strict rules laid down by the Padris of the early period had become less rigid in course of time. The strength of the movement had been weakened by internal quarrels. Tuanku Kotā tuā, at one time attacked by Tuanku nan Rēntjēh's successors, was revered as a saint in 1827, soon after his death. Padri and non-Padri made pilgrimages to his tomb. With the presence of the Dutch-Indian troops the Padris could no longer deal so harshly and arbitrarily with their fellow-countrymen. Their popularity had increased. It is said in the biography of Tuanku Imam of Bondjol, the bulwark of extremism: "the country was governed according to the *shari'at*; the tribal chiefs relied upon it; when disputes arose the matter was brought before the four legists, in matters of common law however, the decision was left to the chiefs". Tuanku Imam a little later told his son: "the authority of the common law shall be recognised by you, and follow as faithfully as possible the *adat*!" [q. v.]. During the pauses in the siege of Bondjol the Padris used to exchange tobacco with the soldiers; Padri and non-Padri had drawn nearer to one another. When the Padris summoned their compatriots to fight against the unbelievers, the appeal found an echo in wide circles.

After the rising the colonial troops again assumed the offensive. Gradually the conquerors enforced their authority. Only the Padris of Bondjol still resisted, they now formed the war party; any one

of like views joined them. When the fortress was finally stormed in 1837, the Padri movement came to an end. Tuanku Imam finally surrendered and was banished.

The object which the Padris had originally aimed at was not attained; the matriarchal institutions still survived. If the movement had exerted any influence at all, it was in the direction of a more accurate and general observance of the law especially of ceremonial. Nothing very definite can be said about it. We have no information about the situation in the country before the rise of the Padris. The movement can hardly have passed without leaving any trace at all.

PAHANG. [See MALAY PENINSULA.]

PĀĪ (Hind.), anglicé pie, the smallest copper coin of British India = $\frac{1}{12}$ of an anna. Originally, in the East India Company's early experiments for a copper coinage, the pie as its name implies, was the quarter of an anna or pice [cf. PAISĀ]; since the Acts of 1835, 1844 and 1870, however, the pie has been $\frac{1}{3}$ of a pice. (J. ALLAN)

PAISĀ (Hind.), anglicé pice, a copper coin of British India = 3 pies or $\frac{1}{4}$ anna. Under the Moghuls the name *paisā* became applied to the older *dām*, introduced by Shēr Shāh, 40 of which went to the rupee, as the unit of copper currency; the name found on the coins however is usually simply *fulūs* or *rewānī*. Paisā is the general name for the extensive copper coinage coined in the xviiith and xixth centuries by the numerous native states which arose out of the Moghul empire (cf. J. Prinsep, *Useful Tables*, ed. E. Thomas, London 1858, p. 62 sq.). (J. ALLAN)

PĀLĀHENG, PĀLHENG (P.), lit. string, rope, halter, cord, is applied to the cord worn by dervishes around the neck, at the end of which hangs a many-rayed star of carnelian, the size of a crown piece, called *teslīm tash*, which is given to the young dervish at the end of his discipleship. With some, especially the Bektashī dervishes [cf. BEKTASHĪ], a number of olive-shaped, whitish-grey, transparent stones are strung on the cord; these are found in Mesopotamia and called *dürr-i Nedjef* ("Pearls of Nedjef"). The jasper (Turkish *yeshem*) from which the *teslīm* stones of the Bektashī monks are made is said to be found in the neighbourhood of the tomb of Hādjdjī Bektash.

PĀLANPŪR, a Muslim state in India now included in the Western India States Agency. The territory incorporated in this agency includes the area formerly known as Kāthiāwār together with the Cutch and Pālanpūr agencies. Its creation in October 1924, marked the end of the political control of the Government of Bombay and the beginning of direct relations with the Government of India. The old Pālanpūr Agency with its headquarters at the town of Pālanpūr was a group of states in Guḍjarāt [q. v.] lying between 23° 25' and 24° 41' N. and 71° 16' and 71° 46' E. It was bounded on the north by the Rājput states of Udaipur and Sirohi; on the east by the Mahi Kāntha Agency; on the south by the state of Barōda and Kāthiāwār; and on the west by the Rann of Cutch.

The state of Pālanpūr was conquered towards the end of the sixteenth century by Lohāni Pathāns, subsequently known as Dīhāloris. A short account of its history under the Mughal emperors will be found in the *Gazetteer of Bombay*, v. 318—324, and in the *Mirāt-i Ahmadi* (Ethé, No. 3599, fol. 741). British relations with this state date back to the year 1809, when, through British influence, arrangements were made for the payment of tribute to the Gaekwar of Barōda (Aitchison, vi., lxxxix.). This engagement was further strengthened by an agreement signed on November 28, 1817 (*op. cit.*, xci.). In 1848, the appointment of agent from the Gaekwar was abolished and the finances of the state remained under British supervision until 1874 when the ruler of Pālanpūr was entrusted with the management of his own finances.

Pālanpūr is still ruled by Lohāni Pathāns. It has a population of 264,179, of whom 245,000 speak Guḍjarātī. The distribution of population according to religion is as follows: Hindus, 222,714; Muḥammadans, 28,690 and Jains, 12,542.

(C. COLLIN DAVIES)

PALMYRA, Tadmur, now Tudmur, the ancient Tadmor, called Palmyra by the Greeks (probably a corruption of the older name by a popular etymology; cf. Hommel, in *Z.D.M.G.*, xlv. 547; M. Hartmann, in *Z.D.P.V.*, xx/ji. 128 sqq.) lies northeast of Damascus in the great desert in an oasis watered by two springs. The water is sulphurous but drinkable after it has settled. The climate is unfavourable, having great differences of temperature between day and night and being unbearably hot in summer and sometimes having snow in winter. What it lacked in climatic conditions was compensated for by its situation which made Tadmur an important junction on the caravan routes connecting east and west, notably that from the Euphrates to Damascus. The natural supposition that the place was already of importance and settled in very early times has been confirmed by several inscriptions of Tiglat-Pileser I of the xiii

century B.C. because the "town of Tadmur in the land of Amurru", which the Assyrian king mentions, can hardly be anywhere else (R. Meissner, in *O. L. Z.*, 1923, p. 157; Dhorme, in *R. B.*, 1924, p. 106). Otherwise the city is not mentioned till shortly before the beginning of the Christian era and in the Old Testament only in a peculiar *quid pro quo*. While in I Kings ix. 18 in the accepted text it is said that Solomon built Tamar (in southern Palestine) among other towns, the Chronicler (ii. 8, 4) followed by the variants and by Josephus, *Archaeology*, viii. 6, 1, gives Tadmor instead. From this it appears that the latter in his time must have been of some fame and size and also that the later widely known legend according to which Solomon built the wonderful city, was already in existence. This story was known at a later date to the Arabs among whom it was related, in keeping with the fantastic elaboration of the legend of Solomon, that the djinn helped the king in the work (cf. Nābigha, v. 22 sq.; Bakri, ed. Wüstenfeld, p. 514 and several of the Arab geographers mentioned below; according to Ibn al-Athīr, ed. Tornberg, i. 166 the queen Bilqis visited Solomon in Tadmur and is buried there).

Its incorporation in the Roman empire was of the greatest importance for Palmyra. Its already busy trade increased enormously and great wealth poured into the town, surrounded by the dreary desert (on the roads connecting Palmyra with the outer world see Dussaud, *Topographie historique de la Syrie antique et médiévale*, 1927, p. 248—270). From this period dates the brief but accurate account of Palmyra by Pliny (*Hist. nat.*, v. 25). The merchants were able cleverly to use the enmity between Rome and Parthia for their own advantage, and the conditions, when the emperor Hadrian, by the clever stroke of policy of leaving Assyria and Mesopotamia to the Parthians, inaugurated a long period of peace, contributed still more to the prosperity of the town. The customs tariff of the year 136 written in Aramaic and Greek gives a vivid picture of the business life of the Palmyrene republic in this period, while the splendid ruins of the temple of the sun and of several other fine buildings show how highly developed was the artistic sense of its citizens under Greek influence. In the third century, further prospects opened up which induced the Palmyrenes for a brief period to dream of a new power in the east with their city as its centre. At the beginning of the third century arose the new Persian dynasty of the Sāsānians which revived the ancient bitter feud with the Romans so that the Palmyrenes again had an opportunity to use their diplomatic ability. The Palmyrene prince Odenathus (Udhaina) II at first wanted to join the Persians under Shāpūr (241—272) but, when his offer was rejected, he joined the Roman general Ballista in Asia Minor and inflicted a heavy defeat on the retreating Persians. Under Gallienus he became the actual ruler of the whole of the east and was given the title Augustus by the emperor. When in 266—267 he was murdered, his dignity passed to his son Vaballathus, but the real power was in the hands of his widow Zenobia (Zainab), a highly gifted lady who extended her kingdom, notably by the conquest of Egypt. This was done with the approval of the emperor Aurelian, but Palmyra soon rebelled against the Romans and in 270 a battle was fought in which Zenobia was

defeated. Palmyra then surrendered. When it rebelled again, Aurelian had the city with its fine buildings destroyed. Zenobia fled, was captured and brought to Rome. This queen, distinguished alike for her beauty and intellect, made a great impression on her contemporaries and her memory survived among the Arabs under the name of al-Zabbā' although only in fabulous tales in which little of history remains. She is said to have enticed the Arab king *Djadhīma* [q. v. and the article *ḤĪRA*] to her and then killed him by opening his arteries. His nephew 'Amr b. 'Adī wished to evade his obligation as avenger of blood but was forced by the cunning *Qaṣīr* to do so and when the latter by stratagem got the cunning queen in his power, she took poison which she always carried in a ring she wore, in order not to be put to death by him.

With the fall of Zenobia, Palmyra lost its importance. The walls however were rebuilt although not on the former scale but the trade, the source of the town's livelihood, began to dry up. In this period Christianity began to spread in the town; bishops are mentioned and Justinian among others built a church there. Palmyra remained under Roman rule for about 3½ centuries until the Arab conquest put an end to it. When *Khalīd* b. al-Walid approached the town on his celebrated campaign, the inhabitants thought of defending the town against him but abandoned the idea and capitulated voluntarily in order to secure the status of *dhimmis* [q. v.]; they seem however to have rebelled again for it was only when Yazīd sent *Dihya* against it, after the taking of Damascus, that it was finally subjected.

Palmyra never regained its former prosperity under Muslim rule. It was inhabited mainly by Kalbis and was one of the towns which rebelled against Marwān II who set out with an army against it. An agreement was come to however, but according to Ibn al-Faḳīh (298 = 902), Marwān had a part of the walls destroyed. According to the legend, he abandoned the idea of destroying the town completely when he came upon the corpse of a richly dressed woman on whose forehead was a plate of gold with an inscription warning him against doing so.

Several Arab geographers mention Tadmur but very briefly. Some of them speak of the wonderful buildings and ruins, and as a rule they repeat the old legend that the town was built by Solomon with the help of the djinn. *Yāqūt* makes the intelligent observation that people are everywhere inclined to attribute great buildings to this king. The terrible earthquake of 1157 affected Palmyra. Benjamin of Tudela (1173) makes the rather remarkable statement that no fewer than 2,000 Jews able to bear arms lived in the town. *Dimishki* mentions along with incomparable ruins the *djāmi'* the roof of which was formed of 15 stones. The strong citadel of *Kal'at al-M'an* north of the town is ascribed by the inhabitants to the famous Druse king *Fakhr al-Din* [q. v.] but this is doubtful. Palmyra disappeared in the period of great decline in the east; its inhabitants finally lived in a wretched village built on the court of the temple of the sun, quite forgotten by the west. Not till 1678 was the once so famous city again discovered by members of the English factory at Aleppo and in 1751 it was more closely explored by Robert Wood and described in a handsome

volume. When traffic began to revive again, Palmyra resumed its importance as a station on the caravan routes and in quite recent times new life has been given it by the motors, the new means of transit across the desert; these give a rapid and comfortable connection between Palmyra and the cities of east and west.

PAMPELUNA, Sp. PAMPLONA, Ar. BANBALŪNA, a town in the north of Spain, capital of the province of Navarre, has at the present day about 30,000 inhabitants. It was conquered by the Arabs in 121 (738) during the rule of the *wālī* 'Oḳba b. al-Ḥadīdjādī. But the occupation of the town and its territory was of very short duration. It soon became the capital of the province of Navarre when Garcia Iñigo tried to found a small independent state; later at the beginning of the tenth century, it was the capital of the first king of Navarre, Sancho Abarca. Several expeditions were sent against Pampeluna by the Umayyad emirs of Cordova, in 228 (843), 246 (860), and in 260 (874). 'Abd al-Raḥmān III succeeded in taking it for a time in 312 (924) in the course of his campaign against Navarre and destroyed it. Other attempts against Pampeluna were made by the Muslims in 322 (934) and during the rule of the two 'Āmirid ḥadībs al-Manṣūr [q. v.] and al-Muẓaffar [q. v.]

(E. LÉVI-PROVENÇAL)

PANDJĀB, the land of the five rivers, is a province of modern India which, together with the North-West Frontier Province and *Kashmīr* [q. v.], occupies the extreme north-western corner of the Indian Empire, and, with the exception of

the recently-constituted Delhi province, comprises all of British India north of Sind and Rājipūtāna and west of the river Djamna. Geographically therefore it includes more than its name implies, for, in addition to the country watered by the Djhelum, Čināb, Rāwī, Beās, and Satleđj, it embraces the table-land of Sirhind between the Satleđj and Djamna, the Sind-Sāgar Dōab between the Satleđj and the Indus, and the district of Dera Ghāzi Khān.

Administratively the province is divided into two parts, British territory and the Pandjāb States. British territory, which has an area of 99,265 square miles and a population of 23,580,852, is divided into 29 districts, each administered by a deputy-commissioner. These districts are grouped into the five divisions of Ambāla, Džullundur, Lahore, Rāwalpindi, and Multān, each under a commissioner. The Pandjāb States have an area of 37,699 square miles and a population of 4,910,005. The conduct of political relations with Dudžānā, Patawdi, Kalsia, and the 27 Simla Hill States is in the hands of the Pandjāb Government. The remaining states of Lohāra, Sirmūr, Bilaspūr, Mandi, Suket, Kapurthālā, Malēr-Kōtla, Faridkōt, Čambā, Bahāwalpūr, and the Phūlkian states of Pattialā, Džind, and Nabhā, are directly under the Government of India.

The history of this area has been profoundly influenced by the fact that the mountain passes of the north-west frontier afford access to the Pandjāb plains. For this reason it is ethnologically more nearly allied to Central Asia than to India. The recent excavations at Harappa in the Montgomery district are evidence of a culture which probably flourished in the Indus valley about 3000 B.C., and which bears a general resemblance to that of Elam and Mesopotamia (Sir John Marshall, *Mohenjo-Daro and the Indus Civilization*, 3 vols., 1931). But the first migration of which we have any evidence is that of the Aryan-speaking peoples who established themselves on the Pandjāb plains in pre-historic times. Centuries later successive waves of invaders swept like devastating torrents through the mountain passes of the north-west. Persian, Greek, and Afghān, the forces of Alexander and the armies of Maḥmūd of Ghazni, the hosts of Timūr, Bābur, and Nādir Shāh, and the troops of Aḥmad Shāh Durrānī [cf. these articles], all advanced by these routes to lay waste the fertile plains of the Pandjāb. All these migrations and invasions added to the heterogeneity of the existing population in the land of the five rivers. The history of invasions from Central Asia proves that the Pandjāb and the frontier zone from the banks of the Indus to the Afghān slopes of the Sulaimān range have never presented any real barrier to an enterprising general. The Sulaimān range itself has seldom formed a political boundary, for the Persians, Mauryas, Graeco-Bactrians, Sakas, Pahlawas, the Kushān branch of the Yüeh-ti, and the Hūnas all bestrode this mountain barrier.

The capture of Multān [q.v.] by Muḥammad b. Qāsim [q.v.], in 713 A.D., extended Arab power to upper Sind and the lower Pandjāb, but the real threat to Hindustān came from the direction of modern Afghānistān. The Ghaznawid invaders found the powerful Hindūshāhiya dynasty of Waihand ruling between Lamaghān and the Čināb. The power of this Hindu state was completely shattered by Maḥmūd of Ghazni who annexed the Pandjāb, which became a frontier province of his

extensive empire and the sole refuge of his descendants when driven out of Ghazni by the Shansabānī sultāns of Ghōr [see GHŌRIDS]. Multān and the surrounding country had remained in Muslim hands since the days of the Arab conquest, but the fact that its rulers were heretical Karmatians [q.v.] was one reason for Maḥmūd's attack in 1006 A.D. Muḥammad Ghōrī annexed the Pandjāb in 1186 A.D. and on his death in 1206 A.D. it definitely became a province of the Sultānate of Dihli under the rule of Kuṭb al-Dīn Aibak. With the exception of occasional rebellions and raids from Central Asia it remained under the Sultāns of Dihli until the defeat of Ibrāhīm Lodi [q.v.] by Babur at Pānipat [q.v.] in 1526 A.D. paved the way for the foundation of the Mughal empire. Under Akbar [q.v.] the modern province of the Pandjāb was included in the *sūbas* of Lahōr, Multān, and Dihli, a detailed description of which will be found in the *Āin-i Akbari* (transl. Jarrett, ii. 278-341).

The persecuting policy of Akbar's immediate successors led to the growth of Sikh political power in the Pandjāb and transformed a band of religious devotees, founded by Guru Nānak in the second half of the fifteenth century, into a military commonwealth or Khālṣa animated with undying hatred toward Muslims [cf. the art. SIKHS]. The weakness of the central government and the unprotected condition of the frontier provinces under the later Mughals exposed Hindustān to the invasions of Nādir Shāh [q.v.] and Aḥmad Shāh Durrānī [q.v.]. On the bloodstained field of Pānipat, in 1761, the Marāṭhās, who were aspiring to universal sovereignty, sustained a crushing defeat at the hands of the Afghān invader. In the following year, at Barnāla near Ludhiāna, Aḥmad Shāh disastrously defeated the Sikhs who had taken advantage of his absence in Kābul to possess themselves of the country around Lahore. The Sikhs, however, soon extended their sway to the south of the Satleđj and ravaged the country to the very gates of Dihli, but their further advance was checked by the Marāṭhās who had rapidly recovered from their defeat at Pānipat. It was the defeat of the Marāṭhās by Lord Lake, in 1803, which facilitated the rise of Randjit Singh and enabled him to found a powerful Sikh kingdom in the Pandjāb. His attempts to extend his authority over his co-religionists, the cis-Satleđj Sikhs, brought him into contact with the British, and, by the treaty of 1809, he pledged himself to regard the Satleđj as the north-west frontier of the British dominions in India (Aitchison, viii., N^o. liii.). After the death of Randjit Singh, in 1839, his kingdom rapidly fell to pieces under his successors. Revolution succeeded revolution, and during the minority of Dalip Singh the Khālṣa soldiery became virtually rulers of the country. Unprovoked aggression on British territory produced two Sikh wars which ended with the annexation of the Pandjāb in 1849.

At first the newly-conquered territories were placed under a Board of Administration. This was abolished in 1853, its powers and functions being vested in a Chief Commissioner. In 1859, after the transfer of the Dihli territory from the North-Western (now the United) Provinces, the Pandjāb and its dependencies were formed into a Lieutenant-Governorship.

The annexation of the Pandjāb by advancing the British administrative boundary across the Indus

brought the Government of India into closer contact with the Pathān tribes of the north-west frontier and the Amir of Afghānistān [q. v.]. Because this frontier was too long and too mountainous to admit of its being defended by the military alone, much depended upon the political management of the tribes. At first there was no special agency for dealing with the tribal tracts, and relations with the tribesmen were conducted by the deputy-commissioners of the six districts of Hazāra, Peshāwar, Kohāt, Bannu, Dera Ismā'il Khān, and Dera Ghāzi Khān. In 1876, the three northern districts formed the commissionership of Peshāwar, the three southern ones that of the Deradjāt. The system of political agencies was not adopted until 1878, when a special officer was appointed for the Khyber during the Second Afghān War. Kurram became an agency in 1892, while the three remaining agencies of the Malakand, Tochi, and Wāna were created between 1895 and 1896. The Malakand was placed under the direct control of the Government of India from the outset, all the other agencies remaining under the Pandjāb Government. This was the arrangement until the creation of the North-West Frontier Province in 1901.

The Pandjāb attained its present dimensions in 1911 when Dihli became a separate province. It was not however until 1921 that it was raised to the status of a governor's province. To-day it contains 14,930,000 Muhammadans, 8,600,000 Hindus, and 4,072,000 Sikhs. Unfortunately the spirit of communal antagonism has been fanned in the province by the activities of the *tanẓīm*, *ishā'at-i Islām*, and *tabligh* movements organized by Muslims for the purpose of combating the proselytizing activities of the Hindu community known as the *shuddhi* movement. In 1926 Swami Shardhanand, a leader of the *shuddhi* movement, was murdered in Dihli by a Muslim. Communal relations were further embittered by the murder in Lahore of a Hindu bookseller who had published a libellous attack on the character of the Prophet of Islām in his book entitled the *Rangila Rasul*. Far more serious than this communal strife were the political disturbances culminating in the Djalīanwāla Bagh incident of 1919 (Sir M. O'Dwyer, *India As I Knew It, 1885—1925*).

At least 90 per cent. of the total population live in villages and 60 per cent. is supported by agriculture, for the Pandjāb is a country of peasant proprietors. But the bulk of the cultivators are born in debt, live in debt, and die in debt. Almost the whole of this money has been advanced by Hindus and Sikhs who are not debarred by religion from the taking of interest, but, unfortunately, well over half of this debt has been incurred by Muhammadans. No community can hope to thrive under so great a handicap and some organization to combat this evil is essential to the prosperity of the Muhammadan community.

PANDJDIH, (PENDJDEH) a village in the Turkoman republic of the U. S. S. R., situated to the east of the Kushk river near its junction with the Murghāb at Pul-i Kishṭi. The fact that the inhabitants of this area, the Sarik Turkomans, were divided into five sections, the Suktis, Harzagis, Khurāsānlis, Bairač, and the 'Alī Shāh, has been put forward as a possible explanation of the origin of the name Pendjdeh, but it carries no weight as the Sariks were only nineteenth century immigrants whereas the name was in use in the fifteenth century.

This obscure oasis owes a somewhat melancholy importance to the "Pendjdeh Incident" of 1885, when an Afghān force suffered heavy losses in an engagement with Russian troops. History proves that an ill-defined boundary is a potential cause of war. It was a knowledge of this and the Russian occupation of Merw, in 1884, that gave the necessary impetus to negotiations which ended in the appointment of an Anglo-Russian Boundary Commission for the delimitation and demarcation of the northern boundary of Afghānistān. Trouble immediately arose in this quarter for while the Russians contended that the inhabitants of Pendjdeh were independent the British held the view that they were subjects of the Amir of Afghānistān. According to the British, the district of Pendjdeh, which comprised the country between the Kushk and Murghāb rivers from the Band-i Nadir to Ak Tepé, together with the rest of Badghis, formed part of the Herāt province of Afghānistān. During the first quarter of the nineteenth century Pendjdeh had been occupied by Djamshidis and Hazaras. Towards the end of this period some Turkomans of the Ersari tribe, whose settlements were scattered along the banks of the Oxus between the Čardjui and Balkh, moved to Pendjdeh and obtained permission to settle there. Salor Turkomans had also settled in this area. About 1857 the Ersaris migrated from the oasis of Pendjdeh and soon afterwards the Sarik Turkomans, forced southwards by their more powerful neighbours, the Tekkés, occupied Yulatan and Pendjdeh and compelled the Salor families to migrate elsewhere. Although, therefore, Pendjdeh had from time to time been occupied by various tribes, they had all, whether Djamshidis, Hazaras, Ersaris, Salors or Sariks, acknowledged they were on Afghān soil and paid tribute to the *nāib* or deputy of the Afghān governor of Herāt. The Sarik Turkomans had even supplied the Amir with troops. The British therefore contended that the district of Badghis, of which Pendjdeh formed a part, had long been under Afghān rule (Foreign Office MSS. 65, 1205).

The Russians on the other hand contended that

the people of this oasis had always enjoyed independence. Lessar, a Russian engineer, who visited Pendjeh in March 1884, discovered no trace of Afghān authority, but a Russian doctor, named Regel, who visited it in June of the same year reported the presence of an Afghān detachment. In their opinion therefore Pendjeh had only recently been occupied by Afghān troops.

The fact that the Afghāns had not permanently garrisoned this area was no proof of its independence. On the contrary, it was only natural that, after the Russian occupation of Merw and Pul-i Khatun, 'Abd al-Rahmān Khān should have taken steps to indicate his sovereign rights over this area. When, therefore, an Afghān garrison occupied Pendjeh, the Russian Government immediately protested and disputed the Amīr's claim to the territory. While negotiations were taking place between London and St. Petersburg events moved swiftly on the frontiers of Afghānistān. On March 29, 1885, General Komarov sent an ultimatum demanding the withdrawal of the Afghān garrison. The Afghāns resolutely refused to withdraw whereupon the Russians attacked them driving them across the Pul-i Kishti with the loss of some 900 men. It must be admitted that the posting of Afghān troops in Pendjeh, and the Russian advance to Yulatan on the Murghāb and to Pul-i Khatun on the Hari Rūd, were regrettable actions almost certain to precipitate war. The whole incident should have been avoided, but the confusing reports of Lumsden, the British Commissioner, to the Foreign Office, and the delay of Zelenoi, the Russian Commissioner, in arriving at Sarakhs complicated matters still more.

At the time this incident seemed likely to embroil Russia and Britain in war, but, fortunately, the good sense of the Amīr, who was at this critical moment on a visit to the Viceroy, and the diplomatic skill of Lord Dufferin prevented this, for even the pacific Mr. Gladstone had proposed to Parliament that £11,000,000 should be expended on preparations for war.

It was finally agreed that Pendjeh should be handed over to Russia in exchange for Dhu'l-Fiḳār, and by the year 1886 the northern boundary of Afghānistān had been demarcated from Dhu'l-Fiḳār to the meridian of Dukṭi within forty miles of the Oxus. After a dispute as to the exact point at which the boundary line should meet the Oxus, the process of demarcation was completed in 1888. This recognition of a definite frontier between Russia and Afghānistān led to a decided improvement in the Central Asian question.

(C. COLLIN DAVIES)

PANGULU (Jav.), *panghulu* (Sund.), *pangòlò* (Madur.), literally "headman, director" used in the east Indian Archipelago as the name for secular and religious chief administrators, in the islands of Java and Madura the name of a mosque official, namely the chief in his area. The official representatives of religion are organised there on the same scheme as the native administrative officials. Alongside of the regent, the highest

administrative official, is the pangulu of the regency, alongside of the head of the district is the pangulu of the district, called the *pangulu naib* or briefly *naib*, and so on. The officials of the mosque are graded in a hierarchy; the pangulu at the capital of the regency is at the head of all the personnel of the mosques of the regency. The village official in charge of the divine services is of a different origin. He is a member of the village authority for attending to the religious requirements of the village and does not belong to the staff of the mosque. This man is exceptionally called pangulu in Bantēn (Western Java); elsewhere he is known by other names.

The pangulu is the director of the mosque and the chief of its personnel; according to *adat* law, he is appointed, like the rest of the staff of the mosque, by the regent, usually being chosen from the staff of his own or another mosque. This procedure does not always guarantee that the man appointed is specially qualified (see below).

Theological training is quite free from special prescriptions. The student of theology, whether he intends to take up an official position or remain a private student, studies at schools (all private institutions of which there are many in the land). Each studies as he pleases, for shorter or longer period, just as he likes; an effort is made to attend lectures at several schools.

The functions of the pangulu are very varied, but not uniform throughout the whole regency. The office of director of the mosque has already been mentioned; in larger villages, especially at the capital of the regency, the staff is large: there the pangulu does not himself take part in the work. The pangulu has charge of marriages which are concluded in his presence: *ṭalāk* and *rudjū'* are pronounced by him and marriages are registered by him. The pangulu of a regency only performs this office in the case of very prominent families: in this case it is the custom to conclude the marriage in the house of the family. The pangulu also performs the ceremony when the *wālī* of the bride appoints him *wakil*, a regular custom, observed by the majority without the reason being quite clear to them; to the popular mind the pangulu is the person who binds in marriage. It is therefore a very old custom to have the marriage performed in the mosque by the pangulu: this unwritten custom has now been given the force of law by a colonial enactment (since 1895, the law in question is of 1929). This law also regulates the fees to be paid at marriages, proclamations of *ṭalāk* and *rudjū'*, taking the old customs as the guiding principle. These fees form the most important part of the income of the pangulu and his staff; the latter also receive their share; if properly qualified they frequently act as deputy for the pangulu at marriages. Women who have no *wālī* are married by the pangulu as *wālī ḥakim*. The number of pangulus with this qualification is always less than the number of officials appointed to perform marriages. In some districts the regent appoints himself *wālī ḥakim* but in practice he leaves the exercise of his rights to the pangulu.

The *djakat* (Ar. *zakāt*) is of course not collected in Java and Madura by the authorities; it is, if it is levied at all, a free-will offering and in many places insignificant. Only in Western Java was the collection at one time organised and in the

hands of the mosque officials. The revenue went to them. To this day the *djakat* is still a considerable source of revenue for the pangulus, especially in western Java.

The pangulu — this is true only of the pangulu of the regency — is also the *kādī*; but his jurisdiction is limited to family law and the *wakaf* (Ar. *wakf*) estates. The office of *kādī* is his main sphere of activity. These judicial functions of the pangulu have a curious history. The colonial authorities thought from the official position of the mosque officials that they were priests; they further thought that they had to deal with a *collegium* because the pangulu sits with some of his subordinates to assist him when in legal session. This misunderstanding was perpetuated fifty years ago in colonial legislation. The pangulu was made president of a bench of judges; his assessors were appointed by the authorities and chosen from the subordinates of the pangulu and private individuals learned in law. In this way a pangulu of lower rank may be a member of a "priestly college". It is now intended to restore the old state of affairs. The "college" is to be abolished and the pangulu's court i. e. one in which the pangulu, sitting with assistants, will be sole judge, will take its place. The law is prepared but has not yet been put into operation (1934). The "priestly college" holds its meetings in a room in the mosque. Most of the cases are brought by women. In Western and Central Java it is the regular custom for the husband immediately after the wedding to be forced to pronounce the *ta'lik* in a way which, from the legal point of view, is not quite free from objection. If he does not fulfil the obligations which he takes upon himself in the *ta'lik* formulae and if the wife is not satisfied she brings the matter before the "college" and the latter pronounces that a *talāk* has taken place. These are the most common cases. In Eastern Java and Madura a facilitated *faskh* takes the place of the *ta'lik*. We also find cases in the rest of Java where the "priestly college" decides questions of *faskh*. Women who are refused *nafaka* also apply to the "college". If there are difficulties after a divorce about the division of property acquired during marriage, or if the heirs to a property are dissatisfied with the decisions of an ordinary pangulu, the matter is referred to the "college" for decision. The method of procedure is as follows. The "college" gives its verdict as to how the property should be divided according to the *shar'ā*. If the parties prepare to carry this out but all are not ready to do so, the scheme can only be legally enforced when the secular court has given authority. This is always done if the verdict of the "priestly college" is formally in order; no test is made of its material correctness. Fees have to be paid whenever application is made to the "college"; a considerable revenue is gained from the division of estates as in such cases the "college" gets a percentage of the objects in dispute, often 10% — hence the name *usur*. The "college" is consulted also in other matters of family law but these are of less importance.

Finally there are *wakaf* foundations the founders of which intended the revenues for mosques, schools of religion, or cemeteries. It is the task of the "priestly college" to decide according to the *shar'ā* such disputes as arise and in general to supervise the administration.

THE ENCYCLOPAEDIA OF ISLĀM, III.

The pangulus in the native states are appointed by the princes; their sphere of activity is the same. Whenever a new pangulu is appointed he is given his appointment as *kādī* by an edict "in confirmation of my oral command", as the phrase is, in order to comply with the demands of the *shar'ā*. In this edict the phraseology suggests that the ruler hands over his jurisdiction to the pangulu.

The Netherlands Indies colonial law requires the presence of the pangulu when Muslims appear in the government courts as accused in civil or criminal cases. A number of such assessors are attached to each court according to its requirements. They are appointed by the government and chosen from the personnel of the mosques. It is arranged that the director of the mosque is at the same time an assessor. The right of appointing pangulus has thus gone out of the hands of the regents into those of the colonial administration. As the pangulu is usually chosen from the lower staff, the government has been able to secure influence over the appointment of these minor officials so far as they are capable of being pangulus. The object is to choose as competent men as possible, so that the prestige of the pangulu has increased in the Muslim community. This is less true of their position as assessors at the courts; the colonial law intended that the court should be advised regarding the *adat* (traditional) law. The choice of the pangulu was therefore a mistake, as the latter goes by the *fiqh* books.

The word pangulu as the name of a mosque official is not unknown outside the islands of Java and Madura. In some places there are pangulus whose work resembles that of the pangulus of Java, e. g. in the centre of the former sultanate of Palembang (Sumatra). The colonial authorities have retained the name; they have also given the name to the court assessors appointed by them in districts where the name was not previously in use.

(R. A. KERN)

PĀNĪPAT, a town and *tahsil* in the Karnāl district of the Pandjāb [q. v.]. On three occasions has the fate of Hindustān been decided on the plain of Pānīpat: in 1526, when Bābur [q. v.], the Barlās Turk, defeated Ibrāhīm Lodī; in 1556, when Akbar [q. v.] crushed the forces of Hēmū; and lastly, in 1761, when the Marāṭhās were defeated by Aḥmad Shāh Durrānī [q. v.]. The geographical factor combined with internal decay and a weak system of frontier defence has been chiefly responsible for this. From the strategic background of Afghānistān the path for invaders lay along the lines of least resistance, the Khyber, Kurram, Tochi, and Gomal passes, on to the Pandjāb plains, for the Indus has never proved an obstacle to an enterprising general. Checked on the south by the deserts of Rāḍiputāna, invading armies were forced to enter the Ganges and Djamna valleys through the narrow bottleneck between the north-eastern extremity of the desert and the foot of the Himālāyas.

Bābur's success over Ibrāhīm Lodī, in 1526, has long been regarded as resulting from the extensive employment of artillery. The source of this error is to be found in an inaccurate translation of the word *araba*. It is true that 700 *arabas* were used

by Bābur, but it is incorrect to regard these as gun-carriages, for the word simply means "carts". There is no textual or circumstantial evidence for supposing that Bābur had guns in such numbers as to demand 700 gun-carriages for their transport. Indeed, from Bābur's "Autobiography" it may be inferred that he possessed two guns only and Bābur himself makes his victory a bowman's success. The importance of the first battle of Pānīpat is that it decided the fate of the Lodī dynasty. Far more formidable was the resistance offered by the Rājputs at Kḥānuā in the following year.

The second battle of Pānīpat, in 1556, when Akbar defeated Hēmū, is of outstanding importance in the history of India, for there was no Mughal empire before Akbar, only the attempt to create one.

After his victory over the Marāṭhās in 1761, Ahmad Shāh Durrāni made no attempt to consolidate his position in Hindustān but returned to Afghānistān. The Marāṭhās were only temporarily crushed, for they rapidly recovered from this defeat and, by 1771, were once more a menace to the peace of India. The importance of this battle is that it facilitated the growth of British power.

PĀRA, a Turkish coin, originally a silver piece of 4 *aḳēs*, first issued early in the xviii century; it soon replaced the *aḳē* as the monetary unit. The weight, originally 16 grains (1.10 grammes), sank to one quarter of this weight by the beginning of the xixth century and the silver content also depreciated considerably. The multiples of the silver pāra were 5 (*beṣḥlik*) pāras; 10 (*onlik*); 15 (*onbeṣḥlik*); 20 (*yigirmiparalik*); 30 (*zolota*) and 40 *ghurūsh* or piastre. Higher denominations: 60 (*altmishlik*); 80 (*ikilik*) and 100 (*yūsluk*) pāras were occasionally issued.

In the new Medjidiye currency of 1260 (1844) the pāra became a small copper coin with multiples 5 (*beṣḥparalik*), 10 (*onparalik*), 20 (*yigirmiparalik*) and 40 (*ghurūsh*). In the later years of the Turkish empire, the larger copper pieces were replaced by nickel. The pāra under the republic is a money of account, the 100 pāra or 2½ piastre piece of aluminium bronze being the smallest denomination issued.

When Serbia became independent it retained the name para for its smallest coin as did Montenegro also. The name survives in Yugo-Slavia, where the nickel 50 para piece is the smallest coin issued. During the Russian occupation of Moldavia and Wallachia in 1771-1774 copper coins were issued with the value in paras and copecks.

PARGANA, the Indian name for an aggregate of villages. The first reference to this term in the chronicles of the Sultānate of Delhi appears to be in the *Tārīkh-i Firūz Shāhi* of Shams-i Sirāj 'Afīf (*Bibliotheca Indica*, 1891, p. 99), for it is not used by Ḥasan al-Niẓāmī in

his *Tādī al-Ma'āsir* or by Minhādī al-Dīn in his *Ṭabaqāt-i Nāṣiri*. Although it first came into prominence in the xivth century partially superseding the term *kaṣba*, it is, in all probability, based on still more ancient divisions in existence before the Muslim conquest. The exact date of its creation is therefore uncertain.

An account of the internal working of a pargana occurs in the chronicles of the reign of Shīr Shāh who learned the details of revenue administration in the management of his father's two parganas at Sasarām in Bihār. When he became ruler of Hindustān he organized his kingdom into administrative units known as *sarkārs* which were divided into collections of villages termed parganas. Each pargana was in charge of a *shikḍār* or military police officer who supported the *amin* or civil officer. The *amin* had for his civil subordinates a *fotadār* or treasurer and two *kārkuns* or clerks, one for Hindi and the other for Persian correspondence. It does not seem correct to hold the view that in this respect he was an administrative innovator, for the provincial officials and institutions which he has been credited with creating were already in existence before he ascended the throne. This remained the administrative system until Akbar organized the Mughal empire into *sūbas* (provinces) which were divided into *sarkārs* (districts). The smallest fiscal unit under Akbar was the pargana or *maḥall*. Thus, for example, the *sūba* of Oudh was divided into five *sarkārs* and thirty-eight parganas (*Ā'in-i Akbarī*, in *Bibliotheca Indica*, ii. 170-177 [tr. Jarrett], 1891).

Under the Mughal emperors the chief pargana officials were the *kanungo*, the *amin*, and the *shikḍār*, who were responsible for the pargana accounts, the rates of assessment, the survey of lands, and the protection of the rights of the cultivators. Similarly in each village a *patwāri* or village accountant was appointed whose functions in the village resembled those of the *kanungo* in the pargana. It must not be imagined that the pargana was a stable and uniform unit. Not only did it vary in area in different parts of the country, but often a new land settlement was followed by a fresh division and re-distribution of these fiscal units. The co-extensiveness of a pargana with the possessions of a clan or family has given rise to the suggestion that it was not only a revenue-paying area, but that it was founded on the distribution of property at the time of its creation.

The Twenty-four Parganas: a district of Bengal lying between 21° 31' and 22° 57' N. and 88° 21' and 89° 6' E. It derives its name from the number of parganas comprised in the *zamindārī* ceded to the English East India Company in 1757 by Mir Dja'far, the Nawāb Nāẓim of Bengal. This was confirmed by the Mughal emperor in 1759 when he granted the Company a perpetual heritable jurisdiction over this area. In the same year Lord Clive, as a reward for services rendered by him to Mir Dja'far, was presented with the revenues of this district. This grant which amounted to £ 30,000 per annum, made Clive both the servant and the landlord of the Company. The sum continued to be paid to him until his death in 1774, when, by a deed sanctioned by the emperor, the whole proprietary right in the land and revenues reverted to the Company.

PĀRSĪS. Under this name (Pahl. *pārsik*, Mod. Pers. *pārsī* literally "inhabitant of Fārs") are known the Zoroastrian Irānians, who, after the Arab conquest, refusing to adopt Islām fled and after various vicissitudes finally settled in India in Guḍjarāt, where they now form an ethnical and religious group of 100,000 persons (101,778 according to the census of 1921). At the present day the name Pārsī is beginning to be used also for the Zoroastrians remaining in Irān instead of *geber*, the somewhat contemptuous significance of which [cf. *MAḌJŪS*] is no longer in keeping with the spirit of tolerance which is increasing every day in Irān.

What we know of the wanderings of the Pārsīs before their arrival in their present abode in India is based principally on two narratives: *Ḳiṣṣah-i Sandjān*, written in verse by a Zoroastrian priest named Bahman Kai Kobad of Nawsāri in the year of Yazdagird 969 (1600 A. D.) and *Ḳiṣṣah-i Zar-tushtyān-i Hindustān wa-Bayān-i Ātash Bahrām-i Nawsāri*, a work written at the end of the xviiith century by the Dastur Shapurji Manockdji Sandjana (1735—1805).

According to these sources, the first group was composed of Zoroastrians who about a century after the Arab conquest went from *Khurāsān*, where they had sought refuge, to the south, reaching the island of Hormuz at the mouth of the Persian Gulf (751 A. D.). After a short sojourn there they crossed to Diu on the Gulf of Cambay to the south of the coast of Kāthiāwār (766) and remained there 19 years. Continuing their journey southwards they landed at Sandjān (785) and installed the sacred fire there. According to the tradition of the Pārsī priests, before obtaining permission to settle there they drew up for the lord of Diu, *Djādi Rānāh*, in a series of 16 *śhlokas* the principal articles of their faith. In these *śhlokas*, of which several versions exist in Sanskrit and Guḍjarātī, several points of contact between Hinduism and Zoroastrianism are cleverly brought out. At Sandjān they were twice joined by other bodies of refugees and these formed a community which prospered rapidly and spread to Cambay, Bariāw, Bānkāner and Ankleswar. After the year 1000 Pārsīs are also found in upper India, but it is probable that these were isolated bodies who came directly from Irān.

In 1490 A. D. the Pārsīs who had made common cause with the Hindus were forced by the troops of sultān Maḥmūd Bigara to abandon Sandjān and take refuge with their sacred fire among the mountains of Barhūt. When the Muslim pressure ceased, the Zoroastrian community resumed its development. According to the date given in *Ḳiṣṣah-i Sandjān*, the sacred fire was installed at Nawsāri in 1491 after the sack of Sandjān, and after a brief period at Barhūt and Bansdah it was brought back in 1516.

The sacred fire was installed at Sūrat in 1733 as a result of the raids of the Pindarris but the settlement of the Pārsīs in the town dates from the second half of the xviith century. We do not know the exact date when the Pārsīs went to Bombay, which is now the principal centre of the Pārsī community in India.

The Pārsīs were able to settle in India without meeting any opposition mainly owing to the excellence of the moral principles of the Mazdaean religion observed in the threefold rule of *humata*,

hūxta, *hwarshā* — "good thoughts", "good words", "good works" — which is found in the Avesta. Although they have always abstained from any proselytising activities, they had the good fortune to attract the great emperor Akbar to the Mazdaean religion. Trustworthy and active, assisted by the fact that the social character of their religion does not prevent adaptation to the forms of western life, they are at the present day a flourishing and well organised community much appreciated for the high standard and dignity of their lives.

The old religious inheritance of Zoroastrianism has been preserved by the Pārsīs with remarkable piety. In the xviith century on the initiative of the *desai* Čāngā Asā of Nawsāri a mission was sent to Persia to obtain from the Zoroastrians who had remained there information regarding certain details of the religion. As a result the study of the manuscripts of the Avesta and of the exegetic literature was intensified and at the present day Pārsī scholars are displaying a laudable activity in the publication of the old texts.

The sacerdotal class still occupies a predominant place in the community; its hierarchy (*dastūr*, *mōbadh*, *hērbadh*) is a hereditary one.

The interests of the community are managed by a committee (*pančāyat* composed of 6 *dastūrs* and 12 *mōbadh*) but with incorporation in the public life of British India the functions of such a committee are gradually diminishing.

The mass of the faithful (*behadīn*) conform — with a few concessions to the demands of modern life — fully to the ritual prescription of Zoroastrianism. Birth must take place on the floor of the house to show detachment from the things of the world. At the age of 7 there is the investiture with the *kusti*, the sacred cord formed of 72 threads which winds three times round life. The funeral rites consist of exposure of the corpse on the tower of silence which is frequented by vultures (*dakhm*). In the ceremony of marriage, which tends more and more to monogamy with the marriage of full rights (Pahl. *zanih-i pātikhshāyihāh*) to the exclusion of secondary marriages, Hindu customs have prevailed.

The prohibitions regarding contamination of the sacred elements of fire, water, earth are still scrupulously observed and the greatest care taken in purification after contact with impure objects, especially corpses. The Zoroastrian principles of morality are faithfully observed in all activities of life; hatred of falsehood, honesty in all dealings, assistance of the poor are the regular rules of piety.

The Zoroastrian community in India is keenly interested in the lot of their co-religionists in Irān and it was through the intervention of the Pārsī "Persian Zoroastrian Amelioration Fund" that the *djizya* paid by the Zoroastrians of Yazd and Kirmān was abolished in 1882 by the Persian government. As a result of the decline of religious intolerance in Persia, there has been increasing intercourse with the Zoroastrian communities still existing in Irān and the Pārsī community has frequently sent appeals to the Muslims of Persia to ask them to return to the ancient religion.

While as regards doctrine perfect harmony still exists in the community, as regards ritual controversies have not been wanting and are not lacking within it. In 1686 the question of precedence was raised between the priests of Nawsāri and those

of Sandjān. Another question which has been a subject of controversy even since the xviiith century, is the question whether the use of the *padān* — i. e. a kind of veil placed in front of the mouth to prevent the sacred fire from being contaminated by the breath — should also be put on the dying, thus violating the laws of piety.

Much more serious however is another controversy, that regarding the calendar; it goes back to the xviiith century and divides the community into two sects: the *Shahenshāhis* and the *Qadimis*.

According to the Avestic calendar adopted by the Pārsis, to make up for the loss of a quarter of a day each year, a month is added every 120 years but this system was not observed during the period of persecution following the Muslim conquest. In 1745 a group of the faithful felt the need for a reform of the calendar; but this group, which took the name of *Qadimis*, was opposed by those who wished to adhere to the Hindu system of calculating the months and who took the name of *Shahenshāhis*. The result is that the calendar adopted by the latter is a month behind that adopted by the *Qadimis*. The Pārsis follow the era of Yazdigird which dates from the accession of the last Sāsānid (June 16, 632).

PARWANA. [See MU'IN AL-DIN SULAIMĀN.]

PASANTREN. Javanese "*santri*-place", se minary for students of theology (*santri*) on the islands of Java and Madura, Madur. *panjantran*, Sund. usually *pondok*, i. e. the lodgings of the students of the school ("to go to the *pondok*" = to attend a pasantren). — Elementary education i. e. reciting the Qur'ān and the elements of a knowledge of ceremonial law is given in the East Indian Archipelago wherever there are Muḥammadans by teachers, who confine themselves to these subjects, in their own

houses. In the larger villages and towns of Java and Madura there are also teachers who collect pupils around them in a mosque, in their own house or in a special building. If their reputation increases it often happens that students come from a distance and live in the place for a time to enjoy their instruction.

The pasantrens however are institutions for advanced theological training. They consist of several buildings and when they are not built out in the country, form at least a separate quarter of the village. Javanese princes have from time to time issued edicts making villages "free" i. e. the taxes and services which they have to yield are given in perpetuity to the teacher of the pasantrens founded there. Pious individuals have also endowed *wakfs* in favour of pasantren. The others are private institutions which owe their origin to the initiative of a learned man who establishes himself as a teacher. Their foundation and prosperity or decline is therefore bound up with the personality of the teacher and the estimation in which his learning is held; even pasantrens which are regularly endowed are influenced by this factor.

The pasantren consists in the first place of the houses of the teacher and his assistants, then of lecture-rooms, a chapel, rarely a Friday Mosque, the lodgings of the students (*pondok*), rice-barns, all of which occupy a considerable space. The *pondok* alone possess a peculiar form of architecture not found in other buildings. A *pondok* is a quadrangular building built of the usual materials. The interior is divided by two walls into three long compartments of about equal breadth, the central one of which forms a corridor running from an end of the building to the other. The two outer ones form the living rooms; each of them is divided into cells of equal size by partitions. The door of the *pondok* is in the centre of one of the shorter outer walls; it opens into the corridor. Only blank walls are seen on right and left as one enters; then it is noticed that very low little doors are let into these walls, made of the same material as they are; these admit to the cells. The little doors are at regular intervals in the two walls, two always being opposite one another. The cells are lit from the outside by little windows in the wall; they are so low that the occupant can only sit or lie on the floor; for the students study in a recumbent position. Several students live in one cell; in very popular pasantrens, the *pondok* may have two stories. The number of students may amount to several hundreds. It may also be quite small. There are hundreds of pasantren in existence. In each *pondok* discipline is maintained by one of the older students or by a junior teacher. In spite of this, cleanliness leaves much to be desired. The head of the *pondok* is at the same time tutor and assists the students under him in every way. We also find women sharing in the instruction given in a pasantren but it is very rare for them to live in one.

The pasantrens have a life of their own. Great activity prevails even before dawn. After the *ṣalāt al-ṣubḥ* which the teacher himself conducts and which is followed by a *dhikr*, the lectures begin. The teacher takes the beginners one after the other and after their lesson they return to the *pondok*; here they go over what they have learned by themselves or with a more advanced student or with the head of the *pondok* until noon. The students

then have their midday meal, the *santri* of each *pondok* forming one mess; this is practically speaking their only meal. All then go to chapel for the *ṣalāt al-ṣuḥr*. They are summoned to three further *ṣalāt* in the course of the day. The intervals between them are devoted to lectures and study. The more advanced students are taken together by the teacher; he reads the Arabic text, translates it and adds any necessary notes of explanation. After the *ṣalāt al-ʿiṣhā* the day's work is over and the students retire for the night. Some *santri* may still be engaged on little tasks which may bring them in something, soon these also stop and quiet reigns over all. — Friday brings a variation in this monotonous round; all go to the nearest Friday mosque to attend the *ṣalāt al-djum'a*. Harvest is also a busy time for the *santri*; they work in the rice-fields or beg for *zakāt*. Many *santri* go home in the month of the fast.

Fiqh is the primary subject of study in the pasantrens; the Arabic works used are those in use in other *Shāfiʿi* lands. There are also a large number of Javanese works; those based on Arabic sources or theological works taken from Arabic are known as *kitab*. Javanese is the language of the pasantrens; in the Sundanese speaking districts (western Java) Javanese works are more and more replaced by Sundanese. At the same time dogmatics are also studied. Here no particular *madhhab* is followed, nor are the works used written only by *Shāfiʿis*. Orthodox mysticism is less studied. There is, it is true, a popular form of mysticism tinged with pantheism; but this is less and less taught in the pasantrens. The *santri* calls the main *ṣiḥḥ* book used by him in the pasantren *kitab pēkih* without further qualification (he hardly knows its title) and work on dogmatics *kitab usul*. Small books for elementary instruction on the duties of religion and dogmatics are also called *kitab usul*.

The method of instruction is one peculiar to the pasantren. As soon as he has finished the elementary text-books, the student is introduced to more important Arabic texts. He reads them, sentence by sentence, under the supervision of the teacher who himself has perhaps never studied Arabic properly and has only his memory to rely upon for the vocalisation. The sentence is translated into Javanese and paraphrased by the teacher. Finally the student is so far advanced that he can translate easy texts from Arabic into Javanese (a list of the texts most used [at the time] is given in *T.B.G.K.W.*, xxxi. [1886], p. 518 *sqq.*). This takes a long time; the joy however at seeing his knowledge steadily increasing and the pleasant feeling of being able to read texts in the original spurs the student on. Under Meccan and Ḥadramawt influence, however, this method is being gradually driven out by another which begins with Arabic grammar. It certainly seems the more logical; one disadvantage, however, is that the study of Arabic offers so many difficulties to the Indonesian that many lose heart before they succeed in reading texts.

Study at the pasantrens is quite free. Diplomas are neither sought nor given. The student comes and goes as he pleases. The majority when they enter the pasantren have already had an elementary education at home. The desire to increase their knowledge of the faith, the wish among rich and prominent families to see one of their sons devoting himself to the study of religion and among others

the hope of gaining a livelihood, bring young men into the pasantren. The *santri* endeavour to attend the lectures of a number of teachers, each on his special subject. They therefore go from one school to another; some indeed travel about all their lives studying. Others when they think they have acquired sufficient learning settle somewhere, but not in their own districts, as teachers or become assistant teachers in a pasantren or they may prefer to remain "independent scholars". There are no offices for which study in a pasantren is a requisite preliminary; in general the theologians are averse from anything official or belonging to the state but the higher mosque officials have usually studied for a time in a pasantren.

It is considered very reprehensible to give instruction in sacred learning for an agreed fee. Nevertheless, most of the teachers are well to do. Pious gifts are liberally given to them on account of the blessing they bring. The teacher is a most welcome guest at religious feasts, of which there are many in Javanese life. All appeal at all times to his learning or for his intercession; gifts accompany these appeals. New arrivals among the students, if they can afford it, make their offering; sons of the better situated parents bring back presents when they go home, and poor students work in the teacher's fields.

The majority of the students are poor and indeed live by begging. On certain days they go round the district; their begging is not considered a nuisance; they are assisted readily for they are acquiring sacred learning; to give to them brings a blessing. Work on the land, the copying of *Qurʾāns* etc. also bring them in the little they require for their frugal life. The colonial government only troubles about the pasantren in so far as it exercises a general supervision over them; the foundations of new ones are reported to the authorities and the principal has to keep a register of the names of the students and of the titles of the books used.

The spread of schools on the European model has dealt a blow to the pasantrens in recent years. Only the pasantrens could give religious instruction as the public schools instituted by the colonial authorities gave none. On the other hand, only the latter prepared for everyday life. This has resulted in the growth of private schools intended to do both. These are called *madrasas* and are intended to be schools for all. Attached to the *madrasas* are schools for higher education; in these religious instruction plays a very prominent part. In these schools, which owe their origin to circles influenced by modern ideas, the method of instruction is taken from European models; but their outlook is not by any means broader than that of the old pasantrens. The name *madrasa* points to Egypt or perhaps Arabia; the organization, apart from the religious instruction, is modelled exactly on the government schools.

In the country of the Minangkabau Malays (Central Sumatra) there are theological seminaries which correspond on the whole with the pasantren; they are called *surau*, a name also given to elementary schools, chapels, houses for men, and also to the separate buildings of the institution called *surau*. The students' houses are not divided into cells; the occupants have a common lecture- and sleeping-room.

Aṭjeh also has seminaries comparable with the

Javanese. The method of instruction however, which in Java may be called the new one, is the only one here; Malay takes the place of Javanese there; a knowledge of this language is therefore indispensable for students in Atjeh. The lodgings of the students (*ranggang*) have the same plan as the *pondok* of Java; just as the pasantrens are also called *pondok*, so the name *ranggang* in Atjeh is also applied to the whole institution.

Bibliography: C. Snouck Hurgronje, *De Atjehers*, Batavia 1894, ii. 1 sqq.; do., *De Islam in Nederlandsch-Indië*, in *Gesammete Schriften*, iv/ii. 377 sqq.; *De masjdids in inlandsche godsdiensscholen in de Padangsche bovenlanden*, in *I. G.*, i. (1888), 318 sqq. (R. A. KERN)

PASE, the name of a district on the north coast of Atjeh (Sumatra) which according to the prevalent native view stretches from the Djambō-Ajé-river in the east to the other side of the Pasè river in the west. The whole area is divided up into a number of little states each with an *ulëibalang* or chief.

Pasè at one time was a kingdom known throughout eastern Asia. The north coast of Atjeh was in the middle ages on the trade route by sea from Hindustan to China. Islām followed this route and firmly established itself from India on this coast, the first point in the east Indian archipelago which it reached. In the xiiith century we know there were already Muslim rulers here. One of these was Malik al-Šāliḥ (d. 1297), according to native tradition founder of the state and the man to make the country Muslim; his tomb made of stone imported from Cambay (India) has been discovered along with several other gravestones on the left bank of the Pasè river, not far from the sea. The capital of the kingdom is said to have been here. A second capital rather more to the west was Samudra; it was the royal residence when Ibn Baṭṭūṭa in the middle of the xiiith century twice visited the land, on his way to China and on the return journey. The present name of the island of Sumatra, by which it is known in the west, comes from Samudra — in Ibn Baṭṭūṭa: Sumatra. Pasè was then a flourishing country on the coast; the ruler was king of the port, who himself sent out trading-ships; a ship belonging to him was seen by Ibn Baṭṭūṭa in the harbour of Ch'ünchou (Fukien) in South China. Life at the court was modelled on that of the Muḥammadan courts of India. The ruler at this time was an ardent Muslim, who took a great interest in learning. He waged a victorious *djihad* on the natives in the hinterland. Lead coins struck in the country and Chinese crude gold were the means of exchange. The chief food was rice.

Shortly after Ibn Baṭṭūṭa left the country the king had to recognise the suzerainty of the Javanese Hindu empire of Madjapait (before 1365). A tomb of a queen or princess found near Lhō' Sukon has an Arabic inscription, dated 791 (1389) at the top of the stone and at the bottom an inscription in much weathered old Javanese script. It has not yet been read. The Chinese envoy Cheng Ho remarked in 1416 that the land was involved in continual war with Nago (Pidie). He mentions rice, silkworms and pepper as its products. The last-named attracted the Portuguese there. From 1521 they had a fortified settlement in Pasè but in 1524 they were driven

out by the sultān of the rising kingdom of Atjeh (i. e. Great Atjeh). Henceforth Pasè was a dependency of Atjeh. The tombs of the rulers of the former kingdom were still an object of pilgrimage to the most famous sultān of Atjeh, Iskandar Thānī, as late as 1048 (1638—1639); at the present day even the memory of the old kingdom is extinct. The mouth of the Pasè river is silted up and the place where the capital stood is no longer recognisable.

Pasè exercised through the years a considerable influence in the Malay Archipelago through its Muslim scholars and missionaries. Javanese and Malay tradition have preserved their memory.

(R. A. KERN)

PASHA (T., from the Pers. *pādishāh*, probably influenced by Turkish *baskāk*), the highest official title of honour ('*unwān* or *laḳab*) in use in Turkey until quite recently and still surviving in certain Muslim countries originally parts of the Turkish empire (Egypt, 'Irāk, Syria). It was always accompanied by the proper name like the titles of nobility in Europe but with this difference from the latter, that it was placed after the name (like the less important titles of *bey* and *efendi*). In addition, being neither hereditary nor giving any rank to wives, nor attached to territorial possessions, it was military rather than feudal in character. It was however not reserved solely for soldiers but was also given to certain high civil (not religious) officials.

The title of *pasha* first appears in the xiiith century. It is difficult to define its original use exactly. The word had in any case early assumed and lost the vague meaning of "seigneur" (*dominus*) (cf. *Diwān-i tirk-i Sultān Welad*, p. 14; text of the year 712 = 1313, where Allāh himself is invoked in the phrase *Ey Pasha*!). At this same period the title of *pasha* like that of *sultān* was sometimes given to women (cf. Ismā'il Hakkī, *Kitābeler*, 1927, index, s. v. *Kadem pasha*, Selçuk *pasha*), a practice which recurs only once again, and then exceptionally, in the xixth century in the case of the mother of the Khedive [cf. WĀLIDE SULTĀN].

Under the Saldjūks of Anatolia the title of *pasha* (in as much as it was an abbreviation of *pādishāh* and always by analogy with that of *sultān*) was given occasionally to certain men of religion who must also have at the same time been soldiers and whose history is not yet well known. To judge from the genealogy which 'Ashīk-pasha-zāde claims for himself, the title of *pasha* was already in use in the first half of the xiiith century. Mukhlis al-Dīn Mūsā Baba, alias *Shaiḫ Mukhlis* or *Mukhlis Pasha* had, according to 'Alī Efendi, seized the power before the Karamānoghlu and in the same region, after the defeat of the Saldjūk Sultān Ghiyāth al-

Dīn Kaikhūsraw II which took place in 1243 (cf. Gibb, *A History of Ottoman Poetry*, i. 177).

At the end of the same century the title of pasha seems to have been added to the names of certain members (restricted in number) of the petty Turkish and Turkoman dynasties which shared Asia Minor; these are sometimes rulers, sometimes members of their families. It was the same in the principalities of Tekke, Aidin, Denizli and Kızıl-Ahmadli [cf. the article *TURKS*, iv., p. 961] and probably also in other little kingdoms of Anatolia (cf. for Sarukhan, 'Alī Pasha, according to Shihāb al-Dīn b. al-'Umārī, *al-Ta'rif* etc. quoted by Kalkaşhandī, viii. 16, 14).

In the family of 'Othmān, two individuals are credited with the title of pasha: 'Alā' al-Dīn, son of 'Othmān, and Sulaimān, son of Orkhan.

The case of 'Alā' al-Dīn is very obscure. Two different individuals of this name have even been distinguished: the one being 'Alā' al-Dīn Bey, son of 'Othmān, the other 'Alā' al-Dīn Pasha, "wazīr" of 'Othmān, and the two may have been confounded (cf. Hüseyin Hüsameddin, *'Alāeddīn Bey*, in *T. T. E. M.*, years xiv. and xv., 4 articles). It may be added that the same individual or one of the two individuals in question may also have been a *beylerbeyi* (cf. Orudj's chronicle, ed. Babinger, p. 15, 15). Whatever be the case with this insoluble problem, it seems certain that the title of pasha was early given to statesmen (cf. a Sinān Pasha under Orkhan: article *TURKS*, iv., p. 962).

The title of pasha in any case very soon became the prerogative of two classes of dignitaries: 1. the *beylerbeyis* of the provinces and 2. the *wazīrs* of the capital. It was later extended to officials with similar functions.

In the second half of the xivth century (in 1359 or 1362?) Lala Shāhin who, according to the Ottoman historians, was the first (?) *beylerbeyi* of the 'Othmānīs, was given the title of pasha at the same time as he received this office. The same title was then given to the *beylerbeyi* of Anatolia (thus keeping up the idea of the two *beylerbeyis*, one of the right and one of the left wing) and later as new posts were created in the growing empire, extended to the other *beylerbeyis* or *wālīs* "governors-general".

It was the same with the *wazīrs*, of whom the first (?) according to the Ottoman historians, was Djandarli Khalil surnamed Khair al-Dīn Pasha (in 770 = 1368—1369). The number of the *wazīrs* [cf. *WAZĪR*] who were called *ḳubbe vezīrleri* down to the time of Ahmad III was raised to three and then to nine and the title of *wazīr*, also given to high officials like the *ḳapudan pasha*, the *nishāndji*, the *defterdar*, became more and more one of honour, carrying with it the title of pasha; but since at the beginning and for a considerable time in the capital itself there was only one *wazīr*, the title of pasha, par excellence and without any addition, came to be applied to the prime minister (later *ulu vezīr* or *şadr a'zam*), whence the expression *pasha ḳapısı* which was later replaced by that of *bāb-i 'ālī*, "Sublime Porte, the door of the first minister".

The increase in the number of pashas was not at first very rapid. M. d'Aramon mentions only 4 or 5 pashas or *vezīr-pashas* and at the time he wrote (in 1547), there were only three (Ayaz, Güzeldje Kāsim and Ibrāhīm, all three of Christian origin). It is true that here he is referring only to the capital.

In the provinces they were, and became, more numerous, and two classes of pashas were distinguished: 1. the pashas of 3 horse-tails (*tugh*) or *wazīr* (a rank which became more and more one of honour and extending to the provinces gradually absorbed that of *beylerbeyi*); 2. the pashas of 2 horse-tails or *mīr-mīrān* (rank at first the Persian synonym for the Turkish *beylerbeyi* and the Arabic *amīr al-umārā* but gradually became a lower rank). Besides, the old *sandjak-beyis* having in principle a right to only one horse-tail were promoted *mīr-mīrān* and thus became pashas in their turn.

After the Tanzīmāt the title of pasha was given to the four first (out of 9) grades of the civil (1. *vezīr*, 2. *bālā*, 3. *ulā*, 4. *sāniye şinfi cıvvelī*) or military (1. *müşhūr*, 2. *birindji ferik*, 3. *ferik*, 4. *liwā*) hierarchy and to the notables (3. *rūmeli beylerbeyi*, 4. *mīrmīrān*, with in practice unjustified extension to the fallen *mīr-ül-ümerā*, in this case to the purely honorary rank of the sixth grade).

The table of ranks having been abolished after the fall of the Ottoman Empire, the Turkish Republic retained the title of pasha for soldiers only. It has just been abolished by the Grand National Assembly of Ankara (Nov. 26, 1934). Instead of pasha one now uses *general* and in place of *müşhūr*, *mareschal*.

In western usage the word was at first pronounced *basha* (the pronunciation *pasha* does not appear till the xviiith century): Ital. *bascia*, Low Latin *bassa*, Fr. *bacha* or *bassa*, Engl. *bashaw*, to say nothing of variant spellings. In Greek on the contrary, the form pasha is the oldest (xivth century) but probably under western influence we also find *basha* (xvth century); cf. Ducange, *Glossarium mediae et infimae Graecitatis*, s. v. *πασας*.

The pronunciation as *basha* by Europeans is due either to the influence of Arabic in Egypt or to a confusion with the old Turkish title of *basha* (cf. at the end of the article).

Etymology of the word pasha: we shall examine the various etymologies that have been proposed.

1. Pers. *pāy-i shāh* "foot of the sovereign". This explanation, which was based on the fact that in ancient Persia there were officials called "eyes of the king", is found already in Trévoux's Dictionary (s. v. *bacha*) and was revived by G. v. Hammer. — It is to be rejected.

2. Turk. *bash* "head, chief" already suggested by Antoine Geuffroy (*Briefve description de la Court du Grand Turc*, 1542) and by Leunclavius (Löwenklau), *Pandectes historiae turcicae*, suppl. to his *Annales* (1588). Cf. also Trévoux's *Dict.* and Barbier de Meynard, *Suppl.* — It is to be rejected. — Cf. the following word.

3. Turk. *bash-aghā* taken (for the purposes of proof) in the meaning of "elder brother". This is the etymology accepted in Turkey until lately (Mehmed Thüreiyā, *Sidjill-i 'Othmānī*, iv. 738; Shams al-Dīn Sāmī, *Kāmus-i türki*, s. v. *pasha*) and based on the fact that Sulaimān Pasha and 'Alā' al-Dīn Pasha were the elder brothers of Orkhan and 'Othmān respectively. 'Alī Efendi in his *Künh ul-Akhhār* written in 1593—1599 (v. 49, 23) and 'Othmān-zāde Ahmad Tā'ib (d. 1724) called attention to this use of the word pasha among the Turkomans (*Ḥadīqat al-Wuzarā*, Istanbul 1271, p. 4, 16). Heidborn (*Manuel de Droit Public et Administratif Ottoman*, Vienna 1908, p. 186, note a) also says that pasha

means "elder brother" among the Greeks of Karamania, but there seems to be nothing to confirm these isolated statements. Some Turkish lexicographers like Aḥmad Wefik (under باش) and Ṣalāḥī have admitted this etymology but by two stages: *pasha* comes from the Turkish title *basha* which is for *bash-aghā*. The title of *basha* to be discussed below does really seem to come from *bash-aghā* but, contrary to what I at first thought, has nothing to do with *pasha*.

4. Pers. *pādishāh* "sovereign". — Etymology, the only admissible one (with however the possibility of the influence mentioned under 5), proposed by the Turkish-Russian dictionary of Boudagov (1869) and later revived by the Russian Encyclopaedia of Brockhaus and Efron. It had previously been proposed by d'Herbelot (under *pascha*, à propos of the spelling with final *h*). This explanation is based on the use of the words *sulṭān* and *pādishāh*, as the titles most often placed after the names when applied to individuals of high rank in the religious world (dervishes). Cf. Giese, in *Türkiyât Medjmu'ası*, i., 1925, p. 164. It seems that one can even explain by *pādishāsh* the obscure phrase used by Orkhan to 'Alā' al-Dīn Pasha in 'Ashik-pasha-zāde (ed. Giese, p. 34—35) before the latter asks leave to retire (cf. above). Orkhan says "You will be pasha for me". Now a few lines earlier he had asked him to be a *zoban pādishāh*, i. e. a shepherd for his people.

On the other hand, it will be noted that the title of *pasha* is often used not only as an alternative for *pādishāh* but also for *shāh*. Here are a few examples:

Shudjā' al-Dīn Sulaimān, of the dynasty of Kizil Aḥmedli, is called Sulaimān Pādishāh in Ibn Baṭṭūta (ed. Defrémery and Sanguinetti, ii. 343) and Sulaimān Pasha in Shihāb al-Dīn b. al-'Omari *al-Ta'rif bi 'l-Muṣṭalah al-sharīf*, Cairo 1312, p. 4: written *basha*, following the Arabic script) and in Munadjidjmi Bashi (iii. 30). The son and successor of this ruler, Ibrāhīm, is called Shāh in Ibn al-'Omari and Pasha in Munadjidjmi Bashi. — In the *Diṣtūr-nāme-i Erzurū* (ed. Mukrimin Khalil, p. 83—84) Sulaimān Pasha, son of Orkhan, is called Shāh Sulaimān (with poetical inversion). — 'Alī b. Čiçek (Čeček), the Īlkhānian governor of Baghdad (d. 1336), is called 'Alī Pasha by Ibn al-'Omari. According to Nazmī-zāde (*Gülshen-i Khulafā*, Constantinople 1143), he is also found in some MSS. as 'Alī Shāh. He is also called 'Alī Pādishāh (Cl. Huart, *Histoire de Bagdad*, p. 10). — In the oriental dialects the title of *pādishāh* is given to petty local rulers; there it has taken the form, not of *pasha* but of *patsha* (Kirghiz) and *pōtshō* (Özbeğ).

5. Turk. *bashaq* (variants *bashkak*?, *bashkan*?) "governor, chief of police" (Dictionary of Pavet de Courteille and under *basmaḳ* in that of Boudagov). This word of the "Khwarizmian language" according to Vullers came into use in Persia (Īlkhānid). Among the Mongols it meant the commissioners and high commissioners sent by them to the conquered provinces (of the west only?), notably in Russia. The accepted etymology is from the verb *basmaḳ*, "to press, crowd, oppress, impress", whence the meaning "oppressor, extortioner" for *bashaq*, an official, it is noted (cf. the Russian and Polish encyclopaedias), whose main duty was to collect taxes and tribute. However extraordinary such an explanation of an official title may appear it seems to be confirmed by the parallelism with the Mongol

equivalent of *bashaq* which is *darugha* or *darogha* [q. v.] and which may be compared with *darukhu*, a Mongol verb, synonymous with *basmaḳ* in the sense of "to impress". These may however be popular etymologies.

Schefer in his edition of the *Voyage de M. d'Aramon* (p. 238, note 3) says "The etymology of the word pacha given by Geuffroy (from the Turkish *bach*) is wrong. Pacha is a softened form of the word *bachqag* or *pachqag* which means a military governor".

Carpini renders the Mongol *bashaq* by *baschati* (variants in the MS.: *bascati*, *bastaci*; cf. *The texts and versions of John de Pl. Carpini* ..., London, Hakluyt Soc., 1903, p. 67 and 261 notes). In the edition of 1598 (Hakluyt) there is a marginal note "Basha, vox Tartarica qua utuntur Turci". This also implies a confusion between the words *bashaq* and *pasha*.

It is not impossible that there was actually some confusion among the Turks themselves between *pādishāh* (*pasha*) and the title *bashaq*, the synonym of the Mongol *darugha*. We had thought of this even before we saw the notes of Schefer and Hakluyt. It may be noted that the title of *pasha* (which is not found in Persian sources, as Muḥammad Ḳazwīnī kindly informs us) was applied either to Anatolians, subject in fact or in theory to the Mongols, or to officials of the Mongol Īlkhāns (like the governor of Baghdad mentioned above; cf. also *püser-i 'Alī Pasha* alluded to in the *Bezm-ü Rezm* of 'Aziz b. Ardashir Astarābādi [ed. Köprülü, p. 249, 8]). The confusion could be explained the more easily as one finds (rarely it is true) the form *bashkaq* (Djuwaini, *Ta'rikh-i Djahan-Gushā* of 1260, ed. Muḥammad Ḳazwīnī, ii. 83, note 9; in this passage there is a reference to a Khwarizmian official of 609, i. e. before the Mongol conquest).

It may be suggested that but for the influence of this confusion with the title *bashaq* that of *pasha* would never have attained such importance.

The Turkish title of *basha*. — This title which is not to be confused with the preceding, nor with the Arabic or old eastern pronunciation of it, was also put after the proper name but was applied only to soldiers and the lower grades of officers (especially janissaries) and, it seems, also to notables in the provinces (Meninski, *Thesaurus*, i., col. 662 and 294, l. 18; *Onomasticon*, col. 427; d'Herbelot, s. v. *pascha*; Viguier, *Éléments de la langue turque*, 1790, p. 218, 309, 327; Zenker, p. 164, col. 2 (probably following Meninski); De La Mottraye, *Voyages*, 1727, i. 180 note a; cf. Ewliya Čelebi, v. 107⁶, 216¹⁸; Na'imā, v. 71¹¹; Ismā'il Ḥaḳḳī, *Kitābeler* (سفر باشه, p. 41 and 8)). De La Boullaye-Le-Gouz (*Voyages*, 1657, p. 59 and 552) also distinguishes the title from *bacha* and translates it by "monsieur". Meninski, *loc. cit.*, also notes the pronunciation *bashi* (باشی) which is not to be taken as the word *bash* followed by the possessive suffix of the 3rd pers. -i; Meninski knew Turkish too well to make such a mistake. As to the pronunciation *beshe* (given by Chloros, s. v. *pasha*) it comes from the spelling باشه (cf. e. g. Aḥmad Wefik Pasha, *Zoraki Tabīb*, act i., sc. 2, ironically applied to a woman) but Meninski pronounces *basha*, even with this spelling.

As the lexicographers have sometimes confused

basha and *pasha*, some have thought that *basha* also meant "elder brother" (Mehmed Salāhi, *Kāmūs-i 'othmānī*, ii. 291 sqq. followed by Chloros). I think we have two separate problems and that *basha* is really for *bash-aghā* but with the meaning of "aghā (military title) in chief". The *kawas* (also called janissaries or *yasaḳī*) were called *bash-aghā* (according to Roehrig). On the other meanings of *bash-aghā* and in general for more details on some of the points dealt with here see Deny, *Sommaire des Archives turques du Caire*.

Note on the accentuation. — In the word *pasha* the tonic accent is on the last syllable (*pashā*). In the word *basha* it is on the first (*bāsha*) as is shown by the weakening of the final vowel in the pronunciation *bāshi*, already mentioned.

(J. DENY)

PASHALĪK (T.), means 1. the office or title of a *pasha* [q. v.]; 2. the territory under the authority of a *pasha* (in the provinces).

After some of the governors called *sandjak-beyi* (or *mir-liwā*) had been raised to the dignity of *pasha*, their territories (*sandjak* or *liwā*; q. v.) also received the name of *pashallık*.

Early in the sixteenth century of 158 *sandjaks* 70 were *pashallıks*. Of these 25 were *pasha sandjaklı*, i. e. *sandjaks* in which were the capitals of an *eyālet*, the residence of the governor-general or *wāli* of a province. For further details, cf. Mouradgea d'Ohsson, *Tableau général de l'Empire Ottoman*, vii. 307.

(J. DENY)

PASHTO. [See *AFGHĀNISTĀN*, i. 149 sq.]

PASIR. The sultanate of Pasir in S. E. Borneo comprises the valley of the Pasir or Kendilo river, which, rising in the north on the borders of Kutei runs in a southeasterly direction along the eastern borders of the Beratos range and turning east finally reaches the straits of Malacca through a marshy district. The country, about 1,125 sq. km. in area, is still covered by primitive forest, in so far as the scanty population, which is found mainly in Pasir, the residence of the sultan, and in Tanah Grogot, that of the official administration, has not cleared the trees to make ricefields. Although some gold, petroleum and coal are found in Pasir, Europeans have not exploited them, still less do they practice agriculture. A European administrative official was first stationed in 1901 at Tanah Grogot at the mouth of the Kendilo river. Pasir is therefore a good example of the Borneo coast state which as regards Islām has developed independently of European influence. The population of the sultanate is estimated roughly at 17,000. It consists of Dayaks who live by growing rice, of immigrant Bandjarese and Buginese from Celebes, who control the trade; they are found chiefly in the flat country at the river mouth. On the coast the Badjos, a people of fishermen, live in their villages built on piles in the sea. Of the 9,000 Dayaks, about 4,000 have adopted Islām, while 5,000 in the highlands are pagans. The 5,000 Buginese have a predominating influence in view of their large numbers and their prosperity; the 1,200 Bandjarese are of less importance. There are very few Europeans and about 50 Chinese and Arabs in Pasir.

Half of the population are therefore foreigners, but like the Dayaks they belong to the Malay race and mix with one another.

Pasir is despotically ruled by the sultan and

the members of his family; the people have no voice in the government. Alongside of the sultan and his presumed successor there is a council of five notables which the sultan consults on important occasions; this is also the highest court of the country. These notables and a number of other members of the sultan's family have estates as fiefs. Since 1844 each sultan on his accession has concluded a treaty with the Netherlands Indian authority. In 1908 they declared themselves vassals of the Netherlands Indian government. In 1900 the right to collect duties on imports and exports and taxes, as well as the monopoly of opium and salt, was ceded to the government in return for compensation. This amounts to 16,800 gulden yearly of which 11,200 go to the sultan and 5,600 to the notables.

The sultan still collects the following taxes: a poll-tax from adult males; 1/10 of the yields of the rice-fields and forest products, 2 cocoanuts from each fruit-bearing tree; also military service. He also has an income from the administration of justice in the capital.

From the very legendary history of the country it may be gathered that this despotic government which is foreign to the Dayaks was introduced from eastern Java. Under the ruling caste are the chiefs of lower rank, priests and landowners and freemen as a middle class. At the beginning of this century there were still slaves and debtor-slaves as the lowest class in Pasir; although slavery had long been abolished in other states of the Indies under Dutch influence. As is usual among other Dayak tribes, slaves go about like free men, take part in all festivities and games, may own property and are not even distinguished by dress. If their debt is paid to their master by some one, they go over to the latter. Slaves are not sold.

As the social condition of the Muslim Buginese, Bandjarese and Badjos have already been described elsewhere, the following remarks are confined to the pagan Dayaks and their Muslim relatives, the Pasirese.

According to tradition, an Arab (Tuan Said) brought Islām to Pasir. His marriage with the daughter of the reigning chief did much to further the progress of Islām in the country.

As to the Pasirese, their social life was only superficially affected by Islām. In their daily life a pagan conception of the worship of the deity and of the world of spirits still prevails. The old belief in the important influence of spirits on the fate of man and reliance upon their signs are evidence of this. The fact also is significant that throughout Pasir there is only one *missigit* and a few smaller places of worship. The number of Muslim priests and *hājdjīs* is also small nor is the enthusiasm to make the pilgrimage to Mecca great. On important occasions appeal is made for assistance to the spirits; this is particularly the case with illness among the Pasirese, who hold the pagan *blian* feasts, which are also celebrated in South Borneo. Amid a great din of gongs and drums which can be heard a long way off, the pagan priest (*balian*) becomes possessed by the spirit which then communicates to him the remedy for the illness. Even in the capital Pasir, exclusively inhabited by Muḥammadans, the advice of the *balian* is sought; only during the month of Ramaḍān the sultan forbids this.

How attached the upper classes of Pasir still

are to animistic views is evident from the legend still current according to which Sultān Adam in the middle of the last century used to isolate himself for several days in the year on the mountain of the spirits, Gunung Melikat; he had concluded, it was said, a marriage there with a female *djinn* from which a son named Tendang was born. This son, who has the gift of making himself invisible, is said to live on the island of Madura where he married a princess of the *djinn*. He appears from time to time in Pasir, when he is invited by a great sacrificial feast (formerly also human sacrifice). These feasts are still celebrated occasionally, especially in order to free the land from misfortune and sickness. In the village of Busui a house has been built for Tendang with a roof in three parts, which is built on a large pole and thus resembles a dove-cote.

The revenues of the priests consist of what they collect at the end of the month of fasting in *sakāt* and *piṭra*, everyone giving what he can and the chiefs exercise no pressure. A priest also receives a small fee at a marriage or divorce.

The calendar now in general use in the sultānate is the Muḥammadan. As elsewhere among the Dayaks the tilling of the fields begins when a particular constellation becomes visible in the heavens.

The family life of the Pasirese has developed to some extent according to Muslim ritual. Among the followers of Islām, marriage is performed through the intermediary of a priest, with the father or another man as *wali*, but only after an agreement has been come to about the very considerable dowry. This is paid to the parents of the bride; she herself only receives a small part of it. According to Dayak custom young people are allowed to meet very freely before marriage. A marriage feast is marked by a very considerable consumption of palm-wine. The man remains at least a year in the home of his parents-in-law before he can take a home of his own. Divorce is very frequent because attention is seldom paid to the wishes of the woman in the negotiations between the parents. Man and woman retain their property after marriage; after a divorce this goes back to the family. Property acquired during marriage is divided into two equal portions between husband and wife. After the death of one or the other the survivor inherits all. Only a few families follow the Muslim law. The followers of Islām are buried with Muḥammadan rites.

PASSAROWITZ. [See POŽAREVAC.]

PASWAN-OGHLU (written پاسان اوغلی; cf. *Kāmūs al-A'lām*, ii. 1467) or Pazwant-Oghlu (پازواند اوغلی) in 'Abd al-Raḥmān Sharaf, *Tārīkh*, ii. 280) or, according to the new orthography, Pazvantoğlu (Hāmit ve Muhsin, *Türkiye Tarihi*, p. 423) but on his own seal "Pazwand-zāde 'Oṭhmān" (in Orėškow, see *Bibl.*), the rebel Pasha of Vidin (1758—1807). His family originated in Tuzla in Bosnia, but his grandfather Paswan Agha, for his services in the Austrian wars, was, granted two villages near Vidin in Bulgaria about 1739. Oṭhmān's father 'Omar Agha Paswan-Oghlu not only inherited these villages but as *bairaktār* etc. was also a rich and prominent man (*āyān*); on account

of his defiant attitude, however, he was put to death by the local governor.

'Oṭhmān himself only escaped death by escaping into Albania, but after taking part in the war of 1787—1789 as a volunteer, he returned to his native town. Very soon he was in the field again and fought with distinction, returning to Vidin in 1791. From there he organised with his men raiding expeditions into Wallachia and Serbia. When the sultān wanted to punish him for this he cast off his allegiance in 1793, took to the mountains and at the end of 1794 captured Vidin with his robber band and became the real ruler in the pashalik there. Vidin, which he fortified again, thus became a meeting-place for robbers and discontented janissaries who were driven out of Serbia in 1792, and he himself became the popular leader of all those who opposed the reforms of Selīm III.

In 1795 Paswan-Oghlu even attacked the governor of Belgrade, Hādīdjī Muṣṭafā Pasha, a supporter of the reformers, who had been given the task of disposing of him; strong bodies of troops were sent by the Porte but without success. In consequence negotiations were begun at the end of 1795 but Paswan-Oghlu remained practically independent in the whole of Upper Bulgaria.

But since the Porte did not also formally recognise him, Paswan-Oghlu drove the official governor out of Vidin and in 1797 attacked the adjoining pashaliks: in the east his forces occupied or threatened a number of places in Bulgaria (but they were defeated at Varna) and in the south they attacked Nish [q. v.] without success; in the west they advanced up to Belgrade, occupied the town but were driven back from its fortress by the resistance of the Turks and Serbs whom Hādīdjī Muṣṭafā had armed. As a result of this and because of Paswan-Oghlu's negotiations with France and Russia the Porte in 1798 sent an army of 100,000 men against him under Admiral Küçük Husain Pasha. He besieged Vidin in vain until October and had to withdraw with heavy losses. This defeat and Napoleon's invasion of Egypt induced Turkey to come to terms, nominally at least, with Paswan-Oghlu and give him the rank of Pasha of three tails (1799).

Nevertheless he declared himself against the reforms, against the central government and even against Selīm III; he also sent several expeditions to plunder Wallachia (1800 and 1801) and incited the janissaries who had in the meanwhile returned to Belgrade to occupy the fortress (in the summer of 1801) and to murder Hādīdjī Muṣṭafā Pasha (at the end of the year).

At this time he repeatedly asked the Czar to number him among his faithful subjects and also offered his services to France. The Porte, which shortly before had forgiven Paswan-Oghlu everything, from 1803 declared war on him again, but the Serbian rising of 1804 diverted their attention. Paswan-Oghlu himself had to fight in the western part of his territory against Pintzo's rising (1805). The appearance of the Russians on the left bank of the Danube (1806) induced him to offer his services to the Porte but the latter instead gave the supreme command to the commander of Rusčuk. This embittered him so much that he resolved to defend only his own territory against the allied Russians and Serbians but he died soon afterwards on Jan. 27, 1807.

That Paswan-Oghlu was able to hold out so long was due to the state of the Ottoman empire at the time, to his personal ability and foresight (he never abandoned Vidin!) but for the most part to luck. Within his area he collected customs and taxes, ruled strictly and despotically, although not entirely without mildness and justice. Although his health was rather poor as a result of too great mental strain, ambition led him to aim at independence as evidence of which we have the coins struck by him and known as *Pasvančeta*.

Bibliography: Various notes on Paswan-Oghlu are already found in the contemporary travels of G. A. Oliver (1801) and L. Pouqueville (1805), but it is not till the *Notes sur Passvan-Oglou 1758—1807 par l'adjudant-commandant Mériage*, of the French agent in Vidin (1807—1808), that we have a complete picture of him which is still the best account of his career; these *Notes* were edited by Grgur Jakšić in *La Revue Slave* (vol. i., Paris 1906, p. 261—279 and 418—429; vol. ii., 1906, p. 139—144 and 436—448; vol. iii., 1907, p. 138—144 and p. 278—288) and transl. in the *Glasnik zemaljskog muzeja* (vol. xvii., Sarajevo 1906, p. 173—216) into Serbokroat. — Also: J. Corović, in *Narodna enciklopedija*, vol. iii., Zagreb 1928, p. 272.

(FEHIM BAJRAKTAREVIĆ)

PATANI, an administrative district of Siam in the extreme south of the kingdom on the east coast of the peninsula of Malacca; it is bounded on the south by the Malay states of Kelantan and Kedah, both under British protection. The whole district is made up of seven Malay petty states, each with its own native chief who is assisted by a Siamese official. Malay forms of government are allowed to remain. In the capital of the same name resides the Siamese High Commissioner of the district. His advice has to be obeyed by the rulers of the states.

The native inhabitants are Muslims. Friday and other mosques are distinguished. The latter are called *surau* and have their own staffs. All the states have law-courts: the *shari'a* is followed in matters of family law, Siamese law in other cases.

Patani is a very mountainous country. There is only a strip of plain on the coast. The area is about 13,000 sq. km. and the number of inhabitants about 350,000; the great majority are Malays, the remainder being Siamese and Chinese. There are few roads. The railway which connects the Siamese Southern railway with the English lines in Malacca cuts through the country a short distance from the coast. Agriculture is of little importance; only in the environs of Patani and in Nawng-

Chik rice is cultivated. A large number of the people live by fishing; the fish caught are salted with salt obtained locally. Tin-mining is increasing. The exports include dried fish, salt, cattle, elephants and tin. Intercourse with Bangkok and Singapore is maintained by small steamers. The revenues amount to £45,000, of which one third is allotted to the Malay rulers as private income for themselves and their families, one third goes to administration, and a third set aside for special purposes, is also as a rule used for administrative purposes.

Fra Odorigo of Pordenone in 1323 mentions a place called *Patén* in this region, which he identifies with Thalamasyn. It is doubtful whether the reference is to Patani. The first certain occurrence of the name is in the xvth century when the Portuguese begin to come here to trade. Patani has for centuries belonged to Siam. Advancing southwards the Thai reached Ligor about 1284 (on the coast, a little N. W. of Patani; Sukhotai inscription); in 1350 the whole of the peninsula of Malacca was under Siamese rule; the conquest of Patani took place between those dates. The *Nāgarakṛtāgama* in 1365 mentions Djēre, the modern Djēring, one of the seven states of the district with its capital on the sea, a little east of the town of Patani, as conquered by the Javanese kingdom of Madjapait. Soon after the conquest of the town of Malacca in 1511, the Portuguese began to trade in Patani. Many Portuguese settled here. About 1600 the Dutch and English appeared; Patani at this time was a prosperous centre of trade, a station between Malacca and China and a depot for the exchange of goods from China on the one side, and the most important harbours of the East Indian Archipelago on the other. When this last activity began to decline about 1620, the place lost its importance and the Europeans abandoned their settlements.

It is not definitely known when Patani became converted to Islām. About 1600 it was a Muḥammadan country; the queen ruling at this time had succeeded her husband fifteen years before; in all probability the country was already Muḥammadan at an earlier date when Mendez Pinto (1534, 1540) visited it. According to native tradition, the conqueror of the land, Chaw Sri Bangsa, a son of the Siamese king, converted the country to Islām, after adopting it himself and taking the name and title of Sulṭān Aḥmad Shāh. He is said to have acknowledged the suzerainty of Malacca; this suggests that Malacca was the power that caused the conversion. Malacca, as is well known, was during the xvth century the predominant power in the Malay Peninsula.

(R. A. KERN)

PATHĀN. [See AFGHĀNISTĀN, i. 149 sqq.]

PAULĀ, the name given in the Moghul Emperor Akbar's monetary system to the $\frac{1}{4}$ *dām* ($\frac{1}{4}$ *paisā*). (J. ALLAN)

PEČENEKS, a people of Turkish stock of the middle ages. Their name occurs in numerous variants (Badjnāk, Pačnak, Πατζινάκιται, Πατζινάκαι, Patzinacitae, Patzinacae, Piccinigi, Pincenakiti, Pecenaci etc.; also Bysseni, Bessi, in Hungarian Besenyők, etc.). There is no longer any doubt that they were a branch of the Turkish race. Rashīd al-Dīn (xiiith century; see GHĀZĀN) and Mahmūd Kāshgharī (1073) number them among the Ghuzz [q. v.] tribes; the latter (*Divān Luġāt al-Turk*, i. 27; cf. *K. Cs. A.*, i. 36) puts them in the northern group of Turkish peoples, to which the Kipčak, Oghuz, etc. belong and describes them "as next to the Rhomaeans" i. e. the most westerly Turkish tribe.

In all probability the Pečeneks separated very early from their brethren in the original home of the Turks in Turkestan. Their earlier home is said to have been the Emba-Ural-Volga region, which according to Bakri and Gardīzī was 30 days' journey in length and breadth. There they remained probably for a considerable time, their neighbours being the Khazārs in the S. W. and the Oghuz in the S. E., and they traded with Persia and Khwārizm.

But by 860 the Oghuz began to move westwards and to drive the Pečeneks from the Ural region. Towards the end of the ixth century the Oghuz (Uzen, Οὔζοι) came to terms with the Khazārs and drove the main body of the Pečeneks from their old home, so that in 922 Ibn Faḍlān found only a small remnant of the Pečeneks there; according to *De administrando imperio* (p. 166), the latter remained there of their own accord.

The fugitive Pečeneks came up against the Magyars, drove them into Hungary and occupied their lands, at first the territory between the Don and the Dnieper and later as far as the Danube. Constantine Porphyrogennētos (c. 950) says this took place "fifty years ago", but the chronicler Regino (d. 915) dates it exactly in 889. The power of the Pečeneks in the end extended from South Russia over Bessarabia and Moldavia up to the Eastern Carpathians.

Warlike and powerful as they were the Pečeneks were a constant danger to their neighbours. Here however we can only briefly mention their relations with Hungary, Russia and Byzantium. In the course of the xth and xith centuries they frequently attacked Hungary from the Eastern Carpathians or settled peacefully in various Hungarian districts (cf. the map of their settlements in Németh, *Die Inschriften des Schatzes von Nagy-Szent-Miklós*, I. Beilage). In the xiiith century the Pečeneg settlements in Hungary still enjoyed certain special political privileges. They finally became merged in the Komans.

With the Russians, the Pečeneks were early on friendly terms (according to the *De adm. imp.*, p. 69, they sold them cattle, horses and sheep); sometimes they were their allies against Byzantium and Bulgaria (in the time of Igor, 941), but more frequently they were attacking the Russians. In the year 968 they besieged Kiev, in 971 they killed the Grand Duke Sviatoslav on his way back from Bulgaria and the Russians had to build a number of fortifications against them. Their last

attack (1034) was completely repulsed. A little later (1065) they were being hard pressed by the advancing Uzen and moved more and more towards the Danube and later also back to the Balkan peninsula.

The Byzantine imperial historian in *De adm. imp.* (p. 68) recommends the maintenance of peaceful relations with the Pečeneks and there was actually an alliance with them but by 970 we find them fighting with the Russians against Byzantium. Henceforth the Pečeneks were continually at war with the Byzantines until the emperor Alexius I in 1091 routed them completely at the mouth of the Maritza and in 1122 John II inflicted another heavy defeat upon them. Of the remnants of the Pečeneks some were taken into the military service of the Byzantines and some settled in the Balkan, especially in Bulgaria. The Gagauz [q. v.] are sometimes regarded as what was left of them but their present language gives very little evidence of this (cf. vol. iv., p. 992). Nevertheless a number of Balkan place-names still recall the fact that the Pečeneks were once there.

With the nomadic nature of the Pečeneks it is obvious that the tribal organisation was an important factor. According to C. Porphyrogennētos the Pečeneks were divided into eight tribes (four beyond and four on this side of the Dnieper) with as many great chiefs and into 40 clans with petty chiefs. The names of the tribes according to Németh were mainly derived from the names of horses and from titles of the supreme chief e.g. Συρουκαλπέν = *suru Kül-bey*, i. e. "the tribes of Kül-bey, with grey horses". The three tribes who were prominent for bravery and distinction are called Kangar (Κάγγαρ) by Porphyrogennētos. Of the names of chiefs that of the tribe of Jula (Γύλα), namely Korčut [q. v.], is probably the most remarkable. In the time of Kedrenos (ii. 581—582) there were thirteen Pečeneg tribes "each of which had inherited its name from its ancestor and chief".

We know very little about the religion of the Pečeneks. According to Bakri, they were formerly fire-worshippers (Magians) but according to other sources there were already a considerable number of Muslims among them by the beginning of the tenth century.

As to the Pečeneg language, Anna Comnena (xiith century) already asserts its identity with that of the Komans [see KIPČAK]. Until recently its scanty remains consisted almost entirely of the names of the Pečeneg tribes, chiefs and fortresses listed by C. Porphyrogennētos. But when in 1931 Németh succeeded in deciphering the inscriptions of the treasure of Nagy-Szent-Miklós, it became evident to him that the gold and silver vessels contained in it belonged to the Pečeneg chief Bota-ul Čaban (c. 900—920) and that we had here further specimens of the Pečeneg language; from these he concluded that the language of the Pečeneks was closely connected with that of the Komans in Hungary and that of the Codex Cumanicus. The characters of these inscriptions may be called Pečeneg runes, which belong to the family of the Kök-türk script and are closely connected with the Hungarian runes.

In conclusion, from the fact that there are two baptismal fonts in the treasure of Nagy-Szent-Miklós it may be assumed that several Pečeneg chiefs were converted to Christianity. Very

little more is known of the Pečenegs; cf. however the index to K. Dieterich (s. *Bibl.*).

Bibliography: The earliest Arabic (Ibn Rusta and Bakrī) and Persian (Gardīzī) records of the Pečenegs are based on *Ḍajihānī* (tenth century) and on a source of the first half of the ixth century so that they only refer to the earlier home of the Pečenegs; Mas'ūdī's account however includes the period after they were driven from the Volga region. Both groups of sources have been used by J. Marquart and W. Barthold. — Also: Constantinos Porphyrogenētos, ed. Bonn, vol. iii. (1840) see index historicus (the whole of ch. 37 deals with the Pečenegs); P. Golubovskiy, *Pečenegi, torki i polovci do nashetviya tatar'*, Kiev 1884; *Sh. Sāmī Bey, Kāmūs al-A'lām*, ii. 1306; K. Krumbacher, *Geschichte der byzantinischen Literatur* 2, 1897, p. 1105, G.; *Enciklopedičeski Slovar' Brokgaus-Efron*, vol. xxiii., St. Petersburg 1898, p. 538 sq.; J. Marquart, *Osteuropäische und ostasiatische Streifzüge*, Leipzig 1903, s. index; *Révai Nagy Lexikona*, vol. iii., Budapest 1911, s. v. *Besenyők*; K. (FEHIM BAJRAKTAREVIĆ)

PEČEWI, Ibrāhīm, Ottoman historian. Ibrāhīm was born in 982 (1574) in Fünfkirchen (Hungary, Hung. *Pécs*, Turk. *Pečewi*, i.e. *Pečewil?*) whence his epithet *Pečewi* (cf. Pečewi, *Tārīkh*, i. 286 and ii. 433; also J. v. Hammer, *G. O. R.*, iv. 5, note). His ancestors were holders of fiefs in Bosnia and Hungary. Pečewi has not recorded his father's name (cf. *Tārīkh*, i. 87); he was in any case already domiciled in Fünfkirchen. His mother was a member of the celebrated family of Sokolović (Šokolli). Of Pečewi's early years, we know that at the age of 14 he was taken as an orphan into the house of his uncle Ferhād Pasha, governor of Ofen, and later went to another relative Lālā Mehmed Pasha (cf. his *Tārīkh*, ii. 323); he spent 15 years in the latter's entourage. In 1002 (1593) he joined the army, took part in the Hungarian campaigns of Sinān Pasha, was an eye-witness of the siege of Gran (cf. *Tārīkh*, ii.

136, 180), of the Erlau campaign and the siege of Peterwardein. The next few years he spent mainly on the staff of Lālā Mehmed Pasha who had been grand vizier since 1013 (1604). He gives a detailed account in his history of the various offices which he held. After the death of his patron Lālā Mehmed Pasha (1024 = 1615) he was sent by his successor to Anatolia where he had to prepare a description of several sandjaks. He was next *defterdār* for a short period in Tokat, went in the same capacity to Rumelia and finally was given the office of Anatolia as "alms". He spent the rest of this life in his native district. He became *muteşarrif* of Stuhlweissenburg, then *defterdār* of Temesvár. In 1051 (1641) he retired from office and went to Ofen. He spent his last years here and in his native town engaged in writing his history. The date of his death is not exactly known. He must however have died about 1060 (1650).

Ibrāhīm Pečewi, who from his youth upwards displayed a marked turn for history, is the author of a work which is one of the best Ottoman sources for the years 926—1049 = 1520—1639. While for earlier events he relies upon the accounts of his Turkish predecessors, and as N. v. Istvánffy and K. Heltai have shown, also Hungarian sources, for the later period he writes from his own observation or information. His work, which is written in lucid and simple language, survives in numerous manuscripts (to those detailed by Babinger, *G. O. W.*, p. 194 may now be added two others in Upsala, University Library, cf. Zetterstéen, *Katalog*, p. 331 and a manuscript in Rhodes in the possession of Ḥafiz Aḥmad, N^o. 446), but so far we have no critical edition. Several preliminary drafts seem to exist which vary considerably in the periods covered and were presumably later expanded. The Stambul printed edition of the *Tārīkh-i Pečewi* in two parts (10 + 504 pp. and 7 + 487 pp., printed 1283; cf. *J. A.*, 1868, i. 471 and 484 and F. v. Kraelitz, in *Isl.*, viii. 259) covers the period from the accession of Sulaimān the Magnificent to the death of Murād IV in 1049.

Bibliography: F. v. Kraelitz, in *Isl.*, viii. (1918), 252 sq. and the sources given in Babinger, *G. O. W.*, p. 195.

(FRANZ BABINGER)

PECHINA, Arab. *BADJDJĀNA*, formerly an important town in the south-east of Spain, to the north of Almeria [q. v.] (originally *Marīyat Badjdjāna*), from which it is about six miles distant. Towards the middle of the ninth century it was the centre of a kind of maritime republic founded by Andalusian sailors, who had also a colony on the Algerian coast at Tenes [q. v.]. It consisted of several quarters separated by gardens; becoming the capital of a *kūra* of the same name, Pechina was later supplanted by its neighbour Almeria, to which its inhabitants soon migrated.

(E. LÉVI-PROVENÇAL)

PEHLEWĀN, MUHAMMAD B. ILDEGIZ, SHAMS AL-DĪN, Atābeg of Ādharbāidjān. His father Ildegiz [q. v.] had in course of time risen to be the real ruler in the Saldjūk empire; the widow of Sulṭān Tuḡhrīl [q. v.] was Pehlewān's mother and Arslān b. Tuḡhrīl [q. v.] his step-brother. In the fighting between Ildegiz and the lord of Marāgha, Ibn Aḳ Sunkur al-Aḥmadīlī, Pehlewān played a prominent part [cf. the article MARĀGHA]. From his father he inherited in 568 (1172—1173) Arrān, Ādharbāidjān, al-Djibāl, Hamadhān, Iṣfahān and al-Raiy with their dependent territories and a few years later he also took Tabriz, which he gave to his brother Kīzl Arslān [q. v.]. Like Ildegiz, Pehlewān also became the real ruler. Sulṭān Arslān b. Tuḡhrīl was completely under his control as was also his young son Tuḡhrīl [q. v.], whom Pehlewān put on the Saldjūk throne, after Arslān had been disposed of by poison. Pehlewān died in Dhū 'l-Hiǧǧja 581 (Febr.—March 1186) or the beginning of 582 (1186) and his brother Kīzl succeeded him.

Ibn al-Athīr (xi. 346) pays a high tribute to Pehlewān's statesmanlike qualities and during his tenure of office peace and prosperity prevailed in his governorship. After his death however, bloodshed and unrest broke out. In Iṣfahān the Shāfi'is and Hanafis fought one another and at al-Raiy the Sunnis and Shī'is until order was gradually restored.

Bibliography: Ibn al-Athīr, *al-Kāmil* (ed. Tornberg), xi., xii., s. index; Ḥamd Allāh Mustawfi-i Qazwīnī, *Tārīkh-i Guzīda* (ed. II. LANGUAGE AND DIALECTS.

(H. W. BAILEY)

III. MODERN PERSIAN LITERATURE.

(E. BERTHELS)

I. HISTORICAL AND ETHNOGRAPHICAL SURVEY.

Name. The name Persia is of Western origin and probably only in the Middle Ages began to be used for the countries occupying the Iranian plateau (in Plautus Persia is found once instead of Persis). It is derived from the Greek-Roman appellation "Persae" for the Achæmenids, an appellation that goes back to the name of the region of Persis in the south-west, named in its turn after a tribe that is probably identical with the Parsua, known by the Assyrian inscriptions as having occupied formerly a part of Media (oldest mention 844 B. C.). The name Fāris (New Persian: Pārs) in Muḥammadan times is applied to the same region of Persis only, but *Fāris* was already at an early time used for one of the types of language spoken in the Iranian provinces (cf. *Fihrist*, ed. Flügel, p. 13),

which language since the ixth century became the written literary language that we call Persian. Equally the appellation *al-Furs*, found in early Arabic literary sources, denoted the whole of the people of Persia, but was restricted in use to the Persians of pre-Islāmic times or to those who had kept to their ancient traditional and religious views. This meaning is often synonymous with the Arabic expression *al-ʿAdjam*.

The form *Īrān* is of Pehlevi origin and goes back to an earlier form *Ariana*, originally an adjective (*airyana* in the younger Avesta) meaning "Aryan". It was the name of the core of the state of the Sāsānids, who styled themselves "kings of Ērān and Anērān", and it occurs in the early Arabic historical and geographical sources in the form *Īrān-shahr*, meaning the country of Īrān (cf. i. a. Yāqūt, i. 417 sqq.). In Muḥammadan times the name became popular again by the revival of the ancient traditions in the *Shāh-nāma*, but the use of the word *Īrān* for the modern kingdom of Persia is probably not older than the xixth century, when the Persians began to call themselves *Īrānīyān* (about 1890 there existed already a newspaper called *Īrān*). Nor does the use of the words "Iranian" and "Iranistic" in scientific publications appear to be older than the second part of the xixth century (Spiegel's *Eranische Altertumskunde* was published since 1871, and Darmesteter's *Études Iranienues* in 1883).

Geographical survey. Throughout the Middle Ages Persia was neither a geographical nor a political unity. In treating the Persia of Muḥammadan times we therefore must choose an arbitrary delimitation of the country, namely the territory comprising present Persia, Afghānistān and Balūčistān and in addition the region of Marw as far south as the present Persian frontier. The territory thus circumscribed may represent the actual Achæmenid and later the Sāsānid empires, excluding the territories of al-ʿIrāq, Mesopotamia and Armenia, which during both periods belonged to those empires; Babylonia was called even in Sāsānid times *Dil-i Irānshahr* (*B. G. A.*, vi. 5).

The greater part of Persia thus circumscribed consists of a plateau, very mountainous in parts, with the coastal regions of the Caspian and the Persian Gulf. With the exception of these coastal regions the waters of Persia have no outlet to the sea. The consequence is that there are hardly any great streams, the only rivers deserving that name being the Hilmand, which falls, like many smaller streams, into the depression of the Sistān lake, and the Heri-Rūd, which ends in the northern steppe. The many small streams allow only of a limited cultivation in the mountain valleys and on the fringes between the mountains and the deserts. This circumstance gives even to the inhabited mountainous stretches of the plateau the character of a series of oases, which are larger or smaller as the irrigation system (mostly effected by the subterranean aqueducts called *kahriz*) is more or less developed. The territory between the oasis towns and villages is steppe, which, in central Persia, become real desert, the soil of which is more or less salish. The steppes, as also the higher mountain regions, support nomad life only, as they are only habitable during certain periods of the year, to which cause is added the very considerable variation of temperature in many regions. Nomads or semi-nomads have therefore

always lived together on the Iranian plateau with the settled population; the proportion has considerably varied on account of the frequent invasions of nomad peoples. Persia consists of a number of regions of very different character, which accounts for the lack of political unity during long periods of history. Each of these regions has formed occasionally an important political and cultural centre and the Islamic geographers in describing Persia give for each of them its own description. Their division is mainly traditional and at the same time geographical, but disregards the very variable and ephemeral political frontiers.

The regions may be divided into a western and an eastern group, separated by the great central Iranian desert, which extends from the Caspian Sea south-eastwards practically as far as the Indian Ocean in Mukrān. This desert, called by the geographers *Mafāzat Khurāsān*, *Mafāzat Fāris*, *Mafāzat Kirmān* or *Mafāzat Sīstān*, depending on the parts particularly taken into consideration, varies in breadth and character. Its level is on the whole considerably lower than the eastern and western parts of the Iranian plateau. The northern part is a large salt desert, where vegetation is hardly possible. Further to the south, to the east of Fāris, begins the region called on modern maps Dasht-i Lūt; here, and further to the south-east there are not a few oases, which form important resting points on the many caravan ways that have linked up since olden times Fāris and Kirmān with Khurāsān and Sīstān. In the southern regions of Tūrān and Mukrān, with which is linked the large desert to the south of the Hilmand river, the desert or steppe character is prevalent. This series of deserts, though not forming an impassable barrier between east and west, has often coincided with political frontiers; only in the north in the region of Kūmis, east of al-Raiy (later Teheran) and along the Caspian coast, a more continuous cultivated stretch links up Media with Khurāsān.

The central part of the western regions is Media, called al-Djibāl in Muḥammadan times and later 'Irāk-i 'Aḍjamī, consisting of a plateau all covered by mountain ranges running mainly from N. W. to S. E. and bordered on its south-western side by the Zagros mountains; the most important towns are here Hamadhān and Isfahān. To the north-west Ādharbāidjān forms a continuation of al-Djibāl, from which it is separated by the desertlike region of Ardalān. Ādharbāidjān is still more mountainous, being a transition to the Armenian and Caucasian mountain systems; it is also richer in water-courses; the river Araxes (al-Rass) may be considered its northern boundary. Its chief geographical feature is the big salt lake of Urmiya. In early Muḥammadan times Ardabil was here the most important place, succeeded in modern times by Tabriz. The small coastal border to the east of Ādharbāidjān belongs to the South Caspian regions, known in Islamic geography as al-Djīl, al-Dailam, and further Ṭabaristān, now Gilān and Māzandarān. This region consists of a narrow coastal stretch, widening somewhat towards the east and contrasting with the rest of Persia by its moist climate and rich vegetation; to the south it slopes rapidly upwards to the high range of the Elburz that forms the northern border of the central plateau; alongside the southern slope of this range stretches a narrow cultivated and

inhabited area, in which al-Raiy was the most important town and through which ran the main route to Khurāsān, passing, after al-Raiy, Samnān, al-Dāmaghān and Bistām. At the south-eastern corner of the Caspian the route passed south of the mountain region of Djurdjān, which region, owing to the fact that its waters — the rivers Djurdjān and Atrak — flow towards the Caspian, does not belong geographically to Khurāsān.

In the south of al-Djibāl the Luristān mountains are a transition to the low country of Khūzistān, the ancient Elam and the modern 'Arabistān. It is very similar to al-'Irāk, from which it is separated by desert stretches. The river of Ahwāz, now the Kārūn, fed by its tributary the Kerkhā, in the early Middle Ages flowed directly into the Persian Gulf, and later into the Shaṭṭ al-'Arab. To the east of Khūzistān and south-east of al-Djibāl begin the mountain ranges of Fāris with their many mountain lakes and their fertile valleys, which find their continuation in the similarly shaped mountain region of Kirmān, where, however, the desert areas are more numerous. The chief town of Fāris in mediæval and modern times, Shirāz, has replaced the ancient towns of Djūr and Ištakhīr, while the mediæval towns of Kirmān, al-Sirādjān and Djiruft, have disappeared, the present town of Kirmān being comparatively young. The coastal region of Fāris and Kirmān is barren; here were the very important ports of Tawwādj, Siniz, Sirāf and Hormuz, now replaced by Būshīr and Bandar 'Abbās. The geographers distinguish in Fāris and Kirmān a southern hot zone (*ḡurūm*, *garmsīr*) and a northern colder zone (*ṣurūd*, *serdesīr*), a distinction important to nomads and pertaining to the climate and the vegetation; "hot regions" are found, however, also in the north-eastern parts of Kirmān, where the land descends to the level of the central desert. The oasis of Yazd and environs is generally counted a part of Fāris. The country east of Kirmān as far as the Indus, occupied by several mountain ranges, is poor in cultivated areas and has not much importance as a passage to the Indus region. It consists of the coast region of Mukrān and the parallel inner zone of Tūrān, forming together the present Balūčistān.

The north-eastern part of the Iranian plateau consists of three main regions, of which Sīstān with al-Rukhkhādj (Arachosia) is formed by the basin of the Hilmand; these waters flow into the Sīstān lakes, which have considerably changed their form in the course of history. The principal mediæval towns were Zarandj and Bust. The mountain ranges become higher towards the north of this region and run mostly north and south; the eastern border is the water-shed of the Indus valley. To the north of Sīstān stretches the large region of Khurāsān. Its main features are a series of mountain ranges running east and west, bordered in the east by the Hindū Kush; between these mountains flow a number of rivers, mainly from the south-eastern ranges to the north-west or the north, where they lose themselves in the desert bordering the south bank of the Djaiḥūn (Amū Daryā) and continuing in a western direction towards the Caspian. The largest river is the Herī-Rūd, on which is situated Herāt, then the Murghāb with Marw al-Rudh and Marw, and the river of Balkh. The westernmost section of Khurāsān with Isfarāyīn, Nisābūr and Ṭūs (Meshhed) receives its waters from the western mountains that form a

not quite complete watershed between *Khurāsān* and *Djurdjān*. Though certainly presenting a geographical unity, the large extent of *Khurāsān* allows the division into smaller regions, such as *Bādghis*, *al-Djūzadjān*, *Tukhārīstān* and others. The present frontier between Persia and *Afghānistān* cuts from north to south right through *Khurāsān* and *Sistān*. Finally the basin of the Indus and its tributaries forms a region of its own, although the part with *Kābul* to the south of the *Hindū Kush* and *Ghazna* (*Zābulistān*) was often counted by the Islāmic geographers to *Khurāsān*. The more southern part of the Indus valley is separated from the *Hilmand* system by the *Sulaimān* range and the deserts of *Waziristān* and is, owing to climate, poor in cultivated areas.

All over the Iranian plateau a system of secular caravan roads links up the many cultivated centres. The chief connections with the surrounding countries were the passage of the *Araxes* towards the eastern *Caucasus* (*al-Rān*), the passes west of *Urmia* to *Armenia*, the pass-ways of *Shahrizūr* and *Hulwān* to *Mesopotamia* and *al-ʿIrāk*, and the road from *al-Baṣra* to *Ahwāz*. The sea-ports on the *Persian Gulf* maintained regular intercourse with the coast towns of *Arabia*, *India* and even *Eastern Africa*. Towards *Transoxania* (*Mā warāʾ al-Nahr*) the chief passage went by *Tirmidh* on the *Oxus*, while the roads from *Kābul* and *Ghazna* to *Multān* were the chief connections between the Iranian plateau and the Islāmic parts of *India*. The *Caspian* ports maintained a small traffic with the *Volga* mouth.

Historical survey. The relations between *Arabia* and *Persia* date from long before Islāmic times. Arabs settled in southern *Persia* from the time of *Shāpūr I*, and the *Sāsānids* were masters of southern *Arabia* up to the time of *Muḥammad*. Then began, under the caliph ʿUmar, the Arab conquest of *Persia*, which inaugurated the Islāmic period in the history of that country. The political and psychological prelude to this conquest was the taking of the capital of the *Sāsānid* empire, *al-Madāʾin*, in 637, after the battle of *al-Kādisiya*. Although the exact dates of the different conquests and battles are not known, the early historical sources allow a reliable survey of the phases of the amazingly rapid progress of the Arabic invaders all over the Iranian plateau. For, with the exception of *Mukrān* and *Kābul*, all regions had been reached, as far as *Balkh*, before the death of the caliph ʿOthmān (656). We may distinguish different chief expeditions that were directed primarily from *Madina*, and secondarily from *Kūfa* and *Baṣra* by the governors of those two garrison towns. The first expedition, however, the conquest of the greater part of *al-Djibāl* and south-eastern *Ādharbāidjān*, was the immediate consequence of the capture of *al-Madāʾin* by the army of *Saʿd b. Abi Waḥḥās*. It was followed, probably in 638, by the battle of *Djalūla* and the conquest of *Hulwān*, *Qarmisin* (*Kirmānshāh*) and, after reinforcement had been sent from *Kūfa*, by the famous battle of *Nihāwand*. These events caused the flight of king *Yezdegerd* by the way of *Iṣfahān*, *Iṣṭakhr*, *Kirmān*, *Sidjīstān*, to *Marw*, where he was killed by the *Marzubān Māhūya* (651). Immediately after *Nihāwand* came the capitulation of *Ardabil* (about 641), together with raids into *Djilān*. The further conquest of *Ādharbāidjān*, however, started from *Mōṣul*, taken in 641 by ʿOtba b. *Farḳad*, who, in the course of his ex-

pedition, took *Shahrizūr*, *Urmia* and several other places in *Ādharbāidjān*. *Nihāwand* remained the base from which, under the direction of the first governors of *Kūfa*, were conquered *al-Raiy* and the towns of *Kūmis* (after 641), and about the same time *Hamadhān*, *Qazwīn* and *Zandjān*. In the following years several expeditions were necessary in this region against the *Dailamis* and other mountaineers. From *Kūfa* started also the first invasion of *Khūzistān* under the governor *al-Mughīra b. Shuʿba*, but the real conquest of this region began in 638 under the famous governor of *Baṣra* *Abū Mūsā al-Ashʿarī*. The subjugation of this very near neighbour did not take much time, the most serious resistance being met at *Tustar* (*Shūstar*). *Khūzistān* remained *Abū Mūsā*'s base, from which he conquered the remaining towns of *al-Djibāl*, namely *al-Sīrwān*, *al-Ṣaimara*, *Qumm* and *Qāshān*, and finally, in 644, by means of his lieutenant ʿAbd Allāh b. *Budhail*, *Iṣfahān*. The latter was also the first to move in the direction of *Khurāsān* by forcing the towns called *al-Ṭabasān* to capitulate. About the same time took place the first invasion of *Fāris*, not, however, from *Khūzistān*, but from the opposite Arabian province of *al-Baḥrain*, whose governor ʿOthmān b. *Abi ʿAl-ʿĀs* had an encounter with the *marzubān* on the island of *Abarkawān* and subsequently took *Tawwadj*, from where he began raids on the other towns of *Fāris*. His brother *al-Hakam* defeated the *marzubān* of *Fāris* near *Rāshahr* on the coast, in 640, in a great battle, which, according to *al-Balādhuri*, was equal in importance to that of *al-Kādisiya*. Then *Abū Mūsā* was ordered to join forces with ʿOthmān b. *al-ʿĀs*. Together they conquered between 644 and 647 a number of towns: *Arradjān*, *Shabūr*, *Shīrāz*, *Sinīz*, *Dārābdjird*, *Fasā*; *Abū Mūsā* penetrated far into *Kirmān*. *Shīrāz* became here the principal Arab garrison. It was from here that, in the caliphate of ʿOthmān, started the great campaigns of ʿAbd Allāh b. ʿĀmir, after his appointment as governor of *Baṣra*. In 649 he took the not yet conquered towns of *Iṣṭakhr* and *Djūr*, and in 650 he set out for the conquest of *Khurāsān*; the reason of this is said to have been an invitation by the *marzubān* of *Tūs*, addressed equally to his colleague of *Kūfa*, *Saʿid b. al-ʿĀs*. But while *Saʿid* did not go beyond *Tabaristān* and *Djurdjān*, where the *malik* was made tributary, ʿAbd Allāh became the real conqueror of *Khurāsān*. He had already dispatched his lieutenant *Mudjāshiʿ b. Masʿūd* towards *Kirmān*, in pursuit of *Yezdegerd*; this first expedition having failed, *Mudjāshiʿ* was sent a second time to *Kirmān* in 650, where he conquered the principal towns: *al-Sīradjān*, *Bamm* and *Djiruft*. Battles were fought near *Hurmuz* and in the *Kūf*s mountains. A similar minor expedition was sent by ʿAbd Allāh to *Sistān*, under *al-Rabīʿ b. Ziyād*, who crossed the desert from *Fahradj* and conquered with considerable difficulty *Zarandj*, the capital of *Sistān*, where he remained several years. His successor having been expelled from *Zarandj*, ʿAbd Allāh dispatched ʿAbd al-Raḥmān b. *Samura*, who reconquered the country and penetrated as far as *Dāwar*, *Bust* and *Zābul*. In 650 ʿAbd Allāh had in the meantime proceeded to *al-Ṭabasān*, already conquered, and sent from there *al-Aḥnaf b. Qais* to the conquest of *Kūhīstān*. He himself reached *Nisābūr*, which surrendered after a siege. From there several

towns were subdued by him and by his lieutenants, and with the *marzubān* of Tūs a treaty was concluded. Marw capitulated without a fight. A secondary expedition to Herāt under Aws b. *Ṭhaʿlaba* resulted in the capitulation of the ruler of that town, while finally eastern *Khurāsān* was raided by al-Aḥnaf b. *Ḳais*, who fought a decisive battle near Marw al-Rūdh and conquered the region of al-Djūzadjān and the town of Balkh, continuing from here this advance as far as *Khwarizm*. When ʿAbd Allāh b. ʿAmir returned, he left *Ḳais* b. al-Haiṭham as the first governor of *Khurāsān*.

This was the military situation at ʿOthmān's death. The conquests were by no means secure, least of all in *Sistān* and *Khurāsān*, but the placing of garrisons in *Nihāwand*, al-Ahwāz and *Shirāz*, enabled the Arabs to complete their conquests after the civil wars were over. The people and the authorities with whom the Arabs had to deal in Persia were very different. After the royal army had been destroyed at al-*Qādisiyya* and *Nihāwand*, it was chiefly the *marzubāns* who opposed the Arab invaders with their local troops and concluded on their own account treaties (*muṣālaḥa*), which guaranteed freedom of religion and the possession of private property against payment of *ḵharāj*. Where a town or a region had been taken by force, the Arabs became proprietors of the soil, as in the Median regions *Māh al-Kūfa* and *Māh al-Baṣra*. Wholesale acceptance of Islām, as is reported of *Kazwin*, was rare; the Zoroastrians continued the practice of their religion, notably in *Fāris* and *Ādharbāidjān*, but from *Fāris* many of them took refuge in *Sistān* and *Mukrān*, and about 700 took place the first emigration of Zoroastrians to *Kathiawar* in India. In the town of *Dārābdjird* it was the local *herbadh* who treated with the Arabs. On the other hand, many Persians were taken as captives to ʿIrāk and Arabia, where they became *mawālī*, while also entire groups, such as many knights (*asāwira*) of *Yezdegerd's* army, and different elements of the population of southern Persia (the *Zott*, *Sayābidja* and others) joined forces with the Arabs. The mountaineers, however, in *Fāris* and al-Djibāl, and especially those of *Djilān* and *Dailam*, long remained unconquered, living under petty local dynasties. In *Khūhistan* the Arabs had had to deal with remnants of the *Hephtalids* (*Hayāṭila*), still further east with polytheists (*mushrikūn*), probably Buddhists and, in *Khurāsān*, often with Turkish auxiliaries. On the other hand, the conquests introduced a contingent of Arab Muslims in the Persian towns, where they generally began by establishing a mosque; they increased by colonisation in *Umayyad* times and among them were many bearers of the traditions (*ḥadīth*) about the Prophet and other religious matters and in this way was prepared the gradual islāmisation of the population, favoured at the same time by economic conditions.

The civil war, in which not a few Persians took part in ʿIrāk, crippled for some time the Arab progress; the emissaries of ʿAlī's governors in *Kūfa* and *Baṣra* had great difficulty in maintaining themselves, and the whole of *Khurāsān* rebelled, in spite of the reported visit of the *marzubān* of Marw to the fourth caliph. Balkh was even for some time under Chinese control. It was only under the energetic governors of ʿIrāk under the *Umayyads*, *Ziyād* and al-*Ḥadjdjādī*, that the conquest was taken up with renewed vigour. Under Muʿāwiya ʿAbd

Allāh b. ʿAmir had been again appointed governor of *Baṣra* (662) and he sent again ʿAbd al-Rahmān b. *Samura* to *Sistān*, and then the Arabs reached *Kābul*, although he and his successors experienced greater difficulties in their dealings with the *Kābul* *Shāh* and the different rulers of *Zābulistān* who are called *zambīl* (according to Marquart, *Erānsahr*, p. 248). These difficulties continued throughout the *Umayyad* period and became less only when *Sistān* was joined administratively to *Khurāsān*, and the Arab domination grew stronger in the latter region. Ibn ʿAmir was also the first to begin the reconquest of *Khurāsān* by his lieutenant al-*Ḳais* b. *Haiṭham* (capture of Herāt and Balkh); it was continued by *Ziyād* b. *Abī Sufyān* (from 666), under whom Marw was made a strong Arab garrison, and shortly afterwards 50,000 Arab colonists were established with their families in *Khurāsān*. Al-*Ḥadjdjādī* operated in *Khurāsān* through his able generals al-Muhallab b. *Abī Sufra*, *Yazīd* b. al-Muhallab, and finally *Ḳutaiba* b. *Muslim*. One of the greatest difficulties was, in his time as many times afterwards, the clearing of the main road to *Khurāsān* by al-Raiy, *Ḳūmis* and *Ṭabaristān*, where many battles were fought with the mountaineers. The transfer of a considerable Arab contingent to *Khurāsān* under *Ziyād* had been a consequence of tribal wars that had started during Muʿāwiya's reign. The new comers soon began to infect the Arab soldiers of the garrisons, while at the same time the political and religious parties born from the civil war began to gain adherents in Persia, first among the Arabs and soon among their Persian clients. Prominent were the *Khāridjīs*, who, under their leader *Ḳaṭari* b. al-Fudjā'a (killed ca. 697), found a refuge in *Kirmān* and made from there raids to the north and the west. And towards the end of the *Umayyad* period, *Iṣfahān* with parts of *Fāris* and *Khūzistān* were temporarily in the power of ʿAbd Allāh b. Muʿāwiya (744—746). The main object of the *Umayyad* administration was the collection of the *djizya* and the *ḵharāj* and, until the time of al-*Ḥadjdjādī*, the books were kept by native scribes in Persian, after the custom of the *Sāsānids*. Under al-*Ḥadjdjādī* the language and the script of the administration were changed to Arabic in ʿIrāk, and we must assume that gradually Arabic came into administrative use in the Persian provinces; nevertheless the first Arab governors, and among them *Ḳaṭari*, had coins struck with *Pehlevi* and Arabic legends. A considerable advance in the islāmisation of Persia was due to the financial policy of ʿUmar b. ʿAbd al-ʿAziz and *Hishām*; after ʿUmar's edicts had induced many Persians to adopt Islām in order to get rid of the *djizya*, the taxing of Muslims and non-Muslims alike by *Hishām* brought about an assimilation of the different elements of the population, from which there emerged at this time a reliable class of Islāmic-Persian functionaries. Only the mountain people under their local chiefs remained unruly. But notably the remote province of *Khurāsān*, though revolts were not rare, and notwithstanding the continuous tribal feuds of the Arabs, remained under firm government control, owing to the presence of the strong garrison at Marw, where the governor resided, and in a not less degree to the successes of the Muslims in *Transoxania* under *Ḳutaiba*.

This makes comprehensible why the anti-*Umayyad* propaganda, directed by the ʿAbbāsids in Syria, chose *Khurāsān* as the field of operation for their

emissaries. Making use of the animosity between the Arab tribes and of the general dissatisfaction with the existing rule, this propaganda resulted finally in the revolt of Abū Muslim in 747 and his victorious entrance into Marw and soon afterwards into Naisābūr. So it was to the Arab legions in Persia and their Persian helpers that the 'Abbāsids owed their final victory in 750. This, of course, brought about a completely new orientation of Persia within the empire of the new dynasty, the more so as the 'Abbāsids transferred their residence to 'Irāq, where the centre of the last national Persian dynasty was formerly situated. Persian attitude to life and Persian tradition became dominant in the new centre of Arab political power and soon of Islāmic civilisation in the newly founded Baghdād (762). A symptom of this Persian cultural influence is the translation into Arabic of products of Pehlevi literature by authors like Ibn al-Muḳaffā. Further, powerful families of Persian origin, gained as the Barmakids, and afterwards the Banū Nawbakht, such influence as viziers on the affairs of state. This was also the time when the racial sentiment of the Persians began to assert itself in the *Shu'ūbiya* movement and when the manifestations of the Persian *zindāqs* aroused the anxiety of religious circles. The caliphs themselves showed more interest in their Persian provinces than the Umayyads had ever done; they were moreover compelled to do so, as events had shown what a powerful commander might be able to undertake against the central authority. In the south-western provinces — al-Djibāl, Khūzistān and Fāris — revolts of this kind were not to be feared, but farther away and in the mountains authority could only be maintained by repeated expeditions. So when the governor of Khurāsān showed signs of disloyalty, the caliph al-Manṣūr sent his son al-Mahdī with the general Khāzīm b. Khuzaima to restore order and afterwards to subjugate a local dynast in Ṭabaristān. Then al-Mahdī took up his residence in al-Raiy until his accession. Hārūn al-Rashid undertook himself at the end of his life an expedition against Khurāsān and Transoxania, during which he died at Tūs (809). His son al-Ma'mūn, who had accompanied him, remained in Khurāsān, even after he had become caliph (813), until 817. During this time happened the episode of the imām 'Alī al-Riḍā [q. v.]. In the same early 'Abbāsīd period the attitude of the Persian population towards Islām had changed in so far as notably the revolt of Abū Muslim had induced many Persians of the better class (the *dihkāns*) to become Muslims, but at the same time the lower classes were liable to outbursts of religious fanaticism, in which Islāmic and pre-Islāmic views were intermingled. In Khurāsān a number of "false prophets" made their appearance: Sinbād^h the Magian (754—755), Ostādis (766—768), Yūsuf al-Barm, al-Muḳanna' (777—780). To the same kind of religious movements belonged the prolonged rebellion of the Khurramites under Bābak (816—838) in Ādharbāidjān. The caliphs were justified in repressing these movements with great severity, because they were generally accompanied by aspirations towards political independence. The revolt of the 'Alid Yaḥyā b. 'Abd Allāh in Dailām in 793 showed likewise that it was already possible to operate in Persia with Islāmic devices, and for this reason the caliph Hārūn had to proceed with much circumspection in its repression.

Under al-Ma'mūn begins the political loosening

of Khurāsān and neighbouring provinces from the 'Abbāsīd caliphate, not by the action of the ancient Persian nobles or princes, nor by the popular movements already described, nor by Khārīdīte or 'Alid propaganda, but by the action of Persian-Muḥammadan governors not of ancient noble lineage, but nevertheless animated by national feelings, preparing in this way the Persian-Muḥammadan political and cultural renaissance. Ṭāhir b. al-Ḥusain, general of al-Ma'mūn, was appointed in 820 governor of Khurāsān. His descendants, the Ṭāhirids, were nominally governors of the caliphs, but the latter had to leave to them an almost independent authority over Khurāsān with the regions to the east as far as the Indus and to the west as far as al-Raiy. Those regions never came back under the caliphs' full authority, for the Ṭāhirids lost their power and their territory in 873 in the struggle against the Ṣaffārīds, a dynasty of still less noble descent, who in 867 had begun to make themselves masters of Sistān under Yaḳūb b. al-Laiṭh and his two brothers. Their territory comprised for some time Khurāsān with the regions of Kābul and al-Rukh khadj — where the 'Abbāsīd power had never been well established — and even Kirmān and Fāris, but the position of the Ṣaffārīds as leading power in Persia soon came to an end, when they were beaten in 879 in Khūzistān in their endeavour to attack the caliph in Baghdād. The cultural and religious position of the Ṣaffārīds is not well known, but their exploits remained famous in Persia long after their extinction. During the same period the caliphs had to suffer the establishment of other more or less independent dynasties, such as the Dulafids in al-Karadj in the southern part of Media (842—897), and the Rudainī family in Ādharbāidjān. Far more important is the rise of the Sāmānīd dynasty in Khurāsān and Transoxania. This dynasty originated in Khurāsān; they had been at first faithful servants of the Ṭāhirids and occupied already a powerful position in Transoxania when the troubles in Khurāsān, after the fall of the Ṭāhirid power, enabled them to establish their power in Khurāsān in 892, under the nominal suzerainty of Baghdād. Under Naṣr b. Aḥmad (913—943) they governed also in Sistān, Kirmān, Djurdjān, al-Raiy and Ṭabaristān. The immense cultural importance of this dynasty for Persia lies in the fact that a revived national but Islāmized Persian spirit found an opportunity to develop itself in Khurāsān, as is revealed to us by the beginnings of the New Persian Islāmic literature [cf. *infra*, iii.]. This development certainly goes back at least as far as the time of al-Ma'mūn. The Sāmānīds resided in Transoxania and had Khurāsān governed by governors, so that it was not the neighbourhood of their brilliant court alone which favoured the Persian form of Islāmic culture; this was due rather to the general prosperity which began to reign and which brought into existence a class of wealthy landowners who were able to patronize literary and scientific activity, for Arabic literature also began to flourish in Khurāsān (al-Balkhī and others). It is further noteworthy that the Persian renaissance did not take place in the traditional centres of Parsism, Fāris and Ādharbāidjān, where about this time the ancient conditions had not much changed, but rather in a (culturally speaking) new country, where new forms could more easily come into existence.

In western Irān the manifestation of the Per-

sian national spirit took other, less refined forms, as the promoters were the never entirely subjected peoples of Dailam and Djilān. Here the Zaidite 'Alid propaganda, begun under Hārūn al-Rashid, had supplied popular opposition to the Caliphate with an Islāmic badge. Several petty local dynasties were still in existence in Dailam at the beginning of the xth century and from here started predatory expeditions, whose first aim was the town of al-Raiy. The brigand chiefs became generals and some of them became rulers of countries with continually changing frontiers, owing to their warfare with each other and with the Sāmānids. The most stable of the dynasties thus formed were the Ziyārids (928—1042), who ruled for some time in al-Raiy, Iṣfahān and Ahwāz, but were reduced in the end to the territories of Ṭabaristān and Djurdjān. In al-Djibāl, Fāris and Khūzistān they were soon replaced by the much more successful Būyids, their former Dailamite confederates. The independent rise of the three brothers 'Alī, Ḥasan and Aḥmad, sons of Būya, began about 935 and soon nearly the whole of western Persia had ceased to pay taxes and tribute to the Baghdād government, where, moreover, the caliphs were dominated by military commanders. This situation enabled Aḥmad b. Būya, already master of Khūzistān, to occupy Baghdād in 946 and to incorporate the seat of the caliphate in his possessions. The caliphate was allowed to survive under the political power of this Persian Shī'ite dynasty. The other Būyid brothers resided at al-Raiy and at Shīrāz, and the most brilliant reign was that of 'Aḍud al-Dawla, son of 'Alī of Shīrāz, who in his turn became master of Baghdād in 978 and reigned until 983, while his son Bahā' al-Dawla (989—1013) continued to reign in 'Irāq, Fāris and Kirmān. At the same time the north-western part of Persia had fallen, after the semi-independent reign of the governors of the Ṣādjīd family in Ādharbāidjān (890—929), into the hands of Kurdish dynasties, such as the Muṣāfirids, the Shaddādids, the Rawwādids and others.

On account of these grave political disturbances western Irān was somewhat slower to assimilate the specifically Persian cultural development that had started in Khurāsān, but towards the middle of the xth century, when conditions became more settled, there clustered around the Būyid courts and in other large centres a class of Persian-Islāmic writers — such as Ḥamza al-Iṣfahānī (d. c. 970) — and scholars, among them such brilliant personalities as the Būyid wazīrs Abu 'l-Faḍl b. al-'Amīd and Ismā'il b. 'Abbād. At the same time the different religious currents of the time filtered through into the classes of the continually increasing Islāmic population, one centre preferring Shī'ite doctrines, another Mu'tazilitism, another traditionalism (*ahl al-ḥadīth*), and so on (cf. the geographers *passim*). Ḳarmāṭism was, however, severely suppressed, when it appeared in Khurāsān at the end of the ixth century, and though the Ḳarmāṭian propaganda had been strong in south-western Persia, its political successes were realised only on the opposite coast of al-Baḥrain. Ṣūfism likewise became widely spread in its different forms, developing peculiar types of Persian Ṣūfism as early as the xth century; the life story of al-Ḥallādj shows equally the fertility of south-western Persia for Ṣūfī propaganda. All these germs were destined to bear fruit in later centuries, but on the whole the political distribution

of forces had already brought it about that western Persia, situated between Sunni Eastern Persia and Sunni 'Irāq and Mesopotamia, tended towards the Shī'a.

The xth century witnessed the rise of the Turks in Persia. Turkish troops had already formed large contingents in the armies of the governors and princes who disputed with each other parts of Irānian soil, not excluding the mountaineers who needed horsemen alongside their local foot-soldiers. It is true that already in Sāmānid times sections of Turkish tribes had been established south of the Djaiḥūn in Ṭukhāristān, but the main role of the Turks in Persia had always been that of soldiers and military commanders in the service of local governors and princes. In the Sāmānid state several Turks had risen to high military and administrative functions, and, as the military power of the Sāmānids began to weaken, these Turkish commanders aspired to political leadership, relying on their Turkish troops and using their natural capacity for military organisation. In this way the Turkish vassal of the Sāmānids, Subuktakīn, founded his independence in the newly conquered region of Ghazna and Kābul, where until then local Hindu rulers had been able to maintain themselves; his power soon became a menace to the Sāmānids themselves, who, in Transoxania, were continually losing ground to the Turkish Illek-khāns. Subuktakīn had been a Sāmānid governor in Khurāsān, and it was after his death (997) that his son Maḥmūd of Ghazna (999—1030) took the opportunity of establishing an independent power in Khurāsān, choosing Balkh for his capital at the outset. He extended his sway in Persia over Sistān and as far as eastern Media, while his conquests in India and Transoxania gave a strong backing to the consolidation of his power in Irān. Maḥmūd had asked the caliph for a diploma of investiture and was noted as a champion of Sunnism. Under his reign the new cultural Persian-Islāmic tradition of the Sāmānids was continued; his court was a centre of Persian court poets and whatever his personal relations with Firdawsī may have been, they show at any rate that his states offered congenial soil for the renaissance of Persian traditions. The name of al-Birūnī is sufficient to show also that the noblest and highest form of Islāmic scholarship could flourish under his reign. And his immense popularity in later Persian Ṣūfī poetry has made this Turkish ruler a cultural Persian hero. The final islāmisation of the Kābul country was the work of the Ghaznawids. In western Irān in the meantime, the later Būyids were able to maintain themselves with less brilliance; apart from the Ghaznawids they were seriously weakened in Fāris by the Shabānkara Kurds in the first half of the xth century. Yet conditions did not hinder the prosperity of Persian literature and science (Avicenna).

The rise of the Ghaznawids was only the prelude to the Turkish invasion under the house of Seljūk, by which Seljūkid rule became established in Persia and beyond. This time the Turks, mostly called Ghuzz, had begun, since 1029, to migrate into eastern and northern Persia, in spite of the opposing measures of the Sāmānids and the Ghaznawids. Within seventeen years from his first appearance in Khurāsān (1038), their leader Tughril Bek had overrun the whole north of Persia, and made his entrance into Baghdād (1055).

At the same time the power of the remaining Ziyārids and of the different Būyid dynasties was entirely crushed; the Irānian possessions of the Ghaznawid power were considerably reduced, and thus nearly the whole of Persia was united again under the Turkish dynasty of the Seldjūks, whose members divided amongst them the different provinces: Khurāsān, Sistān with Herāt, Kirmān, Fāris and Ādharbāidjān. Tughril Bek fixed his residence at al-Raiy, he and his successors being called the Great Seldjūk, in contrast to the minor Seldjūk dynasties. The last Great Seldjūk, Sandjar (1117—1157), though an able ruler, was real master only in Khurāsān and had already to face new factors in Persia, which, after his death, brought about a political disintegration that could only be arrested by the Mongol conquest.

The Turkish invasion, which brought nomadic Turks into nearly all parts of Persia, where they found conditions suited to their mode of life, and which in many regards may be compared with the Arab invasion, did not make of Persia a Turkish country, as was the case with Transoxania and Asia Minor, with the exception only of Ādharbāidjān. The young Persian cultural renaissance had gathered enough vital force to assimilate the ruling Turkish elements, and this to such a degree that, until the xiiith century, the Seldjūks continued to spread Persian culture in Asia Minor. The nomadic Ghuzz did not find the opportunity, as elsewhere, to assert themselves otherwise than as a very turbulent element, which in the xiiith century became threatening even to the Seldjūks themselves. The influence of their certainly not very orthodox Islāmic religious views on the religious history of Persia has certainly not a little contributed to the spreading of Shī'ite ideas. The Seldjūks themselves continued the tradition of the Sāmānids and Ghaznawids by becoming champions of Sunnism. The minister Nizām al-Mulk is an outstanding figure among the many personalities of Persian descent who were the pillars of the political, religious and literary currents of the time. Under his patronage worked al-Ghazālī, the scene of whose later activity was Nishāpūr in Khurāsān. Persia had acquired at this time an importance as a seat of Islāmic culture equal to that of Irāk and other parts of the Islāmic world. The theological colleges founded by Nizām al-Mulk (Baghdād and Nishāpūr) were the crowning work of the Sunni Islāmic civilisation, but involved at the same time a consolidation by which religious and cultural ideals were fixed and anchored for the centuries to come. The early Seldjūk period shows also a continuation of the best of Muḥammadan scientific activity in Persia, for which we have to quote only 'Umar-i Khayyām.

Western Persia, however, asserted her non-Sunni tradition by the Ismā'īlī propaganda which resulted in the capture of the stronghold of Alamūt near Qazwīn by Ḥasan-i Ṣabbāḥ in 1091. The sources of this propaganda were in the East (Nāsir-i Khusraw) and the West (Egypt) alike, but its real political effects were concentrated, as far as Persia is concerned, in al-Djibāl, Fāris and Khūzistān and, in a less degree, in the east in Kūhistān, where about the same time a number of fortresses were acquired by the Ismā'ilites. Ḥasan-i Ṣabbāḥ and his successors became a political power in western Irān, especially in al-Djibāl, against which the Seldjūks were more and more

powerless, and which was crushed only by the Mongol invasion.

The Seldjūks had established in their dominions a system of hereditary military fiefs (*ikhṣā'*) with the object of being able to dispose of an army commanded by reliable chiefs. The consequence of this system was the loosening of the central power which was supplanted in course of time by a number of independent military governors, who are known in history as *atabeks*. On Persian soil the chief Atabek dynasties were those of Ādharbāidjān (since 1146), of Luristān (since 1148), of Yazd (since 1170), and the Atabek dynasty of the Ṣalgharids in Fāris (since 1137), who annexed also Kirmān after the extinction of the ruling Seldjūks of Kirmān. In the southern parts of Fāris and Kirmān the Shabānkara continued their irregular authority. In Khurāsān the Seldjūks were eclipsed after Sandjar's death by the Khwārizmshāhs, and simultaneously these rose into prominence the Ghōrid dynasty, originating in the mountains of al-Ghōr and al-Dāwar. It was the Ghōrids who, by taking Ghazna in 1149, put an end to Ghaznawid rule in Persia; they likewise extended to Sistān and the country of Bust, and to the north, Bāmiyān and eastern Khurāsān. Later on they too lost the greater part of their possessions to the Khwārizmshāhs. Sometimes the Ghōrids were allied with the wandering Ghuzz, and sometimes they fought the latter; on the whole the devastations wrought by the Ghōrids and their temporary allies mark the beginning of the cultural decline in north-eastern Irān.

This decline was hastened by the Mongol invasions. After the Khwārizmshāh Muḥammad had come into conflict with Čingiz Khān (1218), the Mongols first took possession of his lands in Transoxania, of which their appearance in Khurāsān was the political and military consequence. In the campaign of 1220—1221 the Mongol generals Djebé and Subutai conquered Khurāsān and the northern part of western Persia as far as Ādharbāidjān, driving the Khwārizmshāh Muḥammad to the island of Abiskūn in the Caspian, where he died, and forcing his son Djalāl al-Dīn to cross the Indus. The great towns of Khurāsān were devastated in a way that made it impossible for them to recover their ancient splendour; the population must have been considerably reduced by the wholesale massacres, and the works of art and literature were destroyed. The conquered cities were immediately placed under Mongol administration; where the population revolted, as in Hamadhān, there followed a pitiless massacre. The conquered territories were annexed to the part of the Mongol empire given to Čaghatai. Southern Persia was spared for the moment; in Kirmān the Mongol emissary Burāk Hādhib founded in 1224 an almost independent state. Soon afterwards Djalāl al-Dīn reappeared from India to make his turbulent way to Ādharbāidjān and Armenia without being able to drive out the Mongols. Then, in 1256, came the second invasion of Mongol armies under Hūlāgū, brother of the reigning Khān Mangu. This expedition had been carefully prepared and was directed against the Ismā'īlī heretics in Persia and against the caliphate in Baghdad, which was exterminated in 1258. Whatever the real political and religious motives for the expedition of Hūlāgū, the friend of the Christians, may have been, its results were of immense consequence for eastern Islām in general.

Persia was entirely subdued and came to form the greater part of the dominions of the non-Islāmic Mongol dynasty of the *Ilkhāns*, who resided most of the time in *Ādharbāidjān* (after 1306 in *Sulṭāniya*). By the end of the xiiith century the smaller existing dynasties, such as the *Salgharid* atabeks of *Fāris* and the *Kutluḡ Khāns* of *Kirmān* were also extinguished.

By the terrible devastations in *Khurāsān* these regions ceased to be a hearth of national Persian Islāmic culture and this role now was taken over by the west. At the same time these political events had loosened the ties with the western Islāmic centres which at the time were wholly absorbed by the action against the Crusaders. Moreover by the extermination of the *Ismā'īlī* power and the uncertain attitude of the *Ilkhāns* towards Islām and its different aspects, Persian Islām passed in this period through a profound crisis, and many conflicting currents were at work. In this period lived in *Ardabil* the *Shāikh* *Ṣafī al-Dīn* (1252—1334), the ancestor of the *Ṣafawid* dynasty. Still the Persian national character maintained itself and assimilated the many new foreign elements, mostly Turkish, so far as these were capable of advance to a higher cultural level. Great Persian poets (*Sa'dī*) flourished, and the *Ilkhāns* showed an interest in the achievements of Islāmic science (*Nasīr al-Dīn Ṭūsī*) and literature (*Rashīd al-Dīn*).

During the *Ilkhān* period (1265—1337) Persia was considered by the European Christian powers as their ally against Egypt, now the chief champion of Islām in the west. But although the political opposition between the *Ilkhān* empire and western Islām became a living reality, any attempt to organize and propagate Christianity in Persia by the institution of bishoprics was fruitless. Persia was opened, however, to closer contact with the European world than ever had been the case in Islāmic times, not so much by the series of well-known travellers who passed through Persia on their way to the centre of the Mongolian Empire, as through the establishing of commercial settlements by the Italian republics in *Ādharbāidjān* for the overland commerce from their establishments on the Black Sea (*Trebizond*) through *Armenia* and Persia to Central Asia.

After the death of *Abū Sa'd* (1335) the dynasty of the *Ilkhāns* came to an end in the quarrels between the *Djalā'ir* and *Čübān* families. *Abū Sa'd* had already had great difficulty in maintaining the unity of his state, especially in his struggle against the influential amīr *Čübān*. Further the later *Ilkhāns* had already had to suffer the existence of semi-independent dynasties, such as the *Ḳurt* dynasty at *Herāt*, the only large town in *Khurāsān* that had escaped Mongol devastation. Other powerful commanders, who had served the *Ilkhāns*, found during the troubles after *Abū Sa'd*'s death opportunity to aspire to political independence; the most successful were the *Muzaffarids* in *Fāris* and *Kirmān*, a dynasty of Arab extraction, who from about 1340 until their destruction by *Timūr* in 1392 held sway in southern Persia and for some time as far as Persian *Irāk* (*al-Djibāl*) and *Ādharbāidjān*. Further *Ādharbāidjān* was now in the power of the *Khān* of the Golden Horde and now in that of the *Djalā'ir* dynasty of *Baghdād*. Eastern Persia was mainly divided between the *Ḳurt* dynasty of *Herāt* already mentioned and the *Serbedār* clan who had their centre in *Sebzevār*.

In these chaotic times, when the authority of political power was waning, the more popular and, in a way, democratic elements in Persia, gained more opportunity of asserting themselves, as may be seen from the rather independent way in which the citizens of different towns behaved towards the quarrelling rulers. This self-assertion of democratic elements is also to be observed in Asia Minor, but on the culturally more fertilized soil of western *Irān*, it bore the fruit of a brilliant literary development in the xivth and xvth centuries, which at first sight may seem astonishing in such unfavourable political surroundings. This development was accompanied by an intensification of the religious currents that were at work among the population, where it was strongly influenced by the lower forms of *Ṣūfism* as propagated by derwishes. In the case of the *Serbedārs* in *Khurāsān* the derwish activity had even political consequences and here also is a striking parallel with conditions in Asia Minor. Higher *Ṣūfism* was confined to the upper classes and expressed itself in literature, by which we are able to follow the different trends of thought. From the poems of *Hāfiz* we learn that the *Shr'ā* creed of the *ithnā 'ashariya* was already widely spread and that the tomb of '*Alī al-Riḍā*' in *Meshhed* had become an object of national veneration.

At the end of the xivth century followed a fearful political reaction in the conquest of Persia by *Timūr Lang*, another foreign intervention which for the last time held up the development of a national state in Persia. *Timūr*, after conquering for himself an empire in Central Asia, founded on his descent from *Čingiz Khān* a claim to the domination of Persia. In 1370 he had already conquered *Balkh*; in 1380 he subdued *Khurāsān*, *Sistān* and *Māzandarān*, and in 1383—1384 he completed the conquest by taking *Ādharbāidjān*, Persian *Irāk*, and finally *Fāris* by exterminating the dynasty of the *Muzaffarids* (1392). The *Serbedārs* had already been swept away and in 1389 disappeared the *Ḳurt* dynasty at *Herāt*. The most bloody event during this conquest was the sack of *Isfahān* in 1387. *Timūr* never resided for long in Persia, but confided its government to some of his sons, notably *Shāhrukh*, who became "king" in *Khurāsān* and *Sistān* as early as 1397. In *Ādharbāidjān* reigned *Mirānshāh*, not altogether to the satisfaction of his father. After *Timūr*'s death (1405) the political unity of the empire was on the whole preserved under *Shāhrukh* (d. 1447), who sought to repair much of the devastation wrought by his father's campaigns. *Shāhrukh* still recognized nominally as his suzerain the emperor of China. After his death different descendants of *Timūr*, the *Timūrids*, disputed with each other parts of Persia, while after 1450 the dynasties of the *Ḳara Ḳoyunlu* emerged from the west to dominate large parts of Persia. The best known *Timūrid* in Persia was *Sulṭān Ḥusain Baīkara*, who ruled from his capital *Herāt* over *Khurāsān*, *Sistān* and *Djurdjān* from 1468 to 1506.

Timūr's reign in Persia meant also a Sunni reaction, but in western and middle Persia this reaction was not lasting. Among the many heterodox religious manifestations of this time is the appearance of the *Hurūfī* sect, one of whose adherents tried to murder *Shāhrukh* in *Herāt* in 1426. This religious movement was suppressed by the government, but it had, like similar currents,

strong connections towards the west, through Ādharbāidjān into Asia Minor, where at this time the Sunni power of the Ottomans was re-establishing and strengthening itself to oppose the heterodox influence emanating from Persia. Meantime Persian cultural life continued to manifest itself in the important literature produced in western Persia, while also in the Caucasian countries and Muḥammadan India Persian cultural and literary influence was reaching its climax. This was not the case in Khurāsān; here, in the intellectual centre of Herāt, developed at this time the eastern Turkish Ġaghatai literature, promoted by 'Alī Shīr Nawā'ī at Ḥusain Baiḳara's court at Herāt. Although the Persian-Islāmic tradition continued its influence in these regions, eastern Persia begins to be culturally separated from the west under influence of the Turkish and local elements; a development similar to that witnessed at the same time in Asia Minor and the regions of Arabic tongue in Mesopotamia and 'Irāk.

The events that preceded the rise of the Ṣafawid dynasty have Ādharbāidjān as their chief scene of action. It was in Ādharbāidjān that Kara Yūsuf of the Kara Ḳoyunlu dynasty began his career by taking Tabriz in 1406, and that his successors had the centre of their empire, which, under Djāhānshāh (1435—1467), extended over nearly all western Persia and in the east as far as Herāt. And it was through Ādharbāidjān that Uzun Ḥasan of the Aḳ Ḳoyunlu penetrated Persia, after his victory over Djāhānshāh in 1467. Then he defeated the last Timūrid Abū Sa'īd and became master of western Persia, inaugurating in the meantime the series of wars with the Ottoman Turks, that were to last for three centuries. The successors of Uzun Ḥasan had already come into conflict with the Ṣafawid leaders Shaikh Ḥaidar and Sultān 'Alī, who about this time had acquired enormous influence in Ādharbāidjān and Asia Minor. The Ṣafawid movement began indeed in a much more democratic way than the preceding dynasties. Its chief adherents belonged to seven tribal groups of Turkish origin, amongst whom Shī'ite convictions had been spread by means of Sūfi propaganda methods. This ever-increasing flock acquired at this time the celebrated nickname of Ḳīzīl-Bash. Thus their political rising under Shāh-Isma'īl was again a reaction against the official orthodoxy of the ruling classes, a reaction in which it was not difficult to enlist the Persian town population of western Īrān, since olden times ready to accept non-official and unorthodox religious views, by which at the same time they showed their dislike for foreign rule. These different elements gave a Persian "national" character to the Ṣafawī dynasty, although their leaders were Turks from turcicized Ādharbāidjān. Shāh Isma'īl, on emerging from his hiding place in Djīlān, gained his first success in the Caucasus against the king of Shīrwān, and this made him strong enough to turn his arms against the last ruler of the Aḳ Ḳoyunlu, whom he defeated in the battle of Shūrūr (1501). By 1510 he was master of western Persia, and in addition of Armenia, Mesopotamia and 'Irāk (Baghdād taken in 1508) with the holy tombs of the imāms in Nadjaf and Karbalā'. He then turned to eastern Persia, where a new invasion from Transoxania was threatening, after the death of Sultān Ḥusain Baiḳara at Herāt (1506), by the rise of the Uzbek power under Shaibānī Khān. The latter had already invaded Khurāsān, and had he not been

defeated and killed in the battle of Marw (1510) by Shāh Isma'īl, Persia might have experienced a fourth wave of conquest from Central Asia. Then followed in 1514 the famous battle of Čāldirān; the defeat suffered here by Shāh Isma'īl from the army of Selim I showed where the political frontiers of the Ṣafawīs were henceforward to be; the wave of sympathy that had spread west from Ādharbāidjān far into Asia Minor was ruthlessly suppressed by the Ottoman Sultāns and Čāldirān showed that any political extension of Persia in this direction was impossible.

Thus the important events of Isma'īl's career determined the field of action of the Ṣafawī dynasty, which was to last until 1736. Religious and cultural traditions and geographical necessity gave this dynasty the character of a "national" dynasty, and the long period of its existence, together with the religious isolation of their empire, contributed not a little to the coming into existence of a real Persian "nation", that overcame the troublesome period of the xviiith century and asserted itself ever more vigorously during the xixth. The nature of the country, however, was not favourable to a rapid development in this direction. The many nomadic elements of Īrānian, Turkish and Arab origin kept much longer to their own traditions, and the disconnectedness of the various inhabited centres could not but weaken the authority of the government. Throughout Ṣafawid rule, the kings had to reckon with the existence of half independent governors and tribal formations, from which came the powerful nobles and courtiers. In the time of Tahmāsp I some Georgian nobles, relatives of the king, were in a dominant position, but on the whole it was the Ḳīzīl-Bash clans who formed at times a dangerous power in the state, while nevertheless the kings were dependent on these elements for the defence of the country. It was only during the reign of 'Abbās I that something of a royal militia (the Shāh-sewan) could be formed, while on the other hand the army was reinforced by European artillery. Therefore the civil and military administration of the country never acquired even such a regularity and a cohesion as is witnessed in the Ottoman Empire; the Ṣafawids had to suffer for instance the permanent establishment of the Portuguese in Hormuz (1507—1622) and afterwards of the English, but this did not yet conflict with the state conceptions of that time. Governmental authority could only be maintained in the interior by the utmost severity, as was practised notably by 'Abbās I. For the same reason the frontiers of the Ṣafawid empire in east and west were never very stable, although gradually a demarcation takes place. The eastern part of Khurāsān and the regions to the south of it, long since culturally disconnected from western Persia, never returned to the Ṣafawids. Balkh and Marw were under the almost unbroken domination of the Uzbeks ('Abbās I only temporarily occupied Balkh in 1598), while Kābul and Qandahār belonged from the beginning to the empire of the Great-Mughals of India, Qandahār being only temporarily held by the Ṣafawids. Only Herāt was for most of the time under their control, and far into the xixth century Persia had not abandoned her claim to this town. All this makes clear why eastern Īrān, after the extinction of the Uzbek and the Mughal power did not return to Shī'ite Persia, but came to form at last an independent state

under the Afghān rulers. Only western *Khurāsān*, with the shrine of Meshhed, and *Sistān* remained an integral part of *Ṣafawid* and consequently of modern Persia. In the west the Ottoman Turks and the Persians disputed with each other in a continual series of campaigns, interrupted by temporary peaces, the large band of territory stretching from the Persian Gulf to Georgia. In the xvth century the Turks won and occupied *Ādharbāidjān*, *Mesopotamia* and *‘Irāk*. Under *Abbās I* most of the lost territory was recovered, but the recapture of *Baghdād* by *Murād IV* in 1638 made an end of Persian domination in the *Tigris* valley, while *Ādharbāidjān* and parts of *Armenia* and *Georgia* remained to Persia. In 1668 took place the first conflict with *Russia* through a descent of *Cossacks* upon *Māzandarān*.

Since the beginning of *Isma‘īl’s* career the *Shrīte* creed had been forcibly imposed on the settled population and a regular persecution of all *Sunnite* theologians had begun. This persecution was accompanied by a repression of all *Sūfi* manifestations, whereby the new state religion took at last the aspect of a fanatical and intolerant church, whose ministers, the *Shrīte* divines, repressed all utterances of free thought. *Browne* ascribes to this development the sudden poorness of literary production in *Ṣafawid* Persia. In these circumstances Persia became much isolated from the surrounding *Islāmic* countries, but on the other hand the enemies of the Ottoman power in Europe looked upon Persia as a valuable ally in their common efforts to crush that power. To this was due the forming of friendly diplomatic connections with European powers, such as *Venice* and *Spain*, who, in addition, sought to profit by commercial relations. These relations, together with the political necessity of securing their colonial establishments in *India* and beyond, led other European states also to take up friendly relations with the *Ṣafawid* court, namely the *English*, the *Dutch* and the *French*, after the *Portuguese* had been driven from the *Persian Gulf*. The European envoys, amongst whom the *Sherley* brothers are most notable during ‘*Abbās I’s* reign, were well received, and established the first real contact between Persia and European civilisation. These relations also provoked the sending of some memorable Persian embassies to Europe. The political reasons that had brought the European sea powers to the *Persian Gulf* prevented Persia, however, from ever becoming a maritime power; even the endeavour of ‘*Abbās I* to make of the newly founded *Bender ‘Abbās* a great maritime commercial town remained unrealized.

Most of the *Ṣafawid* kings had very long reigns, for which the not uncommon practice of killing possible pretenders amongst the royal family was probably responsible. The most brilliant reign was that of ‘*Abbās I* (1587—1629), who transferred his residence from *Qazwīn* to *Isfahān*, which, by his buildings, became a splendid royal city. His successors profited by his work. After the middle of the xvth century Persia was passing through a peaceful period, owing mainly to the weakening of its neighbours. Conditions at this time are well known by a series of European travel accounts. The same peaceful conditions had allowed, however, the establishment at *Ḳandahār* in 1709 of a *Sunni* rebellious movement, which was opposed in vain by the *Ṣafawid* king *Ḥusain* and was the beginning of the *Afghān* state. In 1722 the

Afghān army of *Mir Maḥmūd* conquered *Isfahān*, after which the *Afghāns* were masters in Persia for about eight years. At last the *Ṣafawid* successors of *Ḥusain* were able to liberate the country through the help of their general *Nādir Ḳulī* of the *Afshar* tribe who, in 1736, made himself king of Persia as *Nādir Shāh*. At that time he had already restored to Persia the cities in *Ādharbāidjān* and *Georgia* that had been taken by the Turks and likewise *Rasht* and *Bākū*, occupied by *Russia*. After his coronation he set out on his invasion of *India* and the *Afghān* country, but his reign had brought so little stability that, after his murder in 1747, there followed a period of general lawlessness in Persia. The *Afghāns* regained strength, but allowed *Nādir’s* blinded grandson *Shāhrukh* to reign over *Khurāsān*. The failure of *Nādir Shāh* to establish a lasting dynasty was also due to his endeavours to abolish the *Shrīte* religious practices, but in this he met a determined opposition from the people and their spiritual leaders. After *Nādir’s* assassination there was hardly any question of restoring a *Ṣafawid* to the throne. The real power devolved on *Karīm Khān Zand*, who resided mostly in *Shiraz* and who succeeded in uniting Persia during a benevolent reign; in his time the troubles on the ‘*Irākian* frontier led even to the conquest of *Baṣra*. His death in 1779 occasioned a dispute for the throne among his descendants. *Agha Muḥammad Khān* of the *Qājār* tribe round *Astarābād* profited from these troubles by bringing with much cunning and much cruelty the entire empire under his control. He was finally enthroned in *Teherān* in 1796 and was assassinated in 1797. With him began the *Qājār* dynasty, which reigned until 1925.

At the beginning of *Afghān* rule *Russia* had occupied *Derbend* and *Rasht*, while *Turkey* had invaded the country as far as *Hamadḥān*; the *Afghān* ruler *Ashraf*, however, and after him *Nādir Shāh* succeeded in recovering the occupied territories. A second Turkish attack in 1740 was equally thrown back by *Nādir*. During the second half of the century *Russia* and *Turkey* were too much occupied with each other to pay attention to Persia. The political development in the north-east had eliminated direct danger from the *Uzbek* states, but now the lawless *Turcomans* north of *Khurāsān* had become by their raids the terror of the *Persian* population; *Agha Muḥammad Khān* inflicted serious blows upon them. With the coming of the *Qājārs*, however, the international situation grew much more difficult, owing to Persia’s becoming involved in world-wide political struggles. Until 1814 the alliance of Persia was an object of dispute between *England*, whose position in *India* made *Persian* friendship a vital question, and the *France* of *Napoleon*, who schemed an invasion of *India* with the aid of the *Russian* army. In 1814 the *French* threat disappeared and *England* concluded a treaty with Persia. But the struggle with *Russia* for the possession of *Georgia*, which had begun already in 1812, soon led to military disasters and finally to the loss of all territory to the north of the *Araxes* by the peace treaty of *Turkmançai* (1828). From this time on begins the rivalry between *Russia* and *England*, the latter country’s policy being to prevent Persia, now politically under strong *Russian* influence, from gaining strength. *Great Britain* opposed for this reason any extension of *Persian* territory in

Afghānistān; it prevented the capture of Herāt — a cherished Persian ideal — in 1838, and, when Herāt was really taken in 1856, went even so far as to declare war on Persia and to land troops in the Persian Gulf; at the peace treaty of 1857 in Paris, Persia had to abandon her claims. In the meantime Russia's position grew ever stronger; a Russian naval base was founded in the bay of Astarābād, and by the Russian conquest of Khīwa and Bukhārā, completed by the subjugation of the Tekke Turkomans in 1881, and the acquisition of the Marw oasis, the Russian Empire had attained an enormous military and political ascendancy over Persia, to which was added the Russian influence in northern Afghānistān and Turkish Armenia. Persia was not able to assert entirely its political freedom, but it gained for the first time well-defined frontiers; difficulties with Turkey in Irāk (massacre of Persians at Kerbelā) had led to the fixing of the Turkish-Persian frontier in 1843 (followed by a rectification in 1913), while the eastern frontiers with Afghānistān and Balūčistān were defined by the Anglo-Perso-Afghān boundary commission in 1872; these measures had been mainly necessitated by the establishing of a telegraph line through Persia to India. During the long reign of Nāṣir al-Dīn Shāh (1844–1894) international conditions remained stable, to which the on the whole untroubled domestic situation also contributed, but when, under his successor, conditions became less secure, owing to inner political and financial troubles, the intervention of the two great Powers became more threatening. It took the shape of the Anglo-Russian treaty of 1907, which practically divided Persia into a northern and a southern sphere of influence.

During the sixteenth century indeed the Qādjār dynasty had been able to rule Persia in the traditional way, succeeding in checking the action of the troublesome tribes and their chiefs by profiting from their eternal discords. The influence of the higher Shī'ite religious leaders, over whose nomination the government had no authority whatever, and who resided for the greater part in the religious centres of Kerbelā and Najaf, was supreme among the population, although some divergent theological trends had developed, such as the Shāikhī's, since the beginning of the sixteenth century. This more spiritualized sect finally paved the way for the appearance of the Bāb in 1844; the Bābī movement for some years took the aspect of a religious-political rebellion, which the government had to suppress with bloody measures. Since then Bābism and afterwards the movement of the Bahā'īs to which it gave rise, disappeared from the surface, but remained all the time a living factor in the national-religious life of the Persians. This contributed not a little to the awakening of a more independent political attitude among the more educated classes of the population, who generally found the higher divines at their side in their increasing criticism of government actions. The pan-Islāmic propaganda of Djamāl al-Dīn al-Afghānī also furnished elements to the awakening public opinion. Thus the bad inner conditions that had developed under Muẓaffar al-Dīn Shāh and the consequences of the foreign loans contracted by that ruler brought about a popular action that led to the granting of a constitution and the opening of the first National Assembly (*Madjlis*) in October 1906. The succeeding Shāh's reactionary policy ended with his dethronement in

1909, but the troubles connected with the accompanying revolutionary movement gave opportunity to the Russians to occupy Tabriz and Qazvin, while at the same time the Persian government was obliged to use foreigners in different branches of its administration (gendarmerie, finances, customs). During the world war Persia was officially neutral, but the German scheme of attacking Great Britain in India gave rise to an at first successful German propaganda in Southern Persia in 1915. On the other hand Russian troops were landed at Enzeli and these opposed the Turkish advance into Persia, which had begun in 1916 by the taking of Kirmānshāh. In this same year began the British counter-action in Southern Persia by the formation of the South Persian Rifles. When by the Russian revolution the action of the Russian troops was crippled, British troops landed in the Gulf and succeeded in checking the Turkish advance in the western frontier region and in repressing, together with Russian troops, the local opposition of the Jangalis in Gilān. Finally in 1918 the British had great difficulty in opposing a similar national rising in Shīrāz, headed by the Kashkay tribe.

Persia was evacuated after the war and became from the outset a member of the League of Nations. A treaty with Great Britain in 1919 re-established British influence, but the coup d'état of that same year suddenly changed Persia's internal and external policy. Saiyid Diyā' al-Dīn and Riḍā Khān assumed forcibly the leadership of the government. Riḍā Khān became minister of war and proved to be the strong man needed. His chief achievement during the following years was the subjugation and disarmament of the turbulent tribes, and the forming of a reliable army of 40,000 men. In 1923 he became Prime Minister, Aḥmad Shāh Qādjār left the country and was deposed in October 1925 by the Madjlis, whereby the Qādjār dynasty was brought to an end. At the end of the same year the scruples of many sections of the population against a new dynasty were dispelled and the dictator became king of Persia under the name Pahlavī; he was crowned on April 25, 1926.

Persia's internal situation has been much improved by the action of the present king, while the exploitation of the oil wells in 'Arabistān has secured the government a profit that has not a little contributed to its financial liberty of action. The finances have been moreover controlled by an American adviser since 1923 and since 1928 by a German adviser. As to the currents of spiritual culture, the intellectual classes are abandoning the traditional religious views and this secular movement is favoured by the government; in connection therewith the influence of the divines is declining. On the other hand, the interest awakened towards the end of the sixteenth century for pre-Islāmic Persia has given a new direction to national sentiment, expressing itself amongst others in literary occupation with ancient Irānian subjects and a great interest in excavations, the results of which are no longer allowed to leave the country.

The present ethnographical structure of Persia is quite different from what it was before the Arab conquest, owing to the repeated invasion of foreign elements during the thirteen centuries of its Islāmic history. The combined existence of a sedentary and a nomadic or semi-nomadic population, however, is a feature proper to the geographical conditions of the country and has continued up to the present

day. The general tendency of the nomadic elements to become settled, which can be observed all the time, was repeatedly counteracted by fresh invasions of nomads, chiefly from the north-east. At present the proportion of the nomads to the settled population is estimated to be 20⁰/₀. The development of urban settlement is a feature proper to Islāmic times; it began with the expansion of the population outside the walls into the *rabaḍs* (cf. al-Balādhuri, p. 324). From that time on the Persian name for a town became *shahr*, which word had designated originally an entire region or country. The Arabs often placed their garrisons in less important places, which subsequently overshadowed the ancient centres. In the course of history many towns were devastated, but were generally rebuilt on or near the spot of the ancient ruins. Since the later Middle Ages great Islāmic towns like al-Raiy and the towns of Kirmān have disappeared, to be replaced by formerly less significant places; among the latter are Teherān, Tabriz and Mashhad, at present the largest towns of Persia. The townspeople, composed of craftsmen and merchants, have been in history the passive and suffering element, together with the rural population of the villages clustered together in the oases. This settled population was generally regarded with scorn by the tribesmen, who were the aristocrats, and from whom until modern times were recruited the ruling classes and the high officials. From the tribes have also been recruited the best soldiers in the armies.

At present the largest towns in Persia are Teherān (210,000 inh.), Tabriz (200,000), Isfahān (90,000) and Mashhad (70,000). The town population has been constituted in the course of centuries from the very different invading ethnic elements. They now constitute the most stable element in Persia and speak, with local dialectic variations, the New-Persian language, which runs more or less parallel with the written New Persian. Only in Ādharbāidjān Ādhari Turkish is the language of the townsfolk and the peasants.

The rural population of the villages around the towns have kept many particular local features of their own and amongst them many remnants of other Irānian dialectal groups have been preserved, a fact which is already noted in ancient Islāmic historical and geographical sources. In north-eastern Persia the different dialectal groups of these peasants are called Tāt, while in southern and eastern Persia they are often designated as Tādjik.

Among the rural population, however, and in a less degree amongst the townsfolk, there are many elements that are conscious of their allegiance to tribal formations, mostly so in regions where the population of the neighbourhood still possesses the tribal organisation. These settled members of the tribes are often called *shahr-nishīn*, *dih-nishīn* and *shahrā-nishīn*.

As to the tribes themselves, called *iliyāt* in Persia, they nearly always occupy a definite territory nowadays, on which many members of the tribe have become entirely settled, while the others are no more than semi-nomads who, in summer, go with their cattle to the higher mountain regions. Nomadism is not extinct, however, and anywhere in the Persian steppes the black tents of nomads may be seen occasionally.

The origin of the tribes is an extremely complicated problem. In almost every region they have resulted from a mixture of pre-Irānian, Irānian, Arabic and

Turkish-Mongolic elements. In northern Persia the Turkish element is no doubt the dominating, as judged by the language; here the redoubtable mountaineers of the Dailam and the Djl, who so long withstood Islāmization and had still in the Middle Ages a language of their own, have mostly been turcicized, in so far as they have not been assimilated by the Irānian settled population. In the mountain region stretching from Ādharbāidjān to Fāris and Kirmān, the Irānian element is largely prevalent, again so far as we can judge from the languages spoken there. The local traditions circulating among those tribes, and about those tribes among the neighbouring populations, have often preserved the memory of extensive migrations that betray a partial Turkish or Arab origin. Some groups are even known as Turkish, although they speak Irānian dialects. Other tribes are still conscious of their Arab origin, although they no doubt have already been irānized for centuries; only a few tribes in Kūhistān and Khurāsān have preserved the Arabic language. But those local traditions, which never go back more than two hundred years at most, often do not square with what we may regard as established facts from historical sources. It is true, however, that even in recent historical times more or less important migrations of Irānian tribes have taken place. The movement of the Balūčis from the North-West to Kirmān and afterwards to modern Balūčistān had already begun in the early Middle Ages. In addition, reasons of military policy induced several rulers of the xviiith and xixth centuries to transplant some Kurdish tribes to the North-East; best known is the settlement of Kurdish tribes by Nādir Shāh on the Khurāsān frontier around Kučan and in Māzandarān, where they have still preserved their own features and their language. The only possible description of the tribes in Persia has therefore to be based on their geographical distribution.

With the mediaeval Arab geographers all the tribes in al-Djibāl and Fāris are included under the designation of Akrād, i. e. Kurds, but this general term has hardly any ethnographical value. At the present day the name of Kurds is generally restricted to the tribes inhabiting the environs of Kirmānshāh and further to the north into western Ādharbāidjān. South of Kirmānshāh begin the Lur tribes, to the west of whom, in the mountains between Persian 'Irāk and 'Arabistān live the Bakhtiyārī's. The northern mountains of Fāris are occupied by the Kūhgelu and the Mamāsani tribes. South of these, round Shirāz, live the Kashkāy, who still speak a Turkish dialect. In 'Arabistān, where in the Middle Ages the local *khuzi* language was not yet extinct, the Arab element of the settled population is strong; the Arab tribes here belong to the Ka'b division and consist for the greater part of 'Arabs transferred here from Naḍj under 'Abbās I. The tribes on the Gulf fringe, in Persian Balūčistān, and in Sistān are Balūči's who, since their immigration, have absorbed such inconsiderable local elements as the Kūfī, known from medieval sources. Further to the north there are Arabs in Kūhistān, notably around Kāin. There is further a not unimportant part of the population, who claim descent from the Prophet, and consequently an Arabic origin; these saiyids abound especially in Māzandarān, where there were 'Alid dynasties at an early period. In Persian Khurāsān there are also Arabs,

a few Afghān elements and the already mentioned Kurds on the frontier. Finally there live all along the northern frontier of Khurāsān Turkish tribes, some of whom have been there since the later Middle Ages, such as the Afshars and the Kādjars (round Astarābād), while the more recent element is composed of Turcomans.

Other ethnic elements are the Armenians in Persian Armenia in Ādharbāidjān, and the large Armenian colony in the suburb Djulfa of Isfahān transplanted there by 'Abbās I. The Nestorian Christians east of the Urmiya Lake have nearly disappeared as a result of the war. In 'Arabistān there are still remnants of Mandaean, and finally there are reported to be about 40,000 Jews in Persia, who for the greater part are probably descendants of the Jews who lived already in Persia in the beginning of the Islāmic period and among whom notably the Jewish colony of al-Yahūdiya at Isfahān was well-known.

The great mass of the inhabitants of Persia, including in the first place the townspeople and the settled population, but also many members of the tribes of ancient Turkish origin, belong to the Imāmite Shī'ā (the Ithnā 'Ashariya) and follow the *madhhab* called Dja'fari. Their number is estimated at little less than 7 millions. About a million of them are the so-called Akhbāriyūn, living in Hamadān and al-Ahwāz and environs, who recognize only the authority of the traditions of the Prophet and the Imāms. Other Shī'ite sects are the Shaikhīya (about 250,000) and the Nuqtawīya (about 100,000 in Gilān, of Zaidite origin). The Bābis and the far more numerous Bahā'is are represented in all towns and reach together about the number of 700,000. The extreme Shī'ites called 'Alī Ilāhī or Ahl-i Ḥaqq are found among the Kurds round Kirmānshāh, among the Lurs, and partly in Māzandarān and Khurāsān; their number amounts to 300,000. Half that number is given for the adherents of the Ismā'ili Hūrūfī sect, spread all over Persia. There are also some Yazidis on Persian soil near Mākū. Sunni (Shāfi'ite) Muḥammadans are found only among the Kurds and the Arabs, the Turcomans and the Afghāns, these latter being Ḥanafites (about 85,000). Finally there are still remnants of the Zoroastrian creed at Yazd, Kirmān, Teherān, Shīrāz and Kāshān.

The entire population of Persia is given as 12,000,000. This last figure is given on the authority of the last edition of the *Encyclopædia Britannica*; the other figures given are derived from the *Annuaire du Monde Musulman*, 3rd edition 1929.

Bibliography: In view of the general character of the above article it is sufficient to refer for all detailed bibliographical information to the historical, geographical and ethnographical articles dealing with Persia, and to the general bibliographical works on Persia: M. Schwab, *Bibliographie de la Perse*, Paris 1875, and A. T. Wilson, *A Bibliography of Persia*, Oxford 1930. (J. H. KRAMERS)

II. LANGUAGE AND DIALECTS.

Introduction. The Persian language is one member, now the most widely extended member, of a group of languages which are spoken over a region stretching from the River Euphrates to the East of the Hindu Kush, with branches in the Caucasus and in the Masandam Peninsula, 'Omān. It is convenient to group these languages, which

in turn form one group within the Indo-European languages, under the name Irānian, a designation from Irān, the modern national name of the Persians, as it was also earlier, in Sāsānian (*aryān, ērān*), and Achaemenid times (*ariya-*), and which is used also by the Ossetes (*ir, ira, iron*). Formerly these Irānian dialects were more widely extended, to the north of the Caspian Sea, from Chorasmia (Khwarizm) to the west of the Black Sea (see M. Vasmer, *Untersuchungen über die ältesten Wohnsitze der Slaven*, i., *Die Iranier in Südrussland*, 1923), and also to Sogdian colonies in Northern Mongolia (see O. Hansen, *Zur soghdischen Inschrift auf dem dreisprachigen Denkmal von Karabalgasun*, in *J. S. F. O.*, xlv., 1930).

Earliest sources. 1. Saka. Three divisions of the Saka are referred to in the Achaemenid inscriptions: *Sakā haumavargā*, *Sakā tigraxaudā*, *Sakā tyaii pa'radraya* (on the tomb inscriptions published in *J.R.A.S.*, 1932, p. 374: *Sakā para-draya*). They are the *Sakai* of Herodotos, and the *Sacae* of the Latin writers. At a later period they are attested in Sakastān (mod. Sīstān), and in the Saka kings of India. Names of Sakas are preserved in Greek and Latin authors, and the Middle Saka dialect is now largely known.

2. Chorasmia and Sogdiana. Both these countries are named in the Avesta (*xwārizm, suyda-*) and the Old Persian inscriptions ([*k*]wārazmīš, *sugda*), but the dialects are known only in later times.

3. Media. The Medes (Madai, Amadai) appear first 835 B.C. in the inscriptions of Shulmanusharidu III (see F. Hommel, *Ethnologie und Geographie des alten Orients*, 1926, p. 194). Names and some words are known in Greek (Herodotos quotes σάακα 'bitch'), and there are loanwords in Old Persian (*vispazana-*, cf. the *da-na-ish* of the Elamite version).

4. Persia. The Persian of Persis is well-known through the inscriptions of the Achaemenids (bibliography in J. H. Kramers, *A Classified List of the Achaemenian Inscriptions*, 1931; later publications are by E. Benveniste, in *B.S.L.*, xxxiii., 1932; xxxiv., 1933; R. G. Kent, in *J.A.O.S.*, liii., p. 1 sqq.; *Language*, ix., 1933 [March and September]; V. Scheil, *Mémoires de la Mission archéologique de Perse*, xxiv., 1933; A. W. Davis, in *J.R.A.S.*, 1932, p. 373–377; E. Herzfeld, *Kashfi Alwāh-i ta'rikhi, risāla of the Andjuman-i Āthār-i millī*, Tīhrān 1312).

5. The Avesta. To avoid too definite implications, it is usual to employ the designation 'language of the Avesta' (Pahl. 'ps't'k, Syr. 'bstg, Pāzand *awastā, awistā*, Arab. *abastāk, abastā, wastāk, bastāk*) for the language preserved in the oldest Zoroastrian texts. The considerable extent of these texts makes them the most important witness to the Old Irānian stage of the dialects, although they have been preserved in a late orthography¹). In spite however of continued discussion (see P. Tedesco, in *M.O.*, xv. 255 sqq.; H. Reichelt, *Iranisch*, p. 29, in *Geschichte der indogermanischen Sprachwissenschaft*, ii., 1927; G. Morgenstierne,

1) For convenience the transcription of the *G. I. Ph.* is here followed, but a revised orthography, more conformed to that of the Old Persian texts and the Greek and Akkadian transcriptions, would represent the Old Irānian form more satisfactorily (as e.g. *ahya* for *aīhē*).

Report on a Linguistic Mission to Afghanistan, 1926, p. 28 sqq.; J. Markwart, *Das erste Kapitel der Gāthā Ustavā*, 1930), it has proved impossible to point definitely to the provenance of this dialect (or possibly two dialects). The legendary matter of the Avesta points to Chorasmia as the earliest home of the Irānians (E. Benveniste, *L'Éran-vēz et l'origine légendaire des Iraniens*, in *B. S. O. S.*, 1934, vii. 265 sqq.), while the Zoroastrian traditions become closely associated with the region of the Haitumant (Hilmand) river (E. Herzfeld, *Archäologische Mitteilungen aus Iran*, i.-ii., 1929–1930; A. Christensen, *Les Kayanides*, 1932, p. 5).

A comparison of the linguistic development within the Avesta with all the other known dialects suffices to isolate Avestan. This may be briefly indicated. In Avestan *sp* (*aspa* 'horse') corresponds to Old Persian *s* (*asa* 'horse'), Saka *śś* (*aśsa* 'horse'), and Wakhi *š* (*yaš* 'horse'). Old Persian, Saka and Wakhi are therefore separated from Avestan from an early period. All other dialects have *sp*, but other tests suffice to exclude them. Avestan *hr* (*š*) < *rt*, *b* < *dy*, *sn* < *zn*, *sm* < *zm* exclude Sogdian (*mwrth* 'dead', *δṣr-* 'door', *γ'wzn-* 'antelope'), Yaghnābī (*ārt* 'flour', *divar* 'door') Mundji (*tuwṣr* 'door') Yāzgulāmi (*dvrur* 'door'), North-Western dialect forms (Turfan texts *ardāw* 'righteous', Pahlavi, New Persian *gavāzn* 'deer', New Persian *hēzum* 'fuel', Armenian loanword *mazdezn* 'worshipping Mazda'). Here again Pashtō, Ishkāshmi, Parāči and Ōrmuṛi agree with Avestan from *dy*, and the evidence of *rt* is indecisive (Pashtō *mar* 'dead', Ishkāshmi *mālak* 'man', Parāči *mur* 'died', Ōrmuṛi *mulluk* 'died'). Probably however Pashtō is excluded by *ft* > *wd* (*tawda* 'hot', Avestan *tapta-*), and by *yr-* (Pashtō *wrižē* 'rice'); Ishkāshmi by *ft* > *vd* (*ūvd* 'seven', Avestan *hapta*) and by *zn* > *zd* (*pāruzd* 'yesterday', *vōzd* 'cushion'); Ōrmuṛi by *yr-* (*rēzan* 'rice'); Parāči does not permit, in the absence of examples of *yr-* and *zn*, and in the development *ft* > *t* (*hōi* 'seven'), any decision. The negative conclusion is so far of interest that connection with the North-Western dialects is excluded.

6. It is possible that other dialects developed in the cities of Carmania (Strabo, xv. 2, 14 speaks of τῶν διαλέκτων τῶν Καρμανιτῶν), Arachosia, Areia and Margiana, but nothing survives.

Relationship with Indo-Aryan and Kāfirī dialects. The Old Irānian dialects stand in close connection with the Indo-Aryan languages of India, which are known in their oldest form (apart from the words of uncertain position within Indo-Īrānian history preserved in the Mitanni and Hittite documents, see N. D. Mironov, *Aryan Vestiges in the Near East of the Second Millenary B. C.*, in *Acta Orient.*, 1933; J. Friedrich, *Realexikon der Assyriologie*, 1929, i. 144 sqq.; A. Christensen, *Die Iranier*, 1933, p. 209 sqq.) in the Vedas, and with the modern Kāfirī dialects of Kāfiristān. The vocabulary of Indo-Aryan and Irānian is largely identical (*āp-* 'water', *vak-* 'speak', *martiya-* 'man', *kar-* 'do', *ā* 'up to', *pari* 'around', *tuvam* 'thou', *ka-* 'who'), so also is the morphology of verb and noun. Differences do however exist in vocabulary (Irānian *yār-* 'year', *gaub-* 'speak', *gad-* 'pray for', *snaig-* 'to snow'), and in morphology (Irānian *-sa* 2 sing. pret. middle, as Greek *-so*). In phonology the two groups have diverged in the oldest texts. To Sanskrit *ś ch j h* (*sata-* 'hundred', *chand-* 'to appear', *jan-* 'to

know', *deh-* 'to form') correspond Avestan *s z* (*sata-*, *sand-*, *zan-*, *daiz-*), and Old Persian *θ d* (*bard-* 'year', *band-* 'to appear', *dan-* 'know', *didā* 'fortress'); Sanskrit *g gh, d dh, b bh*, to Avestan, Old Persian *g d b*; Sanskrit *kh th ph* to Avestan, Old Persian *x θ f*; Sanskrit *ed edh, id idh, ud ūdh* to Avestan *azd, ižd, užd*; Sanskrit *tt ddh* to Avestan *st zd*.

The Kāfirī dialects of Katī, Ashkun, Prasun, Wāigali, are known only in a modern form from the sixteenth century, and adequately only this century (see Morgenstierne, *Report on a Linguistic Mission to Afghanistan*, 1926, p. 39 sqq.; do., *Report on a Linguistic Mission to North-Western India*, 1932, p. 46 sqq.; do., *The Language of the Ashkun Kafirs*, in *N. T. S.*, ii. 192–289). The evidence of the Kāfirī dialects is important for the Indo-Īrānian period, in particular for the history of the sounds represented by the Kāfirī *ts* and *š*, *dz* and *z* corresponding to the Avestan *s z*, Old Persian *θ d*, Sanskrit *ś ch j h*. Thus Kati has *duts* 'ten', *šaru* 'autumn', *ūz*, *vuts* 'I'.

Periods of the Irānian dialects. The extant documents, of widely different character, and in many scripts, are sufficient to allow the distinction of three periods: Old, Middle and New Irānian. In the west of the Persian empire, the change to the Middle Irānian stage (marked by loss of large part of the old inflexion) is attested already in the later Achæmenid inscriptions.

Old Irānian. The Old Irānian stage of development is known in the Old Persian inscriptions, the Avestan texts and the names of Medians and Sakas. The two dialects Old Persian and Avestan, in spite of the restricted number of texts, and hence little known vocabulary, agree closely, but yet are clearly distinct. In phonology Old Irānian has *t p k* unchanged before and between vowels (*tak-* 'to run', *tap-* 'to be hot', *pat-* 'to fly', *kar-* 'to make', *aka-* 'bad'), but they are represented by spirants before consonants (*habya-* 'true', *xvafnah-* 'sleep', *uxta-* 'spoken'); before and between vowels *s* is represented by *h* (Old Persian *hada* 'with', *āha* 'he was'), except that *iš*, *uš* replace older *is*, *us* (as also do *iš*, *uš* in Sanskrit, though unchanged in Kāfirī), thus Avestan *nišasti-* 'sitting', *duš-* 'bad'. Old Irānian verbal and nominal morphology is richly developed, with great facility of composition and derivation. Noun bases terminate in consonants, or in vowels and diphthongs: *a ā i ī u ū ai āi au āu*. Alternation of vowels ('apophony, Ablaut') rests upon the older system attested also in the other Indo-European languages. The inflexion can be seen in an Avestan noun with base *-a* (whereby failing all forms of one noun the following are quoted: *ahura-* 'lord', *aspa-* 'horse', *aka-* 'bad', *zasta-* 'hand', *asa-* 'party', *maršta-*, *mašya-* 'man'): singular, nom. *ahurō*, acc. *ahurəm*, instr. *ahurā*, dat. *ahurāi*, abl. *akāt*, gen. *ahurahyā*, loc. *zastaya*, *aspaž*-[*ča*, voc. *ahura*; dual, nom. acc. *zasta*, dat. *ahuražibya*, gen. *asayā*, loc. *zastayō*; plural, nom. *aspa*, *aspāphō*, acc. *mašyqš*-[*ča*, instr. *zastāiš*, dat.-abl. *marštažibyō*, gen. *mašyānqm*, loc. *aspažšu*. The verbal system is elaborately developed, but the extant texts do not provide all the forms. There are three voices: active, middle and passive; six moods: indicative, conjunctive, injunctive, optative, imperative, infinitive, with tenses present, preterite (imperfect and aorist), perfect, pluperfect, future,

with personal terminations in singular, dual and plural, and in addition participles present, aorist, future, and perfect. These cannot all be illustrated here. The following Avestan forms may be quoted: *baraiti* 'he bears', *yasaite* 'he worships', conj. pres. *barāz* 'he will bear', opt. pres. *hyāz* 'he shall be', opt. perf. *jaymyam* 'I would have come', imperative *bara* 'bear', *baratu* 'let him bear', *idī* 'go', *kərəsūw* 'make'. The infinitive has no single form, but is expressed by oblique cases of verbal nouns of action: *avapastōis* 'fall down', *vīčidyāi* 'to choose', *apaṇharštē* 'remove'. There is an aorist passive (*vāci* 'was spoken', *jaini* 'was struck'), confined to the 3rd sing. The personal terminations differ in pres., pret., perf. and imperative. In the present are found: *barāmi*, *barahi*, *baraiti*, dual 3 *baratō*, plur. *barāmahi*, *sayabā*, *baranti*; in the imperfect: *barəm*, *jasō* 'thou camest', *baraš*, dual 1 *jūwa* 'we two live', 3 *jasatəm* 'they two came', plur. *bavāma*, *jasatā*, *barəm*. The present base was formed either with or without suffix, or by reduplication: *asti* 'he is', *dadāiti* 'he gives', *bavāiti* 'he becomes', *harənti* 'they remove', *āfrināmi* 'I bless', *kərənaoiti* 'makes', *irinaxti* 'leaves', *hiniaiti* 'pours out', *jaidyeimi* 'I pray for', *tāpayeiti* 'heats'. The aorist was formed direct to the base (*adāz* 'he created') or with the suffix *-s-* (*dārašt* 'he held'), the perfect was either reduplicated (*vavača* 'has spoken') or not (*vaēdā* 'has known') with special terminations, the pluperfect was expressed by the use of preterite endings to the perfect base (*vaočaš* 'had said'). The active present and future participle was formed by the *-ant-* suffix, and the passive preterite participle usually by the suffix *-ta-*. Of these present bases and of these and other participles examples are preserved in New Persian. The comparison of adjectives could be expressed in two ways (suffixes *-yah-*, *-išta-* and *-lara-*, *tma-*): *vahu-* 'good', *vayah-*, *vahišta-*; *aka-* 'bad', *akatarā*, *hastma-* 'best'. Three morphological genders (masc., fem., neut.) are expressed in nouns and adjectives. Of the many suffixes may be named the noun of agent in *-tar-*, noun of action in *-ti-*, abstract noun in *-tāt-*. Compounds are of many forms: *aspavīra-* 'horses and men', *vīrajan-* 'slaying men', *dahyupati-* 'lord of a country', *pouru.brābra-* 'possessing many brothers', *āxnu-* 'up to the knee', *dārayaš.raba-* 'holding a chariot'. Of this whole elaborate Old Iranian system but small part has survived to the present day.

Middle Iranian. Since 1904 when F. W. K. Müller published the *Handschriften-Reste in Estrangelo-Schrift aus Turfan, Chinesisch-Turkestan*, i. (S. B. Pr. Ak. W., 1904), ii. (Abh. Pr. Ak. W., 1904), the middle period of Iranian linguistic history has been increasingly enriched with new material. It is now possible to describe five forms of Middle Iranian, of which Middle Persian forms one, from numerous documents in a variety of scripts. Early loanwords are preserved in Armenian (see Hübschmann, *Armenische Grammatik*, i., 1897; R. Gauthiot, *Iranica*, in *M. S. L.*, xix. [1915]; A. Meillet, in *M. S. L.*, xvii. [1911]; H. S. Nyberg, *Hilfsbuch des Pehlevi*, ii., Glossar, 1931). These are particularly important as being written in a script possessing vowels. A document dated 22—21 B.C., found at Awramān (Minns, in *J. H. S.*, 1915, p. 38 sqq.; Unvala, in *B. S. O. S.*, i. [1920] 125—144; H. S. Nyberg, in *M. O.*, xvii. [1923] 182—230; E. Herzfeld, *Paikuli*, 1924) is

known, accompanied by another document dated 88 B.C. with almost illegible writing. Coin legends of Pārs from about 250 B.C. and of the later Parthian and Sāsānian kings, Kushano-Sāsānian coins, Sāsānian royal and official inscriptions in two dialects, and on gems and seals, a large Zoroastrian literature, mostly religious but including some secular pieces (in 'Pahlavi'), and texts in two western dialects from the Manichean documents from Central Asia, some being in the Chinese script (F. W. K. Müller, *loc. cit.*; K. Salemann, *Manichäische Studien*, i., 1908, and other texts in *Manichaica*, iii., *Izvestia Akad. Nauk.*, 1912; Andreas-Henning, *Mitteliranische Manichaica aus Chinesisch-Turkestan*, i., *S. B. Pr. Ak. W.*, 1932; ii., *ibid.*, 1933; iii., *ibid.*, 1934; Waldschmidt-Lentz, *Die Stellung Jesu im Manichäismus*, in *Abh. Pr. Ak. W.*, 1926; do., *Manichäische Dogmatik aus chinesischen und iranischen Texten*, 1933), fragments of a version of the Psalms with the Canons of Mar Ābā translated from Syriac into Middle Persian (Andreas-Barr, *Bruchstücke einer Pehlevi-Übersetzung der Psalmen*, in *S. B. Pr. Ak. W.*, 1933) have combined to disclose the character of the Western dialects. The Zoroastrian texts are written with an historical orthography, through which the phonetic development rarely appears, with the exception of the frequent transcription of "Pahlavi" words into the fully vocalised Avestan alphabet. The Manichean writers rejected the old orthography. Eastern dialects are represented by Sogdian texts, letters of the 11th century A.D. (H. Reichelt, *Die soghdischen Handschriftenreste des Britischen Museums*, ii., 1931) found in Chinese Turkestan, and other letters not yet published, found in Sughd (preliminary report by A. Freiman, in *Sogdiiskii sbornik*, in *Akad. Nauk. S. S. S. R.*, 1934), besides many Buddhist texts (Gauthiot, *J. A.*, 1912; *M. S. L.*, xvii., 1912; Gauthiot-Benveniste, *Le Sūtra des Causes et des Effets*, 1926; H. Reichelt, *loc. cit.*, i.—ii.; F. Rozenberg, *Un fragment sogdien bouddhique du musée asiatique*, in *Izvestia Akad. Nauk.*, 1927; R. Gauthiot's *Essai de grammaire sogdienne*, 1914—1923 was completed by Benveniste 1929), by Manichean Sogdian texts first made known in F. W. K. Müller's *Handschriften-Reste*, ii., and later in Waldschmidt-Lentz, *loc. cit.*, and by Christian Sogdian texts in F. W. K. Müller, *Soghdische Texte*, i., *Abh. Pr. Ak. W.*, 1913 and Müller-Lentz, *Soghdische Texte*, ii., 1934; and by Saka texts, business letters (A. F. R. Hoernle, *A Report of the British Collection of Antiquities from Central Asia in J. A. S. Bengal extra-number to LXX*, 1902; do., *Manuscript Remains of Buddhist Literature found in Eastern Turkestan*, i., 1916), an official document from Šacu (F. W. Thomas and Sten Konow, *Two Medieval Documents from Tun-huang*, 1929), and Buddhist translations and original compositions (E. Leumann, *Zur nordarischen Sprache und Literatur*, 1912; do., *Buddhistische Literatur*, 1920; do., *Das nordarische [sakische] Lehrgeheimnis des Buddhismus*, 1933—1934; Sten Konow, *Saka Studies*, 1932, with references). Certain words of the dialect of the Saka invaders of India are known (Sten Konow, in *S. B. Pr. Ak. W.*, 1916, p. 799 sqq.). On the Sogdian and Saka phonology it must suffice to refer to the books cited: Sogdian *ātar* 'fire', *pāš*, *pāl* 'foot', *γōš* 'to praise', *kanš* 'city', *zuwān* 'life', *azu* 'I'; Saka *kanthā* 'city', *ysānde* 'he knows', *hastama* 'best', *salī* 'year', *baurā* 'snow', *aysu* 'I'.

The Sogdian verbal system has present (durative present expressed by adding *'skwn, 'štn*, and future by adding *k'm, k'n*), imperfect (*niyōš* 'thou heardest'), *z*-preterite (*βarēnt* 'they bore'), durative preterite with *'skwn* (*šawēnt askwan* 'they went'), conj. present (*wanān* 'I will do'), perfect (*βarē dāram* 'I have given', *āyatīm* 'I have come'), optative (*βarē* 1. sing.), imperative (*βēr, šawa*), infinitive (*βēnjak* 'to pull', *xwari* 'to eat'), participles active present *-ān, -āk, andāk*, passive preterite *-t* (*βart* 'given'), adjectival form *-tak* (*ansāxtak* 'prepared'). The augment *a-* is prominent, see H. Reichelt, *Beiträge zur soghdischen Grammatik*, 1931. In Śaka there is present (*ditte* 'he sees'), pres. injunctive (*hautta* 'he will know'), pres. conj. (*hiṃāte* 'he will be'), optative (*yaniyi* 'he would do'), imperative (*tso* 'go'), the preterite is expressed by inflected participle (*viṣi*, fem. *viṣa* 'was', plural *viṣa*, fem. *viṣe* 'were'), compound tenses (*āsti viṣi* 'he was seated'), participles (*mā-ṇanda-* 'resembling', *ššāna-* 'lying down', *jsata-* 'slain', *hvaṇa-* 'to be spoken'). The noun is fully inflected in Śaka in three genders, and in Sogdian traces of nominal inflexion are preserved (see P. Tedesco, in *Z.I.I.*, iv. 94 sqq.; E. Benveniste, *Gram. sogd.*, ii. 77). Since the Indian Brāhmī script is used in writing Śaka, vowels as well as consonants are fully known.

Chorasmian is still little investigated. Apart from words quoted in Arabic writers, particularly the calendrical terms to be found in al-Birūnī (*Chronology*, ed. Sachau, p. 47, 173, 192), material has been collected by Ahmet Zeki Validi (*Hwārezmische Sätze in einem arabischen Fikḥ-Werke*, in *Islamica*, iii., 1922). Here خوشخی is 'milk', cf. Sogdian *axšift* 'milk'; زقرک 'deep', cf. Avestan *jafra-* 'deep'; ناشخ 'nose', cf. Sogdian *nyē* 'nose'. An exhaustive study is still awaited.

Middle Ossetic is known in names (see Ws. Miller, *Ossetinskie Etymy*, iii. 39 sqq.; M. Vasmer, *loc. cit.*) such as *Boraspas, Baioraspas, Xarthanos*, and in loanwords in Hungarian (circa 800 A.D.) such as *gond* 'care', *kasdag, gasdag* 'rich', *kara* 'sword', *részeg* 'drunk' (see H. Sköld, *Die ossetischen Lehnwörter im Ungarischen*, 1925). They suffice to indicate the phonology of this period.

In the West two Middle Iranian dialects are known, which can be assigned to North and South respectively. The southern dialect is closely related to literary New Persian. Phonology and vocabulary distinguish these two dialects sharply (see P. Tedesco, *Dialektologie der nordwestiranischen Turfanfragmente*, in *M. O.*, xv., 1923; W. Lentz, in *Z.I.I.*, iv. 251 sqq.): in the North *zan* 'woman', *das* 'ten', *hrē* 'three', *čafār* 'four', *bidīy* 'second', *hira-* 'leave', *kar-* 'make', contrast with the South: *zan, dah, sih, čahār, duḏi, hāl, kun-*. Other dialect influence can be detected, as e.g. in the change *vi-* to *gu-* (cf. New Persian *gunāh* 'sin'). Nominal inflexion is absent from the Manichean texts. It is possible that the frequent final *-y* of the Sāsānian inscriptions represents the remains of the old oblique case in *-ē*. The *-ān* ending (in Old Persian *-ānām* is gen. plur.) appears as nom. plur. (*ardāvān* 'the righteous'). The verbal system of the southern dialect agrees largely with that of early Persian of the Muslim texts (see Henning, *Das Verbum des Mittelpersischen der Turfantexte*, in *Z.I.I.*, ix., 1933). The Old Iranian present bases

are represented by *hāl-* 'leave', *zuv-* 'live', *parvas-* 'fly', *zan-* 'strike', *brās-* 'shine', *vind-* 'find', *dān-* 'know', *kun-* 'make', *čin-* 'gather', *zāy-* 'bring forth'. The trans. preterite is expressed by the participle in *-t* in passive sense: *u-tān paimōxt hēm* 'and you have clothed me', but the form *kird hēnd* 'they have done' (as in New Persian *kardand*) is found. A passive is expressed by *-yh-*: *istāyihēd* 'is praised'. Beside the present indicative with the endings *-ēm, -e(h), ēd, -ēm* (and *-om*), *-ēd, -ēnd* (and *-and*), a full present conj. is attested with the endings *-ān, -āy, -ād, -ām, -ād, -ānd*. An optative 3rd sing. in *-ē(h)* occurs. The infinitive is in *-tan*, the present participles in *-ān*, and (adjectival) *-anday*. The vocabulary has many words lost to New Persian lexicography.

New Iranian. The third period may be dated from the introduction of a new orthography by the writers in Arabic. In the early Arabic books many Iranian words and names, Persian, Sogdian and Chorasmian, are recorded, stripped of the old historical spelling.

The Arabic alphabet was long insufficient to represent the Iranian sounds, while certain signs were superfluous (س ذ ژ ک ه). Hence some symbols had double employment: ج j, ژ z, ف f, v (beside ف), پ. In final position, the guttural (which was written, e.g. in Pahlavi *kēk* 'house', Turfan texts *qdg* 'house', and has moreover survived in some New Iranian dialects, Kumzāri *hēmay* 'fuel', as in Turfan texts 'ymg' 'fuel', Balōči W. *hāmag*, E. *hāmay* 'raw') was indicated by ك ج or ق (سذق نمونج اجدهاك) and medially by ج or غ (بيغان مهرجان). To indicate vowels a new system was adopted in accord with Arabic usage. The older Aramaic system did not distinguish the quantities of *ī ū* (and only partially of *ā*), nor the qualities of *ē ō*. *Alif, y, w*, served to express *ā, ī ē, ū ō*. But in the Arabic script *alif, y, w*, served medially for *ā* (sometimes *ē*), *z, ū* (beside the Arabic diphthongs *ai, au*).

New Persian, with which is closely connected the colloquial language, deviating widely from the literary norm, of the western cities, and the Tādjiki of the eastern Iranian region, Afghānistān, the Pāmirs, Turkistān (see the references in W. Lentz, *Pamir-Dialekte*, i. 29 sqq.), is in strict accord with the language of the Old Persian inscriptions (Old Persian *puša-* 'son', *dān-* 'know', New Persian *pus, dān-*), and the southern dialect of the Sāsānian inscriptions and the Manichean texts, but from its earliest monuments after the introduction of Islām it appears as a dialect largely mixed with forms of other dialects. The mixture had been brought about already in Sāsānian times. As successors of the Parthians whose dialect was of northern type the Sāsānians took over part of the official vocabulary (e.g. *šahr* 'country', *šāh-puhr* 'king's son' as proper name). Forms of both dialects occur in the Zoroastrian books and among the loanwords in Armenian. A few words entered from the eastern dialects (*fayfūr* 'divine son' as title of the Chinese emperor). Hence New Persian has two forms side by side: *bāz, bāj, bāz* 'tribute', *dānā, farzānāh* 'wise', *zamī, zamīn, damik* 'earth'. In the vocabulary of New Persian, the Iranian verbs have been gravely reduced in number. Verbs which are found still

in use in other dialects have disappeared or survive only with preverbs or in nominal derivatives. Such is the case with *an-* 'breathe', *vak-* 'speak' (in *āvā*, *āvāz*, *navā*, *navāxt*), *darb-* 'sew', *darz-* 'fasten, sew' (in *darz* 'seam', *darzi* 'tailor', *dil* 'enclosure'), *nar-* 'send', *nay-* 'lead', *vad-* 'lead', *dam-* 'bind, build', *vind-* 'find', *barv-* 'boil', *vaid-* 'throw, shoot', *gund-* 'dress', *dvan-* 'throw', *mauk-* 'put on', *barm-* 'weep', *ar-* 'grind', *gan-* 'come upon, find', *haik-* 'make wet', *vag-* 'pull out', *kāp-* 'fall' (cf. *kuhun* 'old', Turfan Texts *kafvan*), *iš-* 'see', *snaig-* 'snow', *nas-* 'perish' (in *gunāh* 'sin'), *tirp-* 'steal', *har-* 'go', *tard-* 'split' (in *istālidān* 'to split'), *zyā-*, Old Persian *dyā-* 'take away' (in *ziyān* 'loss'), *vay* 'to wind'. Nominal forms have also been lost: Fārsī dialect of Būringūn *pah* 'small cattle', Ossetic *xed* 'bridge', Balōči *gus* 'house', Zāzā *šit* 'milk', Paštō *zds* 'known'. These and others are not represented in New Persian. Arabic has continually encroached upon the vocabulary. The Irānian character of New Persian is however still easily recognised in its morphology (plur. of nouns *-ān*, *-hā*; pronouns *man*, *tu*, *ū*, *mā*, *šumā*, *kih*, *čih*, *ān*, *in*; verbal forms, pres. tense *kunām*, *kunād*, *kunim*, *kunand*, pret. *kard*, the verb substantive *am*, *i*, *ast*, *and*).

New Irānian dialects have been preserved by their isolation, although, except Ossetic and Kumzāri by reason of their position, they are everywhere yielding to the prestige of New Persian. Recent research has brought knowledge of most of the existing Irānian dialects. Isolated places may, as perhaps in the Kūh-i Taftān region, still conceal unknown dialects, elsewhere and especially in the Pāmirs information has been largely increased. These dialects have so widely diverged from Old Irānian that the whole complex development cannot be indicated here. It must suffice to point out in the various groups certain developments in phonology and morphology.

Phonology. The developments of Old Irānian *u*, *hu*, *du*, *z*, *-t-*, *-č-*, *j-*, *-rt-*, *br*, may be here selected to illustrate the divergence.

1. Ossetic (in two dialects, Digoron and Iron, in Ossetia in the Caucasus): (Digoron) *uad* 'storm', *xuædag* 'self', *duar* 'door', *zærdæ* 'heart', *zonun* 'to know', *sædæ* 'hundred', *rodzingæ* 'window', *dzahur* 'open-eyed', *mard* 'dead', *ærtæ* 'three', *furt* 'son'.

2. Yaghñābī (in the Yaghñāb valley between the Zarafshān and Hisār ranges): *wīl* 'willow', *wāt* 'wind', *xēp* 'self', *diwar* 'door', *bizān-* 'to know', *pač-* 'to cook', *žuām-išt* 'I live', *ārt* 'flour', *tirai* 'three', *pula* 'son'.

3. Shughnī (in the Pāmirs): *wēd* 'willow', *xār-* 'to eat', *devē* 'door' (Yāzgulāmi *dəvūr*, Oroshori *divūr*), *w(ə)zūn-* 'to know', *wuz* 'I', *pīdz-* 'to cook', *čēd* 'knife', *puts* 'son'.

4. Ishkashmī (in the Pāmirs, closely with Sanglēcī): *wīn-* 'to see', *xar-* 'to eat', *war* 'door', *pəzin-* 'to know', *vəru* (Sanglēcī *vruđ*) 'brother', *zonj* 'woman', *kēl* 'knife', *rui* 'three'.

5. Wakhi (in Wakhān, in the Pāmirs): *winam* 'I see', *šāš* 'mother-in-law', *bār* 'door', *bū(y)* 'two', *wuz* 'I', *wrūt* 'brother', *pōcam* 'I cook', *dītsam* 'I milk', *dzi* 'bowstring', *mōrtk* 'dead', *yūmj* 'flour', *trū(y)* 'three', *pōtr* 'son'.

6. Mundji (in Mundjān, in the Pāmirs, related to Yūdghā): *zā winom* 'I see', *wīya* 'willow', *zā xārm* 'I eat', *xāša* 'mother-in-law', *lūvār*

'door', *vzōn-* 'to know', *parwīz-* 'to sow', *zə živm* 'I strike', *kēra* 'knife', *širai* 'three', *pūr* 'son'. A development peculiar to Mundji (and Yūdghā) is that of *št* to *šk*: *man līškəm* 'I saw'. Initially and medially *l* replaces *d*: *lūydā* 'daughter', *kālā* 'when'.

7. Paštō (in several dialects, with a more isolated dialect Wapētsi): *wala* 'willow', *wini* 'he sees', *xwala* 'sweat', *xwāša* 'mother-in-law', *war* 'door', *zə* 'I', *zə* 'heart', *plār* 'father', *rwadz*, *rwaz* 'day', *zwāk* 'life', *čāra* 'knife', *mər* 'dead', *drē* 'three', *dr* 'fire'.

8. Ōrmurī (in two dialects, of Logar and Kani-guram, Afghānistān): *yōr-* 'to rain', *xwai* 'self', *bar* 'door', *bē* 'other', *az* 'I', *zī* 'heart', *pyē*, *pē* 'farther', *biž*, *biz-* 'to cook', *dzan-*, *zan-* 'to strike', *kālī* 'knife', *mulluk* 'died'.

9. Parāčī (in the Hindu Kush): *γā* 'wind', *γī* 'willow', *xar-* 'to eat', *bōr* 'door', *zur* 'heart', *hē* 'bridge', *rūčōn* 'smoke-hole', *pēč-* 'to cook', *jan-* 'to kill', *bur* 'borne', *wā'run* 'flour', *šē* 'three', *puš* 'son'.

10. Balōči (in several dialects: the following forms are from the western dialect): *gwāt* 'wind', *gičinag* 'to choose', *warag* 'to eat', *wat* 'self', *zāmāt* 'son-in-law', *xirdē* 'heart', *brāt* 'brother', *rōč* 'day', *pačag* 'to cook', *janag* 'to strike', *murtā* 'dead', *sai* 'three', *ās* 'fire'.

11. Khūri (in the district of Biābānak, Central Persia): *god* 'wind', *diginom* 'I see', *for* 'sun', *deferom* 'I eat', *dor* 'door', *dāzunom* 'I know', *oyor*, *ohir* 'fire', *bepejom* 'I cook', *sužom* 'I burn', *žen* 'woman', *bedurdum* 'I bore', *pus* 'son'.

12. Yazdī (from material written down in Yazd, at the dictation of a Zardushti in 1932): *me vēvīne* 'I see', *vid* 'willow', *me vāxre* 'I eat', *be* 'other', *bidi* 'again', *me zōne* 'I know', *svūd* 'white', *rūj* 'day', *me vēvāje* 'I speak', *sejen* 'needle', *yenūn* 'women', *zē* 'bowstring', *membārt* 'I bore'.

13. Nāinī (closely connected with Anārakī and Yazdī): *mī vīnī* 'I see', *xārtin* 'to eat', *ābi* 'other', *mī zōnī* 'I know', *vā* 'wind', *sāi* 'hundred', *mī vāji* 'I say', *mī sūji* 'I burn', *bā* 'borne', *-š dārt* 'he had', *pūr* 'son'.

14. Nātanzī (closely with the dialects of Yaran and Farizand): *vī* 'willow', *vīnon* 'I see', *xoron* 'I eat', *bar* 'door', *bī* 'other', *zonon* 'I know', *vāi* 'wind', *vājon* 'I say', *jan* 'woman', *bām-bard* 'I bore', *kārd* 'knife', *pūr* 'son'.

15. Sōi (from material collected in Isfahān and Soh in 1932): *āvīnū* 'he sees', *bēšxordā* 'he has eaten', *ebi* 'other', *xūnū* 'he knows', *estī* 'white', *āvūjū* 'he says', *āpezen* 'they cook', *jē* 'woman', *bēje* 'strike', *ārt* 'flour', *-š kārdebō* 'he had done'.

16. Khunsārī: *bāz vīmān* 'I see him', *itxurān* 'I eat', *bār* 'door', *-ām xūnā* 'I knew', *did* 'saw', *bīrā* 'brother', *idvāzān* 'I say', *isvān* 'I burn', *bāzūn zi* 'they struck', *mird* 'man', *bāmārt* 'I brought'.

17. Gazi (near Isfahān): *venūle* 'he sees', *xerūle* 'he eats, falls', *ebi* 'other', *zūne* 'he knows', *ōsbō* 'white', *bērāsā* 'arrived', *režūle* 'he pours', *sūzūle* 'he burns', *pešūle* 'he cooks', *žande* 'alive', *že* 'gum', *bēžzent* 'he knocked', *dārtāž* 'he had', *pūr* 'son'.

18. Siwandī (in Fārs): *vā* 'wind', *vīyū* 'willow', *fird* 'small', *bārtā* 'door', *zire* 'yesterday', *mē-pešī* 'I cook', *žene* 'woman', *kerdeš* 'he made'.

19. Simnānī (in North Persia, east of Tīhrān): *vū* 'willow', *vā* 'wind', *a muxurūn* 'I eat', *bar* 'door', *mā zonun* 'I know', *rūz* 'day', *a dumārīzun* 'I pour', *jānikā* 'woman', *žāniā* 'wife', *kārd* 'knife', *mū bābārdan* 'I bore', *pīr* 'son', *heira* 'three'.

20. Sangsarī (related to the dialect of Lāzgirdī): *vī* 'willow', *dāxurī* 'I eat' (Aor.), *vūné* 'knee', *sai* 'hundred', *rūz* 'day', *bēvāzi* 'I say' (Aor.), *žen* 'woman', *bezetēn* 'to strike', *āri* 'flour', *še* 'three', *pūr*, *pūr* 'son'.

21. Tālīši (on the west of the Caspian Sea): *va* 'snow', *han* 'sleep', *hande* 'to sing', *ba* 'door', *az* 'I', *zone* 'to know', *darsan* 'needle', *ka* 'house', *sipi* 'white', *rūz* 'day', *žie* 'to live', *žen* 'woman', *pard* 'bridge', *karde* 'to do'.

22. Gilakī (closely connected with Māzandarānī and the dialect of Gozarkhon): *varf* 'snow', *xūram* 'I eat', *zamō* 'son-in-law', *barar* 'brother', *sufam* 'I burn', *-pāj* 'cooking', *zean* 'to strike', *bārdim* 'I bore'.

23. Gūrānī of Kandūla (dialects of Kandūla, Pāwa, Aurāmān, Rijāb, Bājalān, Talahedeshk are recorded): *vārān* 'rain', *vārw* 'snow', *wār* 'sun', *wārm* 'sleep', *zil* 'heart', *zāmā* 'son-in-law', *mārizū* 'he pours out', *rōznā* 'window', *žī* 'bowstring', *žān* 'woman', *-š kārd* 'he made'.

24. Kurdi (in several dialects: the following is from the Mukri): *bafr* 'snow', *xwārt* 'eaten', *dārk* 'door', *dāzānim* 'I know', *spt* 'white', *rōž* 'day', *dāsōžē* 'it is burnt', *žin* 'woman', *kirt* 'done', *bōm nārd* 'I sent', *sē*, *sēk* 'three'.

25. Zāzā (dialects of Siwerek, Bijāq, Čabakhčur, Kīghī, Kor, Čermuq and Palu are recorded): *vaur* 'snow', *vāyō* 'wind', *war-* 'to eat', *bār* 'door', *zān-* 'to know', *ādīr* 'fire', *rīz-* 'to flow', *rōž* 'day', *pauj-* 'to cook', *vāj-*, *vāž-* 'to say', *jan-* 'to strike'.

26. Kumzārī (in the Masandam Peninsular, 'Omān): *bāram* 'rain', *guṇay* 'hunger', *xōr* 'he ate', *xuṇwōw* 'sleep', *dimestān* 'winter', *zur* 'anger', *zamiyo* 'earth', *spīr* 'white', *bur* 'happened', *sūzin* 'needle', *rōzen* 'window', *zank* 'woman', *bizen* 'strike', *murik* 'man', *xōrdin* 'food', *dās* 'sickle', *pas* 'son'.

27. Tātī (on the Apsheron Peninsular): *vārf* 'snow', *biyā* 'widow', *xuwar* 'sister', *dār* 'door', *dumbor* 'son-in-law', *dunustān* 'to know', *zumustun* 'winter', *zuhun* 'tongue', *biran* 'to be', *dīran* 'to see', *bror* 'brother', *poriz* 'autumn', *mivīzun* 'I sift', *ruz* 'day', *zan* 'woman', *zistan* 'to live', *xordan* 'to eat'.

28. Fārsī (dialects of Somghūn, Pāpūn, Māsārm, Būringūn and Imāmzāde Ismā'il): *mībōnām* 'I see', *biš kirdān* 'to send', *mīxāftām* 'I slept', *nīmīdānām* 'I do not know', *zānt* 'knee', *dā* 'given', *mīpāzām* 'I cook', *zā* 'struck', *bu*, *burd* 'borne'.

29. Lurī, Bakhtīārī: *barf* 'snow', *bahū* 'tent', *xwārdan*, *xārdan* 'to eat', *dōwā* 'son-in-law', *zō* 'tongue', *ispīd* 'white', *dī* 'smoke', *bēd*, *bēd* 'willow', *bēz-* 'to sift', *rūz* 'day', *zaidan* 'to strike', *zēna* 'woman', *ord* 'flour'.

30. New Persian: *būd* 'willow', *bād* 'wind', *xvāš* 'mother-in-law', *xud* 'self', *dar* 'door', *dānam* 'I know', *dāmād* 'son-in-law', *šad* 'hundred', *safīd* 'white', *pasam* 'I cook', *bīzam* 'I sift', *ard* 'flour', *kard* 'made', *murd* 'died', *sih* 'three', *pus* 'son'.

The following general tendencies may be especially noticed: 1. *μ*- is replaced by a guttural in

Balōči, Khūrī, Ōrmurī, Parāčī and partly also in New Persian; 2. the correspondence of Ossetic *h*- (Iron dialect *q*-), *v*-, *d*-, Yaghnābī *γ*-, *v*-, *d*-, Shughnī and Yāzgulāmī *γ*-, *v*-, *δ*-, Mundjī *γ*-, *v*-, *l*-, Pashtō *γ*-, *w*-, *l*-, in contrast to Ōrmurī and Parāčī *g*-, *b*-, *d*-, marks a distinction within the eastern group; 3. *-š* tends to be modified in the eastern dialects: Ossetic *hos*, *qūs* 'ear', Ōrmurī *gōy*, Parāčī *gū*, Mundjī *yūy*, Pashtō *γwaž*, Waṇetsī *γwaž*, Shughnī *γuž*, Ishkāshmi *γul*, Sarikol *γaul*, Rōshānī *γōw*, Bartangi and Oroshori *γāw*, Yāzgulāmī *γvān*, contrasting with New Persian *gōš* (*gūš*).

Relationship of the Dialects. The larger divisions among the New Irānian dialects are results of old differences, originating in the earliest period. Two great groups, an Eastern and a Western, are distinguished by phonology, morphology and vocabulary (see G. Morgenstierne, *Report on a Linguistic Mission to Afghanistan*, p. 31 sqq.). The eastern group is itself divided by old differences into subordinate groups. Ossetic, isolated in the Caucasus, has developed a morphology which separates it sharply from the Yaghnābī, with which however it shares, for example, the plural *-tā*, Yaghnābī *-t*. Yaghnābī is in turn isolated as the only surviving Sogdian dialect. In the Pamirs Shughnī forms a group with Oroshori, Yāzgulāmī, Rōshānī, Bartangi, Sarikolī, and the now extinct Wančī; similarly Ishkāshmi and Sanglēči. Mundjī in several dialects (see the classification by G. Morgenstierne, *Report on a Linguistic Mission to North-Western India*, p. 70) has close relations with Yūdghā. Wakhi stands alone, noticeably in its phonology (*š* in *šāč* 'dog', *yišn* 'iron', *ri* in *mürtk* 'dead', *tr* in *pōtr* 'son'). Ōrmurī and Parāčī, though now widely different, yet have common phonological traits, in particular *b*-, *g*-, *d*-, and the replacement of *μ*- by *γ*-. Pashtō is known in several dialects (G. Morgenstierne, *Report on a Linguistic Mission to Afghanistan*, p. 11).

In the Western group subdivisions are similarly to be recognised. Zāzā, Gūrānī, Kurdi, Khūrī, Balōči, Gilakī (with Tālīshī, the dialect of Gozarkhon, and Māzandarānī) form sharply distinct groups. The southern dialects, Lurī, Fārsī, Kumzārī, and the literary New Persian show clear descent from a dialect similar to, and probably identical with, the Old Persian. To these Tātī belongs as the dialect of garrisons settled in the region of Darband.

In the central district lying between Tīhrān, Isfahān, Hamadḥān and Yazd, are found a number of dialects which have not yet all been fully investigated. They share a common vocabulary. The formation of the present affords a means of grouping them. The Sangsarī, Lāzgirdī and Shamarzādī agree in forming the present with the infix of a nasal *-n*-, *-nd*- (possibly representing the Old Iranian *-ant*-participle; similarly in Zāzā: Sangsarī *žimendī* 'I strike', Lāzgirdī *hām vāndim* 'we say', Shamarzādī *kafana* 'he falls'. Simnānī is then isolated, with present *māzonun* 'I know'. The dialects of Wonīshun (Wānīshān), Mahallāt and Khunsār agree in having *it-* (*āt*-, *et*-) in the pres.: Wonīshun *ētxemerūn* 'I break', Mahallāt *ātimirin*, Khunsār *itḥāmārān*. Nātanzi, Farizandī and Yaranī form one group: in the pres. Nātanzi *koron* 'I do', Farizandī *akāron*, Yaranī *akoron*. Sōī (*ākerom*), Meimeī (*ākere* 'he does'), Kōhrūdī (*akerūn*), Kesheī

(*akerūn*) also have *ä-*, while Zefrei (*korōn*), like Nātanzi, has no preverb. Siwandī is again isolated in phonology (cf. for 'sun', *fešk* 'dry'), and pres. *mēkeri* 'I do'. Nānī, Anārakī and Yazdī (as spoken by the Zardushtis of Yazd and some of the adjacent villages) show some resemblance: Nānī *mī-, ī-, š-* (sing. and plur. with the preterite verb), Yazdī sing. *mī, dī, šī*, plur. *mō, dō, šō*; pres. Nānī *hānigi* 'I sit', Yazdī *me ānige*, Nānī *mī kirti* 'I do', Yazdī *mē kre*; vocabulary, Nānī *mī ēndāvni* 'I send', *mī mēndift* 'I sent', Yazdī *me vēnive*, pret. *mēnēft*. Near Isfahān the dialects of Gaz, Se-deh, Kafrōn, Komshe and Khorzūgh are closely related, but with differences in detail: Gazī *ināne* 'I sit', Khorzūghī *ināne*, Se-deh *nikōne*, Kafrōn *hōningōne*, Komshei *ininge*.

Morphology. 1. Gender. Gender expressed by distinct forms of nouns and adjectives is either eliminated entirely from New Irānian, as in Ossetic, New Persian, Gazi, Parāči and other dialects, or has survived in a system of two genders (masculine and feminine). In Pashtō and Mundji these two genders are still in full vigour. Ōrmuḡi has preserved traces of the distinction of masc. and fem. in the participles (*nastak* beside *nāsk* 'taken'), and similarly in the Shughnī group. In the western dialects, Simnānī distinguishes a masc. (*ī*) and fem. (*ia*) of the indefinite article. In the Gūrānī dialects, the Aurāmānī shows slight trace of gender (*a* 'he is', *ānū* 'she is'), and Kandūlai keeps the masc. determinative suffix (*-ā, -ākā*) distinct from the fem. (*-ī, -ākī*). Traces of gender are recorded in Farizandī (*-e* 'he is', *-ā* 'she is'). The Zāzā dialects have a fully developed system: in nouns, masc. *-ō*, fem. *-ā*; the adjective has at times fem. *-ā*; in pronouns masc. *nō*, fem. *nā* 'this'; in verbs *yānnō* 'he comes', *yānnā* 'she comes', *āmā* 'he came', *amē* 'she came'.

2. Nominal inflexion. Ossetic stands apart in New Irānian with a full inflexion representing for the most part an innovation. Elsewhere the inflexion is much reduced; in New Persian and other western dialects, it has disappeared. A system of two cases (direct and oblique) is found in Yaghnābi: *yar* 'mountain', obl. *yari*, plur. *yart*, obl. *sutūrti* 'sheep'; in Pashtō *yar* 'mountain', obl. *yrā*, plur. *yrūna*, obl. *yrō, yrūnō*; in Mundji *-y*, obl. *-an*, plur. *-ī*, obl. *-af*, in Yūdghā *kyē* 'house', obl. *kyēn*, plur. *kyēi*, obl. *kyēf*. Wakhi has a distinct oblique plur.: sing. *xūn* 'house', plur. *xūn, xūništ*, obl. *xūnav*, and similarly Sarikoli *ēd* 'house', plur. *ēd*, obl. *ēdav* (see P. Tedeseo, in *Z.I.L.*, iv. 94 sqq.). Parāči has sing. *yus* 'house', gen. *yusikā*, abl. *yusi*, plur. *yusān*, gen. *yusān(a)*. In the west Balōči has the same two cases: *lōg* 'house', obl. *lōgā*, plur. *lōg, lōgān*, obl. *lōgān* but also a gen. sg. *lōga*, with *-a* from *-ay*; Simnānī: *āsp* 'horse', obl. *āspi*, plur. *āspi*, obl. *āspun*; Kurdi (Mukri): *xutā* 'God', obl. *xolāi*; *dū* 'water', obl. *āwī*; plur. direct and obl. *āspān* 'horses'. In forming the plural New Persian has *-ān* (Old Irānian *-ānam* gen. plur.), a trace of old inflexion, but also the abstract suffix (probably originally in collective sense) *-hā*, corresponding to the Pahlavi *-yh*, as also the Judaeo-Persian *-yh*, cf. the form of the Turfan texts *kisvarihān* 'regions'. A different abstract suffix is used in Ossetic *-tā*, Yaghnābi *-t* (cf. Middle Sogdian *-ty*), and in Wakhi *-ist* (cf. Middle Sogdian *-yšt*).

Verb. The divergence from the Old Irānian system, already marked in Middle Irānian, has developed further in New Irānian. New verbal systems have been evolved. In spite of independent growth, however, a general resemblance is found, for example, between New Persian and Ossetic. In New Persian means are to hand to express active and passive, indicative, conjunctive, optative, imperative, infinitive, present (punctual and durative), imperfect, preterite, perfect (punctual and durative), pluperfect, future and conditional.

Infinitives. The infinitives show independent selection from Old Irānian verbal nouns. Old Persian *-tanaiy* reappears in New Persian *-tan*, Sivandī *berdēn* 'bear', Vonishun *bertān*, Sangisari *bebartēn*, Ardistanī *māden* 'die', Mukri Kurdi *kēšān* 'draw', Gilaki *giŋtan* 'say', Tāti *diran* 'see', and other western dialects, beside a second infinitive (representing the Old Irānian verbal noun *-ti-*, which serves in the dative in Avestan *-tē* as infinitive): New Persian *guft* 'speak', Gazi *kārt*, *ke* 'make', Mukri Kurdi *kušt* 'kill', Ardistanī *vā* 'say', Zefre *bebērt* 'bear'. Other verbal nouns are found: Ossetic *fārsun* 'ask', Gazi *kārāmūn, kārtmūn* (with related dialects), Yazdī *retvūn* 'pour out', *dōdūn* 'give', Gūrānī (Aurāmānī) *āmāi* 'come', *kārdāi* 'make', Zāzā *kārdāi* 'make', Balōči *janag* 'kill', Yaghnābi *karak* 'do', Wakhi *xanak* 'speak', Ōrmuḡi *xanōk* 'laugh', Parāči *kuḡō* 'make', Sanglēči *šūāk* 'go', Ishkashmī *xarruk* 'eat', Shughnī *vidāu* 'bear', Mundji *vēd* 'know', *lūrtāy* 'reap', Yūdghā *kerah* 'make', Pashtō *kyāl* (here *-al* represents the Old Iranian *-aba-*).

Present tense. In Old and Middle Irānian pres. indic. and pres. conj. are clearly separated. Both modes of thought are expressed in New Irānian. Conj. pres. inflexion, distinct from indic. pres., is preserved in Yaghnābi (*kunī-ist* 'he does', conj. *kunāt*) and Ossetic (*kenui* 'does', conj. *kēna*). Other dialects have one form of present inflexion, which therefore serves to express both present and aorist (with meanings of fut. and conj. pres.). In certain dialects, as in early New Persian *kunam* 'I do', Mundji *xāram* 'I eat', Yūdghā *xoyem* 'I plur.', Oroshorī *kinūm* 'I do', Shughnī *xaram* 'we eat', 'I plur.', Sanglēči *xaram* 'I plur.', this form appears alone in both senses. But greater precision was attained by use of prefixes, suffixes and periphrastic forms marking off the present. So in Khūri *de-* (deferom 'I eat'), Kurdi Mukri *dā-* (*dākāwim* 'I fall'), Kurmāndjī *a-* (*akawam* 'I fall'), Abdū *ti-* (*tiberum* 'I bear'), Khunsari *it-* (*itārān* 'I bring'), Mahallāti *āt-* (*ātūn* 'I come'), Nānī *ē-*, *ī-* (*mī tāri* 'I bring', *ivāzi* 'he runs'), Luri Bakhtiāri *ī-* (*ikunom* 'I do'), Yaranī *a-* (*abarōn* 'I bear'), Farizandī *a-* (*abarōn* 'I bear'), Sōi *ā-* (*āhārū* 'he grinds'), Gūrānī Kandūlai *mā-* (*mākārū* 'I make'), New Persian *hami*, *mī* (*mīkunam* 'I do'), Yazdī *ve-* (*me vēpēse* 'I cook'), Gazi *-e* (*ārūle* 'he grinds'), Zāzā of Siwerek *-n-* (*bārmānnān* 'I weep'), Lāzgirdī *-n-*, *-nd-* (*a vāin* 'I say', *ēon vāndān* 'they say'), Sangisari *-n-*, *-nd-* (*a vāndi* 'I say'), Ōrmuḡi *bu-*, *b-* (*b-nasam* 'I take', *bu kē* 'he makes'). Periphrastic forms are used in Parāči: *ānem xārūn, ān xārūnem* 'I eat'. Gilaki has *amondaram* 'I am coming' (infinitive *amon* 'to come' with *daram*), beside the durative preterite *amonde bum* 'I was coming', and Balōči *kānayā* 'I am doing', Zāzā *kārdōy-ān* 'I am doing'. Nātanzi *boron* 'I bear' and Gilaki *bārām* have no prefix. The aorist (in meaning fut. and

conj. pres.) may equally be defined. Parāčī *janem* 'I strike' (aor.) is without preverb but the present indic. is formed periphrastically. Similarly in Zāzā the aor. I sing. *bārān* is distinct from the indic. *bānnān*; in Gūrānī (Kandūlai) aor. I sing. *bārū* beside indic. *mākūrū*; in Gāzī *berān* aor. I sing. beside indic. *berāne*. But most commonly the aor. is marked by the preverb *be-*: New Persian (colloquial) *būkunām*, Gilaki *bābāram*, Zāzā *bēbārmān*, Simnānī *bābārun*, Kurdi Mukri *bēkām* 'I do', Pashtō has *wu* (*wu kram*, but also *kram*, beside the indic. *kawum*). Shughni has a preverb *tsa-* (*tsā sāwē* 'if thou go'), Sangleči a suffix *-a-*: *az šom-a* 'I go', Wakhi and Sarikoli may suffix *-ō*.

Apart from Yaghnābī which has a preterite with augment (*akunim* 'I did'), all New Irānian dialects employ forms of the *-t* participle (representing the Old Irānian *-ta-* part.) to express the preterite. In accordance with the original distinction of this participle in transitive and intransitive, a twofold form of expression was developed: for transitive verbs passive in construction, for intransitive active, as, for example, in Gāzī *bimādī* 'I saw', but *debōyān* 'I became'. This passive transitive preterite is well maintained in the dialects Tālishī, Simnānī, Gāzī, Sōi, Kurdi, Gūrānī, Zāzā, Nātanzī, Nānī, Sivandī, Fārsī dialects, Balōči, Ōrmuṛī, Parāčī, Pashtō, Mundjī, Wakhi, and others, and is known in early literary New Persian (*girift-aš* 'he took'). When the personal suffixes accompanied the participle, they usually preceded, but in some cases tended to be affixed, as in Gāzī *biddī* 'thou sawest', but *dārtāz* 'he had', Simnānī *ta hākārdāt* 'thou madest', Aurāmānī *dāt* 'thou gavest', *dās* 'he gave', Mundjī *mān lām* 'I gave', *to liyat* 'thou gavest'. The intransitive was expressed by the participle with the verb substantive. The two forms remained then sharply distinct. But in New Persian (and traces of the development are found in the Middle Persian of the Turfan texts) the transitive preterite is modelled on the intransitive, and both are made identical: *kardam* 'I made', *kardī*, *kard* as *āmadam*, *āmadī*, *āmad* 'I came', etc. In the original passive construction there is no affix to the participle, as in Zāzā *min* (*tō, āi, mā, šimā, inān*) *kārd* 'I made', etc., but *ās āmān* 'I came', *tī āmāi*, *ō āmā*, *mā āmāimā*, *šimā āmāi*, *ē āmāi*.

Perfect and Pluperfect. A perfect and a pluperfect were developed from the adjectival form of the participle (in Pahlavi and Sogdian *-tk*, Old Irānian *-taka-*, as in Avestan *nivaštaka-* 'turned'), to which were added the pres. and pret. of the verb substantive. Here too the construction is passive in transitive verbs, e.g. Gūrānī (Kandūlai) perf. trans. *-āš kārđān* 'he has made' (*-n* 'he is'), pluperf. trans. *-š bāstāi* 'he had bound' (cf. *nāš* 'he was not'), Gāzī perf. intrans. *bēyān* 'I have become' pluperf. intrans. *bībēbōyān* 'I had become'. But in New Persian the perfect and pluperfect, alike transitive and intransitive, are identical in form: *kardam* am 'I have done', *kardah būdam* 'I had done', as *āmadah am* 'I have come', and *āmadah būdam* 'I had come'.

1) See K. Barr, in *Iranische Dialektaufzeichnungen aus dem Nachlass von F. C. Andreas*, herausgeg. und bearbeitet von Arthur Christensen, K. Barr und W. Henning, *Kurdische Dialekte, Gārrūsī*, § 37, note 1.

Passive. In New Irānian the passive (which is of infrequent use in the colloquial language) shows but few traces of the Middle Irānian passive in *-zh-*: Gūrānī (Kandūlai) *kiryān* 3rd sing. perf. pass. 'has been made' *māsūčān* 'it burns'; Zāzā *ās kišyēnān* 'I am killed'; Kurdi of Sinnā has *akuzyēm* 'I am killed'. From Yaranī is quoted *bahmariā* 'was broken'. The passive with umlaut in Kurdi Mukri *dākirē* may represent the Old Iranian passive in *-ya-*. Eastern Balōči employs *-ij-* (as it seems borrowed from the identical Sindhi passive): *k'usijān* 'I am killed'. But usually in New Irānian dialects the passive is expressed by the participle with auxiliary verbs. So in Balōči *kuštāgān* 'I am killed'; New Persian has used the verbs *āmadan* 'to come', *gaštan* 'to turn', *šudan* 'to go, become' (this latter is now the usual auxiliary); in other dialects *baw-* 'to become' is frequent: Gilāki *bākande buboste* 'it was dug down', Simnānī *vāpārsā mābin* 'I am asked'. Mundjī uses the verbs *āy-* 'to come' (for the pres.) and *šy-* 'to go' (for the preterite) with the participle in *-gā*. In Ōrmuṛī the auxiliary is *šūk* 'to go', and in Parāčī *ch-* 'to go' or *par-* 'to go', and similarly *šwāl* 'to go, become' in Pashtō. In Ossetic two forms are found, *nymad ten* 'I am counted' and *bazyndāna* 'will be made known'.

III. PERSIAN LITERATURE.

Definition. By Persian literature we understand all works written in modern Persian, in contrast to middle Persian (Pahlavi), or in other words the whole of Persian literature from the Arab conquest of the present day. It should be observed however that this literature can be regarded as a unity only up to a certain point. The vicissitudes of western Asiatic history brought it about that Persian became the literary language of a number of peoples whose vernaculars had no connection

with Persian. Persian became the language of the upper classes of these peoples, just as French became in the xviiith century for various peoples in Europe. The result is that Persian literature in the wide sense includes not only the literature of Persia, but also the literature of Central Asia, and to some extent of Turkey, India and Afghānistān. Although down to the xvth—xviith century these literatures were very slightly differentiated, in modern times the differences between them have become so strongly marked that their literatures can no longer be considered as a single whole. This circumstance makes a comprehensive survey of all the literature which may be called Persian an impossible task and forces the student to set more precise limits, which must also apply to this article. Here therefore by Persian literature we mean only the literature of Persia, and such writers as belong to Central Asia, India or Afghānistān will be more or less disregarded.

The beginnings. It has so far not been possible to trace the initial stages of Persian literature exactly. There is, it is true, no lack of anecdotes relating to these first steps but they are so obviously unreliable that they are hardly worth consideration. It is of course natural that these early stages could only have been recorded by chance, as from the point of view of later ages they appeared of very little value.

Nevertheless the fragments that have survived make it possible to put forward certain hypotheses which are probably not too far from the actual truth. The early centuries after the Arab conquest saw a gradual decay of Pahlavi literature. At first sight it might appear that literary activity in Persia ceased completely. But this was not the case. If we turn to the Arabic literature of this period we find that a large number of Persian poets and scholars were writing in Arabic. The valuable anthology of al-Tha'ālibī (d. 1038), *Yatimat al-Dahr* (pr. 1885), contains most interesting information which shows that already in the ixth century Arabic had become the literary language of the upper classes in Khurāsān and Transoxania. But at the same time there were signs of activity in the opposite direction. The political situation of Persia, whose rulers were trying to cast off the Arab yoke, and the gradual exhaustion of the caliphate demanded not only political opposition to the Arabs but also the ending of the domination of the Arabic language in the field of literature. But the 150 years of the supremacy of Arabic did not pass without leaving a trace. Pahlavi had become a dead language; there was therefore only Persian to oppose to Arabic as a literary language. On the other hand, there prevailed, especially in poetry, Arabic forms (*qaṣida*, *ghazal*) and the Arabic quantitative metre ('*arūd*'), which so firmly established rhyme, probably foreign to Pahlavi, that a return to the poetical technique of the Sāsānian period was impossible. Arabic poetry had however to submit to certain changes, such as the introduction of the very long syllable into prosody, which was not possible in Arabic at all and probably arose in the process of inserting Persian words into Arabic lines. How and when the first lines of verse entirely in Persian arose it will hardly be possible to ascertain with certainty. Persian sources profess to consider the fragments that survive of a *qaṣida* by 'Abbās Marwazī said to have been composed in Marw (809) in honour of

Ma'mūn, son of Hārūn al-Rashīd, as the oldest poem in Persian. Unfortunately it is still somewhat difficult to express a definite opinion on the genuineness of these lines. The anthologies (*tadhkira*) and dictionaries (notably Asadī's valuable *Lughat-i Furs*) contain isolated lines from poets like Abū Hafṣ Sughdī, Ḥanzala Bādghisī, Maḥmūd Warrāk Harawī, Firuz Mashriḳī, Abū Salik Gurgānī etc. of whom some may possibly be as early as the viiith century. These fragments however are but miserable remnants, which give evidence of the existence of poetry but do not enable us to obtain a clear idea of Persian verse in its earliest period.

xth—xiiith century. As early as the tenth century we find these early efforts attaining a very high degree of artistic perfection. The courts of the various princes around whom the poets gathered formed centres of literary activity. But as the poets were usually directly dependent on their patrons and had to some extent to adapt themselves to their taste, it is quite natural that almost every dynasty in Persia was surrounded by a group of poets who present a certain unity, especially from the point of view of style, so that the classification of Persian poets by dynasties, as has been usual in Persia from early times, has a certain amount of justification in literary history. In order to give some lucidity to our account of the rather complicated process of the literary evolution of Persian poetry, we shall retain this classification, at the same time subdividing our account according to the various kinds of poetry so that the links may not be broken. In the first section the following kinds of poetry are mainly concerned: *a.* lyrical court poetry, *b.* epic, *c.* mystic. Prose hardly comes into consideration at all in this section, as the older Persian literature scarcely ever uses prose for belles-lettres. Prose is for old Persia the language of scholarship only. But it is to be noted that for the pre-Mongol period the language of scholarship is predominantly Arabic so that even in this field a higher degree of development of Persian prose is only slowly attained.

a. The Court Lyric. While as early as the time of the Tāhirids and Ṣaffārids we can recognize the first approaches to the formation of a characteristic court style, we do not see it in its full perfection till the time of the Sāmānids (875—999), whose capital was Bukhārā. Although here also the devastation wrought by time has left us only a few remains, it is still absolutely clear that at this time a flourishing literary activity in Bukhārā was in full swing. Round the Sāmānid court gathered a large number of distinguished poets, who on the one hand were engaged in singing the praises of the rulers in sonorous *kaṣīdas* and on the other in bitter rivalries with one another for pre-eminence, a struggle carried on with poetical weapons also, i. e. satires (*hadjw*, *hidjā*). Of all these poets the greatest was the celebrated Rūdākī [q. v.] of Samarḳand. His *kaṣīda Mādar-i mai* is an unsurpassed masterpiece. Rūdākī seems to be the first creator of the type of the Persian poet which all others endeavoured to copy: poet, aristocrat, liberal, frivolous, amorous, wine-loving, chivalrous, devoted only to the joys of life, never touching its gloomier sides. In the field of didactic poetry also he won great fame by a version (which has unfortunately not come down to us) of the *Kalīla wa-Dimna*. But he introduced another theme into Persian poetry, the

lament for lost youth, which he expressed in moving language. His younger contemporary Kisā'ī [q. v.] (b. 953) of Marw dealt with the same theme. It may be assumed that these laments were not simply exercises in style but had a genuine foundation in the circumstances of the Persian poet. His duty was to adorn the court of his prince, to share his pleasures and to amuse him; a soured old greybeard was not suited for this and was no doubt, little appreciated in spite of former services. No less characteristic are the laments of the famous Shāhid of Balkh who is said to have been the first to collect a complete *Dirwān*. He laments principally the injustice in the distribution of the world's goods, which clearly points to his lack of success at court. The language of all these poets is clear and lucid; they are still very moderate in the use of poetic artifices and observe the limitations of poetry. Of second class (or perhaps by chance less known) names of this circle of poets the following may be mentioned: Ma'rūfī Balkhī (c. 954—961), Abū Shu'āib Harawī, Abū Zarra'a Djurdjānī, Abū Tāhir Khusravānī, Djūybārī Bukhārā'ī, Amīr Aghādjī, Bukhārā'ī, Rawnakī, Ma'nawī, Abū 'l-Faṭḥ Bustī (known also from his poems in Arabic) and 'Ammāra Marwazī.

After the fall of the Sāmānids a new literary centre arose in Ghazna at the court of the celebrated Sultān Maḥmūd (q. v., 998—1030) and his successors. This school received its key-note from the famous poet 'Unṣurī (q. v., d. 1050) of Balkh. His *kaṣīdas*, which celebrate the sultān and his campaigns and endeavour to prove his claim to the throne of Persia by theological hair-splittings, are very fine examples of the more serious court poetry. Rūdākī's frivolity would have been out of place at the court of the rigidly orthodox sultān. Two other poets who were mainly active at the court of his brother Amīr Naṣr recall in their joie de vivre more the poetry of the Sāmānid period. They are Minūčihri (q. v., d. c. 1050) of Damghān, who has given us in several poems fine specimens of bibulous humour and liked to make allusions to pre-Islāmic legends, and Farrukhī of Sistān (q. v., d. 1037—1038), whom Persian literary historians are fond of comparing with the master of the Arabic *kaṣīda* al-Mutanabbī [q. v.]. The glowing colours of his descriptions of nature are really marvellous expressions of the imagination. As a theorist also he is known for his treatise *Tardjumān al-Balāgha*. No less important is Asadī (q. v., d. between 1030—1041) of Tūs, who was the first to enrich the varieties of court poetry with the *munāzara* or disputation (like the *tensone* of Southern France). Two poets of this name are usually distinguished; the younger, author of the *Garshasp-nāma*, is said to be a son of the elder. But there are reasons for thinking such a distinction unnecessary and the existence of two Asadis doubtful. Under the successors of Sultān Maḥmūd, who were no longer able to hold together their father's gigantic empire, poetry was still held in high honour. Of the poets who adorned their courts the master of the *kaṣīda* Abū 'l-Faraj Rūnī (d. about the beginning of the viiith = xiith century) and his pupil Mas'ūd-i Sa'd-i Salmān (d. 1131) were specially prominent. The latter in particular, who spent a great part of his life in prison, created a new kind of poem, the *Habsiyāt* (prison *kaṣīdas*), in which he lamented his cruel

fate. No less important is 'Uṭh mān Mukhtārī (d. about the middle of the viii = xiith century) in whose poems the learning of his time gradually penetrates into poetry. The other dynasties who shared the power with the Ghaznawids, but were hardly on the same level, also endeavoured to attract poets of talent to their courts. Mention must thus be made among the poets of the Būyids (932–1055) of Kamāl al-Dīn Bundār of Raiy, who in addition to literary Persian used the dialect of Raiy for his poems. The celebrated Kaṭrān Djabilī (q.v., d. 1072–1073) also sang the praises of the Būyids, but he was for the most part in the service of the rulers of Ādharbāidjān and his poems were long thought to be the work of Rūdakī. Even beyond the Oxus among the Turkish Ilak-Khāns (931–1165) Persian poetry flourished. The best poet of this school was the brilliant 'Am'ak (d. c. 1148), who shared his fame with Rashīdī and Naḍjībī Farḡhānī. 'Am'ak's *qaṣidas* are especially distinguished by their unusually fresh and joyous *nasibs*, which are full of unexpected turns of speech.

As already mentioned, prose played very little part at this period in the life of the court. But we must mention at least three works of the greatest importance for the history of the development of Persian prose style, namely the universal history in Persian of the Sāmānid vizier Abū 'Alī Bal'amī (q.v., d. 996), the highly interesting history of the Ghaznawids by Abu 'l-Faḍl Baihaḳī (q.v., d. 1077–1078) and the *Kābūs-nāma* (begun 1082) of prince Kai-Kā'ūs b. Iskandar b. Kābūs.

Court poetry undoubtedly reached its highest development in the time of the Saldjūks [q.v.] (1037–1300). But the simplicity and the vigour and freshness of colour which so delight us in Sāmānid poets gradually disappear; the *qaṣida* becomes more arid, but attains more and more technical dexterity, which finds expression on the one hand in an accumulation of poetical artifices and on the other in the utilisation of all branches of scholastic learning to create choice and unusual images. While in the time of Sulṭān Maḥmūd the works of the court poets were readily intelligible to any reader of some education, the later Saldjūk period produces poems which presuppose a well-educated reader and could be a source of pleasure only to specialists. Many works of this period are really only intelligible through commentaries which have been preserved. Among the poets of this period the following are outstanding: Azraḳī of Herāt (q.v.; d. c. 1113), who procured a somewhat doubtful fame as author of the *Alfiya-Shalfiya*, a didactic poem on the art of love. Adīb Šābir, the great master of the *qaṣida*, who was sent by his sovereign on a political mission to the Khwārizm-šāh where he met a tragic end (between 1145–1151). The favourite of Sulṭān Sandjār, Amīr Mu'izzī [q.v.], about whose wealth and fabulous greed the biographers have much to say. Lāmi'ī [q.v.] of Djurdjān, 'Abd al-Wāsi' Djabalī (q.v.; d. 1160) who has quite a peculiar style and brings many animals into his *qaṣidas* with great skill. The place of honour among all these masters must be given to the unrivalled Anwārī [q.v.], whose *qaṣidas*, among which are the famous "tears of Khurāsān", are undoubtedly the finest that this complicated style was able to produce (d. between 1189–1191). The rulers of Khwārizm

endeavoured to check Anwārī's influence with the work of Rashīd al-Dīn Waṭwāṭ (q.v.; d. 1182–1183). This poet, who is also entitled to credit for his work as a theorist, is distinguished by unusually caustic language but as a poet he can scarcely be compared with Anwārī, beside whom only the characteristic figure of Khākānī (q.v., d. 1199), who sang the praises of the Šāhs of Shirwān, remains unfaded. The difficulty of the language of this original poet is proverbial in the east but nevertheless he is recognised to this day as the greatest master of the *qaṣida*. Sūzānī of Samarḳand (d. 1173–1174) was also an occasional panegyrist of the Saldjūks but he was known chiefly for his satires and parodies which are often obscene but very witty. Women also wrote poetry; for example we have a few lines by Sulṭān Sandjār's friend Mahistī, which show great talent although they unfortunately contain unusually cynical expressions. Niḏāmī 'Arūdī [q.v.] of Samarḳand was a poet at the Ghūrīd court; he is chiefly notable for his *Cahār Maḳāla*, one of the most important sources for the biographies of poets. The end of this period is marked by the two last great poets of *qaṣidas*, Ḥāḥir al-Dīn Fāryābī (q.v., d. 1202), whose poems in spite of facility of technique show in comparison with Anwārī a certain decline of the court style, and Kamāl-i Ismā'il called *Khallāq al-Ma'āni* or "Creator of Spiritual Ideas" (d. 1237). This last poet turned in his later years from the court style and preferred the contemplative life of a Šūfī *shāikh* to success at court. His best work is already full of the spirit of Šūfī mysticism and in this field also he succeeded in creating real masterpieces.

b. Epic. The first essays in epic poetry, a genre which had been practically unknown to the Arabs and which, so to speak, represented the Irānian national element in Persian literature, were made by Persian poets even before the time of the Sāmānids, in the period of the first wars against their Arab masters. In this field therefore the Persians had no foreign models and were completely dependent on pre-Islāmic tradition and to some extent on popular poetry. Unfortunately once more only fragments of the oldest works have come down to us, which do not permit us to gain anything like a clear idea of their character. In this field it was again the old master Rūdakī who created the first work of any size, namely the celebrated version of the *Kalīla wa-Dimna* of which only some 50 baits have come down to us. At the same court the talented young and vivacious poet Daḳīḳī [q.v.] undertook a larger work, namely a metrical version of the official Sāsānian book of kings, the *Khudāi-nāma*. His premature death prevented him from carrying out this grandiose scheme. All that he left was about 1,000 baits, which seem to have given the stimulus to the greatest achievement of Persian poetry, the *Shāh-nāma* of the celebrated Abu 'l-Kāsim Firdawsī [q.v.] of Tūs (born c. 934, d. between 1020–1026). This gigantic work, which according to the poet himself contains 60,000 baits and combines the whole epic tradition of Persia into an artistically perfect whole, became the foundation for a long series of later poems or *mathnavīs*, as this genre is called, from an Arabic technical term. Firdawsī's second work, finished when he was well over seventy years of age, namely his *Yūsuf u-Zulāikḥā*, is from the artistic point of view little

inferior to his masterpiece. The story of Joseph, which with later poets (Djāmi) became a song of songs of mystic love, becomes in his hands a moving lament of the boy carried off to a strange land, which may well describe the feelings of the aged and homeless poet in Baghād. Firdawsi's first successors followed his example closely and wrote regular epics, among which the already mentioned *Garshasp-nāma* of Asadī and works like the *Barzū-nāma*, *Sām-nāma* etc. may be particularly noted. But very soon the character of the epic changes and it gradually becomes a romance of chivalry. Thus for example the *Wāmiḡ wa-ʿAdhrā*, now lost, of the already mentioned 'Unṣurī, in spite of its many descriptions of fighting, is mainly concerned with the love-story of the hero and heroine. This transformation is still more evident in Fakhr al-Dīn Gurgānī's [see DJURDJĀNĪ] celebrated *Wis u-Rāmīn* (written about 1048), the Persian counterpart of the European Tristan story, in which the hero, regarded from the point of view of the heroes of old Persia, is almost entirely devoid of knightly qualities. The court epic attains its zenith in the quintette (*Khamsa*) of the great Nizāmī [q. v.] of Gandja (1141—1203). Some of his poems have really very little connection with the old epics and are, like *Laili u-Madjnun*, predominantly lyrical and romantic in tone. After Nizāmī the Persian court poets hardly ever attempted to treat of new subjects and remained within the bounds already laid down for them.

c. *Mysticism*. We have so far been mainly concerned with the court poetry, but the other current in Persian literature has its source in very different circles. Šūfism [see TAŠAWWUF], arising on Arab soil, entered Persia also and spread among the artisans and to some extent also among the merchants who populated the towns of Persia. In its quite early stages Šūfism became connected with the *futuwwa* movement [q. v.] and the mystical note became more and more emphasised. So far as we can judge, the oldest Šūfī lyrics arose from the demand for a poetry of their own which should brighten the public meetings of the Šūfī bodies. Isolated lines, quatrains and *ḡayḡ*'s of pronounced Šūfī colouring arose as early as the tenth century, but the first more or less extensive collections belong to the first half of the xith century. While the famous Bābā Ṭāhir 'Uryān (see ṬĀHIR; d. 1019) expresses pronounced Šūfī views only in his prose works and in his quatrains follows the model of the popular poetry (even in language, for a number of them are written in dialect), Bābā Kūhī Shirāzī (d. 1050) is already a mystic through and through in the full sense of the word. His *Dirwān* which has come down to us is, it is true, much corrupted, but the theories of the xth century are quite apparent from his verses which are interspersed with Qur'ān verses and ḥadīths. Until quite recently it was generally thought that the earliest Šūfī poet was the celebrated Shaikh Abū Sa'īd of Maihana. But there is no longer any doubt that he only once in his life composed a quatrain on the spur of the moment. All the other poems ascribed to him are either forgeries, or possibly were really declaimed by him during his sermons without having been composed by him. The mystical lyric attains a higher degree of perfection in Anṣārī [q. v.] also called Pīr-i Anṣār or Pīr of Herāt (1006—1088), whose principal work is the celebrated *Munāḍjāt*, ardent

prayers full of feeling in rhymed prose. The soil was now sufficiently prepared and Persian mysticism began to bear its finest flowers, which have given Persian poetry world-fame. But before we pass to these great masters we must briefly mention two names which it has hitherto been the custom to mention in connection with Šūfism. These are the famous scholar 'Omar Khayyām (q. v.; d. c. 1123) and the preacher of Ismā'ilism Nāṣir-i Khusrāw [q. v.]. To return to orthodox Šūfism we must first mention Sanā'ī (q. v.; 1048/1049—1141), the poet of Ghazna. If his *Dirwān*, half secular, half mystical, reveals further development along the path laid by Anṣārī [q. v.], his didactic poems, among which we may mention the *Ḥadīḡat al-Ḥaḡḡiḡ*, represent the first attempt to enliven the theories of Šūfism by inserting parables of a popular character. This device, only sparingly used by Sanā'ī, is brilliantly exploited by his successor, the celebrated Farīd al-Dīn 'Aṭṭār (see AṬṬĀR; 1119—1230). In his poems the inserted tales attain full development and frequently display the greatest artistic perfection in their simplicity. The climax of this ascending series is formed by the incomparable and gigantic work of the great Djalāl al-Dīn Rūmī (q. v.; 1207—1273) also known as Mawlā-yi Rūm. His didactic poem, which bears the proud title of *Mathnawī*, i. e. "the poem" *par excellence* (perhaps with allusion to al-Kur'ān), is the finest thing that Oriental mysticism with its unlimited riches has produced. The famous Sa'dī (q. v.; 1184—1292?) is also usually reckoned among the mystics, although really only a few of his works have a distinctly mystical tinge. Sa'dī is rather a teacher of practical wisdom; he endeavours to show his readers the way by which in his troubled period the all too heavy blows of fate could be softened.

d. *Prose*. We have already observed that classical Persian literature was accustomed to clothe belles-lettres with a metrical garb, and preferred Arabic for learned works. The prose literature of this period is therefore not so rich as the poetry is. Along with the already mentioned work of Bal'ami we may also note the famous Abū 'Alī b. Sīnā (Avicenna; q. v.), who in addition to his works in Arabic wrote an encyclopædia of philosophy in Persian, the *Dāniṣh-nāma-yi 'Alā'ī*. The dialect of Ṭabaristān was used at the end of the tenth century by Marzbān b. Rustam [q. v.] for the *Marzbān-nāma*, a version of the *Kalīla wa-Dimna* [q. v.]. Unfortunately this work is now lost and known only from Sa'd Warāwīnī's Persian translation (written between 1210—1215). The *Siyāsat-nāma* of the Saljuḡ wazīr Nizām al-Mulk (q. v.; d. 1092) is an important book, which besides containing valuable historical material well reflects the political ideas of the period. This list of the most important works shows quite clearly that there is practically no belles-lettres proper. The first work that we can put in this class is the Persian translation of the *Kalīla wa-Dimna* finished in 1144 by Abū 'l-Ma'ālī Naṣr Allāh [see NAṢR ALLĀH]. But here again it must be pointed out that the book was not then regarded as light literature but as a kind of "mirror for princes", that is to say as a learned work. The aim of the Persian translation of the *Faradī ba'd al-Shidda* completed in 1155 by Ḥusain al-Mu'ayyadī was similar, but with particular stress on the didactic element. The end of the xith century

brings a series of romances of chivalry and versions of pre-Islāmic material, the greater part of which is known only in later versions, often only in the form of popular romances. We may mention here the romance *Kitāb-i Samak 'Iyār* by Sadaḳa *Shīrāzī* composed in 1189, the fantastic and enormous romance of Amīr Ḥamza, the *Bakhtyār-nāma* and the romance of the Beduin hero *Ḥatīm Tayī*. To conclude this section, we may mention that in this period we already find a certain development of historical writing, a series of works on poetics, and the first attempts at anthologies (*tadhkira*, among them 'Awfi's [q. v.] valuable *Lubāb al-Albāb*). But as this compressed survey of Persian literature is forced to confine itself to belles-lettres such works cannot be dealt with here.

From the Mongols to the sixteenth century. The early years of Mongol rule were a period of tribulation for Persia. Although later Mongol rulers took an interest in the restoration of the country the destruction done in the early invasions was so vast that the land could only recover slowly. In the general havoc it could hardly be expected that Persian literature would continue on its earlier lines. Yet it is this period that produces the great series of eminent historians whose works form the foundation of all research by European scholars. Without going into further details we must at least briefly mention the more important names. These are 'Aṭā Malik *Djuwainī* [see *DJUWAINI*], Waṣṣāf [q. v.], the great Rashīd al-Dīn [q. v.], Faḍl Allāh and Ḥamd Allāh Mustawfi *Kāzwīnī* [see *KAZWINI*]. Poets on the other hand became rare and they seek comfort mainly in mysticism. Court poetry after the destruction of the brilliant court life survived mainly in outlying parts of the country which had suffered less in the general destruction. But this poetry could not for the most part rise above the level of the classical period and seeks to surpass its predecessors in dexterity of technique. Several poets who knew that they possessed a certain perfection of style left their native land and sought refuge with the rulers of India. For example Badr-i Cāc, a fairly skilled master of the *qaṣida*, left Central Asia to become court poet of Muḥammad b. Tughluq (1325—1351); there he was followed by Kānī'i of Tūs who however afterwards went to Asia Minor. An endeavour to give new life to the court language, which had become arid and formal, by the addition of Mongol and Turkish loan-words was made by Pūr-Bahā-yi *Djāmī*, who described the earthquake at Nishāpūr in 1267—1268 in a successful *qaṣida*. Only the mystical poets still retain traces of the ecstasies which filled the works of their predecessors. Of great importance is Fakhr al-Dīn 'Irāḳī of Hamadhān (d. 1289) who in his *Lamā'at*, suggested by Anṣārī's *Munādjāt*, produced a work *sui generis*; his *'Ushshāḳ-nāma* also contains much that is valuable. Less known but interesting is Awḥad al-Dīn Kirmānī whose *Mishāḥ al-Arwāḥ* in many ways recalls the *Divina Commedia*. Awḥadī [q. v.] of Maragha attained great renown. His *Djām-i Djām*, which is now very little read, was copied 400 times in a single year. For European scholarship the *Gulshan-i Rāz* of Maḥmūd Shabistārī (d. 1320) had considerable importance. This was the first work from which a clearer idea of the teachings of Ṣūfism was obtained. A further development of the mystical quatrain is found in

Afḍal al-Dīn Kāshānī (also called Bābā Afḍal; d. 1307), who also can claim mention as the author of several treatises of a philosophical character. Among all these quite a special position is occupied by Nizārī Kūhistānī (d. 1320). Although an Ismā'īlī, like Nāṣir-i Khusraw at an earlier date, he is distinguished from the latter by sarcastic outbursts against orthodox Islām with such drastic effect that almost all authorities declared his writings heretical and hostile to religion. As a result manuscripts of his works are very scarce. Some of his longer poems (like *Muḡhir u-Azhar*) read like deliberate parodies of the aphorisms of Sa'dī and the court epic.

If Persian literature in the Mongol period had fallen into a kind of lethargic trance, under Timūr and his successors (1370—1405) it experienced a renaissance. The reason for this is probably that, with the decline of Mongol sovereignty, a large number of petty local dynasties arose who were all anxious to restore the ancient usages of court life and to adorn their courts with poets. This period therefore became a new flowering-time of Persian poetry and it may well be called the second classical period. Although the greater part of its poetry lacks the freshness and vigour of the pre-Mongol period, some of its poets succeeded in surpassing their predecessors. Of the masters of this period the following may be mentioned: Ibn Yamin (q. v.; d. 1368), for a time court poet to the Sarbadārs in Sabzawār, a great artist in the *khifā*, which was very little cultivated before him and then mainly for *vers d'occasion*. Khwādju Kirmānī [see *KIRMĀNĪ*; d. 1281], author of a *Khamsa* which endeavours to discard the rather pedantic learning of Nizāmī and is distinguished by grace and lightness of touch. His *ghazels* also show an endeavour to cast off Sa'dī's moralising tendency and to melt into pure expressions of feeling. 'Ubaid [q. v.] Zākānī (d. 1371), one of the most original figures of Persian literature, whose occasionally rather bold parodies contain ruthless criticism of and contempt for the Persian aristocracy. Salmān [q. v.] Sāwādī (d. 1376), celebrated for his difficult play on words, witticisms and technical skill, and lastly Lisān al-Ghaib Khwādja Ḥāfiz [q. v.] Shīrāzī (d. 1389), the incomparable master of the *ghazel*, who was able to combine the greatest freshness and depth of feeling with the elegance demanded by the taste of the age and brought the *ghazel* to the height of its development, never again reached by any one after him. Two less talented parodists must be mentioned as characteristic representatives of the period: Abū Ishāḳ Aṭ'ima, the poet of cooking, and Kārī Yazdī (second half of the xvth century), the tailor poet. Their works show that the grand style of the court poetry was already in decline and a new wave was about to break which revealed its weaknesses and made new "humble" objects the subject of its art. Among the prose writers we may here mention *Ḍiyā' al-Dīn Nakhsabī* [see *NAKHSABĪ*], whose book of the parrot (*Tūṭī-nāma*, 1330), a version of the old and now lost *Sindbad-nāma*, had a great success and was utilised by several later writers. His short prose romance *Gulrīz* should also be mentioned.

Under Timūr's successors the striving after artificiality increases still further. The poet's object is not to be generally understood. On the contrary his aim is to write only for a few select connois-

seurs who are able to appreciate his difficult tours de force. Outwardly this aim finds expression in the widespread use of a new form of poem, the *mu'ammā* [q. v.], a kind of riddle on names in verse. The best poets of this period were not ashamed to devote their attention to the *mu'ammā* and even the mystic *Djāmī*, who had cut himself off from the world, wrote a treatise on the theory of it. The authors of this period are all more or less influenced by *Šūfism*, which was probably a result of the years of trial and of the great invasions, which had clearly shown even to the great ones of the earth the transitoriness of worldly fortune. The famous *shāikh* and much honoured saint *Ni'mat Allāh Kirmānī* [see *NI'MAT ALLĀH WALI*; d. 1431] who founded a darwish order which bore his name, left, in addition to some 500 short prose treatises, an extensive *Diwān* which is not without a certain beauty. The mystic *Kāsim al-Anwār* [see *KĀSIM-I ANWĀR*; d. 1433-1434] is important; in his *Diwān* he used not only Persian but also Turkish and even the dialect of *Gilān*. *Kātibi* [q. v.] *Nishāpūri* (d. 1434-1435) returned to the scheme of the *khamṣa* but almost all five of his parts are pervaded by mystical allusions and endeavour to conceal a certain adherence to stereotyped pattern by artifices of technique. 'Ārifī of *Herāt* (d. c. 1449) achieved great fame by his celebrated *Hāl-nāma* also called *Gūy u-Čawgān*. 'Iṣmat *Bukhārā'i* (d. 1425-1426), who was able to work up an old *Šūfi* legend in his *Adham-nāma* to a beautiful work of art, is also of interest. *Husain Wā'iz Kāshifī* [see *KĀSHIFĪ*] (d. 1504-1505) occupies a prominent place; he achieved great fame by his version of the *Kalīla wa-Dimna* called *Anwār-i Suhailī* and set the pattern which has never been equalled for a highly artificial and unusually difficult prose style. The greatest master of this period is undoubtedly 'Abd al-Raḥmān *Djāmī* [see *DJĀMĪ*; d. 1492], a prolific poet who left in addition to seven great *maṭnawīs* an extensive *Diwān* and many treatises. In spite of great versatility and a certain depth of feeling (as, for example, in his celebrated *Yūsuf u-Zulaikha* or *Lailī u-Mad'nūn*) all his work shows traces of decline, which is especially apparent when his poems are compared with works of the classical period. In this period also the writing of history flourished, and out of a number of distinguished historians we may mention *Hāfiẓ-i Abrū* [q. v.], 'Abd al-Razzāk [q. v.] *Samarḳandī* (d. 1482), *Mirḳhwānd* (q. v.; d. 1498) and *Khwāndamīr* (d. after 1534).

It has been the custom in Europe to close the history of Persian literature with the *Timūrid* period. The *Šafawid* period is, it is quite true, a period of great decline in Persian poetry. As these rulers did not encourage praise of the secular government, the poets of this period sought in their *qaṣīdas* to celebrate the supposed ancestors of their rulers, the imāms of the *Shī'a*, which gave the poet *Muḥtasham Kāshānī* (d. 1588) the opportunity to compose his famous *Hafṭband* in honour of the imāms. Many other names could be mentioned such as *Hātifi* (q. v.; d. 1520-1521), *Bābā Fighānī* (see *FIGHĀNĪ*; d. 1519), *Umīdī* (d. 1519 or 1523-1524), the two *Ahlīs*, *Turshīzī* (d. 1527-1528) and *Shīrāzī* (d. 1535-1536), *Hilālī* (q. v.; d. 1528-1529), *Lisānī* (d. 1533-1534), *Wakhshī* (see *WAKHSHĪ BĀRĀQĪ*; d. 1583). But it must be confessed that

very little attention has so far been paid by orientalists to these poets and practically nothing has been written about most of them. It seems however that isolated works, such as the *Farḥād u-Shīrin* of *Wakhshī*, deserve attention and might afford quite interesting material for the student. A characteristic feature of the xvth and also of the xviih century is the migration of Persian poets to India, attracted by the brilliant court of Akbar and his successors. The result was that a second centre of Persian poetry arose in India and gradually a peculiar Indian style developed, which in turn exerted a considerable influence on the literature of central Asia. The best known of these Indo-Persian poets are 'Urfī [q. v.] *Shīrāzī* (d. 1590-1591), who endeavoured to replace bombastic rhetoric by impressiveness and "sweetness" (*halāwat*), and his teacher *Faiḍī* (d. 1595), a distinguished scholar, who studied the religious doctrines of India and even translated several works from Sanskrit into Persian. The xviih century again shows a long series of names, among which we mention those of *Šahābī* (d. 1601-1602), the last great master of the quatrain, *Zulāfi* (q. v.; d. 1615), author of *Sab' Saiyāra*, seven longish poems of which the most notable is *Maḥmūd u-Ayāz*, *Tālib-i Āmulī* (d. 1626-1627), the author of an interesting romance of adventure in verse, and lastly the *Hāfiẓ* of the xviih century: *Šā'ib* [q. v.] *Tabrizī* (d. 1677-1678) who is still much read in India and Central Asia. *Šūfism*, which was mercilessly persecuted by the *Šafawids*, falls almost completely into the background in this period, but instead a very copious theological literature of the *Shī'a* develops in Persian. As the theologians of this period wanted their works to be as widely disseminated as possible, they succeeded in creating a peculiarly light and elegant prose style, which is very favourably distinguished from the artificial periods of the *Timūrids* and prepares the ground for modern Persian literature. Philosophical literature also was considerably enriched by the works of the great *Mollā Šadrā* (see *ŠADR AL-DĪN*; d. 1640-1641) and his successors.

The *Kādjārs* and modern Persia. The *Kādjār* monarchy established at the end of the xviih century brought with it a literary revival in Persia. While *Fath 'Alī's* court poets still followed the old traditions and produced little of value, a distinct change becomes apparent in the second half of the xixh century, the result of a closer contact with the European powers who were vying with one another for predominance in Persia. *Fath 'Alī Shāh's* court poets, like *Nashāt* (q. v.; d. 1828-1829) with his tender lyrics, *Šabā* (d. 1822-1823) with his *Shāhān-shāhnāme*, an imitation of *Firdawsī*, which celebrates the wars of 'Abbās *Mirzā* with the Russians, or the "*Djāmī of the sixteenth century*", *Wiṣāl*, all have much that is admirable to their credit, but nevertheless they are only epigones who lack originality completely. Quite a new note is struck in the works of the three great masters of this period: *Kā'ānī* (d. 1853-1854), *Shāibānī* (q. v.; d. 1888) and *Yaghmā* (q. v.; d. 1860). Although *Kā'ānī* studied both French and English and translated several books from these languages, his *qaṣīdas* are still, broadly speaking, repetitions of the long obsolete court style. But in the *nasīb*s of these bombastic exercises in style there are many wonder-

fully realistic scenes which would be quite impossible in the "golden age". *Shahbānī*, who suffered great injustice from the *Kādjārs*, strikes a gloomy and pessimistic note and bitterly laments the rottenness of the whole structure of the *Kādjār* monarchy. *Yaghmā*, perhaps the most interesting of all three poets, whose life was an unbroken chain of sorrows, attacked the Persian notables in bitter satire and ended with even blacker pessimism and a complete denial of the possibility of a happy life. His effort to purify the Persian language of Arabic loanwords is of interest. A great influence on further development was exercised by the *Dār al-Funūn* (1852), the first educational institute intended to further the study of western learning, the teachers in which were almost exclusively Europeans. The work of this institute required the translation of a series of western textbooks. This task however revealed that the rhymed prose of the classical period could not be used for such a purpose. The works of these first translators, who in addition to the textbooks also translated several novels, chiefly from the French, was of tremendous importance for the literary language of Persia and prepared to some extent the way for the literature of contemporary Persia. The *Dār al-Funūn* was also of great significance for learning in Persia. Its first director *Riḍā Qūlī Khān* (q. v.; d. 1871), who used the *takhalluṣ* *Hidāyat* for his poetry, was one of the greatest literary historians of Persia. Among his pupils were the famous historian *Šanī' al-Dawla*, later known as *Ihtishām al-Saltāna* (d. 1896), whose works are still one of the most valuable sources for the history of modern Persia. The efforts of the *Dār al-Funūn* also produced a widespread desire to help in making known the achievements of European science. Remarkable in this respect is the work of *Mirzā 'Abd al-Rahmān Nādjīār-Zāda* who under the name of *Tāliboff* published a series of popular works which dealt with the most varied subjects. Of these works the most important are the *Kitāb-i Ahmad* and *Masālik al-Muhsinin*. Of the greatest importance for Persian literature of the 19th century was the introduction of printing (first press in *Tabriz* in 1816—1817), which also made newspapers possible. But the first newspapers were intended only for court circles. It was not till 1851 that the first newspaper of any size appeared. The press made remarkable progress during the great struggle for the constitution (*mashrūṭa*) especially after the opening of the *Maḍjlis*.

This struggle hastened the literary revolution, which had been prepared for by the work of the writers of the 18th century. The political struggle made quite new demands upon the participants. Literature was no longer to be the special property of the aristocracy but had to speak clearly and intelligibly to the masses. Satirical poetry, which was particularly cultivated during these years (1906—1909), therefore broke away from the old tradition; instead of the old literary language which was difficult to understand it uses the language of the street and of the bazaar, instead of the dry old classical forms it sets out to imitate the street ballad (*taṣnīf*). The vernacular also found its way into prose. *'Alī Akbar Dihkhudā* (*Dakhaw*), the great master of the feuilleton, wrote his biting and humorous pamphlets *Čarand-parand*, which brightened the revolutionary paper

Šūr-i Iqrāfīl. This style was also adopted by later writers and influenced two of the best satirical works of recent years, namely the incomparable collection of stories *Yakī būd yakī na-būd* ("Truth and Fiction") by *Āghā Saiyid Muḥammad 'Alī Djamāl-zāda* (1922) and the trilogy by *Muḥammad Mas'ūd* (*M. Dihālī*) the last part of which appeared in 1934 under the title *Ashraf-i Makhluqāt* ("the Crown of Creation").

In the war against the antiquated, the dramatic form, unknown to the classical literature, was also used. While old Persia had had only farces ("wandering players") and religious mysteries (*ta'siya* [q. v.] or *azā*), the comedy after the European model made its appearance in the form of Persian translations of the famous works of the *Ādharbāidjānī* author *Faṭḥ 'Alī Akhund-zāda*, which were translated by *Mirzā Dja'far Karadjadāghī*. These plays obviously served as models for the original plays by the well known politician and founder of freemasonry (*farāmūsh-khāna*) in Persia, *Mirzā Malkum-Khān*. If the theatre was influenced on the one hand by *Ādharbāidjānī* literature, on the other acquaintance with the Turkish drama made possible the appearance of versions of Molière's plays, among which we may mention *Le médecin malgré lui*, *Le Misanthrope* and *Tartuffe*. The lack of a regular stage in Persia however made the further development of the drama impossible for the time being. Only in recent years have tragedies appeared in Persia, among which the historical *Dāstān-i khūnin* (1926) by *Saiyid 'Abd al-Rahīm Khal-khālī*, *Akhirin yadgar-i Nādirshāh* (1927) by *Sa'id Nafīsī* and *Parwīn* (1931) by *Šādiḳ Hidāyat* may be mentioned. The wave of satire in the first decades of the 20th century also produced the first satirical novel *Siyāhat-nāma-yi Ibrāhīm-beg* by *Hādjdji Zain al-'Ābidīn* of *Marāgha* (d. 1910). This work, planned in three parts on the model of the *Divina Commedia*, had a fabulous success and is still of value as a characterisation, exaggerated it is true, of the defects of old Persia.

The Present Day. In order not to destroy the continuity we have already been compelled to mention some of the most recent works. It would be very difficult to give at this time a comprehensive sketch of the last few decades. The period after the War and the great changes that have taken place in Persia naturally have also had their influence on literature. Yet it is not so easy for Persian literature, particularly poetry, to cast off the thousand-year-old traditions of the classical literature. The struggle with these traditions found expression mainly in two ways: on the one hand prose attempts to gain predominance over poetry and thus to reverse the old proportions, and on the other the new poetry endeavours both in form and matter to break through the old limitations. This second task is the more difficult as it requires unusual ability to prevent the efforts of the innovators appearing as mere schoolboys' work alongside of the perfection of the classics. For this reason the greatest of the modern poets still adhere rather tenaciously to the traditional forms, even if as regards matter they are far removed from the old models. The greatest of the modern poets, *Saiyid Muḥammad Adīb-i Piṣhāwarī* (d. 1931), can hardly be distinguished as regards form from the classical poets, of whose

technique he has a complete mastery, but as regards matter his poems with their glowing hatred of England and echoes of the World War are something quite new for Persia. The same may be said of the celebrated Malik al-Shu'arā' Bahār, whose great *qaṣidas* in spite of their traditional style are almost entirely political in content. On the other hand, Abu 'l-Kāsim 'Arif Kāzwīnī (born c. 1879—1880) has cast off the old tradition to a considerable extent. Of classical forms he prefers the *ghazal*, but has attained his greatest fame by popular *taṣnīfs*, some of which played a great part during the fighting in the Persian Revolution. The poems of Iradjmīrzā (d. 1926) are very famous; his main theme was the fight for the liberation of the Persian woman. Unfortunately his works are characterised by a repulsive cynicism which is quite irreconcilable with the loftiness of his ideals. Among the younger poets first place must be given to Rashīd Yāsīmī (born 1897), whose tender lyrics distinctly betray the influence of European poetry. Yāsīmī has also distinguished himself as a literary historian. Nīmā is endeavouring to create new forms and in his *Maḥbas* ("prison") he succeeded in impressively depicting the tragic lot of the Persian peasant. Mention must also be made of Nizām Wafā, author of two short *mathnawīs* which the European reader will feel to be too sentimental. The *Sargudhasht-i Ardashīr* is interesting; its author, Waḥīd Dašt-girdī, is editor of the *Armaghān*, the best Persian literary monthly. There are also women-writers and the rather naive verse of the poetess Parwīn shows that we may hope for success in this field also.

Revolutionary tendencies in Persian poetry are represented by Mīr-zāda 'Ishkī (killed in 1925), noted for his poem *Idēl-i Pīr-mard-i Dihkān*, and Kāsim Lāhūtī, now working in the USSR (b. 1887), who has with great skill been able to overcome the old traditions and to give his revolutionary poems artistic forms most effectively.

If the Persian poetry of recent years is still feeling its new way only very tentatively, the prose can show remarkable achievements. The first years after the War gave the Persians their first historical novel '*Ishk u-Saltanat*' (printed 1919) by Shaikh Mūsā Hamadḥānī, the chief hero in which is the Achaemenid Cyrus. The episode of Bīzhan and Manīzha from Firdawsī's *Shāh-nāma* was worked up into a long novel by Aghā Mīrza Ḥasan-Khān Badī', the story of *Mazdak* was used by Ṣan'atī-zāda Kirmānī, who also wrote a novel from the life of *Mānī* (pr. 1927). The most interesting of all these historical novels is the *Shams u-Tuḡhrā* (in three parts: written in 1909) of Muḥammad Bākīr-Mīrzā Khusrāwī, who describes the condition of Fārs under Mongol rule (xiiith century). Kamālī's novel *Lāzika* (1931) is outspokenly nationalist. If the historical novels are intended to remind the Persian reader of the departed greatness of his country and arouse his national pride, the second group of modern novels is devoted to the criticism of present conditions. The difficult position of women in Persia is dealt with by 'Abbās Khalīlī in his *Rūzgār-i siyāh* (2nd ed. 1925). The same author has written a number of shorter novels and stories, among which we may mention *Intikām*, *Insān* and *Asrār-i Shāh*. The hard lot of the working classes and the criminal conduct of the Persian bureaucracy before the revolution of 1921 are described by

Muṣṭafā Muṣḥfiḳ Kāzīmī in his *Tihrān-i makhḥūf* (2nd ed. 1924). The same author has also published several shorter novels. Aḥmad-'Alī-Khān Khudādāda deals with the sufferings of the peasant in his *Rūz-i siyāh-i kārgar* (1927). The novel *Maḥjma-i Dīwānagān* (1925) of the already mentioned Ṣan'atī-zāda is fanciful and Utopian; the same author in 1934 published another Utopian novel, *Rustam dar Kār-n-i bist u-duwrum*, in which he endeavours to demonstrate the inadequacy of the old ideals of chivalry.

This compressed survey, which can only mention more important works, shows that modern Persian prose has developed much more vigorously than poetry. If we consider the difficulties which the Persian moderns had to overcome, there can be no doubt that the next few years must produce an ever greater literary revival and that new Persia will soon produce works of art, which will be able to take their place beside the noble creations of the classical period in the literature of the world.

PERTEW PASHA, the name of two Ottoman statesmen.

I. PERTEW MEHMET PASHA, Ottoman admiral and wezīr, started his career on the staff of the imperial harem, became *kapudji bashi* [q. v.], later Agha of the Janissaries and in 962 (1555) he was advanced to the rank of wezīr; in 968 (1561) he was appointed third wezīr, in 982 (1574) second wezīr and finally commander (*serdār*) of the imperial fleet under the *kapudan pasha* Mu'ezzin-zāde 'Alī Pasha. He later fell into disgrace and died in Stambul where he was buried in his own *türbe* in the cemetery of Eiyüb.

Bibliography: J. v. Hammer, *G.O.R.*, iii. 382, 438; Mehmed Thureiyā, *Sidjill-i 'othmānī*, ii. 37 sq.

II. PERTEW MEHMED SA'ID PASHA, Ottoman dignitary and poet. He was of Tatar descent and was born in the village of Darīdja near Urmiya. In his early youth he came to the capital Stambul and entered upon an official career. In Muḥarram 1240 (Sept. 1824) he became *beylikdji efendi*, i.e. State referendary and in Sha'bān 1242 (March 1827), head of the imperial chancery (*ra'is al-kuttāb*). Two years later he lost the post of chancellor and went on a special mission to Egypt. On his return he became in 1246 (1830) assistant (*kiaya*) to the grand vizier. On the 23rd Dhu 'l-Ka'da 1251 (March 12, 1836) he was appointed minister for civil affairs (*mülkiye nāzirī*) and given the title of marshal (*müşār*). In the spring of 1836 he was given the title of Pasha but was dismissed by the autumn. In the beginning of Sept. 1836 he was banished by Maḥmūd II to Scutari in Albania. Pertew Pasha set out a few weeks after his banishment to his place of exile but did not reach it. He died in Adrianople three hours after a banquet which the governor there, Muṣtafā Pasha, gave in his honour (according to Gibb, *H. O. P.*, iv. 333: Emin Pasha). No one doubted that his sudden death was due to poison and public opinion ascribed the crime to Maḥmūd himself. On his family see *Sidjill-i 'othmānī*, ii. 38. His son-in-law, who shared his views, was the intriguing private secretary to Maḥmūd II, Waṣṣāf Bey, a highly educated man but lacking in character and accessible to bribery, who lost his office about the same time as Pertew Pasha and was banished to Tokat in Anatolia; cf. G. Rosen, *Geschichte der Türkei*, i., Leipzig 1866, p. 255 sq. Pertew Pasha's successor was his political opponent 'Ākif Pasha, cf. Babinger, *G. O. W.*, p. 357 sq. — As a statesman Pertew Pasha took up a pronounced anti-Russian attitude and was no less hostile to the Christians, whom he oppressed with long obsolete and forgotten laws. His feeling against the Christians increased with advancing years.

As a poet, Pertew Pasha composed a *Diwān*, which was esteemed as a model of the poetical art of the period of Maḥmūd II. There are two editions of it: Bülāk 1253 (80, 91 pp.) and Stambul 1256 (80, 130 pp.). On other works by Pertew Pasha see Brūsālī Mehmed Tāhir, *'Othmānī Mū'ellifleri*, ii. 114 sq. — His valuable library, rich in manuscripts, is now in what was formerly the Selimiye monastery in Scutari.

Bibliography: G. Rosen, *Geschichte der Türkei*, i., Leipzig 1866, *pass.*, esp. p. 255 sq.; Gibb, *H. O. P.*, iv. 332 sqq. with references to Jouannin and J. van Gaver, *Turquie*, Paris 1843, for an account of the death of Pertew Pasha in Adrianople; Mehmed Thureiyā, *Sidjill-i 'othmānī*, ii. 38; Sāmi Bey Frāsherī, *Kāmus al-'Alām*, p. 1494 sq.; Brūsālī Mehmed Tāhir, *'Othmānī Mū'ellifleri*, ii. 114. — This Pertew Pasha is not to be confused with the statesman and poet Pertew Edhem Pasha who died on the 7th Dhu 'l-Ka'da 1289 (Jan. 6, 1873) as governor of Kastamuni [q. v.], a number of whose poems have been published e. g., a *Shāhnāme* and *Lāhika*, s. l. (= Stambul) n. d., and *Ilāk al-Aḥkār fī 'Aḥd al-Abkār*, Stambul 1304. On him cf. Mehmed Tāhir, *op. cit.*, ii. 114 sq.

(FRANZ BABINGER)

PESANTREN. [See PASANTREN.]

PESHĀWAR, a district, *taḥṣīl*, and city in the North-West Frontier Province of British India. The district which lies between 71° 25' and 72° 47' E. and 33° 40' and 34° 31' N. has an area of 2,637 square miles and a population of 947,321 of whom 92 per cent are Muslims (1931 Census Report). It is bounded on the east by the river Indus, which separates it from the Pandjāb and Hazāra, and on the south-east by the Nilāb Ghasha range which shuts it off from the district of Kōhāt. Elsewhere it is bounded by tribal territory. To the south lie the territories of the Ḥasan Khēl and Kōhāt Pass Afridis; westwards, the Khaiber Afridis and Mullāgoris. Farther north, across the Kābul river, the various Mohmand clans stretch to the Swāt river. The northern boundary of the district marches with the territories of the Utmān Khēl, the Yūsufzais of Swāt and Buner, the Khudu Khēl, Gaduns and Utmānzais. Mountain passes famous in frontier history connect it with the surrounding tribal tracts. In the north-east, the Mora, Shākot, and Malakand passes lead into Swāt. The historic gateway of the Khaiber connects it with Afghānistān, while, to the south, the Kōhāt Pass runs through a strip of tribal territory, known as the Djowaki peninsula, into the neighbouring district of Kōhāt.

References to the district occur in early Sanskrit literature and in the writings of Strabo, Arrian, and Ptolemy. It once formed part of the ancient Buddhist kingdom of Gandhāra, for, from the Khaiber Pass to the Swāt valley, the country is still studded with crumbling Buddhist stupas. Here, too, have been unearthed some of the best specimens of Graeco-Buddhist sculpture in existence, while one of Aśoka's rock edicts is to be found near the village of Shāhbāzgarha in the Yūsufzai country. Both Fa-hien, in the opening years of the fifth century A. D., and Hiuen Tsang, in the seventh century A. D., found the inhabitants still professing Buddhism. It is also on record that Puruṣhapura was the capital of Kanishka's dominions. Through centuries of almost unbroken silence we arrive at the era of Muslim conquest, when, between the thirteenth and sixteenth centuries, numerous Pathān tribes from Afghānistān spread over and conquered the country roughly corresponding to the modern North-West Frontier Province (T. C. Plowden, *Kalid-i Afghānī*, chap. i.—v., Selections from the *Tārīkh-i Murāṣṣa*).

Towards the end of the fifteenth century, according to local tradition, two large branches of of Pathān tribes, the Khakhai and the Ghōriya Khēl, migrated from their homes in the hilly country around Kābul to the Djalālābād valley and the slopes of the Safid Kōh. The most important divisions of the Khakhai were the Yūsufzai, Gugiyani and Tarklānī; the Ghōriya Khēl were divided into five tribes, the Mohmands, Khalils, Dā'ūdais, Čamkannis and Zerānis. The Yūsufzais, advancing into the modern Peshāwar district, expelled the inhabitants, known as Dilazāks, and finally conquered the country north of the Kābul river and west of Hoti Mardān. By the opening years of the sixteenth century, the Ghōriya Khēl had also reached the Khaiber area. Eventually these powerful tribes dispossessed the original inhabitants, driving some to the Swāt Kōhistān and forcing the Dilazāks across the Indus. Later, the Ghōriya Khēl attempted to oust the Khakhai

branch but were signally defeated by the Yūsufzais.

Since the modern Peshāwar district lay athwart the route of invading armies from the direction of Central Asia, much of its history resembles that of the Panjāb. The Pathāns of this part of the frontier proved a thorn in the side of the Muslim rulers of India, and, although nominally incorporated in the Mughal empire, they were never completely subjugated, even Akbar and Aurangzib contenting themselves with keeping open the road to Kābul. With the decline of Mughal power this area became a part of the Durrāni empire founded by Aḥmad Shāh Abdālī. Disintegration set in under his weak successors and eventually in the early nineteenth century Peshāwar was seized by the Sikhs of the Panjāb. Sikh rule was of the loosest type, and Peshāwar groaned under the iron heel of the Italian General Avitabile. With the annexation of the Panjāb in 1849, the Peshāwar valley came permanently under British control and remained an integral part of the Panjāb until the formation of the North-West Frontier Province in 1901. (A detailed examination of British administration and of the various expeditions against the frontier tribes will be found in *The Problem of the North-West Frontier* by C. Collin Davies). In recent years this area has been the scene of the activities of 'Abd al-Ghaffār Khān, the founder of the "Red Shirt" movement, which, although ostensibly based on Gandhi's creed of non-violence, has seriously disturbed the peace of the Peshāwar valley.

Peshāwar City, the capital of the North-West Frontier Province, has a population of 87,440 and is situated near the left bank of the Bārā river about 13 miles east of the Khaiber Pass. Its importance as a trading centre on the main route between India and Afghānistān has increased since the construction of the Khaiber railway in 1925. It has 16 gates which are closed every night and opened before sunrise. The richest part is the Andarshahr where the wealthier Hindus have taken up their abode. In this quarter, conspicuous on account of its high minarets of white marble, stands the mosque of Mahābat Khān who was governor during the reign of Shāh Dījāhān. On the north-west the city is dominated by a fort known as the Bālā Hīṣār. The Shāhī Bāgh with its spacious and shady grounds is a favourite resort of the inhabitants in the spring. The fame of the Kīṣṣa Khwānī or Storytellers Bazaar is known throughout the length and breadth of the frontier and beyond.

Two miles to the west of the city are the cantonments (population 34,426), the principal military station in the province. Some three miles to the west of the cantonments is the famous Islāmiya college which, although essentially a Muslim college, opens its doors to students of all castes and creeds.

PESHWA. [See PISHWA.]

PETERWARDEIN. [See PETROVARADIN.]

PETROVARADIN (Hungarian Pétervárad, Turkish Waradin واراندين), a famous fortress and town in Sirmia (Yugoslavia) on the main railway line Belgrad (—Petrovaradin)—Novi Sad—Subotica—Budapest, lies on the right bank of the Danube opposite Novi Sad (Neusatz), chief town and headquarters of the Danube banate, with which it is connected by two bridges and since 1929 also administratively. There are two fortresses, an upper one which rises 150 feet above the Danube on rocks of serpentine surrounded on three sides by the river (forming the most northerly spur, 400 feet high, of the Fruška Gora) and a lower one which stands at the foot of the cliffs on the north. In the upper fortress there are no private houses but only military buildings, including the celebrated arsenal with many trophies from the Turkish wars, while the other fortress has a fine market, a main and two side streets. Numerous trenches have survived within the area of the two fortresses which have room for 10—12,000 men. The town proper lies half on the Danube and before its union with Novi Sad it had over 5 000 inhabitants (1921). There are many vineyards in the vicinity.

There was a settlement here even in Roman times called Cusum in which definite traces of the cult of Mithra have been found. According to one legend, the settlement received its later name Petricum from Peter the Hermit, who assembled the armies for the First Crusade here. In any case the town was known as Petrikon in the wars of the Byzantine emperor Manuel Comnenos (1143—1180) with Hungary. After belonging for a brief period to Byzantium, Petrovaradin returned to the kings of Hungary, and Bela IV in 1237 presented the town and the royal palace to the Cistercian abbey there of the B. M. V. Belefontis de monte Varadinipetri. This abbey survived throughout the middle ages until 1521 but from 1439 it and the town of Petrovaradin passed under the control of the ban of Mačva.

In Sulaimān I's second campaign against Hungary, the first blow was dealt at Petrovaradin: the grand vizier and brother-in-law of the sultān, Ibrāhīm Pasha (cf. *Sidjill-i 'othmānī*, i. 93—94), stormed the town on the 15th and the fortress after a brave resistance on the 27th July. The Turks held Petrovaradin till 1687 when they began to withdraw gradually after the fall of Ofen. Soon afterwards the town was occupied by the Austrians (finally in 1691) and after Sürmeli 'Alī Pasha had besieged it in vain for 23 days in 1694 (from Aug. 29) it was definitely ceded to them by the peace of Carlowitz 1699. But it is from the war of 1716—1718 that Petrovaradin is best known. The grand vizier Shāhid 'Alī Pasha (on him cf. 'Abd al-Rahmān Sharaf, ii. 138 and *Sidjill-i 'othmānī*, iii. 528—529) with an army of 150,000 men encountered Prince Eugene of Savoy near the town and tried to begin

a regular siege. The Austrian general however foiled this attempt and instead fought a five hours pitched battle with his 64,000 men which ended in the defeat of the Turks (Aug. 5, 1716). This battle, in which 'Alī Pasha himself fell, with the fall of Temesvár and Belgrade (1717) brought about a decision in the war and led to the peace of Požarevac [q. v.] which established the Turkish frontier much farther south of Petrovaradin (indeed over the Save). A little later the empress Maria Theresa built the new fortress. In the Hungarian war of independence (1848—1849) Petrovaradin was for over nine months in Hungarian hands until it surrendered to the Austrians in Sept. 6, 1849. On the dissolution of the Austro-Hungarian monarchy in 1918 the town passed to Yugoslavia.

(FEHIM BAJRAKTAREVIĆ)

PHARAO. [See FIR'AWN.]

PIÅLE PASHA, Ottoman Grand Admiral, came according to St. Gerlach, *Tage-Buch* (Frankfurt a/M. 1674, p. 448), from Tolna in Hungary and is said to have been the son of a shoemaker probably of Croat origin. Almost all contemporary records mention his Croat blood (cf. the third series of the *Relazioni degli ambasciatori Veneti al Senato*, ed. E. Albèri, Florence 1844—1845, and esp. III/ii. 243: *di nazione croato, vicino ai confini d'Ungheria*; p. 357: *di nazione croato*; III/iii. 294: *di nazione unghero*; p. 418). Following the custom of the time his father was later given the name of 'Abd al-Rahmān and described as a Muslim (cf. F. Babinger, in *Litteraturdenkmäler aus Ungarns Türkenszeit*, Berlin and Leipzig 1927, p. 35, note 1). Piåle came in early youth as a page into the Serai in Stambul and left it as *kapudji bashi* [q. v.]. The year 961 (1554) saw him appointed Grand Admiral (*kapudan pasha*; q. v.) with the rank of a *sandjakbey* and four years later he was given the status of a *beylerbey* (J. v. Hammer, *G. O. R.*, iii. 406). He succeeded Sinān Pasha, brother of the grand vizier Rustam Pasha [q. v.], in the office which he had held from 955—961 (1548—1554). When after his capture of Djerba and other heroic achievements at sea he thought he might claim the rank of wezir with three horse-tails, Sultān Sulaimān, thinking it too soon for this promotion and regarding it as endangering the prestige of the wezirate (cf. Hādjdji Khalifa, *Tuhfat al-Kibār*, first edition, fol. 36 and J. v. Hammer, *G. O. R.*, iii. 406), married him

to his grand-daughter Djewher Sultān, a daughter of Selim II (cf. J. v. Hammer, *G. O. R.*, iii. 392: summer of 1562). It was not till five years later that he received the three horse-tails as a wezir related by marriage (*dāmād*) like Mehmed Şokolli Pasha. In the meanwhile he had carried out several of his great exploits at sea and attained the reputation of one of the greatest of Ottoman admirals. Along with Torghud Re'is, at the instigation of the French ambassador d'Aramon, he had harassed the coast around Naples, besieged and taken Reggio and carried off its inhabitants into slavery. In 982 (1555) he endeavoured in vain to besiege Elba and Piombino (cf. J. v. Hammer, *G. O. R.*, iii. 418) and finally took the fortified harbour of Oran in Algeria with 45 galleys. In the following year with 60 warships he occupied the port of Bizerta (Bent-Zert) and a year later ravaged Majorca with 150 galleys and burned Sorrento near Naples. In 965 (1558) he lay inactive with his fleet, 90 in number, before Valona in Albania in order to watch the enemy fleets there which were preparing an enterprise against Djerba and Tripolis. July 31, 1560 saw his greatest exploit at sea, namely the capture of Djerba which had shortly before been taken by the Spaniards; this he did with 120 ships setting out from Modon. On Sept. 27, 1660, he held his triumphal entry into Stambul, to which he had sent in advance the news of his victory by a galley (cf. J. v. Hammer, *G. O. R.*, iii. 421 sqq.). The Grand Admiral did not take the sea again till four years later when in Aug. 1564 he took the little rocky peninsula of Peñón de Vélez de la Gomera from the Spaniards and in order to prepare for the conquest of Malta, which the sultān's favourite daughter Mihrimah [see RUSTEM PASHA] was conducting with all her resources. This time however fortune no longer favoured him, for the siege of Malta in June—July 1565 failed against the heroic courage of the Christian defenders who performed miracles of bravery and inflicted heavy losses on the Ottomans. During the Hungarian campaign of Sulaimān in the spring of 1566 Piåle Pasha was placed in charge of the harbour and arsenal of Stambul (cf. J. v. Hammer, *G. O. R.*, iii. 438), after previously undertaking a successful raid on Chios and the Apulian coast (*ibid.*, iii. 506 sqq.) in which the island of Chios and its harbour passed into his hands (Easter Sunday 1566). Under Selim II, his father-in-law, he was disgraced and deprived of office of Grand Admiral because, it was alleged, he had kept the greater part of the booty of Chios for himself (according to the report of the embassy of Albrecht de Wijs of May 1568 in J. v. Hammer, *G. O. R.*, iii. 782) and replaced by Mu'ezzin-zāde 'Alī Pasha. He at once endeavoured to regain the imperial favour by new exploits at sea. In April 1570, he set sail with 75 galleys and 30 galleots, landed first of all on the island of Tine which he captured and next took part in the conquest of Cyprus. On January 20, 1578 — according to Ottoman sources on the 12th Dhū 'l-Ka'da 985 (Jan. 21, 1578) — he died in Stambul according to Stephan Gerlach (cf. his *Tage-Buch*, Frankfurt a/M. 1674, p. 448). His vast estates passed some to the imperial treasury and some to his widow and children. His widow later married the third wezir Mehmed Pasha and his second son became Sandjak Bey of Klis (Clissa) above Split (Spalato in Dalmatia) in 1584 (cf. the Italian record quoted by J. v. Hammer, *G. O. R.* iv. 104, note 1: *La*

Sultana fo moglie di Piale ora di Mohammedbassa terzo vezir, ha ottenuto dal Sign. il Sangiacio di Clissa per il secondo suo figlio con Piale). Piale Pasha is buried in Stambul in the Kāsim Pasha quarter in the mosque founded by him (cf. Hāfiz Husein, *Hadikat al-Djawiāmi*^c, ii. 25 sqq.).

Bibliography: In addition to works quoted in the text the histories of Zinkeisen and Iorga, and Rāmiz Pasha-zāde Mehmed Efendi, *Kharīṭa-i Kapudānān-i Deryā*, Stambul 1285; also Hāfiz Husein, *Hadikat al-Djawiāmi*^c, ii. 25 sqq. and Mehmed Thuraiyā, *Sidjill-i othmāni*, ii. 41 sq. (FRANZ BABINGER)

PIASTRE. [See GHRŪSH.]

PIE. [See PÅI.]

PINANG or PULAU PINANG, an island on the western shore of the Malay Peninsula, lying in latitude 5° 24' N. and longitude 100° 21' E. The area is 276 km.²; it is separated from the mainland by a channel from 3 to 16 km. broad. The town of Pinang is built on the northeastern promontory, 4 km. off the shore of the mainland. The official names, Prince of Wales' island and Georgetown, never became popular and exist only in official documents. — The island was acquired in 1786 for the East India Company against a yearly payment from the Sultan of Kēdah by an agreement with Capt. Light, who founded the colony in the same year. He hoped the place would become an emporium of the eastern seas. It was practically uninhabited at the time and was made a penal settlement shortly afterwards. It remained the penal station of India till 1857. In 1805 it became a separate Presidency. When in 1826 Singapore and Malaka were incorporated with it, Pinang continued to be the seat of government; in 1837 Singapore was made the capital. In 1867 the Straits Settlements were created a Crown Colony; since that year Pinang has been under the administrative control of a resident responsible to the Government of the Straits. He is assisted by officers of the Malayan Civil Service. Unofficial members of the legislative council of the colony, which holds its sittings in Singapore, are appointed with the sanction of the Secretary of State for the Colonies to represent Pinang. — Pinang has an excellent harbour and is important as a port of call; there is regular steamer-communication with the Dutch East Indies, Singapore, (British) India etc. The terminus of the Federated Malay States' railways is on the mainland opposite. Trade is adversely affected however by the proximity of Singapore, there are no port duties. — The island is now well opened up, the population has rapidly increased; it is largely Chinese and Tamil, though Malays are well represented, most of these originating from the Malay Peninsula and Sumatra; all of them are Muḥammadans of the *Shāfi'i* rite. — Wellesley Province, a strip of land opposite on the mainland, forms part of the settlement of Pinang. It was acquired in 1800 from the Sultan of Kēdah against a yearly sum paid for it and includes a district which was purchased in 1874 from the Sultan of Perak. The soil is well cultivated; there are large estates owned by Europeans and Chinese. Until recently a second strip of territory on the mainland and adjoining islands, known as the Dindings, formed part of the settlement; it was ceded by Perak and has now been restored to that state. — The population of the whole settlement, Dindings included, was 304,000 according

to the census of 1921, that of the town 123,000; the number of Muḥammadans is not known.

(R. A. KERN)

PİR (P.), elder. In the Sūfi system he is the *murshid*, the "spiritual director". He claims to be in the direct line of the interpreters of the esoteric teaching of the Prophet and hence holds his authority to guide the aspirant (*murid*) on the Path. But he must himself be worthy of imitation. "He should have a perfect knowledge, both theoretical and practical, of the three stages of the mystical life and be free of fleshly attributes". When a *pir* has proved — either by his own direct knowledge or by the spiritual power (*wilāyat*) inherent in him — the fitness of a *murid* to associate with other Sūfi's, he lays his hand on the aspirant's head and invests him with the *khirka*. The *murid* need not necessarily receive his investiture from that *pir* who gave him instruction, who is called the *pir-i suhbat*. *Pir* also is the title given to the founders of derwish orders.

Bibliography: R. A. Nicholson, *Studies in Islamic Mysticism*, Cambridge 1921, and literature there quoted; J. P. Brown, *The Darvishes*, Oxford 1927. (R. LEVY)

PİRİ MEHMET PASHA, an Ottoman grand vizier, belonged to Amasia and was a descendant of the famous Djalāl al-Dīn of Akserāy and therefore traced his descent from Abū Bakr. He took up a legal career and became successively *kaḍi* of Sofia, Siliwri and Galata, administrator of Mehmed II's kitchen for the poor (*'imāret*) in Stambul and at the beginning of the reign of Bāyazid II attained the rank of a first *defterdār* (*bash defterdār*). In the reign of Selīm I he distinguished himself by his wise counsel in the Persian campaign (cf. J. v. Hammer, *G. O. R.*, ii. 412, 417 sqq.), was sent in advance to Tabriz to take possession of this town in the name of the sultān, and at the end of Sept. 1514 was appointed third vezir in place of Muṣṭafā Pasha who had been dismissed (cf. J. v. Hammer, *G. O. R.*, ii. 420). He temporarily held the office of a *kā'immaḳām* of Stambul and after the end of the Egyptian campaign was appointed grand vizier in place of Yūnus Pasha, who had been executed on the retreat from Egypt in 923 (1517). In this capacity he took part in the conquest of Baghdād in 1521. Soon after the occupation of Rhodes, Piri Pasha fell from the sultān's favour as a result of the slanders of the envious Aḥmad Pasha who coveted his office, and was dismissed with a pension of 200,000 aspers on the 13th *Shābān* 929 (June 27, 1523). His successor was Ibrāhīm Pasha [q.v.], a Greek from Parga. Piri Mehmed lived another ten years and died in 939 or 940 (1532–1533) at Siliwri, where he was buried in the mosque founded by him. One of his sons, Mehmed Beg, had predeceased him in 932 as governor of İc-il. Piri Mehmed Pasha created a number of charitable endowments, among them a mosque in Stambul called after him (cf. Hāfiz Husein, *Hadikat al-Djawiāmi*^c, i. 308), a medrese and a public-kitchen as well as what was known as a *iab-khāne*. — While his *laḳab* was Piri, he used Remzi as a *makhlaṣ* for his

poems, which are of moderate merit (cf. J. v. Hammer, *Geschichte der Osmanischen Dichtkunst*, ii. 327 sqq. with the wrong year of death and also i., p. 187 under *Pirî* without the identity of the two being recognised, also Laṭîfî, *Tadhkira*, p. 168 under *Remzî*).

Bibliography: Mehmed Thuraiyâ, *Sijill-i 'Othmânî*, ii. 43, more fully in 'Othmânzâde Mehmed Tâ'ib, *Hadikat al-Wuzarâ*, Stambul 1271, p. 22 sqq and the Ottoman chroniclers of the xvth century. — Brûsalî Mehmed Tâhir, 'Othmânî Mi'ellîfleri, ii. 111 sqq. deals with Piri Mehmed Pasha as a literary man. According to him he wrote a small collection of poems (*Diwânîc*) and an exposition of a part of the *Methnewî* and of the *Shâhidî* entitled *Tuhfe-i Mîr* but both works are described as still in MSS. (FRANZ BABINGER)

PİRİ MUHYİ 'L-DİN RE'İS, Ottoman navigator and cartographer, was probably of Christian (Greek) origin and is described as nephew of the famous corsair Kemâl Re'is (on the latter see the Bonn dissertation by Hans-Albrecht von Burski, *Kemal Re'is, ein Beitrag zur Geschichte der türkischen Flotte*, Bonn 1928 and especially J. H. Mordtmann, *Zur Lebensgeschichte des Kemâl Re'is*, in *M. S. O. S.*, xxxii., part 2, Berlin 1929, p. 39—49 and p. 231 sq.), who was probably a renegade. His father is said to have been a certain Hâdjî Mehmed, while he himself in the preface to his sailing-book calls himself the son of Hâdjî Hâkîrî, which is perhaps only to be taken as a name chosen to rhyme with Piri (cf. Sinân b. 'Abd al-Mannân or Dâwûd b. 'Abd al-Wudûd and similar rhyming names of fathers of renegades usually formed with 'Abd). As Hâkîrî cannot be an 'alam but at most a *makhlas*, the pure Turkish descend of Piri is more than doubtful, if he was not called simply Hâkîrî Mehmed, i. e. bore a name for which there is evidence, for a later period it is true, in the *Sijill-i 'Othmânî*, ii. 239. The same source (ii. 44) says that the corsair's full name was Piri Muhyî 'L-Dîn Re'is. In any case it may safely be assumed that Piri is to be taken as a *takhallas*, while the real name ('alam) was probably Mehmed — the combination Piri Mehmed was quite customary in the xvth century — i. e. an 'alam to which Muhyî 'L-Dîn corresponded as *khiṭāb* (cf. *Isl.*, xi., 1921, p. 20, note 3). Of the life of Piri Re'is, who made many voyages under his uncle Kemâl Re'is (d. 16th Shawwāl 916 = Jan. 16, 1511) and later distinguished himself under Khair al-Dîn Barbarossa (q. v.; July 4, 1546) we only know that on these raids he had acquired an unrivalled knowledge of the lands of the Mediterranean. He afterwards held the office of *kapudan* of Egypt and in this capacity sailed from Suez on voyages to the Persian Gulf and the Arabian Sea. In 945 (1547) he occupied 'Aden (cf. *Die osmanische Chronik des Rustem Pascha*, ed. by Ludwig Forrer [*Türk. Bibl.*, xxi., Leipzig 1923], p. 174 sqq. with full commentary). In 959 (1551) he lost on the coast of Arabia several of his 30 ships, took the port of Maskat and carried off a number of its inhabitants as slaves. He then laid siege to Hormuz but raised the siege and returned to Basra, having accepted bribes to do so, it is said (according to Peṭewî, 'Âli, Hâdjî Khalfâ, *Tuhfat al-Kibâr*, first edition, fol. 28 according to J. v. Hammer, *G. O. R.*, iii. 415). A report that an enemy fleet was approaching

decided him to return hurriedly home with only 3 galleys but with all the treasure he had collected. He was wrecked on the island of Bahrain, but succeeded with two ships in reaching Suez, then Cairo. Kôbâd Pasha, the governor of Basra, had in the meanwhile reported to the Porte that the expedition had been a failure, which resulted in an order for the execution of Piri Re'is being sent to Cairo. He was beheaded there, in 962 (1554—1555), it is said, but probably rather in 959 or 960 and his estate sent to Stambul. After his death envoys are said to have arrived from Hormuz representing the plundered inhabitants to demand the return of the treasure he had carried off; they were naturally not successful. The post of *kapudan* of Egypt was given to another noted corsair, Murâd, the dismissed sanjakbey of Kaṭîf (probably the same as survives in the proverb, according to H. F. v. Diez, *Denkwürdigenkeiten von Asien*, part i., Berlin 1811, p. 55, as *Murâd kaptan*).

Piri Re'is is generally known as the author of a sailing-book of the Aegean and Mediterranean known as *Bahriye* in which he describes all the coasts he had voyaged along with an account of the currents, shallows, landing-places, bays, straits and harbours. Piri Re'is had already begun the work in the reign of Selim I (d. Sept. 1520) although he says in the preface that he did not begin it till 927 (end of 1520), in order to make the dedication to Sulaimân the Magnificent be more impressive. He presented the completed atlas to the latter in 930 (1523). Paul Kahle has published an edition with text and translation based on the known manuscripts, entitled *Piri Re'is, Bahriye. Das türkische Segelhandbuch für das Mittelländische Meer vom Jahre 1521* of which so far (middle of 1935) vol. i., text, part 1 and vol. ii., part L, section 1—28 have been published, Leipzig and Berlin 1926. Separate sections had been previously published, e. g. H. F. v. Diez, *op. cit.*; E. Schaub, *Sizilien*, in *Centenario delle Nascita di Michele Amari*, ii., Palermo 1910, p. 1 sqq.; R. Herzog, *Ein türkisches Werk über das Ägäische Meer aus dem Jahr 1520*, in *Mitteilungen des Kaiserl. Deutschen Archäolog. Instituts, Athenische Abteilung*, xxvii., 1902, p. 417 sqq.; E. Oberhummer, section Zypern, in: *Die Insel Zypern*, Munich 1903, p. 427—434. — Other sections in Carlier de Pinon, ed. E. Blochet (with pictures) and K. Foy, in *M. S. O. S.*, part ii., xi., 1908, p. 234 sqq. Cf. thereon F. Taeschner in *Z. D. M. G.*, lxxvii. (1923), p. 42 with other references.

The so called "Columbus map", found in October 1929 by Khalil Edhem Bey in the Seray Library in Stambul, according to his signature on it of the year 1513, seems also to go back to Piri Re'is; it is in Turkish in bright colours on parchment, 85 by 60 cm., and represents the western part of a map of the world. It comprises the Atlantic Ocean with America and the western strip of the Old World. The other parts of the world are lost. It has been supposed that this is the same map as Piri, according to a statement in his *Bahriye*, presented to Sulṭân Selim in 1517 which would explain its preservation in the Imperial Library. On it cf. Paul Kahle, *Impronte Colombiane in una Carta Turca del 1513*, in *La Cultura*, year x., vol. 1, part 10, Milan-Rome 1931; do., *Una mapa de América hecho por el turco Piri Re'is, en el año 1513, basándose en una mapa de*

(FRANZ BABINGER)

PĪSHWĀ, the title given to one of the ministers of the Bahmanī sultāns of the Deccan; the chief minister of *Shiwaḍjī*; the head of the Marāṭhā confederacy. (Persian "leader"; Pahl. *pēshōpay*; Arm. *pēshōpay*. For older forms see Hübschmann, *Armenische Grammatik*, i. 230).

Shiwaḍjī, the founder of Marāṭhā political power in the Dakhan, was assisted by a council of ministers known as the *Aṣhta Pradhan*, one of whom was the *Pishwā* or *Mukhya Pradhan*. The office of *Pishwā* was not hereditary and the nature of *Shiwaḍjī*'s autocratic rule can be gauged from the fact that his ministers were not even permitted to select their own subordinates or *nā'ib*s, all of these being appointed by *Shiwaḍjī* himself. Next to *Shiwaḍjī* the *Pishwā* was the head of both the civil and military administration, placing his seal on all official letters and documents. During the reign of Rājārām the power of the *Pishwā* was eclipsed by that of the Pant Pratinidhī. It is usual to regard Bālādjī Visvanāth (1714—20) as the first *Pishwā* because he was the real founder of a line of rulers who gradually supplanted the rājās of Sātārā as heads of the Marāṭhā confederacy. But there were really six *pishwās* before his time, namely, *Shāmraḍjī Nilkanth Rozekar*, *Moro Trimbak Pingle*, *Nilkanth Moreshwar Pingle*, *Parashram Trimbak Pratinidhī*, *Bahiro Moreshwar Pingle*, and *Balkrishna Vasudev*.

Bālādjī Visvanāth Bhaṭṭ (1714—1720), the founder of the dynasty of the *pishwās*, was an able Čitpāwan or Konkanasth Brahman whom *Shahū* (1708—1749) appointed as chief minister. The difficulties facing *Shahū*, the political confusion in Mahārāṣṭra, and the weakness of the later rājās of Sātārā were the chief factors underlying the growth of the power of the *pishwās*. The imprisonment of the Pratinidhī Dādobā (*Djagdjī-vanrāo*) at the time of *Shahū*'s death removed another obstacle to their advancement and marks the end of Deshasth Brahman political influence in the Dakhan. Bālādjī Visvanāth found the country torn by civil war: he left it peaceful and prosperous. By complicating the revenue accounts he increased

Brahman control over the state finances. During his period of office the Mughal emperor, Muḥammad *Shāh*, recognized the right of *Shahū* to levy *čawth*, a contribution of one-fourth of the land revenue throughout the Dakhan, and permitted him to supplement this levy by an additional tenth of the land revenue, called *sardesmukhi*. His son, Bādjī Rāo I (1720—1740), adopted a policy of territorial aggrandizement. The year before his death, a treaty, principally of a commercial nature, was concluded with Law, the Governor of Bombay (Aitchison, vi., N^o. i.). The third *Pishwā*, Bālādjī Bādjī Rāo (1740—1761), entrusted the government to his cousin, Sadāshiv Rāo, the Bhāo, and the command of his armies to his brother, Raghunāth Rāo, better known as Raghoba. His period of office was marked by the rapid extension of Marāṭhā power, his armies ravaging the country from the Carnatic to the Panḍjāb until their crushing defeat at Pānīpat [q. v.] in 1761. As a result of an agreement in 1755 an Anglo-Marāṭhā expedition crushed the power of Angria, a pirate chief whose depredations were a constant menace to the shipping of the Konkan coast. At the end of this expedition a treaty (Aitchison, vi., N^o. iii.) was made with the *Pishwā* which provided for the exclusion of Dutch traders from Marāṭhā territory. Dissensions broke out after the death of this *pishwā* which seriously impaired the strength of the Marāṭhās. Power now passed to the Marāṭhā generals, Sindhia of Gwālīor, Bhonsla of Nāgpur, Holkar of Indore, and the Gaekwār of Baroda.

During the rule of Mādhu Rāo (1761—1772) Sindhia, in 1771, once more re-established Marāṭhā influence in northern India, and *Shāh 'Ālam*, the Mughal emperor, who had deserted the English, became a puppet under Marāṭhā control. Mādhu Rāo was succeeded by his brother, Narāyan Rāo (1772—1773), who was murdered at the instigation of his uncle Raghoba. For a time the Marāṭhā confederacy was divided into two hostile camps, the supporters of Raghoba, who was a pretender to the *pishwāship*, and the Court Party under Nānā Phadnavis, who supported the claims of Mādhu Rāo Narāyan (1774—1795), a posthumous son of Narāyan Rāo. The action of the Bombay Government in supporting the claims of Raghoba led to war between the English Company and the Marāṭhās which ended, thanks to the exertions of Warren Hastings, with the Treaty of Sālbaī in 1782. This treaty which virtually recognized the independence of Sindhia secured peace between the English and the Marāṭhās for twenty years. Marāṭhā history now becomes a struggle between Nānā Phadnavis (Bālādjī Djanardhan), who attempted to bolster up the power of the *pishwā*, and Māhādājī Sindhia, who strove to control the *Pishwā* in order to use him as a cloak to cover his aggressions.

The seventh and last *pishwā* was Bādjī Rāo II (1796—1818). During the governor-generalship of the Marquis Wellesley, after the death of Nānā Phadnavis, in 1800, there followed a struggle for supremacy at Pūna between Holkar and Dawlat Rāo Sindhia who had succeeded Māhādājī Sindhia in 1794. During this struggle the *Pishwā* fled to Bassein where he threw himself upon the protection of the English. In 1802, by the Treaty of Bassein (Aitchison, vi., N^o. xiii.) Wellesley constituted himself protector of the *Pishwā* who agreed to accept a "subsidiary" force and to permit the

English to mediate in his disputes with the other Indian princes. This naturally did not prove acceptable to the other members of the Marāṭhā confederacy. Unfortunately Bādji Rāo came under the influence of an unprincipled favourite, Trim-bakdji, who was privy to the murder of the Gaekwār's emissary who had been invited to Pūna under a guarantee from the English of his personal safety. When Elphinstone, the Resident, reported that the Pishwā was secretly conspiring to form a Marāṭhā coalition against the English, the Pishwā was forced to come to terms and sign the Treaty of Pūna (1817), which completed the work of Bassein. But Bādji Rāo's promises were written in water for, when Lord Hastings proceeded to crush the Marāṭhās, the Pishwā rose in revolt and plundered the British Residency. Eventually his forces were defeated and the pishwāship was abolished. Bādji Rāo, however, was granted a pension and allowed to reside at Bithūr where he died in 1851. His adopted son, Nānā Sāhib, disappeared in 1858.

PLATO. [See AFLATUN.]

PLEVEN (Plewna, Plevna, Turkish Plewna پلونا), an important town in Northern Bulgaria, 350 feet above sea-level in a depression formed by the little river Tučenica (c = tz), which flows not far from the town on the right into the Vid, the right bank tributary of the Danube. Surrounded by hills and at the intersection of the high roads to Vidin, Nikopol, Sofia and the passes of the Balkans, Plevna has long been a place of strategic importance; it is now also crossed by one of the main railway lines (Sofia-Plevna-Šumen-Varna). This busy town, the capital of a circle, where the chief business is in cattle and wine, and which has museums, which recall the Russo-Turkish War, is rising rapidly and in 1926 had 29,063 inhabitants.

Although in the vicinity of Plevna there are the remains of Roman settlements, the town really arose only under the Turks. We have however very little definite information about this period of the town's history. Ewliyā Čelebi's statement that Plevna was built by the Wallachian ban Ladka (لاذقة) has of course to be taken with caution; on the other hand, his assertion that "in the year 720 (1320) in the time of the Ghāzī Khudāwendigār it was taken by Mikhāl-Beg", is not free from objections on chronological grounds. According to the same writer, Plevna after the conquest was an arpalık-fief of the sons of Mikhāl-Beg and at a later date was still within the sphere of influence of the noble family of the Mikhāl-oghlu [q. v.], who had several buildings erected there. According to Ewliyā Čelebi and other Turkish sources (cf. vol. iii., p. 495^a and *Glasnik Skopskog naučnog društva*, xiii. 73 and 81), Plevna is the last resting-place of Mehmed Beg, a son of Köse Mikhāl, who died in 825 (1422), as well as of the celebrated 'Alī Beg Mikhāl-oghlu who is said to have died after 1507. According to Ewliyā Čelebi, 'Alī Beg was buried in the mosque founded by him. That Plevna was the capital of a district in the sandjak of Nikopol we know not only from Ewliyā Čelebi but also from Hādjdji Khalifa (*Rumeli und Bosna*, transl. by v. Hammer, *Spomenik*, xviii. 23). In the xviiith century, when Ewliyā Čelebi visited the town, it had 2,000 houses, a ruined fortress, a college founded by the above mentioned 'Alī Beg, 7 schools, 6 tekke's and 6 inns etc. — In the last days of Turkish rule, Plevna had, according to Sh. Sāmī (*Kāmus al-A'lām*, ii. 1532—1533), 17,000 inhabitants and 18 mosques but, as many Muslims migrated after the Russo-Turkish war, the population sank to 14,000 and most of the mosques were described in 1889 as in ruins.

But it was not till the Russo-Turkish war of 1877—1878 that Plevna became world famous. When the Russians after crossing the Danube on July 19, 1877 appeared before Plevna, they met with the unexpected resistance of 'Othmān Pasha, who had come up from Vidin. They attacked unsuccessfully on July 20 and 30 and suffered heavily. As Plevna was not fortified, 'Othmān Pasha now had strong and extensive earthworks thrown up around it. On Sept. 11 and 12 the Russians with the help of the Rumanians, whom they had summoned to their assistance, made a third attempt to take Plevna by storm and were again repulsed with great losses. After all these and further failures (on Sept. 18 and Oct. 19) the allies decided upon and began a regular siege of the town which was conducted by Totleben, the defender of Sebastopol, in person.

In spite of all 'Othmān Pasha was not yet shut in on his west side and received munitions and supplies from there until Oct. 10. In the middle of November he was completely surrounded and on the morning of Dec. 10 he undertook a last desperate sortie in an attempt to break through the western lines of the besieging army of 120,000 men (including the Czar). This bold effort was accompanied by success for a few hours but in the meanwhile the heroic 'Othmān Pasha (the "Lion of Plevna") was himself wounded, and towards midday on the same day was finally forced to surrender with some 40,000 men. The Russians

had already forced their way into Plevna, the five months' siege of which had cost them and the Rumanians over 40,000 men.

The fall of Plevna opened the way for the Russians to Adrianople and on to San Stefano, where they dictated the peace which was there concluded.

Ischirkoff, *Bulgarien, Land und Leute*, part ii., Leipzig 1917, p. 99 and 108. — The little book entitled *Plevne* by Kemalettin Sükrü (Istanbul 1932) gives only a popular account of the siege of 1877. Quite recently Jordan Trifonov published in Bulgarian a history of the town down to the war of liberation (*Istoria na grada Plevna do osvoboditelnata voina*, Sofia 1933, illustrated) (cf. *Bibliographie Géographique Internationale*, 1933, p. 319).

(FEHIM BAJRAKTAREVIĆ)

PLEVNA. [See PLEVEN.]

POLEI, transcribed by Arab writers as بَلَاي, is the old name of a stronghold in the south of Spain the site of which is the modern Aguilar de la Frontera, a little town with about 13,000 inhabitants, in the province of Cordova, 12 miles N.W. of Cabra and of Lucena. The identification of Polei with Aguilar was made by Dozy on the strength of information supplied by a charter of 1258. The town which played a considerable part in the rising of the famous 'Omar b. Hafṣūn [q. v.] against the Umayyad emirs of Cordova is again mentioned in the xith century by the geographer al-Idrisi. The ruins of a fortress which dates from the Muḥammadan period can still be seen there.

(E. LÉVI-PROVENÇAL)

POMAK, the name given to a Bulgarian speaking Muslim in Bulgaria and Thrace. This name which is usually given them by their Christian fellow-countrymen, used also to be given occasionally by Bulgarians to Muslims speaking Serbian in western Macedonia. There however the Serbian Muslims are usually called *torbeši* (sing. *torbeš*) by their Christian fellow-citizens, sometimes also *poturi*, more rarely *kurki* etc. How far these Serbian Muslims are still called Pomaks by some people depends mainly on the influence of the Bulgarian school and literature and would only be correctly applied when used of Muslims who had actually migrated from Bulgaria, e.g. in 1877—1878 (cf. J. H. Vasiljević, *Južna Stara Srbija*, i. 187—188, 207 and 236). In the Rhodopes the Bulgarian Muslims are also called *achrjani* (ch = kh) or *agarjani* (Ischirkoff, ii. 15). In some parts of Southern Serbia and Bulgaria the name *čitak* (pl. *čitaci*) is occasionally heard and it used

sometimes to be said (most recently by A. Urošević, in *Glasnik Skopskog naučnog društva*, vol. v., 1929, p. 319—320) that this name was only given to Serbs converted to Islām; the truth seems to be however that this name is limited to Turks in the two countries (cf. H. Vasiljević, *Muslimani*..., p. 34 and Elezović, in *Srpski književni glasnik*, xxviii., 1929, p. 610—614 and in *Rečnik kosovsko-metohiskog dijalekta*, ii. 449). No more correct is the statement that *apovci* is the name given to Serbian Muslims in Southern Serbia; for this seems to be a name applied to one another only by Albanians who are closely related to one another (brothers and cousins, according to H. Vasiljević, *Muslimani*..., p. 34).

The origin and the etymology of these names are in part more or less obscure and arbitrary. The usual explanation that the name Pomak comes from the verb *pomoći* "to help" and means helper (*pomagač*) i. e. auxiliary troops of the Turks, was first given by F. Kanitz (*Donau-Bulgarien und der Balkan*, vol. ii., Leipzig 1882, p. 182) but was soon afterwards (1891) declared by Jireček (see *Bibl.*) to be inadequate. Another equally improbable popular etymology is that which explains Pomak by the Bulgarian word *māk* = "torment, force", and justifies this explanation by saying that the conversion of the Bulgars to Islām on a considerable scale was carried out by force and constraint (Ischirkoff, ii. 15). Quite recently Iv. Lekov (see *Bibl.*) has explained the name Pomak from *poturnjak* (lit. "one made a Turk"). Whether the word *čomak* which in Turkish means "club, cudgel", in Uigur "Muslim" and in South Russia "pedlar" (cf. Barthold, *Orta Asia*..., p. 82—83), is in any way connected with Pomak, or has been influenced by the Bulgarian *poturnjak* or confused with it has still to be investigated.

The history of the conversion of the "Pomaks" or "Torbeši" is very little known in detail. In any case the adoption of Islām did not take place everywhere at once but was gradual and at different periods. A beginning was made immediately after the battle of Marica (1371) and after the fall of Trnovo (1393): many Serbs and Bulgars at this time, especially as Jireček thinks, the nobles and the Bogomils among these, adopted Islām. After these first conversions under Bāyazid II considerable numbers of converts were made according to native tradition in the reign of Selim I (1512—1520); for this purpose he is said to have sent his "favourite Sinān Paṣha" into the territory of the Šar-mountains. The highlands of Čepino (in the Rhodopes) were converted according to local histories in the beginning of the xviith century, according to Jireček (*Fürstenthum*, p. 104) however, not till the middle, in the reign of Mehmed IV (1648—1687); the grand vizier Mehmed Köprülü is said to have taken a leading part in the work. The conversion to Islām of the Danube territory (Loveč etc.) is put in this period. Towards the end of this century (xviith) further conversions took place among the Serbs in the Debar region. In some districts Islām only gained a footing on a large scale in the course of the xviiith century and sometimes not till the beginning of the xixth (e.g. in Gora, south of Prizren).

Until recently one was very often inclined to believe that these conversions to Islām were made under compulsion, even by force of arms, but now the view is beginning to prevail that the authorities

never took any direct steps to proselytise their Christian subjects; conversion was on the contrary voluntary and for quite different reasons except in a few exceptional cases (cf. e. g. H. Vasiljević, *Muslimani* . . ., esp. p. 53—61).

Towards the end of the sixteenth century when the process of conversion had ceased for decades everywhere, the great majority of the Slav Muslims (Bulgar and Serb) were to be found in the Rhodopes and the mountains of eastern Macedonia and in groups of considerable size up and down Macedonia as far as the Albanian frontier, a wide area which stretched in the north from Plovdiv (Philippopolis) to Salonika in the south and in the east from the central course of the Arda over the Vardar and even beyond the Crni Drim, i. e. across the districts of Ohrid, Debar, Gostivar and Prizren to the west. At that time only a small part of this territory which was interspersed with Christian areas belonged to the principality of Bulgaria; the greater part was still Turkish and only after the Balkan War passed to Serbia or after the World War to Yugoslavia. — In addition to the main body of Muslim Bulgars in the Rhodopes mountains, there were at the same time also sporadic groups north of the Balkan range in the Danube territory, in the circles of Loveč, Plevna (Plevna) and Orehovo (Rahovo).

Since then however the frontiers of the "Pomaks" have receded considerably. During the siege of Plevna almost all the Bulgarian Muslims fled from the Danube districts to Macedonia; although they returned in 1880 they soon afterwards migrated into Turkey. After the union of eastern Rumelia and Bulgaria in 1885 the Rhodopes "Pomaks" also began to emigrate. — The frontiers of the "Torbeši" likewise were not unaffected. The Balkan War and the World War brought about certain changes which resulted in the migration of some bodies of Serbian Muslims out of Southern Serbia.

As a result of various wars and the territorial changes that followed them, the statements regarding the number of Muslim Slavs in Bulgaria, Macedonia (or Southern Serbia) and Thrace as well as about their total number differ considerably and are often unreliable. For example Jireček (1876) estimated the total at about 500,000 including 100,000 in Loveč and Plevna (see *Bibl.*). At the beginning of the twentieth century Gavrilović (see *Bibl.*) estimated the total at only 400,000 and Ischirkoff at about the same (1917).

As regards the distribution of these Muslim Slavs according to countries the following statistics may be quoted. In what used to be the principality of Bulgaria Jireček estimated (1891) their number at most 28,000 souls and before the Balkan War there were within the old frontiers of Bulgaria (according to official statistics of 1910) 21,143 (0.49% of the population). In the lands acquired in the Balkan War in Southern Bulgaria there were however many more Pomaks, mainly in the regions of the rivers Arda, Mesta and Struma so that the official census of 1920 makes their number 88,399 (1.82% of the whole population). A somewhat higher figure is given by the *Annuaire du Monde Musulman* for 1929 (p. 305), namely 16,000 Pomaks in Bulgaria proper and 75,337 in Thrace, i. e. 91,337 in all. Finally the latest published statistics (1926 census) give 102,351 Bulgarian speaking Muslims in Bulgaria, i. e. 1.87% of the population, while the number

of Muslims in Bulgaria without distinguishing their languages was then 789,296 or 14.41% of the population. — Of these 102,351 Bulgarian speaking Muslims only 5,799 lived in the towns and the remaining 96,552 in the villages; the proportion of men to women was 1,000 to 1,065. Literate Pomaks in the whole of Bulgaria in 1926 numbered only 6,659 in 1926 (of whom 5,534 were men).

The number of Pomaks (in reality of Muslim Slavs) in Macedonia was according to S. Verkovič (1889; see *Bibl.*) 144,051 men (this figure is therefore doubled in *Données statistiques sur l'ethnographie de la Macédoine*, publ. by the Comité national de l'Union des organisations des émigrés macédoniens en Bulgarie, Sofia 1928, and amounts to 288,092 [with an error of minus ten souls]), according to G. Weigand (*Die nationalen Bestrebungen der Balkanvölker*, Leipzig 1898) 100,000 men, according to V. Kănčov (1900; see *Bibl.*) 148,800 and according to Vl. Sis (*Macedonien*, Zürich 1918) 150,030 souls.

As regards the number of Serbian speaking Muslims in Southern Serbia, they were estimated by H. Vasiljević (*Muslimani* . . ., p. 11 sqq.) whose calculations are however to some extent based on the situation before the Balkan War, at 100,000 souls; now (1935) the figure is put at 60,000 and the number of Serbo-Croat speaking Muslims in the whole of Yugoslavia at about 900,000 (exact figures cannot be given because the statistics according to religions have not been published).

For Thrace the figure of 75,337 Muslim Bulgars has already been given from the *Annuaire*; in Western Thrace there were according to the interallied census (of March 1920) 11,739 (cf. *La question de la Thrace*, ed. by the Comité suprême des réfugiés de Thrace, Sofia 1927).

On these statistics the following observations may be made. The Bulgars (e. g. Kănčov) usually include as "Pomaks" all the Macedonian Slavs of Muslim faith, i. e. including Serbs from Southern Serbia. On the other hand on account of their religion these Muslim Slavs are sometimes carelessly counted with the Turks. Moreover some statistics are not completely free from chauvinistic and political bias. The European estimates finally are based on approximations or are quite arbitrary.

In spite of the fact that the Pomaks and Torbeši are occasionally included among the Turks and in spite of the fact that they sometimes call themselves Turks, they are nevertheless the purest stratum of the old Bulgarian or Serbian population as the case may be who have preserved their Slav type and Slav language (especially archaic words) very well, sometimes even better — as a result of their being cut off from the Christians and their isolation in outlying districts — than their Christian kinsmen, who have been constantly exposed to admixture from other ethnic elements. They have a certain feeling of aversion for the Turks whose language they do not understand. It is only in the towns that we find that in course of time some of these Slavs have adopted the Turkish language. What bound them to the Ottomans was not language but principally a common religion with its prescriptions and customs (e. g. the veiling of women) which along with Turkish rule naturally imposed upon them many Arabic and Turkish

words. In spite of this there survived among them many pre-Islamic customs and reminiscences of Christianity (observation of certain Christian festivals etc.).

That the Bulgar Muslims in particular occasionally (esp. in 1876–1878) fought with the Turks against the Christian Bulgars may be ascribed to the fact that as a result of their low cultural level they made no clear distinction between nation and religion and that their Christian fellow-countrymen treated them as Turks and not as kinsmen. These mistakes were repeated in the Balkan War when the victorious Bulgar troops and the orthodox priests were led to so far as to convert the Pomaks in the Rhodopes and other districts to Christianity mainly by pressure and force of arms. But on the conclusion of peace they returned to Islām again. This is frankly admitted by the Bulgarian geographer Iširkov (Ischirkoff) and the Bulgarian writer Iv. Karaivanov (in his Bulgar periodical *National Education*, Küstendil 1931, according to Čamalović [see *Bibl.*]).

Fifty or sixty years ago the songs and ballads of the "Pomaks" were the subject of much dispute. A Bosnian ex-cleric, Stefan Verković (1827–1893), an antique dealer in Seres, published under the title of *Veda Slavena* (i.e. the "Veda of the Slavs" Belgrad 1874, vol. i.) a collection of songs which were alleged to have been collected mainly among Pomaks and which celebrated "pre-Christian and pre-historic" subjects (the immigration into the country, discovery of corn, of wine, of writing and legends of gods with Indian names, of Orpheus etc.). A. Chodzko, A. Dozon (*Chansons populaires bulgares inédites*, Paris 1875; cf. also *Revue de littérature comparée*, xiv., 1934, p. 155 sqq.) and L. Geitler (*Poetické tradice Thrákk i Bulharů*, Prag 1878) also strongly supported belief in this "Veda": it was even assumed that the Pomaks were descended from the ancient Thracians, who had been influenced first by Slav culture and then by Islām.

But the ballads on such subjects neither the Muslim nor the Christian Bulgars knew anything and Jireček, who investigated the question on the spot, repeatedly described this "Slav Veda" as the fabrication of some Bulgarian teachers (*Fürstenthum*, p. 107¹). We now know that Verković's chief collaborator was the Macedonian teacher Iv. Gologanov (cf. Pentscho Slawejkoff, *Bulgarische Volkslieder*, Leipzig 1919, p. 15).

In view of the fact that the Muslims in question consist mainly of conservative dwellers in the mountains and villages — who are very industrious, honourable, and peaceful — they are for the most part illiterate and there could be no possibility of any literary activity among them. The only people among them who can write are the *khōdjas*, who frequently use the Turkish language and Arabic alphabet when writing. They also frequently use the latter alphabet when writing their mother tongue. Of earlier generations of Bulgar Muslims many distinguished themselves in the Turkish army or otherwise in the Turkish service. The modern generation who have been educated in the state schools have more national consciousness and are more progressive but are too few in number to make themselves felt in politics or otherwise.

(FEHIM BAJRAKTAREVIĆ)

PONTIANAK, the name of a part of the Dutch residency "Wester-Afdeeling" of Borneo, also of the Sultanate in the delta of the river Kapuas and of its capital.

As a Dutch province Pontianak includes the districts of Pontianak, Kubu, Landak, Sanggau, Sēkadau, Tajan and Mēliau. The administration is in the hands of an assistant-resident whose headquarters are in Pontianak where the Resident of the "Wester-Afdeeling" also lives. The Dutch settlement is on the left bank of the Kapuas, where also is the Chinese commercial quarter. The Malay town lies opposite on the right bank.

The sultanate of Pontianak with its capital of the same name is independent under the suzerainty of the Netherlands and is 4,545 sq. km. in area. In 1930 the population consisted of 100,000 Malays and Dayaks, 562 Europeans, 26,425 Chinese and 2,378 other Orientals. The term Malays includes all native Muḥammadans among them many descendants of Arabs, Javanese, Buginese, and Dayaks converted to Islām. The Dayaks

in the interior are still heathen. Roman Catholic missions are at work among the latter and the Chinese. This very mixed population is explained by the origin and development of Pontianak.

The town was founded in 1772 A.D. by the Sharif 'Abd al-Rahmān, a son of the Sharif Husain b. Aḥmad al-Kadri, an Arab who settled in Matan in 1735 and in 1771 died in Mampawa as vizier revered for his piety. In 1742 'Abd al-Rahmān was born, the son of a Dayak concubine, and very early distinguished himself by his spirit of enterprise. He attempted to gain the ruling power, successively in Mampawa, Palembang and Bandjarmasin, from which he had to retire with his band of pirates, although the sultān had been his patron, after he had taken several European and native ships. By this time he had married a princess of Mampawa and Bandjarmasin and possessed great wealth. On his return to Mampawa his father had just died. As he met with no success here, he decided to found a town of his own with a number of other fortune-seekers. An uninhabited area at the mouth of the junction of the Landak with the Kapuas, notorious as a dangerous haunt of evil spirits seemed to him suitable. After the spirits had been driven away by hours of cannon fire he was the first to spring ashore, had the forest cut down and built rude dwellings there for himself and his followers.

The favourable position of the site and the protection which trade enjoyed there soon attracted Buginese, Malay and Chinese merchants to it so that Pontianak developed rapidly and Sharif 'Abd al-Rahmān was able by his foresight and energy to hold his own against the neighbouring kingdoms of Matan, Sukadana, Mampawa and Sanggau.

He appointed chiefs over each of the different groups of people and regulated trade by reasonable tariffs. He was able to impress representatives of the East Indian Co. in Batavia to such an extent that they gave him the kingdoms of Pontianak and Sanggau as fiefs after the company had bought off the claims of Banten to Western Borneo. As early as 1772 the Buginese prince Radja Hādjdī had given him the title of sultān. After his death in 1808 his son Sharif Kāsīm succeeded him. He was the first to change the Arab ceremonial at the court for more modern ways.

According to the treaty concluded with the Dutch Indies government in 1855, the sultān receives a fixed income from them while they administer justice and police of the country. The relationship to the Dutch Indies government has now been defined in a long agreement of 1912, which also settles the administration of justice and the taxes. From the local treasury, then constituted, the sultān receives 6,800 gulden a month; he also receives 50 % of the excise on agriculture and mines.

In keeping with the nature of its origin Pontianak is predominantly Muslim in character and a relatively large number take part in the pilgrimage to Mecca. For these pilgrims who are known as *Djāwa Funtiana*, the sultān when he performed the pilgrimage in the 80's founded several *wakf* houses in the holy city.

The main support of the whole population is agriculture and along with it trade in the products of the jungle. The exports are copra, pepper, gambir, sago, rubber and rotan, especially to Singapore and Java. Rice, clothing and other articles required by Europeans and the more prosperous Chinese and Arabs are imported. The import and export trade is

mainly in the hands of the Chinese. They live together in the Chinese quarter in the European half of Pontianak on the left bank where also the other foreign Orientals have settled.

This is therefore the centre of trade and commerce in the valley of the Kapuas.

The Chinese traders maintain with their own steamers connections with the Chinese merchants farther up the river and also over seas with Singapore, both in competition with the Royal Paketfahrt Co.

In the swampy lands of Pontianak, intercourse with the outer world is almost exclusively by water. Only in recent years have motor-roads been laid over the higher ground from Pontianak to Mampawa and Sambas, to Sungei Kakap and from Mandor to Landak.

It may be particularly mentioned that Pontianak is a healthy place for the town is very often inundated and it is so far from the sea that there is no malaria.

POONA. [See PUNA.]

PORT SA'ID, a Mediterranean seaport of Egypt at the entrance of the Suez Canal on its western bank, in 31° 15' 50" N., 32° 18' 42" E., 145 miles from Cairo by rail via Zagāzīg and Ismā'iliya, 36 and 125 miles from Damietta and Alexandria respectively along the coast. It was founded in 1859, as soon as the Suez Canal was decided, during the reign of Sa'id Pasha [q. v.], Viceroy of Egypt, and was named after him. Except for the strip of sand which, varying in width between 200 and 300 yards, separates Lake Manzala from the Mediterranean, the site of the present town was under the water. This site was selected by a party of engineers under Laroche and de Lesseps, not on account of being the nearest point across the isthmus to Suez, but because the depth of the water there corresponded most favourably to the requirements of the projected canal. As soon as work was started on the Canal, five wooden houses were constructed above the water, supported on massive piles and equipped with a bakery and a water-distiller for the use of the pioneers. A year later, dredgers began to deepen the waters of the newly established harbour, and the mud thus raised was immediately utilized for more buildings which soon numbered 150 houses, 150 cottages, one hospital, one Catholic and one Orthodox Church, and one Mosque, besides the workshops, covering 30,000 square metres in all. This, however, did not suffice for the rapid growth of the population as the work on the Canal progressed towards Ismā'iliya. To meet this emergency and in the absence of stone quarries within reasonable reach of Port Sa'id, the manufacture of artificial stones capable of resisting the action of sea-water was begun by Messrs. Dussaud in 1865. Details of this process are given in 'Alī Pasha Mubārak's *Khitaṭ* (x. 38—40). These stones weighed about 22 tons each and were used both for the construction of the two huge breakwaters of the outer harbour and for the creation of further building ground. In the same year, mail boats sailed up the Canal to Ismā'iliya while others brought imports to Port Sa'id. In 1868 the breakwaters were finished, and in 1869 the Canal was completed. As a result,

the town was thronged by consuls and representatives of many nations, and the population reached 10,000.

Like most Eastern foundations of this period, Port Sa'id was from the beginning markedly divided into Egyptian and European quarters. The first has grown up in the west and south-west around the mosque, officially inaugurated on Friday 14th Sha'bān 1300 (1883); and the second is situated near the Canal entrance and the beach towards the north and north-east. A regular water-supply now comes from the Nile by the Isma'iliya Canal and the pipes leading to a large reservoir (château d'eau) capable of holding several days' supply. The great rapidity of the growth of Port Sa'id may be illustrated by the increase of its population, numbering 49,884 in 1907.

The town quickly rose to eminence as an emporium of Egyptian trade — second only to Alexandria in that country, — and it also became one of the most important stations for sea-borne traffic between the East and the West. Its outer harbour, covering an area of 570 acres, its two moles or breakwaters built in such a way as to protect the Canal from the continuous onrush of sea-water and sand-drifts, and its docks numbering originally three on the western bank, all had to be extended. A large floating dock (259 ft. long, 85 ft. wide and 18 ft. deep, with a lifting capacity of 3,500 tons) was constructed; and, further, in the years 1903—1909, new docks were established on the eastern bank. To accommodate the workmen on these docks, the new town of Port Fu'ād, named after the present King of Egypt, has sprung up on the east side.

To safeguard the ships approaching the Canal by night, the Khedive Isma'il ordered four light-houses to be erected at the expense of the Egyptian Government at Rosetta, Burullus, Burdj al-'Izba near Damietta, and Port Sa'id. The last is 174 ft. high and its beam is distinct from those of the other three and is visible at a distance of 20 miles. It lies at the base of the western mole which, at its sea-ward extremity, carries a colossal statue of Ferdinand de Lesseps by E. Fermiet, unveiled in 1899.

Among the notable buildings of Port Sa'id are the offices of the Suez Canal Company. The town has a very cosmopolitan population and is noted for no special industry. Small dealers live on the sale of Oriental wares and curios to tourists on their passage to the East or to the West.

POŽAREVAC (pronounced Pósharevatz; in the French orthography Pojarévatz; Passarovitz is a corruption like the Turkish Pasarofça, a rising commercial town in Yugoslavia (in the Danube banate), headquarters of the district of the same name in the fertile plain between Morava and Mlava, only 10 miles from the Danube port of Dubravica with 13,731 inhabitants (1930).

The town, the name of which is popularly

connected with the Serbo-Croat word *požar* ("fire") (M. Đ. Miličević, *Kneževina Srbija*, Belgrad 1876, p. 172 and 1058), is first mentioned towards the end of the xvth century. It must however have been previously in existence and have become Turkish like the surrounding country in 1459. According to the Turkish treasury registers of Hungary of 1565 (A. Velics, *Magyarországi török kincstári defterek*, ii., Budapest 1890, p. 734), Požarevac belonged to the Turkish sandjak of Semendre (Semendria, Smederevo), and in the middle of the xviiith century Hādījī Khalifa describes it as the seat of a judge (*kāḍilīk*) (cf. *Spomenik*, xviii., Belgrad 1892, col. 26). Towards the end of the century many Serbs migrated from Požarevac and at the beginning of the xviiith century it is sometimes mentioned as a village.

Požarevac was however destined soon to become famous through the peace which ended the Austro-Turkish war of 1716—1718. At the end of 1714 Turkey had already declared war on Venice on the pretext that the peace of Carlovitz was not being observed and in 1715 occupied Morea and some of the Ionian Islands. Austria, which at first intervened to negotiate as an ally of Venice, in 1716 entered the war herself and her armies led by Prince Eugene won three great victories, at Peterwardein, Temesvár and Belgrad, so that England intervened to secure peace. After long preparations (cf. von Hammer, *G. O. R.*², iv. 159—164) the congress of Požarevac was convoked. The negotiations at which plenipotentiaries of Turkey, Austria, Venice with England and Holland as mediators took part began on June 5, 1718 and the Treaty was signed on the 21st July.

Peace was concluded on a basis of the country actually held by the opponents at the time (*uti possidetis*): Austria retained the eastern part of Sirmia, the banate with Temesvár, the whole of N. E. Serbia, with Belgrad, Požarevac etc. and Little Wallachia; Venice also retained a few places she had taken on the Dalmatian and Albanian coasts, received certain commercial preferences and the island of Cerigo (Turkish جرجو) and had to

restore to Turkey the whole of the peninsula of the Morea and the south-eastern districts of the Hercegovina. By a commercial agreement which was also concluded in Požarevac on July 27 Austria secured certain trading and other privileges in the Ottoman Empire.

Following the traditional formalities observed after the conclusion of a treaty of peace the first Turkish plenipotentiary Ibrāhīm Pasha went to Vienna with his retinue and Count Wirrmont, the Austrian representative in the negotiations, to Constantinople. A member of the Turkish embassy wrote in 1726 an interesting account which has been published by Fr. van Kraelitz in text and translation (*Bericht über den Zug des Gross-Botschafters Ibrahim Pascha nach Wien im Jahre 1719*, in *S.B.Ak. Wien*, vol. 158 [1908]; in *T.O. E.M.*, vii. [1332 = 1916], 211—227, the Turkish text of this edition was reprinted by A. Refik).

During the Austrian occupation (1718—1739) Požarevac was the most important place in this territory. In the Serbian war of independence against Turkey it was besieged for a long period, and had finally to surrender to the Serbs (1804). In 1813, the town again fell into Turkish hands but became Serbian again in 1815.

In the years of peace that followed (1815—1915) Požarevac developed. Prince Miloš in 1825 made it his second residence and had two konaks (palaces) built there. Shortly afterwards a Prussian officer visited the town and left interesting notes on the conditions there (Otto v. Pirsch, *Reise in Serbien im Spätherbst 1829*, Berlin 1830, part i., p. 119—171). In the second half of the nineteenth century the population increased steadily but otherwise the town offered "little of interest" (F. Kanitz, *Serbien*, Leipzig 1868, p. 13).

At the beginning of the twentieth century Požarevac was one of the most important towns in Serbia. In the Great War it was occupied by the Germans in 1915 and by the Bulgarians (from Oct. 1916) but in the autumn of 1918 it was again occupied by the Serbs. Since then it has belonged to Yugoslavia.

PRANG SABIL, the name of the *djihād* [q. v.] in the East Indian archipelago; *prang* (Indon.) = war.

The course of history has made it impossible for Muslims to fulfil their duties with respect to the *djihād*. The representatives of the law however still teach and the masses readily believe that arms should only be allowed to rest against the *kāfir* so long as any success must be despaired of. In a Muḥammadan country under non-Muslim rule like the Netherlands Indies the teachers however prefer to be silent. At most they say that under the prevailing conditions there is no legal inducement to conduct the *djihād* in view of the superior forces and the comparative freedom enjoyed by believers. Or on the other hand, they expound particularly those texts which remove the more serious feuds between Muslim and *kāfir* to the next world. — When political events, catastrophes, misfortunes of any kind result in disturbances, it is not at all uncommon for the Muslim population of the East Indian Archipelago to look at these things from a religious point of view. It may happen on such an occasion that the feeling of being bound to fight the unbeliever is aroused again. If the leaders utter the war-cry "prang sabil", it finds a ready answer. It is true that according to the law, the signal for the *djihād* should be given by the imām. There is now no imām; but even in the time when the sultān of Turkey was still recognised as imām any misgivings were easily overcome if the imām remained inactive. Outside the boundaries of the territory in which

the holy war is proclaimed, the silent sympathy of the believers is with the fighters. Any forcible conversion which takes place, anywhere in the Archipelago is generally praised by Muslim chiefs and represented as a fulfilment of the more solid obligations of the *djihād*.

This practical teaching of the prang sabil was of particular importance in Atjeh in the last quarter of the nineteenth century. Circumstances were very much in its favour. The Atjehnese were a self-satisfied people, convinced of their own superiority and also of a warlike disposition. Non-Muslims were everywhere hated or at least despised. At the same time those individuals who were in any way connected with divine worship were held in great honour. These qualities were however not in themselves sufficient to conduct a prang sabil with success against a disciplined attacking power. A military leader was necessary. There was indeed a sultān in Atjeh but he was a negligible factor as regards the situation in the country. The chiefs, the real rulers of the land, preferred to confine themselves to their own territory; they were not fitted for co-operation. Bands of armed men ravaged the country doing the *kāfir* as much damage as possible but they could raise no claim for general co-operation and assistance as they were not waging war in the way Allāh had willed. The law lays down the sources from which the costs of the *djihād* can be met; pillage and plundering, as was the practice of these bands, could never be blessed by Allāh. In addition the organisation of these bands was such that they never held together long. In these circumstances it was the '*ulamā*' (also used as a singular) who took in hand the organisation of the war; among these the most prominent were the '*ulamā*' of Tirō, from olden times a centre of study of sacred lore. They reproached the chiefs with their slothfulness and the people with preferring worldly advantages to heavenly rewards. Going up and down the country they preached the doctrine of the *djihād* and there was no one who could openly oppose them; indeed they represented the divine law. In order to be able to wage war a war-chest was needed. The '*ulamā*' claimed the share of the *zakāt* set aside for Allāh's purposes; the '*ulamā*' of Tirō in particular used it to train a strong force of duly converted recruits. The '*ulamā*' were for a long time the soul of the war. It is however clear that the authority which they had gained over the secular rulers could only last so long as they were able to inspire the people to continue fighting. When the war was over, they returned to their old still very influential position as representatives of the holy law. — Various writings which together form a regular war literature, proved an effective means of inspiring their warriors with enthusiasm. They were an accompanying feature of the prang sabil. '*Ulamā*' wrote pamphlets and tractates in which attention was called to the duty of waging the holy war; emphasis was laid on the heavenly reward that awaited the *shahid*, and the *kāfir* to be overcome were painted in the blackest colours. An elaborate poem, the *Hikajat Prang sabil*(1), of which there were many versions, was specially intended to be declaimed in order to increase the courage and contempt for death of those who heard it.

PUL (FULBE), a West African tribe, originally pastoral nomads, now to a large extent settled and agricultural. Fulbe, their name for themselves, is the plural of Pulo; they are called Fulani by the Hausa, Felata by the Kanuri, and by French writers Peul. Their language is called by themselves Fulfulde.

They appear to have come in from the north-east, perhaps ultimately from Fezzān, but their lines of migration in more recent times have rather been from west to east. Migeod, in 1923, found them in what is now the British Mandated Territory of Cameroons, which they had penetrated during the lifetime of persons whom he met. Their main centres of distribution are Futadjallon in French Guinea and Massina in Haut-Sénégal-Niger.

Ethnographically, though various theories have been advanced, they are now accepted as Hamitic by race. Meek (vol. i., p. 94) points out that they have a strong resemblance to the Proto-Egyptians. Delafosse was disposed to class them as hybrids between some mysterious Beni-Israel (not yet satisfactorily accounted for) and the tribe or tribes whom they found already in occupation: according to one account, the Tekrör (now called the Toucouleur [q. v.]). Frobenius (*op. cit.*, p. 165) says they migrated to the S. W. from Fezzān in order to escape the oppression of the "Gara", identified by himself and others with the Garamantes of Herodotus. He finds them spoken of in Soninke tradition under the name Bororo (still retained by the Nomad Fulbe in Adamawa at the time of Passarge's visit in 1893) or Borojogo, as a despised subject race. He finds no originality in the legends collected from their "singing men" (*mabube*), but holds that, so soon as they become independent they adopted the traditions of their former overlords. In passing, it may be remarked that Frobenius is clearly in error when he says (*ibid.*): „Schon Barth identifizirte sie mit den Leucaethiopen".

Barth's own words are (ii. 505): „Darum aber möchte ich sie nicht (!) für die Leucaethiopes der Alten halten". Barth's own view is that they are half-way between a mixed Arabo-Berber and a pure negro stock. His reference, in the same passage, to indications of a connection between their language and that of the "Kaffer Südafrika's" must be based on the existence of noun-classes in both, a fact which will be dealt with in a later paragraph.

Meek, after considering various hypotheses, comes to the conclusion (i. 96), that "the Fulani are probably a very ancient Libyan tribe whose original home was Egypt or Asia". He considers the nomad Fulbe as the purest representatives of the Hamitic element in Nigeria (i. 26).

Their physical characteristics are perhaps best summed up in the following quotation from Meek (i. 26), which agrees in the main with the accounts of Mungo Park, Barth, Nachtigal, Passarge and other travellers:

"Their colour varies from a light to a reddish brown"; — Passarge says "hellrötlich gelb" — "their physique is slender and sinewy, and sometimes even effeminate; the face oval, the lips thin, the head dolichocephalic, the forehead rather receding

towards the temple, the nose straight or even aquiline, and often slightly rounded at the tip. There is little or no prognathism, the hair is ringlety and often straight... On his chin a man wears a scraggy tuft of beard. The eyes are almond-shaped and overhung by long black silken lashes. The beauty of countenance and graceful carriage of Fulani women are well known. In character the Fula is distrustful and shy, shrewd and artful. No African native can equal him for dissimulation and finesse".

This estimate coincides on the whole with that of the observers previously mentioned. Passarge calls them "eine ritterliche Nation", in the sense that they despise both manual labour and trade, regarding war, the chase and the care of cattle as the only occupations worthy of a man. They have more dignity and force of character than the negro; at the same time, "traue ich dem Fulla (*sic*) mehr überlegte Hinterlist zu. Er ist der grössere Charakter, aber auch im gegebenen Moment der grössere Schurke". Barth, also, says (ii. 505): „Die liebenswürdige Seite im Charakter der Fulbe ist ihre Einsicht und ihre Lebhaftigkeit, während sie andererseits einen ausserordentlichen natürlichen Hang zur Bosheit haben und bei weitem nicht so gutmütig sind wie die eigentlichen Schwarzen".

Passarge describes them as "fanatical in religion", but, as the nomad Fulbe are still, at any rate to some extent, pagan (Meek, i. 200 and elsewhere), this must refer to the settled Fulbe, called by the Hausa *Fulanin Gidda*, who would seem to have been converted to Islām, like the other tribes of Nigeria, about the eleventh century (Meek, ii. 1—11). Those settled Fulbe are "by free intermarriage and wholesale concubinage with the races whom they have conquered, fast being absorbed by the negro. Their noses are broadening, their lips are thickening, their hair is curling, their build is coarsening, and the prognathous mouth of the Negro type is beginning to appear. While they have profoundly modified the Negro type of those with whom they have settled, this modification must, in the absence of fresh infusions of Fulani blood, tend rapidly to disappear... they do not intermarry with the nomad pagan Fulani" (Meek, i. 28).

According to Labouret, nomad Fulbe are scattered over the country in small colonies "généralement installées à côté des villages sédentaires pour en garder les troupeaux". They supply the settled population with dairy products: Fulbe women selling milk and butter are a familiar sight to travellers.

The Fulbe reached the Upper Senegal region about 1300 A. D., when the Ghana empire was at the height of its power. About 1400, a section of the tribe, coming from Termes in the north-west, established themselves in Masina, under chiefs of the Djallo family. This kingdom was conquered by Askia Omar, the Songhai chief, in 1494. About the same time or not much later, a Pulo chief (*ardo*) named Tengella revolted against Omar, but was killed in 1512. His son, Koli, set up an independent pagan kingdom in Badiar, on the Upper Gambia, and his descendants, known as the Denianke dynasty, remained in power from 1559 to 1776.

The Fulbe entered Bornu during the xvth century and, as they had done elsewhere, gradually penetrated

the country in the guise of inoffensive herdsmen, until, watching their opportunity, "by a sudden coup, they made themselves its political masters" (Meek). Towards the end of the xviiith century, Shehu Usman dan Fodio (born 1754) initiated a religious revival which ended in the conquest of Northern Nigeria. Usman established his capital at Sokoto (built by his son Belo in 1810) and before his death in 1817 was acknowledged as *Sarkin Musulmi* or spiritual head of the Muslims within his empire. He was succeeded by his son Belo, the "Sultan Bello" visited by Denham, Clapperton and Oudney in 1821. He had his capital at Sokoto and later at Wurno, while his uncle Abdulahi ruled at Gando.

Meanwhile, in the west, a Pulo *marabout*, Seku Hamadu, had converted the Masina Fulbe to Islām about 1810, seized Djenne and even (1826) made himself master of Timbuktu; but the dominion founded by him was short-lived, his grandson being overthrown by al-Hādjī 'Omar in 1862. Before this, in 1776, the Muslim Tekror, in Futa Toro, had revolted against the Fulbe Denianke and established a "theocratic elective monarchy" (Delafosse) which lasted till the French annexation in 1881. — 'Omar, at the head of another section of the Tekror, had conquered the local Fulbe and continued to give trouble to the French authorities till his death in 1864 (Delafosse).

The settled Fulbe do not differ greatly in customs from other Islāmized tribes, though even these appear to retain some traces of their pagan ancestry. Animal tabus, which may or may not be connected with totemism, are observed by some Muslim families (Meek, i. 174); apparently Hausa are meant, but it would seem as if the statement were intended to include at least one "Fulani Muslim sub-tribe". Moreover, when Muḥammad al-Tūnī says (Meek, i. 99): "In Sudan it is related that they descend from a chameleon", this, so far from being "a fable invented for the purpose of contempt" may reflect a real totemic belief.

A system of castes, otherwise unknown in Negro and Bantu Africa is common to the Fulbe, Wolof, Malinke, Marka and Bammana, with this difference that, with the Fulbe, the "castes" originated in tribal distinctions ("werden durch bestimmte Völker gebildet": Frobenius, p. 166), and therefore are rigid, whereas, among the Mande, "werden die Kasten durch Sippen gebildet, die in ihrer Kastenzugehörigkeit schwanken". The castes of the Fulbe are:

Nobles	Rimbe (plural of Dimu)
Serfs	Rimaibe
Traders and Herdsmen	Diawambe
Singers and Weavers	Mabube
Leather-workers	Sakebe (elsewhere Gargassabe)
Wood-workers	Laobe (elsewhere Sekaebe)
Smiths	Wailbe (plural of Bailu)

It is noteworthy that the Fulbe, unlike the other tribes mentioned, did not recognise a separate class of slaves. The serfs (called "Hörige" by Frobenius) were the descendants of the Rimbe by captive women. The wood-workers' and traders' castes are peculiar to the Fulbe; the rest are common to all the other tribes.

In contrast to the Galla, Somali and other pastoral Hamitic tribes, the Fulbe do not seem

to have any special customs or ritual connected with milk. They keep two distinctive breeds of cattle, one or both of which they are believed to have brought with them in their southward migration. Some particulars concerning their cattle are given by Meek (i. 115—118).

The Fulfulde language was long thought to be absolutely unique. If Barth found in it "Andeutungen eines Zusammenhanges dieses Stammes mit den Kaffern Südafrikas", he must have had in mind the system of noun-classes, which, in some respects, resembles that of the Bantu speech-family, though both more complete and more logical than the latter. F. Müller placed the language in a class by itself, forming one division of the "Nuba-Fulah group", for which he could discover no other affinities. A. W. Schleicher (1891) attempted to connect it with Somali, relying chiefly on verbal coincidences, entirely disregarding the system of noun-classes, and admitting that one important grammatical feature of Fulfulde is not to be found in Somali. In so far as he classes the language as Hamitic, he is partly in agreement with Meinhof who, somewhat later, came to the conclusion that it represents a pre-Hamitic stratum, from which were developed, on the one hand, the Hamitic languages as known to us to-day (Shilha, Saho, Galla, etc.), on the other, the Bantu family.

In addition to the class-system already mentioned (in which the plural is formed by a change, not, as in Bantu, of prefix, but of suffix), Fulfulde exhibits a remarkable cross-division into *a*. human and non-human; *b*. large objects and small objects. Here, the plurals are formed by a change of initial consonant according to certain fixed rules summed up by Meinhof as the Law of Polarity. From this latter classification, Meinhof worked out a hypothesis as to the origin of grammatical gender, which has much to commend it. This is set forth in his *Sprachen der Hamiten* (1912). More recently, however, he has found reason to modify his view of Bantu origins, and considers it at least possible that the class-system is not a primitive feature in Fulfulde, but might have been taken over from some Bantu or "Semi-Bantu" language (Westermann prefers the term "Klassensprachen" for the latter and would extend it to include others than those enumerated in H. H. Johnston's *Comparative Study*). It has also emerged that Fulfulde is less of an isolated phenomenon than had at first appeared. It has points of contact with Serer and other adjacent languages, and in particular, with the little-known Biafada of Portuguese Guinea, studied by G. A. Krause as long ago as 1895. Two important essays by A. Klingenheben in *Ztschr. f. Eingeborenen-sprachen*, 1923—1924 and 1924—1925 are calculated to shed new light on a complicated problem. Fulfulde, like Hausa, possesses a written literature, for which the form of Arabic script, locally known as *ajemi* (Ar. *ʿadjami*), has been used, probably, since the introduction of Islām. This script has peculiarities which cause it to differ markedly from that in use by the Swahili.

Some excellent facsimiles are to be found in Captain F. W. Taylor's *Fulani-Hausa Readings*.

PŪNA, a city and district of British India in the Central Division of the Bombay Presidency. The district has an area of 5,332 square miles and a population of 1,169,798 of whom 54,997 are Muslims (*Census Report*, 1931). It was included in the powerful Āndhra kingdom of the Dakhan which came to an end about the middle of the third century A.D. The available

evidence also points to the fact that later the Western Čālukyas, the Rāshtrakūtas, and the Deogiri Yādavas ruled over this area. With the Khaldjī and Tughlūq [see MUHAMMAD TUĞHLUQ] invasions of the Dakhan it came under Muslim control. An interesting account of Pūna when it formed part of the Bahmanī kingdom has been recorded by the Russian traveller Athanasius Nikitin (1468-1474), who appears to have been the first foreign traveller whose impressions have been preserved for us since the visit of the Chinese pilgrim, Fa-hien, in the beginning of the fifth century A.D. (R. H. Major, *India in the Fifteenth Century*, Hakluyt Society). Pūna remained under Muslim rule until the growth of Marāṭhā power in the latter half of Awrangzib's reign. The district is therefore associated with the beginnings of Marāṭhā history and closely connected with the career of Shiwādji. Under the Pishwās [q.v.] it became the centre of Marāṭhā power until the British conquest in the early nineteenth century.

Pūna city, which is situated at the confluence of the Muthā and Mula rivers, has a total population of 250,187, of whom 28,925 are Muḥammadans (*Census Report*, 1931). When but a village it was included in the *djāgīr* of Mālodjī Bhonsla, the grandfather of Shiwādji. Later, Shiwādji finding Pūna too exposed transferred his capital to Rāigad where his coronation took place. Pūna was the scene of his daring attack upon Shāyista Khān. With the growth of the power of the Pishwās Pūna once more became the capital and centre of the Marāṭhā kingdom. The fortified palace of the Pishwās, known as the Shānāwārī, was destroyed by fire in 1827. It was at Pūna in the year 1885 that the first meeting of the Indian National Congress took place.

(C. COLLIN DAVIES)

PŪST or PÖST (P.), skin; Turkish: *pöstakı*; a tanned sheepskin, used as the ceremonial seat or throne of a *pīr* or *shāikh* of a dervish order. The head, sides and foot had mystical significances ascribed to them. It corresponds to the Arabic *bisāf*. According to Ewliya Çelebi (Stambul, i. 495), the *murīd*, after passing the test by the *pīr*, is called *ṣāhib pūst*. On ceremonial occasions amongst the Baktashī order, the hall or convent was set out with twelve pūsts of white sheepskin in remembrance of the twelve imāms.

(R. LEVY)

PUWASA (Skr. *upawāsa*), in the East Indian Archipelago the name for the month of Ramaḍān and for fasting in this month or at other times. The Arabic names however are not unknown. Fasting is in Indonesia generally a favourite pious practice not only on the days prescribed or recommended by law but also as a means of attaining a desired end. The observation of the fast in Ramaḍān is here as elsewhere

regarded as the most important of the pillars of Islām; here also we find the popular belief prevailing that it can atone for the sins of the whole year. Not all however continue the fast to the end of the month; if any one finds it difficult he satisfies his conscience by fasting on the first and last days of the month; nevertheless such people or even those who do not fast at all have the same elevated sentiment which fills all and which stamps Ramaḍān as the Muḥammadan month like no other. Students, merchants, all whose business takes them away from home endeavour to spend this month at least in the family circle. In many districts the approach of puwasa is remarkable for the increase of slaughtering in the last days of the preceding month. The meat is preserved for use; meals in puwasa are somewhat heavier than usual in order to strengthen for the strain of fasting. The markets are also more animated towards the end of the month; this is the time to make purchases in view of the approaching end of the fast. The beginning of the month is publicly notified; e. g. the drums which form part of the equipment of the houses of prayer are beaten in a special way. The beating of the drums is repeated throughout the whole month at particular times of day, especially after sunset and shortly after midnight in order to warn the faithful that the time for eating is nearly over so that they can prepare the morning meal (Ar. *ṣaḥūr*). Finally at the end of the month when the period of abstinence is over, the drums are beaten with particular vigour. The ascertainment of the end and beginning of Ramaḍān usually leads to friction every year. Those who are free-thinkers in religious matters use the calendar and do not hesitate to announce the end of the fast in advance; all who demand that the law should be strictly followed and these include the modernists, stick to *ru'ya* (evidence of the senses). The *taraweh* (Ar. *tarāwīḥ*) service is held in the public houses of prayer immediately after the *'iṣhā'*; it is also eagerly attended by people who on other occasions do not observe the legal obligations of religion. The lack of seriousness and the unfitting conduct of many participants induces the devout to avoid this *taraweh* service and to observe it elsewhere with a small company of similarly minded people. It is worst in Atjeh; the *taraweh* service here is simply a caricature (Snouck Hurgronje). A special importance is usually attached to the last five odd nights of the month devoted to religious exercises in connection with the *lailat al-ḡadar*. They are not agreed as to which of these nights is most probably the correct one: the 21st and 27th are preferred but the practice varies in different localities. Part of the ceremonial observation of these nights consists in having illuminations in front of the dwelling-houses. In Java special emphasis is laid on the eating of meals together. Every one, if he can at all do it, gives a religious feast every evening. Later they go round their friends; open house is generally kept and time spent in rejoicing until far into the night. Besides these private entertainments there are meals of an official nature. The people of the village come to the house of the village headman to a religious feast; every one brings his share. The higher officials, especially the administrative officials, give a feast to their subordinates. The most splendid observance of these five nights however is found in the palaces of the Javanese

princes. According to ancient custom, these feasts took place in great splendour after sunset; the broad forecourts of the palaces give an excellent opportunity for them. These feasts known as *malṭman*, with which many legends are associated, follow one another in a hierarchical succession. First the prince has his on the 21st; next come the crown-prince, the princes of the blood, the governors and ministers; the dishes are intended for the host's subordinates. In recent years these *malṭman* have become restricted so that only the first of them retains its official character. The "little" feast is a day of rejoicing far surpassing the "great" feast. After the *fiṭra* has been performed on the last day of Ramaḍān or even earlier and ablutions have been taken with special care, in which the Javanese sometimes includes his cattle, a feast is prepared in the house in the evening after the breaking of the fast. The more devout make a modest meal precede this within the month of the fast to take farewell of the spirits of the deceased who wander about during Ramaḍān and now return to their abodes. The ceremonial *ṣalāt* on the 1st Shawwāl is little observed in Atjeh but is a great ceremony in other places; there is no *ṣalāt* in the whole year which is better attended; many, who otherwise never enter a mosque never fail to be present on this occasion. In Java the regents, the highest native government officials accompanied by the whole of the staff of the regency, all in full dress go in the early morning, before sunrise from the regent's house to the mosque in order to take part in the *ṣalāt* there. After the end of the *ṣalāt* they return in the same way. The regent then receives the homage of all. The same custom prevails in the southern Celebes; except that here the native princes take the place of the regents. On this day the young people let off fire-works. After the ceremonial *ṣalāt* people set out in new clothes to visit relations and friends; congratulations are given on the successful conclusion of the fast and pardon is asked for any sins committed deliberately or involuntarily in the past year. It is a widespread custom to visit on this day the tombs of ancestors which have previously been cleaned, and there to spend some time scattering flowers and incense in pious devotion. In Java again we have the custom for the higher officials to treat their subordinates to what are called "mountains of food" (dishes of all kinds arranged in artistic forms). In the native states, at the end of the fast, one of the three public holidays is observed, the essential feature of which is the public representation of the unity of the kingdom in the person of the prince. The three feasts are on the whole on the same lines. The prince appears in oriental splendour and shows himself in the outer court of the palace before the assembled people. Large supplies of food have already been prepared in the royal kitchens and are ceremonially piled up into mountains of food of exactly defined form and preparation. These "mountains" which are so large that it takes several persons to carry one, are carried to the place of audience as soon as the prince has taken his seat and at his command taken on to the mosque. Here the food is distributed after the chief supervisor of the mosque has offered a prayer for prince and country. On account of the blessing associated with it it is lucky to get any of the food. The six days' fast in Shawwāl recommended by law is only observed

by a few very pious people; a minor festival is observed on the 8th of the month to mark its conclusion.

Q

QUETTA (Pashtu: Kwattā), a *taḥṣīl* and town in the Quetta-Pishin district of British Balūchistān [q.v.]. The district, which contains the *taḥṣīls* of Quetta and Pishin and the administrative sub-division of Čaman, has an area of 4,806 square miles and a population of 147,541, of whom 107,945 are Muslims. Nearly all these Muslims are Pashtu speaking Pathāns, only a very small minority speaking Brahūi and Balūči. The district, which is very mountainous, is bounded on the north-west by Afghān territory, on the east by the Zhōb and Sibi districts, and on the south by the Bolān Pass district and the Sarawān division of Kalāt.

The *taḥṣīl* of Quetta, which is held on lease from the Khān of Kalāt, has an area of 548 square miles and a population of 76,649. The town of Quetta was destroyed by earthquake in 1935. In 1931 it had a population of 60,272, of whom 25,391 lived in the cantonment (*Census of India*, 1931, vol. iv., Baluchistan).

Until the middle of the eighteenth century, when Quetta finally came under Brahūi control, the history of Quetta-Pishin is probably identical with that of Kandahār [for early history see the art. BALŪCHISTĀN and KANDAHĀR]. Quetta was temporarily occupied by the British during the First Afghān War, 1839—1842 (see W. Hough, *A Narrative of the march and operations of the army of the Indus in the expedition into Afghanistan*, 1840). Its strategical importance was first recognized by General John Jacob who urged Lord Canning, in 1856, to garrison this important point of vantage (*Views and Opinions of General John Jacob*, ed. Pelly, p. 349). The proposal was rejected on the grounds that, surrounded by hostile tribes and cut off from its true base, the isolated position of the garrison would be extremely precarious. Ten years later, Sir Henry Green, the Political Superintendent of Upper Sind, seeking to improve the British scheme of frontier defence, proposed that Quetta should be garrisoned and connected by rail with Karāči. Unfortunately for those who desired an advance into Balūchistān the proposal had to face the united opposition of Lord Lawrence

and his Council, all of whom were champions of non-intervention. Ten years passed. The exponents of "masterly inactivity" were no longer predominant in the Viceroy's council chamber; Khīwa [see KHWĀRIZM] had fallen before the Russians, who were drawing nearer and nearer to the gates of India; and, more dangerous still, the estrangement of Shīr 'Alī had brought the Amir of Afghānistān and the Government of India to the brink of war. It was therefore decided, in 1876, to occupy Quetta. The British right to despatch troops into Kalāt territory had been recognized by the treaty of 1854 (Aitchison, xi. 212—213). Chiefly owing to the efforts of Major (afterwards Sir Robert) Sandeman, this treaty was renewed and supplemented on December 8, 1876, by the Treaty of Jacobābād (*Parl. Papers*, 1877, lxiv., c. 1808, p. 314—316). In return for an increased subsidy the Khān granted permission for the location of troops in, and the construction of railways and telegraph lines through, Kalāt territory. This was followed by the formation of the Balūchistān Agency, for on February 21, 1877, Sandeman was appointed Agent to the Governor-General with his headquarters at Quetta.

The strategical importance of Quetta is now almost universally recognized. Protected on the south-west by the lofty Chiltan range and on the north-east by the Zarghun plateau, it dominates all the southern approaches to the Indus valley.

R

RĀ', tenth letter of the Arabic alphabet, with the numerical value of 200. For its palaeographical evolution see the article ARABIA, plate i. It belongs to the group of the liquids and is frequently interchanged with *l* and *n*. It regularly corresponds to the *r* of other Semitic languages. It is not guttural but lingual.

(A. J. WENSINCK)

RABĀB, the generic name in Arabic for the viol, or any stringed instrument played with a bow (*ḥaws*). The origin of the name has been variously explained: *a.* from the Hebrew *lābāb* (*l* and *r* being interchangeable); *b.* from the Persian *rubāb* (*√rawāwa*), which was played with the fingers or plectrum; and *c.* from the Arabic *rabba* (to collect, arrange, assemble together). The first derivation is scarcely feasible. The second has a *raison d'être*, although the mere similarity in name must not be accepted without question. In spite of the oft repeated statement that the Arabs admit that they borrowed the *rabāb* from the Persians, together with the word *kamān* for the bow, there is not the slightest evidence for it. No Arabic author (so far as the present writer knows) makes an admission of this kind, nor have the Arabs adopted the word *kamān* for the bow, their own term *ḥaws* having been considered sufficient. It is true that we read in the *Mafātīḥ al-'Ulūm* (xth century) that "the *rabāb* is well-known to the people of Persia and *Khurāsān*" (237), but this author was writing in hither Persia, and we know from al-Fārābī that the *rabāb* was also well-known in Arabian lands. One argument against the alleged borrowing from Persia is that the *rubāb* with the Persians has ever been a plucked and not a bowed instrument. Still, the Arabs may have borrowed the plucked instrument and adapted it to the bow. On the other hand, the Arabic root *rabba* as the parent of the word *rabāb* has much in its favour. As the Arabic musical accousticians point out, plucked instruments such as the *'ūd* (lute), *ṭunbūr* (pandore), etc. gave short (*munfaṣīl*) sounds, but bowed instruments such as the *rabāb* gave long or sustained (*muttaṣīl*) sounds. It was application of the bow which "collected, arranged, or assembled" the short notes into one sustained note, hence the term *rabāb* being applied to the viol (see Farmer, *Stud.*, i. 99).

The *rabāb* is mentioned as early as the Arabic polygraph al-Djāhīz (d. 868) in his *Maḍmūnāt al-Rasā'il*. Yet we cannot be sure whether this was

the bowed *rabāb* or the plucked *rubāb*. At any rate, it already had a legendary history when he wrote. According to the *Kashf al-Humūm* (xvth—xvith century) it is first found in the hands of a woman of the Banū Ṭaiy (fol. 263). Turkish tradition ascribed its "invention" to a certain 'Abd Allāh Fāryābī (Ewliyā Ćelebī, *Siyāhat-nāme*, i/ii. 226, 234). An Andalusian legend places its invention within the Iberian peninsula (Delphin and Guin, *Notes sur la poésie et la musique arabes*, p. 59). One thing is certain even if we have iconographic evidence of the viol in the viiith or ixth century (cf. *infra*), the earliest literary evidence of the use of the bow comes from Arabic sources, i. e. from al-Fārābī (d. 950), the *Iḥwān al-Safā'* (xth century), Ibn Sīnā (d. 1037), and Ibn Zaila (d. 1048), as I have fully demonstrated elsewhere (*Stud.*, i. 101—105).

Seven different forms of viol are known to Islāmic peoples, viz.: 1. The Rectangular Viol, 2. the Circular Viol, 3. the Boat Shape Viol, 4. the Pear Shape Viol, 5. the Hemispherical Viol, 6. the Pandore Viol, and 7. the Open Chest Viol.

1. The Rectangular Viol. This consists of a wooden frame, more or less rectangular, over the face (*wadīḥ*) and back (*ṣāḥr*) of which is stretched a membrane (*djilda*). The neck (*'unuḳ*) is cylindrical and is of wood, whilst the foot (*ridjī*) is of iron. It has either one or two strings (*awṭār*), generally of horsehair. Al-Khalīl (d. 791) says that "the ancient Arabs sang their poems to its [the *rabāb*'s] voice [or sound]" (Farmer, *Stud.*, i. 100). In the *Kashf al-Humūm* (fol. 267) we read that it was used to accompany the pre-Islāmic *ḥaṣīda* and the elegaic poem. Probably the pre-Islāmic *rabāb* was of this rectangular form. Lane (*Lexicon*, p. 1005) held this latter view. Ibn Ḡhaibī (d. 1435) [q. v.] describes this viol of the bedouin as rectangular (*murabba'*) and with a membrane face and back and one string of horsehair (fol. 78v). Niebuhr (i. 144) says that it was still called the *murabba'* in the xviiith century. We certainly have a rectangular instrument shown in the frescoes of Ḳuṣair 'Amra (Musil, pl. xxxiv.), but it is played with the fingers and not with a bow. Yet even in modern times the *rabāb* of the desert was to be found played in this way as well as with a bow (Crichton, ii. 380; Burckhardt, *Bedouins*, p. 43; do., *Travels*, i. 389; Burton, *Personal Narrative*, iii. 76). Niebuhr (Tab. xxvi., F) delineates a rectangular viol of two strings, although he says that he saw a viol of one string in Cairo. Villoteau (722—724: 913—918) distinguishes between the two instruments. In Egypt, he says, the *rabāb al-shā'ir* (poet's viol) had one string, whilst the *rabāb al-mughannī* (singer's viol) had two strings. Lane (*Mod. Egypt*, chaps. xviii., xxi.) also describes them. These instruments never form part of a concert orchestra, being relegated to the folk. For other delineations of the instrument see Fétis (*Hist.*, ii. 145), Engel

(*Catalogue*, p. 211; *Researches*, p. 88), Chouquet (p. 204), Sachs (*Reallex.*, p. 317). Actual specimens abound in museums, e.g. Brussels, N^o. 382 and New York, Nrs. 242, 391.

2. The Circular Viol. The modern instrument of this form consists of a circular wooden frame or pan, the face, and sometimes the back, being covered with a membrane. There is no foot. There is no special reference to this form in Arabic literature nor is there any definite iconographic evidence of it earlier than the xviiith century when it is described and delineated by Niebuhr (i. 144; Tab. xxvi., G) who found it at Baṣra. It had but one string. It is still found among the folk of Palestine (Sachs, p. 30, 40, Tab. 3, 17) and the Maghrib (Chottin, p. 50) where it is still known as the *rabāb* or *ribāb*. For other delineations see Lavignac (p. 2790) and Chottin (pl. vi.).

3. The Boat Shape Viol. This form is confined to the Maghrib. It consists of a piece of wood hollowed out into the shape of a boat. The chest (*ṣadr*) is covered with thin metal or wood pierced with ornamental rosettes (*nuwwārā*), whilst the lower part is covered with a membrane. The head (*ra's*) is at right angles to the body, and it is generally furnished with two strings. It seems to have been used by the Arabs and Moors of Spain since their invasion of the peninsula. It is praised by their xth and xith century writers Abū Bakr Yahyā ibn Hudhail (see al-Shalāḥī, fol. 15), and Ibn Ḥazm (see Muḥammad b. Ismā'il, p. 473), and doubtless they refer to either this instrument or the Pear Shape Viol (see *infra* 4) since the *Glossarium Latino-Arabicum* (xixth century) equates *rabāb* with *lira dicta a varietate*. If we have no iconographic evidence of this viol from Arabian or Moorish sources, it certainly exists among the Spaniards, since the instruments in the *Cantigas de Santa Maria* (xiiith century) show definite oriental features; see Riaño (p. 129) and Ribera (pl. xi.). Ibn Khaldūn (d. 1406) is the first to describe this viol, although not very clearly (*Prol.*, xvii. 354). It is not until the time of 'Abd al-Rahmān al-Fāsi (ca. 1650) that we get any musical details of the instrument (*J. R. A. S.*, 1931, p. 366). European travellers (Addison, Windhus, Höst, Shaw) mention the instrument as popular in the Maghrib, and to-day it is one of the principal instruments in concert music. Höst gives us one of the earliest delineations of the instrument from Eastern sources (Tab. xxxi. 2). For a xixth century description see F. Salvador-Daniel (p. 80) and for a design see Christianowitch (pl. 1). Several delineations of both instruments and players may be seen in al-Hafnī (pl. 34, 39—52). Mahillon (i. 416—417), Fétis (*Hist.*, ii. 146), Engel (*Cat.*, p. 143), Chouquet (p. 205), Sachs (*Reallex.*, p. 317), etc. For the instrument of Northern India called the *sārangi* see Lavignac (p. 350) and Fétis (ii. 298).

4. The Pear Shape Viol. Probably, the earliest Arabic reference to this instrument is that made by Ibn Khurdādhbih (d. ca. 912) who, in an oration before Caliph al-Mu'tamid (d. 893), says that the Byzantines had a wooden instrument of five strings called the *lira* which was identical with the *rabāb* of the Arabs (al-Mas'ūdi, *Murūdj*, viii. 91). We can probably identify the instrument in the famous Carrand Casket at Florence which dates from the ixth century (*L'Arte*, 1896, p. 24). From the Siculo-Moorish woodwork of the Palatine

Chapel at Palermo (xiith century) we see to better advantage what the Arabian instrument was like (*B. Z.*, 1893, ii. 383). It was this form of the *rabāb* probably, with which al-Fārābī (d. 950) deals (see Land, *Researches*, p. 130, 166). He gives full details of both the *accordatura* and scales. We know little about this instrument in Arabic speaking lands after the xiiith—xivth century, until it is described by Niebuhr (i. 143; Tab. xxvi., D) in the xviiith century, and even then it appears to have been favoured only by the Greek population. It had three strings. It may have been used in the Maghrib (Jackson, p. 159—160), but neither Villoteau nor Lane know of it in Egypt. In Turkey, it appears to have been adopted from the Greeks, possibly in the xviiith century, and with the '*ūd* and *lawta* plays a prominent part in concert music to-day (Lavignac, p. 3015). Recently an attempt has been made to introduce this *rabāb turki* or *arnaba*, as it is now called, into Egypt (al-Hafnī, p. 661, pl. 35). Designs of the instrument may be found in Engel (*Cat.*, p. 210) and Crosby Brown (iii/i. 22), where they represent specimens in collections at South Kensington (London) and New York.

5. The Hemispherical Viol. This is, perhaps, the best known form of the viol in the Islāmic east. The body consists of a hemisphere of wood, coco-nut, or a gourd, over the aperture of which a membrane is stretched. The neck is of wood, generally cylindrical, and there is a foot of iron, although sometimes there is no foot. It is often known in Arabic as the *kamāndja* or more rarely as the *shishāk*. The former is derived from the Persian *kamānta* (dim. of *kāman*, "bow") whilst the latter is derived from the Persian and Turki *shishak*, *shushak*, *ghishak*, *ghizak*, *ghizak*, etc., which may have had their origin in the Sanscrit *ghoshaka*, an instrument mentioned in the pre-Christian *Nāṭya-shāstra* (cap. xxxiii.). I believe that the words *shishak* and *shisān* mentioned in the *Ikhwān al-Ṣafa'* (Bombay ed., i. 97) and al-Shalāḥī (fol. 12) respectively, are copyist's errors for *shishak* and *shisāk*. The work *kamāndja* is first mentioned in Arabic by Ibn al-Faḥīh (ca. 903) who says that it was used by both the Copts and the people of Sind (*B. G. A.*). Of course this need not mean that the instrument mentioned was a hemispherical viol, because, being a Persian by origin, the author may have used the word *kamāndja* in its Persian generic sense meaning a viol. That Egypt had an early liking for the *kamāndja* is borne out from various sources. Although in Egypt the hemispherical viol is nowadays called the *rabāb miṣri* (Egyptian viol), in earlier days it was acknowledged that Egypt borrowed the instrument from Persia (*Kashf al-Humūm*, fol. 106). The *kamāndja* was certainly popular at the courts of the Aiyūbid al-Kāmil (d. 1238) and the Mamlūk Baibars (d. 1277); see al-Makrizī, i/i. 136; Lane-Poole, *Hist. of Egypt*, p. 249. In the Persian *Kanz al-Tuhaf* (xivth century) the hemispherical viol is described and figured as the *ghizak*, but in Ibn Ghāibī (d. 1435) where both the *ghizak* and the *kamāndja* are described, the former is a larger type of the latter, having, in addition to its two ordinary strings, eight sympathetic strings (*Kanz al-Tuhaf*, fol. 261v; Ibn Ghāibī, fol. 78). In the xviiith century the *kamāndja* is delineated by Russell (i. 152—153, pl. iv.), and Niebuhr (i. 144, Tab. xxvi., E). Both Villoteau (p. 900, pl. BB) and Lane (*Mod. Egypt.*, chap. 18) give minute details

of the construction and *accordatura*. *Mushāka* also describes the Syrian *kamāndja* (*kamandja*) of his day (*M. F. O. B.*, vi. 25, 81). For the modern Persian instrument see *Advielle* (14 and pl.) and *Lavignac* (p. 3074). Turkomanian instruments are given by *Fitrat* (p. 45) and *Belaiev* (p. 54). For Malaysia see *Kaudern* (p. 178); for India *Lavignac* (p. 349) and *Fétis* (ii. 295). For other designs see *Farmer* (*Stud.*, i. 76), *Fétis* (*Hist.*, ii. 136–137), *Chouquet* (p. 203), *Sachs* (*Reallex.*, p. 207).

6. The Pandore viol. This form is practically a *ṭunbūr*, *sitar*, or the like, which is bowed instead of being plucked by the fingers or a plectrum. The two best known examples from India are the *esrār* and *ṭāūs*. The former has a membrane on its face and has five strings played on with the bow together with a number of sympathetic strings. The latter is practically identical with the former but is adorned with the figure of a peacock (hence its name) at the bottom of the body of the instrument. See *Lavignac* (p. 351) and *Mahillon* (i. 131) for designs and details. With the Persians and Turkomans we see various kinds of pandores used with the bow. See *Advielle* (p. 14), *Lavignac* (p. 3074), *Mironov* (p. 27), *Kinsky* (p. 26).

7. The Open Chest Viol. This is unknown to the peoples of North Africa and the Near East, although it is popular in the Middle East. Unlike the preceding forms of the viol, the upper part of the face of the body or sound-chest is left open. The best known example of this is the *sarindā* of India which has three strings. See *Fétis* (ii. 296), *Lavignac* (p. 351), *Mahillon* (i. 137) and *Kinsky* (p. 27), for both designs and details. In Turkomania a similar instrument known as the *kūpūz* is very popular. It has two strings. See *Belaiev* (p. 52), *Mironov* (p. 25), *Fitrat* (p. 43).

(H. G. FARMER)

RABAD (A., pl. *arbād*), district of a town, quarter, situated outside the central part or *madīna* [q. v.]. The term, which is very frequently found in the Arab historians of the middle ages in east as well as west, is the original of the Spanish word *arrabal* which means the same. *Rabaḍ* also means the immediate vicinity of a town. The *rabaḍ* usually had a name of its own. This is how there have been preserved for the Cordova of the caliphate of the xth century the names of twenty-one of the suburban districts. *Rabaḍ* *Shakunda* [q. v.] or al-Rabaḍ (for short) was the southern quarter of Cordova, on the other side of the Guadalquivir where in 198 (914) the famous "rebellion of the suburb" broke out which was stifled in blood by the emir al-Ḥakam I [q. v.] and earned him the epithet of al-Rabaḍi. The name *rabaḍi* was also given to the exiles who migrated at this time to the rest of al-Andalus, Morocco and to the east. In the castles (*ḥiṣn* or *ṣakhra*) of Muslim Spain the name *rabaḍ* was given to the civilian quarter below the strictly military quarters. *Rabaḍ* was also the name given in the towns of the west to the lepers' quarter and to that of the prostitutes'.

(E. LÉVI-PROVENÇAL)

RABAĤ. Zubair-Pasha, Egyptian governor of Baḥr al-Ghazāl in 1875, being recalled to Cairo left his son Sulaimān in charge. The latter thinking he was threatened by the hostility of Gordon, then Governor-General of the Sūdān, joined Ḥārūn, the dethroned sultān of Dār-Fūr, in order to rebel against Egypt. His chief lieutenant was a certain Rabaḥ, son of a negress who had been his father's nurse and was therefore his foster-brother. Gessi-Pasha sent by Gordon inflicted a severe defeat on Sulaimān and Rabaḥ took to flight with the remnants of his master's army and to revictual his forces began a series of raids on the tribes of the northwest of Baḥr al-Ghazāl (1878). Then pushing westwards he entered the land of the Banda in 1879 and in 1883 fell back on the Dār-Kūti, installed a native chief named Sanūsī there as sultān, attacked Bagirmi in 1892 and in 1893 seized its capital which then was Bugoman. In the same year he attacked Ḥāshim, sultān of Bornū [q. v.], defeated and slew him (Dec. 1893). He then attacked Gober or Tessāwa where Abū Bakr, nephew and successor of Ḥāshim, had taken refuge; checked by the army of the sultān of Sokoto he turned against the little states of the south of Lake Chad, took Gulfey from the Buso, Kusri from the Mandara, Logone from the Kotoko, again invaded Bagirmi in 1898, burned Maseña, the old capital, pursued the king

or *mbang* as far as Kuno, was there held up with his 8,000 men by some thirty Senegalese soldiers under the district commissioner Bretonnet and only overcame the resistance of this handful of heroes after eight hours fighting (July 18, 1899). On April 22, 1900, he was defeated at Kusri on the lower Chari by Commandant Lamy: Rabah and Lamy both fell in the battle. His extraordinary career had lasted 22 years and ruined a whole region of the Central Sūdān.

(MAURICE DELAFOSSE)

RABAT, Ar. *RIBĀṬ* AL-FATH, vulg. *er-Rbāt* (ethnic *Ribāṭī*, vulg. *Rbāṭī*), a town in Morocco, situated on the south bank at the mouth of the Wādī Abū Raḡrah (Wed Bu Regreg) opposite the town of Sale [cf. *SALĀ*]. Since the establishment of the French protectorate it has been the administrative capital of the Sharīfian empire, the usual residence of the sultān of Morocco, and the headquarters of the *makhzen* [q. v.] and of the French authorities. The choice of Rabat as the administrative centre of Morocco has brought this town considerable development in place of the somnolence in which it was sunk a quarter of a century ago.

The foundation of Ribāṭ al-Fath was the work of the Almohads [q. v.]. The site of the "Two Banks" (*al-Idwatān*) of the estuary of the Bu Regreg had previously been the scene of Roman and pre-Roman settlements: the Punic, later Roman *Sala* was built on the left bank of the river higher up at the site of the royal Merinid necropolis of Chella (*Shālla*; q. v.). The Muslim town of Salā on the right bank had, from the beginning of the tenth century to protect it against the inroads of the Berghawāṭa [q. v.] heretics at the time when it was the capital of a little Ifrānīd kingdom, fortified on the other side of the Bu Regreg a *ribāṭ* [q. v.], which was permanently occupied by devout volunteers who in this way desired to carry out their vow of *djihād* [q. v.]: the geographer Ibn Ḥawḳal is authority for its existence at this date (cf. *B. G. A.*, i. 56). But we know very little of the part played by this *ribāṭ* in the course of the sanguinary wars later fought between the Berghawāṭa and the Almoravids. It is not even possible to point out its exact situation. It was perhaps the same fortified spot that is mentioned in the middle of the xiith century under the name of Ḳaṣr Banī Targā by the geographer al-Fazārī.

The final and complete subjugation of the Berghawāṭa meant that a different part was to be played by the *ribāṭ* on the estuary of Bu Regreg. In 545 (1150), the founder of the dynasty of the Mu'minid Almohads, 'Abd al-Mu'min, chose the fort and its vicinity as the place of mobilisation for the troops intended to carry the holy war into Spain. A permanent camp was established there and he provided for a supply of fresh water by bringing a conduit from a neighbouring source, 'Ain Ḡhabūla. The permanent establishments, — mosque, royal residence — formed a little town which received the name of al-Mahdiyya. On several occasions very large bodies of men were concentrated around the *ribāṭ*, and it was there that 'Abd al-Mu'min died on the eve of his departure for Spain in 558 (1163).

The development of the camp went on under 'Abd al-Mu'min's successor, Abū Ya'qūb Yūsuf (558—580 = 1163—1184), but it was the following

prince of the Mu'minid dynasty, Abū Yūsuf Ya'qūb al-Manṣūr, who at the beginning of his reign gave the orders and opened the credits necessary for its completion. In memory of the victory gained in 1195 by the Almohads over Alfonso VIII of Castile at Alarcos [q. v.] it was given the name of Ribāṭ al-Fath. The camp was surrounded by a wall of earth flanked with square towers enclosing with the sea and the river an area of 450 hectares. The wall is still standing for the most part and is nearly four miles in length; two monumental gates, one now known as Bāb al-Ruwāḥ (Bāb er-Ruāḥ), the other which gives access to the *ḡaṣaba* (Kasba of the Oudaya), date from this period. It was also Ya'qūb al-Manṣūr who ordered the building inside Ribāṭ al-Fath of a colossal mosque which was never finished; rectangular in plan it measured 610 feet long by 470 feet broad; the only mosque in the Muslim world of greater area was that of Sāmarrā [q. v.]. It was entered by 16 doors and in addition to three courts had a hall of prayer, supported by over 200 columns. In spite of recent excavations more or less successfully conducted this mosque still remains very much a puzzle from the architectural point of view. But the minaret, which also remained unfinished and was never given its upper lantern still surprises the traveller by its unusual dimensions. It is now called the Tower of Ḥassān (*burj Ḥassān*). Built entirely of stones of uniform shape it is 160 feet high on a square base 55 feet square. Its walls are eight feet thick. The upper platform is reached by a ramp two yards broad with a gentle slope. This tower in its proportions, its arrangement and decoration is closely related to two Almohad minarets of the same period: that of the mosque of the Kutubīya at Marrākeṣh [q. v.] and that of the great mosque of Seville [q. v.], the Giralda.

Ya'qūb al-Manṣūr's great foundation never received the population which its area might have held and the town opposite, Sale, retained under the last Almohads and in the xiiith and xivth centuries all its political and commercial importance. Rabat and Sale in 1248 passed under the rule of the Marīnids and it seems that Rabat in those days was simply a military station of no great importance, sharing the fortunes of its neighbour which had gradually become a considerable port having busy commercial relations with the principal trading centres of the Mediterranean. But a chance circumstance was suddenly to give the town of the "Two Banks" a new aspect. The expulsion of the last Moriscos [q. v.] decided upon in 1610 by Philip III brought to Rabat and Sale an important colony of Andalusian fugitives who increased to a marked degree the number of their compatriots in these towns who had previously left Spain of their own free-will after the reconquest. While the population of the other Moroccan cities, Fāz and Tetwān principally, in which the exiles took refuge, very quickly absorbed the new arrivals whom they had welcomed without distrust, the people of Rabat and Sale could not see without misgivings this colony from Spain settle beside them, for they lived apart, never mingled with the older inhabitants and devoted themselves to piracy and soon completely dominated the two towns and their hinterland. Rabat, known in Europe as "New Sale" in contrast to Sale ("Old Sale"), soon became the centre of a regular little maritime republic

in the hands of the Spanish Moors who had either left of their own accord before 1610, the so-called "Hornachuelas", or had been expelled in 1610, the so-called "Moriscos", the former however being clearly in the majority. This republic, on the origin and life of which the documents from European archives published by H. de Castries and P. de Cenival have in recent years thrown new light, hardly recognised the suzerainty of the *sharīf* who ruled over the rest of Morocco. While boasting of their *djihad* against the Christians, the Andalusians of the "Two Banks" really found their activity at sea a considerable source of revenue. They had retained the use of the Spanish language and the mode of life they had been used to in Spain. They thus raised Rabat from its decadence. Their descendants still form the essential part of the Muslim population of the town and they have Spanish patronymics like Bargāsh (Vargas?), Palāmino, Morēno, Lōpēz, Pērēz, Chiquito, Dinya (Span. Dénia), Runda (Span. Ronda), Mūlin (Molino) etc.

The spirit of independence and the wealth of the Spanish Moors in Rabat soon made the town a most desirable object in the eyes of the sultāns of Morocco. Nevertheless the little republic with periods of more or less unreal independence, was able to survive until the accession of the 'Alid sultān Saiyidī Muḥammad b. 'Abd Allāh in 1171 (1157). This prince now endeavoured to organise for his own behalf the piracy hitherto practised by the sailors of the republic of the "Two Banks". He even ordered several ships of the line to be built. But the official character thus given to the pirates of Sale very soon resulted in the bombardment of Sale and Larache [q. v.] by a French fleet in 1765. The successors of Muḥammad b. 'Abd Allāh had very soon to renounce any further attempt to wage the "holy war" by sea. The result was a long period of decline for Sale which found expression not only in the gradual diminution of its trade but also in a very marked hatred of each town for the other. At the beginning of the 20th century, Rabat like Sale had completely lost its old importance. They were both occupied by French troops on July 19, 1911.

Rabat is one of the towns of Morocco, the population of which is both *ḥaḍarīya*, i. e. essentially town-dwelling, and *makhzanīya*, i. e. used as residence by the sultān of the *Sharīf* empire. The non-European population has increased in a marked degree since the establishment of the protectorate and its choice as permanent capital of the sultān. The number of inhabitants at the census of 1931 was 27,986 Muslims and 4,218 Jews (20,452 and 3,676 in 1926; Sale wich is a separate municipality had in 1931 22,145 Muslims and 2,387 Jews). They live almost entirely in the *madīna*, which is in the shape of a trapezoid, and its annexes formed by the Jewish *mellāḥ* [q. v.] and the *ḥaṣaba* of the Ūḍāya, a separate walled area with its own mosque, originally inhabited by contingents of the *gish* tribe (q. v.; Ar. *djaish*) of this name (Ḥaṣba of the Oudaya). The chief mosques of Rabat are the foundations of 'Alid sultāns, Mawlāi al-Rashīd [q. v.] and Mawlāi Sulaimān (Moulāi Slimān), the mosque near the imperial palace, the *Djāmi'* al-Sunna, was built in the second half of the 18th century. Besides the monumental gates there are several other entrances in the Almohad enceinte: the Bāb al-'Ulū (Bāb el-Alou) admits from the *madīna* to the cemetery and the cliffs

which rise up from the ocean; the gate called Za'ir (Bāb Za'ir) is in the immediate vicinity of the Marinid royal cemetery of Chella (Shālla).

The French town of Rabat built outside the *madīna* is developing rapidly: the palace of the Resident-General, the public offices, fine esplanades, villas surrounded by gardens give the new town a particularly attractive appearance. French Rabat at the present day is a masterpiece, famed throughout the world, of successful town planning and architecture. It is connected by railway to Casablanca and Marrākeṣh in the south, Tangier in the north, Fās and Algiers in the east. Since October 1935 it has been the final resting-place of Marshal Lyautey to whom it owes its position as capital and its reconstruction.

(E. LÉVI-PROVENÇAL)

RABB (A.), lord, God, master of a slave. Pre-Islamic Arabia probably applied this term to its gods or to some of them. In this sense the word corresponds to the terms like Ba'al, Adon in the Semitic languages of the north where rabb means "much, great". — In one of the oldest sūras (cvi. 3) Allāh is called the "lord of the temple". Similarly al-Lāt bore the epithet al-Rabba, especially at Tā'if where she was worshipped in the image of a stone or of a rock. — In the *Qur'ān* rabb (especially with the possessive suffix) is one of the usual names of God. This explains why in *Ḥadīth* the slave is forbidden to address his master as *rabbī*, which he must replace by *sayyidī* (Muslim, *al-Alfāḥ min al-Adab*, trad. 14, 15, etc.). — The abstract *rubūbiya* is not found in either *Qur'ān* or *Ḥadīth*; it is in common use in mystic theology.

RABGHŪZĪ. [See RUBGHŪZĪ.]

RABĪʿ (A.), the name of the third and fourth months of the Muslim calendar. The name is an Aramaic loanword and in the Syriac translation of the Bible corresponds to the Hebrew *mal'kōsh* (late rain). This and the fact that the two months following Rabiʿ II are called Djumādā (month of frost) suggested to Wellhausen that these four months originally fell in winter and that the old Arab year began with the winter half-year [see AL-MUHARRAM]. Rabiʿ means originally the season in which, as a result of the rains, the earth is covered with green; this later led to the name Rabiʿ being given to spring. Al-Birūnī expressly describes autumn (*khariḥ*) as the season indicated by Rabiʿ. As a result of the Qurʾānic prohibition of intercalation [see NAFIʿ], since the beginning of the Muslim era the two months no longer fall at a regular season.

(M. PLESSNER)

AL-RABĪʿ B. YŪNUS B. ʿABD ALLĀH B. ABĪ FARWA (so-called from his entering Medina with a fleece on his back), emancipated slave of al-Ḥārith al-Ḥaffār (grave-digger), emancipated slave of ʿOthmān b. ʿAffān. He was really a bastard of obscure origin, a fact which was often brought up against him by his enemies later in his career. Born in slavery at Medina about 112 (730), he was bought by Ziyād b. ʿAbd Allāh al-Ḥārithī who presented him to his master Abu ʿl-ʿAbbās al-Saffāh, the first ʿAbbāsīd Caliph. All his life, he served, with varying fortune, three more ʿAbbāsīd Caliphs: al-Manṣūr, al-Mahdī and al-Ḥādī.

He reached the zenith of his power under al-Manṣūr (136—158) who, finding him a capable and useful courtier, appointed him *ḥadīb* and afterwards made him his *wazīr* in succession to Abū Aiyūb al-Mawriyānī. His son al-Faḍl b. al-Rabiʿ, who was destined to play a prominent part in the forthcoming intrigues against the house of Barmak, took his father's duties as *ḥadīb*. After the foundation of Baghdād, the new town was divided into four quarters, one of which was given in fief by al-Manṣūr to al-Rabiʿ and was thus named after him (*kaṣīʿat al-Rabiʿ*).

During the reign of al-Mahdī (158—169), his influence seems to have dwindled for some time. ʿAbd Allāh b. Abī ʿObaid Allāh (known as Abū ʿObaida) became *wazīr*. Hence al-Rabiʿ participated in an intrigue which led to the downfall of his rival by exposing his son as a heretic (*zindīq*) in 163 (779—780). Even then al-Rabiʿ only retained his old office as *ḥadīb* and never became Mahdī's *wazīr*. It was ʿAbd Allāh Abū Yaʿqūb b. Dāwūd who succeeded the disgraced minister. On al-Ḥādī's accession (169 = 785), however, al-Rabiʿ was once more promoted to that dignity, but only for a period, after which he was entrusted with a secretaryship for the Caliph's *dīwān* (*dīwān al-ʿazīmma*). He remained in this capacity until his death after a short illness lasting eight days. His sudden end gave rise to the suggestion that he was poisoned by al-Ḥādī, but this is discredited by the most authentic sources. The exact date of his death is uncertain. While al-Djahshiyārī and al-Ṭabarī place it in 169, al-Khaṭīb al-Baghdādī and Ibn Khallikān assert that he died at the beginning of 170 (786).

THE ENCYCLOPAEDIA OF ISLAM, III.

Details about his administration are scanty, but it is certain that he was an able, industrious, temperate and tactful man of affairs. Even al-Mahdī, who was never lavish in showering favours on al-Rabiʿ, once described him as the model of a good administrator (Yaʿqūbī, ii. 486). The literary sources, however, do not single him out as a patron of letters, a quality which both his ʿAbbāsīd masters and his Barmak successors possessed with distinction.

RĀBĪʿA AL-ʿADAWĪYA, a famous mystic and saint of Baṣra, a freedwoman of the Āl ʿAtik, a tribe of Kaīs b. ʿAdī, known also as al-Kaisiyya, born 95 (713—714) or 99, died and was buried at Baṣra in 185 (801). A few verses of hers are recorded: she is mentioned, and her teaching quoted, by most of the Ṣūfī writers and the biographers of the saints.

Born into a poor home, she was stolen as a child and sold into slavery, but her sanctity secured her freedom, and she retired to a life of seclusion and celibacy, at first in the desert and then in Baṣra, where she gathered round her many disciples and associates, who came to seek her counsel or prayers or to listen to her teaching. These included Mālik b. Dīnār, the ascetic Rabāḥ al-Kais, the traditionist Sufyān al-Thawrī and the Ṣūfī Shaḥṭk al-Balkhī. Her life was one of extreme asceticism and otherworldliness. Asked why she did not ask help from her friends, she said, "I should be ashamed to ask for this world's goods from Him to Whom it belongs, and how should I seek them from those to whom it does not belong"? To another friend she said, "Will God forget the poor because of their poverty or remember the rich because of their riches? Since He knows my state, what have I to remind Him of? What He wills, we should also will". Miracles were attributed to her as to other Muslim saints. Food was supplied by miraculous means for her guests, and to save her from starvation. A camel which died when she was on pilgrimage, was restored to life for her use; the lack of a lamp was made good by the light which shone round about the saint. It was related that when she was dying, she bade her friends depart and leave the way free for the messengers of God Most

High. As they went out, they heard her making her confession of faith, and a voice which responded, "O soul at rest, return to thy Lord, satisfied with Him, giving satisfaction to Him. So enter among My servants into My Paradise" (Sūra lxxxix. 27-30). After her death Rābī'ā was seen in a dream and asked how she had escaped from Munkar and Nakir, the angels of death, when they asked her, "Who is your Lord?", and she replied, "I said, return and tell your Lord, 'Notwithstanding the thousands and thousands of Thy creatures, Thou hast not forgotten a weak old woman. I, who had only Thee in all the world, have never forgotten Thee, that Thou shouldst ask, Who is thy Lord?'"

Among the prayers recorded of Rābī'ā is one she was accustomed to pray at night upon her roof: "O Lord, the stars are shining and the eyes of men are closed and kings have shut their doors and every lover is alone with his beloved, and here am I alone with Thee". Again she prayed, "O my Lord, if I worship Thee from fear of Hell, burn me therein, and if I worship Thee in hope of Paradise, exclude me thence, but if I worship Thee for Thine own sake, then withhold not from me Thine Eternal Beauty". Of Repentance, the beginning of the Ṣūfī Path, she said, "How can anyone repent unless his Lord gives him repentance and accepts him? If He turns towards you, you will turn towards Him". She held that Gratitude was the vision of the Giver, not the gift, and one spring day, when urged to come out to behold the works of God, she rejoined, "Come rather inside to behold their Maker. Contemplation of the Maker has turned me aside from contemplating what He has made". Asked what she thought of Paradise, Rābī'ā replied, "First the Neighbour, then the house" (*al-djār thumma 'l-dār*) and Ghazālī, commenting on this, says she implied that no one who does not know God in this world will see him in the next, and he who does not find the joy of gnosis here will not find the joy of the Vision there, nor can anyone appeal to God in that world if he has not sought His friendship in this. None may reap who has not sown (*Ihyā*², iv. 269). The otherworldliness of her teaching is shewn in her declaration that she had come from that world and to that world she was going, and she ate the bread of this world in sorrow, while doing the work of that world. One who heard her said derisively, "One so persuasive in speech is worthy to keep a rest-house" and Rābī'ā responded, "I myself am keeping a rest-house; whatsoever is within, I do not allow it to go out and whatever is without, I do not allow to come in. I do not concern myself with those who pass in and out, for I am contemplating my own heart, not mere clay". Asked how she had attained to the rank of the saints, Rābī'ā replied, "By abandoning what did not concern me and seeking fellowship with Him Who is eternal".

She was famed for her teaching on mystic love (*maḥabbā*) and the fellowship with God (*uns*) which is the pre-occupation of His lover. Every true lover, she said, seeks intimacy with the beloved, and she recited the lines:

"I have made Thee the Companion of my heart,
But my body is present for those who seek
its company,

And my body is friendly towards its guests.
But the Beloved of my heart is the guest of
my soul".

(*Ihyā*², iv. 358, margin)

She demonstrated the need for disinterested love and service by taking fire in one hand and water in the other and saying, when asked the meaning of her action, "I am going to light fire in Paradise and to pour water on to Hell, so that both veils may be taken away from those who journey towards God, and their purpose may be sure and they may look towards their Lord without any object of hope or motive of fear. What if the hope of Paradise and the fear of Hell did not exist? Not one would worship his Lord or obey Him" (Aḥāki, *Ma-nāqib al-Ārifin*, India Office, N^o. 1670, fol. 114^a). Questioned about her love for the Prophet she said, "I love him, but love of the Creator has turned me aside from love of His creatures", and again, "My love to God has so possessed me that no place remains for loving any save Him". Of her own service to God and its motive-force she said, "I have not served God from fear of Hell, for I should be but a wretched hireling if I did it from fear; nor from love of Paradise, for I should be a bad servant, if I served for the sake of what was given me, but I have served Him only for the love of Him and desire of Him". Her verses on the two types of love, that which seeks its own ends and that which seeks only God and His glory, are famous and much quoted:

"In two ways have I loved Thee, selfishly,
And with a love that worthy is of Thee.
In selfish love my joy in Thee I find,
While to all else, and others, I am blind.
But in that love which seeks Thee worthily,
The veil is raised that I may look on Thee.
Yet is the praise in that or this not mine,
In this and that the praise is wholly Thine".

Ghazālī again comments, "She meant, by the selfish love, the love of God for His favour and grace bestowed and for temporary happiness, and by the love worthy of Him, the love of His Beauty which was revealed to her, and this is the higher of the two loves and the finer of them" (*Ihyā*², iv. 267). Like all mystics, Rābī'ā looked for union with the Divine (*waṣl*). In certain of her verses she says, "My hope is for union with Thee, for that is the goal of my desire", and again she said, "I have ceased to exist and have passed out of self. I have become one with God and am altogether His".

Rābī'ā, therefore, differs from those of the early Ṣūfis who were simply ascetics and quietists, in that she was a true mystic, inspired by an ardent love, and conscious of having entered into the unitive life with God. She was one of the first of the Ṣūfis to teach the doctrine of Pure Love, the disinterested love of God for His own sake alone, and one of the first also to combine with her teaching on love the doctrine of *Kashf*, the unveiling, to the lover, of the Beatific Vision.

(MARGARET SMITH)

RABĪB AL-DAWLA ABŪ MANṢŪR B. ABĪ SHUDJĀʿ MUḤAMMAD B. AL-ḤUSAIN, a vizier. When the vizier Abū Shudjāʿ Muḥammad al-Rūdhrawārī [q. v.] made the pilgrimage to Mecca in 481 (1089) he appointed his son Rabīb al-Dawla and the *naḳīb al-nuḳabāʾ* Tīrād b. Muḥammad al-Zainabī his deputies and in 507 (1113—1114) on the death of Abū ʿl-Kāsim ʿAlī b. Fakhr al-Dawla Muḥammad b. Djahīr [see the article IBN DJAHĪR, 3] Rabīb al-Dawla was appointed vizier of the caliph al-Mustazhir [q. v.]. In Dhū ʿl-Ḥijda 511 (April 1118) the fourteen year old Maḥmūd b. Muḥammad succeeded his father as Saldjuḳ sultān and, when he was looking around for an able vizier, he was recommended to choose some one who had had the necessary training in the service of the caliph (*min tarbiyat dār al-khilāfa*), because there was no suitable man in the train of the young sultān. The choice therefore fell upon Rabīb al-Dawla who was at once summoned from Baghdad to Iṣfahān and, as we know from al-Bundarī also, proved himself in every way fit for his difficult task. But his tenure of office was of short duration: he died in Rabiʿ I 513 (June—July 1119); according to another statement he died as early as 512 (1118—1119).

RĀBĪṬA. [See RĪBĀṬ.]

RAḌĀʿ or RĪPĀʿ, also RAḌĀʿA (A.), suckling; as a technical term, the suckling which produces the impediment to marriage of foster-kinship. It is to be supposed that the idea of foster-kinship was already prevalent among the ancient Arabs (cf. Robertson Smith, *Kinship and Marriage in Early Arabia*², p. 176, 196, note 1); this is evident from, among other things, the way in which the prescription of the Qurʾān regarding this is interpreted in Tradition. In Sūra iv. 23, among the female relatives with whom marriage is forbidden are the foster-mother and the foster-sister. This must correspond exactly to the old Arab usage, which regarded blood-relationship also only in these two degrees as an impediment to marriage (cf. Robertson Smith, *loc. cit.*). But as the Qurʾān in the passage quoted extends the circle of prohibited relationships beyond that of blood-relationship, foster-kinship was treated accordingly contrary to the unambiguous language of the passage. To justify this, it is frequently laid down in traditions, in keeping with the principle of the old Arab attitude, that foster-kinship is an impediment in the same degrees as blood-relationship. The isolated case, which is decisive for the principle, that of the prohibition of marriage with the daughter of a foster-brother, is brought into

close personal relationship with the Prophet. Through the prohibition of marriage laid down in Tradition between the foster-children of two wives of the same man, relationship by marriage becomes included in foster-relationship, and in the tradition which expounds the verse of the Qurʾān quoted, foster-kinship is given among the impediments to marriage on the ground of relationships in law. As a justification for this prohibition it is stated that the *semen genitale* (which the milk has produced) is the same; against the view that blood-relationship is not to be combined with foster-kinship, so that the brother of the husband of the foster-mother is not to be regarded as a foster-relation, there is a polemic in a tradition (*Kanz al-Ummāl*, iii., No. 3911). The question of the amount of suckling necessary to produce foster-relationship is a very old point of dispute; some traditions do not consider isolated sucks by the suckling or one or two acts of suckling as sufficient, others demand not less than seven acts of suckling, others again say that the child must be fed entirely; on the other side, one group of traditions says the prohibition of marriage is the same whatever the amount of suckling that has been given. There is even said to have been a passage in the Qurʾān which in the older, later abrogated, version demanded ten feedings and in the later version five. This story which was obviously only intended to support this view is not trustworthy (cf. Nöldeke-Schwally, *Geschichte des Qurʾāns*, i. 253 *sq.*; *Kanz al-Ummāl*, No. 3,923 *sqq.*). That the practice of suckling adults in order to establish an artificial foster-kinship existed is certain; it is recognised by several traditions and by others directly or indirectly denied (by the legal maxim: *al-raḍāʿa min al-maḍjāʿa*, "suckling demands hunger"). The chief case for the validity of such an act of suckling is described as a privilege granted by the Prophet personally (*Kanz al-Ummāl*, No. 3,919) and even the suckling of children to establish an impediment to marriage is in an isolated case described as illegal (*ibid.*, No. 3,885). To prove foster-kinship many traditions are content with the testimony of the foster-mother with or even without oath or with the testimony of a woman simply or with that of a man and of one woman; in refutation of this anomaly, obviously at one time permitted, another group of traditions demands the normal testimony of two men or of one man and two women. These points of difference found in tradition are continued in the differences of opinion among the older jurists. The views of the principal authorities are given in al-Shawkānī, *Nail al-Awṭār*, Cairo 1345, vii. 113 *sqq.* The most important new point in dispute, discussed in this later period but scarcely touched upon in the traditions, is the period within which foster-kinship can be established by a child; sometimes it is said to be the period till weaning, sometimes the whole of childhood without an exact limitation, sometimes the fixed period of two years, or 2½ or 3 or 7 years; for the period of two years the authority of the Qurʾān is quoted, Sūra ii. 233 ("Mothers shall suckle their children two full years if they wish to carry through the suckling to its end") (on the details cf. al-Shawkānī, *op. cit.*, p. 120). The four regular Sunnī law-schools are agreed that foster-relationship exists between a man and all his descendants on the one side and his nurse, all her foster- and blood-relatives, her husband and all his foster- and blood-relations on

the other; on the other hand, no foster-relationship is assumed between a man and the ascendants or lateral relatives of his foster-brothers and sisters and between the nurse and the ascendants or lateral relatives of her foster-child. The Ḥanafis and the Mālikis demand no definite minimum period, the Shāfi'is however five acts of suckling. The period for feeding is with the Mālikis (unless previously weaned), the Shāfi'is and Ḥanbalis two years, with the Ḥanafis 2½ years; the Zāhiris also recognised the suckling of an adult. To establish the foster-relationship the Shāfi'is are content with the testimony of four women, the Mālikis with the evidence of two, if the fact is well known, and the Ḥanafis with the evidence of one woman.

Prominent Meccans have retained since before Islām to the present day the custom of having Beduin nurses for their children (cf. Lammens, *La Mecque à la veille de l'hégire*, p. 101). The custom very common in the early period of Islām of hiring nurses in return for food and clothing has resulted in this arrangement, which is not in itself in accordance with the demands of the law, becoming recognised. In one tradition it is recommended that gratitude should be shown to a nurse by giving her a slave, male or female. The suckling of children by the mother or a hired nurse in a case where the marriage is dissolved is fully regulated on the basis of the Qur'ānic passage, Sūra ii. 233.

RĀḌHANPŪR, a Muslim state in India now included in the Western India States Agency and situated to the south-west of Pālanpūr.

The rulers of Rāḍhanpūr trace their descent from a Muslim adventurer who came to India from Ispahān about the middle of the xviith century. His descendants became *fawjdār*s and farmers of revenue in the Mughal province of Guḍjarāt [q.v.]. Early in the xviiith century Djawān Mard Khān Bābi, the head of the family at that time, received a grant of Rāḍhanpūr and other districts (*Mir'āt-i Aḥmadi*, Ethé, No. 3599, fol. 742). With the decline of the Mughal empire these districts passed into the hands of the Marāṭhās, but the Bābi family were confirmed in the possession of Rāḍhanpūr by Damādji Rāo Gaekwār.

British relations with Rāḍhanpūr date back to the year 1813 (Aitchison, vi., c.). Some years later the British were called upon to rid Rāḍhanpūr of plundering tribes from Sind who were committing serious depredations in the nawāb's territories. In return for this the nawāb agreed to become a tributary of the British government, but a few years later this tribute was remitted because it was felt that the state was unable to bear the expense. After the Mutiny, in 1862, the ruler of Rāḍhanpūr received an adoption *sanad* from the governor-general (*op. cit.*, cii.). It was not until 1900 that the Djorawarsai currency previously in use was discontinued and replaced by British currency.

To-day Rāḍhanpūr covers an area of 1,150 square miles and supports a population of 70,530, of whom only 8,435 are Muḥammadans. The town

of Rāḍhanpūr, the capital of the state, has a total population of 11,225, of whom 3,694 are Muḥammadans (1931 Census Report).

(C. COLLIN DAVIES)

AL-RĀḌĪ BI 'LLĀH, ABU 'L-ʿABBĀS AḤMAD (MUḤAMMAD) B. AL-MUKṬADIR, the twentieth ʿAbbāsīd caliph. He was born in Rabi' II 297 (Dec. 909); his mother was a slave named Zālūm. He was proposed for the caliphate immediately after the assassination of his father al-Mukṭadir [q.v.] but the choice fell upon al-Kāhir [q.v.]. The latter had him thrown into prison; after the fall of al-Kāhir, he was released and put upon the throne (Djumādā I 322 = April 934). As his adviser in this difficult period al-Rāḍī chose al-Mukṭadir's vizier ʿAlī b. ʿIsā [see the art. IBN AL-DJARRĀḤ, 2] who however asked to be excused on account of his great age, whereupon Ibn Muḥla [q.v.] was given the office. The most influential official however continued to be Muḥammad b. Yāḳūt [q.v.] and only after his fall in Djumādā I 323 (April 935) did Ibn Muḥla gain control of the administration while the caliph himself fell completely into the background. But Ibn Muḥla's rule did not last long; in Djumādā I 324 (April 936) he was seized by al-Muzaḥḥar b. Yāḳūt, brother of the above-mentioned Muḥammad, and the impotent caliph had to dismiss him and in the same year summon the governor of Wāsiṭ and Baṣra, Muḥammad b. Rāʾīḳ [q.v.], to Baghdād and entrust him with complete authority as *amir al-umarāʾ*. This meant a complete breach with the past; the caliph was only allowed to retain the capital and its immediate vicinity and to abandon all influence on the business of government, while Ibn Rāʾīḳ in combination with his secretary decided all the more important questions. Ibn Rāʾīḳ held power for nearly two years; his name was actually mentioned in the *khutba* for the reigning dynasty along with that of the caliph; in Dhu 'l-Ḳa'da 326 (Sept. 938) however, he was replaced by Bedjken [q.v.].

To the financial difficulties and the constant quarrels of the viziers and emirs there was now added war with foreign foes. In 323 (935) al-Rāḍī endeavoured to remove from office the governor of al-Mawṣil Nāṣir al-Dawla [q.v.], but failed, and a few years later Bedjken, accompanied by the caliph, attacked the Ḥamdānids in order to force them to pay tribute levied upon them but had to make peace because the fugitive Ibn Rāʾīḳ suddenly appeared in Baghdād. The war with the Byzantines was also continued; the Ḥamdānids however in this war came forward as defenders of Islām. In Egypt Muḥammad b. Tuḡhdj founded the dynasty of the Ikhshidids [q.v.] and at the same time Bedjken had to fight with the Būyids who were advancing on several sides and a few years later victoriously entered Baghdād.

In the capital itself al-Rāḍī had to take measures against the fanatical Ḥanbalis (323 = 935), who had many followers among the common people and committed all kinds of excesses. They entered private houses, destroyed musical instruments, ill-treated women singers, poured away wine that they found, interfered in business, annoyed passers-by in the streets, beat Shāfi'is and generally behaved as arbitrarily as if they represented a kind of tribunal of the Inquisition.

Al-Rāḍī died in the middle of Rabi' I 329 (Dec. 940) of dropsy. The Arab historians praise his

piety, justice, clemency and generosity as well as his interest in literature and it is said of him, for example (Ibn al-Tiṭṭakā, *al-Fakhri*, p. 380): "He was the last caliph, by whom a collection of poems exists, the last who retained his independence as a ruler, the last to preach a sermon from the pulpit on Fridays, the last to mix freely with his friends and to welcome men of learning, and the last who followed the principles of the earlier caliphs as regards rank, tokens of favour, servants and chamberlains". This characterisation may well be correct in its main lines but al-Radī was not independent; he was on the contrary a ready tool in the hands of his viziers and emirs.

RADIF. [See REDIF.]

RADJA. [See RUDJU.]

RADJAB (A.), the name of the seventh month in the Muslim calendar. In the Dīhālīya it introduced the summer half year until, as a result of the abolition of the intercalated months, the months ceased to fall regularly at the same season of the year [see AL-MUHARRAM and NASĪ']. The month was a sacred one; in it the 'umra [q. v.], the essentially Meccan part of the pre-Muhammadan ceremonies of pilgrimage, took place. The peace of Allāh therefore prevailed in it; the forbidden war which was fought in Radjab between Kuraish and Hawāzin and in which the young Muhammad took part is called *Fidjār* (perfidy) [q. v.].

In the Qur'ān, as recorded in the article AL-MUHARRAM, only "the" holy month is mentioned and not the four which have become traditional from the sole reference ix. 36. If the reference in Sūra v. 2, is to the 'umra we can therefore understand why the commentators in part identify the holy month mentioned in this verse with Radjab.

In Islām the month attained great importance through the memory of the Prophet's night journey to heaven which in later times was put on the 27th of the month (on the original dates see MĪ'RADJ). This night is therefore called *Lailat al-Mi'rādj* and is celebrated with readings of the legends of the ascension.

(M. PLESSNER)

RADJM (A.), the casting of stones. *R-dj-m* is a Semitic root, derivatives from which are found in the Old Testament with the meaning of "to stone, to drive away or kill by throwing stones" an abominable creature; *radjma* is "a heap of stones, an assembly of men, cries, tumult". — In Arabic, the root means "to stone, to curse"; *radjamun*, "heap of stones", also means simply the stones placed upon tombs either as flagstones or in a heap, a custom which ḥadīth condemns and recommends that a grave should be level with the surface of the ground. On the ḥadīth of 'Abd Allāh b. Mughfal, it is discussed whether *lā turadji-djimū ḥabrī* means "do not build my grave in a mound" or "do not utter imprecations there". — The lapidation and heaps of stones at Minā are called *djamra*, and *djamarāt al-'arab* means the groups of Beduin tribes; we find there the two old meanings of the root which can be taken back to *dj-m*, in Arabic *djamma* and *djama'a* "to reunite". The Arab grammarians derive *djamra* "lapidation" from *djamarāt al-'arab*; and we have to remember the double meaning of *radjm* and a metathesis from *djamr(a)* = *radjm*.

In addition to the meaning of "ritual stoning as a punishment for fornication", *radjm* means the casting of stones at Minā, which is one of the pre-Muhammadan rites preserved by Muḥammad and inserted among the ceremonies of the pilgrimage. We may here refer the reader to the articles DJAMRA, ḤADJDI and MINĀ with their bibliographies.

The Qur'ān does not mention this rite; but it knows *radjama* in its Biblical sense of "stoning of prophets by unbelievers", and also *radjm* (= *marđūm*) as an epithet of Satan, "driven away and struck with projectiles of fire by the angels", and lastly (xviii. 21) in an abstract sense which indicates a long semantic evolution.

The rite of casting stones at Minā was regulated by ḥadīths in the classical collections. There is a model *ḥadjdj*, that of the Prophet which we find in the manuals of *manāsik al-ḥadjdj*, e.g. in the *Risāla* of Ibn Taimiyya (cf. Rif'at, i. 89 sqq.). Some ḥadīths of archaic form (e.g. Bukhārī, *Nikāḥ*, b. 2; *Salam*, b. 1 and 2; *Umda*, viii. 489) show that Muḥammad had to lay down rules for the essential question of the *wukūf*, the culmination of the *ḥadjdj*. The *Hums*, i.e. the Kuraish and their allies, observed it at Djam' (Muzdalifa), in the *ḥaram*; the others, the 'Arab, at 'Arafa, outside of the *ḥaram* of Mecca. Having to choose between his companions of two different origins, the *Muhādžirūn* and the *Anṣār*, Muḥammad decided with the latter for 'Arafa; but he retained a secondary *wukūf* at Muzdalifa, and the two *ifāda*, the new combination of rites culminating in the throwing of stones at 'Aḳaba.

Situated at the bottom of the valley of Minā, on the slope of the defile towards Mecca, al-'Aḳaba is "not in Minā but it is its boundary on the side of Mecca" ('*Umda*, iv. 770). On the morning of the 10th *Dhu 'l-Hidjdja* the pilgrim goes down into the valley, passes without saluting them in front of the great *djamra*, 500 yards farther on to the middle one, and 400 yards beyond he comes to *djamrat al-'Aḳaba* (Rif'at, i. 328). There he throws 7 stones and this is one of the four ceremonies which on the tenth day are intended to remove his state of sanctity. He must also have his hair shaved (*ḥalq*), sacrifice a victim (*naḥr*)

and return in procession to Mecca (*ifāda*). This last rite prepares the sexual deconsecration; the three others together abolish the prohibitions of the *ḥadjj* but the legists are not agreed on the order in which they have to be accomplished. The *ḥadīth*s say that the Prophet replied to the pilgrims who were worried, not having followed the order in which he had himself followed them: *tā ḥaradja*: "no harm (in that)" (Bukhārī, *Ḥadjj*, b. 125, 130 etc.). It is explained that the Prophet on this day of rejoicing did not wish to hurt the feelings of the ignorant Beduins. We may imagine that these 'Arab did not follow the customs of the Quraysh and that Muḥammad had neither the time nor the inclination to impose his own choice between the varying customs.

Muḥammad began with the lapidation at al-Aḥaba. After the *ḥalk*, the sacrifice and the *ifāda*, he returned to spend the night in Minā. Then on the 11th, 12th and 13th, he cast 7 stones at the three *ḍjamarāt* ending with that of al-Aḥaba. The pilgrims imitating him ought therefore to throw $7 + (7 \times 3) 3 = 70$ stones. But in general they take advantage of the liberty (*rukḥṣa*) given them by the *ḥadīth* to leave Minā finally on the 12th and therefore only to throw $7 + (7 \times 2) 3 = 49$ stones. It is probable that there was no ancient usage; the presence of the bodies of the sacrificial victims made Minā a horrible place. It is difficult to see how Wavell (*Pilgrim*, p. 202) threw 63 stones, i. e. $(7 \times 3) 3$; this is however the number of victims which, according to tradition, Muḥammad sacrificed with his own hand, one for each year of his life.

The stoning of al-Aḥaba is done on the 10th by the pilgrims in *ihṛām*; those of the three days following by the deconsecrated pilgrims. The whole business is not a fundamental element of the pilgrimage (*rukṇ*).

Little stones are thrown, larger than a lentil, but less than a nut, what the old Arabs called *ḥaṣa 'l-khadhf* which were thrown either with the fingers or with a little lever of wood forming a kind of sling (*mikḥdhafa*: Tirmidhī, iv. 123). A *ḥadīth* forbids this dangerous game, which might knock out an eye but is not strong enough to kill an enemy: it must therefore have had something magical or pagan in its character. The stones have to be collected of the proper size and not broken from a rock. Gold, silver, precious stones etc. are condemned; but some texts allow, in addition to date-stones, a piece of camel-dung or a dead sparrow which we find are the means used by the women of the Djāhiliya at the end of their period of isolation to remove the impurity of their widowhood and prepare a new personality. — It is recommended that the 7 stones for the lapidation of al-Aḥaba should be gathered at the *maṣḥ'ar al-ḥaram* at Muzdalifa, outside of Minā. As a rule the 63 others are gathered in the valley of Minā, but outside of the mosque and far from the *ḍjamarāt* to avoid their having already been used (Ibn Taimiyya, p. 383). Besides it is thought that stones accepted by Allāh are carried away by angels. — Stones collected but not used should be buried; they have assumed a sacred character which makes them dangerous.

The model pilgrimage of the Prophet fixed the time of the *ḍjamarat al-Aḥaba* for the day of the 10th. It shows him beginning the *ifāda* of Muzdalifa after the prayer at dawn (*ṣaḍṣir*) and casting the

stones after sunrise. But by survival of an ancient custom more than for reasons of convenience other times are allowed by law. Al-Shāfi', against the three other imāms, permits the 'Aḥaba ceremony before sunrise (Rif'at, i. 113); in general, the time is extended to the whole morning (*duḥan*), till afternoon (*zawāl*), till sunset, till night, till the morning of the day following: these infractions of the normal routine are atoned for by a sacrifice or alms, varying with the different schools. — The *ḍjamarāt* of the three days of the *tashriḥ* take place in the *zawāl*: here again there are various opinions (Bukhārī, *Ḥadjj*, b. 134). — In fixing the time of the lapidations the law has always endeavoured to avoid any Muslim rite, e. g. prayer, coinciding with one of the three positions of the sun by day, rising, noon, setting. A. J. Wensinck has shown (*E. I.*, ii. 200) the probability of the solar character of the pagan *ḥadjj*.

Muḥammad made his lapidation at al-Aḥaba from the bottom of the valley, mounted on his camel, turned towards the *ḍjamma*, with the Ka'ba on his left and Minā on his right, standing at a distance of five cubits (eight feet). But there are other possible positions. — Rif'at (i. 328) gives the *ḍjamma* the following dimensions: 10 feet high and 6 feet broad on a rock 5 feet high (see the photographs, *ibid.*). It is said to have been removed at the beginning of Islām and replaced in 240 (854—855) (Azraqī, p. 212). — Muḥammad made the lapidations of the other two *ḍjamarāt* on foot turning towards the *ḥibla*. In brief, the stones are cast in the attitude one happens to be in. The position facing the Great Devil is explained by the nature of the ground, but it would also be in keeping with the idea of a curse cast in the face of a fallen deity. The position which makes the pilgrim turn towards the Ka'ba is due to the Muslim legend of the tempter Satan and to the rule of the *takbīr* which will be explained below.

According to the *sunna*, the stones are placed on the thumb and bent forefinger and thrown, one by one, as in the game of marbles. However the possibility of the stones having been thrown together in a handful has been foreseen, and it was decided that this should only count as one stone and that the omission could be made good. — The stone should not be thrown violently nor should one call "look out! look out!" (Tirmidhī, iv. 136), a pagan custom which the modern Beduins still retained quite recently (Rif'at, i. 89). It seems that Muḥammad put some strength into it for he raised his hand "to the level of his right eyebrow" (Tirmidhī, iv. 135) and showed his armpit (Bukhārī, *Ḥadjj*, b. 141).

In Islām the casting of each stone is accompanied by pious formulae. It is generally agreed that the *talbiya* is no longer pronounced at 'Arafa or at least before the lapidation of al-Aḥaba (Bukhārī, *Ḥadjj*, b. 101); some writers however approve of it after al-Aḥaba. The *tahlīl* and *tasbīḥ* are permitted, but it is the *takbīr* which is recommended (Ibn Taimiyya, p. 382; Bukhārī, *Ḥadjj*, b. 138 and 143). The spiritual evolution of the rites even sees in this the essential feature of the rite, the throwing of the stone and the figure formed in throwing it by the thumb and forefinger forming an 'uḍ which represents 70, being no more than symbolical and mnemonical gestures. "The throwing of the stones was only instituted to cause the name of God to be repeated" (Tirmidhī, iv. 139)

To Ghazālī (*Iḥyā*, i. 192) it is an act of submission to God and of resistance to Satan who seeks to turn man away from the fatigues of the *ḥadjj* but the rite is without rational explanation *min ḡhairi ḥaḡḡin li 'l-aḡli wa 'l-naḡsi fihi* (cf. Goldzihér, *Richtungen*, p. 252). — The devout man adds a prayer (*du'ā*) which is as a rule quasi-ritual. The usual one is: *Allāhumma 'djalhu ḥadjḡjan mabrūran wa-dhanban maḡḡfūran wa-sa'yan maḡḡkūran* "Lord, make this pilgrimage a pious one, pardon our sins and recompense our efforts!". There is, as matter of fact, after the stoning a halt, a *wuḡūf*, before the two higher *djamarāt*, that at the second being especially long: the duration is calculated by the recitation of the *sūra* of the Cow (II), or of Joseph (XII), or of the family of 'Imrān (III) by altering the indication in the *ḥadjj* (Bukhārī, *Ḥadjḡj*, b. 135, 136 and 137). This would take the place of an ancient ceremony of imprecation.

Breaches of the rules for the performance of these diverse ceremonies, especially as regards the number of stones thrown and the time when they are thrown (*Umda*, iv. 767 *sqq.*; Rif'at, i. 113), are punished by atonements the exact nature of which the legists delight to vary from the sacrifice of a victim to the giving of a *mudd* of food in alms.

The Muslim teachers have sought to explain the lapidations of Minā. Some exegists (e.g. Ṭabarī, *Tafsīr*, xxv. 167) have seen quite clearly that they represent ancient rites and have compared the *ramy* of the tomb of Abū Ridjāl. Others are known, for example at the well of Dhū 'l-Hulaifa (Lammens, *Bétyles*, p. 94). The works quoted (*E. I.*) show the spread of this rite and the cases in which we are certain that it is a question of the driving away or the expulsion of evil; they might be further added to. Stones used to be thrown behind an individual whom one wished never to return (Hamadhānī, *Maḡāmāt*, ed. Bairūt, p. 23). At Alexandria, tired people used to go and lie down on a fallen pillar, throw 7 stones behind them on a pile "like that of Minā", then go away quite recuperated (Ḳalkashandī, *Ṣubḡ al-A'shā*, iii. 322). But comparisons would take us out of Arabia (Lods, *Prophètes d'Israël*, p. 354).

Popular legend has connected the lapidation like many other rites with Abraham. It was Abraham or Hagar or Ishmael or even Muḡammad that Satan wished to deter from accomplishing the rites of the *ḥadjḡj* and who chased him away with stones. If we conclude that he is *raḡḡim*, we are some way to the explanation of *Sūra* lxvii. 5 (cf. above).

One would like to be able to locate the lapidations among the rites of the pre-Islāmic pilgrimage. One would first have to have a clear idea of the meaning and details of the ceremonies and of the part played by lapidations and sacred piles of stones in Semitic and Mediterranean antiquity. — Stoning seems to have been a rite of expulsion of evil which coincided with the de consecration of the pilgrim and seems to protect his return to everyday life. It is possible that lapidations at one time followed the sacrifices which perhaps took place at 'Arafa and Muzdalifa.

RĀDJPŪTS, inhabitants of India, who claim to be the modern representatives of the Kshatriyas of ancient tradition. (From the Sanskrit *rādjaputra* "a king's son". For the connection between Rādjanya and Kshatriya see Macdonell and Keith, *Vedic Index*, i., s. v. Kshatriya). The term Rādjput has no racial significance. It simply denotes a tribe, clan, or warlike class, the members of which claim aristocratic rank, a claim generally reinforced by Brahman recognition.

The origin of the Rādjput is a problem which bristles with difficulties. The theory which at present holds the field is that propounded by Bhandarkar, Smith and Crooke. According to this theory the Rādjput can be divided into two main classes, the foreign and the indigenous. The foreign clans, such as the Čauhāns, Čalukyās, and Gurdjārās, are the descendants of invaders of the vth and vith centuries of the Christian era. The indigenous Rādjput include the Rāshtrakūtas of the Deccan, the Rāthors of Rādjputāna proper, and the Čandēls and Bundēlas of Bundēlkhand.

The theory that certain Rādjput clans are of foreign extraction is chiefly based on Rādjput legends and folklore according to which there are three branches of Rādjput: the Sūradjbansi, or Solar race; the Čandrabansi, or Lunar race; and the Agni Kula, or Fire-group. The legend relates how the Agni Kula Rādjput, that is, the Čauhāns, Čalukyās, Parihārs (Pratihāras), and the Pramāra, originated in a fire-pit around Mount Abu in southern Rādjputāna. From this it has been concluded that the four clans in this group are related and that the fire-pit represents a rite of purification by which the taint of foreign extraction was removed. Since these writers believed the Parihārs to be invaders of Gūdjār stock, it was concluded that the other three Agni Kula clans were also invaders.

According to Smith the Gurdjārās were invaders who founded a kingdom around Mount Abu. In time the rulers of this kingdom who were known as Gurdjārā-Pratihāras conquered Kanawḡj and became the paramount power in northern India about 800 A.D. Smith contends that the Pratihāras were a clan of the Gurdjārā tribe. This seems to be the chief evidence produced by these writers for the foreign extraction of certain Rādjput clans.

It seems wrong to base this theory of foreign descent principally upon the Agni Kula legend, for Waidya and other writers have proved this to be a myth first heard of in the *Prithwīrāḡj-rāisā* of the poet Čand who could not have composed this work before the xiiith century A.D. Recent research has brought to light the fact that the inscriptions of the Pratihāras and Čauhāns before the xiiith century represent them as Solar Rādjput, while the Čalukyās are represented as of the Lunar race. The Agni Kula legend does not therefore deserve the prominence given to it by Smith and other writers. Even the contention that the Pratihāras were a branch of the Gurdjārā tribe has met with much hostile criticism.

According to the orthodox Hindu view the Rādjput are the direct descendants of the Kshatriyas of the Vedic polity, but this claim is based on fictitious genealogies. The Kshatriyas of ancient India disappear from history and this can probably be explained by invasions from Central Asia which shattered the ancient Hindu polity. It is accepted that these invading hordes, such as the Yüeh-ti and Hūnas, became rapidly Hinduized, and that

their leaders assumed Kshatriya rank and were recognized as such. Out of this chaos arose a new Hindu polity with new rulers, and the families of invaders which became supreme were recognized as Kshatriyas or Rādjputs. In later times many chiefs of the so-called aboriginal tribes also assumed the title of Rādjput.

It is therefore safe to assert that the Rādjputs are a very heterogeneous body and probably contain some survivors of the older Kshatriyas. A mass of legend arose assigning to the various septs a descent from the sun and the moon, or from the heroes of the epic poems. These are the legendary pedigrees recorded in great detail by Tod. The main argument which can be brought forward in support of the foreign descent of certain Rādjput clans is the incorporation of foreigners into the fold of Hinduism to which the whole history of India bears testimony. Even though the Agni Kula legend be discredited it is still possible to argue that the Rādjputs are not a race. Anthropologically they are definitely of mixed origin. That some Rādjputs were of foreign origin can be proved by the acceptance of the Hūnas in the recognized list of Rādjput tribes.

Whatever may be the origin of the Rādjputs we know that disorder and political disintegration followed the death of Harsha, and that until the Muslim invasions of northern India the chief characteristic of this period was the growth and development of the Rādjput clans. Except for about two hundred years, when the Gurdjara-Pratihāras were the paramount power in Hindustān, there was constant internecine warfare between the various Rādjput kingdoms. This weakness considerably facilitated the Muslim conquest. It was not however until the days of Muḥammad of Gḥḥr that the Rādjput dynasties in the plains were finally overthrown [see above, iii. 742b]. Driven from Dihli and Kanawdj they retreated into modern Rādjputāna where they eventually built up a strong position and were able to resist the Muslim invader, for it cannot be said that the Sultans of Dihli ever really subdued the Rādjputs of Rādjputāna. Nevertheless, throughout this period there was constant warfare, fortresses and strongholds frequently changing hands. The Rādjputs nearest to Dihli were naturally the weakest because the eastern frontier of Rādjputāna was exposed to attack. The Sultans of Dihli appear to have realized the value of communications with the western coast and we find that the route between Dihli and Guḍjarāt via Adjmēr was usually open to imperial armies. The chief menace to the Rādjputs was not from Dihli but from the independent Muslim kingdoms of Guḍjarāt [q. v.] and Mālwa [q. v.].

The outstanding feature of the period from the end of the so-called Saiyid rule to the final invasion of Bābur was the growth of Rādjput power in northern India under Rānā Sanga of Mewār. Taking advantage of the weakness of the Lodis under Ibrāhīm [q. v.] and of the war between Guḍjarāt and Mālwa he had extended his sway over the greater part of modern Rādjputāna. The battle of Khānuā in 1527, when Bābur shattered his power, marks a turning-point in the history of Muslim rule in India, for the Rādjputs never again attempted to regain their lost dominions on the plains and contented themselves with remaining on the defensive. After Khānuā the place of the Sesodias in Rādjput politics was taken by the

Rāthors, the growth of whose power under Maldēō of Mārwar was facilitated by the struggle between Humāyūn [q. v.] and Shēr Shāh. Akbar's Rādjput policy was based on conquest and conciliation. The fall of Čitōr and Ranthambhōr made him master of the greater part of Rādjputāna, with the exception of Mewār which was not completely subdued until the reign of Djahāngīr [q. v.]. The reversal of Akbar's conciliatory policy produced the great Hindu reaction of Awrangzēb's reign, when, faced at the same time with the Rādjputs of the north and the Marāthās of the Deccan, Awrangzēb [q. v.] was unable to concentrate on either campaign. But internal dissensions once more prevented the Rādjputs from taking advantage of the decline of Mughal power, and, in the second half of the eighteenth century, they proved no match for the Marāthās who easily overran their country. It was not until the beginning of the nineteenth century when the British were at war with the Marāthās that they entered into political relations with the Rādjput states. Before the end of the year 1818 the group of states which now comprise Rādjputāna had been taken under British protection.

To-day India contains 10,743,091 Rādjputs distributed throughout the country as follows: United Provinces, 3,756,936; Pandjāb, 2,351,650; Bihār and Orissa, 1,412,440; Rādjputāna, 669,516; Central Provinces and Berār, 506,087; Gwālīōr, 393,076; Central India, 388,942; Bombay, 352,016; Djammū and Kashmir, 256,020; Western India States, 227,153; Bengal, 156,978; Baroda, 94,893; and Haidarābad 88,434 (1931 *Census Report*). It will be noted that in Rādjputāna only 669,516 Rādjputs are to be found out of a total population of 11,225,712. The states of Rādjputāna are ruled by Rādjputs, with the exception of Tonk which is Muslim, and Bharatpur and Dholpur which are Džāt. The chief Rādjput clans in Rādjputāna are the Rāthor, Kaṭhwāha, Čauhān, Djādon, Sesodia, Ponwar, Parihār, Tonwar and Djhāla. Rādjasthānī is the mother tongue of 77 per cent. of the inhabitants of this area. It is interesting to note that in some parts of India Rādjputs have embraced Islām, as for example the Manhās, Kātīls, and Salahria of the Pandjāb.

RAF^c. [See RAPA.]

RAFĪ' AL-DĪN, MAWLĀNĀ SHĀH MUHAMMAD, b. SHĀH WALĪ ALLĀH b. 'ABD AL-RAḤĪM AL-'OMARĪ (after the Caliph 'Omar b. al-Khaṭṭāb), was born in 1163 (1750) in Dihlī, in a family which enjoyed the highest reputation in Muslim India for learning and piety, from the xviiith century onwards, and produced a number of eminent 'ulamā' up to the "Mutiny" (see Ṣiddīq Ḥasan Khān, *Ithāf al-Nubalā'*, Cawnpur 1288, p. 296 sq.; *J. A. S. B.*, xiii. 310). He studied *ḥadīth* with his father, who was the most celebrated traditionist in his time, in India.

After the death of his father in 1176, he was brought up by his elder brother Shāh 'Abd al-'Azīz (1159—1239 = 1746—1823) with whom he completed his studies in the usual sciences, being specially interested in *ḥadīth*, *kalām* and *uṣūl*. When about twenty, he entered upon his career as *muftī* and *mudarris*, and later succeeded in these capacities his brother and teacher, who, in his old age, had lost his eye-sight, and had in different health. He died on the 6th Shawwāl 1233 (Aug. 9, 1818), at the age of 70 (lunar years), of cholera, and was buried in their family graveyard outside the city of Dihlī.

He wrote about 20 works, mostly in Arabic and Persian, and a few in Urdū. He is praised for the subtlety of his ideas and the conciseness of his style. Among his works are:

In Urdū: 1. a translation of the Qur'ān, interlinear to the Arabic text, which it follows closely and faithfully. He and his brother 'Abd al-Kādir [q. v.] were the pioneers in this field, though their work was considerably facilitated by their father, Shāh Walī Allāh's Persian translation of the Qur'ān (entitled *Faṭḥ al-Raḥmān fī Tarǧumat al-Kur'ān*). The first edition of Shāh Rafī' al-Dīn's translation appeared in Calcutta in 1254 (1838—1839) and another, in 1266 (1849—1850). For some of its numerous editions (from 1866 onwards) see Blumhardt, *Cat. of the Hindustānī Printed Books of the Libr. of the British Museum*, London 1889, p. 290 sq., and the *Supplement* to the same, London 1909, p. 403.

In Arabic: 2. *Takmil al-Ṣinā'a* or *Takmil li-Ṣinā'at al-Adhḥān*, dealing with a. logic, b. *taḥṣīl*, i.e. principles of dialectics, teaching, learning, authorship and self-study, c. *Mabāḥith min al-Umūr al-'amma* (some metaphysical discussions) and, d. *Taṭbīq al-Ārā'* (i.e. an enquiry into the causes and the criteria for judging conflicting opinions in religious matters). A considerable portion of the work has been quoted in the *Abjad al-'Ulūm*, p. 127—135 and 235—270; 3. *Muḥaddimat al-'Ilm*; see *Abjad al-'Ulūm*, p. 124; 4. *Risālat al-Maḥabba*, a discourse on the all-pervading nature of love; see *Abjad al-'Ulūm*, p. 254; 5. *Tafsīr Āyat al-Nūr*, a commentary on Sūra xxiv. 35; 6. *Risālat al-'Arūd wa 'l-Kāfiya*; see *Abjad*, p. 915; 7. *Damgh al-Bāṭil*, dealing with some abstruse problems of the 'ilm al-ḥaqā'iq; 8. a gloss on Mir Zāhid al-Harawī's commentary on Kuṭb al-Dīn al-Rāzī's *Risālat al-Taṣawwūrāt wa 'l-Taṣdīqāt* (see Brockelmann, ii. 209); 9. *Ibtā' al-Barāhīn al-ḥikmiya 'alā Uṣūl al-Ḥukamā'*. Nrs. 4—9 are unpublished.

In Persian: 10. *Kiyāmet Nāmeḥ* (Lahore 1339; Haidarābād, undated ed.), on the last judgment, also called *Maḥshar Nāmeḥ* (see Browne's *Supplementary Handlist*, p. 189). For the two poetical

versions, in Urdū, of this popular work, viz., *Āthār-i Maḥshar* (chronogrammatic name, which gives 1250 as the date of composition), and *Āthār-i Kiyāmet*, see Sprenger, *Oudh Catalogue*, p. 624, and Blumhardt, *Catal.*, p. 290, and for an Urdū prose version, *Kiyāmet Nāmeḥ* or *Da'b al-Aḥkīrat*, see Blumhardt, *loc. cit.*; 11. *Fatāwā*, Dihlī 1322; 12. *Maḍmū'a Ti's Rasā'il*, Dihlī 1314, small treatises on religious and mystical topics; 13. *Sharḥ al-Ṣudūr bi-Sharḥ Ḥāl al-Marwā wa 'l-Kubūr*, an eschatological work, covering ff. 2002 of a small size, in a MS. copy in the Dār al-'Ulūm, Deoband, which institution also possesses the MS. of his 14. *Laṭā'if Khamsa*, a mystical work (ff. 32).

Bibliography: Besides the references given above, *Malfūzāt Shāh 'Abd al-'Azīz Muḥaddith Dihlawī* (composed 1233), Meerut 1314, p. 79, 83 sq.; Muḥammad b. Yahyā (commonly known as al-Muḥsin) al-Tirhutī, *al-Yānī al-djānī fī Asānīd al-Shāikh 'Abd al-Ghanī* (lithogr. on the margin of the *Kashf al-Astār 'an Ridjāl Ma'ānī 'l-Āthār*, and composed in Medina in 1280 [1863]), Deoband 1349, p. 75; Ṣiddīq Ḥasan Khān, *Abjad al-'Ulūm*, Bhopāl 1295, p. 124, 914 sq., and other places mentioned in the article; Karīm al-Dīn, *Farā'id al-Dahr*, Dihlī 1847, p. 410; Syed Aḥmad Khān, *Āthār al-Sanādīd*, Dihlī 1270, p. 106; Fakīr Muḥammad Dīhlāmī, *Hadā'iq al-Ḥanafīya*, Lucknow 1891, p. 469; Raḥmān 'Alī, *Tadhkira 'Ulamā'-i Hind*, Lucknow 1914, p. 66 (and p. 4, 24, 51, 63, 223, 276 for notices etc. of the Shāh's sons and pupils); Bashīr al-Dīn Aḥmad, *Waq'at Dihlī*, Agra 1918, ii. 588 sq.; Garcin de Tassy, *Histoire de la littérature Hindoue et Hindoustanie*, 2nd ed., Paris 1870, ii. 548 sq.; Saksena, *History of Urdu Literature*, Allāhābād 1927, p. 253; *Ma'ārif* (an Urdū monthly published from A'zamgarh, India) for Nov. 1928, p. 344 sqq.; *The Oriental College Magazine, Lahore* (an Urdū quarterly) for Nov. 1925, p. 42—49 (life, including a biogr. notice from the unpublished *Nuzhat al-Khawātir* by Maw. 'Abd al-Ḥaiy of Lucknow, and a list of works).

(MUHAMMAD SHAFĪ')

AL-RĀGHIB AL-ISFAHĀNĪ, ABU 'L-KĀSİM AL-ḤUSAIN b. MUHAMMAD b. AL-MUFADDAL (according to others: al-Faḍl, in al-Suyūṭī, *loc. cit.*, wrongly: al-Mufaddal b. Muḥammad), Arab theological writer, of the details of whose life nothing is known beyond that he died at the beginning of the viiith (xiith) century, perhaps in 502 (1108). Some regarded him as a Mu'tazilī but Fakīr al-Dīn al-Rāzī in his *Asās al-Taḥṣīs* established his orthodoxy. His work was concerned with Qur'ānic exegesis and edifying literature. His studies on the Qur'ān from which al-Baidāwī is said to have taken a great deal were opened with a *Risāla munabbīha 'alā Fawā'id al-Kur'ān* now lost, perhaps identical with the *Muḥaddimat al-Tafsīr*, pr. at Cairo 1329 at the end of 'Abd al-Djabbār's *Tanzīh al-Kur'ān 'ani 'l-Mu'tazilīn*. He next compiled an excellent dictionary of the Qur'ān arranged alphabetically according to the initial letters entitled *Kitāb Mufradāt Alfāz al-Kur'ān*, which in addition to the MSS. mentioned in *G. A. L.*, i. 289, survives in many others in Stambul (see e.g. *M. O.*, vii. 106, 127) and in Bankipore (*Cat.*, xviii. 1484) and under the title *al-Mufradāt fī Ḥarīb al-Kur'ān* was printed on the margin of Ibn al-Athīr's *Nihāya*, Cairo 1322 and edited by Muḥammad

al-Zuhri al-Ghumrāwī, Cairo 1324. In the preface he holds out the prospect of a second work which was to deal with the synonyms of the *Kur'ān* (*al-ʿAlfāz al-mutarādifa ʿala ʾl-Maʿna ʾl-wāḥid wa-mā bainahā min al-Furūḡ al-ghāmiḍa*). The *Tafsīr al-Kurʿān*, Aya Sofia 212, perhaps came to be compiled in this way. The reference might however be to the *Durrat al-Taʾwīl*, on the *Kurʿān* verses found in more than one passage although expressed differently, Br. Mus. Or. 5784 (*Descriptive List*, by A. G. Ellis and E. Edwards, p. 3) which is probably identical with the *Hall Mutashābihāt al-Kurʿān*, Stambul, Rāghib 180. As a quotation in the preface shows he had already written his principal work on ethics *Kitāb al-Dharīʿa ilā Makārīm al-Sharīʿa*, before the *Kitāb Mufradāt*; al-Ghazzālī is said to have always had a copy of this by him. In addition to the MSS. mentioned in *G. A. L.* it is also preserved in Br. Mus., Or. 7016 (*Descr. List*, N^o. 62) and in Stambul (see e. g. *M. O.*, vii. 101—102; *M. F. O. B.*, v. 469) and printed Cairo 1299 (? Sarkis 1899), 1324. The *Kitāb Tafṣīl al-Nashʾatāin wa-Taḥṣīl al-Saʿadatāin*, pr. Cairo n. d., ed. by Ṭāhir al-Djazzārī from the Jerusalem MS. *Khālidiya*, N^o. 72, 3, of 963 A. H., Bairūt 1319, 1323 is a companion work; on both works see Asín Palacios, *Abenhasam de Córdoba*, ii. 19. His most popular book was the work on *adab*: *Muḥāḍarāt al-Uḍabāʾ wa-Muḥāwarāt al-Shuʿarāʾ wa ʾl-Bulaghāʾ* or simply *Kitāb al-Muḥāḍarāt*, which is divided into 25 *ḥudūd*, which are again divided into *fuṣūl* and *abwāb*, which deal with the usual *adab* themes beginning with intelligence and stupidity and ending with angels, djinns and animals in quotations in prose and verse; in addition to the MSS. mentioned in *G. A. L.*, it is also preserved in Stambul Selim Āghā, N^o. 987; Damascus, ʿUmūmiya, *Siḡill*, 86, 5, 7; in Cairo, *Fihrist*², iii. 334. A synopsis by al-Suyūṭī, *ibid.*, p. 345; an anonymous Berlin, N^o. 8350 and Damascus, *loc. cit.*, 86, 8. In Europe the work was first made known in the part edited by G. Flügel as "Der vertraute Gefährte des Einsamen in schlagfertigen Gegenreden von Abu Mansur Abdulmelik ben Mohammed ben Ismail Ettsealibi aus Nisabur mit einem Vorwort von Jos. v. Hammer" Vienna 1829 (see Gildemeister, *Z.D.M.G.*, xxxiv. 171). The work (with Ibn Ḥidjdja's *Thamarāt al-Aurāk* on the margin) in 2 vols., is printed in Būlak 1284, 1287, 1305; Cairo (without the edition on the margin) 1310, 1324, 1326. Ibrāhīm Zaidān published in Cairo in 1902 a synopsis, which only contains 12 *ḥudūd*, which lacks 10 and 13 of the Vienna MS., and is abbreviated in other ways. A Persian translation entitled *al-Nawādir* by Muḥammad Ṣāliḥ b. Muḥammad Baḳīr al-Ḳazwīnī is in Teheran (see Y. Ettessami, *Cat. . . de la Bibliothèque du Madjless*, ii. 308). Lastly there is also an *Adab al-Shiṭrandj* in Kāsan (see Menzel, in *Isl.*, xvii. 94). The work on *adab*: *Taḥṣīl al-Bayān* (on language and writing, ethics, dogmatics and philosophy, *ʿulūm al-awāʾil*) cited in the preface of the *Kitāb al-Sharīʿa* is found in Mashhad, 5 (Oktāʾi, *Fihrist-i Kutubkhāna-i mubāraka-i Asitani Kudsī Ridawī*, 1845, i. 24, N^o. 56).

Bibliography: al-Suyūṭī, *Bughyat al-Wuʿāt*, p. 396; al-Dhahabī, *Tabaqāt al-Mufasṣirīn* (Cod. Bankipore), fol. 121b; Muḥammad Baḳīr al-Khwānsārī, *Rawdaʾ al-Djānāt*, p. 249; Sarkis, p. 922 *sq.*; Brockelmann, *G. A. L.*, i. 269. (C. BROCKELMANN)

RAGUSA (*Rausium*), a town in Dalmatia, formerly a free state (now DUBROVNIK), on the south side of a peninsula which runs out into the Adriatic, picturesquely situated (50 feet) at the foot and on the slopes of Mount Sergius with about 14,500 inhabitants, mainly Croats, was founded in the viiith century by Romance fugitives from Epidaurus which had been destroyed by the Slavs, later belonged to Byzantine Dalmatia which had been settled by a Romance population. At the end of the tenth century the town, which had become strong and rich through its prosperous maritime trade, was paying homage to the Venetians under whose suzerainty it remained after various interludes continuously from 1204 to 1358. In this year Ragusa passed to Hungary and soon attained such power through its flourishing trade that it formed a free state with an aristocratic form of government. Authority was in the hands of the nobles (Grand Council) who chose the Senate (45 members). The latter chose the Little Council (10, later 7 members) which chose every month a Rector (*rettore*) as head of the state. Al-Idrisī [q. v.] mentions Ragusa in his *Kitāb al-Rodjier* as رَغُوصَة (other readings: رَغُوص, رَغُوصَة) and is evidently quoting Frankish sources (cf. thereon Wilh. Tomaschek, *Zur Kunde der Hämus-Halbinsel*: II. *Die Handelswege im XII. Jahrh. nach den Erkundungen des Arabers Idrisi*, Vienna 1887 = *S. B. Ak. Wiss.*, phil.-hist. Kl., vol. cxiii., fasc. 1). In the Ottoman period the Slav name Dubrovnik is found exclusively, in place of Ragusa.

Ragusa's relations with Islām, at first completely hostile, go back to a remote date. When the Arabs in the ninth century conquered Sicily and established themselves on the mainland in Bari (Apulia) they besieged Ragusa on one occasion which defended itself bravely and was relieved by the navy of the emperor Basil I (867—886). Under the emperor Romanus III (1028—1034) the Ragusans distinguished themselves in the sea-fights between Byzantines and Arabs. It was not till a later date that relations became more peaceful when Ragusan commerce, which extended to Egypt and Syria, to Tunis and as far as the Black Sea, began to flourish. As early as the xivth century, corn was exported to Ragusa from the harbours of Anatolia and the relations to the petty states (*tewāʾif-i mülūk*) in Anatolia were well established. The first documented relations between Ragusa and the Ottoman empire belong to the period of Bāyazīd I. Yildirim (1389—1402; q. v.) as the relations of the free state to Orkhan [q. v.] and Murād I [q. v.] mentioned in later Ragusan histories will not bear serious investigation. It is however certain that at quite an early date it became necessary for the Ragusans to remain on good terms with the Ottomans, who were advancing westward, for the sake of their trade. They were able to deal with tact and skill with their new neighbours. Ragusan trade in Turkey developed considerably as the many frontiers and customs offices of the numerous petty rulers of the Balkans, who had been dispossessed by the Turks, disappeared and the Turkish duties were uniform and low. Articles manufactured in Ragusa itself, like cloth, metal, soap, glass, wax etc. or goods imported from Italy for the Balkan peninsula were taken into the interior on safe roads. There was a caravan trade which went from Ragusa via Trebinje, Tien-

tište, Foča, Goražde, Plevlje, Prijepolje, Trgovište, Novibazar [q. v.], Niš, Sofia, Philippopolis to Adrianople and later to Stambul (cf. C. J. Jireček, *Die Handelsstrassen und Bergwerke von Serbien und Bosnien während des Mittelalters*, Prag 1879, p. 74 sq.: *Von Ragusa nach Niš*). In the interior of the Peninsula there were the factories of the Ragusans like Rudnik, Prizren, Novo Brdo, Priština, Zvornik, Novibazar, Skoplje, Sofia with many other settlements extending as far as the mouths of the Danube. On May 12, 1392 the Little Council of Ragusa gave the nobleman Teodoro Gisla in Novo Brdo orders to travel to the Turkish sultān and to make representations about the capture of some Ragusan merchants. There is a Turkish safe-conduct (*litera securitatis*) of June 20, 1396 prepared for Ragusan merchants. In 1397 Sultān Bayazid I allowed the Ragusans to trade unhindered in the Ottoman empire, and a few years later (1399), the first Ottoman embassy led by Kefalja Feriz (Fīrūz)-Beg arrived in Ragusa from the citadel of Zvečan (in Kossovo) (cf. F. v. Kraelitz-Greifenhorst, *op. cit.*, p. 7). The first embassy from Ragusa to the Sublime Porte was however not sent until 1430. It was received by the sultān in his court at Adrianople and received from him the first extant charter of trading privileges, dated Adrianople, Dec. 6, 1430 (cf. Ćiro Truhelka, *Turkoslovenski spomenici dubrovačke arhive*, in *Glasnik zemaljskog muzeja u Bosni i Hercegovini*, Sarajevo, vol. xxiii. [1911], No. 2). To protect her widespread trade on the Balkan Peninsula Ragusa, after the first temporary conquest of Serbia by the Ottomans, found herself forced to offer the Porte an annual present of 1,000 ducats in silver plate (*argenterie*) but when Georg Branković restored the independence of Serbia in 1444 this promise was promptly withdrawn; on the final subjection of Serbia by the Turks in 1459 this tribute (*kharāj*) became a regular institution. From 1459 it was 1,500 ducats and gradually increased to 15,000 ducats. From 1481 it was 12,500 ducats and was annually brought to the imperial court by special *oratores tributii* with very detailed instructions (cf. the text of one of these *commissions* for the Paladins Marino de Gondola and Pietro di Luccari of 1458 and of a later one for the *ambasciatore del tributo* Giov. Mar. di Resti of 1572 in Lujo knez Vojnović, *Dubrovniki i osmansko carstvo. Prva knjiga: Od prvoga ugovora s portom do usvojenja Hercegovine*, Belgrad 1898, p. 118—155 and p. 256—266); cf. C. J. Jireček, *Die Bedeutung von Ragusa* etc., note 49. A number of the earliest documents relating to these missions have been published by F. Kraelitz-Greifenhorst, in his *Osmanische Urkunden in türkischer Sprache aus der zweiten Hälfte des XV. Jahrhunderts* (= *S.B.Ak. Wiss., phil.-hist. Kl.*, vol. 197, Vienna 1922); they come without exception from the archives of Ragusa, part of the Turkish portion of which is at present in Belgrad.

On their journey the envoys had to give all kinds of presents, for example to the Sandjakbey of the Herzegovina in Sarajevo [q. v.] and the Beglerbeg of Rumelia whose headquarters were in Sofia. The readiness with which the Ragusans adapted themselves to the requirements of dealings with the infidel Turks did not at first find approval at the Holy See. Paul II in 1468 gave the Ragusans express permission to trade with the heathen Ottomans (cf. W. Heyd, *Histoire du*

commerce du Levant, ii., Leipzig 1885, p. 347 sq. with further references to Ragusan trade with the Ottomans). The lands of the free state of Ragusa which stretched from the mouth of the Narepta to the Gulf of Cattaro (Kotor), thanks to the skilful policy of its leaders, thus remained intact till its end in 1808. Only occasionally the Ragusans had to suffer from the covetousness of Ottoman rulers, e.g. about 1667 when Kara Muṣṭafā [q. v.] demanded from the Ragusan envoys 150,000 talers "blood money" for the Dutch ambassador G. Crook who perished in the great earthquake in Ragusa (April 6, 1667) (cf. J. v. Hammer, *G.O.R.*, vi. 203 sq.), or when ten years later the same grand vizier endeavoured to extort the same sum and threw the ambassadors of the free state into prison (cf. J. v. Hammer, *G.O.R.*, vi. 346). When Ragusa had fallen several years behind with the tribute, it had in 1695 to pay a considerable sum in compensation (cf. J. v. Hammer, *G.O.R.*, vi. 616). In 1722 a similar case recurred (cf. J. v. Hammer, *G.O.R.*, vii. 312 sq.) when the tribute was three years in arrears. It is however a fact that Ragusa cunningly used every opportunity to avoid its oppressive obligations (cf. the significant saying in the Levant quoted by von Hammer, *G.O.R.*, vii. 29: *Non siamo Christiani, non siamo Ebrei, ma poveri Ragusei*), until the peace of Carlowitz (1699) made it possible for the Ottomans to collect the tribute again (cf. J. v. Hammer, *G.O.R.*, vii. 29). From 1703 it was paid every three years and in 1804 delivered for the last time in Stambul by the envoys Paul Gozze and Blasius Menze.

In the Turkish wars of 1683—1699 and 1714—1718 the Venetians occupied the hinterland of Ragusa and Trebinje but at the peaces of Carlowitz and Passarowitz the Ragusans, protected by Austria and the Porte, negotiated so skilfully that Turkey was not only left the land as far as the Ragusan frontier but also two strips of territory on the coast (Klek and Sutorina) so as not to become direct neighbours of Venice. This was the last great coup of Ragusan policy.

With the decline in Ragusan trade, which came about for the same reasons as the general decline of Italian trade in the Levant, the political decline of the republic set in. In 1808, Napoleon sent General Marmont, afterwards Duc de Raguse, to dissolve the Senate and a year later made Ragusa a province of Illyria. In 1815 the town passed to Austria and since 1918 it has belonged to Jugoslavia.

The Ottoman traveller Ewliyā Čelebi [q. v.] in his *Siyāhetnāme* (vi. 443 sqq., esp. p. 445—453) gives a full description of *Dobre Venedik* which he contrasts with *Bunduḳāni Venedik*, i.e. Venice (cf. on these terms F. Babinger, *Aus Südslaviens Türkenzeit*, Berlin 1927, p. 38 note and H. v. Mžik, *Beiträge zur Kartographie Albaniens*, in *Geologica Hungarica*, series geologica, tomus III, Budapest 1929, p. 639 = 19, note 88). In 1074 (1664) he came via Ljubomir, Popovo to Dubrovnik from which he went on to Castelnovo (Hercegnovi). On Hungarian and Serbo-Croat translations of this section cf. Babinger, *Ewliyā Čelebi's Reisewege in Albanien*, Berlin 1930, p. 1 and 2, note 8.

Statistics regarding the population of Ragusa in the older period are not available. The town had 800 houses. The whole district had 50,000 inhabitants. With the prosperity and long period of peace, a literary life began; poetry — Latin

and Slav — was definitely cultivated from the end of the xvth century. Latin was used in the offices for over 1,000 years, in recording the proceedings of the Senate till 1808. Within its walls Ragusa frequently sheltered illustrious fugitives from Turkish persecution (e.g. Skanderbeg).

The archives of Ragusa, kept in the Rector's palace, still await thorough study and contain a large number of unpublished Turkish documents and countless documents of value for the history of Turkish rule in S.E. Europe. Cf. Friedrich Giese, *Die osmanisch-türkischen Urkunden im Archive des Rektorenpalastes in Dubrovnik (Ragusa)*, in *Festschrift für Georg Jacob zum siebenzigsten Geburtstag*, Leipzig 1932, p. 41—56. Cf. also J. Gelcich (Djelčić), *Dubrovački arhiv*, in *Glasnik zemaljskog muzeja u Bosni i Hercegovini*, xxii, Sarajevo 1910, and Milan v. Rešetar, *Dubrovački arhiv*, in *Narodna Enciklopedija*, i. 584 sqq.

Ragusa had busy commercial relations with other Muslim states besides Turkey. In 1510 for example, Ragusa received from Kānsūh al-Ghūrī [q. v.] a charter which gave its trade with Egypt protection and freedom (cf. Giacomo Luccari, *Copioso ristretto degli Annali di Rausa*, Venice 1605, p. 126 and thereon Fr. M. Appendini, *Notizie sulle storico-critiche antichità, storia e letteratura de' Ragusei*, Ragusa 1802, i. 213 with erroneous conclusions). The relations were, it is true, not always of a peaceful nature as the "state of war" in 1104 (1780) between Ragusa and Morocco showed (cf. thereon F. Babinger, *Ein marokkanisches Staatschreiben an den Freistaat Ragusa vom Jahre 1104 (1780)*, in *M. S. O. S.*, xxx., Berlin 1927, part ii., p. 191 sqq. and *ibid.*, xxxi., p. 98 sq.). The archives of Dubrovnik contain further unpublished Moroccan documents of the end of the xviii century, e.g. a government document of the 9th Rabi II, 1195 (April 4, 1781).

Bibliography: In addition to the works mentioned in the text cf. also the older travellers in so far as they describe the road through the Balkan Peninsula (*Slavonia*), especially Jean Chesneau, *Les Voyages de Monsieur d'Aramon* (1547), Paris 1887, ed. by Ch. Schefer; Sieur D[es Hayes de] C[ourmenin], *Voyage du Levant fait par le commandement du roy en l'année 1621 par le Sieur D. C.*², Paris 1632; *Les Voyages de M. Quiclet à Constantinople par terre*, Paris 1664 and frequently; Sir George Wheler, *Journey into Greece*, London 1682 or French translation *Voyage de Dalmatie, de Grèce et du Levant*, Amsterdam 1689, 2 vols. — A scholarly account, particularly one based on the documents, of the relations of Ragusa with the Ottoman Empire is still lacking as is a full commercial history of the republic. — The principal work on the history of Ragusa is the *Geschichte des Freistaates Ragusa*, Vienna 1807, by Johann Christ. v. Engel (1770—1814). On other relations between Ragusa and the lands of Islām see Vladimir Mažuranić, *Südslaven im Dienste des Islams (vom X. bis ins XVI. Jahrhundert)*, transl. into German and publ. by Camilla Lucerna, Zagreb-Leipzig 1928, 55 p., a work which however does not on every point stand the test of strict examination. — On the coinage of Ragusa see Milan v. Rešetar, *Dubrovačka numizmatika*, 2 parts, 1924—1926. — Of the Ragusan historians of the older period in addition to S. Razzi, *La storia di Raugia*, Lucca 1588 and

Jun. Resti, *Chronica Ragusina* (in the *Monumenta Slav. Merid.*, vol. xxv., Agram 1893), Giacomo di Pietro Luccari [= Jakov Lukarević (1551—1615)] most deserves mention, but a thorough study of the probably unreliable sources of his *Copioso ristretto degli annali di Rausa* (Venice 1605, xxxvi, 176 p., 4° and Ragusa 1790, xxiii, 325 p., 8°) is still a desideratum; cf. for the present Vl. Mažuranić, *Izvori dubrovačkoga historika Jakova Lukarevića, in Narodna Starina*, Zagreb 1924, N^o 8, p. 121—153. — An excellent and exhaustive bibliography on Ragusa is given in the introduction to the work of Ivan Dujčev, *Avvisi di Ragusa. Documenti sull' Impero turco nel secolo XVII e sulla guerra di Candia*, Rome 1935, which is also of great importance for the history of relations between Ragusa and Turkey. — There is no collection or edition of the surviving reports of Ragusan envoys on their journeys to the Porte on the lines of the long available Venetian *relazioni*. The only possible exception is the *Relazione dello stato della religione nelle parti dell' Europa sottoposte al dominio del Turco* of Matthäus Gundulić (Gondola) who was in Turkey for 28 months until July 1674 written in Rome in 1675, ed. by Banduri, *Imperium Orientale*, Paris 1711, vol. ii.: *Animadversiones in Constant. Porphyrogen. de administratione imperii*, p. 99—106 (cf. thereon Drinov in *Periodičesko Spisanie* of Braila, ii. 65, who did not know this edition and published extracts from another manuscript). Nor is there a list of these envoys available (cf. J. von Hammer, *G. O. R.*, ix. 318) among whom we find representatives of almost all the noble families of Ragusa, like the Bona, Caboga, Gozze, Gondola, Menze, Pozza, Resti etc. Ragusa being a tributary country the Porte never sent ambassadors to it but only commissioners (cf. J. v. Hammer, *G. O. R.*, ix. 331), so that we have no Turkish reports at all.

(FRANZ BABINGER)

AL-RAḤBA, RAḤBAT MĀLIK B. ṬAWK or RAḤBAT AL-ŠA'M, a town on the right bank of the Euphrates, the modern al-Miyādīn.

Hardly anything definite is known about the history of the town before the Muslim era. In the middle ages it was usually identified as the Reḥōbōt han-Nāḥār of the Bible (Gen. xxxvi. 37) i.e. Reḥōbōt on the river (Euphrates) especially in the Talmud and by the Syriac authors (e.g. Mich. Syr., cf. index, p. 63*; Barhebraeus, *Chron. syr.*, ed. Bedjan, p. 273 and *passim*), who usually call it Reḥābōt, Raḥabat (M. Hartmann, in *Z. D. P. V.*, xxiii., p. 42, note 1). A. Musil (*The Middle Euphrates*, New York 1927, p. 340) takes it to be the Thapsakos of Ptolemy, which he — certainly wrongly — wants to distinguish from the well-known town of the name at the bend of the Euphrates (*ibid.*, p. 318—320) instead of seeing only an erroneous location by the Alexandrine geographers (cf. the article THAPSAKOS in Pauly-Wissowa, *R. E.*, v., A, col. 1272—1280). The name al-Rāḥba is explained by Yāḳūt (*Mu'djam*, ed. Wüstenfeld, ii. 764 following the grammarian Naḍḍar b. Šumail) as the flat part of a wādī, where the water collects (E. Herzfeld, *Archäolog. Reise im Euphrat- und Tigris-Gebiet*, ii. 382; cf. A. Socin, in *Z. D. P. V.*, xxii. 45).

According to Arabic accounts it was at one time called Furḍat Nu'm (al-Ṭabari, ed. de Goeje, i. 917) or simply al-Furḍa (Ibn Miskawaih, *Taḍjārīb*,

ed. Cactani, p. 87); in the vicinity was a monastery, Dair Nu'm (Yāqūt, ii. 704; iv. 797).

According to al-Balādhuri (ed. de Goeje, p. 180), there was no evidence that al-Raḥba below Ḳarḳisiya is an old town; on the contrary it was only founded by Mālik b. Ṭawḳ b. 'Attāb al-Taḡhlībī (cf. Abu 'l-Maḥāsīn, ed. Popper, ii. 34) in the caliphate of al-Ma'mūn (813—833) (a legendary embellishment of the story of its foundation by 'Umar al-Biṣṭāmī in Yāqūt, ii. 764). The new foundation was in the form of a long rectangular head cloth (*ṣailasān*). After the death of its founder (Ibn al-Aṭṭir, ed. Tornberg, vii. 188) in 260 (873—874) he was succeeded as ruler of the town by his son Aḥmad who however was driven out of it in 883 by Ibn Abi 'l-Sāḍī, lord of al-Anbar, Ṭarīḳ al-Furāt and Raḥbat Ṭawḳ (al-Ṭabarī, iii. 2039).

The Ḳarmaṭian Abū Ṭāhir took the town on March 3, 928 and killed many of its inhabitants (Ibn Miskawaih, *Taḡḍarib*, ed. Amedroz, i. 182 sq.; al-Mas'ūdī, in *B. G. A.*, viii. 384 sq.; Ibn al-Aṭṭir, viii. 132; 'Arib, ed. de Goeje, p. 134). In the following decades the town suffered much from civil wars until 'Adil, who had been sent from Baghdād by Badjkam, in 330 (941—942) took possession of the town and the whole province of Ṭarīḳ al-Furāt and a part of al-Khābūr (Ibn al-Aṭṭir, xiii. 266 sq., 295). In the reign of the Ḥamdānīd Nāṣir al-Dawla the Taḡhlībī Ḍjamān rebelled in al-Raḥba, and the town suffered very much; he was finally driven out and was drowned in the Euphrates (*op. cit.*, p. 357 sq.). After the death of Nāṣir al-Dawla (358 = 969) his sons Ḥamdān, Abū 'l-Barakāt and Abū Taḡhlīb disputed for the possession of the town which finally fell to the last-named, who had its walls rebuilt (Ibn al-Aṭṭir, viii. 437 sq.). He lost it again in 368 (978—979); it then passed to the Būyid 'Aḍud al-Dawla (Ibn al-Aṭṭir, viii. 511 sq.). Bahā' al-Dawla in 381 (991—992) at the wish of the inhabitants appointed a governor to al-Raḥba (Ibn al-Aṭṭir, ix. 64). Soon afterwards the town passed to Abū 'Alī b. Ṭhimāl al-Khafaḍjī who was killed by the 'Ukailid 'Isā b. Khalaṭ in 399 (1008—1009). The latter in turn was defeated by an army sent by al-Ḥākim from Egypt and slain. The 'Ukailid Badrān b. Muḳallid was, it is true, able to drive back the Egyptian army but Lu'lu' of Damascus soon afterwards brought al-Raḥba and al-Raḥba into Egyptian power.

A citizen of the town, Ibn Muḥkān, next made himself its independent master and also took 'Ana, an enterprise in which the Kilābī Ṣāliḥ b. Mirdās of al-Hilla at first supported him but later killed him in order to make himself master of al-Raḥba (Ibn al-Aṭṭir, ix. 148; Ibn Khaldūn, *Ibar*, ed. Būlak, iv. 271). Between 447 (1055) and 450 (1058) Arslān al-Basasiri [q. v.] fled to al-Raḥba in order to join up with the Egyptian caliph al-Mustaṣfir from there (Yāqūt, i. 608). Ṣāliḥ's son, Ṭhimāl, later lord of Ḥalab, followed him in possession of the town (Ibn al-Aṭṭir, ix. 163). In the spring of 1060 his brother 'Aṭiya (Ibn al-Aṭṭir, x. 8) captured it. He was driven from Ḥalab in 1065 by his nephew Maḥmūd, but remained lord of al-Raḥba, A'zāz, Manbiḍj and Bālis (Kamāl al-Dīn, *Historia Merdasidarum*, transl. J. J. Müller, p. 59). To the district of al-Raḥba at this time (1063) there also belonged al-Khānuḳa, Ḳarḳisiya and Duwaira (Ibn al-Kalānisi, ed. Amedroz, p. 116). Malikshāh in 479 (1086—

1087) granted al-Raḥba with the country round it, Ḥarrān, Sarūḍj, al-Raḳka and al-Khābūr to Muḥammad b. Sharaf al-Dawla (Ibn al-Aṭṭir, x. 105). In 489 (1096) Karbūka of al-Hilla seized and plundered the town (Ibn al-Aṭṭir, x. 177). After his death it passed (1102—1103) to Ḳāyimāz, a former general of Alp Arslān, then to the Turk Ḥasan. It was taken from him by the sultān of Damascus who sent the Shaibānīd Muḥammad b. al-Sabbāḳ to govern it (Ibn al-Aṭṭir, x. 249). On May 19, 1107 Ḍjāwālī, the general of 'Imād al-Dīn Zangī, took the town through treachery (Ibn al-Aṭṭir, x. 297; Ibn al-Kalānisi, ed. Amedroz, p. 156 sq.; Michael Syrus, transl. Chabot, iii. 193; iv. 592; Barhebraeus, *Chron. syr.*, ed. Bedjan, p. 273). 'Izz al-Dīn Mas'ūd b. al-Bursuḳī took it in 1127 shortly before his death (Ibn al-Aṭṭir, x. 360 sq.; Mich. Syr., iii. 228 = iv. 610; Barhebr., *Chron. Syr.*, p. 287). His successors killed one another fighting for the succession and al-Raḥba then passed to 'Izz al-Dīn's young brother for whom Ḍjāwālī governed it as vassal of Zangī (Ibn al-Aṭṭir, x. 453 sq.). Kuṭb al-Dīn, son of Zangī, in 544 (1149—1150) occupied the town (Ibn al-Aṭṭir, xi. 93). On Aug. 12, 1157, al-Raḥba with Ḥamāh, Shaizar, Salamiya and other towns were destroyed by an earthquake (Ibn al-Kalānisi, ed. Amedroz, p. 344; Mich. Syr., iii. 316; Barhebr., *Chron. syr.*, p. 325 sq.). The Khafaḍja tribe who in 1161 had plundered the district of al-Hilla and al-Kūfa returned to Raḥbat al-Sha'm followed by the government troops where they were reinforced by other nomads and scattered the enemy (Ibn al-Aṭṭir, xi. 182 sq.). Nūr al-Dīn granted the Kurd Asād al-Dīn Shirkūh b. Aḥmad b. Shādī of Dwin, Saladin's uncle, in 559 (1164) al-Raḥba and Ḥimṣ (Mich. Syr., iii. 325; Barhebr., *Chron. syr.*, p. 330). The latter entrusted the government of al-Raḥba to an officer named Yūsuf b. Mallāḥ. Shirkūh built al-Raḥbat al-Ḍjadida with a citadel about a farsakh (3 miles) from the Euphrates because the town of Raḥbat Mālik b. Ṭawḳ was now in ruins (Abu 'l-Fida', *Taḳwīm al-Buldān*, ed. Reinaud, p. 281; Ḥādjdjī Khalifa, *Djihān-numā*, Stambul, p. 444). The new town of al-Raḥba became an important caravan station between Syria and the 'Irāḳ, as we learn from Ibn Baṭṭūta amongst others (*Tuḥfa*, ed. Defrémery and Sanguinetti, iv. 315) who travelled from there via al-Sukhna to Tadmur.

The town remained for a century in Shirkūh's family until in 1264 Baibars installed an Egyptian governor there (Ibn al-Aṭṭir, xi. 341; xii. 189; Abu 'l-Fida', *Annales Muslem.*, ed. Reiske-Adler, iv. 142; v. 16). Sonḳor al-Ashḳar of Damascus who rebelled against Ḳalā'ūn in 678 (1279) fled after a defeat to al-Raḥba to the emir 'Isā and from there appealed to Abaḳa for protection (Barhebr., *Chron. syr.*, p. 543).

The Mongols under Kharbanda besieged al-Raḥba in 712 (1312—1313) on their way to Syria. On his return Kharbanda left his siege-artillery behind; thereupon it was taken by the defenders of the town into the citadel (Abu 'l-Fida', v. 268 sq.; al-Ḥasan b. Ḥabīb b. 'Umar, *Durrat al-Aslāk fī Dawlat al-Aṭrak*, in H. E. Weijers, in *Orientalia*, ed. Juynboll, ii., Amsterdam 1846, p. 319). Its governor at the time, Ibn al-Arkashī, died in 715 (1315—1316) in Damascus (Abu 'l-Fida', v. 300). Muhanna and his family, the 'Isā, were driven from the district of Salamiya in the spring of 1320 and pursued by the Syrian troops as far as

Raḥba and 'Āna (Abu 'l-Fidā', v. 340 sq.); the town was perhaps destroyed on this occasion.

In 1331 the Euphrates inundated the country round al-Raḥba (Ibn al-Aḥir, Vienna MS. in Musil, *The Middle Euphrates*, p. 3, note 3).

According to the Muslim geographers, al-Raḥba lay on the Euphrates (Kudāma, in *B. G. A.*, vi. 233; al-Maḳdisī, in *B. G. A.*, iii. 138; al-Idrīsī, transl. Jaubert, ii. 137 sq.; al-Dimishḳī, ed. Mehren, p. 93; Abu 'l-Fidā', ed. Reinaud, p. 51) and also on the canal Sa'īd led off from it at Fam Sa'īd on the right bank, which rejoined the Euphrates below the town, the gardens of which it watered, and above al-Dāliya also called Dāliyat Mālik b. Ṭawḳ (Suhṛāb, ed. v. Mzik, in *Bibl. arab. Histor. u. Geogr.*, v., Leipzig 1930, p. 123; Yāḳūt, iv. 840; Abu 'l-Fidā', *Taḳwīm*, p. 281). The town lay 3 farsakhs from Ḳarḳisiya (al-'Azizī, in Abu 'l-Fidā', ed. Reinaud, p. 281) and, according to al-Maḳdisī (*B. G. A.*, iii. 149), a day's journey each from this town, al-Dāliya and Birā' (the latter statement is quite inaccurate; cf. Musil, *op. cit.*, p. 253 sq.). Musil (*ibid.*, p. 250) wrongly takes al-Dāliya to be al-Šālihiya, which is impossible as 8—10 miles above it the Euphrates flows close to the foot of Djabal Abu 'l-Ḳāsim, so that the Sa'īd canal must have flowed north of it back into the Euphrates (cf. the *Karte von Mesopotamien* of the Prussian Survey, Feb. 1918, 1:400 000, sheet 3c: 'Āna; Cumont, *Fouilles de Doura-Europos*, Paris 1926, Atlas, pl. i.: *Cours de l'Euphrate entre Circesium et Doura-Europos d'après l'Aéronautique de "l'Armée du Levant"* on the same scale and the maps in Sarre-Herzfeld, *Arch. Reise*). The town of al-Raḥba was a Jacobite bishopric (a list of the bishops in Mich. Syr., iii. 502); that it — for a time at least — was also a Nestorian bishopric is shown from a life of the Katholikos Eliyā I (on him see Baumstark, *Geschichte der syr. Literatur*, p. 286 sq.) who shortly before his death on May 6, 1049 appointed a bishop to this town (Assemani, in *B. O.*, iii. 263).

In the statements of the Arab geographers, it is clear that the old Raḥbat Mālik b. Ṭawḳ lay on the bank of the Euphrates (al-Iṣṭakhṛī, in *B. G. A.*, i. 13, 72; Ibn Ḥawḳal, *B. G. A.*, ii. 17, 138; al-Maḳdisī, *B. G. A.*, iii. 138; Yāḳūt, *Mu'djam*, iii. 860; Ibn Ḳhurdaḏbih, *B. G. A.*, vi. 233) i. e. presumably corresponded to the modern al-Miyādīn (plur. of *maidān*) (G. Hoffmann, *Auszüge aus syr. Akten pers. Märtyrer*, p. 165; E. Herzfeld, *Arch. Reise*, ii. 382, note 1; A. Musil, *The Middle Euphrates*, p. 3, 253, 340) while the new al-Raḥba, as we saw, was built a farsakh from it, where in the S. W. of al-Miyādīn there still are the ruins of the citadel al-Raḥaba or Rḥaba. According to Abu 'l-Fidā' (ed. Reinaud, p. 281), towers were still standing among the ruins of the old town. Opposite al-Raḥba on the left bank of the Euphrates stood a fortress, taken by Marwān II (744—750) in the fighting with Hishām (Maḥbūb of Manbidj, *Kitāb al-Unwān*, ed. Vasiliev, in *Patr. Orient.*, viii. 517 sq.). In this fortress Musil (*op. cit.*, p. 338 sq.) has recognised al-Zaitūna (al-Balāḏhūrī, ed. de Goeje, p. 180; Tabarī, ii. 1467 sq.; Ibn Ḳhurdaḏbih, p. 74) and the ancient Zaidā which is still called al-Marwāniya after this caliph, but really is not opposite al-Miyādīn, but fourteen miles farther down.

Ibn Ḥawḳal (*B. G. A.*, ii. 155) praises the fertility of the well-watered region of Raḥba, where the

orchards on the east bank of Euphrates also produced date-palms; their quinces were also famous (al-Maḳdisī, in *B. G. A.*, iii. 145). The *Karte von Mesopotamien* (1:400,000) marks at "Mejādin" "the first (most northerly) palm". Dates really only ripen in specially favourable weather in the region of Albū Kamāl (Musil, *op. cit.*, p. 342). According to al-Iṣṭakhṛī (*B. G. A.*, i. 77), Raḥbat Mālik b. Ṭawḳ was larger than Ḳarḳisiya; al-Maḳdisī (*B. G. A.*, iii. 142) calls it the centre of the Euphrates' district ('amal al-Furāt or nāhiyat al-Furāt) as in the early Muḥammadan period the fertile plain from Dair al-Zawr to Albū Kamāl with the towns of al-Raḥba, Dāliya, 'Āna and al-Ḥadītha was called (Herzfeld, *op. cit.*, ii. 382). According to him the town was built in a semi-circle on the edge of the desert and defended by a strong fortress.

Yāḳūt visited the town, which according to him was eight days' journey from Damascus, five from Ḥalab, 100 farsakhs from Baghdād and a little over 20 farsakhs from al-Raḳḳa. In al-Dimishḳī (ed. Mehren, p. 202) it is called Raḥbat al-Furāṭiya. In the time of Ḳhalīl al-Ḳāhīrī (Zubda, ed. Ravaisse, p. 50) it belonged to Ḥalab. According to al-'Umārī, Syria, to be more exact, its eastern marches with the capital Ḥims, reached as far as al-Raḥba; he mentions there "a citadel and a governorship and there are Bahri's, cavalry, scouts and mercenaries stationed there" (al-'Umārī, transl. R. Hartmann, in *Z.D.M.G.*, lxx., 23, 30). Ibn Baṭṭūta (*op. cit.*) calls the town "the end of al-'Irāk and the beginning of al-Shām". Ḥādjdjī Ḳhalīfa reckons from 'Āna to al-Raḥba three days' journey and from there to al-Dair one day's journey (*Djahān-numā*, Stambul 1145, p. 483; cf. thereon Musil, *op. cit.*, p. 257).

The Venetian jeweller Gasparo Balbi who passed the town on Feb. 6, 1588 on the Euphrates says (*Viaggi dell' Indie orientali*, Venice 1590, without pagination): "vedemmo castello Rahabi appresso il qual castello si vede una città rovinata, ma in alcuni lati di essa habitata da alcune poche persone di nome di Rahabilitica (on the form Raḥabī, cf. M. Hartmann, in *Z.D.P.V.*, xxii. 44, on N^o. 390). Pietro Della Valle (*Viaggi*, Venice 1544, i. 571) saw the town of "Rachba" at some distance from the Euphrates and heard that there were some old buildings there. Tavernier (*Les six voyages*, i., Paris 1676, p. 285) mentions a place called "Mached-raba", i. e. Mashhad al-Raḥba (six miles S. W. of al-Rḥaba).

In modern times al-Miyādīn and the ruins of al-Rḥaba (the usual formation) have been repeatedly visited (see *Bibl.*). The plan of the castle forms a triangle with flattened angles; pictures of the castle will be found in Musil, *The Middle Euphrates*, p. 7, fig. 2 or Sarre-Herzfeld, *Arch. Reise*, iii., pl. lxxix. sq.

(E. HONIGMANN)

RAHBĀNĪYA (A.), monasticism. The term is derived from *rāhib* [q. v.]; it occurs in the Qurʾān once only, in a passage (sūra lvii. 27) that has given rise to divergent interpretations: "And we put in the hearts of those who followed Jesus, compassion and mercy, and the monastic state, they instituted the same (we did not prescribe it to them) only out of a desire to please God. Yet they observed not the same as it ought truly to have been observed. And we gave unto such of them as believed, their reward; but many of them were wicked doers".

According to some of the exegists the verb "we put" has two objects only, viz. compassion and mercy, whereas the words "and the monastic state" are the object of "they instituted". Accordingly the monastic state appears here as a purely human institution, which moreover has been degraded by evil doers.

According to others, however, the object of the words "and we put" is: compassion, mercy and the monastic state. According to this exegesis monasticism is called a divine institution. Professor Massignon has pointed out that this exegesis is the older one; the younger one expresses a feeling hostile to monasticism, which coined the tradition "No rahbāniya in Islām".

This tradition does not occur in the canonical collections. Yet, it is being prepared there. When the wife of ʿOthmān b. Mazʿūn [q. v.] complained of being neglected by her husband, Muhammad took her part, saying: Monasticism (rahbāniya) was not prescribed to us (Aḥmad b. Ḥanbal, vi. 226; Dārimī, *Nikāḥ*, bāb 3). The following tradition is less exclusive: Do not trouble yourselves and God will not trouble you. Some have troubled themselves and God has troubled them. Their successors are in the hermitages and monasteries, "an institution we have not prescribed to them" (Abū Dāwūd, *Adab*, bāb 44).

Islām, thus rejecting monasticism, has replaced it by the holy war: "Every prophet has some kind of rahbāniya; the rahbāniya of this community is the holy war" (a tradition ascribed to

Muḥammad in Aḥmad b. Ḥanbal, iii. 266; to Abū Saʿīd al-Khudrī, *ibid.*, iii. 82). Cf. also ṬARĪKA, ZUHD.

Sachau, iii/i. 287; Hariri, *Maḳāmāt*, ed. de Sacy, p. 570—571; Zamakhsharī, *al-Faʿīk*, Ḥaidarābād 1324, i. 269; Ibn al-Athīr, *Nihāya*, s. v.; Sprenger, *Das Leben und die Lehre des Muḥammad*, i. 389; Goldziher, *Muhammedanische Studien*, ii. 394; do., in *R. H. R.*, xviii. 193—194; xxxvii. 314. (A. J. WENSINCK)

RAḤĪB (A., plur. *ruhbān*, *rahābīn*, *rahābīna*), a monk. The figure of the monk is known to pre-Islāmic poetry and to the Qurʾān and Tradition. The pre-Islāmic poets refer to the monk in his cell the light of which the traveller by night sees in the distance and which gives him the idea of shelter.

In the Qurʾān the monk and the *ḥissīs*, sometimes also the *aḥbār*, are the religious leaders of the Christians. In one place it is said that rabbis and monks live at the expense of other men (Sūra ix., 34) and that the Christians have taken as their masters instead of God their *aḥbār* and their monks as well as al-Masīḥ b. Maryām (Sūra ix. 31). In another passage the Christians are praised for their friendship to their fellow-believers which is explained from the fact that there are priests and monks among them (Sūra v. 87). In Ḥadīth the *rāhib* is frequently encountered in stories of the nature of the *ḥiṣṣa al-anbiyāʾ* (cf. Bukhārī, *Anbiyāʾ*, bāb 54; Muslim, *Zuhd*, Tr. 73; *Tawba*, Tr. 46, 47; Tirmidhi, *Tafsīr*, Sūra 85, Tr. 2; *Manāḥib*, Tr. 3; Nasāʾī, *Masāʾid*, Tr. 11; Ibn Māǧja, *Fitan*, Tr. 20, 23; Dārimī, *Faḍāʾil al-Qurʾān*, Tr. 16; Aḥmad b. Ḥanbal, i. 461; ii. 434; iii. 337, 347; v. 4; vi. 17 bis).

From the fact that in the Muḥammadan literature of the early centuries A. H. the epithet *rāhib* was given to various pious individuals it is evident that there was nothing odious about it then. Cf. however the article RAHBĀNĪYA.

Bibliography: cf. that of RAHBĀNĪYA.

(A. J. WENSINCK)

RAḤĪL, in the Bible Rachel, wife of Jacob, mother of Joseph and Benjamin, is not mentioned in the Qurʾān. There is however a reference to her in Sūra iv. 27: "Ye may not have two sisters to wife at the same time; if it has been done formerly God now exercises pardon and mercy". This is said to allude to Jacob's marriage with Liyā and Rāḥīl; before Moses revealed the Tora, such a marriage was valid. Ṭabarī gives this explanation in the *Annals*, i. 356, 359 sq. Ibn al-Athīr, p. 90, adopts it. But already in *Tafsīr*, iv. 210, Ṭabarī explains the verse correctly: Muḥammad forbids for the future marriage with two sisters but he does not dissolve such marriages concluded before the prohibition. — Islāmic tradition generally adopts the view that Yaʿqūb only married Rāḥīl after Liyā's death. So already in Ṭabarī, i. 355, Zamakhsharī, Baiḍāwī, Ibn al-Athīr etc. Al-Kisāʾī even thinks that Yaʿqūb only married Rāḥīl after the death of Liyā and of his two concubines. Here again Muslim legend differs from the Bible, in making him not marry Rāḥīl until after 14 years of service; in the Bible, Jacob serves seven years, marries Leah and after the wedding week Rachel

and serves another seven years. — Ya'qūb's wooing and Laban's trick by which he substitutes Liyā for Rāḥil as "neither lamp nor candle-light" illuminate the bridal chamber, is embellished in Muslim legend.

Rāḥil is also of importance in the story of Yūsuf. Yūsuf inherits his beauty from Rāḥil; they had half of all the beauty in the world, according to others two-thirds, or even according to the old Haggadic scheme (*Kiddushin*, 49b), nine tenths (*Tha'labī*, p. 69). — When Ya'qūb left Lāban, he had no funds for the journey; at Rachel's suggestion, Yūsuf steals Lāban's idols. — As Yūsuf, sold by his brothers, passes the tomb of Rāḥil he throws himself from his camel on the grave and laments: "O mother, look on thy child, I have been deprived of my coat, thrown into a pit, stoned and sold as a slave". Then he hears a voice: "Trust in God". The old Haggada does not know this touching scene. But it has found its way into the late mediaeval book of stories *Sefer Hayashar* (ed. Goldschmidt, p. 150). The Jewish-Persian poet *Shahin* (xvth century) adapts this motif from Firdawsi's *Yūsuf u-Zulaikha* in his book of Genesis.

RAḤMĀNĪYA, Algerian Order (*ṭarīqa*) called after Muḥammad b. 'Abd al-Raḥmān al-Gushtulī al-Djurdjūrī al-Azharī Abū Ḳabrain, who died 1208 (1793–1794). It is a branch of the *Khalwatiya* and is said to have at one time been called Bakriya after Muṣṭafā al-Bakrī al-Shāmī. At Nefta, in Tunisia, and some other places it is called 'Azzūziya after Muṣṭafā b. Muḥammad b. 'Azzūz.

Life of the Founder. His family belonged to the tribe Ait Smā'il, part of the confederation *Gashtula* in the *Ḳabīliya Djurdjura*; having studied at his home, and then in Algiers, he made the pilgrimage in 1152 (1739–1740), and on his return spent some time as a student at al-Azhar in Cairo, where Muḥammad b. Sālim al-Hafnawī (d. 1181: *Silk al-Durar*, iv. 50) initiated him into the *Khalwati* Order, and ordered him to propagate it in India and the Sudan; after an absence of thirty years he returned to Algeria, and commenced preaching in his native village, where he founded a *sāwīya*; he seems to have introduced some modifications into *Khalwati* practice, and in his Seven Visions of the Prophet Muḥammad made some important claims for his person and his system; immunity from hell-fire was to be secured by affiliation to his order, love for himself or it, a visit to himself, stopping before his tomb, hearing his *dhikr* recited. His success in winning adherents provoked the envy of the local *murābiṭs*, in con-

sequence of which he migrated to Ḥamma in the neighbourhood of Algiers. Here too his activities met with opposition from the religious leaders, who summoned him to appear before a *maḍjlis* under the presidency of the Mālikite Muftī 'Alī b. Amin; through the influence of the Turkish authorities, who were impressed by the following which he had acquired, he was acquitted of the charge of unorthodoxy, but he thought it prudent to return to his native village, where shortly afterwards he died, leaving as his successor 'Alī b. 'Isā al-Maghribī. His corpse is said to have been stolen by the Turks and buried with great pomp at Ḥamma with a *ḳubba* and a mosque over it. The Ait Smā'il however maintained that it had not left its original grave, whence it was supposed to have been miraculously duplicated, and the title *Abū Ḳabrain* "owner of two graves" was given him.

History and propagation of the Order. 'Alī b. 'Isā al-Maghribī was undisputed head from 1208 (1793–1794) to 1251 (1836–1837); his successor died shortly after, and from the following year, though the Order continued to win adherents, it divided into independent branches. This was owing to the objections raised by the Ait Smā'il to the succession of al-Ḥādjdj Bashīr, another Maghribī; in spite of the support of 'Abd al-Ḳādir (the famous enemy of the French) he had to quit his post, which was held for a time by the widow of 'Alī b. 'Isā, who, however, owing to the dwindling of the revenues of the *sāwīya* had ultimately to summon Bashīr back. Meanwhile the founders of other *sāwīyas* were assuming independence. After the death of Bashīr in 1259 (1843–1844) her son-in-law al-Ḥādjdj 'Ammār succeeded to the headship. Finding his influence waning owing to his failure to participate in the attack on the French organized by Bū Baghla he in August 1856 called his followers to arms and obtained some initial successes; he was however compelled to surrender in the following year, and his wife (or mother-in-law) at the head of a hundred *khwān* shortly after. Bashīr retired to Tunis, where he endeavoured to continue the exercise of his functions, but he was not generally recognized as head of the order, and his place among the Ait Smā'il was taken by Muḥammad Amziān b. al-Ḥaddād of Ṣaddūk, who at the age of 80 on April 8, 1871 proclaimed *djihad* against the French, who had recently been defeated in the Franco-Prussian War. The insurrection met with little success, though it spread far, and on July 13 Ibn al-Ḥaddād surrendered to General Saussier, who sent him to Bougie. The original *sāwīya* was closed as a precautionary measure.

His son 'Azīz, who had been transported to New Caledonia, succeeded in escaping to Djidda, whence he endeavoured to govern the community; but various *muḳaddams* who had been appointed by his father, as well as other founders of *sāwīyas*, asserted their independence. Lists are given by Depont and Coppolani of these persons and their spheres of influence, which extend into Tunisia and the Sahara. In their work the numbers of the adherents to the Order are reckoned at 156,214 (1897). Rinn notices that the Raḥmāniya of Tolga regularly maintained good relations with the French authorities.

Practices of the Order. The training of the *murīd* consists in teaching him a series of seven

"names", of which the first is the formula *lā ilāha illa 'llāh*, to be repeated from 12,000 to 70,000 times in a day and night, and followed by the others, if the *shāikh* is satisfied with the neophyte's progress; these are 2. *Allāh* three times; 3. *huwa*; 4. *ḥaḥḥ* three times; 5. *ḥayī* three times; 6. *ḥayyūm* three times; 7. *ḥaḥḥār* three times (Rinn states that the *dhikr* of the Order consists in repeating at least 80 times from the afternoon of Thursday to that of Friday the prayer ascribed to *Shādhili*, and on the other weekdays the formula *lā ilāha illa 'llāh*. Favourite lessons are the "Verse of the Throne" followed by *Sūras* i., cxii.—cxiv. (prescribed in the Founder's diploma, translated by A. Delpech, in *R. A.*, 1874) and the Seven Visions mentioned above (translated by Rinn, p. 467).

Literature of the Order. Most of this would seem to be still in MS.; the founder is credited with several books. A. Cherbonneau, in *J. A.*, 1852, p. 517 describes a catechism called *al-Raḥmāniya* by Muḥammad b. Bakhtarzi with a commentary by his son Muṣṭafā, perhaps identical with a work called by French writers *Présents dominicaux*. Another work belonging to the Order which they mention is called *al-Rawḍ al-bāsim fī Manāḥib al-Shāikh Muḥammad b. al-Ḳāsim*.

(D. S. MARGOLIOUTH)

RAHN (A.), pledge, security; *rāhin*, the giver and *murtahin*, the taker of the pledge. The *Ḳur'ān* (ii. 283), obviously in confirmation of pre-Islāmic legal usage, provides for the giving of pledges (*riḥānūn maḥbūda*) in business in which a definite period is concerned, if the preparation of a written document is impossible. The part here played by the security as evidence of the existence of an obligation is in Islāmic law much less important than that of securing the fulfilment of a demand. From the latter point of view the traditions are mainly concerned with two questions: *a.* whether the security in case of non-fulfilment passes without more ado into the ownership of the creditor or not (the two answers are crystallised in the legal maxims *al-rahn bi-mā fīh* or *al-rahn lā yaghlaḥ*); and *b.* who is entitled to use it and is bound to maintain it (the answer often found in earlier authorities that the taker of the pledge may enjoy its use if he sees to its maintenance, later fell out into disuse). According to the doctrine of Muslim law, the giver of the pledge is bound to maintain it, but can enjoy the use of it only according to the *Shāfi'is*; its use by the taker of the pledge is also forbidden (except by the *Ḥanbalis*); the yield (increase) belongs to the giver of the pledge but also becomes part of the security (except with the *Shāfi'is*); the taker of the pledge is responsible for it according to the *Ḥanafis* and (with limitations) the *Mālikis*. Among the *Shāfi'is* and the *Ḥanbalis* the agreement regarding the security is regarded as a bailment-relationship (with much less responsibility). The basis for the condition of a pledge must be a claim (*dāin*); the accessory

character of the security is in general allowed; but exceptional cases are recognised in which the debt is extinguished by the disappearance of the security i. e. the risk passes to the taker of the pledge. While the ownership of the pledge remains with the debtor, he has no power of disposal over it and possession passes to the creditor; the latter has the right to sell it to satisfy his claim if the debt becomes overdue or is not paid. Mortgage is unknown as well as a graded series of rights to the same object of pledge. To be distinguished from the pledge is the detention (*ḥabs*) of a thing to enforce fulfilment of a legal claim, which represents a concrete right afforded by the law in individual cases so that it has contacts with the legal right to pledge.

RA'IS AL-KUTTĀB, RA'IS EFENDI. [See RE'IS.]

RAIY, the ancient Ragha, a town in Media. Its ruins may be seen about 5 miles S. S. E. of Teheran [q. v.] to the south of a spur projecting from Elburz into the plain. The village and sanctuary of *Shāh 'Abd al-'Azīm* lie immediately south of the ruins. The geographical importance of the town lies in the fact that it was situated in the fertile zone which lies between the mountains and the desert, by which from time immemorial communication has taken place between the west and east of Irān. Several roads from Māzandarān [q. v.] converge on Raiy on the north side.

In the Avesta, *Widēwdāt*, i. 15, *Raghā* is mentioned as the twelfth sacred place created by Ahura-Mazda. *Yasna*, xix. 18, calls it *zābruratuš Ragha zaraḥustriš* "Zoroastrian Ragha possessing four degrees of hierarchy" because at Ragha the representative of the prerogatives going back to Zoroaster (*Zarabuštrote*) held also the powers of a prince (*ratuš dahyūmō*) while elsewhere these two dignitaries with the three categories of chief subordinates, formed five degrees of hierarchy. The Middle Persian commentary deduces from this that Zoroaster must have belonged to Ragha. The town is also called *tri-santu* (*Widēwdāt*, i. 15), which Bartholomae interprets as possessing "three districts" (drei Gaue besitzend) although the explanation of the Middle Persian commentary is: "possessing three estates (social classes) for the priests, warriors and cultivators there were good" (cf. Bartholomae, *Altiran. Wörterbuch*, col. 579, 811, 1497; cf. Marquart, *op. cit.*, p. 122). The later commentaries put Raiy in Atropatene in conformity with the late tendency to localise events in sacred history in this province.

In the Old Persian inscriptions (Bh. 2, 10-18) Ragā appears as the province of Media in which in the autumn of 521 B. C. the false king of Media Frawartish sought refuge in vain; from Raga also Darius sent reinforcements to his father Wishtāspa when the latter was putting down the rebellion in Parthia (Bh. 3, 1-10).

Rages is also mentioned in the apocrypha. Tobit sent his son Tobias from Nineveh to recover the silver deposited in Rages with Gabael, brother of

Gabrias (Tobit, i. 14). The book of Judith (i. 15) puts near Ragau (if it only were Ragha!) the plain in which Nebuchadnezzar defeated the king of Media, Arphaxad (Phraortes?).

In the summer of 330 B.C., Alexander the Great following Darius III took 11 days to go from Ecbatane to Rhagae (Arrian, 3, 20, 2). Diodorus relates that Antigonos passed near Rhagae after his victory over his rival Eumenes (316 B.C.). According to Strabo, xi. 9, 1 and xi. 13, 6, Seleucus Nicator (312—280) rebuilt Rhagae under the name of Eurōpos (in memory of his native town in Macedonia) and that near Eurōpos the towns of Laodicea, Apamea and Heraclea were peopled with Macedonians. After the coming of the Parthians the town was renamed Arsakia. It is however possible that all these towns although situated in the same locality occupied slightly different sites for they are mentioned side by side in the authorities. Rawlinson (*J. G. S.*, x. 119) would put Eurōpos at Warāmīn [q. v.]. Athenaeus in *Deipnosophistae*, says that the Parthian kings spent the spring at Rhagae (*ἐν Πάργαις*) and the winter at Babylon (see the details in A. V. W. Jackson, and Weissbach). The Greek popular etymologies which explain the name Rhaga as alluding to earthquakes seem to reflect the frequency of this phenomenon in this region so close to Damāwand.

In the Sāsānian period Yazdagird III in 641 issued from Raiy his last appeal to the nation before fleeing to Khurāsān. The sanctuary of Bibi Shahr-Bānū situated on the south face of the already mentioned spur and accessible only to women is associated with the memory of the daughter of Yazdagird who, according to tradition, became the wife of Husain b. 'Alī. In the years 486, 499, 553 A.D. Raiy is mentioned as the see of bishops of the Eastern Syrian church.

Arab conquest. The year of the conquest is variously given (18—24 = 639—644) and it is possible that the Arab power was consolidated gradually. As late as 25 (646) a rebellion was suppressed in Raiy by Sa'd b. Abi Waqqās. The Arabs seem to have profited by the dissensions among the noble Persian families. Raiy was the fief of the Mīhrān family and, in consequence of the resistance of Siyāwakhsh b. Mīhrān b. Bahrām Čubin, Nu'aim b. Muḥarrin had the old town destroyed and ordered Farrukhān b. Zainabi (Zainadi?) b. Kūla [cf. MAŠMUGHĀN] to build a new town (Tabarī, i. 2655). In 71 (690) again a king of the family of Farrukhān is mentioned alongside of the Arab governor.

The passing of power from the Omayyads to the 'Abbāsids took place at Raiy without incident but in 136 (753) the "Khurrami" Sunbadh, one of Abū Muslim's stalwarts, seized the town for a short time. The new era for Raiy began with the appointment of the heir to the throne Muḥammad Mahdī to the governorship of the east (141—152 = 758—768). He rebuilt Raiy under the name of Muḥammadiya and surrounded it by a ditch. The suburb of Mahdī-ābād was built for those of the inhabitants who had to give up their property in the old town. Hārūn al-Rashīd, son of Mahdī, was born in Raiy and used often to recall with pleasure his native town and its principal street. In 195 (810) Ma'mūn's general Ṭāhir b. Ḥusain won a victory over Amīn's troops near Raiy. In 250 (865) the struggle began in Raiy between the Zaidī 'Alids of Ṭabaristān and first the Ṭāhirids and later the caliph's Turkish generals. It was

not till 272 (885) that Ādhgū-tegin of Kāzwin took the town from the 'Alids. In 261 (894) the caliph Mu'tamid wishing to consolidate his position appointed to Raiy his son, the future caliph Muktafi. Soon afterwards the Sāmānids began to interfere in Raiy. Ismā'il b. Aḥmad seized Raiy in 289 (912) and the fact accomplished was confirmed by the caliph Muktafi. In 296 Aḥmad b. Ismā'il received investiture from Mukṭadir in Raiy (Gardīzī, p. 21—22).

In the tenth century Raiy is described in detail in the works of the contemporary Arab geographers. In spite of the interest which Baghdād displayed in Raiy the number of Arabs there was insignificant and the population consisted of Persians of all classes (*akhlāf*; Ya'kūbī, in *B. G. A.*, vii. 276). Among the products of Raiy Ibn al-Faḳīh, p. 253, mentions silks and other stuffs, articles of wood and "lustre dishes", an interesting detail in view of the celebrity enjoyed by the ceramics "of Rhages". All writers emphasise the very great importance of Raiy as a commercial centre. According to Iṣṭakhri, p. 207, the town covered an area of 1½ by 1½ farsakhs, the buildings were of clay (*ṭin*) but the use of bricks and plaster (*djīss* = *gač*) was also known. The town had five great gates and eight large bazaars. Muḥaddasī, p. 391, calls Raiy one of the glories of the lands of Islām and among other things mentions its library in the Rūḍha quarter which was watered by the Sūrḳānī canal.

Dailamī period. In 304 (916) the lord of Ādharbājdjān Yūsuf b. Abi 'l-Sādj occupied Raiy out of which he drove the Dailamī Muḥammad b. 'Alī Šu'lūk who represented the Sāmānid Naṣr (Ibn al-Aṭhīr, viii. 74). This occupation, commemorated in coins struck by Yūsuf at Muḥammadiya, was the beginning of a troubled period. Raiy passed successively into the hands of the Dailamī 'Alī b. Wahsūdān, Waṣīf Bektimūrī, the Dailamī Aḥmad b. 'Alī and of Muṣṭafī, slave of Yūsuf (in 313 = 925; cf. R. Vasmer, *O monetakh Sadjidoi*, Baku 1927). Lastly the Sāmānids encouraged by the caliph succeeded in bringing Raiy again within their sphere of influence but soon their general Asfār (a Dailamī) became independent in Raiy. In 318 (930), Asfār was killed by his lieutenant Mardāwīdj [q. v.] (a native of Gilān and one of the founders of the Ziyārid dynasty) who took over his master's lands (C. Huart, *Les Ziyārides*, 1922, p. 363 [= 11]).

After the assassination of Mardāwīdj (323 = 925) the Būyids established themselves in Raiy, which became the fief of the branch of Rukn al-Dawla which held out there for about 100 years. In 390 (1000) the last Sāmānid al-Muntaṣir made an attempt to seize Raiy but failed. In 420 (1027) the Būyid Maḍjīd al-Dawla was ill-advised enough to invoke against the Dailamis the help of Maḥmūd of Ghaznī, who seized his lands (cf. Muḥammad Nazim, *Sulṭān Maḥmūd*, 1931, p. 80—85). The brief rule of the Ghaznawids was marked by acts of obscurantism, like the destruction of books on philosophy and astrology and the atrocious persecutions of the Karmāṭians and Mu'tazilis (Gardīzī, p. 91; Ibn al-Aṭhīr, ix. 262).

The Saldjūks. The Ghuzz laid Raiy waste in 427 (1035) and in 434 (1042) the town, where Maḍjīd al-Dawla still held out in the fort of Ṭabarak (Ibn al-Aṭhīr, ix. 347), fell into the power of the Saldjūks and became one of their principal cities. The last Būyid al-Malik al-Raḥīm died a prisoner

in Ṭabarak in 450 (1058) (or in 455; cf. H. Bowen, in *J. R. A. S.*, 1929, p. 238) and the new lord Ṭughril [q. v.] also died at Raiy in 455 (1063). Henceforth Raiy is constantly mentioned in connection with events relating to the Great Salḍjūks and their branch in Persian 'Irāk.

From the reign of Ghīyāth al-Dīn Mas'ūd (529—547 = 1133—1152) Raiy was ruled by the amīr Inandj whose daughter Inandj-Khātūn became the wife of Pahlawān, son of the famous atābeg of Ādharbāidjān, Ildegiz. When the latter put on the throne Sultān Arslān-Shāh (whose mother he had married) Inandj opposed this nomination but was defeated in 555 (1160). Inandj withdrew to Bistām but with the help of the Khwārizmshāh Il-Arslān reoccupied Raiy. He was finally murdered at the instigation of Ildegiz who gave Raiy as a fief to Pahlawān. Later the town passed to Ḳutluḡ Inandj b. Pahlawān who, like his maternal grandfather, brought about the intervention of the Khwārizmshāh Takish in the affairs of Persia (588 = 1192). Two years later in a battle near Raiy, the last Salḍjūk Ṭughril III was killed by Ḳutluḡ Inandj but the country remained with the Khwārizmians. In 614 (1217) the atābeg of Fārs Sa'd b. Zangī succeeded in occupying Raiy but was almost immediately driven out by the Khwārizmshāh Djalāl al-Dīn (cf. Nasawī, ed. Houdas).

Civil wars. Muḳaddasī, p. 391, 395—396 mentions the dissensions (*ʿaṣabiyyāt*) among the people of Raiy in matters of religion. Under 582 (1186—1187) Ibn al-Aṭhīr, xi. 237, records the damage done in Raiy in the civil war between Sunnis and Shī'īs: the inhabitants were killed or scattered and the town left in ruins. Yāḳūt who, fleeing before the Mongols, went through Raiy in 617 (1220) gives the results of his enquiry about the three parties: the Hanafīs, the Shāfi'īs, and the Shī'īs of which the two first began by wiping out the Shī'īs who formed half the population of the town and the majority in the country. Later the Shāfi'īs triumphed over the Hanafīs. The result was that there only survived in Raiy the Shāfi'ī quarter which was the smallest. Yāḳūt describes the underground houses at Raiy and the dark streets difficult of access which reflected the care of the inhabitants to protect themselves against enemies.

The Mongols. The Mongols who occupied Raiy after Yāḳūt's visit dealt it the final blow. Ibn al-Aṭhīr (xii. 184) goes so far as to say that all the population was massacred by the Mongols in 617 (1220) and the survivors put to death in 621 (1224). It is however possible that the historian, echoing the panic which seized the Muslim world, exaggerates the extent of the destruction. Djuwainī (ed. Muḥammad Khān Ḳazwīnī, i. 115) only says that the Mongol leaders put many people to death at Khwār Raiy (in the country inhabited by Shī'īs?) but in Raiy they were met by the (Shāfi'ī?) ḳādī who submitted to the invaders (*il shud*), after which the latter went on. Rashīd al-Dīn (ed. Bérézine, in *Trud. V. O.*, xv. 135 [transl. p. 89]) admits that the Mongols under Djebe and Subuday killed and plundered (*kushish wa-ghārat*) at "Raiy" but he seems to make a distinction between Raiy and Ḳum, in which the inhabitants were completely (*ba-kull*) massacred.

The fact that life was not completely extinguished at Raiy is evident from the dates of pottery which apparently continued to be made in Raiy (cf. Guest, *A dated Rayy bowl*, in *Burlington Magazine*, 1931,

p. 134—135: the painted bowl bears the date 640 = 1243). The citadel of Ṭabarak was rebuilt under Ghāzān Khān (1295—1304) but certain economic reasons (irrigation?) if not political and religious reasons, must have been against the restoration of Raiy and the centre of the new administrative Mongol division (the *tumān* of Raiy) became Warāmīn [q. v.] (cf. *Nushat al-Ḳulūb*, in *G.M.S.*, p. 55). After the end of Hülāgū's dynasty, Raiy fell to the sphere of influence of Ṭughā-Timūr [q. v.] of Āstarābād. In 1384, Timūr's troops occupied Raiy without striking a blow but this must mean the district and not the town of Raiy, for Clavijo (ed. Sreznevsky, p. 187) who passed through this country in 1404 confirms that Raiy (*Xahariprey* = *Shahr-i Raiy*) was no longer inhabited (*agora deshabitada*). No importance is to be attached to the mention of "Raiy" in the time of Shāh-Rukh (*Maṭla' al-Sa'dain*, under the year 841 = 1437) or of Shāh Ismā'īl, *Ḥabīb al-Siyar*.

The ruins of Raiy. Ölivier in 1797 sought them in vain and it was Truilhier and Gardane who first discovered them. The earliest descriptions are by J. Morier, Ker Porter and Sir W. Ouseley. The first has preserved for us a sketch of a Sāsānian bas-relief which was later replaced by a sculpture of Faṭḥ 'Alī Shāh. The description and particularly the plan by Ker Porter (reproduced in Sarre and A. V. W. Jackson, *Persia*) are still of value because since his time the needs of agriculture and unsystematic digging have destroyed the walls and confused the strata. Large numbers of objects of archæological interest and particularly the celebrated pottery covered with paintings have flooded the European and American markets as a result of the activity of the dealers. Scientific investigation was begun by the universities of Philadelphia and Boston in 1934 (cf. *The Illustrated London News*, June 22, 1935, p. 1122—1123; E. F. Schmidt, *The Persian Expedition [Rayy]*, in *Bulletin University Museum*, Philadelphia, v., 1935, p. 41—49; cf. p. 25—27). In the citadel hill, Dr. Erich Schmidt found a great variety of pottery and the remains of buildings among which the most interesting are the foundations of Mahdī's mosque (communication by A. Godard to the Congress of Persian Art at Leningrad in Sept. 1935). In an interesting passage, Muḳaddasī, p. 210, speaks of the high domes which the Būyids built over their tombs. According to the *Siyāsāt-nāma*, p. 145, in the time of Fakhr al-Dawla a rich Zoroastrian built an *astōdān* with double roof (*sutūdān ba-du pūshish*) on the top of the hill of Ṭabarak, above the domed tomb (*gunbad*) of Fakhr al-Dawla. The *astōdān*, turned to a new use received the name of *dida-yi sipāh-sālārān* "fort of the commandants" and was still in existence in the time of Nizām al-Mulk. The two towers now to be seen among the ruins of Raiy [both are round in plan, but the one repaired under Naṣīr al-Dīn Shāh has ribbed flanks] are attributed to the Salḍjūks but may continue the Dailamī type of building. The hill of Ṭabarak on which was the citadel (destroyed in 588 [1192] by Ṭughril III) according to Yāḳūt was situated to "the right" of the Khurāsān road while the high mountain was to "the left" of this road. Ṭabarak therefore must have been on the top of the hill opposite the great spur (hill G in Ker Porter's plan: "fortress finely built of stone and on the summit of an immense rock which commands the open

country to the south"); cf. the map in A. F. Stahl, *Die Umgegend v. Teheran*, in *Pet. Mitt.*, 1900.

Ḥusain al-Abī [= Āwā'i]; the author was the vizier of the Būyid Maḍjīd al-Dawla and had access to very good sources; Yāqūt often cites this history (i. 57, s.v. *Abaj*); Quatremère, *Histoire des Mongols*, p. 272—275 (many quotations from the *Mudjal al-Tawārīkh*); Barbier de Meynard, *Dict. géographique*, 1861 (quotations from the *Haft Iklim* of Aḥmad Rāzī); Barthold, *Istor.-geograf. očerḱ Irana*, 1903, p. 84—86; G. Le Strange, *The Lands of the Eastern Caliphate*, p. 214—218; P. Schwarz, *Iran im Mittelalter*, p. 740—809 (very complete utilisation of the Arabic sources; complete list of the dependencies of Raiy). (V. MINORSKY)

RAK'Ā. [See **ṢALĀT**.]

AL-RAḲĀSHI. [See **ABĀN B. 'ABD AL-ḤAMĪD**.]

RAḲĪM. [See **AṢḤĀB AL-KAḤF**.]

AL-RAḲḲA, capital of Diyār Muḍar in al-Djazīra on the left bank of the Euphrates, shortly before it is joined by the Nahr Balikh (Βασίλειος, Βίληχα, Βάλισσος).

The town was in antiquity called Kallinikos. Nikephorion is to be located in the same region (Strabo, xvi. 747; Isidoros of Charax, in *Geogr. Graeci Min.*, ed. Müller, p. 247; Dio Cass., xl. 13; Pliny, *Nat. Hist.*, v. 86; vi. 119; Ptolemy, *Geogr.*, v. 17; Stephen Byz.); but its usual identification with Kallinikos is certainly wrong and it may be a case of two adjoining towns as with the "black" and "white al-RaḲḲa" of the middle ages. Nikephorion was, according to Appian (*Syr.*, p. 57), a foundation of Seleucus I Nikator; later it was ascribed to Alexander the Great (Pliny, *Nat. hist.*, vi. 119; Isid. Char., c. 1) who can hardly have been here and it is hardly likely that towns were founded so shortly before the battle of Gaugamela (cf. Pauly-Wissowa, *R. E.*, v., A, col. 1274, s.v. *Thapsakos*).

Kallinikos owed its name to Seleucus II Kallinikos, who founded the town in 244 or 242 B.C. (*Chron. Pasch.*, ed. Dindorf, i. 330; Mich. Syr., ed. Chabot, iv. 78). Libanios (*Epist.*, p. 21, 5; *Opera*, ed. Förster, x. 19, 8—12) wishes to derive the name from the sophist Kallinikos who was murdered there; it is however hardly likely that the town, the name of which (Syriac Ḳalonīḳos, Ḳaliniḳos) the Christian Syrians retained in the middle ages, was called after a pagan orator, and

in any case, if it were so, we would expect a name like Kallinikeia. In any case the site of Kallinikos corresponds to that of the mediaeval al-RaḲḲa, with which the Syrian historians always identified it. In the time of the emperor Julian, Kallinikos was a strong fortress and an important commercial centre (Ammian. Marcell., xxiii. 3, 7). In the year 393 a Jewish synagogue was burned in the *Castrum Callinicum*; the emperor Theodosius therefore ordered the bishop of the town to rebuild it (Ambrosius, *Epist. ad Theodos.*; Migne, *Patrol. Lat.*, xvi., col. 1105 sq.). The emperor Leo in 777 Sel. (466 A.D.) rebuilt Kallinikos in Osrhoëne, called it Leontopolis and appointed a bishop there (probably the successor of the Damianos mentioned in 451 and 458) (*Edessene Chronicle*, ed. Hallier, in *Texte u. Untersuch.*, ix. 1, Leipzig 1893, p. 116, 152; Barhebr., *Chron. syr.*, ed. Bedjan, p. 77; Leontopolis: Hierokl., *Synekdem.*, p. 715, 1; Geogr. Cyp., ed. Gelzer, p. 897). Towards the end of the year 503, Timostratos bravely defended the fortress against the Persians and took one of Ḳawādh I's officers prisoner but had to release him as the king threatened to destroy the town completely (Joshua Stylites, ed. Martin, in *Abh. K. M.*, vi. 1, Leipzig 1876, p. lxxv.). The Syrian church historians from the beginning of the viii century frequently mention the monastery of Mar Zakkai, Arabic Dair Zakkā, in the angle formed by the Nahr Balikh and the Euphrates or the Nahr al-Nil Canal not far from Kallinikos (*Vitae viror. apud monophysitas celeberr.*, ed. Brooks, in *C. S. C. O.*, ser. iii., vol. xxv., Paris 1907, p. 38; Mich. Syr., iv. 414 sq.; al-Shābushtī, *Kitāb al-Diyārūt*, cod. Berol., fol. 95v; Yāqūt, *Mu'djam*, ed. Wüstenfeld, ii. 664; iv. 862). Between al-RaḲḲa and Bālis lay the celebrated monastery of Dair Ḥannīnā not far from Sura (G. Hoffmann on Zacharias Rhetor, transl. Ahrens-Krüger, p. 159, 20; Johann. v. Ephes., iv. 22; Mich. Syr., ii. 361; iii. 453 and *passim*; Barhebr., *Chron. eccles.*, ed. Abbeloos-Lamy, i. 244, 250; F. Nau, in *R. O. C.*, xv., 1910, p. 63, note 1; Yāqūt, ii. 350 and *passim*; often wrongly called "monastery of Ḥanania", e.g. in Musil, *The Middle Euphrates*, p. 329).

In 529, Justinian enacted that trade with the Persians should be conducted at the frontier towns of Nisibis, Kallinikos and Artaxata (*Cod. Iust.*, ed. Krüger, iv. 63, 4, p. 188; Bury, *History of the Later Roman Empire*, ii., 1923, p. 3). Khusrāw I on his third campaign against Syria (542) took the town without difficulty (Procop., *Bell. Pers.*, ii. 21, 31; *Anecd.*, iii. 31) because at the time the walls had been partly taken down in order to be rebuilt. The town was destroyed but later fortified again by Justinian with walls and bulwarks and "made impregnable" (Proc., *De aed.*, ii. 7; James of Edessa, *Chronol. Canon*, ed. Brooks, in *Z. D. M. G.*, liii. 300; Mich. Syr., ed. Chabot, iv. 287). The *κόμες* Ἀνατολῆς Maurikios in 580 had to retire to Kallinikos before Ἀdharmahan but put him to flight there (Theophyl. Sim., iii. 17, 8 sq.; Chapot, *La Frontière de l'Euphrate*, p. 289, note 3 and E. Herzfeld, *Archäol. Reise*, i. 159 make the "emperor" Maurikios flee to the fortress before Hormisdas).

The Arabs in 18 (639) or 19 (640) under 'Iyād b. Ghannam encamped before the N.W. gate of the town, Bāb al-Ruḥā'; after 5 or 6 days the Patricios who governed the town asked for peace and surrendered it to him and the inhabitants

were promised security of life and property. Their churches were not to be destroyed or occupied so long as they paid their tribute and committed no act of hostility; on the other hand they were not to build new churches or sacred places and not to observe Christian customs or festivals publicly (al-Balādhurī, *Futūḥ al-Buldān*, ed. de Goeje, p. 173 sq.; Ibn al-Athīr, ed. Tornberg, ii. 439). On the death of 'Iyād, Sa'īd b. 'Āmir b. Dīdhaym became governor of al-Djazīra; he built a mosque in al-Rakka (al-Balādhurī, p. 178; Herzfeld, *Arch. Reise*, ii. 353). It was built of bricks of clay and marble taken from ancient buildings (Herzfeld, *op. cit.*, with fig. 324-329); its Manārat al-Munaitir still marks the ruins that represent the ancient al-Rakka.

In the great battle of Siffin in 36 (656) 'Alī crossed the Euphrates at al-Rakka on a bridge of boats, which he ordered the inhabitants to build, with his infantry and whole equipment to the Syrian bank (al-Tabarī, i. 3259; Ibn Miskawaih, *Tadjarīh*, ed. Caetani, p. 571). According to the *Diwān* of 'Ubaid Allāh b. Kaīs al-Ruḳaiyāt, who died in 690 (ed. Rhodokanakis, in *S. B. Ak. Wien*, CXLIV/x., Vienna 1902, p. 222), al-Rakka and al-Kalas (?) were then in ruins and practically uninhabited but this is poetic exaggeration (Musil, *The Middle Euphrates*, p. 329 sq.). He calls the town (p. 285) al-Rakka al-Sawda' to distinguish it from al-Rakka al-Baida', which is mentioned in the *Diwān* of al-Akḥṭal for example (ed. Šālḥānī, p. 304). The name al-Rakka itself may be of Arabic origin ("swampy marshes on a river with periodical inundations"); the similarity of the names of al-Rakka and al-Rāfiḳa to those of two Aramaic tribes of the Assyrian period, Rakhiḳu (*sic!*) and Rapiḳu (Herzfeld, *Arch. Reis* i. 159, note 9), is no doubt quite accidental.

On the south bank, opposite the town between two canals (al-Hanī wa 'l-Marī), was the suburb of Waṣīt al-Rakka, where Hishām b. 'Abd al-Malik built two palaces and a bridge over the Euphrates (Yāqūt, ii. 802; iv. 889, 994; Ps.-Dionys. of Telmaḥrē, ed. Chabot, p. 26, 31; Mich. Syr. iv. 457; Barhebr., *Chron. syr.*, ed. Bedjan, p. 118).

The governor of al-Ruḥā, the Kaīsī Maṣṣūr b. Dja'wana b. al-Hārith al-'Āmirī, after whom Hiṣn Maṣṣūr was called, was executed after his rebellion in 141 (758-759) by the 'āmil of Abu 'l-'Abbās, al-Manṣūr, in al-Rakka (al-Balādhurī, p. 192).

The caliph al-Manṣūr in 155 (772) built alongside of al-Rakka a new town al-Rāfiḳa and settled Khurāsānians there who were devoted to his dynasty (Ibn al-Faḳīh, in *B. G. A.*, v. 132). The superintendence of the building of the new town was given by him to al-Mahdī, the heir-apparent. It was planned in the shape of a horse-shoe and was in many respects modelled on the round city of al-Manṣūr in Baghdād (al-Tabarī, iii. 276, 372 sq.; Ibn Ḥawkal, in *B. G. A.*, ii. 153; al-Balādhurī, p. 179; al-Ya'qūbī, *Kitāb al-Buldān*, in *B. G. A.*, vii. 238, *Ta'riḳh*, ed. Houtsma, ii. 430; Ibn al-Faḳīh, in *B. G. A.*, v. 132; Yāqūt, *Mu'djam*, ed. Wüstenfeld, ii. 734 sq.; Mich. Syr., ii. 526, iii. 10, 297 = iv. 476, 483, 640; Ps.-Dionys. of Telmaḥrē, p. 120 sq.; Herzfeld, *op. cit.*, i. 160). Two canals were led from the Euphrates and from the region of Sarūdj to supply the new town with water (Mich. Syr., iii. 10). This new town to which the name al-Rakka came to be transferred from the old town now falling into ruins, had, according to Arab authors (e. g. al-Balādhurī, p. 179), no remains

of antiquity and indeed the modern al-Rakka, the "horse-shoe city", except for a few fragments built into the walls seems to possess no ancient ruins. The ancient Kallinikos has therefore wrongly been located here (Sachau, *Reise in Syrien u. Mesop.*, p. 242; Chapot, *La Frontière de l'Euphrate*, p. 289 sq., where fig. 8 "Nicephorium-Callinicum" is really the plan of the mediaeval al-Rāfiḳa!).

Between al-Rakka (al-Ḥamra' of Musil's map) and al-Rāfiḳa there soon rose a suburb with bazaars to which the markets of al-Rakka (including the largest, Suḳ Hishām al-'Atīḳ) were transferred by 'Alī b. Sulaimān b. 'Alī, governor of al-Djazīra, and as a result the two adjoining towns gradually developed into a twin city (al-Rakkaṭān) (al-Balādhurī, p. 179; Yāqūt, ii. 734, 802; Ibn Ḥawkal, *B. G. A.*, ii. 153). This suburb was burned in 1123 Sel. (812) by the rebels 'Amr and Naṣr b. Šabath along with the adjoining "pillared monastery" (Mich. Syr., iii. 26). 'Abd al-Malik b. Šāliḥ [q. v.] died in the same year in al-Rakka. In the fighting that followed, the 'Aḳōlayē (of al-Kūfa) became lords of al-Rakka and the Persians of al-Rāfiḳa (Mich. Syr., iii. 30). In the reign of Ma'mūn in 816, Ṭāhir built a wall between al-Rakka and al-Rāfiḳa (Mich. Syr., iii. 36).

The walls of the old town fell into ruins at quite an early date (Aḥmad b. al-Ṭaiyib al-Sarakhsī in Yāqūt, *loc. cit.*), and in 375 (985-986) the old al-Rakka was now only a suburb of the western town. As the name al-Rakka came into use for the latter (Yāqūt, *loc. cit.*), in the end it became no longer possible to distinguish between al-Rakka and al-Rāfiḳa (also al-Maḳdisī, cf. E. Herzfeld, *Arch. Reise*, i. 160, note 7, p. 161). At the beginning of the xiiith century the old al-Rakka was completely in ruins (Yāqūt, ii. 734, 751; Ibn Ḥawkal, p. 153; al-Maḳdisī, p. 141; Abu 'l-Fidā', ed. Reinaud, p. 277).

Besides al-Rakka, the capital of Diyār Muḍar, al-Maḳdisī and others mention also "burned al-Rakka" (al-Rakka al-Muḥṭariḳa), i. e. Rakka al-Sawda' on the Balīḳh, a farsakh below the "white town" (Yāqūt, i. 31; ii. 802; Ibn Rusta, p. 90; al-Maḳdisī, p. 20, 54, 141). It was also called "crooked al-Rakka" (al-'Awḍjā') and corresponds to the present ruins of al-Rakka al-Samra'.

Badr al-Dīn 'Abd al-Raḥmān al-Ba'labakkī (Ahlwardt, v. 413, on N^o. 6104) wrote a *risāla* on al-Rakka.

According to Herzfeld, the following larger groups of ruins lie in the area of al-Rakka in addition to Hiraḳla which is in the neighbourhood:

1. The "horseshoe town" with high walls, still standing, which form a semicircle on the north, while in the south they run in a straight line along the banks of the Euphrates and enclose an area of 1,92 sq. km. (Herzfeld, *Arch. Reise*, ii. 356 sqq.; plan: plate lxiii.). It corresponds to al-Rāfiḳa founded by Maṣṣūr, to which the name al-Rakka was later transferred. Roughly in the centre of the northern round part of this part of the town lie the ruins of a large mosque, the "mosque intra muros" the front of the court of which with a round minaret (Sarre-Herzfeld, ii. 359; iii., pl. lxvi.-lxix. and fig. 33-340), according to an inscription, was restored by the Zangid Nūr al-Dīn Maḥmūd in 561 (1165-1166) (van Berchem in Sarre-Herzfeld, i. 4-6). Nūr al-Dīn occupied al-Rakka in 554 (1159) and gave it from 562 (1167) to 566 (1171) to his brother Maḥmūd

(Ibn al-Athīr, ed. Tornberg, xi. 167, 216; Kamāl al-Dīn, transl. Blochet, in *R.O.L.*, iii. 532, 550). Yāqūt mentions a gate called Bāb al-Djīnān (Yāqūt, i. 443; ii. 125). The gate on the S.E. corner of al-Faṣīl, a brick building on the inner side of the ditch, is still standing (Herzfeld, ii. 358; iii., pl. lxx.; fig. 330—332). Not far from it is the so-called palace, "a plaster-covered brick building with cramps of wood" without inscriptions (Herzfeld, ii. 363; pl. lxxix. sq.; fig. 342—344). On the S.W. corner of this area of ruins is the modern village of al-Rakka.

2. East of the S.E. corner of the preceding area is a smaller site (called al-Hamrā' on Musil's map) "the feature of which is a high quadrangular minaret called Ma'adhanat al-Munaiṭir" which belonged to the "mosque extra muros" (Herzfeld, i. 156; ii. 354, fig. 327). This area of ruins corresponds to the ancient town.

3. An hour further east on the Balikh are the ruins of "grey Rakka" (Rakka al-Samra').

4. A little further north, still on the left bank of the Balikh is the high Tell Zāḥan now Tell Zēdān, according to Herzfeld (i. 157, note 3; ii. 350) and Musil (*The Middle Euphrates*, p. 91, note 9) certainly the ancient Zenodotion.

In the area of these ruins are a number of Muslim saints' graves including those of the *tābi'* [q. v.] 'Uwais al-Karānī and 'Ummār b. Yāsir, whose names however were differently given to Sachau (*Reise in Syr. u. Mesop.*, p. 242 sqq.) and Herzfeld (i. 157; ii. 350) in some cases.

The area of the "horseshoe town" is, according to Herzfeld, "burrowed through and through by treasure-seekers who search here for the Rakka ceramics which fetch exceedingly high prices" and also find glass and bronze, pieces of marble etc. (Herzfeld, i. 158). The blue glazed antique vases which look as if they were enamelled, in the form of amphorae in the Louvre, said to have been found in al-Rakka, therefore certainly came from the eastern old town (Sarre in Sarre-Herzfeld, iii. and iv., cf. *Litteratur*; H. Rivière, *La céramique dans l'art musulman*, 2 vol., 1912—1913; F. Cumont, *Fouilles de Doura-Europos*, Paris 1926, text, p. 460 sq.).

(E. HONIGMANN)

RAKKA, residential city of the Aghlabid emirs of Ifrikiya about 6 miles south of Kairawān, was founded in 263 (876) by Ibrāhīm II, seventh prince of the dynasty. Until then the Aghlabids had resided in 'Abbāsiya [q. v.] nearer the capital. A chance trip into the country by Ibrāhīm, it is said, determined the site of the new residence. The emir was suffering from insomnia and on the advice of his physician, Iṣḥāk b. Sulaimān, went out to take the air. Stopping in a certain place he fell into a deep sleep and decided to build a palace there which was called Rakka, the "soporific". The story is probably based on a popular etymology of the name, which is found elsewhere in North Africa. Another explanation, equally suspect, is that which attributes the name to the memory of a massacre of the Warfaḍjūma by the 'Ibādī chief Abu 'l-Khattāb [q. v.] in 141 (758) and the many dead left lying there.

In the same year that the work of building was begun, Ibrāhīm settled in Rakka in the Castle of Victory (*Qaṣr al-Faṭḥ*). He was to live there the rest of his life, as were his successors, except for the stays the emirs made in Tunis. Rakka became a regular town as al-'Abbāsiya had been before it. Besides Qaṣr al-Faṭḥ (or Qaṣr Abi 'l-Faṭḥ) there were several other castles in it: Qaṣr al-Baḥr (the castle on the lake), Qaṣr al-Ṣaḥn (castle of the court), Qaṣr al-Mukhtār (castle of the elect) and Qaṣr Baghdad, a large mosque, baths, caravanserais and *sūqs*. Al-Bakrī says that it had a circumference of 24,040 cubits (over 6 miles), al-Nuwairi makes it smaller (14,000, nearly 4 miles). A wall of brick and clay surrounded this vast area, and this wall was renovated by the last Aghlabid with a view to a final effort at resistance. Al-Bakrī further tells us that the greater part of the enceinte was filled with gardens. The soil was fertile and the air temperate. The emirs and their followers enjoyed in Rakka a liberty of movement which would have caused a scandal in Kairawān. The sale of *nabidh* [q. v.], forbidden in the pious old city, was officially permitted in the royal residence.

It was from Rakka that Ziyādat Allāh III, the last of the Aghlabids, fled on the approach of the *Shi'is*. The victorious Abū 'Abd Allāh [q. v.] installed himself in Qaṣr al-Ṣaḥn. His master, the Mahdī 'Ubaid Allāh, lived in Rakka until 308 (920) when he moved to al-Mahdiyya. After being deserted by the ruler, Rakka fell into ruins. In 342 (953) the caliph al-Mu'izz ordered what was left of it to be razed to the ground and ploughed over. The gardens alone were spared.

A few traces of the Aghlabid foundation are still to be seen at the present day. A great rectangular reservoir with thick walls strengthened by buttresses may be identified with the lake (*baḥr*) which gave its name to one of the palaces. A pavilion (?) of four stories stood in the centre. Nothing is left of it, but on the west side of the reservoir may be seen the remains of a building which must have been reflected in the great mirror of water. Three rooms may still be distinguished with their mosaic pavements. The technique and style of decoration closely connect these Muḥammadan buildings of the third century A. H. with the Christian art of the country.

(GEORGES MARÇAIS)

RAMAḌĀN (A.), name of the ninth month of the Muḥammadan calendar. The name from the root *r-m-d* refers to the heat of summer and therefore shows in what season the month fell when the ancient Arabs still endeavoured to equate their year with the solar year by intercalary months [see NAST²].

Ramaḍān is the only month of the year to be mentioned in the Qur'ān (Sūra, ii. 185; eastern numbering): "The month of Ramaḍān (is that) in which the Qur'ān was sent down", we are told in connection with the establishment of the fast of Ramaḍān. The discussion on the origin of this edict cannot yet be considered ended; to what has been said in the article ṢAWM have to be added the researches of F. Goitein, *Zur Entstehung des Ramaḍān*, in *Isl.*, xviii. (1929), p. 189 sqq., who in connection with the above mentioned verse of the Qur'ān calls attention to the parallelism between the mission of Muḥammad and the handing of the second tablets of the law to Moses, which according to Jewish tradition took place on the Day of Atonement (*'āshūrā'*, the predecessor of Ramaḍān!) and actually was the cause of its institution. Goitein suggests that the first arrangement to replace the *'Āshūrā'* [q.v.] was a period of ten days (*aiyām ma'dūdāt*, Sūra ii. 184), not a whole month, which ran parallel with the ten days of penance of the Jews preceding the Day of Atonement and survives to the present day in the 10 days of the *i'tikāf* [q.v.]. If we consider further that the Muslim ideas of the *Lailat al-Ḳadr* which falls in Ramaḍān, in which according to Qur'ān lxxxvii. 1, the Qur'ān was sent down, coincide in many points with the Jewish on the Day of Atonement, we must concede a certain degree of probability to Goitein's suggestions, in spite of the undeniable chronological difficulties (alteration of the length of the period of the fast,

within a very short time) and although the final settlement of the term as a whole month is not thereby satisfactorily explained. On the other hand to strengthen Goitein's position, it ought perhaps to be pointed out that the *Lailat al-Bar'ā* [q.v.] precedes Ramaḍān in the middle of the preceding month of Sha'bān. The ideas and practices described by Wensinck in the article SHA'BĀN, which are associated with this night really to some extent resemble Jewish conceptions associated with the New Year — which precedes the Day of Atonement by a rather shorter interval than the *Lailat al-Bar'ā* Ramaḍān — that the connection between the latter and the Day of Atonement is thereby strengthened. If we try to connect the so far unexplained word *bar'ā* with the Hebrew *ber'ā* "creation" and reflect that according to the Jewish idea the world was created on New Year's Day (numerous references in the liturgy of the festival) we have perhaps a further link in the chain of proof; but first of all the age of the ideas associated with the *Lailat al-Bar'ā* must be ascertained.

The legal regulations connected with the fast of Ramaḍān are given in the article ṢAWM [cf. also TARĀWĪḤ]. Of important days of the month, al-Bīrūnī, among others, mentions the 6th as birthday of the martyr Ḥusain b. 'Alī, the 10th as the day of death of Khadiḍja, the 17th as the day of the battle of Badr, the 19th as the day of the occupation of Mecca, the 21st as the day of 'Alī's death, and of the Imām 'Alī al-Riḍā's, the 22nd as birthday of 'Alī and finally the night of the 27th as *Lailat al-Ḳadr* [q.v.].

The name of this night is Qur'ānic; Sūra xcvi. is dedicated to it. It is there described as a night "better than a 1,000 months" in which the angels ascend free from every commission (*bi-idhn Allāh min kull amr*) and which means blessing till the appearance of the red of dawn. The revelation of the Qur'ān, as already mentioned, is expressly located in it. The same night is obviously referred to in Sūra xlv. 2 as a "blessed" one. The date, the 27th, is however not absolutely certain, the pious therefore use all the odd nights of the last ten days of Ramaḍān for good works, as one of them at any rate is the *Lailat al-Ḳadr* [cf. I'ṬIKĀF].

Trade and industry are largely at a standstill during Ramaḍān, especially when it falls in the hot season. The people are therefore all the more inclined to make up during the night for the deprivations of the day. As sleeping is not forbidden during the fast, they often sleep a part of the day; and the night, in which one may be merry, is given up to all sorts of pleasures. In particular the nights of Ramaḍān are the time for public entertainments, the shadow play [cf. KHAYĀL-I ZILL] and other forms of the theatre.

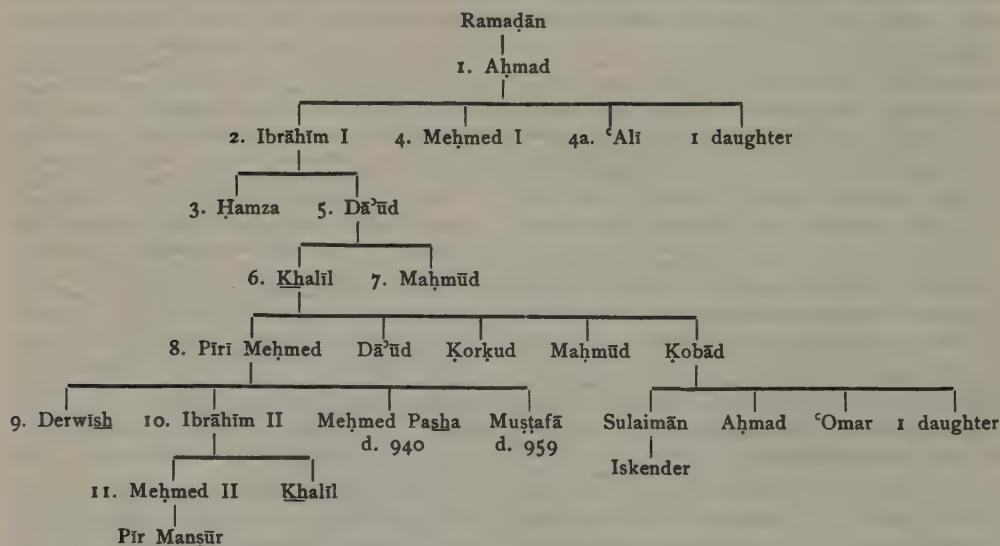

On the termination of the fast by the "little festival", cf. ID AL-FITR.

(M. PLESSNER)

RAMAÐĀN-OGHULLARĪ, a petty Anatolian dynasty. The earlier history of the Ramaḍān-Oghullarī is, like that of most of the minor Anatolian principalities (*ṭawāʾif-i mülūk*), wrapped in obscurity. According to tradition, this Turkoman family came in Ertoghul's time from Central Asia to Anatolia where they settled in the region of Adana and founded their power. Their territory comprised the districts of Adana, Sis, Ayās, a part of the territory of the Warsak Turkomans, Tarsūs, etc. The date of the earliest known prince of the dynasty, Mīr Aḥmad b. Ramaḍān (see below), is put at 780–819 (1379–1416). Nothing definite is known about the real founder, Ramaḍān-Beg. The French traveller Bertrand de la Broquière thus characterizes Mīr Aḥmad b. Ramaḍān: "lequel estoit tresgant personne d'homme et treshardy et la plus vaillante espée de tous les Turcz et le mieulx ferant d'une mache. Et avoit esté filz d'une femme crestienne laquelle l'avoit fait baptiser à la loy gregiesque pour luy enlever le flair et le senteur qu'ont ceux qui ne sont point baptisiez. Il n'estoit ne bon crestien ne bon sarazin" (cf. *Le Voyage d'Outremer de Bertrand de la Broquière*, ed. Ch. Scheffer, Paris 1892, p. 90 sq.). Mīr Aḥmad was succeeded by Ibrāhīm Beg (819–830 = 1416–1427). The beginning of his reign is put by some, e.g. Mehmed Nüzhet Bey, as early as 810, while its end is put in 819. Khalīl Edhem Bey was the first to propose a new chronology, which is here followed. Ibrāhīm Beg was deposed before his death (831) by his eldest son 'Izz al-Dīn Ḥamza-Beg, who reigned from 830. He was succeeded by his uncle Mehmed Beg b. Mīr Aḥmad and the latter's brother 'Alī, who seem to have reigned jointly. Of his successor, his nephew Arslān Dā'ūd b. Ibrāhīm, we only know that he

fell in 885 (1480) in a battle in the vicinity of Diyārbakr. His body was brought to Aleppo and buried there. The history of the Ramaḍān-Oghullarī now becomes a little better known. His son and successor, Ḡhars al-Dīn Khalīl, known from a number of inscriptions (cf. Max v. Oppenheim and Max van Berchem, *Inscripfen aus Syrien, Mesopotamien und Kleinasien*, Leipzig 1909, p. 109 sq., Nrs. 141–145 of the years 898, 900, 906, 913) ruled for 34 years with his brother Maḥmūd-Beg and died in battle in 916 (1510). The date of his death (beginning of *Djumādā l 916* = beginning of Aug. 1510) is known with certainty from his epitaph in Adana, in M. v. Oppenheim and Max van Berchem (*op. cit.*, p. 110, N^o. 145). His son Pīr Mehmed Paṣha, who appears as ruling from 916–976 (1510–1568), distinguished himself as an Ottoman vassal, fighting against the rebels of İt-eli (Anatolia; cf. J. v. Hammer, *G. O. R.*, iii. 71) in May 1528 (*Shā'ibān* 934) as well as in the civil war between the princes Bāyazid and Selīm at Konya (May 1559; cf. J. v. Hammer, *G. O. R.*, iii. 368 sqq.). He died in 972 (1568) in his capital Adana. He had an equal command of Persian and Turkish and composed a *Diwān*. His son Derwish-Beg, who had been *mutesarrif* of Tarsūs in his father's life-time became after his death governor (*wālī*) of Adana but died young in 986 (1578). He was succeeded by his eldest brother Ibrāhīm Beg, who had previously been *sandjak-bey* of 'Aintāb. He acted as governor at his father's capital till his death in 1002 (1594). His son Mehmed Beg was the last dynast of the Ramaḍān-Oghlu but he can only have had a nominal rule. The family of the Ramaḍān-Oghlu however has survived to the present day. The following is the genealogical table:

Bibliography: Max v. Oppenheim and Max van Berchem, *Inscripfen aus Syrien, Mesopotamien und Kleinasien*, Leipzig 1909, p. 109 sqq. (FRANZ BABINGER)

AL-RAMĀDĪ, whose full name was ABŪ 'UMAR (wrongly Abū 'Amr) YUSUF B. HĀRŪN AL-KINDĪ AL-ḲURṬUBĪ AL-RAMĀDĪ, poet of Muslim Spain, who lived in the fourth (tenth) century and died early in the fifth (eleventh) century in 403 (1013), on the day of the 'Anṣara or Feast of St. John (June 24); according to Ibn Ḥaiyān (in Ibn Baṣṣ-kuwāl, cf. *Bibl.*), in 413 (1022—1023), according to al-Maḳḳarī (quoting the same Ibn Ḥaiyān); he was buried in the cemetery of Cordova known as Maḳbarat Kalā'.

The ethnic al-Ramādī is explained in two ways: 1. the poet is said to have come from al-Rammāda, a little town between Alexandria and Barḳa; this explanation is to be rejected for al-Rammāda (with gemination of the *mīm* — and this orthography is attested by the geographers who mention the place, e.g. al-Ya'ḳūbī, al-Bakrī and al-Idrīsī —) would not give an ethnic like al-Ramādī (with one *m*); 2. the second explanation which derives Ramādī from *ramād*: "ordinary ashes" or "ashes for washing", is the only possible one; and the poet perhaps in his youth followed the trade of an ash-merchant; in confirmation of this we may call attention to the Romance surname which was originally given him: *Abū Djanis* (wrongly *Abū Sabīḥ* in the *Yatīmat al-Dahr*), i.e. *padre ceniza*, "father cinders" or "cinderman".

Al-Ramādī, a native of Cordova, spent all his life in his native town except for a brief period of exile in Saragossa. His life was dominated by three great factors: his attachment to Abū 'Alī al-Ḳālī, his devotion to the cause of the ḥādīb Abu 'l-Ḥasan al-Muṣḥaffī and his love for Ḳhalwa.

Abū 'Alī al-Ḳālī, summoned from the east to Spain by the Umayyad caliph 'Abd al-Raḥmān III al-Nāṣir (300—350 = 912—961) had from his arrival in Cordova in 330 (942) no more faithful disciple than al-Ramādī who studied under his direction the *Kitāb al-Nawādir* ("the book of philological rarities"). The young scholar's admiration found expression in a poem which has remained famous (rhyme *ū*, metre *kāmil*) of which some thirty lines are preserved in the *Yatīmat al-Dahr* of al-Tha'ālībī and the *Maṭmaḥ al-Anfus* of al-Faṭḥ b. Ḳhākān (cf. *Bibl.*). It is this poem which gained him the title of Mutanabbī al-Gharb (which had already been given to Ibn Ḥānī al-Andalusī and which was later to be given to Ibn Darrādī al-Kaṣṭallī and to Abū Ṭālib 'Abd al-Djabbār). Al-Ramādī studied also under an Andalusian scholar named Abū Bakr Yaḥyā Ibn Hudḥail al-Kafī or al-A'mā ("the blind"), of whom we know very little.

When at the height of his powers, al-Ramādī became laureate to the Umayyad caliph al-Ḥakam II al-Muṣṭanṣir (350—366 = 961—976), then to his son and successor Hishām II al-Mu'ayyad (366—399 = 976—1009); but his attachment to the cause of the ḥādīb Abu 'l-Ḥasan Dja'far b. 'Uṭṭamān al-Muṣḥaffī and his participation in the plot fomented by the eunuch Djawḍḥar to overthrow Ḥakam II and proclaim another caliph than his son Hishām brought down upon him the wrath of the great minister al-Manṣūr Ibn Abī 'Amir. Thrown into prison at al-Zahrā', he suffered all sorts of ill-treatment; during his imprisonment, he wrote the most touching verses (including a poem in *ḳi*, metre *ṭawīl*, and another in *luḡu*, metre *ṭawīl*) and he prepared a poetical work on birds, the description of which concluded with a poem

in praise of the heir-presumptive Hishām II. Liberated through the intercession of friends he had to go into exile. He went to Saragossa to the governor 'Abd al-Raḥmān b. Muḥammad al-Tuḍjībī whose merits he celebrated in a poem in *mi*. Amnestied by al-Manṣūr he was able to return to Cordova, but on condition that he did not go into society. Finally pardoned, he entered the entourage of the all, powerful ḥādīb as a pensioner (*murtasiḳ*) and it was in this capacity that he took part in an expedition against Barcelona in 375 (985). During the *fitna* which was to lead to the collapse of the Umayyad caliphate and the formation of petty independent states ruled by the *mulūk al-ṭawā'if*, al-Ramādī led a miserable existence and it was in the greatest distress that he died in the early years of the fifth (eleventh) century.

Al-Ramādī became celebrated chiefly for his chaste love for the enigmatic Ḳhalwa (wrongly: Ḥalwa or Ḥulwa) whom he met one Friday in the public gardens of the Banū Marwān on the left bank of the Guadalquivir at the end of the bridge but was never able to see again. It was Abū Muḥammad Ibn Ḥazm al-Zāḥirī, whose ascetic tendencies on this subject are well known, who did most to spread this love-story; but it seems that the memory of Ḳhalwa occupied the heart or mind of the poet only very little; if it still possessed him at Saragossa to the extent of inspiring all the *nasīb* of the panegyric in honour of the Tuḍjībī governor, on his return to Cordova, it disappeared completely for we see al-Ramādī henceforth completely overwhelmed by a new passion, the object of which is not a woman but a Mozarab boy to whom the poet gives the name of Yaḥyā (John) or Nuṣair (Victor?).

The *Diwān* of al-Ramādī never seems to have been collected; of his book on birds, *Kitāb al-Ṭair*, written in prison, there survives only the *Lāmiya* in which he described the falcon hunting; the more important fragments that have survived have already been mentioned. A pupil of Abū 'Alī al-Ḳālī, al-Ramādī is inclined to imitate the poetry of the east, but after Ibn 'Abd Rabbihi and before 'Ubāda b. Mā' al-Samā', he shows a marked fondness for the *muwashṣhaḥ* into the construction of which, he introduced several innovations. In spite of its classical structure, his verse has a very personal character, especially when he calls upon Ḳhalwa or describes his sufferings in the prison at al-Zahrā'. The few lines in which he alludes to the weakness of Hishām II and to his complete domination by his mother Ṣubḥ and by the ḥādīb al-Manṣūr, those in which he speaks of Djawḍḥar's plot are not without historical interest; finally the information which he gives about Mozarabs (worship and costume) in connection with his favourite enable us to check what Abū 'Amir Ibn Shuhaid says on the same subject and for this reason of some documentary importance.

RĀM-HORMUZ (the contracted form *Rāmiz*, *Rāmuz* is found as early as the tenth century), a town and district in Khūzistān [q. v.]. Rām-Hormuz lies about 55 miles southeast of Ahwāz, 65 miles S.E. of Shūshṭar, and 60 miles N.E. of Behbehān. Ibn Khurdādhbih, p. 43, reckons it 17 farsakhs from Ahwāz to Rām-Hormuz and 22 farsakhs from Rām-Hormuz to Arrādjān. Kūdāma, p. 194, who gives a more detailed list of stages, counts it 50 farsakhs from Wasīt to Basra, thence 35 farsakhs to Ahwāz, thence 20 farsakhs to Rām-Hormuz, and then 24 farsakhs to Arrādjān. The importance of Rām-Hormuz lay in the fact that it was situated at the intersection of the roads from Ahwāz, Shūshṭar, Isfahān and Fārs (via Arrādjān); that it is the natural market for the Bakhtiāri and Kūh-gilū tribes [see the art. LUR] and that there is oil in its vicinity. The town lies between the rivers Āb-i Kurdistān and Gūpāl. The first of these (also called *Djibur*) is made up of the following streams: Āb-i Gilāl (Āb-i Zard), Āb-i A'lā (coming from Mungasht), Rūd-i Pūtang and Āb-i Darra-yi Kūl. A canal is led from the right bank of the *Djibur* to supply the town of Rām-Hormuz. Farther down, the *Djibur* joins the Āb-i Mārūn which comes from the southeast in the region of Behbehān and of the old town of Arrādjān [q. v.]. Their combined waters are known as the *Djarrāhī*. The other little river (Gūpāl) runs north of Rām-Hormuz and is lost in marshes. Rām-Hormuz (500 feet above sea-level) is situated above the plain to the northeast of which rise the hills of Tūl-Gorgūn 1,600 feet high.

The town is rarely mentioned by historians. The Pahlavi list of Iranian towns, § 46 (ed. Marquart, p. 19, 98) attributes the building of Rām-Hormuz to Ormizd b. Shāhpuhr (272-273) (cf. also Ṭabarī, i. 833). According to Hamza, ed. Gottwald, p. 46-47, the town was built by Ardashīr I and its name was *Rām-i Hurmizd Ardashīr*, which Marquart explains as "the delight of Ahura Mazda is Ardashīr". According to a tradition recorded by Iṣṭakhri, p. 93, Mānī was

executed in Rām-Hormuz, but Ṭabarī, i. 834, says that Mānī was exposed on the "gate of Mānī" at Djundē-Sābūr (cf. also al-Birūnī, *Chronology*, p. 208). The Nestorian bishops of Rām-Hormuz are mentioned in the years 577 and 587 (Marquart, *Ērānshahr*, p. 27, 145). Muḥaddasī, p. 414, says that 'Aḍud al-Dawla built a magnificent market near Rām-Hormuz and that the town had a library founded by Ibn Sawwār (according to Schwarz, the son of Sawwār b. 'Abd Allāh, governor of Basra, who died in 157 = 773), and was a centre of Mu'tazilite teaching. According to Ibn Khurdādhbih, p. 42, Rām-Hormuz was one of the 11 *kūras* of Khūzistān (Kūdāma, p. 242, and Muḥaddasī, p. 407: one of the 7 *kūras*). Its towns (Muḥaddasī) were Sanbil, Īdhadj [q. v.], Tyrm (?), Bāzank, Lādh, Gh.rwa (?), Bābadj, and Kūzūk, all situated in the highlands. To these Yāḳūt, i. 185, adds Arbuk (with a bridge, 2 farsakhs from Ahwāz). On the other places in the *kūra* of Rām-Hormuz (Āsak, Būstān, Sasān, Ṭashān, Ūr) see Schwarz, *op. cit.*, p. 341-345. According to Muḥaddasī, p. 407, Rām-Hormuz had palm-groves but no sugar-cane plantations (in the 19th century however, Mustawfī, *Nuzhat al-Kulūb*, p. 111, says that Rām-Hormuz used to produce more sugar than cotton); among the products of Rām-Hormuz Iṣṭakhri (p. 93) mentions silks (*thiyāb abrīsam*) and Dimishkī, p. 119 (transl. p. 153) the very volatile white naphtha which comes out of the rocks. At the present day the Anglo Persian-Oil Company possesses deposits above Rām-Hormuz.

(V. MINORSKY)

AL-RĀMĪ, whose full name was ḤASAN B. MUḤAMMAD SHARAF AL-DĪN, a Persian stylist. No details of his life are known; even the few chronological references that we possess are rather vague. His importance lies in his well known work *Anīs al-'Ushshāk*, a treatise on the most common poetical figures for describing the different parts of the human body. According to his own statement, the author made up his mind to compile this work while he was in Marāgha on a visit to the observatory of the famous Naṣīr al-Dīn Tūsī. The book is dedicated to Sulṭān Abu 'l-Faḥ Uways Bahādur (1356-1373), Īlkhanī of Ādharbāidjān, and according to Hādjdjī Khalīfa (ed. Flügel, i. 488) was finished in Shawwāl 826 (Sept. 1423). This is in obvious contradiction to chronology for at this date Ādharbāidjān had belonged to the Timūrid Shāhrukh since 823 (1420). The author further mentions in this work the poet Awḥadī (d. 738 = 1337) as his contemporary and a certain

Hasan b. Maḥmūd Kāshī (d. 710 = 1300) as his teacher. It may therefore be assumed that Ḥājjdī Khalifa's statement is based on a misunderstanding and that the work was written not later than 1373. The work is divided into 19 chapters which begin with the hair of the head and end with the feet and deal with the human body from head to foot. Besides this book, which is of great value for the study of classical Persian poetry and was used by the great Turkish commentator Muṣṭafā b. Sha'bān Surūrī (d. 909 = 1561) in his *Baḥr al-Ma'ārif*, Sharaf al-Din Rāmī also prepared a commentary on the well-known work on poetics of Rashīd al-Din Waṭwāt, *Ḥaddā'ik al-Sihr* (new edition of the Persian text by 'Abbās Iḳbāl, Teheran 1930) entitled *Ḥaḳḳā'ik al-Ḥaddā'ik* or *Ṣanā'ī' al-Badā'ī'* (Ḥājjdī Khalifa, iii. 77), a work called *Ḥulyat al-Maddā'ih* of which nothing else is known (Ḥājjdī Khalifa, iii. 112) and a *Diwān*, which consisted of ḳaṣīdas, ḳiṭā's and quatrains, but as early as Dawlatshāh's time it could only be found in the 'Irāq, Ādharbāidjān and Fārs. Nothing of all these works has come down to us except the *Anīs al-Ushshāk*. There is said to be a ḳaṣīda of Rāmī's in the *Djavāwīhir al-Asrār* (compiled in 840 = 1436-1437) of Shaikh Ādhari (d. 866 = 1461-1462) (Dawlatshāh, *Tadhkirat al-Shu'arā'*, ed. E. Browne, p. 308).

RĀMĪ MEḤMED PASHA, an Ottoman grand vizier and poet, was born in 1065 or 1066 (1654) in Eiyūb, a suburb of Stambul, the son of a certain Ḥasan Agha. He entered the chancellery of the Re'īs Efendi as a probationer (*shaḡird*) and through the poet Yūsuf Nābī [q. v.] received an appointment as *maṣraf k̄itābī*, i. e. secretary for the expenditure of the palace. In 1095 (1684) through the influence of his patron, the newly appointed Kapudān Pasha [q. v.] Muṣṭafā Pasha, he became *dīwān-efendi*, i. e. chancellor of the Admiralty. He took part in his chief's journeys and campaigns (against Chios) and on his return to Stambul became *re'īs kesedārī*, i. e. pursebearer to the Re'īs Efendi. In 1102 (1690) he was promoted Beylikdī, i. e. Vice-Chancellor and four years later Re'īs Efendi in place of Abū Bakr, in which office he was succeeded in 1108 (1697) by Küçük Meḥmed Čelebi. After the battle of Zenta (Sept. 12, 1697), he became Re'īs Efendi for a second time and was one of the plenipotentiaries at the peace of Carlowitz by the conclusion of which "he put an end to the ravages of the Ten Years War but also for ever to the conquering power of the Ottomans" (J. v. Hammer). As a reward for his services at the peace negotiations he was appointed a vizier of the dome with 3 horse-tails (*tugh*) in 1114 (1703) and in Ramaḍān 6, 1114 (Jan. 24, 1703) appointed to the highest office in the kingdom in succession to the grand

vizier Daltaban Muṣṭafā Pasha. In this office he devoted particular attention to the thorough reform of the civil administration, through the abuses in which he saw the security of the state threatened (cf. J. v. Hammer, *G.O.R.*, vii. 64). "By lessening the burden of fortresses on the frontiers in east and west, by raising militia against the rebel Arabs, by securing the pay of the army from the revenues of certain estates, by making aqueducts, by restoring ruined mosques, by taking measures for the safety of the pilgrim caravans and for the security of Asia Minor, by settling Turkmen tribes, by ordering the Jewish cloth manufacturers in Selānik and the Greek silk manufacturers in Brūsa in future to make in their factories all the stuffs hitherto imported into Turkey from Europe" (J. v. Hammer), he exercised a most beneficent activity, which however soon aroused envy and hatred, and, especially as Rāmī Meḥmed Pasha as a man of the pen entirely and not of the sword, was unpopular with the army, particularly the Janissaries, finally was bound to lead to his fall (cf. J. v. Hammer, *G.O.R.*, vii. 72). In the great rising in Stambul which lasted four weeks, beginning with the enthronement of Sulṭān Muṣṭafā and ending with his deposition (9th Rabī' II, 1115 = Aug. 22, 1703), his career came to an end. He was disgraced, but pardoned in the same year and appointed governor, first of Cyprus, then of Egypt (Oct. 1704). His governorship there terminated as unhappily as his grand viziership (cf. J. v. Hammer, *G.O.R.*, vii. 133 following Rāshid and La Motraye). In Djumādā I 1118 (Sept. 1706) he was dismissed and sent to the island of Rhodes, where he died in Dhu 'l-Hidjja 1119 (March 1707) either under torture or a result of it (cf. J. v. Hammer, *G.O.R.*, vii. 134 quoting the internuntius Talman). Rāmī Meḥmed Pasha is regarded as a brilliant stylist, as the two collections of his official documents (*inshā'*) containing no less than 1,400 pieces, distinguished by their simple clear and elevated style, amply show (cf. the MSS. in Vienna, Nat. Bibl. Nrs. 296 and 297 in G. Flügel, *Die arab., pers. u. türk. Hss.*, i. 271 sq.). Rāmī Meḥmed Pasha also left a complete *Diwān* of which specimens are available in the printed *Tedhkire* of Salīm (cf. F. Babinger, *G.O.W.*, p. 272 sq.: Stambul 1315). His poetical gifts were inherited by his son 'Abd Allāh Re'fet (cf. Brūsali Meḥmed Ṭāhir, *'Othmānī Mi'ellifleri*, ii. 187). His son-in-law was the *tedhkiredjī* Salīm [q. v.].

Hammer, *Geschichte der Osmanischen Dichtkunst*, iv. 26 sqq.

(FRANZ BABINGER)

AL-RAMLA, capital of Filastīn, 25 miles E. N. E. of Jerusalem. The Umayyad caliphs liked to choose little country towns, usually places in Palestine, to live in rather than Damascus. Mu'āwīya and after him Marwān and others frequently resided in al-Sīnnabra on the south bank of the Lake of al-Ṭabarīya, Yazīd I in Hawwārīn, Adhri'āt, 'Abd al-Malik in al-Djābiya, Walīd in Usais (now Tell Sais S. E. of Damascus) and al-Ḳaryatāin and his

sons in al-Ḳaṣṭal, Yazīd II also in al-Muwaḳḳar near Fudain or in Bait Ra's (Lammens, *La Bâdia et la Hira sous les Omayyades*, in *M.F.O.B.*, iv., 1910, p. 91—112; A. Musil, *The country residences of the Omayyads*, in *Palmyrena*, New York 1928, p. 277—297).

In the reign of al-Walīd his brother Sulaimān was governor of Filasṭīn. Stimulated by the examples of 'Abd al-Malik, the builder of the Ḳubbat al-Ṣakhra in Jerusalem, and of his brother who had restored the mosque of Damascus (Yāḳūt, *Mu'djam*, ed. Wüstenfeld, ii. 818), he founded the new town of al-Ramla and removed to it the seat of the provincial government which had been in Ludd since the "plague of 'Amwās" [q. v.] in 18 (638—639). As caliph also he continued to live in al-Ramla (96—99 = 715—717).

The whole population of Ludd was transferred to the new capital of the Djund of Filasṭīn and the latter fortified, while Ludd was allowed to fall into ruins. Sulaimān first of all built his palace (*ḡaṣr*) then the "house of the dyers" (*dār al-ṣabbāghīn*) which was provided with a huge cistern; at a later date it was confiscated with all the property of the Umayyads and came into the possession of the heir of the 'Abbāsids, Ṣāliḥ b. 'Alī b. 'Abd Allāh. Sulaimān also began to build the mosque and continued it when caliph. It was finished under 'Omar b. 'Abd al-'Azīz although not on the scale originally intended. The financial management of the building of the palace and of the chief mosque was in the hands of a Christian of Ludd, al-Baṭriḳ b. al-Naka (al-Balādhuri, ed. de Goeje, p. 143 sq.; var.: Baṭriḳ b. Baka in Ibn al-Faḳīh, *B. G. A.*, v. 102, and Ibn Baṭriḳ in Yāḳūt, ii. 818). According to Yāḳūt (ii. 817) the latter asked the people of Ludd to give him a house near the church, and when they refused he decided to pull down the church; according to al-Makdisī (*B. G. A.*, iii. 164 sq.), the caliph Hishām threatened the people of Ludd that he would destroy their church if they did not hand over the marble columns, which they had intended for a splendid building and concealed. Sulaimān also began to bring a canal called Barada to the new town and to dig wells of fresh water, as it was 12 miles distant from the nearest river, the Abū Fuṭrus (Ya'ḳūbi, *B. G. A.*, vii. 328). The considerable cost of keeping up the canal was later taken over by the 'Abbāsīd Caliphs and at first voted annually but from the time of al-Mu'taṣim included as current expenditure in the budget.

The advantages and disadvantages of the new town are vividly described by al-Makdisī. Rich in fruits, especially figs and palms, good water and all foodstuffs, it combined the advantages of town and country, those of a position in the plain with the proximity of hills and sea, of places of pilgrimage like Jerusalem and coast fortresses. It had a splendid chief mosque, fine *khāns*, comfortable baths, commodious dwellings and broad streets. On the other hand in winter, it was like a muddy island, in summer a sandbin and as it was not on a river the ground was hard and without grass, and the lack of ample running water was the chief defect of this otherwise so favoured town; for the little drinking water in the cisterns was not accessible to the poorer part of the population. The town covered an area of a whole square mile. Its buildings were of fine building stone and brick. The town's wares were exported chiefly to Egypt.

The chief gates of al-Ramla were: Darb Bi'r al-'Askar (called after the al-'Askar quarter; cf. Yāḳūt, iii. 674; Ṣafī al-Dīn, *Marāṣid*, ii. 258), Darb Masjdīd 'Annaba (as it was called, as de Goeje conjectured, from the town elsewhere however called 'Annaba 4 miles E. of al-Ramla), Darb Bait al-Makdis, Darb Bil'a (i. e. Bāl'a or Bālgha? or Ḳaryat al-Inab, the ancient Ḳiryat Ba'ala now Abū Ḡhawsh?), Darb Ludd, Darb Yāfā, Darb Miṣr and Darb Dādjun, the latter called after a neighbouring town with a mosque, mainly inhabited by Samaritans (Bēth Dagon, now Bait Dedjan).

In the centre of the market-place of al-Ramla was the chief mosque Djāmi' al-Abyaḍ, the *miḥrāb* of which was regarded as the largest of all that were known, the pulpit of which was second only to that in Jerusalem and whose splendid minaret was much admired.

Whether there had been an older town on the site of al-Ramla is problematic. The old attempts to identify it with Arimathia, Ramatha or Ramathaim have now been generally abandoned. An ancient Παρεμβολή, "Camp", should rather be considered, a place-name particularly frequent in Palestine, which was borne for example by the camp of Jerusalem (*Hebr.*, xiii. 11, 13; *Act. Apost.*, xxi. 34—xxiii. 32) and bishoprics in Palestine I. (now Bi'r al-Zarā'a, cf. Féderlin in Génier, *Vie de S. Euthyme le Grand*, p. 104—111) and in Phoinike Libanesia (R. Aigrin, art. *Arabie*, in *Dict. d'hist. et de géogr. ecclési.*, iii. 1194—1196); for the Egyptian al-Ramla 4 miles N.E. of Alexandria corresponds to an ancient Nicopolis and later Parembolē. But the Arabic writers say there was no town previously on this site but only a sandy area after which the town was named (al-Balādhuri, p. 143 etc.).

The population of al-Ramla was in the time of al-Ya'ḳūbi (*B. G. A.*, viii. 327 sq.) a mixture of Arabs and Persians (on the settlement of Persians in Syria cf. al-Kindi, *Governors of Egypt*, ed. Guest, p. 19); the clients were Samaritans.

The great cistern 'Unaiziya ('Anēziye) to the N. W. of al-Ramla near the road to Yāfā, known as the cistern of St. Helena, has a Ḳufic inscription of Dhu 'l-Hijidja 172 (May 789), i. e. of the time of Hārūn al-Rashīd (van Berchem, *Inscr. arabes de Syrie*, Cairo 1897, p. 4—7; M. de Vogüé, *La citerne de Ramla*, in *Comptes-rendus de l'Acad. des Inscr. et Belles-lettres*, xxxix., 1911, p. 362 sq., 493 sq.).

By the Frankish pilgrims the town is first mentioned in 870 as 'Ramula'. The Crusaders made it a bishopric. In the xiith century was built the beautiful church of the Crusaders, now the mosque (*Djāmi' al-Kabīr* in the east of the town) with its noble Gothic portal, to which was later added very unskillfully an inscription of Sulṭān Katbughā. It also has an inscription, according to which its square tower (now replaced by a round minaret) was built or restored in 714 (1314—1315) by Sulṭān Muḥammad.

The old "white mosque" was restored by Saladin in 587 (1191) and given by Baibars in 666 (1267—1268) two domes, above the minaret and the *miḥrāb*, and the gateway opposite it (Muḍjir al-Dīn, Būlāk, p. 418: transl. Sauvaire, p. 207; the inscription in van Berchem, *op. cit.*, p. 57—64). The minaret, the so-called "tower of al-Ramla" or "Tower of the 40 martyrs", was, according to Muḍjir al-Dīn and an inscription over its gateway, rebuilt in

Shābān 718 (Oct. 1318) (*Zwei arabische Inschriften*, in *Jerusalem War*, lxix., 1913, p. 100 sq.); the mosque as well as the minaret have both been wrongly taken for the work of the Crusaders (cf. against this van Berchem, *op. cit.*, p. 63 sq.).

Nāṣir-i Khusrāw who visited al-Ramla in Ramaḍān 438 (1047), calls it a large town with high and strong walls of stone and gates of copper; the inhabitants had a receptacle for the collection of rain-water at the door of each house. There was also a large cistern for general use in the middle of the Friday mosque.

An earthquake of Muḥarram 15, 425 (Dec. 10, 1033) destroyed a third of the town and its mosque fell into ruins (cf. also Ibn al-Aṭhīr, ix. 298).

Most of the public and private buildings were built of marble and adorned with fine sculptures and ornaments. Figs were the chief export of al-Ramla. The name of the province of Filastīn was also given to the capital al-Ramla (Clermont-Ganneau, *Recueil d'Arch. Orient.*, vi. 101).

Saladin in 583 (1187) destroyed the town so that it might never again fall into the hands of the Franks and it remained in ruins (Yāqūt, i. 818; Ṣafī al-Dīn, *Marāṣid*, i. 483). Ibn Baṭṭūṭa visited it in 756 (1355); he mentions the D̲j̲āmī' al-Abyaḍ in which, he was told, 300 prophets were buried. A Latin monastery was founded in 1420 in al-Ramla by Duke Philip the Good, and restored at a later date by Louis XIV.

In 1798 the town was Napoleon's headquarters. The modern al-Ramla has about 6,500 inhabitants; it has a healthy climate and fertile country round it.

(E. HONIGMANN)

RAMPUR, an Indian state in Rohilkhand and under the political supervision of the government of the United Provinces. It is bounded on the north by the district of Nainī Tāl; on the east by Bareilly; on the south by the Bisauli tahsil of Budāūn; and on the west by the district of Morādābād.

The early history of Rāmpur is that of the growth of Rohilla power in Rohilkhand. After the establishment of Muslim rule in India large

bodies of Afghāns or Pāthāns settled down in the country. So powerful did they become that they were twice able to establish their rule in northern India, under the Lodis [q. v.] in the second half of the xvth century, and under the Sūrs [q. v.] in the time of Shīr Shāh. After the death of Awrangzib and with the decline of the Mughal empire Afghān settlements increased until in the words of the *Siyar al-Mutākhk̲k̲harīn* "they seemed to shoot up out of the ground like so many blades of grass". The name Rohilla was applied to those Afghāns who settled in what is now known as Rohilkhand.

The real founders of Rohilla power were an Afghān adventurer, named Dā'ūd Khān, who arrived in India immediately after the death of Awrangzib, and his adopted son, 'Alī Muḥammad Khān, who succeeded him as leader of a band of mercenary troops. It was during the lifetime of 'Alī Muḥammad Khān that his possessions came to be called Rohilkhand or the land of the Rohillas. In course of time 'Alī Muḥammad Khān became so powerful that he refused any longer to pay his revenues to the central government, in which course he was encouraged by the anarchy consequent upon the invasion of Nādir Shāh [q. v.]. The growth of his power so alarmed Ṣafdar D̲j̲ang of Oudh [see OUDH] that he persuaded the emperor to send an expedition against him, as a result of which 'Alī Muḥammad Khān surrendered to the imperial forces and was taken prisoner to Dihli. After a time he was pardoned and appointed governor of Sirhind. In 1748, according to the *Gulistān-i Raḥmat*, he was transferred to Rohilkhand, but it seems more probable that he took advantage of the invasion of Aḥmad Shāh Durrānī [q. v.] to recover his former possessions. Two factors had contributed to the growth of Rohilla power: the weakness of the central government and the fact that they were able to take advantage of the internal struggles between the various Rājput chiefs and zamīndārs of Rohilkhand.

'Alī Muḥammad Khān left six sons, but the absence of the two eldest in Afghānistān, combined with the extreme youth of the other four, meant that all real power remained in the hands of a group of Rohilla sardārs, the most important of whom were Ḥāfiẓ Raḥmat Khān, and Dūndī Khān. This naturally produced intrigues and disputes and eventually weakened the Rohilla power.

In 1771 the Marāṭhās turned their attention to the conquest of Rohilkhand, whereupon the Rohillas applied for aid to Shudjā' al-Dawla, the nawāb-wazīr of Oudh. It was agreed that Shudjā' al-Dawla should receive forty lakhs of rupees for his services (Aitchison, i. 6—7), but the Rohillas later refused to abide by their pecuniary engagements. In accordance with his promise at the Conference of Benares in 1773, Warren Hastings agreed to assist the nawāb-wazīr in expelling the Rohillas from Rohilkhand, for which he was to receive forty lakhs of rupees. On April 23, 1774, the Rohillas were defeated and their leader, Ḥāfiẓ Raḥmat Khān, slain. At the end of this war Faizullah Khān, a son of 'Alī Muḥammad Khān, concluded a treaty with Shudjā' al-Dawla at Lal-dang (India Office MSS., Bengal Secret Consultations, October 31, 1774; see also extracts from the Persian interpreter's journal, February 14, 1775).

By this treaty Faizullah Khān received a *diḡgir* consisting of Rāmpur and other districts with a

revenue estimated at approximately fifteen lakhs of rupees. To prevent him from becoming a menace to Oudh he was not allowed to retain in his service more than 5,000 troops. After the death of Shudjā' al-Dawla, in 1775, Faizullah Khān was informed that his engagements with the late nawāb-wazīr still continued in force with his son, Āṣaf al-Dawla (Bengal Secret Consultations, April 17, 1775. Draft correspondence with the Country Powers, No. 34).

In 1780 the English Company needed additional troops and Hastings urged Āṣaf al-Dawla to demand from Faizullah Khān the 5,000 horses he had engaged to supply by treaty. This demand for cavalry was an unwarrantable interpretation of the Treaty of Laldang for which no justification has ever been attempted. In 1781 Hastings empowered Āṣaf al-Dawla to resume Faizullah Khān's *djāgir* but fortunately this order was never carried out, and it was eventually decided to solve the problem by means of a fresh agreement whereby the obligation to provide troops for the nawāb-wazīr's service was commuted under the Company's guarantee to a cash payment of fifteen lakhs of rupees. In 1801, on the cession of Rohilkhand to the British, Faizullah Khān's descendants were continued in their possessions. For his services in the Mutiny of 1857 Muḥammad Yūsuf 'Alī Khān, the ruler of Rāmpur, received a grant of land and was assured by *sanad* that, on the failure of natural heirs, any succession in his state, which might be legitimate according to Muḥammadan law, would be upheld by the Government of India.

Modern Rāmpur has an area of 893 square miles and supports a population of 465,225, of whom 217,297 are Muḥammadans (1931 Census Report). It is divided for administrative purposes into six *taḥsils*: the Ḥuḡūr, Shāhābād, Milak, Bilāspur, Suār and Tanda (*Administration Report*, 1932—1933). Its rulers are patrons of Oriental learning. The celebrated Madrasa 'Alīya, an Arabic college, which is maintained from state funds, attracts students from all parts of India and even from Central Asia. Rāmpur city, which has a population of 74,080, possesses a fine library containing an exceptionally valuable collection of manuscripts. Almost every Pathān clan is represented in modern Rāmpur, the most numerous being the Yūsafzais and Orakzais. There are also large numbers of Khattaks, Bunerwals, Muḥammadzais, and Afridis.

RANGĪN. Several Indian poets have used this *takhalluṣ*. The *Riyāḍ al-wifaḳ* of Dhū 'l-Fikār 'Alī, biographies of Indian poets who wrote in Persian, and the *Tadhkirā* of Yūsuf 'Alī Khān (analysed by Sprenger, *A Catalogue of the Arabic, Persian and Hindustani Mss. of the King of Oudh*, i. 168 and 280) mention five of them. The first, a native of Kashmīr, lived in Dihli in the reign of Muḥammad Shāh (1719—1748); his ghazels were sung by the dancing-girls. — The most celebrated, however, was Sa'ādāt Yār Khān of Dihli. His father, Ṭahmāsp Beg Khān Tūrānī, came to India with Nādir Shāh and settled in Dihli where he attained the rank of *haft-hazārī* and the title of Muḥkim al-Dawla. In his turn, Sa'ādāt Yār Khān entered the service of Mirzā Sulaimān Shikuh, son of the emperor Shāh 'Ālam, who lived in Lucknow. He was a good horseman and able soldier; for a time he commanded a part of the artillery of the Nizām of Haidarābād but he gave up this post to go into business. He was in his youth a friend of the poet Inshā in Lucknow; a pupil of the poet Muḥammad Ḥatīm of Dihli (cf. Ram Babu Saksena, *A History of Urdu Literature*, p. 48; Sprenger, *op. cit.*, p. 235), he afterwards submitted all his verses to the criticism of Nithār (cf. Sprenger, p. 273), then of Muṣḥafi (Saksena, p. 90); he died in 1251 (1835) aged eighty (or a year later; cf. Garcin de Tassy). — The following are his works in Urdu: *Mathnawī Dilpazīr*, a poem of romantic adventures (1213 = 1798); *Idjād-i Rangin*, a *mathnawī* of fables and anecdotes (Lucknow 1847 and 1870); another *mathnawī* of anecdotes: *Maḡhar al-Adjā'ib* or *Gharā'ib al-Mash'ūr* (lith. Agra and Lucknow); four *diwāns* collectively known as *Nawā Ratan* ("the Nine Jewels"), the two first lyrical, the third humorous and partly in *rekhti* (language peculiar to women), the fourth in this same language with a preface by Rangin explaining the principal words (on the development of *rekhti* and Rangin's skill in this licentious genre, cf. the article URDU vol. iv., p. 1026b, l. 1—11, and Saksena, *op. cit.*, p. 94); in prose a treatise on horsemanship (*Faras-nāme*, 1210 = 1775, several times edited) and a collection of critical observations on a number of poets, entitled *Madjālis-i Rangin*. In Persian (if the work is really his; cf. Sprenger, *op. cit.*, p. 54, No. 462), Rangin under the title *Mihr u-Māh*, sang of the adventure of a son of a sayyid and of a daughter of a jeweller, based on an incident that occurred in Dihli in the reign of Djahāngir (cf. *Gr. I. Ph.*, ii. 254).

RANGOON, a city in the Pegu division of Burma lying on both sides of the Hlaing river at its point of junction with the Pegu river and the Pazundaung creek, twenty-one miles from the sea.

Legend, not entirely undocumented, relates that the great pagoda at Rangoon (Mon, *Kyaik Lagung*; Burmese, *Shwe Dagon*) was founded during the life-time of the Buddha and was repaired by the emperor Aśoka (J. B. R. S., xxiv. 4 and 20).

History proper begins with the establishment of Pegu as the capital of a Mon kingdom in 1369.

A convenient port was required for this kingdom. Bassein, which had been the chief port of Burma in the early middle ages, was too distant and too difficult to control. Martaban on the Gulf of Sittang was nearer but had no good river connection with Pegu. It was natural, therefore, that the Rangoon or Hlaing river, of which the Pegu river is a tributary, should come into prominence as a line of approach for over-seas trade. Syriam, to the southeast of Dagon at the mouth of the Pegu river, and Dalla, now part of Rangoon on the opposite bank of the Hlaing, were the chief ports. But the Shwe Dagon pagoda standing on the last spur of the Pegu Yomas was a landmark to shipping coming up the river and was chosen by a succession of kings for the exercise of their piety.

An inscription on the Dagon pagoda hill, engraved by order of King Dhammazedi in 1845 A.D., records additions to the pagoda by his royal predecessors for a century back, as well as by himself (*J. B. R. S.*, xxiv. 8). Similar works of merit by subsequent kings are recorded in the histories (by this period fairly reliable) culminating in the rebuilding of the pagoda by King Bay in Naung after it had been damaged by an earthquake in 1568 A.D. There are also frequent references by early travellers, such as Ferdinand Mendez Pinto, Caesar Frederick, and Gasparo Balbi to Dagon and its celebrated pagoda.

It was the customs revenue of the Rangoon river that financed the Portuguese adventurer de Brito, who rose to power in Syriam between 1600 and 1612. Later in the xviiith century the Dutch, French and English from time to time maintained trading stations at Syriam.

The capital was transferred from Pegu to Ava in 1635 and royal authority gradually declined, but even the weakest kings contrived to keep control of the Irrawaddy and the now important customs station of Syriam. With the seizure of Syriam by the Pegu rebels in 1740 the kingdom of Ava, deprived of its revenues, necessarily came to an end.

The recovery of Syriam was one of the first objects of Alaungpaya, the founder of the dynasty which ended with King Thibaw. His siege operations were for some time unsuccessful and he had to be content with the capture of Dagon in 1755. It is recorded that as he had been successful over all his enemies (*yan akon*) he changed the name of the town to Yangon (Rangoon). Syriam fell in 1756 and was destroyed. A governor was appointed at Rangoon, which now replaced Syriam as the principal sea-port of Burma.

The policy of the early kings of the Alaungpaya dynasty was to encourage foreign trade. A British factory was established at Rangoon and maintained till 1782. Pārsī, Armenian and Muslim traders settled here and flourished. But with the weakening of the central government the exactions of the local officials increased and constituted a serious discouragement to commerce. Symes describes Rangoon as a flourishing port in 1795 and estimates its population at 30,000 (p. 214).

Rangoon was first captured by the British in 1824 during the first Burmese war but was evacuated in accordance with the terms of the Treaty of Yandabo at the end of the war. According to the *Kon-baung set Maha-yazawingyi* (vol. iii., p. 15), a Burmese history of the Alaungpaya dynasty, King Tharawaddy visited Rangoon in

1841 (1203 B.E.) and founded a new town south and west of the Shwe Dagon pagoda, to which the population of the old town on the banks of the river was ordered to remove. The order was not at once obeyed, but, by the outbreak of the second Burmese war in 1852, the transfer of the population was pretty complete and the British government was unimpeded in the measures, which it lost no time in undertaking, for the reclamation and lay-out of the riverine area. In the space of three years Rangoon rose from a squalid collection of huts into a thriving and populous town. [For improvements to Rangoon and development of Pegu, see Fytche's *Burma Past and Present*, ii., appendix G]. To-day it is the capital of Burma and has a population of 400,415, of whom 70,791 are Muhammadans (1931 Census Report).

(C. COLLIN DAVIES)

RAPAK (Jav.; Ar. *raf*⁶) is a technical term used among the Javanese, in this one case only, for the charge made by the wife, at the court for matters of religion, that the husband has not fulfilled the obligations which he took upon himself at the *ta'lik* of *ṭalāk* [see ṬALĀḲ]. These obligations are of a varied and changing nature. Among the conditions the following always occurs: "If the man has been absent a certain time on land or (longer) over seas" i.e. without having transmitted *nafaka* [q. v.] to his wife. A clause that is never omitted is the following: "If the wife is not content with this". She is therefore at liberty to be quite satisfied with the husband's non-fulfilment of his vows, without taking steps for a divorce. The work of the court is only to ascertain the fulfilment of the condition and the arising of *ṭalāk*. As always, the *ṭalāk* is still entered in a register. — It is evident that this procedure guarantees the integrity of the law otherwise endangered.

Bibliography: C. Snouck Hurgronje, *De Atjehers*, Batavia 1893, i. 382; Th. W. Juynboll, *Handleiding tot de kennis van de Moh. wet*, Leyden 1925, p. 210. (R. A. KERN)

RAS AL-‘AIN (‘AIN WARD), a town in al-Djazira on the Khābūr. In ancient times it was already known as Resain-Theodosiopolis (*Notitia dignitatum*, or. xxxvi. 20) or *Pégnva* (Steph. Byz.), Syriac *Rēsh* ‘Ainā. On account of its position at the sources of the Khābūr it has been identified with the road-station *Fons Scabura* of the *Tabula Peutingeriana* (*fons Chabura* in Pliny, *Nat. hist.*, xxxi. 37; xxxii. 16) (E. Herzfeld, *Reise im Euphrat-*

u. *Tigris-Gebiet*, i. 191; A. Poidebard, *La Trace de Rome dans le désert de Syrie*, p. 151 sq.). According to Ioannes Malalas (Bonn, p. 345 sq.) in whom the form *Ῥοφαεῖνᾱ* is probably due to a confusion with the Syrian Raphaneaia, the town in 383 (according to the *Edessenische Chronik*, ed. Hallier, in *Texte und Untersuch. z. Gesch. d. altchristl. Literatur*, ix/i, p. 102, 149, N^o xxxv., as early as 692 Sel. = 380—381) received from Theodosius I city rights and the name Theodosiopolis, a name borne also by the Armenian town of Karin (Erzerüm) probably from the time of Theodosius II. As its new name was generally used without any distinguishing epithet, it is sometimes difficult to distinguish which of the two towns is intended. For example the siege of Theodosiopolis by Bahrām V Gūr in 421 (Theodoret, *Hist. eccl.*, v. 37, 7) which Weissbach (Pauly-Wissowa, *R. E.*, v., A, p. 1925, s.v. *Theodosiopolis*, N^o 2) refers to the Armenian town, is told by Michael Syrus (transl. Chabot, ii. 13 = Barhebr., *Chron. syr.*, ed. Bedjan, p. 70) of Rēsh ʿAinā; the Syriac chroniclers (Mich. Syr., ii. 372; Barhebraeus, *Chron. syr.*, p. 92) further record that Khusrāw II gave back to the Byzantines Dārā and Rēsh ʿAinā, while the other sources mention only Dārā and Martyropolis in addition to Armenia. The Persian general Ādharmahan twice (578 and 580) destroyed the town (Mich. Syr., ii. 322 sq.). In the reign of Phocas the Persians took Rēsh ʿAinā from the Byzantines (*The Chronological Canon of James of Edessa*, transl. Brooks in *Z. D. M. G.*, liiii., 1899, p. 323, N^o 284).

In the year 19 (640) ʿIyād b. Ghannm after the subjection of Osrhoēne marched against the province of Mesopotamia and by ʿOmar's orders sent ʿUmayr b. Saʿd against the town of ʿAin Warda or Rās al-ʿAin, which was besieged and stormed by him (al-Balādhuri, ed. de Goeje, p. 175—177). When a portion of the people of the town abandoned it, the Muslims confiscated their property. Among the rebels who rose against the caliph ʿAbd al-Malik about 700 was ʿUmayr b. Ḥubāb of Rās al-ʿAin (Abu l-Faraj, *Kitāb al-Aghāni*, Būlāk, xx. 127; Ibn al-Athīr, ed. Tornberg, iv. 254 sq.; Mich. Syr., ii. 469; Barhebraeus, *Chron. syr.*, ed. Bedjan, p. 111). In the reign of Maʾmūn, Ḥubaib took the town in 1125 Sel. (814 A.D.) (Mich. Syr., iii. 27; Barhebraeus, *op. cit.*, p. 137). The Jacobite patriarch Yōhannān III died on Dec. 3, 873 in Rēsh ʿAinā (Mich. Syr., iii. 116; Barhebraeus, *Chron. eccles.*, ed. Abbeloos-Lamy, i., Lyons 1872, col. 387). After their campaign against Dārā and Nišibin (942 A.D.) the Byzantines in 943 took Rās al-ʿAin, plundered it and carried off many prisoners (Ibn al-Athīr, viii. 312). A man from Rās al-ʿAin, Aḥmad b. al-Ḥusain Aṣfar Taghlib, called al-Aṣfar, disguised as a dervish, in 395 (1005) with a body of Arabs made a raid into Byzantine territory as far as Shaizar and Mahrūya near Antākīya but was driven back by the Patricios Bīghās. The governor Nicephoros Uranos in the following year undertook a punitive expedition to the region of Sarūdj, defeated the Bani Numair and Kilāb and had al-Aṣfar thrown into prison by Luʿluʾ, lord of Ḥalab in 397 (1007) (Yaḥyā b. Saʿīd al-Antākī, in *Patrol. Orient.*, xxiii., 1932, p. 466 sq.; Georg. Kedren-Skylitz., Bonn, ii., 454, 8; Barhebraeus, *Chron. syr.*, ed. Bedjan, p. 229). About the year 523 (1129) the Franks were lords of the whole of Syria and Diyār Muḍar and threatened Āmid, Nišibin

and Rās al-ʿAin. The latter was taken by Joscelin and a large part of the Arab population killed and the remainder taken prisoners (Mich. Syr., iii. 228; Barhebr., *Chron. syr.*, ed. Bedjan, p. 289). But the Franks cannot have held the town for very long.

Saif al-Dīn of Mawṣil and ʿIzz al-Dīn Masʿūd of Ḥalab in 570 (1174—1175) attacked Ṣalāḥ al-Dīn and besieged Rās al-ʿAin but were soon afterwards defeated by him at Ḳurūn Ḥamā. In 581 (1185—1186) Saladin crossed the Euphrates and marched via al-Ruhā, Rās al-ʿAin and Dārā to Balad on the Tigris. His son al-Aḡdāl in 597 (1200—1201) received from al-ʿĀdil the towns of Sumaisāt, Sarūdj, Rās al-ʿAin and Djumlin; when he then marched on Damascus, Nūr al-Dīn of Mawṣil and Ḳuṭb al-Dīn Muḥammad of Sindjār again took the Džazira from him but fell ill in Rās al-ʿAin in the heat of summer and concluded peace again. In 599 (1202—1203) al-ʿĀdil took from al-Aḡdāl the towns of Sarūdj, Rās al-ʿAin and Djumlin (other fortresses also are mentioned). When the Kurđj (Georgians) who had advanced as far as Khilāt in 606 (1209—1210) learned that al-ʿĀdil had reached Rās al-ʿAin on his way against them, they withdrew (Kamāl al-Dīn, transl. Blochet, in *R. O. L.*, v. 46). Malik al-Ashraf, who had defeated Ibn al-Mashṭūb in 616 (1219—1220) forgave him for rebelling and gave him Rās al-ʿAin as a fief (Kamāl al-Dīn, *op. cit.*, p. 61; according to Barhebraeus, *Chron. syr.*, p. 439, however, Ibn al-Mashṭūb died in prison in Ḥarrān).

Saladin's nephew al-Ashraf in 617 (1220—1221) was fighting against the lord of Mārdin. The lord of Āmid made peace between them, when Rās al-ʿAin was ceded to al-Ashraf, Muwazzar and the district of Shabakhtān (around Dunaisir) to the lord of Āmid. In exchange for Damascus, al-Ashraf, in 626 (1229) gave his brother al-Kāmil the towns of al-Ruhā, Ḥarrān, al-Raḡḡa, Sarūdj, Rās al-ʿAin, Muwazzar and Djumlin (Kamāl al-Dīn, in *R. O. L.*, v. 77; Barhebraeus, *Chron. syr.*, p. 458) who occupied them in 634 (1236—1237) (Kamāl al-Dīn, *op. cit.*, p. 92). After the defeat of the Khwārizmians at Djabal Djalahmān near al-Ruhā, the army of Ḥalab in 638 (1240—1241) took Ḥarrān, al-Ruhā, Rās al-ʿAin, Djumlin, al-Muwazzar, al-Raḡḡa and the district belonging to it (Kamāl al-Dīn, in *R. O. L.*, vi. 12). But in 639 (1241—1242) the Khwārizmians, who had made an alliance with al-Malik al-Muẓaffar of Maiyāfāriḳin, returned to Rās al-ʿAin, where the inhabitants and the garrison, including a number of Frankish archers and cross-bowmen, offered resistance. An arrangement was made by which they were admitted to the town by the inhabitants, whose lives were promised them, and captured the garrison. When al-Malik al-Manṣūr had returned to Ḥarrān and al-Muẓaffar had retired to Maiyāfāriḳin with the Khwārizmians, they sent their prisoners back (Kamāl al-Dīn, in *R. O. L.*, vi. 14). In the same year also the Tatars came to Rās al-ʿAin (*ibid.*, p. 15). When the Khwārizmians and Turkmens raided al-Džazira, the army of Ḥalab under the emir Djamāl al-Dawla in Djumādā II 640 (1242—1243) went out against them and the two armies encamped opposite one another near Rās al-ʿAin. The Khwārizmians combined with the lord of Mārdin and finally a peace was made by which Rās al-ʿAin was given to the Ortoḳid ruler of Mārdin (Kamāl al-Dīn, in *R. O. L.*, vi. 19).

In a Muḥammadan cemetery in the North of Rās al-‘Ain, M. von Oppenheim found an inscription of the year 717 (1317–1318). The Syrian chroniclers mention Rēsh ‘Ainā as a Jacobite bishopric (11 bishops between 793 and 1199 are given in Mich. Syr., iii. 502) in which a synod was held in 684 (Barhebraeus, *Chron. eccl.*, i. 287). Towards the end of the xivth century the town was sacked by Tīmūr.

Rās al-‘Ain is built at a spot where a number of copious, in part sulphurous, springs burst forth, which form the real “main source” of the Khābūr (al-Dimishkī, ed. Mehren, p. 191). The Wādī al-Djirdjib, which has not much water in it and starts further north in the region of Wirānshehir, and which may be regarded as the upper course of the Khābūr, only after receiving the waters from the springs of Rās al-‘Ain becomes a regular river, known from that point as the Khābūr. According to M. von Oppenheim (cf. his map in *Petermanns Mitteil.*, 1911, ii., pl. 18), the springs at Rās al-‘Ain are ‘Ain al-Ḥuṣān, ‘Ain al-Kebrit and ‘Ain al-Zarkā; according to Taylor (*J.R.A.S.*, xxxviii. 349, note) ‘Ain al-Baiḍā and ‘Ain al-Ḥasan are the most important; he also gives the names of 10 springs in the N. E. and 5 in the S. of the new town. The Arab geographers talk of 360, i.e. a very large number of springs, the abundance of water from which makes the vicinity of the town a blooming garden. One of these springs, ‘Ain al-Zāhiriya, was said to be bottomless. According to Ibn Ḥawkal, Rās al-‘Ain was a fortified town with many gardens and mills; at the principal spring there was according to al-Makdisī a lake as clear as crystal. Ibn Rusta (*B.G.A.*, vii. 106) mentions Rās al-‘Ain, Karḳisiyā, and al-Rakka as districts of al-Djazīra. Ibn Djbair in 580 (1184–1185) saw two Friday mosques, schools and baths in Rās al-‘Ain on the bank of the Khābūr. According to Ḥamd Allāh al-Mustawfī (xivth century) the walls had a circumference of 5,000 paces; among the rich products of Rās al-‘Ain, he mentions cotton, corn and grapes. The historical romance *Futūḥ Diyār Rabi’a wa-Diyār Bakr* (xvth century?) wrongly ascribed to al-Wākidi, which contains much valuable geographical information, mentions at Rās al-‘Ain a plain of Muthakḳab and a Mardj al-Tīr (var. al-Dair); it also mentions a Nestorian church in the town and several gates (in the translation by B. G. Niebuhr and A. D. Mordtmann, *Schriften der Akad. von Hamburg*, i., part iii., Hamburg 1847, p. 76, 87: the “gate of Istacherum” in the east and the “Mukthaius or gate of Chabur” not precisely located. I have not been able to see the Arabic text of Ps.-Wākidi, ed. Ewald, Göttingen 1827).

At Rās al-‘Ain were the Jacobite monasteries of Bēth Tirai and Spequlos (*speculae*; Ps.-Zacharias Rhet., viii. 4, transl. Ahrens-Krüger, p. 157, 2; so also for Asphulos in Mich. Syr., iii. 50, 65, cf. ii. 513, note 6; Saphylos in Mich. Syr., iii. 121, 449, 462; Barhebraeus, *Chron. eccl.*, ed. Abbeloos-Lamy, i. 281 sq.; Sophoclis, *ibid.*, p. 397 sq. probably so to be read throughout!).

A little to the southwest of Rās al-‘Ain on the right bank of the Khābūr is the great mound of ruins, Tell Ḥalāf, where M. von Oppenheim excavated the ancient palace of Kapara (cf. *Bibl.*).

AL-RĀSHID BI ‘LLĀH ABŪ DJĀ‘FAR AL-MANŠŪR B. AL-MUSTARSHID, ‘Abbāsīd caliph. On the 2th Rabī‘ II, 513 (July 13, 1119) the caliph al-Mustarshid [q. v.] had homage paid to his twelve-year-old son Abū DJā‘far al-Manšūr as heir-apparent and in Dhū ‘l-Ḳa‘da 529 (Aug.—Sept. 1135) the latter was acclaimed caliph under the name al-Rāshid bi ‘llāh. When the Saldjūḳ Sultān Mas‘ūd b. Muḥammad [q. v.] soon afterwards demanded 400,000 dinārs from him, al-Rāshid refused, because, as he said, he had no money. Mas‘ūd’s envoy then attempted to search the caliph’s palace and seize the money by force; but the resisted the Sultān’s troops were scattered and his palace plundered. Several emirs also withdrew their homage from the sultān. His nephew, Dāwūd b. Maḥmūd, advanced from Ādharbāidjān against Baghdād and reached it in the beginning of Šafar 530 (Nov. 1135). In the meanwhile the number of the caliph’s supporters increased. He was joined among others by the Atābeg of al-Mawṣil ‘Imād al-Din Zengi [q. v.] and Dāwūd was proclaimed sultān in Baghdād. On hearing this Mas‘ūd prepared for war, advanced on Baghdād and laid siege to it; he did not succeed in taking it, so after some fifty days he withdrew to Nahrawān [q. v.] and then went to Hamadhān [q. v.]. Ṭorontai, governor of Wāsiṭ, then appeared and placed a sufficient number of boats at his disposal so that he was able to cross the Tigris and occupy the western bank. The result was that the allies separated. Dāwūd returned to Ādharbāidjān and Zengi with the caliph to al-Mawṣil, while Mas‘ūd in the middle of Dhū ‘l-Ḳa‘da 530 (Aug. 1136) entered the ancient city of the caliphs, where he forbade looting and other excesses and restored order. He then summoned an assembly of judges and legists who declared the fugitive caliph unworthy of the throne. The latter was accused among other things of having broken his oath to the Sultān; he was said to have solemnly promised Mas‘ūd never to take up arms against him nor to leave the capital; he was also accused of other crimes. In his stead, his uncle Abū ‘Abd Allāh Muḥammad al-Muḳtafi b. al-Mustazhir [q. v.] was appointed commander of the faithful.

Al-Rāshid however did not stay long in al-Mawsil but went to Ādharbāidjān where he joined Dāwūd. Several emirs, dissatisfied with Mas'ūd, also made common cause with Dāwūd with the object of restoring al-Rāshid to the throne; the latter however took no part in the military operations [see also the article MAS'ŪD]. On Ramaḍān 25 or 26, 532 (June 6 or 7, 1138) the former caliph, who had not quite recovered from an illness, was murdered by Assassins near Iṣfahān.

(K. V. ZETTERSTÉEN)

RĀSHID, MEHMED, an Ottoman imperial historiographer, belonged to Stambul, where he was born as the son of the Kādi Mullā Muṣṭafā, a native of Malaṭiya. He completed his studies in his native city where he was appointed official historiographer (*waḳfī nuwwis*, q. v.) in 1126 (1714). He held this office till his appointment as kādi at Aleppo in 1134 (1720). Later on he went as ambassador to Persia with the rank of Kādi of Mecca, became in Sha'bān 1142 (Feb. 1730) Kādi of Stambul, was dismissed a few months later and on 1st Djumādā 1147 (Oct. 1734) appointed kādi 'aṣker of Anatolia. He died on 18th Šafar 1148 (July 10, 1735) in Stambul (cf. Şubḥi; *Ta'riḫh*, fol. 13, 22, 66 remarkably brief) and was buried opposite the mosque of Afḍalzāde in the Kara Gümrük Street. On his tombstone see Brüsali Mehmed Tāhir, *Oḥmānī Müellifleri*, iii. 55 note.

Mehmed Rāshid in continuation of Na'imā [q. v.] wrote a history of the Ottoman empire from 1071 (1660) to 1134 (1721) usually called briefly *Ta'riḫh-i Rāshid* (cf. Hādjdji Khalifa, N^o. 14,526) which is the authoritative source for this period. His successor in the office of imperial historiographer was Ismā'il 'Āsim, known as Küçük Çelebi-zāde (cf. Rāshid, *Ta'riḫh*, iii., fol. 114).

In addition to numerous MSS. (cf. F. Babinger, *G.O.W.*, p. 269 to which we have to add Upsala, N^o. 667—668 [Rāshid's autograph?]) and Stambul Lālā Ismā'il, N^o. 378) Rāshid's history has been twice printed (folio, Stambul 1153, 4 vols.; octavo, 6 vols., Stambul 1282; cf. thereon *J.A.*, 1868, i. 477). Portions have been translated by M. Norberg, *Turkiska rikets annaler*, Hernösand 1822, iii. 635—1079, and J. J. S. Sekowski, *Collectanea z Dziejopisów Tureckich*, ii., Warsaw 1825, p. 1—208.

Bibliography: cf. F. Babinger, *G.O.W.*, p. 269 sq. (FRANZ BABINGER)

AL-RASHĪD. [See 'ABD AL-WĀḤID, HĀRŪN.]

AL-RASHĪD (MAWLĀI) B. AL-ŠARĪF B. 'ALĪ B. MUḤAMMAD B. 'ALĪ, 'Alid Sultān of Morocco and the real founder of the dynasty which still rules the Sharifan empire. He was born in 1040 (1630—1631) in Tāfilālt [q. v.] in the south of Morocco, where his ancestors, the Hasani Šurafā' (Šorfa' [q. v.]) of Sidjilmāsa [q. v.], had founded a flourishing *zāwiya* [q. v.] and gradually acquired a fairly considerable political influence, which increased with the decline of the Sa'dian [q. v.] dynasty.

Morocco being at this time plunged into anarchy, the Šorfa' of Tāfilālt were able rapidly to become masters of the great tracts of steppe-like country to the north of the cordon of oases which formed their appanage. The eldest son of the chief of the *zāwiya*, Mawlāi Maḥammad, having successfully fought the marabout of the *zāwiya* of Iḡh in al-Tāzarwālt (S. W. of Morocco), 'Alī Abū Ḥassūn, who had political ambitions of his own, assumed a royal title in 1050 (1646). He did not however yet succeed in crushing the power of the marabouts of the *zāwiya* of al-Dilā' in central Morocco; he had to be content, after a very brief occupation of Tāzā and Fāz in 1650, with effective sovereignty over eastern Morocco only.

On the death of Mawlāi al-Šarīf in 1069 (1659) his son, Mawlāi al-Rashīd, not trusting his brother, Mawlāi Maḥammad, left the ancestral *zāwiya* for the rival *zāwiya* of al-Dilā', where in spite of a superficially warm welcome, he was soon given the hint to go; he proceeded to Āzrū, then to Fās, which, regarded as an undesirable by the lord of the city, the adventurer al-Duraidī, he was not allowed to enter. He next went to eastern Morocco, and very soon succeeded in gaining a large number of followers, particularly, in the important tribe of the Banū Īznāssen (Beni Snassen), the *Shaikh* al-Lawāti, a religious dignitary, then of great influence. At the same time he attacked a very rich Jew, who played the regular lord and lived in the mountains of the Banū Īznāssen, at the little town called Dār Ibn Maṣṣāl: al-Rashīd slew him and seized his wealth. This coup vividly impressed the imagination of the people of the district and was to give rise, as P. de Cenival has brilliantly shown, to a legend, the memory of which still survives in the annual festival which follows the election of the "sultān of the *ḡulbā'*" at Fās. Mawlāi al-Rashīd by this murder not only acquired considerable material resources, but also a real ascendancy over the people of the neighbourhood. In 1075 (1664) the large tribe of the Angād rallied to his authority, and he set up in Uḡḍa [q. v.] as a regular ruler. On the news of the proclamation of al-Rashīd, his brother Mawlāi Maḥammad, much disturbed, hurried from Tāfilālt to eastern Morocco; his troops were met by those of al-Rashīd, and Mawlāi Maḥammad having been killed early in the battle, his men then went over to the surviving prince. Thenceforth Mawlāi al-Rashīd went on from success to success.

He very soon seized Tāzā without difficulty, and directly threatened Fās, but he first of all took care to secure his power solidly at Tāfilālt, the cradle of his line, and added to his lands the mountains of the Rif [q. v.] on the shores of the Mediterranean, which were then ruled by an enterprising individual named Abū Muḥammad 'Abd Allāh A'arrās. This *shaikh* had made an agreement, first with the English and then with the French, for the establishment of factories on the Rif bay of Alhucemas (transcribed in the documents of the period as Albouzème). Mawlāi al-Rashīd deprived him of the Rif in March 1666, just when the Marseillais Roland Fréjus, having obtained from the King of France the privilege of trading in the Rif, was landing on the Moroccan coast. Fréjus then went to see Mawlāi al-Rashīd at Tāzā, but the negotiations into which he endeavoured to enter with the *shaikh* soon collapsed.

Al-Rashīd without delay turned his attention to

the capital of northern Morocco, Fās, which still withstood his authority. He laid siege to it and took it by storm on the 3rd Dhū 'l-Hijjā 1076 (June 6, 1666); the adventurer in command there, al-Duraīdī, took to flight. Al-Rashīd took vigorous steps to punish certain of the notables of the town, and the people proclaimed him sultān. He was at the same time able to rally to his side the important group of Idrisid *Shorfa'* in the capital.

The years that followed were used by Mawlāi al-Rashīd to extend his possessions towards west and south. He first made an expedition against the *Gharb*, out of which he drove the chief al-Khaḍīr Ghailān, and seized al-Kaṣr al-Kabīr (Alcazarquivir [q. v.]); he also took Meknes [q. v.] and T'etuan [q. v.] as well as Tāzā, the inhabitants of which had rebelled. In 1079 (1668) he took and destroyed the *sāwiya* of al-Dilā' after having routed its chief Muḥammad al-Hādīj at Baṭn al-Rummān. The same year, Mawlāi al-Rashīd seized Marrākesh and put to death there the local chief 'Abd al-Karīm al-Shabbānī, surnamed Karrūm al-Hādīj. In 1081 (1670) he undertook an expedition into Sūs [q. v.] where agitators still disputed his authority. He took Tārūdāt [q. v.] and the fortress of Iḥigh and returned to Fās, now lord of all Morocco. At this time, says the chronicler al-Ifrānī, "all the Maghrib, from Tlemcen to the Wādī Nūl on the borders of the Ṣaḥarā, was under the authority of Mawlāi al-Rashīd".

The next year the sultān went from Fās to Marrākesh where one of his nephews was endeavouring to set up as a pretender to the throne. During his sojourn in the southern capital, Mawlāi al-Rashīd, not yet 42, died as the result of an accident on the 11th Dhū 'l-Hijjā 1082 (April 9, 1672): the horse he was riding having reared, he fractured his skull against a branch of an orange-tree. He was buried at Marrākesh, but later his body was brought to Fās where he was interred in the chapel of the saint 'Alī Ibn Hrizhim (vulg. Sīdī Ḥrazem). His brother, Mawlāi Ismā'īl [q. v.] who succeeded him, was proclaimed sultān on the 15th Dhū 'l-Hijjā following.

The brief political career of Mawlāi al-Rashīd was, we have seen, particularly active and fruitful. The Muslim historians of Morocco never tire of praising this ruler whose memory is still particularly bright, especially in Fās. It was he who built in the town the "Madrasa of the Rope-makers" (*Madrasat al-Sharrāṭīn*), the bridge of al-Raṣīf, the *kaṣaba* of the *Sharāda* (Casba of the Cherarda) and 2½ miles east of Fās, a bridge of nine arches over the Wādī Sabū (Sebou).

(E. LÉVI-PROVENÇAL)

RĀSHID AL-DĪN SINĀN (or, as the Ismā'īlis themselves usually call him, Sinān Rāshid al-Dīn), the famous leader of the Syrian Ismā'īlis in the second half of the xiith century, is better known to the world as *Shaiḫ al-Djabal*, or the "Old Man of the Mountain". His full name was Abu 'l-Ḥasan Sinān b. Sulaimān b. Muḥammad. He was born near Baṣra, educated in Persia, and, in 558 (1163), was appointed by Imām Ḥasan of Alamūt as the head of the Syrian Ismā'īli (Nizāri) community. This post he occupied till his death at an advanced age in Ramaḍān 589 (Sept. 1193), at Maṣyāf. He played a prominent part in the Syrian and Egyptian politics of his time, successfully defending his people from the continuous pressure of the orthodox Muḥammadan rulers, especially the famous Saladin [q. v.], on the one hand, and against the Crusaders on the other. The fact that this small community still continues to exist (in the villages near Ḥamā), in spite of the persistently hostile attitude of its neighbours, must to a great extent be attributed to the solid foundations laid by him. References to him are to be found in the works of all historians who deal with the events of his period, but the most detailed account is given in the paper by Stanislas Guyard, *Un grand maître des Assassins, au temps de Saladin* (*J. A.*, 1877, p. 324–489). It gives the original Arabic text of the *Faṣl*, a genuine Ismā'īli work probably by a contemporary of Sinān, containing the *manāḳib* about him, i.e. various anecdotes based on the oral tradition of the sect. This text is accompanied by a French translation and an introduction containing a detailed review of the historical information about Sinān, and the Ismā'īli sect in general, which, in the main, still preserves some value. The *Faṣl* appears to be now unknown to the Syrian Ismā'īlis; they do not appear to have any reliable and genuine histories of their own community. The recently published *al-Falak al-dawwār fī Samā' al-'Immat al-aṭṭhar*, by an Ismā'īli author, 'Abd Allāh b. al-Murtaḍā from Khawābī (Aleppo 1352 = 1933), shows no trace of such local tradition, and the account of Sinān given in it is entirely based on well-known general histories, such as those by Ibn al-Aṭṭār, Abu 'l-Fidā', etc.

The stories connected with Sinān chiefly centre around his organisation of *fidā'is*, which he used as an instrument for removing his political opponents by assassination. Undoubtedly there is some grain of truth in these stories; but it is obvious that excited bazaar rumours greatly exaggerated them, wrongly attributing to him and his organisation many exploits for which they were not responsible. Many historians state that

he was regarded as the supreme and superhuman head of the sect. Unfortunately, he is never referred to in any available genuine works of the Persian Ismā'īlis, and it is difficult to ascertain what was his real position in the sectarian hierarchy. Most probably he occupied the highest rank after the Imām, i.e. that of the *ḥudūdīyat*, which, according to the reformed Nizārī doctrine, implied a considerable "dose" of the superhuman. In any case, there is no reason to think that he either claimed to be, or was regarded as an Imām, although, just as in the case of other eminent Ismā'īlis, such as Nāṣir-i Khusrāw and Ḥasan b. al-Ṣabbāḥ, popular tradition furnished him with noble descent from 'Alī himself.

Bibliography: given in the article.

(W. IVANOW)

RASHĪD AL-DĪN ṬABĪB, one of the greatest historians of Persia. Fadl Allāh Rashīd al-Dīn b. 'Imād al-Dawla Abu 'l-Khair was born in Hamadhān about 1247. He began his career in the reign of the Mongol ruler Abāghā Khān (1265—1282) as a practising physician. But as in addition to a remarkable knowledge of medicine he was an exceedingly talented and farseeing statesman, he rose under Ghāzān Khān (1295—1304) from his earlier position to the rank of a *ṣadr* (and also court historian) which was given him after the execution of Ṣadr-i Dīhān Ṣadr al-Dīn Zandjānī (May 4, 1298). In 1303 he accompanied his sovereign in this capacity on a campaign against Syria. Under Ūldjaitū (1304—1316) Rashīd attained the zenith of his career. He used his fabulous income for a number of charitable buildings. For example in order to beautify the new capital of the Mongols in Persia, Sulṭāniya, he built a whole new suburb, called after him Rub'-i Rashīdiya, which consisted of a mosque, a madrasa, a hospital and several thousand houses. At the same time he was working steadily on his history of the world, the first volume of which he presented to his sovereign on April 14, 1306. At this period there was no limit to his influence. He even succeeded in converting Ūldjaitū to the teaching of the Shāfi'is. Two eminent Baghdad scholars, Shihāb al-Dīn Suhrawardī and Djamāl al-Dīn, who were accused of negotiating with Egypt and were expecting death, were rescued by him. In 1309 he resumed his building activity and erected a new suburb near Ghāzāniya, east of Tabriz, the water for which he provided by a great canal from the Sarāwrūd. But his high position now procured this great man a number of enemies. In 1315 he experienced considerable unpleasantness through the shortage of money which prevented the soldiers being paid. After Ūldjaitū's death his enemies exerted every effort to destroy Rashīd al-Dīn. In October 1317 he was dismissed from his high offices and the death of his patron Amīr Sawīdj (Jan. 1318) deprived him of his last support, until finally he was executed with his young son Khwādja Ibrāhīm on a false charge of having poisoned his former master Ūldjaitū (July 18, 1318). His corpse was exposed to every contumely, his pride, the Rub'-i Rashīdī, destroyed and plundered. His elder son Ghiyāth al-Dīn, however, succeeded in retaining a high office even after his father's death, but in 1336 he also was sentenced to death. Even after death Rashīd's body was not allowed to rest in its grave, for eighty years later Timūr's son, the mad Mirān-

shāh (1404—1407), had his bones dug up and buried in the Jewish cemetery (1399).

As already mentioned, Rashīd owes his fame to his immortal history, *Dīamī al-Tawārikh*, a history of the Mongols which he began by command of Ghāzān-Khān (wherefore it is sometimes also known as the *Tā'rikh-i Ghāzānī*). Ūldjaitū ordered the work to be continued and to be completed by a general history of the world of Islām and a geographical appendix. The work, according to the original plan, was to consist of two main parts: I. History of the Mongols and II. General History and Appendix. But when the work was finished in 1310—1311 it took the following form:

Vol. i. 1. History of the Turkish and Mongol tribes, their divisions, genealogy and legends.

2. Čingiz-Khān, his predecessors and successors down to Ghāzān.

Vol. ii. Preface, Adam, the Muslim and Hebrew Prophets.

1. The old Persian Kings.

2. Muḥammad and the caliphs to 1258. History of the ruling dynasties of Persia. The eastern and western Ismā'īlis. The Oghuz and the Turks, Chinese, Jews, the Franks, their emperors and Popes, India, Buddha and his religion.

Rashīd had intended to add the history of Ūldjaitū's reign also, the beginning of which (1306—1307) was to open the second volume and the end to close it. Whether he did so is not yet known, as that portion as well as the geographical appendix is lacking in all extant manuscripts. The most remarkable feature of this great work is the conscientiousness with which Rashīd went to work and endeavoured to find the best and most reliable sources. Although the Mongol chronicles, the celebrated *Altan dāptār*, could hardly be accessible to him as a Persian, he obtained the necessary facts from them through his friend Pūlād-čink-sānk and partly from Ghāzān himself, who had a remarkable knowledge of his people's history. The information about India was furnished him by an Indian *bhikṣu*, about China by two Chinese scholars. The many-sidedness of Rashīd al-Dīn's learning is simply astounding in a mediæval scholar of the time. He knows of the struggles between Pope and Emperor, even knows that Scotland pays tribute to England and that there are no snakes in Ireland.

Rashīd al-Dīn was well aware of the importance of his work and endeavoured in all possible ways to ensure its survival. He ordered copies to be made for his friends and for different scholars; the works, written in Persian, were translated into Arabic and vice-versa. Every year he sent copies to the libraries of the great cities and allowed anyone to copy them freely. Yet all these measures proved in vain, for no single complete copy has come down to us.

Besides his great history, he also wrote: 1. *Kisāb al-Ahyā wa 'l-Āthār* in 24 chapters, which discussed questions of meteorology, agriculture, bee-keeping, suppression of snakes and other pests etc., and also notes on architecture, fortification, ship-building, mining and metallurgy. No copy has yet been found. 2. *Tawqīḥāt*, a mystic theological tractate in 19 chapters. 3. *Miftāḥ al-Tafāsīr*, on the eloquence of the Kur'ān, its commentaries etc. 4. *al-Risālat al-sulṭāniya* (finished on March 14, 1307), the result of a theological disputation in the presence of Ūldjaitū. 5. *Laṭā'if al-Ḥakā'ik*,

14 letters of a mystical and theological nature. The last four works are written in Arabic and form what is known as the *Madjmū'a-yi Rashīdiyya*. A fine copy of this collection made in 1310-1311 (probably at the request of the author himself) is in the Bibliothèque Nationale (de Slane, *Catalogue des manuscrits arabes*, Paris 1883—1895, No. 2324, p. 407). 6. *Bayān al-Hakā'ik*, 17 letters of a theological nature, occasionally touching on medical questions. In the late Prof. E. G. Browne's private library was a valuable collection of 53 letters by Rashīd al-Dīn to various notables. They were collected by his secretary Muḥammad Abarkūhi.

In spite of the immensely high value of Rashīd al-Dīn's history we have so far no complete edition of the surviving portions, either in text or translations. The task is however not an easy one as the MSS. of the work, although fairly numerous, are not at all reliable and require much very difficult critical work. Even the oldest MSS. (Brit. Mus. Add. 16, 688, Rieu, No. 78—79) is rather defective. In W. Barthold's opinion the best manuscript known to him was that in the Leningrad Public Library (v. 3—1) copied in 1407—1408. A very valuable old manuscript (xivth or xvth century) is in the Central Asian Library in Tashkent (see E. K. Betger, *Fahresbericht der Mitt. As. Staatsbibliothek für das Jahr 1925* [in Russian] and W. Barthold, *Nachrichten der Akademie der Wissenschaften der U. S. S. R.*, 1926, p. 217 sqq. [in Russian]).

RĀSİM, AHMAD, a Turkish writer born in 1283 (1866—1867) in Şarī Güzel. He early lost his father Babā' al-Dīn and was brought up by his mother. In 1292 (1875) he entered the famous school Dār al-Shefāka in Stambul, which he left in 1300 (1883) with the leaving certificate.

Already in his last years at school he showed a fondness for art and literature and therefore decided to become a writer, and to this profession, or, as he himself calls it: the Sublime Porte Road (*Bāb-i 'ālī Dī'adesi*), he has remained faithful, untroubled by all the political changes that have taken place. Like many other writers he began as a journalist, and almost all the more important Turkish papers received contributions from his pen, such as the *Djiride-i Hawādith*, *Terdjūmān-i Hakikat*, *Ikdām*, *Şabāh*, *Ṭarīk*, *S'ādet*, *Ma'lūmāt*, *Taswīr-i Aşkār* and *Hakk*, and periodicals like *Therwet-i Funūn* and *Resimli Gazete*. He afterwards collected his numerous articles and essays, for example in the two volumes "Articles and entertaining Sketches" (*Maḳālāt wa-Musāḥabāt*, 1325) and in the four volumes "Life of a man of Letters" ("Ömr-i Edebi, 1315—1318). The latter is not an account of his life but reflects his spiritual development and his feelings and emotions reflected in publications of different years.

Ahmad Rāsim's output became in time very extensive; in all there are said to be over 100 works of larger or smaller size from his pen. Nevertheless he was not a polygraph in the bad sense of the word, but before he dealt with a subject he always first studied it thoroughly and then wrote on it seriously, sometimes also in the lightly humorous fashion of which he is a master, or again in a pleasing conversational way, but always with artistic feeling and in a particular style which is his own. He always well knew the taste of his readers and he had great success with them. His style was a new one and independent of existing schools and coteries; he created a school himself and his influence must long and strongly be felt in Turkish literature.

His literary work covers the fields of the novel, long short story and tale, e.g. his early novels, "Heart's Inclination" (*Mail-i Dil*, 1890) and "Life's Experiences" (*Tadjarib-i Hayāt*, 1891; short analysis of both in Horn, *Geschichte der türkischen Moderne*, p. 46 sq.), also his patriotic novel "The Difficulties of Life" (*Mashākki-i Hayāt*, 1308), the stories "Inexperienced Love" (*Tedjribesiz Ishk*, 1311), "My School-friend" (*Mekteb Arkadaşım*, 1311), a little later "The Unfortunate Man" (*Nākām*, 1315) and another patriotic novel "A Soldier's Son" (*Asker Oğlu*, 1315) and somewhat more lyrical "The Book of Grief" (*Kitābe-i Ḡhamm*, 1315) and "Nightingale" (*Andalib*, in verse).

At the same time he had from the first a preference for history. He does not, of course, in any way claim to further the study of history by independent research but rather sees it his duty to arouse an interest in history among his countrymen by presenting it in popular form, and from this point of view his historical writings may be regarded as carefully prepared compilations. In his early period he wrote a history of ancient Rome (*Eski Roma'llar*, 1304), a short history of civilisation (*Ta'rikk-i mukhtaşar-i Beşer*, 1304), on the progress of knowledge and culture (*Terekkiyāt-i 'ilmiye we-medeniye*, 1304), later essays on similar subjects entitled "History and Author" (*Ta'rikk we-Muḥarrir*, 1329=1911), a history of Turkey from Selim III to Murād V, entitled *Istibdadān hākimiyyet-i milliyeye* in two volumes, 1341—1342, and a meritorious general survey of the history of Turkey, *Öthmānlı Ta'rikk* in 4 volumes, 1326—1330. A valuable supplement to these historical works is

formed by the four volumes of "City Letters" (*Şehir Mektûbları*, 1328–1329), in all 218 epistles, which we have an unsurpassed description of old Stambul life in all its variety, written moreover in a very stimulating and vivid, sometimes bantering, fashion which makes it one of his best works. In "İslâm's Pages of Honour" (*Manâhîb-i İslâm*, 1325), the Muslim festivals, mosques and other religious matters are dealt with.

It seems to be only recently that our author has turned to the history of literature, e.g. in his book on *Shinâsî* [q. v.], which is intended to be an introduction to the history of the Turkish Moderns (*Maḥbûṭât Ta'rihîne Madḥhal. İlk büyük Muḥarrirlerden Shinâsî*, 1927), while his personal recollections of Turkish writers are collected in another book (*Maḥbûṭât Khâṭîrlerinden. Muḥarrir, Şâ'ir, Adīb*, 1924), also recollections of his own school-days and the old system of education in general, in his "Bastinado" (*Falaka*, 1927).

Aḥmad Râsım was also prolific as a writer of schoolbooks on grammar, rhetoric, history etc. He also wrote a letter-writer (*Ṭavvîlî Khazîne-i Mekâtîb yahod mükemmel Münşe'ât*, 5th impression, 1318). In all his works are to be found translations, and a large collection from his early period is called "Selection from Western Literature" (*Adabîyât-ı gharbîyeden bir Nabḍha*, 1887).

For this great literary activity Aḥmad Râsım required considerable freedom, such as did not exist under 'Abd al-Ḥamîd and such as he could hardly have had at all as a state official. He was however twice a member of a commission of the Ministry of Education, Conseil de l'Instruction Publique (*Endjûmen-i Teftîş we-Mu'âyana*), but only for a very short time. He showed his interest in religious matters in 1924, when after the abolition of the caliphate he wrote an article in *Wakîf* on March 4, 1924 on the relics (*amânât*, *mukhallaṭât*) of the Prophet, cloak (*khırka*), banner (*livâ'*), praying-carpet (*sadjâda*) etc., which also appeared in Cairo and Damascus in Arabic. He proposed to make these relics accessible to the public in a Museum (cf. Nallino, in *O. M.*, iv., 1924, p. 220 sq.). In recent years Aḥmad Râsım has so far been politically active as to be a deputy for Stambul along with men like 'Abd al-Ḥaḳḳ Ḥamîd and Khalîl Edhem (cf. *O. M.*, vii., 1927, p. 416 and xi., 1931, p. 227 and Mehmed Zeki, *Encyclopédie biographique de Turquie*, i., 1928, p. 23 and ii., 1929, p. 88).

Björkman)

RASSIDS, name of a dynasty. Zaidî historians make no distinction between the Zaidî imāms in Dailam [q. v.] and those in the Yaman [q. v.]; this article deals only with the Yaman. For some periods the Zaidî historians are detailed,

for others there are only casual references in writers whose main interest was elsewhere, so details are often uncertain and it is doubtful if some rulers claimed to be imāms. The name is taken from a property near Mecca, al-Rass by name, which belonged to the grandfather of the first imām, al-Ḳāsim al-Rassi, who was a descendant of Ḥasan, the son of 'Alī b. Abī Ṭālib. In 280 (893) Yahyā, named al-Ḥādī ila 'l-Ḥaḳḳ, entered the Yaman from the Ḥidjāz and advanced nearly to Ṣan'ā' [q. v.] but, failing to conquer the country, had to retreat. Later he was called back and in 284 he occupied Ṣa'da [q. v.] and conquered Naḍjrān [q. v.] though his hold on these districts was not secure and there was constant fighting. He took Ṣan'ā' more than once and his son was a captive there in 290. Then the Ḳarmaṭians [q. v.] appeared in the Yaman, took Ṣan'ā' in 294 and held it for three years, besides taking many other towns. The imām helped to drive them out of Ṣan'ā' but could not hold the town for himself. He died in 298 (910–911). During his lifetime 'Abbāsīd governors and troops were in the Yaman. Yahyā fought seventy battles with the Ḳarmaṭians and was so strong that he could obliterate the stamp on a coin with his fingers. He was a Ḥanafī in law and wanted to set up an Islāmīc state where women wore the veil and soldiers divided booty according to the precepts of the Ḳur'ān. He tried to make the *dhimmīs* [q. v.] of Naḍjrān sell any land they had bought during Islām; he had to be content with imposing a tax of one ninth of the produce.

Homage was at once paid to his son Muḥammad who kept Ṣa'da as his capital and ruled Naḍjrān, Ḥamdān [q. v.], and Khawlān. He abdicated in 301 and was followed by his brother Aḥmad who was always fighting various chiefs and the Ḳarmaṭians. In 322 (934) he was defeated by the Banū Ya'fur [q. v.] and died, Ṣa'da being occupied by the victors for four months. A son Ḥasan claimed to be imām but homage was paid to another son al-Ḳāsim al-Mukhtār. Discord ensued and at last both brothers were deposed; still al-Ḳāsim could capture Ṣan'ā' in 345 (956), though he was murdered before the end of the year. Ḥasan had died earlier. In the troubles that followed Yūsuf al-Dā'ī was lord of Ṣan'ā' until he was driven out by a new-comer from the north. In 388 (998) there was propaganda in the Yaman for al-Ḳāsim al-Manṣūr, then delegates met him in Bīsha [q. v.] and, helped by the tribe or *Khath'am*, he established himself in Ṣa'da and took Ṣan'ā' while prayers were said in his name in Kaḥlān and Mikhlaṭ Dja'far. He died in 393 and his son ruled from Alḥān to Ṣa'da and Ṣan'ā' till he was killed in 404. Some said that he was not dead but was the *mahdī* [q. v.]; another report says that he made this claim for himself. Up to this point one may perhaps speak of a dynasty of imāms; afterwards the name does not apply. The army consisted of about 1,000 horse and 3,000 foot. The next imām came from the Ḥidjāz and had some success; before he died another outsider, Abu 'l-Faṭḥ, came from Dailam in 430 (1038–1039), captured Ṣa'da and other places, and was killed fighting the Sulaiḥid [q. v.] sultān. It is said that Abū Ṭālib Yahyā (d. 520 = 1126), the imām in Dailam, was recognised in north Yaman where he appointed a governor. Aḥmad b. Sulaimān was proclaimed in 532 and ruled

Ša'da, Nadjran and Djawf [q. v.]. In 545 a great assembly met and questioned him for eight days to test his fitness as imām. Followed by the tribes of Madhhidj [q. v.] and Bakil [see ḤĀSHID] he took Šan'a' from the Hamdānid sultān and otherwise defeated him. He held Zabid [q. v.] for a few days and prayers were said in his name in Khaibar [q. v.] and Yanbu' [q. v.]. He also fought with success against the Qarmāṭians. In his old age he became blind and was taken prisoner by Fulaita b. al-Kāsim, to the disgust of all, even of the Qarmāṭians. He was set free and died in 566 (1170—1171). 'Abd Allāh b. Ḥamza set up as imām in 593 (1196—1197) and homage was paid to him in the following year after an examination (the Ḥamzī sharifs took their name from his father). He held Šan'a' for a short time but had to retire before the Aiyūbid [q. v.] sultān. He established himself in the north and received taxes from Khaibar and Yanbu'. One writer speaks of troops from Baghdād being in the Yaman; this may be an exaggeration of the report that the Muṭarrifiya asked help from the caliph. In 611 (1214) he held Šan'a' and Dhamār [q. v.] and attacked Lahidj [q. v.]. He had to abandon Šan'a' for his soldiers were tired of war. It is said that he ruled Gilān [q. v.] and Dailam by his *dā'īs*. He died in 614. The history of the imāms for the next two hundred years is given in the article RASULIDS.

At the beginning of the rule of the Tāhirids an imām in Šan'a' fought against them; he was at last beaten, was captured as he fled by some townsmen, and handed over to Muṭahhar, another imām. The Tāhirids took Šan'a' and made a son of the imām governor of towns and castles. In 869 (1164—1165) the imām Muḥammad b. al-Nāṣir retook Šan'a' and in the following year al-Malik al-Zāfir the Tāhirid was slain there.

Yahyā Sharaf al-Din began in a small way in 912 (1506—1507). Later he called in Egyptian troops from Kamarān [q. v.] to help him against the Tāhirids. They took Ta'izz [q. v.] and Šan'a', but, as the news of the Turkish conquest of Egypt broke their spirit, they were soon driven out again. In spite of the Tāhirids and recalcitrant sharifs the imām conquered most of the highlands and even took Djazān and Abu 'Arish [q. v.] but failed to take 'Aden [q. v.] and Zabid [q. v.]. Soon the Turks took Djazān, Ta'izz and Šan'a', being helped by quarrels between the imām and his sons. The Qarmāṭians (i. e. Ismā'ilis) were still dangerous enemies; eleven camel-loads of their books were captured and the imām's chief followers studied them so as to warn the common folk of the dangers in them. In 953 (1546—1547) the imām divided his realm among his sons. Though one of them, al-Muṭahhar, had submitted to the Turks he led an insurrection against them in 974 which was at first successful. This provoked the Turks to a systematic conquest. Al-Muṭahhar was defeated and allowed to retire to Ša'da with a Turkish garrison. Then an imām from a different family rose and maintained himself for seven years till he was taken prisoner. In 999 (1590) the conquest was complete. In 1006 however al-Kāsim, the ancestor of the present imām, declared himself. After varying fortunes his son drove out the Turks in 1045 (1635—1636) and since then the government has remained in this family. Sometimes a disputed succession has been settled by argument and some-

times by the sword, an unworthy imām has been deposed, and a son has taken the place of his decrepit father. About 1150 (1737) Abū 'Arish broke away from the Yaman and in 1219 (1804) 'Asir [q. v.] became independent. The history of the imāms from this point is in the article YAMAN. Now the Wahhābī king has confined the imām to the Yaman in a narrow sense of the name, and 'Asir is under the influence of Nadjd. Many of the imāms were industrious writers on things religious.

RASUL (A., plur. *rusul*), messenger, apostle. The word is found in Arabic literature with the profane sense of envoy, messenger. Here we are only concerned with its religious acceptance. According to the Qur'an, there is a close relation between the apostle and his people (*umma*; q. v.). To each *umma* God sends only one apostle (Sūra x. 48; xvi. 38; cf. xxiii. 46; xl. 5). These statements are parallel to those which mention the witness whom God will take from each *umma* at the Day of Judgment (Sūra iv. 45; xxviii. 75 and cf. the descriptions of the rasul who will cross the bridge to the other world at the head of his *umma*: Bukhārī, *Adhān*, bāb 129; *Rikāḥ*, bāb 52).

Muḥammad is sent to a people to whom Allāh has not yet sent an apostle (Sūra xxviii. 46; xxxii. 2; xxxiv. 43). The other individuals to whom the Qur'an accords the dignity of rasul are Nūḥ, Lūṭ, Ismā'il, Mūsā, Shu'aib, Hud, Šāliḥ and 'Isā.

The list of the prophets [cf. NABI] is a longer one; it contains, besides the majority of the apostles, Biblical or quasi-Biblical characters like Ibrāhīm, Ishāk, Ya'qūb, Hārūn, Dāwūd, Sulaimān, Aiyūb, Dhū 'l-Nūn. Muḥammad in the Qur'an is called sometimes rasul, sometimes *nabi*. It seems that the prophets are those sent by God as preachers and *nadhīr* to their people, but are not the head of an *umma* like the rasul. One is tempted to imagine a distinction between rasul and *nabi* such as is found in Christian literature: the apostle is at the same time a prophet, but the prophet is not necessarily at the same time an apostle. But this is not absolutely certain, the doctrine at the basis of the Qur'anic utterances not being always clear.

As to the close relation which exists between the rasul and his *umma*, it may be compared with the doctrine of the *Acta apostolorum apocrypha*, according to which the twelve apostles divided the whole world among them so that each one had the task of preaching the Gospel to a certain people.

As regards the term rasul, account must be taken of the use of the word apostle in Christianity, as well as of the use of the corresponding verb (*shalakh*) in connection with the prophets in the

Old Testament (Exodus, iii. 13 sq.; iv. 13; Isaiah, vi. 8; Jeremiah, i. 7). The term *rasūl Allāh* is used in its Syriac form (*sheliḥeh dalaḥa*) *passim* in the apocryphal Acts of St. Thomas.

Post-Kur'ānic teaching has increased the number of apostles to 313 or 315 without giving the names of all (Ibn Sa'd, ed. Sachau, 1/i. 10; *Fikḥ Akbar III*, art. 22; Reland, *De religione mohammedica*, sec. ed., Utrecht 1717, p. 40).

The doctrine that they were free from mortal sin is part of the faith [see 'ISMA]. For the rest, the difference between *rasūl* and *nabī* — apart from the considerable difference in point of numbers — seems in later literature to disappear in the general teaching about the prophets. Thus, in the *Akida* of Abū Ḥafṣ 'Umar al-Nasafī the two categories are treated together and the author makes no difference between *rasūl* and *nabī*. Similarly al-Idjī deals with prophets in general, so far as can be seen, including in them the *rasūls*. If one difference can be pointed out, it is that the *rasūl*, in contrast to the prophet, is a law-giver and provident with a book (commentary on the *Fikḥ Akbar II* by Abū 'l-Muntahā, Ḥaidarābād 1321, p. 4). According to the catechism published by Reland (p. 40—44), the *rasul-lawgivers* were Ādam, Nūḥ, Ibrāhīm, Mūsā, 'Isā and Muḥammad.

In the catechism of Abū Ḥafṣ 'Umar al-Nasafī, the sending of the apostles (*risāla*) is called an act of wisdom on the part of God. Al-Taftāzānī's commentary calls it *wājib*, not in the sense of an obligation resting upon God but as a consequence arising from his wisdom. This semi-rationalist point of view is not however shared by all the scholastics: according to e.g. al-Sanūsī (cf. his *Umm al-Barāhīn*), it is *djā'iz* in itself but belief in it is obligatory.

(A. J. WENSINCK)

RASŪLIDS, name of a dynasty. The family of Rasūl came to the Yaman [q.v.] with Tūrānshāh, the Aiyūbid [q.v.] conqueror. Rasūl was probably a Turkmen though descent from the royal house of Ghassān [q.v.] was claimed for him; he got his name because a caliph employed him as ambassador. 'Alī b. Rasūl and his three sons became important. The last Aiyūbid Mas'ūd put two of the sons in prison in 624 (1227) but the third Nūr al-Dīn 'Umar, who had already been governor of Mecca, was made *atābek* [q.v.] and, on the departure of Mas'ūd, governor of the Yaman. Mas'ūd died on his way to Egypt so 'Umar prepared to make himself independent. Zabīd [q.v.] was his capital and from 627 on he captured many places in the hills, such as Ṣan'ā' [q.v.], Ta'izz [q.v.], and Kawkabān [q.v.]. After two temporary successes he took Mekka in 638 and held it for fifteen years. In 628 he made peace with the Zaidī *sharīfs* and there was little fighting till the imām Aḥmad b. Ḥusain declared himself in Thula [q.v.] in 646 (1248—1249). 'Umar may have declared himself independent in

628 but he was not recognised by the caliph till 632. In 645 his nephew, Asad al-Dīn Muḥammad, quarrelled with his uncle and fled to Ḍhamār [q.v.]. He allied himself with the imām but was soon reconciled to his uncle and fought against the *sharīfs*, the descendants of the imām 'Abd Allāh b. Ḥamza. 'Umar was murdered in 647 by mamlūks in al-Djanad. His kingdom stretched from Mecca to Ḥaḍramawt though many places in the hills were independent. He was a great builder of schools and mosques and a patron of letters like most of his family. His reign is an epitome of the dynasty; family quarrels, wars with the imām and the *sharīfs*, who were often at variance with the imām.

The murderers won over the rest of the mamlūks, proclaimed a nephew of the dead man, and marched on Zabīd. Palace intrigues had banished al-Muzaffar Yūsuf, the sultān's eldest son, to Maḥdjam. With 150 horse he too marched on Zabīd where his wife inspired resistance to the pretender. He gathered troops as he advanced and the mamlūks surrendered to him the murderers and the pretender. He had to reconquer the country, for his two brothers each hoped to be sultān, Asad al-Dīn Muḥammad was in a strong position at Ṣan'ā', and the imām, Aḥmad b. Ḥusain was active; even the caliph was disturbed at his power. At the end of three years Ṣan'ā', Ta'izz, and the strong fortress of Dumlu'a had been retaken and peace made with the imām, who broke it by joining Asad al-Dīn; though the latter soon returned to his duty. In 658 he joined many of his kin in prison, staying there till his death. Ṣa'da was taken in 652 but could not be held. The imām Aḥmad had been appointed with the approval of the family of his predecessor but dissensions arose so the *sharīfs* with the help of the sultān fought and killed him in 656. One imām was captured in 658, another was taken and blinded in 660, and a third was proclaimed in 670. The *sharīfs* were tribal or territorial chiefs, sometimes the enemies and sometimes the allies of the sultān. In 674 rebel mamlūks in Ṣan'ā' joined the imām and *sharīfs* but the combination was signally defeated. Zafār [q.v.] in Ḥaḍramawt was taken in 678 and an embassy came from China. Yūsuf was a strong and successful ruler, and al-Khazradjī calls him caliph at the end of his reign. He died in 694 (1294—1295).

His son and successor reigned only three years and encouraged the cultivation of palms round Zabīd where others had tried to introduce corn. His brother, the governor of Shīhr [q.v.], took 'Aden [q.v.] and tried to make himself sultān but was defeated and imprisoned. From prison he was called to rule as al-Mu'ayyad Dāwūd in 696. His reign was a succession of small fights both in the hills and the plains, the same places and opponents recurring again and again. In 697 (1247—1248) he took two castles from the Karmatians [q.v.]. In 709 the Kurds in Ḍhamār rebelled, joined the imām and attacked Ṣan'ā' and later some of the Kurds killed some of the Ghuzz. In 712 peace was made with the imām Muḥammad b. Muḥzir for ten years at a price of 3,000 dinārs yearly. Five years later the sultān broke the treaty. Warfare was savage and usually accompanied by the destruction of houses and trees; the heads or the slain were cut off. In 718 the army was reorganised on the Egyptian model. Towards the

end of the reign governors were changed frequently, perhaps a sign of weakness. It was easy for a foreigner to rise to high rank. More than once the same man was chief minister and chief *kādi*. In 721 a son, al-Muǧǧāhid 'Alī, succeeded but he was soon in prison where he stayed four months only till he was set free by his friends and the usurper took his place. In 724 he was a sultān without a kingdom; 'Aden was lost, one cousin al-Zāhir was independent for ten years, other relatives set up for themselves in Bait al-Faḳīh [q.v.], mamlūks attacked Ta'izz and took Zabid; it was not till they had been in rebellion some months that their pay was stopped. Sharifs defeated the mamlūks; troops came from Egypt but did so much damage that all were glad when they soon left. The imām's death in 728 removed a dangerous enemy, and the sultān did establish some sort of order. Sons and other relatives rebelled as did the mamlūks because their pay was in arrears. The sultān crushed the Ma'āziba, a tribe of the plains or foothills, and made a woman chief of what was left. In 736 (1335—1336) the peasants fled from the district of Zabid because of a combination of taxes and a new coinage. An officer touring to collect taxes used his Ghuzz escort to put to death an insubordinate chieftain. The sultān went on pilgrimage in 751 and was carried off to Egypt, being allowed to come back a year later. From this time on the Arabs of the plain gave trouble. Normally the tribes kept each other in check but the sultān had so weakened one side that now the Ma'āziba could raid at will, they even cut communications between Zabid and the north. The government policy was to deprive them of their horses. A tyrannical governor was killed and the murderer was not punished. Mahǧjam was captured by a sharif, a rebel governor defied the sultān for two years, and three sons of the sultān rebelled. Al-Afdal al-'Abbās succeeded in 764. One of his rebel brothers joined the imām, attacked Haraq, and later Shihr. Zabid was taken by the Arabs, other places by sharifs, the imām Ṣalāḥ al-Dīn raided as far as Zabid, there was fighting round Dhamār, and the sultān died in 778. Al-Ashraf Ismā'il was chosen as successor. The mamlūks mutinied, a sharif was lord of Ṣan'ā', and the imām was actively hostile till his death in 793. His son 'Alī was driven out of Ṣan'ā' by a rival and made Dhamār his capital. The imāmate seems to have been hereditary in one family for at least five generations. In 798 the imām 'Alī sent presents to the sultān. It is clear that much of the highlands was lost and there was continual trouble in the plains. Yet the sultān was still powerful; he kept a firm hand over his officers and received letters, presents, and embassies from India and Abyssinia. He died in 803 and is called a good ruler. The next sultān, al-Nāṣir Aḥmad, worthily upheld the state. In the north he made Ḥālī [q.v.] accept him as overlord, in the south he defeated the imām who had attacked his vassals, the Banū Tāhir, and in Wuṣāb he captured forty castles. Rich gifts came to him from Mecca and China. A brother rebelled and was blinded. At his death in 827 the state rapidly went to pieces. A series of short reigns with many rebellions of the mamlūks ushered in the end. The land was ravaged by plague, the imām died of it in 840 leaving his authority to a daughter. In the same year died another imām, Aḥmad b. Yaḥyā, who was a prolific

writer. Civil war was complicated by attacks by the Arabs, who sacked Zabid in 846. A new imām, al-Nāṣir Muḥammad, strengthened his position by marrying a granddaughter of 'Alī of Ṣa'da. The Banū Tāhir joined in the fighting and took Laḥidj and 'Aden, till in 858 (1454) the last Rasūlid abdicated before them and went into exile at Mecca.

Most of the sultāns were builders of mosques and madrasas, some were writers. In the heyday of the dynasty the sultān regularly spent a holiday in the palm groves of Zabid (these were called *subūr*) and at the sea. The land was governed by officials or by vassal chiefs who paid tribute. In all big towns were two officers, one called *wālī* or *amīr* and another called *nāṣir*, *zimām*, or *mushidd*. High officers regularly went on tour to collect the taxes. The army consisted of the cavalry of the gate, mamlūks both Kurds and Ghuzz, and levies. A thousand horse and ten thousand foot made a big army. A man's horses were sometimes slain at his funeral.

RĀTIB (A., plūr. *rawātib*), a word meaning what is fixed and hence applied to certain non-obligatory ṣalāts or certain litanies. The term is not found in the Qur'ān nor as a technical term in Ḥadīth. On the first meaning see the article NĀFILA, p. 826^a. As to the second, it is applied to the *dhikr* which one recites alone, as well as to those which are recited in groups. We owe to M. Snouck Hurgronje a detailed description of the *rawātib* practised in Atchin.

RAṬL, unit of weight dating from pre-Islāmic times, varying with countries and periods. Maḳrīzī (p. 3, 5) says that, except for the *mithḳāl*, which had remained uniform, the pre-Islāmic weights were double the Islāmic ones, and that the raṭl contained 12 ūkiya or 144 dirhems. In mediæval Damascus it equalled 600 dirhems and in Aleppo 720 dirhems. In modern Egypt it is uniform = 1/100th *kanṭār* = 12 ūkiya = 144 dirhems = 0.449 kg. = 0.99 lb. avdp. 2.75 raṭls = 1 okḳa = 1.248 kg. = 2 lb. 11 oz.

(A. S. ATIYA)

RĀWALPINDI, a division, district, *taḥṣīl*, and town in the north-west of the Panǧāb. The division has an area of 21,347 square miles and a population of 3,914,849 of whom 3,362,260 are Muḥammadans. The district, which is divided for administrative purposes into four

*taḥṣīl*s, has an area of 2,050 square miles, with a population of 634,357 (524,965 Muḥammadans). The *taḥṣīl* covers an area of 770 square miles and supports a population of 289,073 (212,256 Muḥammadans). The town and cantonment, situated on the north bank of the river Leh, have a population of 119,284, about half of whom are Muḥammadans (1931 Census Report).

Since Rāwālpindi lies in the path of invaders from the north-west much of its history resembles that of the Panḍjāb [q. v.]. The district formed part of Gandhāra and was included in the Persian Empire of the Achaemenids. About ten miles to the north-west of the town lie the ruins of the ancient city of Takshaḥila (Taxila) which was an important seat of learning in the fourth century B. C. The Muslim invaders experienced much trouble from the turbulent Gakkhar tribes of this area who are still the most important tribe socially in the district. In the days of Akbar [q. v.] the territories included in the modern district of Rāwālpindi formed part of the *sarkar* of Sind Sāgar Dōāb in the *suba* of Lahore (*Āin-i Akbarī*, transl. Jarrett, ii. 324). To-day Rāwālpindi is one of the most important military stations in northern India.

Marshall, *Archaeological Discoveries at Taxila*, 1913; do., *Guide to Taxila*, 1918; *Rāwālpindi District Gazetteer*, 1907; H. A. Rose, *A Glossary of the Tribes and Castes of the Punjab and North-West Frontier Province*, 1919, s. v. Gakkhars.

(C. COLLIN DAVIES)

RAWĀNDĪZ RUIYNDĪZ (the first word is composed of two elements: *rawān* of uncertain etymology and *diz* meaning fortress; the second means "fortress of iron"), capital of the *ḥaḍā'* of this name in the *wilāyat* of Mawṣil on the caravan route, halfway between this town and that of Sāwdj-Bulāk [q. v.], including the following *maḥall*s (the names and figures given in brackets are those of the corresponding Kurd tribe and the number of the hearths: n. nomad; s. settled): Halwān (Zerārī, s., 500); Ḥarīr (Helānī, n., 800; Māmsāl, n., 2,000; Māmsām, s., 500); Welāsh (Bālek, s., 2,000); Dergel (Dergeli, s., 700); Desht-i Diyan (Bālekiyān, s., 800); Piresīniyān (Piresīnī, s., 1,000); Rawendūk (Rawendūk, s. 600); Desht-i Barazgīr (Barādst, s., 1,000); Beresiyan and Mergesūr (Shirwān, s. 1,200). The Sidān and the Serhāti, two subdivisions of the powerful tribe of the Herki, number about 6,000 hearths and have their winter-quarters between Rawāndīz Ruiyndīz and Arbil (Hawlēr in Kurdish) while the Mīndān, the third section of this tribe, spend the winter around 'Akrā. The summer pastures of all three are in Persia at Mergawar. Under the Kurd feudal system the district of Rawāndīz Ruiyndīz contained the following subdivisions: Hevdiyān, Sheteneh, Dūlemerī, Sidekān, Ḳhakūrḱ, Piresīnī, Desht-i Sūrān, Bapīshitiyān, Rawāndīz, Akūlān, Bālekān. After the League of Nations (Dec. 1925) had given Mawṣil to the 'Irāk Rawāndīz Ruiyndīz became definitely a part of the mountainous Kurdish zone running along the Persian frontier which was given the name of Southern Kurdistan at the establishment of the British mandate. The figures given for the population here are only approximate, the tribes having in some cases been decimated by war and

influenza in 1918—1919. According to the census of 1935 the town of Rawāndīz Ruiyndīz had 2,176 inhabitants and the *ḥaḍā'* 38,342.

Topography. The district of Rawāndīz Ruiyndīz, which roughly speaking lies on the other side of the bend made by the Great Zāb when it leaves the mountainous part of its course (running westwards to the Tigris), consists of parallel valleys and chains which rise gradually as they approach the Persian frontier and which have a general orientation from N. W. to S. E. The average height may be put at over 1,500 feet. The two principal watercourses of the region, the Rūbārī Rawāndīz and Rūbārī Rūkūch, left bank tributaries of the Great Zāb, have their sources on the Persian frontier. The roads are naturally more practicable in the direction N. W. to S. E. except the passages in the vicinity of the Great Zāb with its deep gorges. The Great Zāb is 500 feet above the level of the sea. Rawāndīz Ruiyndīz, at the present day an insignificant little town, owes its importance mainly to its position with relation to the roads of Kurdistan.

Road system. It would be in a way wrong to mention, in the matter of high roads which from all time have connected the Irānian plateau with the adjoining countries in the west, only 1. the silk route in the north (Justi, *Geschichte Irans*, p. 476) going from Trebizond via Khoi to Lithinos Pyrgos (the modern Taṣh Medgān), and 2. the southern road, that from the Median gate or the defile of the Gyndes (Diyāla). Besides these two main arteries of traffic, axial to the route always taken by commercial and cultural relations and in time of war, and lying between them is the road which went from Niniveh to Media and forked twice at Arbil and Rawāndīz. At Arbil the road entered Persia by the pass of Gomesbān, Khoi Sandjāk, Rāniya, Serdesht and thence by the pass of Kurtēk at Sāwdj Bulāk [q. v.] via Afān.

The Achaemenid royal road also passed this way (Justi, *op. cit.*, p. 475). It was, we believe, the southern section, running towards the land of Elam, while, according to Th. Reinach (*Un peuple oublié, les Mantiènes*, in *Rev. des Et. Gr.*, vii., 1894), the main highway from Sardes ran through modern Armenia and central Kurdistan, although we cannot say exactly on which side of the Zagros it lay. Among the Arab geographers, Yāqūt alone gives a few notes on the road through Rawāndīz Ruiyndīz (ed. Wüstenfeld, p. 441). The road Arbil-Marāgha was known to the Mongols after their occupation of Arbil (1258). The itinerary by the pass of Garū Shinka (Zinwe-Shaikh) has been described by Perkins (*J. A. O. S.*, ii., 1853, p. 83 sq.) and Thielmann (*Streifzüge im Kaukasus*, Leipzig 1875, p. 321 sq.). The latter (cf. Yāqūt) mentions as stages, starting from the pass: Rāyat; Dergala (ruins of a fortress); Rawāndīz; Kānī-Atmān (Kānī Wetmān?); Derre Brush (ford on the Great Zāb, between Girdemānīsh and Kāzān); Tez-Kherāb; Mawṣil, in all seven stages from Sāwdj Bulāk. According to information received from Russian soldiers who took part in the expedition against Rawāndīz Ruiyndīz (summer of 1916), the pass of Garū Shinka (6,000 feet) is a kind of promontory with valleys on either side starting from the ruins of Khāneh (Persian Lahidjān) and joining on the other side in Turkish territory. There is a *ziyāret* there under the Naḳshbendī Shaikh Djemāl to the influence of which is to be attributed the parti-

cipation of the neighbouring Kurdish tribes in the *djihad*. The name of the pass Zinwe Shaiikh is explained by the presence of this *ziyāret*. The actual site of Rawāndīz Ruiyndīz is described in M. Bittner (*Der Kurdengau Uschnūje und die Stadt Urūmije*, Vienna 1895). In the month of May the corn ripens at Rawāndīz Ruiyndīz, the arable land being on the right side of the Rūbārī Ruiyndīz. Like Arbīl, Ruiyndīz is also a point of bifurcation of roads. We have just mentioned the road over the Garū Shinka pass. Another, farther north, goes via Sidakān, Topzāwa, pass of Kel-i Shīn (10,000 feet with a famous stele), Duru to Ushnū. J. de Morgan (*Mission scient. en Perse*, ii. 46) wrongly thinks this is the only road from Persia to Mawṣil besides that which goes via Serdesht.

Lastly there is a road from Ruiyndīz to Sham-dīnān, of which there are four variants: 1. Shaitāne, pass of Khadjīdja, Kānī Rash, Čumār; 2. Shaitāne, pass of Garau Cariya, Kekla, Begizhne; 3. Shaitāne, pass of Mergesūr, Kekla; 4. the route of the Turkish telegraph line by Rūbārī-Dibur and Čumār. The first of these is the best and was taken in 1916 by the Russian column which came down the Ruā pass to the support of the movement converging via Garū Shinka on Ruiyndīz.

History. From what has already been said it will be evident that Rawāndīz Ruiyndīz, situated at the intersection of the communications of Kurdistan as well as of roads leading farther afield, has always owed its importance to its position. It should also be remembered that in the period of prosperity of the Nestorian church all this country played a great part, mainly on account of the influence of the Metropolitan see of Arbīl. We may mention (cf. Hoffmann, *Auszüge*) the names of Dara, Hanitha, Shaqlāwa (from which came one of the MSS. which enabled M. l'Abbé Chabot to establish the text of the *Synodicon Orientale*, Paris 1902) as well as the fact that there were many monasteries in these parts. According to the late Metropolitan Mar Hanānīsho^o, the *maḥall* of Barādoṣt (not to be confused with the Barādoṣt of the Shīkāk Kurds to the north of Tergawar; cf. URMIYA) before the war had still a few Christian communities. From the point of view of Kurdish history the destinies of Ruiyndīz have been frequently those of Shehrizūr of which it formed part at certain times. The Persian historian S. A. Kesrewī Tabrizī (*Shehriārān e Gommām*, ii., *Rawādīān*, Teherān 1308 = 1929) gives us some notes (p. 125, 133-136) on Ruiyndīz, in the time of the Atābeks under the Aḥmedilī (501—624 A. H.) the last representative of whom, a woman, became the wife of Djalāl al-Dīn Khwārizmshāh. A local history of the *wālīs* of Ardelān, a resumé of which I published (in the *R.M.M.*, xlix. 70 sqq.), also contains some information about the families ruling in Rawāndīz down to 1249 A. H. It may be added that (*Sheref Nāmeḥ*, II/i., p. 505), "the brothers of Aibeh Southan released Southan Mourad son of Iaqoub big from the castle of Rouyindiz where he had been imprisoned by order of Southan Arbeh" (904 = 1498—1499). A Kurdish text in my possession enables me to give a few details about the last lord of Ruiyndīz. The beks of Ruiyndīz are said to be descended from an Arab of the tribe of Shammar (again this fondness for inventing an Arab descent which we frequently find in Kurd genealogies). For some years this ancestor was a

humble shepherd in the *desht* of Ruiyndīz in the villages of Badlīlān and Bapīshṭiān (should we not recognise in the these *ba* prefixes the remains of the Semitic *beth*? [cf. e. g. BĀDJAMĪA]). Becoming rich — some say by having found a treasure —, the ancestor established himself at Badlīlān, acquired houses and fields and became mayor there. His heirs in time became *agha*, then *beg*. Arrogant and rapacious, they had at the same time the reputation of being patrons of learning (*'ilm u-ma'rifat*). At the beginning of the sixteenth century, one of them, Memed Bek the Blind, established at Rawāndīz, was honoured by Sulṭān Mejdīd who gave him the title of *pāshā*, whence his sobriquet of *Pāshā-i Kūra*. He had some claims on Mergawar and Shīnū in which he met with the resistance of 'Azīz Bek of Letān near Nālos. With the help of guns founded for him at Rawāndīz by a certain *hustā* (= *ustā*) Redjeb, he broke this resistance. Since then the tribe of Letān has not had any independent tribal existence. Its remnants were absorbed into the neighbouring tribes of Shamdīnān. The Blind Pāshā next took possession of Arbīl Kerkuk, Sulaimāniye, Shamdīnān, 'Akrā, 'Amādiya. The resistance he encountered in the tribe of Zibārī and notably that of its hero 'Azō of the village of Sawti has become legendary. Taken prisoner, 'Azō is said to have replied to the offer to take him into his service by the Pāshā, who had no son, that he would make him one. The Pāshā built several fortified towers the ruins of which can still be seen (Sidakān; among the Shirwāniyān; 'Akrā, Rawāndīz, Darā). He also repaired the road in the pass of Ruiyndīz "with nails of iron". He built many schools. In his time plunder, robbery and rapine disappeared. "The grapes hung above the roads till autumn and no one dared to touch them". Justice was administered by '*ulamā*'. Finally in 1836 the Pāshā was defeated by the Turks after a siege of four months and died soon afterwards in Constantinople, or others say in Cyprus. Of the descendants of the Pāshā his grandson Sa'īd Bek was *kā'immaḥām* of Ruiyndīz. He was murdered by his servants. Yūsif Beg, son of Muṣṭafā Beg at Badlīlān, *agha* of the tribe of Pīreshniān, was of the same line and in constant rivalry with Sa'īd Beg of Ruiyndīz. The memory of the Pāshā seems to have been kept alive in the tribe of Mūkri where F. de Morgan records a curious game of this name, in which one of the players pretends to be the "Blind Pāshā". A Kurdish work (*Mīrānī Sōrān* by Saiyid Ḥusain Ḥusnī Mūkriānī, Rawāndīz 1935) gives a full account of the story of the Pāshā, his struggle with the Turks, his relations with Persia and with Mehmed 'Alī Pāshā of Egypt, giving as its principal source, a Kurdish MS. (*Melīkhā* by Mirzā Muḥammedī Weḳāye' Nigār). The Pāshā struck coins in his own name: *qaraba fī Rawāndīz al-Amīr al-Manṣūr Muḥammed Big*. — During the Great War the Rawāndīz road was used in the winter of 1914—1915 by Ḥalīl Bey's troops advancing on Urmiya (contrary to H. Grothe, *Die Türken und ihre Gegner*, Frankfurt a. M. 1915) and later in July 1916 by the Russian Rībalchenko, a column which Major K. Mason (*Central Kurdistan*, in *J. R. G. S.*, 1919) wrongly accuses of massacring 5,000 Kurds, women, children and old men at Ruiyndīz. After the armistice and during the period till Dec. 1925, when the League of Nations made its decision, Rawāndīz was occasionally the head-

quarters of an English political officer; sometimes it slipped from the English and was a centre of concentration for hostile Kurdish elements. Thus in Sept. 1922 (cf. B. Nikitine, *L'Iraq économique*, in *Rev. des Sc. Pol.*, July–Sept. 1923) the English were forced to withdraw their feeble forces from the mountains and to occupy the line Arbīl–Kirkūk–Kifri. A Kurdish government was then proclaimed in Sulaimāniye with a “Pādīshāh of Kurdistān”, a role assumed by a certain Shaikh Maḥmūd, of a noble Kurd family. Driven out by the English in 1919 after the rising, which he had led, he was pardoned in 1922 and his followers proclaimed him Pādīshāh. Threatened by English aeroplanes and without resources, Shaikh Maḥmūd retired to Rawāndīz to the Turkish emissaries. Finally in April 1923, Ruiyndīz was taken by the Anglo-Mesopotamian troops composed almost exclusively of Assyro-Chaldean highlanders. Two months later in the name of H. M. King Faiṣal a more tractable Kurdish administration was installed there as throughout southern Kurdistān (cf. above). The first governor thus appointed was a certain Saiyid Ṭa of the family of Sadāte Nehri [cf. SHAMDINĀN]. A brief history of Ruiyndīz since the war is given in *Mirānī Sūrān*. At the present moment the Persian government is considering a system of roads which may give Rawāndīz a certain importance. It is a question of a carriage road connecting Tauris to Mawṣil via Rawāndīz. The Teherān government is anxious to have an outlet without the necessity of going through Transcaucasia.

Human Geography. The route through Rawāndīz as well as the roads leading from it have never played a part comparable to that of the two historic arteries of traffic. This is explained by the lack of security, which is the first condition for the making of a trade route. Now this region has always lain between two hostile states: Assyria and Media, Muṣaṣir and Zamua, Turkey and Persia, Turkey and the ‘Irāk. The configuration of the country, the mode of life of its people contribute rather to break them up than bind them together. The road, the means of communication, has here the character of a weapon or line of defence except for brief periods of peace.

Language. Kurdish is the language spoken in this region, except by the town dwellers (Arbīl, Altūn Kepri, Kirkūk etc.) of Turkish origin. With the establishment of the Kurdish administration and the opening of Kurdish schools following the decisions of the League of Nations, Kurdish will probably develop still more and we may look for the creation of a Kurdish intellectual centre. According to O. Mann (*Die Mundart der Mukri Kurden*, ii. 205), the dialect of Rawāndīz is very like that of Shamdīnān, but E. B. Soane does not share this opinion (*Kurdish Grammar*, London 1913). F. Jardine's manual, *Bahdīnan Kurmanji, a grammar of the Kurmanji of the Kurds of Mosul division and surrounding districts of Kurdistan*, London 1922, is more particularly devoted to this dialect.

Cartography. The Government of India Survey is preparing a revision of the maps of this region. Until their results are published as well as those being prepared for other reasons by the Turkish Petroleum Co., there is accessible the excellent geographical material in the Report presented in 1925 to the League of Nations by the Commission of Enquiry whose task it was to collect material

of an ethnographical and economic nature regarding the wilāyet of Mawṣil (*League of Nations, Question of the Frontier between Turkey and Iraq. Report submitted by the Commission instituted by the Council Resolution of September 30, 1924* [C. 400 M. 147, 1925, vii.]).

Bibliography: In addition to references in the text: Spiegel, *Ērān* (p. 27–28); Rawlinson in *J.R.G.S.*, x. (p. 22 sqq.); M. Streck, *Das Gebiet der heutigen Landschaften . . . Kurdistān*, in *Z.A.*, xv., 1900 (p. 267, 382), on the ancient and Sāsānid periods; Hammer, *Ilchanen* (ii., p. 125 and 337), on the Mongol period. The *Sheref Nāmek*, St. Petersburg 1860 (i., introd.) mentions the castle of Roubīn (read *Ruiyn*).

(B. NIKITINE)

AL-RAWḌA. One of the series of large islands in the bed of the Nile before it divides into the Damietta and Rosetta branches. Situated near Old Cairo and extending to Kaṣr al-‘Aīnī, it is separated from the right bank by a narrow canal known as al-Khalīdj, while the river runs to full width on the other side between the Island and Giza (Djiza).

In early medieval times, it was used for three purposes: 1. as a convenient site for the Nilometer [cf. MIKYĀS] on the S. E. side, rebuilt in the reign of al-Musta‘īn (862–866); 2. as a dockyard for the construction of the fleet (Mas‘ūdī calls it “the island of shipbuilders”) until the reign of the first Ikḥshīdī who transferred the docks to the Miṣr bank of the Nile further north in the direction of the present port of Būlāq, which developed at a still later date; and 3. as a naturally fortified resort in case of danger on the mainland, by destroying the customary bridge of boats which connected it with the fort of Babylon. Muḥawkaṣ did so when he wished to preserve his freedom in negotiating with the Arabs. Realizing this, too, Ibn Ṭūlūn built a fort on the Island (c. 877) and al-Ṣāliḥ Aiyūb built another where his body was concealed after his death by his wife Shadjar al-Durr [q. v.] until the defeat of the French at Manṣūra (1249). As a fortification, al-Rawḍa reached its highwater-mark under the Baḥrī Mamlūks who returned to it after the death of al-Ṣāliḥ Aiyūb and, entrenched behind the water of the Nile, ruled Egypt for nearly a century and a half. They further strengthened the defence of the Island by building walls and towers along its shores. In earlier times it was occasionally used as a pleasure resort where spacious gardens were planted and magnificent palaces erected, such as the Hawdadj built c. 1125 by the Caliph al-Amīr of a Bedouin mistress. During the Baḥrī Mamlūk period, noble buildings increased in number to house the rulers of Egypt and a mosque and a madrasa (whose remains are still to be seen) were established for the use of the inhabitants.

During the Burdjī Mamlūk period, Miṣr and the quarters outlying the Citadel were better favoured, though at the time of the Ottoman conquest Selim I found in the Island a safer residence. When Egypt became an Ottoman province, Miṣr and the Citadel became the seat of the Turkish governor, while the Mamlūk forces took to the Djiza side of the River. As a result, al-Rawḍa was deserted, its fortifications ruined, and it furnished robbers and highwaymen with a refuge.

The Island did not again attract the rulers of Egypt until the time of Muḥammad ‘Alī, whose

son Ibrāhīm Pasha ordered large gardens to be planted there. At present it has become an Egyptian residential quarter connected with Cairo by two bridges and with Djiza by a third. The facilities of modern means of communication have brought it within easy reach of the centre of the capital. The construction of a new large hospital is planned as a substitute for the antiquated Kaṣr al-ʿAini on the northern extremity of the Island.

Bibliography: See *Bibliographies* of articles on CAIRO and MIḶYĀS. An elaborate account of the Island and especially the MiḶyās may be found in 'Alī Pasha Mubārak: *al-Khiṭaṭ al-Tawfiḳiyya*, 20 vols., Cairo 1306, xviii. 2—111; Ibn Duḳmāk, *Description de l'Égypte*, ed. Vollers, Cairo 1893, iv. 109—120. (A. S. ATIYA)

RA'Y (A.), opinion. As a technical term denoting the purely intellectual function it is used in the system of Islām in opposition to such terms as 'ilm, sunna, Kitāb Allāh, dīn and ḥadīth. See the art. FIḶḶH.

RAWSHANĪYA, Afghān sect founded by Bāyazīd b. ʿAbd Allāh, who took the title Piri Rawshan: called by their enemies *Tārikhān*.

1. Life of the Founder. Bāyazīd was born at Djullindur in the Panḍjāb about 931 (1525), his father's native place being Kaniguram, an Afghān town, whither his parents returned. When his mother Banin was divorced by ʿAbd Allāh, Bāyazīd became alienated from his father, who disapproved of his seeking the solution of religious difficulties from a poor relation, the ascetic Ismāʿīl; he started earning his living by transporting goods from Samarkand to Hindustān with Turkish horses. In the town Kalindjār, S. W. of Allāhābād, he became acquainted with one Mullā Sulaimān from whom he imbibed Ismāʿīlī doctrine. Returning to Kaniguram he lived as a hermit in a cave, and evolved eight precepts for his followers; he was in consequence attacked and wounded by his father. Thence he fled to Ningrahar, where he was given protection by a Mohmand chief Sulṭān Aḥmad, and presently won adherents among the Ghoria Khel in the neighbourhood of Peshāwar from the Kḥalil and Maḥmūdīzāi, who had recently overrun the Peshāwar plain. He established himself at Kalidhar in the territory of the ʿUmarzāi, and sent out missionaries who were also raiders. At this time one Saiyid ʿAlī Tirmidhī aided by Ākhūnd Derwezeh (one of the authorities for his biography) started controversy with him; they were unsuccessful, and Bāyazīd, who at some time had taken the title Piri-i Rawshan (Luminous Shaikh, parodied by his enemies as Piri-i Tārik), conceived the idea of annexing the empire of Akbar, on whose treasury he presently issued drafts. He was arrested by Muḥsin Khān Ghāzī, governor of Kābul, whither he was taken. He was there accused of heresy before the ʿulamā, who however, for a consideration, acquitted him. He retired first to Totei, thence to Tirāh, where he proposed to substitute a new religion for Islām. After a time many of his Tirāh followers reverted to Islām, and were expelled by him; they fled to Ningrahar, and were attacked by Bāyazīd, who however was defeated with great slaughter by Muḥsin Khān. He fled to a village in Kalapani, where he died (993 = 1585).

2. Later history of the community. Bāyazīd's activities were resumed by the eldest of his five sons, ʿUmar, who attacked the Yūsufzāi,

a tribe which had followed Bāyazīd, but reverted to Islām; in the battle which ensued ʿUmar was killed, as was also his brother Kḥair al-Dīn; another brother, Nūr al-Dīn, was put to death by the Gudjars. The youngest son, Djalāl al-Dīn, was captured by the Yūsufzāi, who surrendered him to Akbar in 989 A. H. Escaping from Akbar's court he returned to Tirāh, where he assumed the role of sovereign of Afghānistān, and Akbar found it necessary to send an army against him in Ṣafar 994. This army met with a serious defeat, which was repaired by a later expedition (995). The numbers of the Rawshanīs are given on this occasion as 20,000 foot and 5,000 horse. A further expedition was sent in 1000 A. H. (or 1001) which captured some 14,000 men (according to Badaoni) with Djalāl al-Dīn's wives and children, but not apparently himself; since in 1007 he took Ghazni, but was unable to maintain himself there, and on retiring was attacked by the Hazāra, wounded and put to death. This last affair is by some assigned to a son of his bearing the same name.

The next head of the community was Djalāl al-Dīn's son Aḥdād, who figures in the history of Djahāngir. In 1020 A. H. he surprised Kābul in the absence of its governor Kḥān Dawrān. The attack was beaten off with great loss to the raiders, yet in 1023 Aḥdād was again in the field, but sustained a serious defeat at Pish Bulagh. After a series of enterprises with varied success he was besieged in the fortress of Nuaghār, and killed by a musket-shot.

The historian of Shāh Djahān, Muḥammad Ṣāliḥ Kambo, asserts that in the second year of his reign (1038) that monarch took effective steps to suppress the heresy started by Bāyazīd; nevertheless in the following year he records how the Afghān Kamāl al-Dīn was joined in the attack on Peshāwar by ʿAbd al-Kādir, son of Aḥdād, and Karimḍād, son of Djalālāh (Djalāl al-Dīn). The place was relieved by Ṣaʿīd Khān, and ʿAbd al-Kādir induced to submit; in 1043 he was recommended by Ṣaʿīd Khān, "who had caused him to repent of his evil deeds" to Shāh Djahān, who gave him a command of 1,600 horse. Other members of Aḥdād's family received honours and rewards in 1047. In the same year Karimḍād, who had taken refuge in the Mohand country, but had been recalled by the tribes of Bangash, was attacked, captured and executed by Ṣaʿīd Khān. It is asserted that some relics of the community still exist in this region. A branch of the sect, called ʿIsawī, was founded at Swat by one Saiyid ʿIsā of Peshāwar (T. C. Plowden, translation of the *Kālid-i Afghāni*, Lahore 1875).

3. Doctrines of the sect. According to the *Dabistān*, which is friendly to the sect, Bāyazīd's doctrine was extreme pantheism; "If I pray" he said, "I am a *mushrik*; if I pray not, I am a *kāfir*". He marked eight stages (*naḳām*) in religious progress: *sharīʿa*, *ṭarīqa*, *ḥaḳīqa*, *maʿrifa*, *ḳurba*, *wuṣṭa*, *waḥda*, *sukūna*; the four last are said to be technicalities of his system. The explanation of these stages, quoted from Bāyazīd's *Hāl-nāme*, inculcates lofty morality, e. g. to hurt no creature of God. The account which follows is inconsistent with this, as noxious persons were to be killed because they resembled wild creatures, harmless persons who did not possess self-knowledge might be killed, because they resembled domestic animals. They might be regarded as dead, and their property

might be seized by the "living". Further he abrogated the direction of prayer and the preliminary ablution. Other details are furnished by a hostile writer, the historian of *Shāh Djahān* quoted above, copied in *Muntakhab al-Lubāb*. Marriage, he says, is without a contract, there being merely a feast at which a cow is slaughtered. Divorce is ratified by placing some pebbles in the wife's hand. The widow is deprived of inheritance, and indeed is at the disposal of the heirs, who may marry her themselves or sell her to some one else. When a son is born to one of them, an incision is made in the ear of an ass, and the blood dripped on the infant's tongue. This is in order to ensure that the infant shall be bloodthirsty and have the mind of an ass. Any stranger who falls into their hands is enslaved and can be bought or sold. Daughters receive no share in the inheritance. They massacre whole tribes when they conquer them. Even on the Day of Judgment their victims, though martyrs, will not hold them to account. — According to others, however, they recognized neither Paradise nor Hell.

4. Literature of the sect. Bāyazīd is said to have written much; works by him cited in the *Dabistān* are the *Hālnāme* or autobiography, mentioned above, and *Khair al-Bayān*, the sacred book of the sect, in the style of the *Qur'ān*, addressed by the Divine Being to Bāyazīd. This was issued in four languages: Arabic, Persian, Hindi and Pushto. A work in Arabic, *Maḥsūd al-Mu'minin*, by him is also mentioned.

Bibliography: The account of the sect given by J. Leyden, in *Asiatic Researches*, xi. 363–428, London 1810, based on the *Dabistān al-Madhāhib* (p. 247–253 in ed. Bombay 1292) and the Pushto work *Makhsan al-Islām* of Akhund Derwezeh, furnished the material for the account of the sect in Graf T. A. von Noer's *Kaiser Akbar*, Leyden 1885, ii. 179 sqq., and largely for that in *Glossary of the Punjab Tribes and Castes*, Lahore 1915, iii. 335 sqq. Notices of the sect were also got from Indian historical works; from the *Akbar-nāme* (printed, Calcutta 1881) by M. Elphinstone, *History of India*, London 1866, p. 517 etc.; from the *Ṭabaḳāt-i Akbarī* (lith., Lahore 1292) by H. Elliot, *History of India*, London 1873, v. 450; from the *Tuzūk-i Djahāngīrī*, transl. A. Rogers and H. Beveridge, London 1909 by Beni Prasad, *History of Jahangir*, Oxford 1922, who also uses the *Ikbāl-nāme-i Djahāngīrī*, Calcutta 1865. For *Shāh Djahān*'s time the *Shāh Djahān-nāme* called '*Amal-i Šāliḥ* of Muḥammad Šāliḥ Kambo, ed. Ghulam Yazdani, Calcutta 1923 and 1927, is the chief authority. The printed text of the *Bādīshāh-nāme* (Calcutta 1867, 1868) which, according to *Muntakhab al-Lubāb* (Calcutta 1869), should contain an exaggerated account of the atrocities of the sect, has very little about it.

(D. S. MARGOLIOUTH)

AL-RĀZĪ, ABŪ BAKR MUḤAMMAD B. ZAKARIYĀ, a celebrated physician, alchemist and philosopher. Almost nothing is known of his life. He was born in 250 (864) at Raiy. There he seems to have studied deeply in mathematics, philosophy, astronomy and belles-lettres. He perhaps also studied alchemy in his youth. It was only after attaining a rather advanced age that he devoted himself to medicine. Entering the service of the ruler of Raiy, he soon became head of

the new hospital in this town and later we find him in the same capacity in Baghdād. We do not know exactly how long he remained there. The reputation of being the greatest physician of his time brought him from one court to another. The fickleness of the favour of princes as well as the uncertainty of the political situation are the causes of his unsettled life. He returned several times to his native town where he died in 313 (925) (according to al-Bīrūnī on 5th *Shābān* 313) or in 323.

We are no better informed regarding Rāzī's teachers. Several Arabic biographers regard him as a pupil of the physician 'Alī b. Rabbān al-Ṭabarī, which is chronologically impossible. As his teacher in philosophy the *Fihrist* mentions a certain Balkhī (not the geographer Abū Zaid al-Balkhī) from whom Rāzī is said to have taken some ideas. Nāṣir-i Khusraw says the same thing about a rationalist philosopher with the curious name of Ērānshāhri (cf. *Zād al-Musāfirin*, p. 73, 98; cf. also al-Bīrūnī, *Hind*, p. 4, 326; *Āthār*, p. 222, 225); it is very probable that the two sources refer to the same individual. Although the influence of Rāzī was considerable, we know nothing of his pupils. The philosopher Yahyā b. 'Adī, an Aristotelian, Jacobite and disciple of Fārābī, is said to have begun to study philosophy with Rāzī (cf. Mas'ūdī, *Kitāb al-Tanbīh wa 'l-Ishrāf*), and a later source (Hudjwiri, *Kashf al-Mahjūb*, transl. Nicholson, p. 150) speaks of connections between him and the mystic al-Hallāj. It was in Shī'a circles that the philosophical doctrines of Rāzī left the deepest mark Abū Ishāk Ibrāhīm b. Nawbakht, a theologian of the "Twelver" Shī'a, borrows from him, in his *Kitāb al-Yāqūt*, his theory of pleasure, and the Ismā'īlians Abū Ḥatīm al-Rāzī (d. 322 = 926), Kirmānī (d. after 412 = 1021) and Nāṣir-i Khusraw [q. v.] attempted to refute certain parts of his philosophical system. Among the other authors who combated his views may be mentioned Fārābī, Ibn Haitham, 'Alī b. Riḍwān and Maimonides.

Rāzī is above all a physician and he is rightly regarded as the greatest physician of Islām. In addition to numerous monographs on various maladies of which the most famous is his treatise on smallpox and measles (*Kitāb al-Djadarī wa 'l-Ḥaṣba*), he wrote several large manuals of medicine which were the most remarkable that the middle ages knew. A number of his works were translated into Latin and down to the xviiith century the authority of al-Rāzī was undisputed. His *Manṣūrī* (*Liber Almansoris*) is dedicated to Manṣūr b. Ishāk, governor of Raiy, and his *Mulūkī* (*Regius*) to 'Alī b. Wēh-Sūdhan of Ṭabaristān. The *Hāwī* (probably the same as the *Djāmi'*), is the largest medical encyclopaedia in Arabic. Rāzī is said to have devoted 15 years of his life to writing it and seems to have died before finishing it. The book is a compilation of extracts from all the Greek and Arab physicians on every problem of medicine and Rāzī concludes by giving the results of his own experience. While accepting earlier tradition, Rāzī is the least dogmatic of the Arab physicians and in the field of medical practice surpasses the knowledge of the ancients. We still possess his clinical notebook in which he describes very carefully the progress of his patients.

The same empirical spirit is found in the other branches of science which he studied. In chemistry, about which we are better informed, Rāzī, rejecting

all occultist and symbolical explanations of natural phenomena, confined himself exclusively to the classification of substances and processes as well as to the exact descriptions of his experiments. In spite of the statement of the *Fihrist*, Rāzī does not seem to have been acquainted with the alchemical writings attributed to Djābir b. Haiyān. Pseudo-Madjriti in his *Kitāb Rutbat al-Hakīm*, endeavoured to reconcile the alchemy of Rāzī with that of Djābir. Of his writings on mechanics we only possess a synopsis of his treatise on the balance (*mizān ṭabīʿī*). All his works on physics, mathematics, astronomy and optics, of which a large number are enumerated by the bibliographers, have perished.

It is the same with his metaphysical works of which we only have a few fragments preserved in later authors. Besides the *Shiʿa* theologians mentioned above, we must make particular mention of al-Birūnī, who in his various works frequently refers to Rāzī. He also devoted a complete *risāla* to a study of the life and works of Rāzī.

The following are the characteristic features of his metaphysics: Rāzī asserts the existence of five eternal (*qadīm*) principles which are the Creator, Soul, Matter, Time and Space. The eternity of the world is, according to Rāzī, the necessary corollary of the concept of God, the unique and immutable principle (the line of argument of the Aristotelian philosophers). Now Rāzī denies this eternity. Only the plurality of the eternal principles, their opposition and combination, can explain temporal creation. The origin and destinies of the world are imagined by Rāzī under the form of a myth with gnostic affinities. The Soul, the second eternal principle, possessing life but not knowing, is seized with the desire to unite with matter, and to produce within itself forms susceptible of procuring corporeal enjoyments. But matter is elusive. The Creator then in his pity creates this world, with its durable forms in order to permit the soul to enjoy it and to produce man. But the Creator also sends the intelligence (*ʿaql*) partaking of the substance of his divinity to awaken the sleeping soul in its abode (*haikal*) which is man and to teach that this created world is not its true home, the place of its happiness and of its peace. To escape the bonds of matter there is only a single means for every man, which is the study of philosophy. When all human souls have attained liberation the world will dissolve and matter deprived of forms will return to its primitive state.

In his physics, Rāzī, an opponent of the Aristotelians and *mutakallimūn*, relies on the authority of Plato and the pre-Socratic philosophers. His atomism, fundamentally different from the parallel theories of the *kalām*, is related in many ways — an exceptional case in mediæval philosophy — to the system of Democritus. In Rāzī's view matter in its primitive state before the creation of the world (*hayūlā muṭlaqa*) was composed of scattered atoms (*djusʿ lā yataḍjazzuʿ*). Atoms possessed extent. Mixed in various proportions with particles of the Void — of which Rāzī against the Aristotelians affirms the positive existence, — these atoms produced the elements. The latter are five in number: earth, air, water, fire and the celestial element. All the properties of the elements (lightness and heaviness, opaqueness and transparency etc.) are determined by the proportions of Matter and Void entering into their composition. Earth and water,

dense elements, tend towards the centre of the earth, while air and fire in which particles of the void predominate, tend to rise. As to the celestial element, a balanced mixture of Matter and Void, circular movement is peculiar to it. Fire springs from the striking of iron on stone because iron as it moves cleaves the air and rarifies it so that it is transformed into fire.

Rāzī distinguished universal space (*makān kullī*) or absolute space (*makān muṭlaq*) from partial (*djusʿī*) and relative (*muḍāf*) space. Absolute space, denied by the Aristotelians, is pure extent, independent of the body which it contains. It extends beyond the limits of the world, is infinite. There is reason to believe that Rāzī affirms the plurality of worlds. The term relative or partial space is applied to the size or extent of any particular body.

In his theory of time, which he says is Platonic, Rāzī differentiates in analogous fashion absolute (*muṭlaq*) time and limited (*maḥṣūr*) time. It is only to limited time that the Aristotelian definition of time, considered as a number of movement (in the first place the movement of the celestial spheres), is applicable, according to the Prior and Posterior Analytic. Absolute time is an independent substance which flows. It existed before the creation of the world and will exist after its dissolution. Abandoning a distinction made in the *Timaeus* and handed down by the Neo-Platonists to the Arabic philosophers, Rāzī identifies it with eternity (*dahṛ*, *αἰών*). To attack the Aristotelian conceptions of space and time, Rāzī makes use of the view of the man in the street with a healthy mind not broken in to philosophical subtleties.

In his ethics, Rāzī, in spite of his pessimistic metaphysics, is against excessive asceticism. Socrates, whom he regards as his model, far from being the ascetic of cynical tradition, took an active part in public life. According to the maxim of Aristotle, blame cannot be attached to the human passions but only to their excessive indulgence. At the basis of his moral teaching is a special theory of pleasure and pain. Pleasure (*ḥdonā*) is not something positive but the simple result of a return to normal conditions, the disturbance of which has caused pain (*πᾶθος*). The *sira falsafiya* (*βίος φιλοσοφικός*) aspires, according to the saying of Plato (*Thaetetes*, p. 176^b), to resemble the Creator to be, like him, just towards man, indulgent to his faults.

In view of the individualistic ethics of Rāzī, we can understand his critical attitude to established religion. In many writings he refuted the Muʿtazili theologians (Djāhīz, Nāshī, Abu l-Kāsim al-Balkhī, Mismaʿī [= Ibn Akhī Zurhān]) who attempted to introduce scientific arguments into theology. Nor was he sparing in his criticism of the extreme *Shiʿa* (refutation of Aḥmad al-Kaiyāl) and of the Manichaeans. Among his adversaries in philosophy we find, besides the Dahri Abū Bakr Ḥusain al-Tammār al-mutaṭabbib, the Sabaeen Thābit b. Qurra, the polyhistorian Masʿūdī and Aḥmad b. al-Ṭaiyib al-Sarakhsī, a pupil of al-Kindī.

Unlike the Muslim Aristotelians Rāzī denies the possibility of a reconciliation between philosophy and religion. Two heretical writings figure in his bibliography: the *Makḥarīk al-Anbiyāʾ* or *Ḥiyāl al-Muṭanabbīyīn* was read in heretical circles in Islām and notably among the Karṁatians (cf. Baghdādī, *Fark*, p. 281). It seems even to have influenced the famous theme of the *De Tribus*

Impostoribus, so dear to western rationalists from the time of Frederick II (cf. L. Massignon, in *R. H. R.*, 1920). The second, *Fī Nakḍ al-Adyān* is partly preserved in a refutation, the *Kitāb Al'ām al-Nubuwwa* of the Ismā'īlī Abū Ḥātim al-Rāzī. The principal theses of this book are as follows: all men being by nature equal, the prophets cannot claim any intellectual or spiritual superiority. The miracles of the prophets are impostures or belong to the domain of pious legend. The teachings of religions are contrary to the one truth: the proof of this is that they contradict one another. It is tradition and lazy custom that have led men to trust their religious leaders. Religions are the sole cause of the wars which ravage humanity; they are hostile to philosophical speculation and to scientific research. The alleged holy scriptures are books without value. The writings of the ancients like Plato, Aristotle, Euclid and Hippocrates have rendered much greater service to humanity. — Rāzī's book undoubtedly contains the most violent polemic against religion that appeared in the course of the middle ages. It takes up to some extent the arguments of the contemporary Manichaeans against positive religions but above all it seems to be inspired by the criticism of religion in antiquity.

Rāzī believed in a progress of scientific and philosophical knowledge. He claims to have advanced beyond most of the ancient philosophers. He even thinks himself superior to Aristotle and Plato. As regards medicine, he had attained the level of Hippocrates and in philosophy he feels himself close to Socrates. But after him there should come other learned men who would reject some of his conclusions just as he had sought to supplant the teachings of his predecessors.

Bibliography: Lists of Rāzī's works with more or less anecdotal biographies will be found in the following works: *Fihrist*, p. 299—302, 358; Ibn al-Kifṭī, *Ta'rikh al-Hukamā'*, ed. Lippert, p. 271—277; Ibn Abī Usaib'a, *Uyūn al-Anbā'*, ed. Müller, i. 309—321 (cf. G. S. A. Ranking, *The Life and Works of Rhazes [International Congress of Medicine, historical section, London 1913, p. 237—268]*); Bīrūnī, *Risāla fī Fihrist Kutub Muḥ. b. Zak. al-Rāzī*, ed. P. Kraus, Paris 1931; part. transl. by J. Ruska, *al-Bīrūnī als Quelle für das Leben und die Schriften al-Rāzī's*, in *Isis*, v., 1922, p. 26—50. — Other sources: Ibn Khallikān, p. 678; Abū Ṣā'id al-Andalusī, *Ṭabaqāt al-Umam*, Bairūt 1912, p. 33 and 61; Abū 'Alī al-Tanūkhī, *al-Faraḍj bā'id al-Shidda*, Cairo 1903—1904, ii. 94—104; *Ḥikāh Maḳāla* (ed. (P. KRAUS and S. PINES)

AL-RĀZĪ, the name of three historians of Muslim Spain. i. MUḤAMMAD B. MŪSĀ B. BASHĪR B. DĪANNĀD B. LAKĪT AL-KINĀNĪ AL-RĀZĪ, who took his *nisba* from the town of al-Rāy in Persia where he was born, came from the east to Cordova about the middle of the third century A. H. (864 A. D.) to trade there. His high degree of Arabic culture gave him a welcome in intellectual circles in the Umayyad capital and the emir Muḥammad b. 'Abd al-Rahmān entrusted him on several occasions with diplomatic missions in the east or in Spain itself. His successor, his son al-Mundhir, showed him the same confidence; it was on his return from an embassy to Elvira [q. v.] for this prince that al-Rāzī died in Rabī' II 273 (Sept. 5—Oct. 3, 886).

We would have known nothing of Muḥammad al-Rāzī as an historian but for a statement by Muḥammad Ibn Muzain reproduced by the Moroccan writer Muḥammad al-Wazīr al-Ghassānī in his account of an embassy to Spain in 1691, entitled *Riḥlat al-Wazīr fī 'ftikāk al-Asir* (cf. E. Lévi-Provençal, *Les Historiens des Chorfa*, Paris 1922, p. 284—286). Ibn Muzain there says that in 471 (1078—1079) he found in a library in Seville a little book by Muḥammad b. Mūsā al-Rāzī entitled *Kitāb al-Rāyāt*, relating to the conquest of Spain by the Muslims and giving details of the Arab contingents, each distinguished by its standard (*rāya*) who entered the Peninsula with Mūsā b. Nuṣair [q. v.]. The passage of Ibn Muzain has been reproduced in the Madrid edition of the *Faḥ al-Andalus* of Ibn Kūṭīya (cf. the *Bibl.*). However little we know of this work of Muḥammad al-Rāzī, we cannot but regret its loss bitterly.

González Palencia, *Historia de la literatura arábigo-española*, Barcelona-Buenos-Aires 1928, p. 130.

ii. AḤMAD B. MUḤAMMAD, son of the preceding, surnamed al-Taʿrīkhī ("the chronicler"), the first in date of the great historians of al-Andalus. He was born in Spain on the 10th Dhu 'l-Hijja 274 (April 26, 888) and died on the 12th Radjab 344 (Nov. 1, 955). He was the pupil of Cordovan scholars of repute like Aḥmad b. Khālīd and Kāsim b. Aṣḡagh. He wrote several monographs on the history of Spain: a *Taʿrīkh Mulūk al-Andalus*; a description of Cordova (*Kitāb fī Sifat Qurṭuba*) written on the plan of the description of Baghdad by Abu 'l-Faḍl Ibn Abī Ṭāhir; a book on the Spanish *mawālī*; lastly a voluminous work on the genealogies of the Arabs of Spain, *Kitāb al-Istʿāb*, which was to form one of the essential sources of the *Djamharat al-Ansāb* of Ibn Ḥazm [q.v.]. These various works have unfortunately not come down to us and until quite recently we had only a few quotations from Aḥmad al-Rāzī preserved by later writers. The recent discovery of a fragmentary manuscript of a chronicle relating to the 10th century in Spain now puts at our disposal quite extensive extracts from this author and from his son ʿIsā (see iii.): these passages are collected in *Documents inédits d'histoire hispano-umayyade*, to appear shortly.

The majority of Aḥmad al-Rāzī's biographers do not attribute to him any geographical work, but some, e.g. al-Ḍabbī and Yāqūt, notice a Spanish geographer whom they call Aḥmad b. Muḥammad al-Taʿrīkhī who is clearly Aḥmad al-Rāzī; this individual, according to these authors (al-Maḡḡarī attributes it directly to Aḥmad al-Rāzī), wrote a lengthy work on the routes (*masālik*) of al-Andalus, its anchorages (*marāṣī*), its principal towns (*um-mahāt al-mudun*) and the six Arab *ajūdun* [q.v.] which were settled there after the conquest. This description of Spain has been preserved in a Castilian translation published in 1850 by P. de Gayangos as an appendix to his *Memoria sobre la autenticidad de la Crónica denominada del Moro Rasis* (supplemented by R. Menéndez Pidal, *Catálogo de la Real Biblioteca. Manuscritos, Crónicas generales de España*, Madrid 1898). The description forms the first part of this *Crónica* and in its present Castilian form comes from a translation into Portuguese, now lost, prepared by order of King Denis of Portugal towards the beginning of the 14th century by a cleric named Gil Pérez; the latter was no doubt the author of the second part and in the third he confined himself to summing up very briefly the historical work in the strict sense of Aḥmad al-Rāzī.

The description of Spain by al-Rāzī, in spite of the many difficulties offered by the fact that it has passed through two translations, both often very inaccurate and corrupt in the place-names, is nevertheless a very important document from the geographical, as well as the political and social point of view for the Muḥammadan part

of Spain in the reign of ʿAbd al-Raḥmān III. After a number of general reflections on al-Andalus, its situation with regard to the rest of the inhabited world, and its climate, we have an individual description of each of the principal districts, of which special use was made by Yāqūt [q.v.] for the Spanish references in his *Muʿdjam al-Buldān*. A comparison of the Spanish text of al-Rāzī's description with that of Yāqūt enables us to discover a close relationship between the two works. They both give the same number of administrative circles (*kūra*) in Umayyad Spain of the 10th century, 41 in all: Cordova, Cabra, Elvira, Jaen, Todmir, Valencia, Tortosa, Tarragona, Lérida, Barbitania, Huesca, Tudela, Saragossa, Calatayud, Bārūsha, Médinaceli, Shantabariya, Racupel, Zorita, Guadalajara, Toledo, Oretó, Faḡs al-Ballūt (Llano de las bellotas), Firriish, Mérida, Badajoz, Béja, Ocsonoba, Santarem, Coimbra, Exitania, Lisbon, Niébila, Sevilla, Carmona, Moron, Sidona (Shadhūna), Algéciras, Reiyo, Ecija and Tākoronnā.

Bibliography: Ibn al-Faraḍī, *Taʿrīkh ʿUlamāʾ al-Andalus* (B.A.H., vii.—viii.), Madrid 1892, No. 135; al-Ḍabbī, *Buḡyat al-Multamis* (B.A.H., iii.), Madrid 1885, No. 329 and 330; al-Maḡḡarī, *Nafḥ al-Ṭib (Analectes)*, ii. 111, 118; Yāqūt, *Irshād al-Arīb*, ed. D. S. Margoliouth (G.M.S., vi. 2), Leyden 1909, p. 76—77; R. Dozy, cf. above; Pons Boigues, *Ensayo*, No. 23; A. González Palencia, *Hist. de la lit. ar. esp.*, p. 130—131; J. Alemany Bolufer, *La Geografía de la Península Ibérica en los escritores árabes*, Granada 1921, p. 28 sqq.

iii. ʿISĀ B. AḤMAD B. MUḤAMMAD, son of ii., grandson of i., continued his father's Umayyad chronicle down to his own time and extended the portions dealing with earlier periods by using sources which had not been available to Aḥmad al-Rāzī. He has not been the subject of notice by any of the Spanish biographers already published but he is frequently quoted by later historians, notably by Ibn Ḥaiyān [q.v.], Ibn Saʿīd [q.v.] and Ibn al-Abbār [q.v.]. According to the latter, he also wrote a monograph on the *ḥadjijs* [q.v.] of the Umayyad court of Cordova: *Kitāb al-Hudjjiḍ li 'l-Khulafāʾ bi 'l-Andalus*.

Bibliography: Ibn Ḥaiyān, *al-Muḡtabis*, Oxford ms., *passim*; Ibn al-Abbār, *al-Ḥullat al-siyarāʾ*, in Dozy, *Notices sur quelques manuscrits arabes*, Leyden 1847—1851, p. 74; al-Maḡḡarī, *Nafḥ al-Ṭib (Analectes)*, ii. 671; Pons Boigues, *Ensayo*, No. 41; A. González Palencia, *Hist. de la lit. ar. esp.*, p. 131.

(E. LÉVI-PROVENÇAL)

AMĪN AḤMAD RĀZĪ, a Persian biographer. Hardly anything is known of his life. He belonged to Raiy where his father Khwādja Mirzā Aḥmad was celebrated for his wealth and benevolence. He was in high favour with Shāh Ṭahmāsp and was appointed by him *kalāntar* of his native town. His paternal uncle Khwādja Muḥammad Sharif was vizier of Khurāsān, Yazd and Isfahān, his cousin Ghīyāth-Beg a high official at the court of the Emperor Akbar. Amīn himself is said to have visited India. The work to which he owes his fame is the great collection of biographies *Haft Iklim* (finished in 1002 = 1594). For many years he collected information about famous men until finally he yielded to the entreaties of one of his friends and arranged his material in book form. The final editing of it took six years. The

biographies are arranged geographically according to the 7 climes. In each clime the biographical part is preceded by a short geographical and historical introduction which is followed by notes on poets, 'ulamā's, famous *shāikh*s etc. in chronological order. The work is of special importance for the history of Persian literature, as the biographies of poets contain numerous specimens of their works, some of which are very rare. It contains the following sections: Clime I: Yaman, Bilād al-Zandj, Nubia, China. Clime II: Mecca, Medina, Yamāma, Hurmuz, Dekkān, Ahmādnagar, Dawlatābād, Golkonda, Ahmādābād, Sūrat, Bengal, Orissa and Kūsh. Clime III: Irāk, Baghdād, Kūfa, Nadjaf, Baṣra, Yazd, Fārs, Sīstān, Kāndahār, Ghaznīn, Lahūr, Dihlī, India from the oldest times down to Akbar, Syria, Egypt. Clime IV: Khurāsān, Balkh, Herāt, Djam, Mashhad, Nīshāpūr, Sabzawār, Isfara'īn, Isfahān, Kāshān, Kūm, Suza, Hamadḥān, Raiy and Tīhrān, Damāwand, Astarābād, Ṭabaristān, Māzandarān, Gilān, Qazwīn, Aḥdarbāidjān, Tabriz, Ardabil, Marāgha. Clime V: Shirwān, Gandja, Khwārizm, Mā warā' al-Nahr, Samarqānd, Bukhārā, Farghāna. Clime VI: Turkistān, Fārāb, Yārkand, Rūs, Constantinopel, Rūm. Clime VII: Bulghār, Şaklab, Yādījūdj, Mādījūdj. — Unfortunately this valuable work has not yet been published. Mawlawī 'Abd al-Muḥtadīr began his edition in the *Bibliotheca Indica*, but so far only one part has appeared (Calcutta 1918).

Bibliography: Rieu, *Catalogue* 335b; E. G. Browne, *A Hist. of Persian Literature in Modern Times*, Cambridge 1924, p. 448; H. Ethé, *Neupersische Literatur*, in *Gr. I. Ph.*, ii. 213. (E. BERTHELS)

REDİF (Ar. *radīf*), "what follows immediately after a person or thing (Fagnan, *Additions*); one mounted on a croup, pillion-rider"; cf. for use in the figurative sense in a composite epithet in Turkish (Persian): *ordu-i zafer-redif*: "the victorious army (one which has victory on its croup)" (*Tārīkh-i Djewdet*, 1270 A. H., i. 22). The synonyms *terdif* and, more rarely, *irdāf*, "the act of causing to follow or join, to make to accompany", are also sometimes used in Turkish as well as the words *terdif* and *irdāf*. As a technical term *radīf*, pronounced *redif*, has been used: 1. in Persian and Turkish prosody; 2. in the Ottoman army.

1. Persian and Turkish prosody. — Redif is a kind of "hypermetre" (taking this word in a wider sense than in classical or even English prosody), i. e. the part of the line which follows the rhyme (*kāfiye*: in Neo-Turkish: *ayak*) or more exactly the last syllable of the latter (*rawī*), or which comes between two words forming a rhyme. The *redif* may consist of one or more suffixes, particles or independent words. The old theorists however disputed the quality of redif to repeated suffixes and gave different names to each of the (Arabic) letters representing them: *waṣl* (first letter); *khurūdj* (second); *masid* (third); *nā'ire* (fourth). In Persian and Turkish prosody the same redif is repeated at the end of all the lines of a piece of poetry.

Although it made its appearance in Turkish as early as the xiiith century, the redif is an especially Persian invention. Indeed in the national Turkish poetry (syllabic metre) suffixes or particles repeated at the end of the lines count as rhyme (Kowalski, *Ze studjów nad formą poezji ludowej tureckich*, Cracow, 1922, p. 33). The redif existed in classical Arabic only in an embryonic form and

under another name (Garcin de Tassy, *Rhétorique*, p. 143). The redif fell into disuse in Turkey in the xixth century, probably under the influence of French poetry.

In addition to this special use in prosody the name redif is sometimes given to the second term of an *itbā'*, i. e. of a hendiadys (*mūzāwedje*) of which the two terms rhyme or are alliterative; as for example Pers. *fulān bāhmān, daḡḡ u-lakḡ, khaṣh u-khāsh*, Turk. *parça parça, ufak tefek* (*Burhān-i kāfī*, Turk. transl. p. 128, 323, 328, 371). *Mutarādif* (*müterādif*) means "synonym".

2. Turkish military usage. — Maḥmūd II gave the name of redif (*'asākīr redife-i menşūre*) to the reserve army created in 1834 (Jouanin and van Gaver, *Turquie*, p. 425). The historian Luṭfi (iv. 144) speaking of the project for this army, under the year 1249 (May 21 1833—May 9 1834) explains the meaning of the term by saying that it was a force that "came after" the regular army (*muwazzafe-ye redif olarak*). They were therefore not soldiers who had, at need, to mount behind the cavalry on the croup, like the Roman velites. Redif was contrasted with *niḡām* or *'asākīr-i niḡāmīye* or *'asākīr-i muwazzafe*, taken in the strict sense of active or regular army (standing army) and with *ihtiyā'* "reserve of the regular army". For the lack of an exact equivalent we may say militia in English and "armée de reserve" or "garde nationale" in French. The German term "Landwehr" is perhaps nearest it but in the Prussian rather than the Austrian sense. Sometimes the redif are included in the *niḡāmīye*, taking the latter term in a wider sense of regular or disciplined troops (synonym *müretteb*). Luṭfi (*loc. cit.*) calls the redif *bir newi'* *'asākīr-i niḡāmīye* "a kind of regular troops".

The characteristic feature of the redif army was the existence of permanent cadres, whence its mixed character. It was linked with the regular army by its officers and with the reserve by its men (*efrād-i redife*). It was the object of its creators that this army should provide a large number of men if necessary without imposing too long a period of service on the rural population (Luṭfi, *op. cit.*).

It was decided from the first that the redif should consist of battalions (*tabur*) and indeed this organisation by battalion depots (*tabur dā'ireleri*) remained in force as long as the redif existed. The commanders of these battalions (*bīnbāshī*) were at first chosen from the chief local families (*maḥalleri khānedānīndan*). The first battalions formed in 1250 (May 10 1834 to April 28 1835) were those of the *sandjaks* [q. v.] of Ḳaraḥiṣār Şāhib, Anḳara, Kiangırlı (Çankırlı), Siroz and Monteshe. Ismā'il Bey, hereditary Kurd governor of Palu, was appointed colonel of the three battalions in the *kaḡās* known as those of the "Imperial Mines" (*me'ādin-i hūmayūn*) in the *eyālet* of Siwās (Luṭfi, iv. 171). There were three to four battalions to the *sandjak*, or 10 to 12 to the *eyālet*. The officers received a quarter of the usual pay, but were only expected to serve and wear uniform two days a week (Muṣṭafā Nūrī Pāshā, *Netā'idj ül-Wuḡū'at*, iv. 109).

In 1252 (April 18, 1836 to April 6, 1837), the redif was organised in wide groups with a high command: *müşşerlik* (*mürşşürlük*) or "marshalship" [cf. *MÜŞİR*] of redif, conferred upon the *wālīs*. The first were those of the *eyālets* of Ḳaraman (Konya), Khudāwendigār (Brussa: guard or *khāṣṣe*), Anḳara, Aydn, Erzurum, Edirne. At

the same time plans were made to raise the money required for this purpose. The wali-marshals were given the *harwānī* (*kharāmānī*) or cloaks of their new rank. Just as the troops of the line (*menşüre*) were distinguished from those of the guard (*khāsse*) so there were *redif-i menşüre* and *redif-i khāsse*. The appointment of commanders of divisions was to follow (for details see the *Ṭakrīr-i ālī* or report of the grand vizier Mehmed Emin Ra'ūf Pāshā in Lutfi, v. 165—170). If we may believe the *khāṭṭ-i hümāyūn* promulgated on this occasion by Maḥmūd II, these first steps gave every satisfaction (*ibid.*, p. 74).

When the Military School (*mekteb-i ḥarbiye*) instituted in 1251 began to supply officers, the redif under arms was converted into active forces and the officers were sent back to their *odjāks* (*Netā'idj ül-Wukū'āt*, iv. 109—110). The service as redif (*khidmet-i redife*) was now definitely to assume the character of a kind of period of service in the reserve or intermittent service the duration of which (*müddet-i redife*) was to be fixed under conditions which we shall explain below.

In the *khāṭṭ-i hümāyūn* of Gülkhāne (Nov. 31, 1839) there is an allusion to an approaching improvement in the system of regional recruiting. In 1838, five years had been fixed as the period of service in the regular army, previously practically unlimited (one saw young married soldiers leaving their families for life), but this measure did not immediately make its effect felt (cf. von Moltke, *Lettres sur l'Orient*, n. d., p. 211, letter N^o. xlvii.).

On Sept. 6, 1843 the military law of the *ser'asker* Rızā Pāshā (Engelhardt, i. 71) was promulgated, a law of fundamental importance, half French and half German in character, the principles of which have survived even in the most recent legislation; it confirmed the period of regular service at five years (later reduced to four), to be followed by a period of seven years during which a redif could be recalled to the colours for a month each year (later every two years). Each *ordu* (army corps) was to have its redif contingent (*şımf-ı redif*) placed in time of peace under the orders of a brigadier-general (*liwā*, brigade) who lived at the headquarters of the *ordu*. In 1853 (Ubicini, i. 456) the redif were organised into 4 (out of 6) *ordu*, namely those of *khāsse* (Scutari [Asia] and Smyrna), Derise'adet (Istanbul and Anḳara), Rumeli (Manastır) and Anatolia (Harput). The *ordu* of 'Arabistān and the 'Irāḳ were still to be organised. Ubicini adds this observation: "By means of this organisation the government has secured.... a force at its disposal equal to the regular army and capable of being moved in a few weeks either to the line of the Balkans or to any other point in the empire". According to Bianchi (*Guide de la conversation*, 1852, p. 230), the organised reserve (*müretteb redif*) was then 150,000 men compared with 300,000 of the regular army.

Husein 'Awni Pāshā's law of 1869, more clearly French in character (Aristarchi, iii. 514; Engelhardt, ii. 37 *sqq.*), provided for 4 years active service and one of *ihtiyāt* or in the active reserve, a period of 6 years in the redif in two bans (*şımf-ı muḳaddem* and *şımf-ı tālī*) of 3 years each (according to Engelhardt of 4 and 2 years respectively). In practice in 1877 there were 3 bans, the third (*şımf-ı thālīth*) being represented by the territorial army (*mustahfiz*) then mobilised (Zboński, p. 98). A conscript who obtained a lucky number

in the draw was drafted directly into the redif army (art. 17).

The law of 27th Şafar 1304 = 13rd Teshrin-i thānī 1302 (Nov. 25, 1886; résumé by Lamouche, p. 77 and Young, ii. 394) prepared by a commission of reorganisation which included Muẓaffar Walī Rızā Pāshā and von der Goltz Pāshā, fixed the period of redif service at 9 years, but was soon afterwards followed by a special law (*redif kanunu*) of 10th Muḥarram 1305 (Sept. 28, 1887). According to this, which was however not put into force till 1892, the period of redif service was 8 years. The ranks in the redif were the same as in the regular army from general of division down to sergeant-major. These officers formed at the same time the personnel of the recruiting offices for the whole army.

According to the law regulating the uniforms of the army on land (*elbise-i 'askerīye nizam-nāmesi*) of the 29th Djumādā I 1327 = 5th Ḥaziran 1325 (June 18, 1909), the redif soldiers wore as distinctive badge a dark green (*neftī*) piping (*zih*, Pers. *zih*, Arab. *zik*) at the bottom of the collar (*yaḳa*) of the tunic (*djaket* or *djeket*, modern spelling: *caket*, *ceket*). The officers wore a piece of cloth of the same colour 7 centimetres in length fastened on the collar of the undress tunic (*ceket*) or the full dress tunic (*setre*, older *setri*; cf. Pers. *sudre*) (*Düstūr*, *Terṭīb-i thānī*, i. 276; A. Biliotti and Aḥmad Sedād, *Législation ottomane*, Paris 1912, p. 171 *sqq.*).

The redif system was abandoned by the Young Turks. The law of 18th Ramaḍān 1330 = 18th Aghustos 1328 (Aug. 31, 1912) without proclaiming the dissolution of the corps ordered the formation of units of *mustahfiz* with elements furnished by the battalion depots in the second inspection (*müfettişlik*) of redif (*Düstūr*, *Terṭīb-i thānī*, iv. 615). The Young Turks have been reproached with this measure and some have even seen in it the cause of the Turkish defeat in the Balkan War.

REFİİ, an Ottoman poet and Ḥurūfī. Of Refi's life we only have a few hints from himself; the Ottoman biographers and historians do not seem to mention him at all. He himself describes how in his youth he studied many branches of knowledge but did not know what he should believe, and how sometimes he turned to the Sunna, sometimes to philosophy and sometimes to

materialism. He often travelled a great distance to visit a particular scholar but always was disappointed. The poet Nesimî [q. v.] was the first to teach him the grace of God and the truth, and ordered him to teach this truth in his turn to the people of Rûm, and for this purpose he had to speak in Turkish. He therefore wrote his *Beshâret-nâme*, "the message of joy", which he finished on the first Friday of Ramadân 811 (Jan. 18, 1409). This work is not yet printed; it is quite short and written in the same metre as 'Ashîk Pasha's *Gharîbnâme*, a *remel* of six feet with irregular prosody. The Hurûfî teaching is expounded in a very prosaic style, the merits of the names and letters, the sacred number 32, the prophets, the throne of God, the human countenance, the splitting of the moon, Faql Allâh [q. v.], the founder of the Hurûfî sect — all this is dealt with from the usual Hurûfî point of view. As sources an *Arshnâme*, a *Djâwidânnâme*, and a *Maḥabbetnâme* are quoted; the first and third are probably the works of the same names by Faql Allâh, the second according to Rieu was written by Afḍal Kāshî (d. 707 = 1307).

Another of Refî's works is the "Book of Treasure" (*Gendj-nâme*). It is printed in the Stamboul edition of the *Diwân* of Nesimî. The *Gendj-nâme* is better as poetry and on the whole less Hurûfî than generally Sûfî in tone. Man from the Hurûfî and philosophic point of view, Faql Allâh and Aḥmad (= Muḥammad), the 72 sects, the greatest Name (*ism-i âzam*), the water of life etc. are discussed in it.

Nesimî and his pupil Refî seem to be the only Ottoman Hurûfî poets of importance, and while the sect, in spite of all persecutions, continued to exist long after and even had connections with the Bektāshîye, these two poets as such do not seem to have produced any school. So far as I am aware know no historian of Turkish literature has taken any interest in Refî, until quite recently Köprülü-zâde Mehmed Fu'ad, who has even promised us a special study of him.

Add. 5986; of the *Gendj-nâme*: Vienna, Flügel, i. 720, N^o. 778, fol. 5r—8r; printed in the *Diwân-i Nesimî*, Stamboul 1260 (1844), p. 9—14; both works in the Browne MS. A 43, Turkish, see E. G. Browne, *Further Notes on the Literature of the Hurûfîs and their connection with the Bektāshî Order of Dervishes*, in *J.R.A.S.*, xxxix, 1907, p. 556—558; R. A. Nicholson, *A descriptive Catalogue of the Oriental Mss. belonging to the late E. G. Browne*, Cambridge 1932, p. 45, 49. (W. BJÖRKMAN)

RE'İS ÜL-KÜTTÂB or **RE'İS EFENDİ** (Ar., used in Turkey), properly "chief of the men of the pen", a high Ottoman dignitary, directly under the grand vizier, originally head of the chancery of the Imperial Diwân (*dîwân-i ḥümâyûn*), later secretary of state or chancellor and Minister of Foreign Affairs. According to d'Herbelot he was called also *re'is kitab*.

This office, unlike many others, is purely Ottoman, at least as regards the particular line of development that it took. Establishing itself at the expense of

the functions of the *nishāndji* [q. v.], we may say that it owes nothing to the influence of the more or less iranised Saldjûks, nor to the Byzantines. In its origins it seems rather to be connected with a more general and more vague institution of the East, one which deserves more profound study: that of the secretaries of the *dîwân* or chiefs of the secretariat of the *dîwân*. This office is found in different Muslim countries under different names: *perwâne* among the Mongols of Persia, *dîwân begi* among the Timūrids, *munshi* in Persia, (cf. Chardin, vi. 175; Ewliyâ Çelebi, ii. 267). In the Ottoman provinces there was attached also to the *wālî* an important official known as the *dîwân efendî(sî)*; in Egypt, under Mehmed 'Alî, the *dîwân efendî* became a kind of president of the council of ministers. The *re'is ü-l-küttâb* were in brief the *dîwân efendîsî* of the capital. It is perhaps to this that we owe the use of the title *re'is efendî*, by which they were more commonly known. We know that the term *efendî* was generally applied to people of the pen. This connection seems to have already been noticed by E. Blochet (*Voyage en Orient de Carlier Pinon*, Paris 1920, p. 83).

Until the time of Sulaimân the Magnificent, the title *re'is ü-l-küttâb* (or *re'is efendî*) was not used. At least this is what we are told by Aḥmed Resmî, who quotes in this connection the *Bed'î'î ü-l-Wekâ'î* of the historian Koḍja Hüsein Efendî of Sarajevo (cf. Babinger, *G.O.W.*, p. 186). The latter, who was himself *re'is ü-l-küttâb*, says that before Sulaimân, the official correspondence was in the hands of the *emin-i aḥkâm* or "depository of the decisions (of the Diwân)" along with the *nishāndji*. This point of view has been adopted by other historians (v. Hammer; cf. also the *Salnâme-i Neẓâret-i khâridjîye*).

There is however no agreement as to who was the first *re'is ü-l-küttâb*; it is usually said to have been Djelâl (Djelâl)-zâde Mustafâ Celebi [q. v.] (cf. Babinger, *G.O.W.*, p. 102). This well known historian, whose genealogy is taken back to the legendary founder of Byzantium, Yanko b. Madyan, was *re'is ü-l-küttâb* in 931 (1524—1525) before becoming *nishāndji*, but the *Nukhet ü-l-Tewâriḥ* of Mehmed b. Mehmed refers to the death in 930 (1523—1524) of a *re'is ü-l-küttâb* of the name of Ḥaidar Efendî. According to other indications, it would even appear that the office goes back to Mehmed II [cf. the article NISHANDJI].

The *riyâset* or office of *re'is efendî* lasted over three centuries during which its holder changed 130 times, the average tenure of office being 2 years and 5 months, which reveals a remarkable lack of ministerial stability: some of the occupants held the office twice, thrice and even four times.

Duties of the *re'is efendî*. As secretary of state the *re'is* kept records of memoirs and reports (*telkîs* and *tahrîr*) presented to the sultân by the grand vizier acting as representative of the government and of the Diwân. These documents which were prepared by the *âmedî-i dîwân-i ḥümâyûn* or *âmedjî* (referendar or reporter of the Imperial Diwân) were brought in a bag (*kise*) kept for the purpose to the ceremonial sittings of the Diwân by the *re'is* himself who handed them to the grand vizier. After being read they were given to a special officer, the *telkîşdjî*, whose duty it was to present them to the sultân.

As chancellor the *re'is* had a kind of jurisdiction over all the civil functionaries and was the immediate

head of the department of the Imperial Diwân (*diwân-i hümayûn kalemi*).

This chancellery was divided into three offices (*oda* or *kalem*):

1. the *beylik*, the most important, saw to the despatch of imperial rescripts (*fîrmân*), orders of the viziers, and in general all ordinances (*evâmîr*) other than those of the department of finance (*defterdâr dâiresi*). This office kept copies of them as did the grand vizier also. Ordinances bearing on the back the signatures of the clerk, of the chief editor (*mümeiys*), and of the head of the office (*beylikdji*) were submitted by the latter to the *re'is* who placed his sign (*resid*) upon them and, if it was a *fîrmân*, sent it to the *nishândji* for the *tughra* [q. v.] to be placed upon it. — The *beylik* in addition retained the originals of civil and military regulations (*kânûn* or *kânûn-nâme*) (usually elaborated by the *nishândji*) as well as of treaties and capitulations (*ahd-nâme*) with foreign powers. The *re'is* had to consult these treaties, notably when certifying the *der-kenâr* or "marginal" answers put by his subordinates on the requests or notes, known as verbal (*taqrîr*), which the ambassadors addressed to the grand vizier. It is this side of his activity which, gradually becoming more and more important and absorbing, ended by making the *re'is* a Minister of Foreign Affairs.

2. office of the *tahtwîl* or "annual renewal" of the diplomas of the governors of provinces (*berât*), of the brevets of the *mollâs* or judges in towns of the first class (*tahtwîl*), of the brevets of the timariots or holders of military fiefs (*zabt fîrmânî*).

3. office of the *ru'ûs* or "provisions" of different officials, as well as of the orders for pensions from the treasury (*sergi*) or from *wakfs* (cf. the details of the organisation of this office in Mouradgea d'Ohsson, vii. 161).

The *re'is* accompanied the grand vizier to the audiences which the sultân gave him and to those which the grand vizier himself gave to ambassadors. He shared with his master the midday meal as did the *çavuş baskî* [cf. ÇAWUSH] and the two *teskere'dji*, except on Wednesdays when these two were replaced by the four judges of Istanbul.

In the official protocol the *re'is* had the same rank as the *çavuş baskî* with whom he walked in official processions, before the *defterdârs* (which showed he was of lower rank than the latter).

The *elkâb* or epistolary formula to which they were entitled will be found in Feridûn, *Münsh'e'ât*, p. 10. It is the same as for the *aghâs* of the stirrup [cf. RIK'ÂBDÂR] and the *defter emîni*. For the dress of the *re'is* see Brindisi, *Anciens Costumes Turcs*, pl. 2; Castellan, iv. 107.

According to Mouradgea d'Ohsson, the *re'is* used to act as agents for the khâns of the Crimea.

Administrative career of the *re'is*. The *re'is*, like all Ottoman officials, were chosen by the sultân or grand vizier as they pleased, but, except in case of appointment by favour, they followed a fixed line of promotion (*tavîk*) in the administration. It was in the administrative offices, i. e. among the *khodjagîân* (Persian plur. which was given as an honorific title to the principal clerks or *khodja* or *kalem gâibi'leri*) that this career was spent.

In examining the *Sefînet ül-Rû'esâ'* of Ahmed Resmî, we find that up to the *re'is* Boyalî Mehmed Efendi (*Pâshâ*) (d. 977 = 1569-1570) there is no information available about the career of the *re'is*,

but starting with him we find that the *re'is* were regularly chosen from among the former *teskere'dji* of the *wezîrs* or of the grand vizier. From *Sheikh-zâde* 'Abdî Efendi (d. in 1014 = 1605-1606) the *re'is* were mainly taken from the *wezîr mektûbdjisi* or private secretaries of the grand vizier. These secretaries were themselves at the head of an office (*oda*) which contained a very small number of officials (*khalîfe* or *kalfa*, pl. *khulefâ'*); there were only two between the years 1090 and 1100. When the number increased (at a later date there were about 30) the career of the future *re'is* was as follows: *khalîfe* in the office in question, called also *mektûbî-i şâdr-i 'âlî odası*, then *ser-khalîfe* or *bash-kalfa* "chief clerk", then *mektûbdji*. The post of *mektûbdji* was much sought after. It brought its holder into close contact with the grand vizier and it was then very easy to advance oneself. More rarely the future *re'is* rose through the similar but less important office of secretary to the lieutenant to the grand vizier or Kiahya Bey (*ketkhûda kiâtibi odası*).

The *riyâset* did not mark the end of a career but gave access to still higher posts (see art. NISHÂNDJÎ for the old rules of promotion by which the *re'is* became *nishândji*). It was one of what were known as the "six [principal] dignities", *menâsib-i sütte*, namely, the *nishândji*, *defterdâr*, *re'is ül-küttâb*, *defter emîni*, *shikk-i thâni* *defterdârî*, *shikk-i thâlith* *defterdârî* (Ahmed Râsim, *Târîkh*, p. 756).

According to the *Naşihat-nâme* (p. 39-40 of the French translation; cf. this Encyclopædia, iv. 815-816), the *re'is* was under the authority of the Grand Defterdâr (for financial matters only?).

Increasing importance of the office of *re'is*. — The growing influence of the *re'is* is explained by the increasing importance of foreign policy in Turkey (the Eastern question).

Down to the end of the xvth century the *nishândji* were certainly superior to the *re'is*: they controlled and even revised the orders and decisions of the *diwân* (*ahkâm*), but from the xvith century onwards *re'is* like Okdju-zâde Mehmed Shâh Efendi, Lâ'm-'Alî Çelebi and Hükmi Efendi shed a certain lustre on their office. From 1060 (1650) the incapacity of certain *nishândji* precipitated the decline of their office in spite of the ephemeral efforts by grand viziers like *Shehid* 'Alî Pâshâ and of the *nishândjis* appointed by him (Râshid Efendi and Selim Efendi). It was in this period that the office of *beylikdji* was created (cf. above).

The Ottoman protocol (*teshrîfât*) was nevertheless still to retain for a long time traces of the originally rather subordinate position of the *re'is*. For example they did not sit in the office of the *Diwân* itself, called *Diwân-khâne* (in the Top Kapu Sarayı or "Old Serai"), but remained seated outside of the room in a place called *re'is tahtası*, "the bench of the *re'is*", where there were also seats for certain other officials to wait upon. In the formal sittings, even in those like the distribution of pay (*ulûfe*) to the Janissaries which took place in the presence of foreign ambassadors, the part played by the *re'is* was rather limited. He carried in with slow step and the sleeves of his *üst* turned up the bag containing the *telhîs* (cf. above). He kissed the hem (*etek*) of the grand vizier's robe, placed the bag on his left, kissed the hem of his robe again and withdrew to his place. He came in again to open the bag, handed the documents to

the grand vizier, took them back from him to fold them (*baghlamak*), sealed them and gave them to the *telkhişdjî*. If he was unable to be present, the bag of the *telkhiş* was handed to the grand vizier by the *büyük teskeredjî* (*Ḳanûn-nâme* of 'Abd ül-Rahmân Pasha, p. 85, 123 etc.).

Lucas (*Second Voyage*, Paris 1712, p. 216) writes that during the audience given by the grand vizier to the French Ambassador "le Ray Affendy ou Grand Chancelier demeura debout et appuïé contre la muraille".

Things were changed at the reform of the Diwân effected at the beginning of his reign (1792) by Selim, desirous of limiting the power of the grand vizier. The old Diwân consisted of six *wazirs* of the dome (having only one consultative voice), of the Muftî (*Shaiḫ al-Islâm*) and the two *ḳazaskers*. The new Diwân was to consist of 10 members by right of office and others chosen in different ways (about 40 in all). The members by right of office were the *Kiaḫya Bey*, the *Re'is Efendi*, the Grand Defterdâr, the *Çelebi Efendi*, the *Tersâne Emini*, the *Çawuş Bashî* etc. (Zinkeisen, *Geschichte*, vii., 1863, p. 321).

The office of *re'is* tended more and more to become the Ministry of Foreign Affairs of the Sublime Porte, parallel to the post of *Kiaḫya Bey* (Interior).

Suppression of the dignity of *re'is*. — The title of *re'is* was suppressed by the *ḫaṭṭ-i ḥümâyûn* of Sultân Maḥmûd II addressed on Friday 23rd Dhu 'l-Ḳa'da 1251 (March 11, 1836) to the grand vizier Mehmed Emin Pasha. The Turkish text will be found in the *Sâlnâme* of the Turkish Ministry of Foreign Affairs; the French translation (or at least parts of it) was published in the *Moniteur Ottoman* of April 23, 1836 (according to A. Ubicini, *Lettres sur la Turquie*, p. 38, note 1). This document at the same time created two new ministries (*nezâret*) which in memory of their origin remained to the end in the same building as the grand vizierate [cf. BÂB-I 'ÂLÎ in Suppl.]: 1. the Ministry of the Interior (originally of civil affairs or *umûr-u mülkiye*, later *dâḫiliye*) replacing the department of the *Kiaḫya Bey*, and 2. the Ministry of Foreign Affairs (*ḫâridîye*) replacing that of the *re'is*. The preamble said that, abandoning the old regulations of the service, the sultân had thought it advisable to create real posts of *wazîr* (*wazâret*) and not honorary ones, but without its being necessary to give the new *wazîr* of foreign affairs the title of *pasha* [q. v.], "which is mainly a military one".

Bibliography: By far the most important source is the work known as *Sefinet ül-Rü'esâ'* which consists of: 1. Aḥmad Resmî's work (Babinger, *G. O. R.*, p. 309 sq.) which contains the biographies of 64 *re'is* down to Râghib Mehmed Efendi (1157 = 1744), and 2. its continuation by Sulaimân Fâ'îk Efendi which contains the biographies of 30 *re'is* down to Aḥmad Wâṣîf Efendi at the beginning of the 19th century. According to the preface to Sulaimân Fâ'îk's (not Fâtîk) continuation, Aḥmad Resmî had entitled his work *Ḥalîkat ül-Rü'esâ'*, in imitation of the *Ḥadîkat ül-Wuzerâ'* of 'Oṭmân-zâde Tâ'ib, but changed it at the suggestion of Râghib Pasha to *Sefinet ül-Rü'esâ'* (the references in the Catalogue of Turkish MSS. in the Bibliothèque Nationale by E. Blochet, ii. 158, should be corrected accordingly). The word *halîkat* apparently makes no sense, that of *ḫalîfat* which is usually

found in other works (Flügel, *Cat.*, ii. 407, N^o. 1250; Babinger; Brusalt Mehmed Tâhir, iii. 59 note), does not seem correct either. One ought undoubtedly to read *ḫalîkat* (which rhymes with the *ḥadîkat* of the prototype). The *Sefinet ül-Rü'esâ'* was published by the State Press in Istanbul in 1269.

Cf. also in addition to the references in the text: Mouradgea d'Ohsson, *Etat de l'Empire Othoman*, vii., 1824, index; Joseph von Hammer, *Des osmanischen Reichs Staatsverfassung und Staatsverwaltung*, Vienna 1815, ii., index; *Ḳanûn-nâme* of Tewḳî'î (*nishândjî*) 'Abd ül-Rahmân Pasha, written in 1087 (1676–1677) and ed. by F. Köprülü (*M. T. M.*, p. 508); Es'ad Efendi, *Teshrifât-ı Devlet-i 'Âliye*, p. 85, 123 etc.; *Sâlnâme-i Nezâret-i Ḳhâridîye*, 1st year, 1301 (1885), Imprimerie Ebüzziya, Istanbul (contains in addition a historical resumé and a chronological list of all the grand viziers and all the *re'is*); Charles Perry, *A View of the Levant, particularly of Constantinople* etc., London 1743, p. 36. — On the *ṣāhib al-diwān* or *ra'is* (!) *al-diwān*, see *Kalkashandî*, *Ṣubḥ al-'Ashā*, i. 101 sqq.; vi. 14, 17–18, 50; Massé, *Code de la Chancellerie d'Etat... d'Ibn al-Ṣayrafî*, in *B. I. F. C.*, xi. 79 sq. — Among the Saldjûks, the offices of *ṣāhib al-diwān* and *perwāna* were quite separate: cf. Houtsma, *Recueil d. Textes... Seldj.*, iii. 105. (J. DENY)

REIYO, the name given in Muslim Spain to the administrative circle (*kūra*) comprising the south of the Peninsula, the capital of which was successively Archidona (Arabic: *Urdjudhūna*) and Malaga. The usual Arabic orthography is رايو; in particular this is the form found in the *Mu'djam al-Buldān* of Yāḳūt; but some Spanish MSS. give

the true orthography رايه, more in keeping with the local pronunciation Reiyu (Raiyu) attested by Ibn Ḥawḳal. It is only, as Dozy thought, a transcription of the Latin *regio* (no doubt *Malacitana regio*); the suggestion put forward by Gayangos of a connection with the Persian town-name al-Raiy is of course untenable.

When the fiefs in the south of Spain were assigned to the former companions of Baldj b. Bishr [q. v.], the district of Reiyu was allotted to the *djund* of Jordan (*al-Urdunn*). During the Umayyad caliphate of Cordova, the *kūra* of Reiyu was bounded by those of Cabra and Algeciras in the west, by the Mediterranean in the south and by the *kūra* of Elvira in the east.

(E. LÉVI-PROVENÇAL)

RESHT, first a district, then a town and lastly the capital of the province of Gilān in Persia. As V. Barthold points out (*Gilān po rukopisi Tumanskogo*, in *Bull. de l'Inst. Cauc. d'Hist. et d'Archéol.*, Tiflis 1927, vol. vi.), our

information regarding the history and historical geography of Gilān is so far very scanty. Le Strange's remark that the position of the chief towns of Gilān cannot be exactly given is still true. The Tumanski MS. (tenth century) is the earliest to inform us that before the foundation of towns their names were already in existence as those of districts. In particular seven districts are mentioned in the eastern part of Gilān on this side of the river — Biepišh (Islām having penetrated there from the east), and eleven in the western part on the other side of the river — Biepas. Among the seven eastern districts we find one called Lāfidjān (i. e. Lāhidjān) and among the eleven western ones that of Resht. The towns of this name did not exist at this time. They are not mentioned, in fact, until the Mongol period.

General. Gilān is now divided into 19 districts (of which five are called *Hamse-ye-Tewālesh*), that of Mawāzi with Resht, capital of the province, being the most important. According to Rabino (1917), the town of Resht has a population of 30,000 and the district of Mawāzi 90,500 out of the total of 339,300 for the province. These figures must have increased by now. Resht, also called Dār ul-Marz or "frontierland", lies between two small rivers, the Siāhrūdbār or Seigālān in the east and the Gowher-rūd in the west, which unite and flow into the Bay of Enzeli (now Pehlewi), which is eight miles from the town. The bazaars occupy a considerable part of the centre of the town, which is traversed by dark and narrow streets. Only a few years ago Resht had very few broad streets and was only partly paved. Recently there have been steps taken to improve matters. The town is divided into 7 *maḥalles*: Zāhedān, Maḥalle-ye-bāzār, Khumairān, Khumairān-e-Zāhedān, Ustād Serā, Čumār Serā and Kiyāb. It has some 6,000 houses, 3,300 shops, 20 caravanserais for merchants and 25 for caravans, 40 mosques, 12 sanctuaries, 36 tekkes, 6 medreses, 35 baths, and 7 bridges (all these figures refer to the period before the War). Among the mosques only the Masdjid-i Šafi, the oldest, seems to be of any interest. Ḥasan Beg, author of the *Aḥsan al-Tawārīkh*, calls it Masdjid-i Šafi and adds that when Ismā'il Šāh fled from Ardabil to Gilān, he spent some time near this mosque. In its courtyard there is a well into which women throw silver in order that their prayers may be granted. The Imām-Zāde Saiyid Abū Dja'far is the most important sanctuary of Resht, near the governor's palace. The holy man buried there is called by 'Abd al-Fattāḥ Fūmenī Ustādh Dja'far whence the name of the quarter Ustādh Serā. The ladies of Resht have always had the reputation of being of easy virtue. According to a poet of the country, Mewlā Sa'īd Gilānī: "the young women of Resht, like intoxicated peacocks, used to go seeking a purchaser in every bazaar, holding in their hands the knot of their trousers".

There are in Resht two important clans: the Tā'ife-ye Hādjdi Samī (who came originally from Tabriz) and the Āle Umīshe (of very humble local country origin). The language of the common people of Resht is a dialect of Gileki. The upper and middle classes use Persian. Āzari-Turkish is also spoken. The inhabitants are all Šhi'a except for a few Bahā'ī. Gilān was converted to Islām only at the beginning of the tenth century by the 'Alid Imām Ḥasan b. 'Alī al-Utrush after a popular

rising against the Djustānids (cf. Barthold, *Istoriko-Geografičeskii Obzor Irana*, St. Petersburg 1903, p. 156). All the people of the Biepas were of the Ḥanbalī school except the chiefs of Fūmen and the inhabitants of Kūčispahān (Šhāfi's). It was only after the annexation of Gilān to the kingdom of Persia by the Šafawīs that the people of the Biepas became converted from the Sunna to the Šhi'a. According to another story however, Islām was preached in Dailam and Gilān in the year 290 (903) by the Saiyid Nāšir Kabir, one of the 'Alid pretenders to the caliphate, who belonged to the Zaidi Šhi'a, "of which he was one of the learned men and an author"; in this account the conversion to Islām is placed under the auspices of the Šhi'a (cf. *Shehriārān-e gom nām* by S. A. Kasrawī Tabrizi, Teherān 1928, i. 32). The last traces of the religion of Zoroaster have not yet disappeared from Gilān. People look for white cocks because their crowing presages good fortune; the custom is observed of lighting a fire and jumping over it (*čār šembe-ye ākher-e sāl*). On the road from Fūmen, about one mile from Resht, a place preserves the name of Atesh-kade. S. A. Kasrawī (*op. cit.*, p. 31) does not however seem certain that Zoroastrianism was widespread in Gilān. Generally speaking, the people were indifferent in matters of religion. We may note however that many trees, called saints, *pīr* or *buzurg-wār*, are objects of worship, especially on the part of women (cf. notably: Welān near the 'Arāḡ bridge; Čehel Dokhter and Aghā Bibi Zainab).

Resht is the principal export and import market for trade with Russia. Its importance as the economic centre of Gilān varies with the rise and fall in the silk-culture. Barthold thinks (*op. cit.*) that the development of urban life and industry in Gilān belongs to a period later than the tenth century. The geographers of the tenth century mention the cultivation of the silkworm and silks only in Ṭabaristān. In the xiiith century and later the silk of Gilān was particularly famous. At the end of this century, the silk of Gilān, according to Marco Polo, was sought by Genoese merchants, whose vessels first appeared in the Caspian shortly before Marco Polo wrote.

History. S. A. Kasrawī (*op. cit.*) gives a sketch of the dynasties of the Djustānids (end of the second to the beginning of the fourth century A.H.), Kangarids (beginning of the fourth to the middle of the fifth century A.H.), and Sālārids (fourth century) who, especially the first, played a certain part in the destinies of Gilān.

In Rabino's work we have a complete historical survey from the Mongol conquest (1307) to the Persian revolution. The Tumanski MS., unknown to Rabino, contains some information about the preceding period.

In it Gilān is described as a populous and wealthy country. All the work was done by women. The men had no occupation except fighting. Throughout Dailam and Gilān in every village there were one or two fights a day: every village fought with every other. Many people were often killed in a single day. These quarrels and battles went on until the men went to war or died or grew old. When they grew old they became pious and were called *muḥtasib ma'rūfker* (knowing the customs). In all the districts of Gilān, if any one insulted another or became intoxicated or committed any act that caused injury, he was punished with

40—80 beatings with a rod. They had little towns with mosques (*djāmi'*) like Gilābād, Shāl, Dulāb, Bailamān Shahr, in which there were bazaars: the merchants in them were foreigners, all the others were the pious *ma'rūfker*. In all parts the people lived on *liter* (meaning unknown), rice and fish. From Gilān were exported brushes, felts, praying-carpets and fish to all the countries of the universe.

The Tumanski MS. does not give the distances between the towns nor any form of itinerary. The only one known is that of Maḳḍisī who wrote some years later than the author of the Tumanski MS. The principal town of Gilān at this time was Dulāb. As Rabino points out, the only period of independence in the history of the district of Resht (Mawāzī) was between the beginning of the eighth century (706 = 1306—1307) and the end of the ninth (880 = 1475—1476) which was spent in fighting with neighbouring chiefs of Fūmen and Lāhidjān. The former were victorious and for a time the Biepas, including Resht, was under the Ishaḳid dynasty of Fūmen. With the coming of sultān Aḥmad Khān of Biepiṣh the Lāhidjān dynasty won the upper hand. This period lasted from 911 (1506) till 1592 i.e. till the annexation of Gilān to Persia by Shāh 'Abbās. Among the events of this period was the establishment in Gilān, of which Resht became the administrative and economic centre, of the "Muscovite Company" founded in 1557 (Anthony Jenkinson, Richard and Robert Johnson), who taking the Russian route sent ten expeditions into Persia between 1561 and 1581. It is to noteworthy that the last independent ruler of Gilān, Aḥmad Shāh, sent ambassadors to Moscow to seek help against Shāh 'Abbās and obtained promises of protection which however came to nothing. The Cossacks at the same time were plundering in Gilān and Resht and trying to gain the support of the Persian court. The most notable invasion was that of Stenka Razin who sacked Resht in 1045 (1636). On the 2nd Šafar 1082, the day of Stenka's execution, the Persians in Moscow at the time were invited to be present at it (cf. the magazine *Kāweh*, No. 12, N. S., Dec. 1, 1921). From 1722 to 1734, Resht and Gilān were occupied by the Russians (Shipov, then Matushkin) invited by the governor who was threatened by the Afghāns. In 1734, Gilān was restored to Persia after a treaty. Rabino quotes a Persian testimony in favour of the Russian occupation. For military reasons the Russians cleared the jungle round Resht.

The history of Gilān and that of Resht, which has always played a preponderant part in it, merges into the general history of Persia after its annexation. We may however touch on a few points in the very modern period short of which Rabino's work stops. During the Persian Revolution, a body of Social Democrats was sent by the Regional Committee of the Caucasus to Resht, and there helped in Feb. 1909 to overthrow the authority of the Shāh and to establish a revolutionary committee which elected as governor the Sepehdār 'Azam, who played a prominent part in the history of the period along with Serdār Asad Bakhtiyāri (cf. *Persia v borbé za nezavisimost*, by Pavlovič and Iranskii, Moscow 1925). Resht then became the base of operations of the northern revolutionary army. A few years later, during the Great War, Resht again attracted attention in connection with the movement of the *djengeli*, created by Mirzā Kūčik Khān, the object of which was to fight

against foreign occupation of Persian territory. Assisted by German (von Passchen), Turkish and Russian officers, an armed force was organised to oppose the passage of the English troops under General Dunsterville on their way to Bākū, without much success however (battle of Mendjil, June 12, 1918). The English were able to force their way through with the help of Bičērākhov's detachment of Cossacks and established a garrison in Resht. A second battle with the *djengeli* in the town itself on July 20, 1918 also ended in an English victory. On Aug. 25, peace was signed with Kūčik Khān at Enzeli. At one time, at the end of March 1918, the position of Kūčik Khān was so strong that the capture not only of Kazvin, but even of Teherān was feared. The English Vice-Consul at Resht, Mr. Maclaren, the manager of the Imperial Bank of Persia in this town, Mr. Oakshot, and Captain Noël of the Intelligence Service were taken prisoners by the *djengeli*, the latter being held for five months (cf. *The Adventures of Dunsterforce* by Maj. Gen. L. C. Dunsterville, London 1920).

Resht again became the arena of the revolutionary movement in 1920. After the capture of Bākū on April 28, 1920, by the Reds, the White Fleet sought refuge in the port of Enzeli, which was held by the English. Comrade Raskolnikov, commander of the Red Fleet in the Caspian, pursuing the Whites occupied Enzeli on May 18, 1920 and forced the English to beat a hurried retreat. The appearance of Soviet troops at Enzeli encouraged the revolutionary movement in Gilān and on June 4, a revolutionary and anti-English government of Northern Persia was proclaimed at Resht with Kūčik Khān at its head.

At the first appearance of Red forces at Enzeli and Resht, the peasants had refused to take the land which the communists proposed to take from the landowners. The peasants feared that the khāns would return and make them pay dearly for their expropriation. But at the second occupation (Oct. 1920) of Resht by the Reds the peasants greeted them frantically. Large numbers of them came among the Red soldiers and said that now they would not deliver rice to the landowners any longer and that they would seize all the harvest. The military situation was however confused. After the evacuation of Enzeli the English at first remained on in expectation of events, but they were forced to retire from Resht in June, setting fire to all their military stores. A month later they left Mendjil blowing up the bridge over the Sefid Rūd and began to return to Baghdad. In the meantime the Teherān Government had sent a military expedition against the revolutionaries in Resht. After initial successes, the Persian Cossack brigade suffered checks. It was after this that the second occupation of Resht by the Reds mentioned above took place.

On their side, the English demanded on Oct. 25, 1920 the dismissal of the Russian (White) officers, the instructors of the brigade, who were to be replaced by English. Mushir al-Dawla's government refused to agree to this and resigned on Oct. 27. It was replaced on Nov. 1 by that of Sepehdār, which acceded to the English demands, so that all the armed forces of Persia were now under English control. The latter then on Dec. 19, 1920, sent an ultimatum to the Teherān government ordering the *medjlis* to be summoned with a view

to the ratification of the Anglo-Persian treaty of Aug. 9, 1919. The English plans were however thwarted by the rapprochement between Persia and the Soviets. On May 20, 1920, Teherān notified Moscow of her recognition of the Soviet Republic of Ādharbāidjān, and her desire to enter into pourparlers with the R. S. F. S. R. Having reached Moscow at the beginning of November the Persian delegate Muṣḥawār al-Memālek opened negotiations for the conclusion of a treaty with the Soviets. On Nov. 28, Moscow asked Teherān to accept the Soviet envoy, M. Rothstein. After an attempt in Jan. 1921 to regain the position lost in the north of Persia, where the Soviets still had their troops, by inspiring the Persian note of Jan. 23, which demanded that the Soviets should withdraw their forces from Gilān, the English, in view of Moscow's firm refusal, took the first steps to remove their troops from Persia and on Febr. 26, 1921 Persia and the R. S. F. S. R. signed a treaty re-establishing diplomatic relations between the two countries. On April 25, 1921, M. Rothstein came to Teherān and in the course of the year the Soviet and English troops left Persian territory. Gilān and Resht then returned definitely to Persia. The last echoes of the revolution in Gilān were the risings of Kerbelāi Ibrāhīm and of Saiyid Djalāl in 1921 and 1922.

Bibliography: H. L. Rabino's work, *Les Provinces Caspiennes de la Perse, Le Guilan*, in *R. M. M.*, xxxii., 1915—1916, is authoritative. It contains a very complete bibliography to which we can only add, in addition to a few books and articles mentioned above in the text, a curious brochure entitled *Teswiye-ye Hukūk*, written by Hādjīdī Saiyid Maḥmūd of Resht and published in 1910. It deals with the agrarian system in Gilān. — *La domination des Dailamites* by V. Minorsky (publ. by the Société des Études Iran., N^o. 3, Paris 1932) may also be mentioned.

(B. NIKITINE)

RESMĪ, AḤMAD, Ottoman statesman and historian. Aḥmad b. Ibrāhīm, known as Resmī, belonged to Rethymno (Turk. Resmo; hence his epithet?) in Crete and was of Greek descent (cf. J. v. Hammer, *G.O.R.*, viii. 202). He was born in 1112 (1700) and came in 1146 (1733) to Stambul where he was educated, married a daughter of the Re'īs Efendi Ta'ūkdjī Muṣṭafā and entered the service of the Porte. He held a number of offices. In various towns (cf. *Sidjill-i 'othmānī*, ii. 380 sq.) In Ṣafar 1171 (Oct. 1757) he went as Ottoman envoy to Vienna and on his return made a written report of his impressions and experiences. In Dhu 'l-Ka'da 1176 (May 1763) he was again sent to Europe, this time as ambassador to the Prussian court in Berlin. He also wrote a very full account of this mission, which early attracted attention, in the west also, for its views on Prussian policy, its description of Berlin and its inhabitants and all sorts of observations on related topics. After filling a number of other important offices he died on the 2nd Shawwāl 1197 (Aug. 31, 1783; on this date cf. Babinger, *G. O. W.*, p. 309, note 2) in Stambul. His tomb is in the Selimiye quarter of Scutari.

In addition to the descriptions already mentioned of his embassies (*sefāret-nāme*'s) to Vienna and Berlin, Aḥmad Resmī wrote in connection with the Russo-Turkish war and the peace of Küçük Kainardje (1769—1774) a treatise entitled *Khulāṣet ül-l'tibār*, in which as a participator in the campaign

and eye-witness, he gave his impressions of this important period in the history of Turkey. Of especial value are his biographical collections, particularly his *Khalifet el-Rü'ṣā* (composed in 1157 = 1744) with the biographies of 64 chancellors (*re'īs efendiler*), and his *Humeilet* (*Hamilet*?) *ül-Küberā*, in which he gives the lives of the chief eunuchs of the Imperial Harem (*kizlar aghalari*). Of a similar nature is his continuation (written in 1077 = 1766) of the "deaths" (*wefayāt*) of Mehmed Emin b. Hādjīdī Mehmed called Alay-Beyl-zāde, in which he gives in twelve lists the deaths of famous men and women (cf. the accurate list of contents in J. v. Hammer, *G.O.R.*, ix. 187 sq., N^o. 14). He also wrote several other works on geology and proverbs. Thereports of his embassies are available in numerous manuscripts (cf. the list in Babinger, *G. O. W.*, p. 311, to which should be added: Berlin, Staatsbibl., MS. Or. 4^o 1502, fol. 27^b to 46^b [incomplete], Paris Bibl. Nat., Suppl. Turc N^o. 510 [?], Paris, Cl. Huart Coll.), printed editions and translations, which are listed by Babinger, *G. O. W.*, p. 311. To these is to be added the Polish translation *Podróż Resmi Ahmed-Efendego do Polski i poselstwo jęego do Prus 1177* (according to Wāṣif, *Ta'rikh*, i. 239 sqq.) in J. J. S. Sekowski, *Collectanea z Dziejopisów Tureckich*, vol. ii., Warsaw 1825, p. 222—289.

Bibliography: *Sidjill-i 'othmānī*, ii. 380 sq.; Brūsālī Mehmed Tāhir, *'Othmānī? Müellifleri*, iii. 58 sq. (with list of works); F. Babinger, *G. O. W.*, p. 309—312.

(FRANZ BABINGER)

REWĀNĪ, an Ottoman poet. His real name was Ilyās or Shudjā^c and he belonged to Adrianople. He is said to have taken his pen-name of Rewānī from the river Tandja which flowed past (*rewān*) his garden. He entered the service of Sulṭān Bāyazid II (1481—1512) in Stambul and was sent by him as administrator of the *surre*, the annual sum for the poor of Mecca and Medina, to the holy cities to distribute the money. He embezzled a part of it however and on the accusation of the Meccans his salary was stopped; a malady of the eyes, which then affected Rewānī, was described by a poet hostile to him as the just punishment of God, whereupon Rewānī answered him, also in verse, and calmly confessed: "He who has honey licks his fingers". He then fled to the court of Prince Selim in Trebizond and entered his service. But he had to disappear from here also as he had committed some indiscretion and his property was confiscated (some sources put his appointment to the *surre* at this date); he was however pardoned by Selim and henceforth served him all the more faithfully. When Selim in 918 (1512) came to Stambul to dethrone his father Bāyazid, Rewānī is said at the last decisive council of war to have thrown his turban in the air with joy and to have praised the day. After Selim's accession he was appointed superintendent of the kitchen (*maṭbakh emini*), then entrusted with the administration of the Aya Sofya and of the hot baths (*ḥabludja*) in Brusa. He built a mosque in the Kırk Çeshme quarter of Stambul which was called after him and he was buried there on his death in 930 (1523).

Rewānī left a *diwān* and a *methnewī* entitled *'Ishret-nāme* or *Kitāb-i Wasā'il*. In the still unprinted *methnewī*, which is not very long, he describes the drinking bouts of his time in all

detail (wine, flagons, cups, candles, musical instruments, cupbearers etc.) so realistically and thoroughly that from it one can reconstruct this aspect of Turkish life of the time. He describes all this after years of experience towards the end of his life — he talks of his white beard and of the autumn of his life — so that his poem is a document of social life of the highest value. Rewānī was a thorough *bon vivant* who spent most of his time in taverns and described his life of pleasure in elegant and witty verse. His poem is not at all intended to be mystical and, if it can be so taken from his own words at the end, this is only the usual attempt of the poet to protect himself from possible attacks from the devout. His was not a very high character; in addition to the embezzlement above mentioned, he is known as a plagiarist in Turkish literature (he and the poet Zāti accuse each other of plagiarism), and his chief table companion was the equally lax poet İshāk Çelebi, but shortly before his death Rewānī is said to have repented of all his sins.

His *‘İshretnâme* is the first poem of this kind in Turkish literature and the habit of writing such *sakīnâme*'s only became popular a century later. His work is therefore original, and his own invention, and his wit and graceful and elegant, but at the same time simple and clear language are praised by the Ottoman historians of literature. According to Sehi, his *‘İshretnâme* is only one part of a *Khamsa-i Rûm* and Tâhir mentions as another part of it a poem called *‘Djâmî’ al-Naşâ’ih*. Nothing further however seems to be known of this.

(W. BJÖRKMAN)

RHODES, the furthest island of the Archipelago to the east, Rhodes extends from S.W. to N.E. and is about twelve miles off the south coast of Asia Minor. Its length is approximately 45 miles and its greatest breadth from 20 to 25 miles. The Island rises gradually from the sea to a central range of mountains, the highest peak of which is that of Mount Artamiti, 6,000 feet above sea-level. Its geographical situation within reasonable reach of the three Continents of the Old World explains its importance in maritime history; and its nearness to the empires of the Arabs, Egyptians and Ottomans in succession

brought it within the range of Islâmic expeditions on several occasions.

In the first century of the Hidjra, the Caliph Mu‘âwiya [q. v.] sent a fleet under the command of Djunâda b. Abî Umaiya al-Azdi to invade Rhodes. The date is variously placed in 52 and 53 (672—73) (see Caetani, *Chronographia Islamica*, for this variance in the sources). Little is known about this early expedition, except that the Arabs founded a short-lived settlement, which was evacuated in 60 (679—680) by the order of the second Umayyad Caliph Yazîd [q. v.]. The island was thus recovered by the Byzantine Empire in whose historical sources the Arab occupation was long remembered by the complete destruction and sale of the famous bronze “Colossus of Rhodes” to a Jewish merchant of Emesa. The metal is said to have amounted to 880 camel-loads.

In 1308 or 1310 A.D., during the reign of Andronicos II Palaeologos, Rhodes was seized by the Knights Hospitallers who had been expelled from ‘Akkâ in 1291 by Sultân Khalîl [q. v.], son of Kâlâ‘ûn. The Order of Saint John of Jerusalem now came to be known as the Knights of Rhodes, under whose rule the island became a thorn in the side of Islâm as one of the strongest outposts of Latin Christianity in the Levant. Thence the Knights played a prominent part in most of the forthcoming crusades against Turkey and Egypt, notably in the capture of Smyrna in 1344, the sack of Alexandria in 1365 and in the Crusade of Nikopolis [q. v.] in 1396. The second of these attacks determined the Egyptians to start a series of counter-crusades against Cyprus and Rhodes. Three naval expeditions in 1424, 1425 and 1426 resulted in the annexation of Cyprus as a tributary state to Egypt.

The Mamlûks then turned their plans to the conquest of Rhodes during the reign of Çakmak. In 1440, they manned a flotilla of 15 grabs with 200 regulars and several hundred volunteers. These sailed from Damietta to Cyprus for revictualing and to ‘Alâya in Asia Minor, where its Muslim Amîr reinforced them with more warriors and four galleys, then direct to Rhodes. The Knights were, however, prepared for the attack, and, after a few skirmishes, the Mamlûk fleet retreated under cover of night. In 1443, another fleet sailed from Damietta to Bairût, Tripoli, Larnaca, Limasol and Adalia to collect free provisions from subject and friendly states. Their first objective was the little island of Châteauroux or Castellorizzo, known in the contemporary Arabic sources as *Kashîl al-Rûdj*. This island belonged to the Knights, and the Egyptians had no difficulty in reducing it. Afterwards they returned to Damietta owing to the approach of winter. In 1444, a third and more elaborate expedition was launched against Rhodes. The Egyptian fleet, carrying no less than a thousand Mamlûks, sailed from Damietta to Tripoli and direct to Rhodes. This time they succeeded in landing on the Island and in setting siege to the city of Rhodes for a period of forty days, during which they pillaged all the neighbouring villages. Finally, the Knights sallied from the beleaguered town and took the offensive. Thus taken by surprise, the Egyptian army sustained considerable losses and sailed back to Damietta.

The success of the Knights in the repulse of so strong an enemy as Mamlûk Egypt may be ascribed to three main causes: first, the system

of espionage which the Order maintained in all hostile countries in order to keep their headquarters in perfect readiness for effective action at the appropriate moment; second, the great strength of the fortification of Rhodes which was made possible by its prosperity as one of the chief centres of trade in the Levant; and third, the nature of the military training of the Knights, their unity and their extraordinary valour in battle. Peace was eventually established between Egypt and Rhodes through the mediation of Jacques Cœur, the great French merchant prince of the fifteenth century, who was in favour at the court of the Sultān. The task of a decisive counter-crusade against Rhodes remained for the Ottoman Sultāns. Muḥammad II besieged the capital with some slender measure of success in 1480; but it was not till the reign of Sulaimān the Magnificent [q.v.] that the Knights were finally overthrown after one of the most heroic defences ever known. On December 24, 1522, the island became the seat of a Turkish Pasha, and remained under Ottoman sovereignty until it was captured by Italy during the war of 1912 and finally passed to Italian rule by virtue of the Treaty of Lausanne (July 24, 1923).

(A. S. ATIYA)

In the year 1912, during the war between Turkey and Italy, the Italians occupied the island of Rhodes and the Southern Sporades and held them till 1923 when Turkey (treaty of Lausanne) renounced all claim to Rhodes and the islands, which are now under the sovereignty of Italy, and constitute the "Possedimento delle Isole Italiane dell'Egeo"; the principal islands are 14 in number; we give them here with their historical Turkish names which are really Greek, in brackets (with the exception of Indjirli): Rodi (Rados), Calchi (Karki and Kharki), Calino (Kalimnoz), Caso (Kashūt), Castelrosso (Kastellorizo, Meysis), Coo (Istanköy), Lero (Leros), Lisso (Lipso), Nisiro (Nisiro, Indjirli), Patmo (Patmos), Piscopi (Piskopis, Tilos, Eliyāki), Scarpanto (Kerpe), Simi (Sümbeki), Stampalia (Astropalia).

The extent of the "Possedimento" is 2,697 km. and the total population 130,855 (census of April 21, 1931) of whom 54,818 are in the island of Rhodes. The inhabitants are distributed as regards language and religion as follows: 104,485 Greek Orthodox speaking Greek, 8,276 Muslims speaking Turkish, 4,481 Jews speaking Spanish Hebrew, 8,000 Roman Catholics speaking Italian. The Muslims are in the islands of Rhodes and Coo. Like the rest of the population, the Muslims are exempted from military service; they have elementary schools, a *medrese* in Rhodes, special tribunals at Rhodes and Coo for questions of private law.

Turkish and Muḥammadan monuments. The Turks did not modify very much the topography of Rhodes; at most they did something to intensify an appearance already generally oriental; they turned the churches into mosques and built new ones; the most remarkable are the mosque of Ibrāhīm Pasha (947 = 1540—1541), the mosque of Redjeb Pasha (996 = 1587—1588), the mosque of Murād Re'is (celebrated *re'is* killed in a naval battle off Cypria in 1609), built by Abū Bakr Pasha in 1046 (1636—1637) and repaired by Murābiṭ Hasan Bey in 1212 (1717—1718), the mosque of Sultān Muṣṭafā (1178 = 1764). The mosque of Sultān Sulaimān is modern.

We may also mention the library at Rhodes which contains Arabic, Persian and Turkish MSS., founded as a *wakf* between 1791—1792 and 1799 by the Rhodian Ḥāfiẓ Aḥmad Agha.

The Muslim cemeteries, which lie under the walls of the fortress, go back in part to the siege of 1522; there are many tombs of men of note who died in captivity or exile in Rhodes in the enclosure of the *tekke* of Murād Re'is; among them we may mention: Djānī Girāy Khān (d. 1636), Shāhīn Girāy Khān (killed 1640), Sa'adet Girāy Khān (d. 1695); Šāfi (the pretended son of Ḥusain, Shāh of Persia, d. 1175 = 1755—1756), the poet Hashmet (d. 1182 = 1768—1769), the grand vizier Yūsuf Pasha (killed in 1715), the general 'Abd al-Karīm Pasha (d. 1302 = 1884—1885).

RIBA (A.), lit. increase, as a technical term, usury and interest, and in general any unjustified increase of capital for which no compensation is given. Derivatives from the same root are used in other Semitic languages to describe interest.

1. Transactions with a fixed time limit and payment of interest, as well as speculations of all kinds formed an essential element in the highly developed trading system of Mecca (cf. Lammens, *La Mecque à la veille de l'hégire*, p. 139 sqq., 155 sqq., 213 sq.). Among the details given by the Muslim sources we may believe at least the statement that a debtor who could not repay the capital (money or goods) with the accumulated interest at the time it fell due, was given an extension of time in which to pay, but at the same time the sum due was doubled. This is clearly referred to in two passages in the *Kur'ān* (Sūra iii. 130; xxx. 39) and is in keeping with a still usual practice. As early as Sūra xxx. 39 of the third Meccan period (on the dating cf. Nöldeke-Schwally, *Geschichte des Qorāns*, i.) the *Kur'ān* contrasts *ribā* with the obligation to pay *zakāt* but without directly forbidding it: "Whatever ye give in usury to gain interest from men's substance shall not bear interest with Allāh, but what ye give as *zakāt* in seeking the face of Allāh, these shall gain double". The express prohibition follows in Sūra iii. 130 (Medina, obviously earlier than the following passage): "Believers, devour not the *ribā* with continual doubling; fear God, perhaps it will go well with you". This prohibition had to be intensified in Sūra ii. 275-280 (evidently of the earlier Medinese period, cf. on the following passage): "Those who devour *ribā* shall only rise again as one whom Satan strikes with his touch; this because they say, 'selling is like usury'; but Allāh has permitted selling and forbidden usury. He therefore who receives a warning from his Lord and abstains shall have pardon for what is past and his affair is with Allāh; but they who relapse to usury, are the people of Hell, they shall remain in it for ever. Allāh abolishes usury and makes alms bring interest; Allāh loveth no sinful unbeliever... Believers, fear Allāh and remit the balance of the *ribā* if ye be believers. But if ye do not, be prepared for war from Allāh and his apostle. If ye repent, ye shall receive your capital without doing an injustice or suffering injustice. If any one is in difficulty, let there be a delay till he is able to pay, but it is better for you to remit if ye be wise". To evade the dogmatic difficulty of an eternal punishment for the sin of a believer, the passage in question (already presupposed in Ṭabari) has been interpreted to mean that by relapse is meant the holding lawful and not

the taking of interest; in any case the *Kur'ān* regards *ribā* as a practice of unbelievers and demands as a test of belief that it should be abandoned. It comes up again in Sūra iv. 161 (of the period between the end of the year 3 and the end of the year 5; this also gives a clue to the date of the preceding passage) in a passage which sums up the reproaches levelled against the Jews: "and because they take *ribā*, while it was forbidden them and devour uselessly the substance of the people". The fact that the principal passages against interest belong to the Medina period and that the Jews are reproached with breaking the prohibition, suggests that the Muslim prohibition of *ribā* owes less to conditions in Mecca than to the Prophet's closer acquaintance with Jewish doctrine and practice in Medina. In the later development of the teaching on the subject as we find it in tradition, Jewish influence is in any case undeniable (cf. Juynboll, *Hand-leiding*, p. 286).

2. The traditions give varying answers to the question what forms of business come under the *Kur'ānic* prohibition of *ribā*, none of which can be regarded as authentic. The ignorance of the correct interpretation is emphasised in a tendentious tradition, obviously put into circulation by interested individuals (the tradition is probably older than Lammens, *op. cit.*, p. 214, thinks); according to this view, the principal passage in Sūra ii. is the latest in the whole *Kur'ān*, which the Prophet could not expound before his death. That the rigid prohibition of usury in Muḥammadan law only developed gradually is clear from many traditions. Alongside of the view repeatedly expressed, but also challenged, that *ribā* consists only in (the increase of substance in) a business agreement with a fixed period (*naṣ'ā*, *naḡira*, *dain*) we have the still more distinct statement that there is no *ribā* if the transfer of ownership takes place immediately (*yadān bi-yad*). But even in arrangements with a time limit, a number of traditions presuppose a general ignorance of the later restrictions; for example we are told that in Baṣra under Ziyād gold was sold on credit for silver (this may have an anti-Umayyad bias — cf. below on Mu'āwiya —, but it is illuminating); but at a later date such forms of the traditions against *ribā* were to some extent dropped. What was generally understood in the earliest period as the *ribā* forbidden in the *Kur'ān*, seems only to have been interest on loans (chiefly of money and foodstuffs); anything that goes beyond this is to be regarded as a later development. The reason for such prohibitions is at different times said to be the fear of *ribā* and sometimes we have underlying the recognition that there is no tradition of the Prophet relating to this. This is also expressed in the form that nine-tenths of the permitted is renounced or that *ribā* was conceived as going as far as ten times the capital. The view which later became authoritative is laid down in a group of traditions of which one characteristic example is as follows: "gold for gold, silver for silver, wheat for wheat, barley for barley, dates for dates, salt for salt, the same thing for the same thing, like for like, measure for measure; but if these things are different, sell them as you please if it is (only) done measure for measure". Another common tradition expressly forbids the exchange of different quantities of the same thing but of different quality (cf. below).

Other traditions demand equality of quantity even in the sale of manufactured precious metals. This last case seems to have been especially discussed, and on more than one occasion Mu'āwīya appears as champion of the opposite view and practice (this again has a distinctly anti-Umayyad bias). Particularly conscientious people went even further in their limitation of ribā than the generality and would only exchange wheat for barley in equal quantities. Still stricter was the view that the exchange of even the same quantities of the same thing, especially of precious metals, was ribā. This view must be older than a difference from the usual opinion (e.g. Muslim, *Bāb bai 'al-ta'ām mithlan bi-mithl*), which is based on the secondary interpretation of an already recognised tradition, which obviously only forbade the exchange of different quantities of the same thing but of different quality (cf. above). This same general prohibition of exchange is also given for dates. The question whether one party to an agreement can voluntarily give the other a bonus, is denied for an exchange, but affirmed for a loan. The reduction of the amount of the debt if the loan is voluntarily paid before it falls due, is sometimes approved as the opposite of ribā, sometimes disapproved, sometimes forbidden as being equivalent to ribā; in any case it is clear that the practice existed. On the sale of an animal for an animal on credit, opinion is also not unanimous.

Numerous traditions forbid ribā without defining it more closely; the Prophet is said to have uttered this prohibition at his farewell pilgrimage (scarcely historical). Ribā is one of the gravest sins. Even the least of its many forms is as bad as incest and so on. All who take part in transaction involving ribā are cursed, the guilty are threatened with hell, various kind of punishment are described; in this world also gains from ribā will bring no good. In spite of all this tradition foresees that ribā will prevail.

In connection with ribā tradition mentions various antiquated forms of sale of special kinds, like *muḥābala*, *muḥābara*, *muḥābana* etc., which concern the exchange of different stages in the manufacture or development of the same thing, or of different qualities, and which are forbidden: an exception is made, obviously because of its undeniable practical and social necessity, of what is known as *'arīya* (plur. *'arāyā*), fresh dates on trees intended to be eaten, which it is permitted to exchange in small quantities for dried dates.

3. While the existence of the Qur'anic prohibition of ribā has never been doubted, the difference of opinion that finds expression in tradition regarding the relevant facts is continued in the earliest stage of development of Muḥammadan law. Unanimity prevails regarding the main lines of the limitations to be imposed upon the exchange of goods capable of ribā (*māl ribawī*); it is only permitted if transfer of ownership takes place at once and, so far as goods of the same kind are concerned, only in equal quantities. In the case of a loan it is forbidden to make a condition that a larger quantity shall be returned without regard to the kind of article. Gold and silver are generally regarded as *māl ribawī* (only quite exceptionally are coins of small denomination included). All the greater are the differences of opinion as to what things outside of the precious metals are liable to the ribā ordinances. In isolated cases one

still finds views that show themselves uninfluenced in principle by the authoritative group of traditions (cf. above), e.g. when everything realisable is subjected to the ribā ordinances (Ibn Kaisān) or all business dealings in things of the same kind (Ibn Sirin, Ḥammād) or when everything liable to *zakāt* is considered capable of ribā (Rabī'a b. 'Abd al-Rahmān). Other opinions differ in the treatment of property capable of ribā from that group of traditions, although it is not known what they understand by this; possibly if at an exchange of the same kind of thing not equality of quantity but equality of value in two quantities is demanded (Ḥasan al-Baṣrī) or equality of quantity also in the exchange of different kinds apparently within a limited circle of goods capable of ribā (Sa'īd b. Ḍjubair). The old interpretation that there is no ribā if the transfer of possession takes place at once is ascribed to 'Aṭā' and the jurists of Medina. The views of most authorities however and in particular those which survive later in the law schools assume the literal acceptance of the text of that group of traditions and differ only in its interpretation. Thus there are mentioned as precursors of the later Zāhirī doctrine: Ṭawūs, Masrūk, al-Sha'bī, Qatāda, 'Othmān al-Battī; as precursors of the Ḥanafī view: al-Zuhri, al-Ḥakam, Ḥammād (cf. however above), Sufyān al-Thawrī; as precursors of the earlier view of al-Shāfi'ī: Sa'īd b. al-Musaiyib and others; as precursors of his later view: al-Zuhri (cf. however above) and Yaḥyā b. Sa'īd. On the question whether a loan can be repaid in another kind and what is to be done if defects are revealed in an exchange of *māl ribawī* after it has changed hands, there are old differences of opinion.

4. In the above mentioned group of traditions the following goods in addition to gold and silver are expressly mentioned as bearing the prohibition of ribā at their exchange: wheat, barley, dates and salt (sometimes also raisins, butter and oil). The Zāhirīs, as a result of their refusal on principle to accept analogy (*kiyās*), assume that the prohibition applies only to the six things especially named (the other kinds are rejected as not well attested). The other schools of law, on the other hand, consider the kinds mentioned in tradition only as examples of the variety of things that come under *māl ribawī*, but differ from one another in their lists of these things. According to the Ḥanafīs and Zaidīs (also al-Awzā'ī), gold and silver represent examples of the class of things defined by weight (*maḥṣūn*) and the four other things those sold by measure (*makīl*). The Imāmi teaching is practically the same. According to the Mālikīs and Shāfi'īs, gold and silver represent the class of precious metals and the four other things the class of foodstuffs: the latter, in the Mālikī view, including actual eatables so far as they can be preserved, according to the older view of al-Shāfi'ī, provisions which are sold by weight and measure; according to his later view, which is also that of his school, foodstuffs without any qualification. The teaching of the Ḥanbalīs corresponds to that of the Ḥanafīs; as regards the "four kinds", two further opinions of Aḥmad b. Ḥanbal are handed down which correspond to the two views held by al-Shāfi'ī. In these, wheat and barley are regarded as two different kinds by the Ḥanafīs, the Shāfi'īs and the better known tradition of the Ḥanbalīs (as well as Zāhirīs, Zaidīs and Imāmi's); as one kind

according to the Ḥanbalis (also according to al-Laiṭh b. Sa'd and al-Awzā'i). The Ḥanafis and the Imāmis, in contrast to the other schools, are content, in so far as it is not a question of the exchange of precious metals, with fixing the quantities, and do not demand actual change of ownership during the negotiation (*maḍjilis*). The Ṣāḥiris, in the strict interpretation of the text of one tradition, in every case demand a change of ownership in the fullest sense at once. The sale of fresh dates for dried dates is forbidden by all schools except the Ḥanafis on the authority of one tradition, the barter of *ʿarāyā* on the other hand is not permitted by the Ḥanafis, but regulated by the other schools, without any uniformity: as regards exchange of the same material in different stages of manufacture there are many differences of opinion. As regards the exchange of goods of the same kind which are not *māl ribawī*, the difference of quantity is generally permitted, postponement (*naṣīʾa*, *naṣāʾ*) of the single payment still forbidden by the Ḥanafis and Zaidis but permitted by the other schools (with differences in detail). At the sale of wares, even of those which are *māl ribawī*, for precious metal, the payment at later date (*salam*) and sale on credit (*baʿiʿ al-ʿina*) with postponement of delivery or of payment is permitted. The apparent contradiction of analogy in the *salam*, which forms a type of transaction by itself, has given rise to discussions on principle. The postponement of both sides of the transaction is regarded on the authority of a tradition as entirely forbidden in all agreements regarding sale or exchange.

5. The prohibition of ribā plays a considerable part in the system of Muḥammadan law. The structure of the greater part of the law of contract is explained by the endeavour to enforce prohibition of ribā and *maisir* (i. e. risk; q. v.) to the last detail of the law (Bergsträsser, in *Isl.*, xiv. 79). Ribā in a loan exists not only when one insists upon the repayment of a larger quantity, but if any advantage at all is demanded. Therefore even exchange (*suftadja*) is sometimes actually forbidden (as by the Shāfiʿis) because the vendor, who is regarded as the creditor, reaps the advantage of avoiding cost of transport. This did not prevent the wide spread of this arrangement in the Arabic middle ages and its influence upon European money-changing. But they were always conscious that a direct breach of the prohibition of ribā was a deadly sin. Pious Muslims to this day therefore not infrequently refuse to take bank interest. The importance of the prohibition of ribā on the one hand deeply affecting everyday life and the requirements of commerce on the other have given rise to a number of methods of evasion. Against some of these there is nothing formally to object from the standpoint of the law; they are therefore given in many lawbooks and expressly said to be permitted. The Shāfiʿis, the later Ḥanafis and the Imāmis have recognised such methods of evasion while the Mālikis, the Ḥanbalis and the Zaidis reject them. The recognition of these methods of evasion is not contrary to the strict enforcement of the prohibition in the *fiḥh*. The inner significance of decrees of the divine law naturally cannot be understood by the mind of man. This is shown in the case of ribā in the limitation to certain kinds of goods. The Ṣāḥiris are thus among the most energetic defenders of evasions of the prohibition of ribā. Their line of argument is based

not only on their formal negative rejection of deduction by analogy but also upon their positive estimation of the intention underlying the evasions. One of the oldest transactions of the kind, against which several traditions are already directed, is the double contract of sale (from one of its elements it is called *baʿiʿ al-ʿina*, credit sale *par excellence*): one sells to someone who wants to lend money at interest something against the total sum of capital and interest which are to be due at a fixed date, and at the same time buys the article back for the capital which is at once handed over. This transaction was taken over in mediæval Europe under the name of *mohatra* (from the Ar. *mukhāṭara*; cf. Juynboll, *Handleiding*, p. 289, note 1, and E. Bassi, in *Rivista di storia del diritto italiano*, v., part 2). Another method of evasion consists of handing over to the creditor the use of a thing as interest by a fictitious agreement to sell or to pledge. All these practices are still in use and in spite of the prohibition of ribā money-lending is a flourishing business in most Muslim countries (50% is often regarded as moderate interest).

Bibliography: On the traditions cf. in addition to the references in Wensinck, *A Handbook of Early Muḥammadan Tradition*, s. v. Usury, especially the collection of material in *Kanz al-ʿUmmāl*, ii., N^o. 4623 sqq., 4951 sqq. H.). — On the practice of taking interest cf. Juynboll, *op. cit.*, and the travellers, e.g. Snouck Hurgronje, *Mekka in the latter part of the 19th century*, p. 4 sq.; Polak, *Persien*, i. 345.

(JOSEPH SCHACHT)

RIBĀṬ (A.), a fortified Muḥammadan monastery. Of the various explanations that have been given of this word from the root *rabāṭa*: "to bind, attach", the most reasonable is that which refers to the Ḳurʾān, viii. 62: "Prepare against them (the enemies of Allāh) all that ye possess of strength and places for horses . . ." (*min ribāṭi 'l-kḥail*). The ribāṭ is originally the place where the mounts are assembled and hobbled to

be kept in readiness for an expedition. Ribāṭ also has the closely related meanings of relay of horses for a courier, caravanserai. The word however was early applied to an establishment at once religious and military which seems quite specifically Muḥammadan.

The institution of the ribāṭ is connected with the duty of the holy war [see *ḌIḤĀD*], the defence of the lands of Islām and their extension by force of arms. The Byzantine empire was acquainted with the fortified monastery, like Mandrakion built at Carthage near the sea, mentioned by Procopius: but it seems doubtful if the monks living in it played any military part. The regular or occasional occupants of the ribāṭ are essentially fighters for the faith. The ribāṭ are primarily fortresses, places of concentration of troops at exposed points on the Muḥammadan frontier. Like western castles, they offer a refuge to the inhabitants of the surrounding country in time of danger. They serve as watch-towers from which an alarm can be given to the threatened populace and to the garrisons of the frontier and interior of the country who could support the efforts of the defenders. The structure of the ribāṭ therefore consisted of a fortified surrounding wall with living rooms, magazines of arms and storehouses for provisions and a tower for signalling. This architectural scheme, the development of which will be indicated below, was of course often very summarily treated. The ribāṭ in many cases was reduced to a watch-tower and a little fort like those the Byzantines built on their frontiers. This explains the considerable number of ribāṭs mentioned by the geographers. We are told that in Transoxiana alone there were no less than 10,000 (Ibn Khallikān, transl. de Slane, i. 159, No. 3). The coasts were also amply provided for. There were ribāṭs all along the coast of Palestine and of Africa. The fire-towers, attached to the ribāṭ or isolated, enabled messages, we are told, to be sent in one night from Alexandria to Ceuta. This is clearly an exaggeration. Nevertheless we may note a fairly rapid system of signalling and the mention of Alexandria, the pharos of which seems to have served as a ribāṭ. The Spanish coast also had its ribāṭs, as had the frontier against the Christian kingdoms, especially after the coming of the Almoravids, which saw an intensification of the *djihad*. For Sicily, Ibn Ḥawkal gives some curious information about the ribāṭs near Palermo and we know the little town of Rabato in the island of Gozo in the Maltese archipelago.

Devotion to religion stimulated individuals to multiply their foundations, notably in Ifrikiya in the vicinity of towns like Tripolis and Sfax. It was a work of piety to build a ribāṭ at one's own expense or strengthen its defences. It was equally meritorious to urge men to go there to serve the cause of Islām, to revictual the garrison, lastly and above all to go there oneself. For the coast of Palestine, al-Muḥaddasi tells us of another use of the ribāṭ equally pleasing to Allāh. Their fires were used to signal the approach of Christian vessels bringing Muslim prisoners whose exchange had been arranged. Everyone endeavoured to take part in this according to his means.

The building of the large ribāṭs and of many of the smaller ones was naturally the task of the sovereigns of the country. In Ifrikiya the first was that of Monastir [q.v.] built by the 'Abbāsīd governor Harthama b. A'yān (179 = 795). The

third (ninth) century was the golden age: the Aghlabids all along the eastern coasts multiplied ribāṭs in the strict sense and *maḥras*; this word means a fortified area containing a small garrison or a watch-tower. Monastir retained the pre-eminence which the Prophet himself is said to have foretold for it. In the xiith century the dead were brought from al-Mahdiyya to enjoy the blessing of being buried there. But the ribāṭ of Sūs founded by the Aghlabid Ziyādat Allāh in 206 (821) had assumed considerable importance. We know that Sūs was the port from which the troops embarked for the conquest of Sicily.

Compared with the east coast of Ifrikiya, which was directly threatened by attacks of the Rūm or which was the base for expeditions across the sea, the rest of the Barbary coast was less well supplied. There were however ribāṭs on the coast of the extreme Maghrib, at Nakūr and Arzila to prevent raiding by the Norman pirates, and at Salé to facilitate the war against the Barghawāta [q.v.] heretics.

If the majority of the ribāṭs were official foundations, the service done by the combatants in them does not seem to have been in any way compulsory. The men of the ribāṭ, the *murābiṭūn*, were volunteers, pious individuals who had taken a vow to devote themselves to the defence of Islām. Some may have entered the ribāṭ like a monastery, to end their days in it, but the great majority only stayed in them for longer or shorter periods, and the garrisons were changed completely several times a year. In the ribāṭ of Arzila, this change in the garrison took place with the festival of 'Ashūrā' (10th Muḥarram), the beginning of Ramaḍān and *al-Id al-Kabir*. An important fair was held on the occasion. In case of alarm the garrisons were reinforced by able-bodied men from the country round, summoned by the beating of drums (Palestine, according to al-Muḥaddasi).

Life in the ribāṭ was spent in military exercises and on guard, but also in devotional exercises. The marabouts prepared themselves for martyrdom by long prayers under the direction of a venerated *shaikh*. The traveller Ibn Ḥawkal however reveals a dark side to this edifying picture. Speaking of the ribāṭs of Palermo in the fourth (tenth) century, he tells us that "they were the rendezvous of the bad characters of the country who thus found a means of livelihood outside of regular society and at the expense of the pious and charitable".

The double character — military and religious — of the life of the marabouts found expression in the architecture of the old ribāṭs that have survived. Tunisia has preserved those of Monastir and Sūs. The first is still very imposing but the frequent restorations have complicated the original plan. The second which is simple may be taken as typical. With its high square wall flanked by semi-circular towers at the corners and the middle of the sides, it recalls the Byzantine forts of the country. The only entrance was by one of the salients in the middle of the wall. A staircase went down in the interior into the central court surrounded by covered galleries and very simple cells. The first storey, reached by two staircases, also consisted of cells on three sides of the court. Along the fourth side was a hall with a *mihṛāb*. This was the oratory of the ribāṭ. The *ḫibla* wall was pierced with embrasures. On the level of the

terraces which are above this first storey, is the door of the signal tower, cylindrical in form, which rises from the square base of a salient at one corner and dominates the fortress from a height of about 60 feet. A little dome which also rises above the terraces crowns, as in the mosque of the period, the square area in front of the *mihrāb* in the oratory.

The ribāṭ of Sūs takes us back to the heroic times when the institution had distinctly a warlike character and these frontier posts played a strategic role on the borders of the lands of Islām. It retained this character in the xith—xiith century in the extreme Maghrib where the struggle with the Christians in Spain kept alive the tradition of the *qjihād*. We know that a ribāṭ built on an island in the Lower Senegal was the starting place of the career of the Lamtūna Berbers and gave them the name of Almoravids (*al-murābiṭūn*) under which they became famous in history [see ALMORAVIDS]. The Almohads who succeeded them had also their ribāṭs, two of which at least are worth mentioning. The ribāṭ of Tāzā [q. v.] was fortified in 528 (1138) by ‘Abd al-Mu‘min at the time when he was conducting against the Almoravids a campaign which had all the appearance of a *qjihād*. The Ribāṭ al-Fath, the name of which survives in that of the town of Rabat [q. v.], was, if not the port of embarkation, at least the great camp of concentration for the armies preparing to cross to Spain. The prestige of this Almohad foundation survived the dynasty which built it. Rabat, or rather the adjoining little town of Shālla, also regarded as a ribāṭ, was the necropolis of the Marinid princes, who in being buried there hoped to share in the merit of the warriors of the faith.

In the xvth century to give warning of landings by the Christians on the coast, *maḥras* and signal towers were still being built “to serve as ribāṭs”. Ibn Marzūq, the historiographer of the Marinid Abu ‘l-Ḥasan, who tells of them, says however that these posts were occupied by paid soldiers. They were not true ribāṭs, the garrison of which consisted of volunteers. If however we find down to the xvth century, in the extreme Maghrib, a ribāṭ like that of Asfi playing a military part in the struggle with the Portuguese, in the east, in the lands where the infidels no longer threatened Islām, the institution had changed its character or rather the ascetic discipline and the pious recitations which were the regular practices in the old ribāṭs had entirely taken the place of military exercises. From the vith (xith) century or perhaps even earlier, the development of mysticism and the grouping of the Sūfis into communities gave these barracks a new *raison d’être* by making them monasteries. From Persia, where it originated, this evolution of the ribāṭs rapidly spread through the Muslim world. In the east the ribāṭ merged into the Persian *khānaqā*. Ibn Djubair (ed. Wright and de Goeje, p. 243) refers to a *khānaqā* founded by Sūfis which was also called a ribāṭ, at Rās al-‘Ain to the north of the Syrian desert. When however a writer like Ibn al-Shihna describing Aleppo seems to distinguish the *khānaqās* from the ribāṭs, the difference between them escapes us. It may be supposed that the *khawānīk* were inhabited by permanent residents who spent their whole lives there and that the ribāṭs, as before, received devout men for limited periods, but one cannot assert definitely that this was the distinction. In

any case the four ribāṭs within the city of Aleppo (one attached to a *madrasa* and the mausoleum of its founder with Qur’ān readers and Sūfis) had no longer anything of a military character. It was the same with the two ribāṭs of Mecca mentioned by Ibn Baṭṭūta. In Cairo the only inscription found by Van Berchem in which a ribāṭ is mentioned is that of the convent of Malik Ashraf ‘Ināl (860 = 1455).

In Barbary, which the wave of eastern mysticism had reached in the xith—xiith century, the term ribāṭ was likewise retained but applied to the *sāwīya* [q. v.] in which ascetics gathered round a *shaikh* or his tomb. As a matter of fact Ibn Marzūq in this connection makes a distinction which nevertheless still remains obscure. Speaking of the *sāwīyas* founded by Abu ‘l-Ḥasan, his master, he tells us first that *khānaqā*, a Persian word, has the same meaning as ribāṭ and adds: “In the terminology of the *faḳīrs*, one understands by ribāṭ the act of devoting oneself to the holy war and to guarding [the frontiers]. Among the Sūfis it means on the contrary the place in which a man shuts himself up to worship the divinity”. This last use of the word seems to be the usual one in his time. The Ribāṭ al-‘Ubbād is the group of pious foundations near Tlemcen that have grown up around the tomb of the famous mystic Sidi Bū Madyan. The ribāṭ of Taskedelt to the south west of Oran is dedicated to a saint of the Banū Iznāsen; the ribāṭ of Tāferṭast on the borders of the Wādī Sbū contains the tomb mosque of two Marinid princes and apartments for *ṭulbā* (Qur’ān readers).

With this erroneous use of the old Arabic word we might connect the parallel change undergone by the word *murābiṭ* (marabout). It is applied to a saint, an individual who by his own merits or the mystic initiation which he had received or his relationship with a *wālī* [q. v.] enjoys the veneration of those around him.

In Muslim Spain, the last land of the *qjihād*, we may suppose that the ribāṭs continued to stud the successive frontiers which the “reconquista” imposed on the lands of Islām; but to be certain we must wait until the study of the texts and the enquiry being conducted by F. Hernandez and H. Terrasse into the military architecture of Muslim Spain give us precise details regarding the date of the castles and their object. The evolution in meaning of the word ribāṭ would lead one to think it had ceased to mean a fortress. Among the Arabic authors of Spain and al-Maḳḳarī as among the *faḳīrs* mentioned by Ibn Marzūq, ribāṭ is often used to mean a holy war, generally defensive, and it passed into Spanish in the form *rebato* as J. Oliver Asin has shown with the meaning of “sudden attack executed by a body of horsemen in keeping with Muslim tactics”. If the Arabic term had lost its original meaning, however, another word derived from it was commonly used in a slightly different meaning. Spain saw the *rābiṭas* multiplying and their memory is preserved in place-names in the forms Rápita, Rávita, Rábida. The word *rābiṭa* was also known in Barbary. It meant “a hermitage to which a holy man retired and where he lived surrounded by his disciples and his religious servitors” (cf. *Maḳṣad*, transl. Colin, p. 240 and the article ZĀWIYA). Everything points to its having been the same in the Peninsula. The multiplication of *rābiṭas* in Spain and their possible confusion with ribāṭs are

connected with the great movement of mystic piety which, starting in Persia, had brought about the substitution of monasteries — *khānāqā* in the east, *zāwiya* in Barbary — for the foundations, more military than religious, of the heroic age of Islām.

RIDĀ, an Ottoman biographer of poets. Mehmed Ridā b. Mehmed, called Zehir Mār-zāde, belonged to Adrianople. Of his life we know only that he was for a time *muftī* in Uzun Köprü (near Adrianople) and died in 1082 (1671) in his native city. Besides a collection of poems (*Diwān*) Ridā wrote a *Tedhkirat al-Shu'arā'*, a biographical collection in which he dealt successfully in alphabetical order with the poets who lived in the first half of the xth century A. H., i. e. c. 1591—1640. In the introduction he dealt with eleven sultāns who wrote poetry. The book was completed in 1060 (1640) as the *ta'riḫ* shows. It has been edited by Aḥmad Djewdet Bey (*Tedhkirat-i Ridā*, Stambul 1316, 109 p. 8').

RIDĀ ḲULĪ KHĀN B. MUḤAMMAD HADĪ B. ISMĀ'IL KAMĀL, Persian scholar and man of letters, "l'un des hommes les plus spirituels et les plus aimables que j'aie rencontrés dans aucune partie du monde" (Gobineau). A descendant of the poet Kamāl Khudjandī [q. v.], the grandfather of Ridā Ḳulī, chief of the notables of Čardeh Kelateh (district of Dāmghān), was put to death by the partisans of Karīm Khān Zand against whom he supported the Kādjārs (cf. *Relation de l'ambassade au Kharezm*, transl. Schefer, p. 203). His father became one of the dignitaries of the court of the Kādjārs; in 1215 (1800), while on a pilgrimage to Mashhad, he heard of the birth of a son in Teherān to whom he gave the name of the imām. Becoming an orphan in 1802, Ridā Ḳulī spent

his early years in Fārs; he was brought back from Fārs to Teherān, lived some time with relatives at Barfurush (Māzandarān), then returned to Fārs where he received his education; he then entered the service of the state under the patronage of the governor-general of Fārs. His earliest efforts in poetry were published under the pseudonym of Čākir which he soon changed to that of Hidāyat. In 1829 on the occasion of Fath 'Alī Shāh's stay in Shirāz, he composed a panegyric and other poems which gained him the royal favour; but a serious illness prevented him from leaving Shirāz. In 1838 Muḥammad Shāh showed such esteem for him that he entrusted his son 'Abbās Mirzā's education to him. The political troubles that followed the Shāh's death in 1848 sent Ridā Ḳulī into retirement. In 1851 Nāṣir al-Dīn Shāh recalled him and sent him on an embassy to Khīwa. He was next appointed to the Ministry of Education, became Director of the Royal College (*dār al-funūn*), then fifteen years later, tutor (*lālā-bāshī*) to the crown prince Muẓaffar al-Dīn whom he followed to Tabriz where he spent several years. He returned to Teherān where he died in 1288 (1871).

Of his very numerous works, several are still unpublished, e.g. some treatises on theology and letters (we mention only the *Miftāḥ al-Kunūz*, a commentary on difficult verses in Khāḳānī, and the *Nizād-nāme-yi Salāṭīn-i 'adjam-nizād*, on early Persian dynasties: analysed in *J. R. A. S.*, xviii., p. 198). The bulk of his lyrical poetry (*Diwān*) is also still unpublished; it totals about 30,000 lines. Of his six *maṭnawī*'s (enumerated by himself, *Madjma' al-Fuṣṣahā'*, ii. 582) only the epic entitled *Bektāsh-nāme* (or *Gulistan-i Iram*, lith. Tabriz, 1270 = 1853) is published: it celebrates the tragic loves of the hero and the Persian poetess of Arab origin Rabī'a Kizdārī Balkhī, known as Zain al-'Arab. His other works which are published are mainly of a documentary nature and therefore very important. The *Fihris al-Tawāriḫ* ("Repertory of Chronicles", chronology, lith. in part at Tabriz) was presented to Nāṣir al-Dīn Shāh before the author's departure to Khwārizm (1851); the *Adjmal al-Tawāriḫ* (lith. Tabriz 1283) is a short précis of the history of Persia composed for the crown prince Muẓaffar al-Dīn; the *Rawḍat al-Ṣafā-yi Nāṣirī*, continuation of the *Rawḍat al-Ṣafā* of Mir Khwānd down to 1270 (1853) (Teherān 1270, 3 vols. fol.), is a work of considerable size, based on eastern sources (of which several are still unpublished) and on official documents, most of which are reproduced in full; in addition to the record of political events the work contains much geographical, literary and artistic information. The *Riyād al-'Arifin* ("Gardens of the Initiated"), biographies of mystical poets, with an excellent introduction on Ṣūfism, was prepared for Muḥammad Shāh (not lith. until 1305, Teherān). It is closely connected with the *Madjma' al-Fuṣṣahā'* ("Assembly of eloquent Individuals"), of first importance for the history of Persian poetry (lith. Teherān, 2 vols. fol., 1294); this last work, the author's best, contains after a general introduction on the history of Persian poetry, biographies and select pieces from all the poets (the poet-laureates form the first section); at the end is an autobiography and an anthology of the poems of Hidāyat (ii. p. 581—678; autobiography and a number of the verses reproduced by the author of the *Fārs-nāme-yi Nāṣirī*, ii. 125—

127). The researches necessary for these last two works showed Hidāyat the inadequacy of the dictionaries at his disposal; he intended to remedy this by his *Farhang-i andjuman-ārā-yi Nāsirī* (lith. Teherān 1288) which, preceded by a remarkable introduction, gives the different meanings of each Persian word, with quotations from the classical poets. The work entitled *Madāridj al-Balāgha* (lith. 1331) is a glossary of rhetorical and poetical terms with many examples taken from different poets. Lastly we owe to Hidāyat the first editions of the *Divān* of Manūchāhri (lith. Teherān 1297), of the *Kābūs-nāme* (*ibid.* 1275) and of the *Nafthāt al-Maṣdūr* (history of the fall of the Khwārizm empire) of Muḥammad Zaidari (publ. posthumously, Teherān 1308). Its autobiographical character gives the attractive "Narrative of a Journey to Khwārizm" (*Safar-nāme-yi Khwārizm*, ed. and transl. Schefer, in *P.E.L.O.V.*, Paris 1879) a special place among his works; he undertook this journey in 1851 as ambassador sent to settle the differences between the courts of Teherān and Khiwa. This journal is a valuable document for the history of the khānates and has been utilised by later Persian historians (notably Muḥammad Ḥasan Khān; q. v.); besides valuable historical, archæological and geographical matter, the book, which is written in a simple and natural style, is a contribution to the study of the manners and customs of the period (notably conditions of travel); we find in it pretty pictures of native life and charming landscapes. Several of Hidāyat's descendants have taken a prominent part in literature, politics and administration.

(H. MASSÉ)

RIDĪYA (1236—1240 A.D.), the only woman to succeed to the throne of Dihli during the period of Muslim rule, and, with the exception of Shādjār al-Durr [q. v.] of Egypt, the only female sovereign in the history of Islām.

After the death of his eldest son, İltutmish [q. v.], despite the protests of his advisers, nominated his daughter Ridīya as his successor on the grounds of her fitness to rule. On the death of İltutmish the courtiers, disregarding the late king's wishes, raised one of his sons, Rukn al-Din Firūz, to the throne. The new king wasted his time in riotous living, all real power being in the hands of his mother, Shāh Turkān, whose cruelty disgusted the people and finally led to open revolt. Eventually in 634 (1236), despite the strong Muslim aversion to female rulers, Ridīya was proclaimed queen by the people of Dihli and a certain section of the army. Although the wazīr, Niẓām al-Mulk Muḥammad Djunaidī, refused to acknowledge her she was astute enough to crush all opposition. She appointed Khwādja Muḥaddhib al-Din Ḥusain as her wazīr and placed Malik Saif al-Din in charge of the army with the title of *kutlugh*

khān. Ikhtiyār al-Din Aitagin was made *amir-i ḥādīb*. The Turkish amirs, however, took great exception to the favours shown by the queen to an Abyssinian, Malik Djamāl al-Din Yākūt who held the position of *amir-i ākhur* (Master of the Horse). Eventually the Turkish amirs rose in revolt, put the Abyssinian to death, imprisoned the queen, and placed her half-brother, Bahram Shāh, on the throne (Ramaḍān 636 = April 1240). Malik Ikhtiyār al-Din Alṭūniya, the governor of Bhatinda, in whose custody the deposed queen had been placed by his fellow conspirators, decided to champion her cause. With this object in view he married her and marched on Dihli, but was defeated near Kaithal. On the day following this defeat both he and Ridīya were put to death.

The only original source for her reign is the *Ṭabaḳāt-i Nāsirī* of Minhādj al-Din [see DJUZDĀNĪ], the accounts of all later writers, such as Ibn Baṭṭūta, Firishṭa, Badā'ūnī, and the author of the *Ṭabaḳāt-i Akbarī* being untrustworthy. All that Minhādj al-Din relates is that she treated the *Ḥabashī* with favour, but this was enough to enable the later historians to interpret it as undue fondness on the queen's part. It was only towards the end of her reign that she laid aside her female attire and appeared in public clothed as a man and unveiled. The real cause of her downfall seems to have been the opposition of the Turkish amirs.

RIDWĀN (RUDWĀN) b. TUTUSH, FAKHR AL-MULK (MULUK), a Saldjūk ruler in Ḥalab. Shortly before his death in Ṣafar 488 (Feb. 1095) Tutush b. Alp Arslān [q. v.] ordered his son Ridwān to go to the 'Irāk. The latter set out with a large army; on reaching the vicinity of Hit [q. v.] he heard of his father's death and returned to Ḥalab, where he was recognised by the governor Abu 'l-Kāsim al-Ḥasan b. 'Alī al-Khwārizmī as the successor of Tutush. He then attempted to seize Sarūdj [q. v.] but Suḳmān b. Ortoḳ [q. v.] anticipated him and defended himself so energetically that Ridwān had to withdraw; on the other hand, he succeeded in taking Edessa, the citadel of which he entrusted to the lord of Antākiya, Yāghī Basān b. Muḥammad al-Turkmānī. Soon afterwards he returned to Ḥalab because the emirs who were accompanying him, his step-father Djanāh al-Dawla al-Ḥusain b. Aitegin and Yāghī Basān, quarrelled with one another; the former went to Ḥalab and the latter to Antākiya accompanied by Abu 'l-Kāsim al-Khwārizmī. Ridwān was very soon involved in a war with his brother Duḳāk, who had settled in Ḥalab after the death of Tutush and had been asked by Sawtegin, commandant of the citadel in Damascus, to take this town. He therefore left Ḥalab, evaded the pursuit of the cavalry sent after him by his brother and reached Damascus where he was welcomed and recognised as lord of the city. He was joined by his step-father Tuḡtegin [q. v.] who soon afterwards appeared in Damascus with a number of officers who had served under Tutush. After Duḳāk and Tuḡtegin had established themselves securely, they had Sawtegin put to death. But Ridwān also coveted Damascus. The city however proved to be too strongly defended, so he went to Nābulus and then to Jerusalem which had fallen into the hands of the Fātimids. There also he met with a vigorous re-

sistance; his troops scattered and there was nothing left for him but to return to Ḥalab. Yāghī Basān then went over to Duḳāk and suggested he should besiege Rīdwan in Ḥalab. The latter however appealed to Suḳmān b. Ortoḳ in Sarūdj, who at once hurried to his assistance, and when the two brothers met at Ḳinnasrīn [q. v.], Duḳāk was completely defeated and had to recognise Rīdwan as his overlord (489 = 1096 or 490 = 1097). In order to receive financial and military support from the Fātimids, Rīdwan for four weeks had prayers said for al-Musta'li, the caliph in Egypt; but on the representations of Suḳmān and Yāghī Basān, who had in the meanwhile made peace with him, he again paid homage to the 'Abbasids and asked for forgiveness from the Caliph al-Mustaẓhir in Baghdad. About the same time Djanāḥ al-Dawla left Rīdwan, settled in Ḥimṣ and improved the defences of the town. He then took up a more independent attitude to his overlord Rīdwan than before.

In June 1098 Antākiya was stormed by the Crusaders and the Muslim army of relief, which included Rīdwan, repulsed whereupon Bohemund was recognised as prince of Antākiya. As his nearest neighbour, Rīdwan was soon at war with him. In *Shā'bān* 493 (July 1100), he set out to drive the Franks from the country round Ḥalab but was defeated. He then joined forces with Djanāḥ al-Dawla; but when the Christians withdrew and Rīdwan became jealous of his ally, Djanāḥ al-Dawla returned to Ḥimṣ. Soon afterwards the Christians under Bohemund and Tancred again threatened Aleppo; on the news of the siege of Malatya [q. v.] by a Muslim army [see *DĀNISHMANDIYA*], they suddenly withdrew. Bohemund fell into an ambush and was taken prisoner, Rīdwan and Djanāḥ al-Dawla won several successes, but in the end quarrelled with one another, and a year or two later (495 = 1102 or 496 = 1103), the latter was murdered at the instigation of the Assassins of Ḥalab. In *Shā'bān* 498 (April—May 1105) Tancred, who had succeeded Bohemund as prince of Antākiya and was also count of Edessa, won a brilliant victory over Rīdwan. When Tancred besieged the fortress of Artāḥ, the governor there appealed to Rīdwan for help. The latter appeared at the head of a powerful army and the two forces met near Ḳinnasrīn. On seeing the superiority of the Muslim forces, Tancred wanted to open peace negotiations; Rīdwan for his part was not unwilling to meet him but allowed himself to be persuaded by a subordinate commander to refuse, and when the battle began, the Franks at once took to flight but returned and cut down the Muslims while they were plundering; Tancred then occupied Artāḥ. In 499 (1105—1106) the latter also took the important fortress of Afāmiya (Apamea). An Assassin named Abū Ṭāhir [cf. *ASSASSINS*] who was on good terms with Rīdwan, had disposed of the commandant there, Ḳhalaf b. Mulā'ib. One of his sons fled to Tancred and asked him to expel the supporters of Rīdwan; Tancred who had already received an appeal from the Christians of Afāmiya, laid siege to the town. He withdrew after a time but soon returned and starved the town into surrender.

When Čawali Sakawu, governor of al-Mawṣil, lost the favour of the Saldjūḳ Sultān Muḥammad b. Malikshāh [q. v.] and was replaced by Mawdūd b. Altunteḡin, he gave count Baldwin and Joscelin, who were prisoners there, their liberty on condition

that they paid a ransom, liberated Muslim prisoners and assisted him against his enemies. But when Tancred refused to restore the county of Edessa to Baldwin, hostilities broke out and the latter sought the help of Čawali. After peace had been restored between the Frankish leaders and Edessa was restored to Baldwin, Rīdwan wrote to Tancred and warned him against Čawali, who, he said, had already taken the town of Bālis, and was now threatening Ḥalab whereby he might become dangerous to Christian rule in this region. In Ṣafar 502 (Sept.—Oct. 1108) Čawali, who had joined Baldwin and Joscelin, was defeated at Tell Bāshir [q. v.]. He lost Bālis, and since he could not hold his own against Rīdwan and Mawdūd, he had to make his peace with the sultān. The Christian princes then combined to besiege Tripolis, Ṣaidā and Bairūt. Tancred took the fortresses of al-Aṭḥarib and Zardanā and when the news reached them, the Muslims abandoned Manbij and Bālis also, and Rīdwan had to purchase peace very dearly (504 = 1110—1111). When sultān Muḥammad summoned the princes, his vassals, for a vigorous attack on the Franks under the leadership of Mawdūd, the latter was appealed to for help by Rīdwan, whose lands the Christians were laying waste in revenge for the damage done by him in Syria. Mawdūd came to his assistance but when he appeared before Ḥalab, Rīdwan, who no longer needed him, shut the gates and took no part in the war against the common enemy.

Rīdwan died in the last days of *Djumādā* I 507 (Nov. 1113). As a partisan of the Ismā'ili Assassins he had a bad reputation; he even had two of his brothers, 'Alī Ṭalib and Bahramshāh, assassinated. Ibn al-Aṭhir (x. 349) also says that his manner of life was by no means laudable (*kānat umūr Rīdwan ghair maḥmūda*).

RIFĀ'A BEY AL-ṬAḤṬAWĪ, a famous writer of the last century and one of the principal creators of the modern Arabic "Renaissance". He was born at Taḥta in upper Egypt in 1801. His parents, although of noble descent, were poor. When quite young, he devoted himself to the study of the *Ḳur'ān*; when a young man, he went to al-Azhar where he studied seriously under the direction of Shaikh Ḥassān al-ʿAṭṭār.

On leaving al-Azhar in 1824, he was appointed pay-master of the Egyptian army. At this period the celebrated Muḥammad (Mehermet) 'Alī was ruling Egypt. The latter at the instigation of the French scholar Jomard sent to Paris in 1826 a group of students to learn French and study modern sciences. They were put under charge of Rifā'a. In Paris the latter made the acquaintance

of Oriental scholars like Jaubert, Jomard, Sylvestre de Sacy and Caussin de Perceval. He made rapid progress and soon had a deep knowledge of the French language. From his stay in Paris dates a lively and interesting account entitled *Takhlīṣ al-Ibriz* (Bulāk 1323) in which every line reveals a charming naïveté, and the enthusiasm aroused in this oriental mind by the manifold aspects and lights and shades of French life and culture (cf. Carra de Vaux, *Penseurs*, v. 237 sq.). On his return to Egypt (1832) he was attached as interpreter and professor of French to the school of Medicine directed by Dr. Clot Bey and also entrusted with the editorship of the *Informations égyptiennes* which later became the *Journal Officiel*. In 1833 he was transferred to the School of Artillery and in 1835 appointed Director of the School of Foreign Languages (originally the "Translation Office"). He remained in this post until the accession of Abbās I. Unfortunately this ruler did not continue the brilliant work of his predecessor: the School of Languages was closed and its Director sent — a disgrace barely concealed — to the Sūdān to organise the High School at Khartūm.

On the death of 'Abbās, Rifā'a returned to Egypt. Sa'id Pasha appointed him Director of the Military School, for a very brief period, however, for the School in its turn was closed and Rifā'a found himself unemployed.

In the reign of Ismā'il in 1863, the School was reopened and our author again became Director of the "Translation Office". In 1870, he became editor in chief of the educational review *Rawḍat al-Madāris* (fortnightly) and died in 1873.

Rifā'a Bey was one of the most important Arabic writers of the sixteenth century and his name is closely associated with the brilliant revival of literary and scientific activity in the modern east. An enquiring spirit of unusual intelligence, he left behind him a considerable amount of work in all fields: history, geography, grammar, law, literature, medicine etc.; details will be found in Sarkis, *Dictionnaire bibliographique*, p. 942—947. We may note here only his translations of Télémaque, of Malte-Brun's, *Geography* and the French *Code Civil*.

To appreciate the magnitude of the part he played, it must be remembered that at the dawn of the last century, the Arab world was in a state of semi-torpor and separated from European learning by a dense barrier: it was with difficulty that al-Azhar shed a dim light on the darkness that covered this period.

As a result of his works, his activity and the phalanx of experts and translators which he gave the country, Rifā'a accomplished the miracle of popularising European science, of opening the east to modern ideas, enlightening the minds of his contemporaries, awakening dormant energies and preparing the future.

We can measure the effort if we reflect that he and his pupils translated into Arabic and Turkish nearly 2,000 works.

On the other hand by expanding the framework of the old classical language and by vivifying it and enriching it with a mass of new words, he enabled Arab thought to adapt itself to progress and to extend its light over modern Islām.

(MAURICE CHEMAUL)

AL-RIFĀ'Ī, AḤMAD B. 'ALĪ ABU 'L-'ABBĀS, founder of the Rifā'ī *ṭarīqa*, died 22nd Dju-mādā I, 578 (Sept. 23, 1183) at Umm 'Abida, in the district of Wāsiṭ. The date of his birth is given by some authorities as Muḥarram 500 (Sept. 1106), but others say Radjab 512 (Oct.—Nov. 1118), at Qaryat Ḥasan, a village in the district of Baṣra. These places being in the region called al-Baṭā'ih [q. v.], he has the further *nisba* al-Baṭā'ihī; al-Rifā'ī is usually explained as referring to an ancestor Rifā'a, but by some is supposed to be a tribal name. This ancestor Rifā'a is said to have migrated from Mecca to Seville in Spain in 317, whence Aḥmad's grandfather came to Baṣra in 450. Hence he is also called al-Maghribī.

Ibn Kḥallikān's notice of him is meagre; more is given in Dhahabī's *Ta'rikh al-Islām* (Bodleian MS.), taken from a collection of his *Manāḥib* by Muḥyi 'l-Dīn Aḥmad b. Sulaimān al-Ḥammāmī recited by him to a disciple in 680. This work does not appear in the lists of treatises on the same subject furnished by Abu 'l-Hudā Efendi al-Rāfi' al-Khālidi al-Ṣaiyādī in his works *Tawwīr al-Aḥṣār* (Cairo 1306) and *Kilādat al-Djawāhir* (Bairūt 1301), the latter of which is a copious biography, frequently citing *Tiryaq al-Muḥibbin* by Taqī al-Dīn 'Abd al-Raḥmān b. 'Abd al-Muḥsin al-Wāsiṭī (d. 744; known to Ḥājjdī Khālifa), *Umm al-Barāhīn* by Qasim b. al-Ḥājjdī, *al-Nafḥa al-Miskīya* by 'Izz al-Dīn al-Fārūṭhī (d. 694), and others. Al-Ḥammāmī's statements are cited from one Ya'qūb b. Kurāz, who acted as *mu'adhdhin* for al-Rifā'ī. Great caution is required in the use of such materials.

Whereas according to some accounts he was a posthumous child, the majority date his father's death 519 in Baghdād, when Aḥmad was seven years old. He was then brought up by his maternal uncle Maṣṣūr al-Baṭā'ihī, resident at Nahr Daqlā in the neighbourhood of Baṣra. This Maṣṣūr (of whom there is a notice in Shā'ranī's *Lawāḥih al-Anwār*, i. 178) is represented as the head of a religious community, called by Aḥmad (if he is correctly reported by his grandson, *Kalā'id*, p. 88) al-Rifā'iya; he sent his nephew to Wāsiṭ to study under a Shāfi'ī doctor Abu 'l-Faḍl 'Alī al-Wāsiṭī and a maternal uncle Abū Bakr al-Wāsiṭī. His studies lasted till his 27th year, when he received an *idjāza* from Abu 'l-Faḍl, and the *khirka* from his uncle Maṣṣūr, who bade him establish himself in Umm 'Abida, where (it would seem) his mother's family had property, and where her father Yaḥyā al-Nājjidjārī al-Anṣārī was buried. In the following year (540) Maṣṣūr died and bequeathed the headship of his community (*mash'yakha*) to Aḥmad to the exclusion of his own son.

His activities appears to have been confined to

Umm 'Abida and neighbouring villages, whose names are unknown to the geographers; even Umm 'Abida is not mentioned by Yāqūt, though found in one copy of the *Marāsid al-Iṭīlā'*. This fact renders incredible the huge figures cited by Abu 'l-Hudā for the number of his disciples (*murīdīn*) and even deputies (*khulafā'*), the princely style and the colossal buildings in which he entertained them. Sibṭ ibn al-Jauzi in *Mir'āt al-Zamān* (Chicago, 1907, p. 236) says that one of their *shaiḫs* told him he had seen some 100,000 persons with al-Rifā'ī on a night of Sha'bān. In *Shadjarāt al-Dhahab* the experience is said to have been Sibṭ ibn al-Jauzi's own, though this person was born 581, three years after al-Rifā'ī's death. In *Tanwir al-Absār* (p. 7, 8) his grandfather as well as himself is credited with the assertion.

His followers do not attribute to him any treatises, but Abu 'l-Hudā produces 1. two discourses (*maḍālīs*) delivered by him in 577 (3rd Radjab) and 578 respectively; 2. a whole *diwān* of odes; 3. a collection of prayers (*ad'iya*), devotional exercises (*awrād*), and incantations (*aḥzāb*); 4. a great number of casual utterances, sometimes nearly of the length of sermons, swollen by frequent repetitions. Since in 1, 2 and 4 he claims descent from 'Alī and Fāṭima, and to be the substitute (*nawīb*) for the Prophet on earth, whereas his biographers insist on his humility, and disclaiming such titles as *kuṭb*, *ghawth*, or even *shaiḫh*, the genuineness of these documents is questionable.

In *Shadjarāt al-Dhahab* (iv. 260) it is asserted that the marvellous performances associated with the Rifā'īs, such as sitting in heated ovens, riding lions, etc. (described by Lane, *Modern Egyptians*, i. 305) were unknown to the founder, and introduced after the Mongol invasion; in any case they were no invention of his, since the like are recorded by Tanukhī in the fourth century A.H. The anecdotes produced by Dhahabī (repeated by Subkī, *Ṭabaqāt*, iv. 40) imply a doctrine similar to the Indian *ahimsā*, unwillingness to kill or give pain to living creatures, even lice and locusts. He is also said to have inculcated poverty, abstinence and non-resistance to injury. Thus *Mir'āt al-Zamān* records how he allowed his wife to be-labour him with a poker, though his friends collected 500 dinārs to enable him to divorce her by returning her marriage gift. (The sum mentioned is inconsistent with his supposed poverty).

Inconsistent accounts are given of his relations with his contemporary 'Abd al-Qādir al-Gilānī. In *Bahdjat al-Asrār* it is recorded by apparently faultless *isnāds* on the authority of two nephews of al-Rifā'ī, and a man who visited him at Umm 'Abida in 576 that when 'Abd al-Qādir in Baghdad declared that his foot was on the neck of every saint, al-Rifā'ī was heard to say at Umm 'Abida "and on mine". Hence some make him a disciple of 'Abd al-Qādir. On the other hand, Abu 'l-Hudā's authorities make 'Abd al-Qādir one of those who witnessed in Medina in the year 555 the unique miracle of the Prophet holding out his hand from the tomb for al-Rifā'ī to kiss; further, in the list of his predecessors in the discourse of 578 al-Rifā'ī mentions Maṣṣūr, but not 'Abd al-Qādir. It is probable therefore that the two worked independently.

Details of his family are quoted from the work of al-Fārūthī, grandson of a disciple named 'Umar. According to him, al-Rifā'ī married first Maṣṣūr's

niece Khadīdja; after her death, her sister Rabi'a; after her death Nafisa, daughter of Muḥammad b. al-Qāsimiya. There were many daughters; also three sons, who all died before their father. He was succeeded in the headship of his order by a sister's son, 'Alī b. 'Uthmān.

Bibliography: The sources of this account have been cited above.

(D. S. MARGOLIOUTH)

RIḤĀ, the name of two towns.

1. The Arabs called the Jericho of the Bible Riḥā or Ariḥā (Clermont-Ganneau, in *J.A.*, 1877, i. 498). The town, which was 12 *mīl* E. of Jerusalem, was reckoned sometimes to the *Djund* of Filastīn (Yāqūt, *Mu'djam*, iii. 913, e.g.) and sometimes to the district of al-Balkā' (Ya'qūbī, in *B.G.A.*, vii. 113); sometimes however it was called the capital of the province of Jordan (al-Urdunn) or of Ghawr, the broad low lying valley of the Jordan (Nahr al-Urdunn) from which it was 10 *mīl* distant (Yāqūt, i. 227). As a result of its warm moist climate and the rich irrigation of its fields the country round the town produced a subtropical vegetation; among its products are mentioned, some already known in ancient times, dates and bananas, fragrant flowers, indigo (prepared from the *wasmo* plant), sugar-cane, which yielded the best Ghawr sugar. Not far from the town were the only sulphur mines in Palestine (Abu 'l-Fidā', ed. Re naud, p. 236). There were however many snakes and scorpions there and large numbers of fleas. From the flesh of the snakes called *tiriyākiya* found there was made the antidote called "Jerusalem *tiriyāk*" (Ἰερουσαλὴμ φάρμακον).

In the Kur'ān, Ariḥā is the town of the giants captured by Joshua; there was shown the tomb of Moses and the place where, according to the Christians, their saviour was baptised. The eponymous founder of the town (Ariḥā) was said to have been a grandson of Arphakshad, grandson of Noah. The town was particularly prosperous during the Crusades but then began to decline and was in ruins in the xiith century. The modern Eriḥā in the Wādī el-Kelt occupies the site of the town of the Crusaders; it is about 800 feet below the level of the Mediterranean.

Bibliography: On the ancient city excavated in 1907—1909 by Sellin and again by Garstang (in the N. W. of Eriḥā near 'Ain al-Sultān) and the ancient Hierikūs: E. Sellin and C. Watzinger, *Jericho, die Ergebnisse der Ausgrabungen*, XXII. *Wiss. Veröff. der D.O.G.*, 1913; C. F. Lehmann-Haupt, *Jericho*, in *Klio*, xiv., 1914, p. 264; J. Gildemeister, in *Z.D.P.V.*, viii. 3; Abu 'l-Fidā', ed. Re naud,

p. 48, 236; Guy Le Strange, *Palestine under the Moslems*, London 1890, p. 15, 18, 28—32, 53, 288, 381, 396 sq.

2. A little town in the district of Ḥalab. According to Yāqūt it stood in a wooded, well watered area "on the slopes of the Djabal Lubnān". By this term the Arabs meant not only the Lebanon but also its northern continuation as far as the Orontes (Lammens, *Notes sur le Liban*, ii. 6; *M.F.O.B.*, i., 1906, p. 271). But in the present case the heights to the east of the Orontes are certainly wrongly included in the term. Rihā on the contrary is on the northern edge of the Djabal Banī 'Ulaim (Ibn al-Shihna, Bairūt, p. 102, 130), the modern Djebel Arba'in, a part of the Djebel Rihā or Djebel al-Zāwiye (cf. the map Djebel Rihā or Djebel iz-Zāwiye by Rob. Garrett and F. A. Norris in *Public. of the Princeton Univ. Arch. Exp. to Syria*, div. ii., sect. B, part iii., 1909).

M. Hartmann suggested that the name Rihā was concealed in the name of *ῥῶμα Μαγαταρῆχων* in the district of Apameia in an inscription of Concordia at Aquileia (*C.I.G.*, v. 8732 = *I.G.*, xiv. 2334), and that this corresponds to the Mughāra about 6 miles south of Rihā, while Dussaud (*Topographie de la Syrie*, 204 sq., 212 sq.) wishes to identify it with Rihā itself. Hartmann wrote as follows in support of his view (*Z.D.P.V.*, xxii. 145, note 3): "As in the case of Jericho, the form Arihā may have been current alongside of Rihā; in favour of this is the fact that Yāqūt, ii. 885, expressly protests against the spelling Arihā for the little town in the district of Ḥalab: it should not be written with *alif*, while both forms were usual for the town in the Ghawr". This supposition is certainly correct; for Ibn al-Shihna twice writes Arihā (p. 130 with the variant Rihā) and J. B. L. J. Rousseau (*Liste alphabétique...*, in *Recueil de voyages et de mémoires*, ii., Paris 1825, p. 215a) also knows of Arihā (Erihā) alongside of Rihā as the name of the place and of the *nāhiya* (cf. also the *Sālnāme of Ḥalab* for the year 1286, p. 118). But the identification of Magarataricha with Mughāra or with Rihā cannot however be maintained for the former is already found in the year 472 (1079) in Kamāl al-Dīn (*Zubdat Ḥalab fī Tārīkh Ḥalab*, Paris, Bib. Nat., MS. Arab. N°. 1666, fol. 101r) as "Ma'aratārikh in the district of Kafartāb" (E. Honigmann, in *Syria*, x., 1929, p. 282; xii., 1931, p. 99) and is still found as Ma'rtārikh about 20 miles south of Rihā (du Mesnil du Buisson, in *Syria*, xii. 99 sq., with sketch map).

The identification of Rihā with the *Rugia* or *Chastel Rouge* of the Franks is also untenable; as Dussaud (*Topogr. de la Syrie*, p. 167, 174, 176, 213) rightly points out that this should rather be identified with al-Rūdj of the Arabs.

There is a place noted for its ruins of antiquity called Ruwaiha ("little Rihā") about 8 miles S. E. of Rihā.

Rihā is very frequently mentioned in modern travel literature as it was on the main road from Ḥalab to Hamā (Ritter, *Erdkunde*, xvii. 1502; Dussaud, *Topogr. de la Syrie*, p. 183), over which Nāsiri-Khusraw (before 1047) and Ibn Baṭṭūṭa (1326) travelled in their day. The town is therefore mentioned by Belon du Mans (1548), Pietro Della Valle (1616), Wansleb (1671), Pococke (1737), Drummond (1754), C. Niebuhr (1778),

Seetzen (1806—1807), Burckhardt (1810—1812) and many others.

(E. HONIGMANN)

RİK'Ā. [See ARABIA, i. 387a.]

RİKÂB (A., Turkish pronunciation: *rikiab* and *rekiap*, "stirrup") in Persian and Turkish usage at Muḥammadan courts: "the sovereign himself or his presence, the foot of the throne" (metonymy like those of *khidmet* in Saldjūk usage: *hazret* or *ḥadret*, *khān-i pay* etc.).

In Turkish (Ottoman, Altai, Čaghatai) the stirrup was called *üzengi* (*özeni*), older form *üzengü*, *özengü* (*Kudatghu Bilig*; Baṭṭāl, ed. Kāzān, p. 49). This word passed into certain foreign languages without the initial vowel: Ar. Syr. *sangiyya* and *zangawa* "stirrup, ladder or other means of assistance in mounting a horse" (Freitag, Cuche, Kazimirski, Boethor, Bēlot, Berggren; *sangiyya* is disputed by Dozy); Bulgarian *sengiya* (alongside of *uzengiya* and *yuzengiya*, with a final -ya quite independent of that of the Arabic) "stirrup". In Turkish also there are traces of its use without the initial vowel: Čaghatai *zengü* "ladder, steps" (Pavet de Courteille; cf. the Arabic *sullam* "steps, stirrup, mounting stone"), *zengü kūrīsi* (old Turkish and Persian usage; cf. RİKÂBDĀR). These comparisons show that at first a distinction was not always made between the stirrup and the mounting-stone (Ar. *ḥadjar al-rukūb*, Turk. *binek taş*), Persian from the Ottoman usage *seng-i rikiāb*, as in the *Tārīkh-i Wāṣif*, Bulāk 1246, i. 179). (In spite of these semantic coincidences and correspondences like Turk. *sengin* "rich" for Persian *sengin* "heavy, precious", the resemblance of *seng* and [ü] *sengi* may be only accidental).

The figurative expression *rikiāb-i humāyūn* (Turk. pronunciation: *rikiāb-i hūmāyūn*), or (more rarely) *rikiāb-i shāhāne* or simply *rikiāb* is already found in Persian of the Saldjūkid period applied to the sultān himself or his entourage in the field or

travelling. For example one said that so-and-so was "in the service of the imperial stirrup" (Houtsma, *Recueil... seldjoudides*, iv. 37; iii. 18) or "in the service of the parasol (*çatr*) of the imperial stirrup" (*ibid.*, iv. 7). In modern Persian one says "to be at the stirrup of a prince" for "to be attached to his court" (Kazimirski, *Dialogues*, p. 493 and 482—483).

In Turkish usage the same expressions were applied to:

1. The imperial cavalcade and the procession formed on this occasion. However, in order to avoid confusion with other uses of the word rikāb, there was also used, especially in the reigns of Mahmūd II and 'Abd al-Medjīd, the Turkish word *binîş* which was applied to all public appearances of the sultān, whether on horseback or in a boat (Mouradgēa d'Ohsson, vii. 141, 144; Jouanin and van Gaver, *Turquie*, p. 377 note; Andreossy, *Constantinople et le Bosphore*, p. 33, 494). The prince's procession was also called *mawkib* (*mewkib-i hümāyūn*) (Houtsma, iii. 18; on these words in Ottoman and Egyptian usage, cf. J. Deny, *Sommaire des Archives du Caire*, p. 104 and 564). Cf. also the name of *rikāb solaghī* given to the eight *solak* lieutenants who walked by the sultān's stirrup in the great procession (Mouradgēa d'Ohsson, vii. 25, 317).

2. The audience given by the sultān (*resm-i rikāb* or simply *rikāb*), whether or not he was in procession. The grand vizier himself could only be introduced to the sultān's presence by the latter's formal order and his admission was called *rikāb*. There were ordinary *rikāb* and ceremonial *rikāb* (Mouradgēa d'Ohsson, vii. 133 sqq.). Cf. details of the *bairam rikābī teshrifatī* in *Aṭā Tārīkhī*, i. 23; cf. Zenker, *Dict.*, i. 468; Aḥmad Rāsim, *Tārīkh*, iv. 1014.

3. The service of the sultān or simply his presence (Sękowski, *Collectanea*, Warsaw 1824, ii. 24). The presence was not necessarily immediate. Thus the expression *rikāb-i hümāyūnde* (in the locative) "with the sultān" was used in speaking of the troops (*kapu-kulu*) of the capital ('Abd al-Rahmān Sheref, *Tārīkh*, p. 292) or of the grand vizier in so far as he was endowed with the full powers of the sultān (*M. T. M.*, p. 528). Similarly the words *rikāb-i hümāyūne* (in the dative) were used for petitions (*arzūkhā*) addressed to the sultān (Meninski, *Thesaurus*; "Sulaimān's Canon" or *Naṣīhat-nāme*, p. 151), whence the expression *ma'rūzāt-i rikābiye* applied to these petitions.

It is from this connection that we have the use of the words *rikāb-i hümāyūn* or *rikāb* in the sense of *interim* or *substitute*. When the grand vizier moved from place to place, the government was thought to go with him and there was appointed "to the sovereign a substitute for the grand vizier who was called *rikāb k̄ā'immaḳāmī*" (Bianchi, *Dict.*, 1st ed.; Perry, *A view of the Levant*, London 1743, p. 37). The other chief dignitaries of the Sublime Porte had also their substitutes "of the imperial stirrup".

Rikāb aghalarī or *aghayān-i rikāb-i hümāyūn* or *üzengi aghalarī*. — These names were applied to a certain number of important officers or dignitaries of the palace (from 4 to 11 according to the different sources). They were the *mir-alem* or "standard-bearer", the two *mir-akhur* (*imbrohör*) or "squies", the *ḳapudjular kiahyaşī* or "chief usher" and other dignitaries with different offices

(cf. Luṭfi Pasha, *Āṣef-nāme*, in *Türk. Bibliothek*, xii. 18 and 21 of the Turk. text ed. by Tschudi; Beauvoisins, *Notice sur la Cour du Grand Seigneur*, 1809, p. 54; Mouradgēa d'Ohsson, vii. 14; v. Hammer, *Staatsverf.*, ii. 61, with references to Castellan and 'Ali; esp. *M. T. M.*, p. 526, for the *kānūn* or "usages" regarding the aghas of the stirrup; Feridūn, *Münshēāt*, p. 10, for the *elḳāb* or protocol relating to them). The following is a translation of the passage in the *Āṣef-nāme* which is a comparatively old text (Luṭfi Pasha died in 1539): "The *defierdārs* of the finances have precedence (*taṣaddur*) over the *sandjak beyi* and the *üzengi aghalarī*. The principal (*bash olan*) of these is the agha of the Janissaries, next comes the *mir-alem*, then the *ḳapudju bashī*, after him the *mir-akhur*, then the *çaklırdjī-bashī*, the *çeshnegir-bashī* and the *bölük aghalarī*" (starting with the agha of the Janissaries, we have here then an enumeration of the *üzengi aghalarī*).

Considering the authority of these sources, we must conclude that the variations are the results of changes which actually took place, which leads us to conclude that the tradition of the palace left the sultān a certain freedom in this respect. We know moreover that admission to the rikāb was in general subject to the *istizān* or "approval, pleasure" of the sultān.

The most important function, at least in principle, of the aghas of the stirrup was exercised when the sultān mounted his horse: the grand *mir-akhur* held the inner stirrup (*iç rikāb*), the *bash-ḳapudju-bashī* agha, the outer stirrup (*dış rikāb*); the *mir-alem* held the bridle and the *çeshnegir-bashī* assisted the sultān by holding him under the arm or "under the armpit" (*koltuğa girmek*). The *ḳapudjubashī* or "chamberlains" stood all around and the *akhur khalifesi* (*kalfasī*) held the horse's head (*M. T. M.*, p. 526).

On the functions of the chamberlains, who to the number of 150, headed by the *bash-ḳapudju-bashī*, already mentioned, were in the service of the stirrup, and for other details see Mouradgēa d'Ohsson, vii. 18 and especially *M. T. M.*, *loc. cit.* Their duties were to take to the province important firmāns and to carry out various confidential missions.

Sometimes epithets rhyming in *-āb* were added to the word *rikāb* in the language of the court: e.g. *rikāb-i ḳamertāb* "stirrup shining like the moon" (*Tārīkh-i Wāṣif*, i. 105); cf. also the epithets: *ḳiāmyāb*, *gerdūn ājenāb*, *dewlet-intisāb* (Meninski, *Thesaurus*).

The tribute which the Woiwods of Wallachia and Moldavia sent to the sultān in their own name, supplementary to that (*djīziye*) paid by their subjects, was known as *rikābiye* and *idiye* (Aḥmad Rāsim, i. 380; cf. Saineanu, *Influenta orientala*, Bucarest 1900, i. 249).

Bibliography: Cf. the works quoted in the text. (J. DENY)

RIKĀBDĀR or **RIKĪDĀR**, a Persian derivative from the preceding (Turkish pronunciation *rikāb-dār*, *rekiabdar*, *rekeptar* and *rikiptar*), properly "one put in charge of the stirrup, one who holds the stirrup, when his master mounts" (cf. French *estafier*, Ital. *staffiere*, Russ. *striemiennoy*, English groom of stirrup, words formed from *staffa*, *striemia*, stirrup = French *estrieu*, mod. *étrier*). In fact, remembering that the word rikāb has been given or has assumed a wider meaning [see the article],

rikābdār meant "a kind of squire, groom or riding attendant who had charge of the care and maintenance of harness and saddlery and of everything required for mounting on horseback". The pronunciation with an *i* in the second syllable (*rikibdar* or *rekibdar*) used alike in Egypt (Dozy; Spiro, p. 198) and in Turkey (Moldavian-Wallachian *rechiptar* or *richiptar* in Saineanu, ii. 99) is due to a (Persian) corruption analogous to that found in the words *silīḥdār* for *silāḥdār* and *i'timīd* for *i'timād* (cf. the Turkish translation of the *Burhān-i kātib*, p. 405). In Arabic we find the forms *rikābī* and *ṣāhib al-rikāb*. (Below we leave out of account the use of *rikābdār* in the sense of cup-bearer, derived from *rikāb* "cup" [used for drinking the "stirrup-cup"?]. If this explanation is correct, the two *rikābdār* may very well be the same).

Maḳḳārī mentions a personage who was *ṣāhib al-rikāb* already to the first Umayyad caliph of Spain (138—172 = 756—788; cf. *Analectes*, i. 605, reference given by Dozy). In Egypt at the court of the Fātimids, there were over 2,000 *rikābī* or *ṣibyan al-rikāb al-khāṣṣ*, so called "on account of their costume (*zaiy*)", whose duties were the same as those of the *silāḥdār* and *teberdār* of the time of Kaḳashandī (*Subḥ*, iii. 482).

As to the Persian form *rikābdār*, it must have been in use among the Saldjūks for we have to admit by analogy that it was from them that the Aiyūbids and later the Mamlūks borrowed the term, like many others of the same kind.

In Persia itself, the term *rikābdār* was replaced by its (Turkish) synonym *üzengi* (or *zengü*) *kurtisi* (cf. Chardin, 1711 ed., vi. 112; Père Raph. du Mans, *État de la Perse*, p. 24). According to the *Burhān-i kātib*, the *rikābdār* were replaced by the *djelowdār* (from *djelow*, bridle), but it should be noted that the office of the latter was contemporary with and independent of that of *üzengi kurtisi*.

In Egypt the *rikābdār*s of the Mamlūks, also called *rikābī*, were members of the *rikāb-khāna*, like the other "men of the sword" (*arḥāb al-suyūf*), such as the *sandjaqdār*, *mahmūdār*, *ḥara-ghulām* and *ghulām-mamlūk*. The *rikāb-khāna* (the *khānāt al-surūdī* of the Fātimids) was the depot for harness and in general for all the material required for horses and stables. The heads of this service were called *nihtar* (cf. the Ottoman *mehter* whose duties were different and humbler). The *rikābdār*s were under the command of the *emūr dḡāndār*, "Marshal of the Court" (cf. the *ḡapudḡular kiahyasī* of the Ottoman court). Cf. Kaḳashandī, iv. 12, 20; Ḳhalīl al-Zāhiri, p. 124; Gaudefroy-Demombynes, *Syrie*, p. liii., lix.

The word *rikābdār* is found in the *1001 Nights*, where it is translated "palefrenier" by E. Gauttier, vi. 168 and "groom" by Burton, x. 365, note 2. From the context we might also suggest "riding attendant". Boethor gives (for Syria?) *r-k-bdār* under the French "écuyer (qui enseigne à monter à cheval)" and *r-kkib al-khail* under "groom (celui qui monte à cheval)". The synonymous expression *ṣāhib al-rikāb*, in the sense of "good squire, one who mounts a horse well", is found in the romance of 'Antara. In contemporary Egyptian usage *rikib-dār* or *rakbdār* means "jockey, groom" (Spiro, Habelche). (According to the *Burhān-i kātib* [Turk. transl.], the *rikābdār* of Egypt were replaced by the *sarrāḡī* "saddler" mentioned by Volney and others).

Turkish usage. — In Turkey the office of *rikābdār* must have been taken over directly from the Saldjūks but instead of becoming assimilated to that of humble grooms or *rikābī*, as in Egypt, it became an important dignity at the sultān's court reserved for a single officer. It is in the reign of Orkhan (1326—1360) that we find the first Ottoman *rikābdār*: he was called Koḡia Elyas Agha ('*Aḡa Tārikhi*, i. 94). It was however only under Selim I (1512—1520) that the duties of the *rikābdār* were defined. According to the organisation at this time, the *rikābdār agha* was a *khāṣṣ-odalī*, i. e. he was one of the *khāṣṣ-oda* (and not *odasī*) or "company of the corps (Mouradgea d'Ohsson); chambrée suprême (Castellan); innerste Kammer (v. Hammer)" which was the first of the six groups of officers of the household (*iç* or *enderün*) of the Serail and consisted of the fixed number of 40 officers or pages including in theory the sultān himself. It had been formed by Sultān Selim to guard the relic of the Prophet's mantle (*khirḡa-i se'adet*) brought back after the conquest of Egypt ('*Aḡa*, i. 208; for details of the organisation see *ibid.*, and Mouradgea d'Ohsson, vii. 34 sqq.). The *rikābdār* was the third of these officers in order of precedence (following the *silīḥdār* and the *ḡohadār* and preceding the *dūlbend aghasī*) and an officer passed in this order from one office to another. The four officers just mentioned were the only *khāṣṣ-odalī* who had the right to wear the turban.

According to the usual definition repeated everywhere, the chief duty of the *rikābdār agha* was to hold the sultān's stirrup. It may have been so at first, but none of the documents available show the *rikābdār* performing this duty in practice. Indeed we have seen [cf. RIKĀB] who were the "aghas of the stirrup" entrusted with this duty. Now in spite of his name, the *rikābdār* was not one of these. The Arabic version of the *Aṣaf-nāme* (Bairūt, p. 9, note 7) and the German translation (*Türk. Bibl.*, No. 12 [1910], p. 17, note 1) have therefore confused *rikābdār agha* and *rikāb aghasī*, which has given rise to an erroneous interpretation of the whole passage [cf. the corrected translation in the article RIKĀB].

On the other hand, western writers of the xvth century mention as the third officer of the household (*iḡoghlan*) after the *silīḥdār* and *ḡohadār* a "cup-bearer"! Theodore Spandone (Spandouyn Cantacazin) calls him *sharabdār* (cf. Garzoni, 1573) and Leunclavius *kūpdār* "bearer of the (water-)jar", a name also found in Lonicer (p. 69). This water-carrier was given other names later. D'Ohsson (pl. 158) and the '*Aḡa Tārikhi* (i. 282) speak of a *ḡos-bekī* or "keeper of the ḡoz, probably for the Arabic-Persian *kūṣ(e)* or water-jar". Wearing a *berata*, he carried a ewer (*mashrapa*) of warm water at the end of a stick. V. Hammer calls this official *mataradḡī* or bearer of the gourd (*matara* for *maḡhara*).

The use of warm water is easily explained by the fact that, as an author writing in 1631 tells us, the third gentleman of the sultān's chamber "carried him 'sherbet' to drink, and water to wash with" (De Stochove, *Voyage du Levant*, Brussels 1662, p. 84: Ischioptar, for *rikābdār*?; cf. Baudier who writes: *rechiptar*).

On the other hand, there was an officer whose duty it was to carry a stool (*iskemle*) plated with silver which the sultān used in mounting his horse when he did not prefer the assistance of a mute

who went on his hands and knees on the ground (Castellan, *Mœurs* . . . , iii. 139; 'Aṭā, *loc. cit.*; d'Ohsson, pl. 157). He was the *iskemle aghası* or *iskemledjiler başı*, chosen from among the oldest grooms (*kapudju eskisi*). Wearing a *dolama* and a *keçe*, he rode like the water-carrier on horseback in processions (*rikâb*). Probably through some confusion Castellan calls him *rikâbdâr*, but adds that in his time the *rikâbdâr* was chosen not from among the *khâşş-odalı*, but from the *çawuş* (mistake for *kapudju*?). Nor must we confuse, as Saineanu (*Influența orientala*, ii. 104, s.v. *schemniaga*) does, the *iskemle* (or *iskemni*) *aghası* with the special commissioner of this name who was charged, along with the *sandjak aghası*, to install on the throne (*scann*) the new *hospodars* of Moldavia and Wallachia (cf. *Mélanges Iorga*, 1933, p. 202). There were also *iskemle aghası* similar to those of the sultān in certain provinces ([Rousseau], *Description du pachalik de Bagdad*, Paris 1809, p. 27).

Among the special duties of the *rikâbdâr*, we shall only mention the custody and care of the harness etc. of the sultān (as among the Mamlûks) and his *pabuç* or shoes and *özme* or boots (*Ḳanûn* of Sulaimân or *Naşihat-nâme*, p. 132).

It should be noted that, according to the 'Aṭā *Târîkhi* (i. 208), the services of the *rikâbdâr* like those of the *çohadârs* were only required on gala days (*ciyâm-i resmîye*). This practice is said to have been introduced under Muṣṭafâ III (1757—1774) out of consideration for the age of these concerned for they were generally over 60 and had spent 40 years in the service of the court (*odjak yolu*). According to the same work, these duties were reduced to very little. During the ceremonies (*selâmlik*) of the Prophet's birthday (*mewlid* or *mewlûd*), the two *bairams* and at the *binîsh* or ceremonial appearances of the sultān, the *rikâbdâr* sat opposite the sultān in the imperial barge with the *silihdâr*, *khâşş-oda başı* and the two *çohadârs*.

From all this we may conclude that if there really was a *rikâbdâr* in the time of Orkhan he performed not only the duties of a squire but also those of a "cup-bearer" and we know that in Persian *rikâbdâr* means "cup-bearer". In time, the *rikâbdâr* becoming a more and more important personage, these duties were divided between two special officers: on the one hand, the *köz-beḳçi* and similar officers, and on the other, the *iskemle aghası*.

The *rikâbdâr agha*, like the *çohadârs*, received a daily salary or *ulûfe* of 35 aspers (*aḳçe*) while the *silihdâr* drew 45 (Hezârfenn, MS. A. F. T. of the Bibliothèque Nationale, fol. 18^b). Like the *çohadârs* they had in their service two *lâlas* of the *khâşş-oda*, a *çarâkollukçu*, a *baltaçji* with tasselled caps (*zülüflü*), two *şofalıs*, a *heibedji* and two *yedekçis*. The *rikâbdârs* who did not attain the rank of *silihdâr* were put on the retired list (became *çirak*) with a pension of 60—100,000 piastres. In the absence of the *çohadâr*, the *rikâbdâr* performed the duties of the *silihdâr*. On the quarters in the palace occupied by the *rikâbdâr*, cf. 'Aṭā, i. 312, 20.

The four chief officers of the *khâşş-oda*, including the *rikâbdâr*, were often called by the name — not official, however — of *koltuḳ wezirleri* or "viziers of the armpit" because they had the privilege of touching the sultān, particularly of giving him their hand or taking him by the arm during a walk and they frequently attained the rank of

wezir (Cantemir, *Hist. Emp. Ott.*, Paris 1743, iv. 119—121). The *rikâb aghaları* [cf. RIKÂB] were also *koltuḳ wezirleri*.

The same four officers were also called 'arḡ *aghaları* because they had the right to present ('arḡ) to the sultān any petition which reached them, like the master of petitions (Rycaut, Bk. i, p. 97 of the French transl.; Castellan, iii. 185). According to Aḥmad Râsim (ii. 639), in processions, the *iskemle aghası* had the task of returning to those concerned petitions which were not granted.

The *rikâbdârs* were abolished by Maḥmûd II, probably about the same time as the *köz-beḳçi* (in 1248 = 1832—1833; cf. Luṭfi, iv. 68) and the *silihdâr* (in 1246; cf. Luṭfi, iv. 61); cf. v. Hammer, *Hist.*, xvii. 191.

Bibliography: See the works already quoted above of which the most important is the 'Aṭā *Târîkhi*. See also Aḥmad Râsim, *Târîkhi*, i. 186, 479; ii. 526; Hammer, *Hist.*, vii. 15 for references not used here. (J. DENY)

RISÂLA. [See RASÛL.]

RIYÂDÎ, Ottoman biographer of poets. Mollâ Mehmed, known as Riyâdî, was the son of a certain Muṣṭafâ Efendi of Birge (S.E. of Smyrna) and was born in 980 (1572). He was first of all employed as a *miiderris*, later became *kaḳdî* of Aleppo and died on 9th Şafar 1054 (April 17, 1644) (according to J. v. Hammer, *G. O. R.*, vi. 44 in Cairo). He was known as *al-Aşanım*, the "dumb". His chief work is his *Riyâd al-Shu'arâ*, a biographical dictionary of poets containing 384 names. It is known to have been finished by 1018 (1609). He also wrote an abbreviated translation into Turkish of the *Wafayât al-A'yân* of Ibn Khallikân. The lexicon has not yet been published but is accessible in a number of manuscripts, a list of which is given by F. Babinger, *G. O. W.*, p. 178 (add: Stambul, Lâlâ Ismâ'il, N^o. 314). On a German translation of an extract from it by V. v. Rosenzweig-Schwannau, cf. *Z. D. M. G.*, xx. (1866), p. 439, N^o. 3 (filling 20 pages).

Bibliography: Rîdâ, *Tedhkire*, p. 38 sq.; *Sidjill-i 'othmânî*, ii. 425; J. v. Hammer, *Geschichte der osmanischen Dichtkunst*, iii. 367; Brûsalî Mehmed Tâhir, 'Othmânî Mî'ellîfleri, ii. 183 sq. (with references); F. Babinger, *G. O. W.*, p. 177 sq. (FRANZ BABINGER)

RIYÂH, an Arab tribe, the most powerful of those that, regarding themselves as descended from Hilâl [q. v.], left Upper Egypt and invaded Barbary in the middle of the vth (xth) century. Their chief at that time was Münis b. Yahyâ of the family of Mirdâs. The Zirid emir al-Mu'izz [q. v.], who did not foresee the disastrous consequences of the entry of the Arabs into Ifriḳiya, tried to come to an arrangement with him and to win over the Riyâh. The latter were the first to lay his country waste. But thanks to the protection of the chiefs of the Riyâh, to whom he had married his daughters, al-Mu'izz himself succeeded in escaping from Ḳairawân and reaching al-Mahdiya [q. v.].

At the first partition of Ifriḳiya which followed the invasion, the Riyâh were naturally the best served. They obtained the greater part of the plains, which the Berbers had abandoned to seek shelter among the mountains; they had thrust their relatives, the Athbidj, towards the east. They held Bedja which the caliph in Cairo had allotted to them in anticipation. The people of Gabes took

the oath of loyalty to Mūnis. "It was", says Ibn Khaldūn, "the first real conquest of the Arabs". The *Djāmi*^c, a family related to the Riyāḥ, made Gabes a regular little capital, which they adorned with their buildings. Lastly, a chief of the main tribe, Muḥriz b. Ziyād, made himself a fortress in al-Mu'allaka (a Roman circus?), among the ruins of Carthage. The powerful lords of al-Mu'allaka, however, supported the policy of the Zirids of al-Mahdiyya, and joined them in their resistance to the Almohads.

This resistance did not long impede the expeditions sent by the Maghribis against Ifrikiya in anarchy. Defeated by 'Abd al-Mu'min in 546, 555, 583 (1152, 1160 and 1187), the Arabs were ordered to supply contingents for the holy war in Spain. 'Abd al-Mu'min, leaving a section of the Riyāḥ in Ifrikiya under command of 'Asākīr b. Sultān, took the others to the Maghrib with their chief, 'Asākīr's brother Mas'ūd, known as *al-bulṭ* ("the axe"; cf. Dozy, *Supplément*, i. 111). He settled them in the Moroccan plains to the north of Bū Regreg. This control was little in keeping with the traditions of the Riyāḥ; Mas'ūd fled to Ifrikiya and there gave his support to the Banū Ghāniya [q. v.] who were trying to revive for their own advantage the Almoravid power.

We know how the trouble stirred up by the Banū Ghāniya led to the Almohad caliph's appointing a governor of Ifrikiya invested with very extensive powers, Abū Muḥammad of the Ḥafṣid [q. v.] family. This governor naturally attacked the Riyāḥ and in order to be rid of them, encouraged the settlement in the country of the Sulaim Arabs hitherto quartered in Tripolitania. Under the pressure of the Sulaim, the Riyāḥ, the principal family of whom at this time was the Dawāwida, migrated to the plains of Constantine where they were henceforth to remain.

In their new home the position of the Riyāḥ remained a very strong one. They had rights over all the centre of the modern department of Constantine, approximately from the region of Guelma to that of Bougie. In the Zāb [q. v.] they were on terms — which were sometimes friendly but more often hostile — with the Banū Moznī of Biskra, who ruled this Ḥafṣid province. This is how the Banū Moznī had to fight against that curious movement, at once religious and social, stirred up by the Riyāḥid marabout Sa'ada. The Dawāwida, and in particular their most powerful family, the Awlād Muḥammad, held winter lands and enjoyed revenues paid by the people of the *ḥṣūr* in the Sahara region of the Wādī Righ.

During the whole of the xivth century, the two chief branches of the main tribe, the Awlād Muḥammad and the Awlād Sibā', were actively engaged in the politics of the Ḥafṣid princes and the 'Abd al-Wādids of Tlemcen, in the enterprises of the pretenders who threatened their dynasties. The power of the Riyāḥ of central Barbary lasted till the xvth and xviith centuries. According to Bernardino of Mendoza, they had in 1536 10,000 horsemen and large numbers of foot. The xviiith century saw them assisting the Turkish Bey of Constantine, to whom they were connected by marriage and the independent sultāns of Tuggurt. In 1844, Carette and Warnier noted that the name Dawāwida was still synonymous with "noble Arabs".

Another group of the Riyāḥ played a notable part in the history of the Zenāta states. In the

extreme Maghrib, bodies of them transported by the Almohads to the plains of the coast faithfully served this dynasty, by trying to check the advance of the Marinids [q. v.]. Defeated near the Wādī Sbū in 614 (1217), the Riyāḥ were mercilessly punished by the victorious Marinids. Decimated and weakened, and driven northwards, they submitted to the humiliation of paying an annual tribute. Their name no longer figures on the map of modern Morocco except at a place near the road from al-Ḳsār to Tangiers.

Finally, at the other end of Barbary, in their first home, the name survives in the nomenclature of the tribes. The Tunisian caidate of the Riyāḥ lies between Tebursuk and the hills which surround the Gulf of Tunis.

(GEORGES MARÇAIS)

RIYĀL (A.), *riyāl firandīr*, from the Spanish real (de plata), the name given in the Muslim world to the large European silver coins which formed the international currencies of the xviith and xviiith century; the most important was the Spanish dollar (peso; properly 8 reals) but the name was also given to the Dutch, German and Austrian dollar, the French écu and Italian scudo. In the late xviiith and xixth century the Austrian Maria Theresia dollar took the place of all its rivals and it still circulates to the present day around the Red Sea. The name *riyāl* survived with it.

In the currencies of the modern Muslim kingdoms of the 'Irāk and the Ḥidjāz *riyāl* is the name of the largest silver coin, the standard being that of the Maria Theresia dollar. A *riyāl* was also issued by the sultān of Zanzibar in 1880. In modern Persia *riyāl* is a money of account: originally (1930) 20 *riyāls* = £ 1 stg. but by the system finally adopted in 1933, 100 *dīnārs* = 1 *riyāl* = 1 *pahlavi* = £ 1 stg. (J. ALLAN)

RIYALA or **RIYALA BEY**, abbreviation of *riyala-i ḥimāyīn kapudānī* "captain of the imperial [galley-] royal" from the Italian *riale* (secondary form from *reale*, abbrev. from *galea reale*, "the royal galley"), a general officer of the Ottoman navy who commanded the galley of the same name, later "rear-admiral". There was also a popular pronunciation *iryala* with the prosthetic *i* frequent in Turkish in loan-words with an initial *r* (cf. Hindoglu, p. 113 under "contre-amiral" and p. 457 under "réale"; the form *iryala* is found as early as Ewliyā Čelebi, viii. 466, 11). The Italian pronunciation *riale* is attested in the *Itinéraire*

de Jérôme Maurand d'Antibes à Constantinople (1544), ed. by Léon Dorez, Paris 1901 (we also find there exceptionally *rialle*, *reale* and *realle*). For the pronunciation we may compare the Turkish *riyala* with the Turkish *riyal*, Ar. *riyāl*, for the Spanish *real* (*del plata*), name of a coin [cf. RİYĀL]; cf. the French "gros royal", Turk. *grush*, *krush*, *gurush*, mod. *kurus*, "piastre, formerly: écu" [cf. GHRUSH]. Here also we find the prosthetic form *iryal* (Hindoglu, p. 200, s. v. "écu"; Aucher gives *riyal*, under "réal"). In the west, the Turkish word *riyala* was sometimes transcribed *reala*, no doubt regarded as more correct (Herbette, *Une Ambassade turque sous le Directoire*, Paris 1902, p. 238). We cannot see whence comes the spelling with an aspirated *h* (*rihala*), even in Arabic orthography, which we find in Garcin de Tassy, *Mémoire sur les noms propres... mus.*, p. 87 and in Jal under *réala* (we have perhaps a graphical reaction against the hiatus).

The rank of *riyala*, as well as those of *kapudana* and *patrona* to be discussed later, was at first known among the Turks only as applied to officers of the navies of Christendom (cf. e.g. Ewliya Çelebi and the Ottoman historians like Na'imā and others). These ranks came into use among the Turkish sailors, at first unofficially, in the time of Sultān Mehmed IV, 1648—1687 (cf. below in connection with *patrona*). D'Ohsson, undoubtedly by confusion, says that they were used in the time of Mehmed II (1451—1481). We do not however find these titles of foreign origin in the *Tuhfet ül-Kibār* of Hādīdjī Khalīfa (1656) nor in Hezārfenn (d. 1691). It was, it appears, under 'Abd al-Hamid I (1774—1789) that they were officially adopted (Mehmed Shükri, *Esfār-i bahriye-i 'othmāniye* [1306 = 1890], i. 145).

We are well informed about the hierarchy of the naval high command at this period, thanks to the *Teshrifāt-i kadime*, a work of Şahhāflar-Şeikhhi-zāde Es'ad Mehmed Efendi (d. 1848). On p. 102 sqq. we have a list of the old establishment which combined the non sea-going officers of which we shall be content to give a list here, and the sea-going officers who will be dealt with in more detail because the *riyala* was one of them and bore like them a name taken from the Venetians.

a. General officers of the Admiralty (*tersâne-i 'amire*).

(All three seem to have had, but perhaps only from the beginning of the sixteenth century, the right to the title of *pasha*).

1. The *kapudan-pasha* [q. v.] having the rank of *wezir* (*dewletlū*). He was the Capitan del Mar (*kapudan-ı deryā*) or, as was also said, the *kapudan* par excellence. The name *kapudan* from the Venetian *capitan(o)* and its modernised form, probably under the influence of English, *kapitan*, was further applied to any commander of a ship, small or large, foreign or Turkish. (The vowel *u* in the second syllable is due to the influence of the neighbouring labial *p* and Trévoux's Dictionary gives the intermediate form "capoutan" under *capitan-bacha*; cf. also *Relation des 2 rebellions arrivées à Constantinople en 1730 et 1731*, The Hague 1737, p. 23).

2. *Tersâne-i 'amire emini agha* (*se'adellū*) "Intendant de l'Arsenal" (d'Ohsson), Germ. "Intendant des Arsenals" (Hammer), Engl. "Intendant of the Marine" (Perry). He took the place of the Grand

Admiral in his absence. From 1246 onwards: *müdir*.

3. *Tersâne-i 'amire ketkhüdāsī* (*kiahyaşī*) *agha* "Intendant des galères", "Lieutenant of the Arsenal", "Sachwalter des Arsenals". He was particularly concerned with the police of the Admiralty.

b. Admirals with the title of *bey*.

(Except the 4th, these officers were sea-going admirals and took the name, of Venetian origin, of the vessels they commanded. The name might have the addition of *hümāyūn* "imperial" in a Persian construction whence the official barbarisms: *bashtarda-i hümāyūn*, *kapudana-i hümāyūn*, etc. The full titles in theory were: *bashtarda-i hümāyūn kapudanī*, *kapudana-i hümāyūn kapudanī* etc.

1. *Bashtarda*, *bashtarda*, *bashtarda-i hümāyūn* — Ital. *bastarda*, Fr. *bastarde* or *bâtardelle*. This was not the largest unit of the fleet. In Turkish as in Venetian usage the *bastarda* was a galley larger than the *galea sensile* (Turk. *kađırğa* or *çektiri*), but smaller than the *galeazza* or *gallias* (Turk. *mauna*) and had a very rounded poop "like a water-melon" (*karpus kılılı*). Among the Turks it contained 26—36 *oturak* or benches of 5—7 rowers. The one which had the *Kapudan Pasha* on board was called (*kapudan-*) *pasha bashtardasī* and had 26—36 *oturak*. It was distinguished by the three lanterns (*fener*) attached to the poop in addition to that on the main mast (*Tuhf.*, fol. 69; *Djewdet Pasha Tārīkh-i*, 1309, p. 131). As it flew the flag of the Grand Admiral, it was sometimes (Meninski, *Thesaurus*, i. 663; Barbier de Meynard) called "Captain" but we shall see that among the Turks this name was given to another vessel. Chance has willed it that the first syllable in the word *bashtarda* means in Turkish "head, chief" but it is difficult to say that the Ottomans gave first place to this ship simply as a result of a popular etymology. The disappearance of the ship propelled by oars resulted in the abolition of the *bashtarda*. Officially disused in 1764, according to d'Ohsson, it was still used from time to time on certain ceremonial occasions. The sailing-ship (*kalyun*, "galleon") which became the flagship of the *kapudan-pasha*, was commanded by the "Flag-Captain" who, according to d'Ohsson, was called in Turkish *süvari kapudanī* "captain of the ship-commanders" and, according to von Hammer (*Staatsverf.*, ii. 493), *sandjak kapudanī*, Germ. "Flaggenkapitän", cf. Engl. "flag captain". Es'ad Mehmed Efendi calls this officer, probably by an archaism, *bashtarda-i hümāyūn-i pasha* "(commander of) the imperial *bashtarda* of the (*kapudan*) *pasha*".

2. *Kapudana bey*. *Kapudana* comes from the Venetian (*galea* or *nave*) *capitana* "galley or ship carrying the leader of a naval expedition, flagship" (Jal). In France it was called "la capitaine" or "capitainesse" but these terms disappeared in 1669 with the office of general of the galleys, and in the French navy pride of place was given to the *Réale* [see below]. On the *kapudana* which took part in the naval battle of Çeshme (1770) cf. Jaubert, *Grammaire*, appendice, p. 3. *Kapudana* and *kapudan* have often been confused (Hammer, *Staatsverf.*, ii. 291; Blochet, *Voyage de Carlier de Pinon*, p. 128; Douin, *Navarin*, p. 250, 276, 295, 311). We find the full title of *kapudana-i hümāyūn kapudanī*, e.g. in a letter from Mehmed 'Alī Pasha (of Egypt) to the grand vizier of the

29th Ramaḍān 1231 (July 1, 1821), register, N^o. 4, p. 71.

3. *Patrona bey*. Patrona comes from the Venetian (galea or nave) patrona or padrona, Fr. la patronne "galley carrying the lieutenant-general or the next in command to the chief of the squadron" (Jal). The earliest mention of an officer of this rank known to us is connected with the years 1676—1685 (cf. *Sidjill-i ʿothmānī*, i. 112, *infra*). Patrona K̲halil, a janissary, leader of the rebels who deposed Aḥmad III in 1730, owed his epithet to the fact that he had been *lewend* on board the *Patrona* (*Relation des 2 rebellions*, p. 8; Engl. transl. in Charles Perry, *A View of the Levant*, London 1743, p. 64). — We also find the forms applied, it is true, to Christian ships: *patorna*, *patorona*, *batorna*, and even *botorna* (Ewliyā Ćelebi, viii. 579, 12; i. 104, 7; viii. 447, *infra*; p. 446, 10; Hasan Agha, *Djāvāhīr al-Tawārikh*, MS. Bibl. Paris, S. T. 506, fol. 160^v—161). All these pronunciations show that the word was already well known, but was finding difficulty in being acclimatised in a correct form.

4. *Liman reʿisi* "captain (admiral) of the port" of Constantinople, Germ. "Kapitän des Hafens". He was also commander of the mid-shipmen (*mandeġġi*).

5. *Riyala bey*. Riyala comes from the Venetian (galea or nave) reale "galley which carried the king or princes" (the same name was often also applied as an epithet to vessels belonging to the king, i. e. to the state, in contrast to privately owned ships). For the lexicology of this borrowing from the Italian see the beginning of the article.

At the battle of Lepanto, Don John of Austria, Captain of the League, sailed in a Reale. A Patrona Reale went astern of the Reale of the Prince and of the Capitana of the "General Capitan dell' Armata" of Venice. Except for these two ships, none of the 202 vessels of the allies was given the name of Reale (Contarini, *Historia delle cose . . . della guerra mossa da Selim Ottomano a' Veneziani*, Venice 1572, fol. 36^v *sqq.*). In France the Reale also went in front of the Patrone and was the first ship of the navy, intended to carry the king, princes, the admiral of France or in their absence the general of the galleys (Jal). At the conquest of Cyprus, in 1570, Contarini (Venice 1595) gives for 185 Christian ships: 18 *capitana*, 7 *padrona* and 1 *bastardella* (no Reale); for the 276 Turkish ships: 1 *real* (sic) and 29 *capitana* (these terms do not correspond exactly to those of Turkish usage of that time).

It is not explained how the title of Reale came to descend among the Turks until it was applied to the ship of the admiral of lowest rank. We may suppose that they were misled by the second meaning of the word Reale [cf. above] or that they confused him with the English "rear-admiral".

Marsigli (*Stato Militare* . . ., 1732, i. 146) mentions the Turkish "commandante nella Reale" as having a higher rank than the *gardyan bashī* who was in turn superior to the captain of an ordinary galley. According to Esʿad Efendi, the *riyale* came before the *kaḫyunlar kiatibi*.

All the officers here mentioned from the *kapudan paṣha* to the *riyala*, were *sāhib deinek*, i. e. they had the right to carry, in imitation of their Venetian colleagues, a commander's baton or cane, *deinek*, also called *şadeḫkāri ʿaṣā* (Esʿad Efendi, p. 109, 7) because it was encrusted with mother of pearl

of different colours [cf. below]. It was what the Venetians called the *giannetta* or *cana* (*canna*), from *canna d'India*, "Indian cane", often taken in the sense of "bamboo" from which we also have the English word "cane". They alone wore small turbans and fur-trimmed robes (cf. d'Ohsson, pl. 228).

When under ʿAbd al-Ḥamid I [q. v.] or later under his successor Selim III, the naval hierarchy was organised and to some extent modernised, three grades of admiral were instituted (independent of the *kapudan paṣha*, who was the Grand Admiral or "amiralissimo"). They were:

1. the *kapudana bey* "Admiral". Mehmed Shukri regards his rank as equivalent to the more modern one of *şūrā-i bahriye reʿisi* "president of the Higher Council of the Navy". He had a fixed monthly salary of 4,500 piastres (1 piastre = 3 frs.) and in addition received pay for 1,000 men (on which he was liable to make various grants) but with the obligation to give to the *kapudan-paṣha* spices or *djāʿize* to the value of 4,000 piastres. He carried a green cane and had the right to have a pennon below the flag on the main mast (that of the *kapudan-paṣha* was above).

2. *Patrona bey* "vice-admiral" (Mehmed Shukri), modern Turkish *vis amiral* but we also find the French equivalent of "guidon" (Sāmi Bey: Tinghir-Sinapien). Salary: 3,500 piastres. Pay of 800 men. *Djāʿize* to the *kapudan-paṣha* of 3,000 piastres. Blue cane. Flag on the fore-mast.

3. *Riyala bey* "rear-admiral" (Mehmed Shukri). Salary: 3,000 piastres. Pay of 700 men. *Djāʿize* to the *kapudan-paṣha*: 2,500 piastres. Blue cane. Flag on the mizen-mast.

It may be noted that in theory there was only one officer of each of these ranks at one time.

All three took part in the battle of Navarino in 1827 (Douin, *Navarin*, p. 250 and *passim*). They were under the command of Tāhir Paṣha who had the rank of *mirmirān*. He was himself patrona but this does not mean duplicating the office of the patrona who was subordinate to him because the commanders-in-chief of the fleet (*serʿ-asker* or *bash-bogh*) were chosen without regard to rank. Hızır-Elyas (*Enderūn Tārihi*, p. 481) mentions a *liman reʿisi* with the rank of *patrona* in 1826.

The flag-commander of the *kapudan-paṣha* retained his functions but seems to have occupied a position on the edge of the hierarchy which the presence of the Grand Admiral on board sometimes made unenviable (v. Hammer, *Staatsverf.*, ii. 293).

We do not know at what period these ranks were replaced by the more modern terms of *müşir*, *feriḫ* and *liwā*. The equations of rank varied considerably. The *riyala* is regarded as *mīr alay*, *mirmirān*, *liwā*, *feriḫ* and even *birindji ferik*. It is probable that it was necessary to choose a grade between these. At Sebastopol in 1854, the Turkish fleet was commanded by a *patrona*, Aḥmad Paṣha (cf. Aḥmad Rāsim, *Tārikh*, iv. 2015).

In Egypt under the Khedives there was for a time a *riyala paṣha* in command of the fleet.

Bibliography: Only d'Ohsson gives definite information about the officers mentioned above. Bk. viii. of vol. vii. (p. 420—438) (*Tableau de l'Empire Othoman*), devoted to the Navy will be read with interest. Cf. also Ubicini, *Lettres sur la Turquie*, second ed., Paris 1853, i. 484

(important); Jouannin, *Turquie*, p. 436. — A good history of the Turkish navy has still to be written. The archives of the Arsenal of Kāsim Pasha in Istanbul would probably supply valuable information to any one who has the courage to undertake the task. (J. DENY)

ROKAIYA, daughter of Muḥammad. That he had four daughters by Khadīja is repeated by all authorities, but there is no agreement regarding their order, which clearly shows that they aroused little interest in the early period. It is further suspicious that practically the same story is told of two of them, Rokaiya and Umm Kulthūm. They are both said to have married sons of Muḥammad's uncle Abū Lahab [q. v.] but were forced by their father to divorce them when Muḥammad began his career as a prophet. Still more suspicious is the circumstance that it is told of both that the marriages had not been completed when the divorces took place (*lam yakun dakhala bihā*) although some time must have passed before there was a breach between Abū Lahab and his nephew. If we wish to save the tradition, we must assume that the sisters, like 'Ā'isha at a later date, were betrothed to Abū Lahab's sons and that the divorce took place before the wedding was carried through. It is however more probable that this story is an invention in order to keep the holy family pure from any contamination by relatives of the Prophet's arch-enemy [see also UMM KULTHUM], but the difficulties which this involved were not clearly seen. After the divorce the fair Rokaiya was married by 'Uthmān b. 'Affān and went with him and other Muslims to Abyssinia, from which they returned after a time. They then went with the Prophet and other Muslims to Madina. But when Muḥammad was preparing for his raiding expedition to Badr, Rokaiya fell ill and died before her father returned home victorious. After several miscarriages she presented 'Uthmān with a son who however lost his life as the result of an accident (a cock pecked him on the face).

RONDA (Ar. RUNDĀ), ethn. al-Rundi, a town in the south of Spain to the north of Algeciras and west of Malaga, 2,400 feet above sea-level in the centre of a vast mountainous amphitheatre at the edge of a rocky plateau which ends in precipitous walls on the western side and is cut in two by the great natural cleft of the Tajo 500 feet in depth, at the bottom of which runs the torrent here known as Guadalevín (*Wādī al-Laban*) and later known as Guadiaro (*Wādī Aro*). Its peculiar position makes it an almost impregnable natural fortress. At the present day the town is the capital of a *partido judicial* of the province of Malaga; it has a population of nearly 21,000 souls.

The Muslim town of Ronda, which succeeded the ancient Roman and Visigothic Arunda, was from the viith to the xvth centuries always reckoned one of the most important strongholds of Andalusia. Under the Umayyads [q. v.] it was the capital of the *kūra* of Tākoronnā [q. v.]. A number of descriptions of it, unfortunately very brief, have been preserved by the Arab geographers; al-Idrisi

however does not mention it. We still see there several remains of the Muslim period, such as a remarkable gate in the suburb of San Francisco. The cathedral of Santa Maria La Mayor has taken the place of the great mosque; the ancient citadel or Alcazaba of the Naṣrid period was destroyed in 1808.

The principal fortress of the district of Tākoronnā was for a long period Bobastro [q. v.] which was the headquarters of the rebel 'Omar b. Ḥafṣūn [q. v.]. On the fall of the Umayyad caliphate of Spain, Ronda became the capital of a little independent state in the hands of the Berber Banū Ifrān; among these rulers were Abū Nūr Hilāl b. Abī Kurra b. Dūnās who was proclaimed in 431 (1039) and died in 449 (1058) after having been the prisoner of his redoubtable neighbour, the king of Seville, al-Mu'taḍid [q. v.] Ibn 'Abbād, and his son Abū Naṣr Fatūh, who after having held out for some months at the capital of his principality was killed at the instigation of the 'Abbādid ruler, who annexed his state in 450 (1059). Ronda then became the residence of a prince of Seville until a son of al-Mu'tamid [q. v.], al-Rāḍī, had to surrender it to the Almoravid forces under Garrūr in 1091.

Ronda played an unimportant part under the Almoravids and Almohads. In the Naṣrid period [q. v.] it was for some time the appanage of the vizier and family of the Banu 'l-Hakīm and was directly concerned in the internecine fighting of this period. It was taken by the Catholic Kings after a siege of 20 days on May 20, 1485.

ROSETTA (Arabic Raṣhid), a town in Egypt, situated at 31° 24' N., 30° 24' E., on the Western bank of the Rosetta branch of the Nile (the ancient Bolbitine) about ten miles above its mouth, which is known as al-Armūsiya and is dangerous to enter. Till the ixth century A. D., ships sailed direct to Fūwa; but owing to the excessive depositing of the silt in this region, Rosetta began to take its place during the reign of al-Mutawakkil. In the xiiith century, however, Abu 'l-Fidā' remarks that it was still smaller than Fūwa; and, in the xivth, Ibn Duḳmāk (v. 114) says that it was exclusively inhabited by garrison troops (*ahl ḥādhihi 'l-madīna kulluhum murābiṭūn*). After the Ottoman conquest of Egypt in 1517 A. D. and the decay of European trade through Alexandria, Rosetta became an important centre for maritime trade with Constantinople and the Aegean territory of the Turkish Empire. The Viceroy 'Alī Pasha, in 915 (1509), restored its old *khāns* (warehouses) and *funduqs* (hostelries), built new ones, and cleared the silt from its docks. The town continued to flourish until Muḥammad 'Alī [q. v.] reconstructed the Maḥmūdiyya Canal for navigation between Alexandria and the Nile, and thus diverted the course of trade from Rosetta which declined rapidly to a mere fishing town with but few minor local industries such as rough cotton weaving, rice pro-

duction and oil manufacture. Its population in 1907 was only 16,660.

The topography of the town is largely medieval in character and it still retains many noble buildings which mark its past prosperity. Its streets and lanes are both narrow and circuitous with only one large fish market. Till modern times its wall was maintained for defence against Arab raids. At the mouth of the River, near Kōm al-Afrāh, two castles guarded the waterway entrance to Rosetta in the past. Vansleb, who saw these castles in May 1672, describes them thus: "one stands at the East-side of the River, and the other on the West. That which is about a mile and a half from Rosetta is square, encompassed about with strong Walls, built according to the old Model, having four Towers. One hundred fourscore and four *Janissaries* are in the Garison... The other Castle is but a Mosque, before it stands seven Pieces of Artillery on the Guard: Here commands also an *Aga* over a Company of *Moors*, who examine all that go in, or out of the City" (*State of Egypt*, London 1678, p. 105).

In history, only few events may be gleaned about Rosetta. In 132 (749—750) it was the scene of a serious but abortive Coptic revolt; in 307 (920) the 'Abbāsid fleet of Tarsūs under the admiral Shaml routed the North African fleet of 'Obaid Allāh al-Mahdī [q. v.] commanded by a certain Sulaimān in the waters of Rosetta; in 1218 (1803) it witnessed al-Bardīsi's victory over the combined sea and land forces of the Ottoman Porte; and in 1222 (1807) it was seized by the English who came to help al-Alfi and his Mamlūk successors. It must also be remembered that in 1799 A.D. in the neighbourhood of the town, Boussard, an officer of the French Expedition, discovered the famous Rosetta Stone now in the British Museum.

Bibliography: See works already mentioned in articles on other Egyptian towns.

(A. S. ATIYA)

RU'BA B. AL-'ADJDJĀDĪ AL-TAMĪMĪ, an Arab poet. The name Ru'ba is more frequent among men from eastern Arabia than is generally supposed. Arabic philologists give many explanations of this peculiar name; I am however certain that it is the Persian word *rūbāh* meaning "fox". Al-Āmidī in the *Kitāb al-Mu'talif wa 'l-Mukhtalif* mentions three poets of this name (p. 121—122), but only Ru'ba b. al-'Adjdjādī of the tribe of the Banū Malik b. Sa'd b. Zaid Manāt b. Tamīm became celebrated as a poet of *radjaz*-verses, in which genre he surpassed both his father and the latter's rival Abu 'l-Nadīm al-'Idjlī. Of his life very little is known. Like his father he spent most of his life in the desert (*bādīya*) and only came into the towns when he sought presents for his panegyrics from the great. Born about 65 (685), in his middle years he went about with the armies which were spreading the power of Islām. His earliest productions are certainly lost, but we have a panegyric (N^o. 22) on al-Ḳāsim b. Muḥammad al-Thakāfī, the conqueror of Sind, on his return from India in 94 (713). As in the following year al-Ḳāsim was thrown into prison and murdered, the date of this poem is fairly certain. Our poet then travelled in Eastern Persia, either as a soldier or a merchant, and a further poem by him (N^o. 26) is dedicated to another governor of Sind, 'Abd al-Malik b. Ḳais al-Dhibī who was there about 10 years later.

Whether he was in Ḳhurāsān during the troubles that broke out after the death of Ḳutaiba b. Muslim (96 = 715) is not clear, but several poems are dedicated to individuals who took part in the fighting there. His poem attacking al-Muhallab (N^o. 27) shows that he was against the Yamanīs as do his poems in praise of Maslama b. 'Abd al-Malik who conquered Yazīd b. al-Muhallab and killed him (102 = 720). But he must have again been in eastern Arabia or the 'Irāk, as is shown by his poems on Ḳhālid b. 'Abd Allāh al-Ḳasrī, Abān b. al-Walid al-Badjalī and al-Muhādjir b. 'Abd Allāh al-Kilābī. At a later date, he dedicated poems to men who were active in Persia like Muḥammad b. al-Ash'ath al-Ḳhuzā'ī who was in Kirmān in 129 (747) and particularly Naṣr b. Saiyār, who failed to put down the rising of Abū Muslim and died in 131 (749). A poem (N^o. 41) is dedicated to the last Umayyad caliph Marwān b. Muḥammad of whom he still hopes that he will conquer all his enemies.

As he had in this way shown his attachment to the Umayyads, it is no matter for surprise that Ru'ba did not feel his life safe when he was summoned before Abū Muslim. Of the audience we only know that Abū Muslim showed himself a connoisseur of Arabic. Two poems in praise of Abū Muslim are to be found in Geyer's *Nachträge* (Diilams 4 and 6). Several other poems in praise of members of the new dynasty have survived; one (N^o. 55) is dedicated to Abu 'l-'Abbās al-Ṣaffāh and two to his uncle Sulaimān b. 'Alī (Nrs. 45 and 47), and the latest poems of Ru'ba are in praise of al-Manṣūr, who succeeded his brother as Caliph in 136 (754) (N^o. 14 and Diilamb 8). He was then an old man and is said to have died in 145 (762).

All Ru'ba's poems are in the *radjaz* metre; the few verses in other metres ascribed to him I have found to be by other poets and wrongly attributed to him. He had learned the art from his father, whom he even accuses of having taken credit for his poems when Ru'ba began to write, and we actually have a poem by Ru'ba against his father (N^o. 37). From his father he also inherited a fondness for unusual words and his poems are among the most difficult in the Arabic language, as they are full of words which are never or only very rarely found in other poets. One even suspects that for the sake of effect the poet coined new words which did not previously exist. He is fonder than any other poet of a kind of alliteration or, to be more accurate, an accumulation of a number of forms from the same verbal root. No one can make this sort of thing beautiful and Ru'ba's poems have probably survived only because the lexicographers found them a rich quarry for unknown words. A proof of this is the number of lines from his poems which are quoted in the great dictionaries, and in the *Lisān al-'Arab*, for example, run to several thousands.

It is no wonder then that the learned men of al-Baṣra and, less often, of al-Kūfa visited him to increase their knowledge of the *luḡha* until he became tired of them. We even find that Ibn Ḳhālawaihi in his *I'rāb thalāthīn Sūra* quotes Ru'ba for readings of the Ḳur'ān which have no other justification than that they are different from the known readings. Ru'ba simply claimed to know better.

Ru'ba had two sons, 'Abd Allāh to whom two poems are dedicated (20 and 56), and 'Uḡba who

also wrote poems in the same metre as his father (Djāhīz, *Bayān*, i. 23; Ibn Kūtaiba, *Shi‘r*; Marzubānī, *Muwashshah*, p. 218 and 366; Ibn Rashīk, *Umda*, i. 136).

Ru³ba's poems were collected by several scholars, among them Abū ‘Amr al-Shaibānī, Ibn al-‘Arābi and al-Sukkari, of whom the two last named are probably represented by the surviving manuscripts (cf. *Diagrams* 40—44). The contents of these manuscripts have been edited by Ahlwardt (Berlin 1903), unfortunately without the commentary which is absolutely necessary for the poems of Ru³ba, and in the alphabetical order of the rhymes which makes it difficult to recognise the original arrangement of the collection. As this edition was incomplete, Geyer in 1908 published in a collection of several *radjās* poets eleven further poems with the commentary under the title *Altarabische Dijamben*. Ahlwardt had in his editions of other poets added a collection of verses which he had found in various works quoted as by Ru³ba. This collection was extended by Geyer in his *Beiträge zum Dīwān des Ru³bah* (S. B. Ak. Wien, vol. clxiii., 1910). Even then there remain lines attributed to Ru³ba which have escaped both editors, while many lines are not by Ru³ba but belong to other poets. Confusion seems to have begun at quite an early date between the poems of Ru³ba and those of his father al-‘Adjdjādī. Ahlwardt also published a complete German translation of the whole *Dīwān* in rhyme. The value of this translation is unfortunately small as it is really only a paraphrase and does not help us with the difficulties of the Arabic text.

Bibliography: Biographical notices on Ru³ba are found in *Djumahī*, *Ṭabaḳāt*, ed. Hell, p. 147 (where unfortunately the MSS. have a lacuna); Ibn Kūtaiba, *Kitāb al-Shi‘r*, ed. de Goeje, p. 376—381; Marzubānī, *Muwashshah*, p. 219; *Kitāb al-Aghānī*, xxi. 84—91; Ibn Khallikān, ed. Cairo 1310, i. 187. — Lines by Ru³ba are quoted in large numbers in all the large dictionaries.

(F. KRENKOW)

RUBĀ‘Ī, quatrain (plural *rubā‘īyāt*, from the Arabic *rubā‘ī*, “quadripartite”). Its fundamental characteristics have already been defined (cf. the article ‘ARUD, i., p. 470b; on p. 468b sq. are given the forms of Arabic popular songs in quatrains). It consists of two distichs (*bait*) or four hemistichs (*miṣrā‘*) rhyming together with the exception of the third (*aaba*), the third being called *khaṣī* (“castrated”); the two hemistichs of the first *bait* (*muṣarra‘*) must rhyme. The rubā‘ī in which the four hemistichs have the same rhyme is found particularly among the old poets (cf. ‘Unsurī’s *Dīwān*). The rubā‘ī lends itself to every kind of inspiration. According to one theorist, the first three hemistichs serve as an introduction to the fourth which ought to be sublime (*buland*), subtle (*laṭīf*) or epigrammatic (*īz*). According to E. G. Browne (*Lit. Hist. of Persia*, i. 472), the rubā‘ī is “almost certainly the oldest product of the poetical genius of Persia”. The Persian philologists attribute the invention of this metre to a child playing at nuts with its playmates: one of the nuts having fallen out of the hole by a rebound then fallen back rolling, the child called out *ghaltān ghaltān hamī rawād tā bun-i gaw*, “rolling, rolling it goes to the bottom of the hole”. According to the *Tadhkira* of Dawlatshāh (ed. Browne, p. 30), the child was the son of the emir Yaḳūb b. Laith

the Saffarid and the officials of the court recognised in this hemistich a variety of *hazaj*: “they added a second hemistich (*miṣrā‘*) to it with the same scansion, then a second line (*bait*) which they called *dū-baitī* (“poem in two verses”); but some scholars, considering that it consisted of four hemistichs (*miṣrā‘*) adopted the name rubā‘ī and Rūdakī was the first to excel in it” (it should be noted that Asadī’s dictionary *Lughat-i Fārs*, ed. Horn, quotes two rubā‘ī by poets at least as old: Abu ‘l-Mu‘aiyad, p. 68 and Shāhid, p. 112). The anecdote is again found in a work written in 1220 (nearly three centuries before Dawlatshāh), the *Mu‘djam fi Ma‘ayiri Ash‘ari* ‘l-‘Adjam of Shams-i Kāis (ed. Mirzā Muḥammad and Browne, p. 88): one holiday, in a street of Ghaznī, the poet Rūdakī (“at least I believe so”, says the author) was watching some children playing at nuts: a boy of ten to fifteen improvised the same hemistich in the same conditions. “These words seemed to the poet to be a suitable metre, a pleasing poetical form; he consulted the rules of prosody and recognised in it one of the derivatives of the *hazaj*; ... on account of the high place which it held in his eyes, Rūdakī confined himself to two lines (*bait*) for each poem; ... as the inventor of the metre was a young and innocent boy (*tar*), Rūdakī called the metre *tarāna*” (cf. Horn, *Grundr. der neu-persischen Etymol.*, No. 382 and n. 3: Nizāmī’s hemistich is no doubt quoted from the *Farhang-i Djahāngīrī*: *har tarāna tarāna-i migoft*, “every young man was singing verses”). The *Haft Kulzum* describes *tarāna* as the rubā‘ī of which the four hemistichs (*miṣrā‘*) have the same rhyme (which is at least disputable). According to Shams-i Kāis (*op. cit.*, p. 90), “the connoisseurs of poems set to music (*malhūnāt*) called *tarāna* the rubā‘ī set to music and *dū-baitī* the rubā‘ī without music, because it had no more than two lines; the arabicised Persians (*mustarība*) called the rubā‘ī the *dū-bait*, because in Arabic the *hazaj* has four *maṣ‘ūlun* [while in Persian it has eight]; each line of this [Persian] metre makes two Arabic lines [in other words: a Persian *miṣrā‘* is equal to an Arabic *bait*]. From the fact that the metrical change used in this metre did not exist in Arabic poetry, Arabic was not written in this metre, but now the modern poets use it freely. Arabic rubā‘ī have become common in Arab lands”. On this point in his *Dumyat al-Kaṣr* (Aleppo 1349, p. 174), al-Bākhārī (xith century; q. v.) says that his father repeated several Arabic rubā‘ī to him; these may be reckoned among the earliest in this language. In the Saldjūk period the vogue of the rubā‘ī seems to have reached its height. Rawandī (*Rāhat al-Ṣudūr*, ed. Muḥammad Iḳbāl, p. 344) says à propos of a man of letters of Hamadhān: “He was called Nadjm (al-Dīn) Dūbaitī; he possessed wealth which he lavished on men of talent; with an inkwell and a pen he put into writing all rubā‘ī that he found; he left neither property nor furniture; ... his heirs shared 50 *mann* of manuscripts containing *dū-baitīs*”. No Persian metre admits of so many variations. Indeed, the theorists number 24 types of rubā‘ī derived, half from the *hazaj-i akhram*, half from the *hazaj-i akhrab* (the latter more pleasing to the ear, according to Shams-i Kāis). The Khurāsānian philologist Ḥasan Kāttān divides these two series into two trees (*shadja*) which figure in the treatises on prosody (Shams-i Kāis, p. 92; Blochmann, *Prosody of the Persians*, p. 68).

and which clearly show the variations (*azāhif*) of the *hasadī muthamman sālim* (*maf'ā'ilun*, 8 times). Four different metres may figure in the four hemistichs of rubā'ī. Shams-i Kāis thus explains the mechanism of this poetical form: "The beginning of the hemistichs of the *dū-baitī* is *maf'ūlu* (called *akhrab*) or *maf'ūlun* (called *akhrām*). When the first foot is *maf'ūlu*, the second becomes *maf'ā'ilun* (*sālim*) or *maf'ā'ilun* (*makbūd*) or *maf'ā'ilu* (*makfūf*); when the first foot is *maf'ūlun*, the second becomes *maf'ūlun* or *maf'ūlu* or *fā'ilun* (this last *ashtar*). When the second foot is *maf'ā'ilun* or *maf'ūlun*, the third becomes *maf'ūlun* or *maf'ūlu*; when the second foot is *maf'ā'ilun* or *fā'ilun* or *maf'ūlu*, the third becomes *maf'ā'ilun* or *maf'ā'ilu*. The (last) foot which follows *maf'ā'ilun* or *maf'ūlun* becomes *fa'* (*abtar*) or even *fā'* (*azall*); that which follows *maf'ā'ilu* or *maf'ūlu* becomes *fa'ul* (*ahtam*) or even *fa'al* (*madjībūb*). Further, according to Shams-i Kāis, some poets have written *muḥaṭṭa'āt* (pieces of several lines) in this metre, e.g. Abū Ṭāhir Khatūnī (from whom he quotes a passage); Farrukhī also deliberately composed a *ḥaṣīda* [q. v.] in the *dū-baitī* metre, sometimes retaining the same rhyme in the two hemistichs so that several rubā'ī can be taken from it. It may be recalled that the formula *lā ḥawla wa-lā quwwata illā bi'llāh* (*maf'ūlu maf'ā'ilu maf'ā'ilun fā'*) was used as *miṣrā'* in certain quatrains (quoted by Agha Aḥmad 'Alī, *Risāla-i Tarāna*, ed. Blochmann, 1867, p. 9). Most Persian poets composed rubā'ī in the metres mentioned. Some owe their fame to this metre: Abū Sa'īd [q. v.]: 'Umar-i Khayyām; Bābā Afḍal al-Dīn Kashānī (ed. Sa'īd Nafīsī, Teherān 1311 = 1933). A collection of them is attributed to Djalāl al-Dīn Rūmī (Stambul 1312, 400 p.). On the other hand, the name rubā'ī is wrongly but traditionally given to the quatrains of Bābā Ṭāhir [q. v.] in *hasadī nusaddas mahdūf* (*maf'ā'ilun maf'ā'ilun fā'ilun*) and other quatrains in dialect (*fahlawiyāt*; cf. H. Kohi Kirmānī, *Tarānakā-yi millī*, Teherān 1310); these are really *kaḥās*. On the quatrain in Arabic, cf. Dozy, *Supplément*, s. v. *dū-bait*; Ben Cheneb, *Tuḥfat al-Adab fī Miṣnān Ash'ār al-'Arab* (Algiers 1928, p. 113-117); in Turkish: Gibb, *Ottoman Poetry*, i., p. 88; in Hindustānī: Garcin de Tassy, *Litt. hindouie*, 2nd ed., i., p. 36-37 and his edition of the *Diwān* of Wālī (*passim*).

(HENRI MASSÉ)

RŪDAKĪ, ABŪ 'ABD ALLĀH DĪ'FAR B. MUḤAMMAD B. ḤAKĪM B. 'ABD AL-RAḤMĀN B. ĀDAM, a native of Rūdak in the vicinity of Samarkand...; he is said to have been the first good poet in the Persian language...; according to al-Bal'ami, vizier of Ismā'il b. Aḥmad, emir of Khurāsān, he had no equal among either Arabs or Persians; he died at Rūdak in 329 (940-941) (Sam'ānī, *Ansāb*, in *G. M. S.*, fol. 262; similar text in E. G. Browne, *Hand-List of Muhammadan MSS. in the University of Cambridge*, No. 701). To be more accurate, Rūdakī was born and died at Bannudj (Yāqūt, *Mu'djam*, s. v.) near Rūdak. Some writers wrongly say that his *takhalluṣ* came from his skill in playing the lute (*rūd*, *rūdak*). In any case the pronunciation Rūdagī should be

abandoned. We know few details of his life. From scattered allusions in his poems, it seems that Rūdakī left his native village to go to Bukhārā to the Sāmānīd amir Naṣr b. Aḥmad, whose panegyrist he became. Later he accompanied the amir to Bādghīs and Herāt. There is located the incident, recounted by several biographers, of the courtiers desirous of returning to Bukhārā to spend the winter there begging Rūdakī to use his influence with the amir Naṣr; the poet composed his famous poem ("The scent of the river Mūlyān" etc.) which decided the prince to return at once; richly rewarded, Rūdakī returned to Samarkand, travelling sumptuously. Two verses attributed to Rūdakī refer to journeys to Sarakhs and to Nishāpūr. The poets Adīb Ṣabīr and Sūzānī allude to a certain 'Aiyār, the favourite slave of Rūdakī. The biographers say that he was born blind, but a number of his verses which describe in glowing colours the beauties of the sensual world (quoted in Nafīsī, p. 550 *sqq.*), prove that he lost his sight at an advanced age; it has been supposed that the blindness was caused either by a clumsy oculist or was a reprisal on the protégés of the vizier Bal'ami. Rūdakī, banished from the Sāmānīd court on the dismissal of the vizier (326), is said to have retired to his native village; from this period (his three last years) date the verses in which he regrets his youth and his brilliant past (Nafīsī, p. 561). In his earlier days, according to his biographers and the allusions of later poets, his talents had considerably enriched him. Following Abū Sa'īd Idrīsī (d. 405), author of a history of Samarkand, Sam'ānī says that Rūdakī was buried at Bannudj, "behind the garden of the village"; he adds that pilgrimage used to be made to it (which proves his fame after death). According to some writers, Rūdakī wrote 1,300,000 *bait* six *mathnawī* (the *Farhang-i Dīhāngīrī* mentions one of them: *Dawrān-i āftāb*) in addition to his *diwān* of lyrics; on the other hand, Tha'ālībī, Firdawsī and others agree in saying that he put the *Kalīla wa-Dimna* [q. v.] into verse from a translation into Persian prose by order of the Sāmānīd emir Naṣr. Of his works only a few fragments remain. E. Denison Ross (*J. R. A. S.*, 1924, p. 609 *sqq.*) has shown that the edition of the *Diwān* of Rūdakī (Teherān 1315) consists chiefly of the poems of Kaṭrān of Tabriz [q. v.] who lived a century later. Does this confusion come from the name Naṣr, borne by the patron of both poets and figuring in their panegyrics? E. D. Ross agrees that this attribution took place early to supply the loss of the poems of Rūdakī, whose fame had remained. Ḥasan Rāzī b. Luṭf Allāh in his *tadhkira* entitled *Maikhāna* (finished in 1040) says he had examined some twenty copies of Rūdakī's *Diwān* and only attributed a dozen *ḥaṣīdas* and 20 quatrains after collation to Rūdakī, the remainder to Kaṭrān. In all, according to Ross, we may attribute to Rūdakī the authorship of the following: 1. the isolated verses quoted in the *Lughat-i Furs* of Asadī (ed. Horn, p. 18-19); 2. six distichs from the translation of the *Kalīla* quoted in the *Tuḥfat al-Mulūk* (*J. R. A. S.*, 1924, p. 638); 3. four pieces quoted by Baiḥakī (*J. R. A. S.*, *loc. cit.*, p. 639); 4. the 29 quotations in Shams-i Kāis (*Mu'djam*, ed. Mirzā Muḥammad and Browne, index); 5. the famous ode on the river Mūlyān (Nizāmī 'Arūdī, *Čahār Maḥala*, transl. Browne, p. 33); 6. the *ḥaṣīda*, No. 6 in Ethé's collection (*Rūdagī, der*

Sāmānīdendichter, in *N.G.W. Gött.*, 1873, p. 696), a poem of poignant melancholy, in which we find the name of the *rāwī* of Rūdakī (cf. *J.R.A.S.*, p. 635, and Jackson, p. 42); 7. the eleven quotations in 'Awfi's *Lubāb al-Albāb* (ed. Browne, index); 8. the very beautiful bacchic poem of 94 *bait* (recognised as authentic by E. D. Ross and Mirzā Muḥammad Kaẓwīnī, publ. in *J.R.A.S.*, 1926, p. 213 *sqq.*). Some have said that Rūdakī is the oldest poet of Irān, although we know of precursors at least half a century earlier. His biographers say that he knew the *Qur'ān* by heart and wrote verses in his eighth year. In any case, his knowledge of the language is evident from the many quotations from him in the Persian lexicographers (the *Lughat-i Furs* quotes him oftener than any other poet). Hādījī Khalīfa credits him with a philological work (*Taḍj al-Maṣādir fī 'l-Lughat al-Furs*). One of his verses shows his acquaintance with Arabic poetry. Shams-i Kāis (*Muḍjam*, p. 88) makes him the inventor of the *rubā'ī* [q. v.] but does not assert it definitely. Rūdakī holds a place of honour in the panegyric (the genre of Persian poetry of which the oldest examples have survived). Later poets recognise him as a master of it (Nafīsī, p. 597 *sqq.*); he is distinguished for his sincerity and dignity. In the *ghazal* [q. v.] 'Unṣurī asserts his superiority. He was an innovator and excelled in bacchic poetry, notably in the already mentioned poem (Nº. 8), a subject later taken up by Minūchīrī [q. v.]. He is remarkable for his original similes and paints nature vividly in various aspects. There are a number of proverbs (Nafīsī, p. 612) in the verses attributed to him; other lines are pithy expressions of a moral character. Some later poets inserted verses by Rūdakī among their own (Nafīsī, p. 616). Mu'izzī [q. v.] even tried to imitate the famous poem on the Mūlyān (Nº. 5), according to Nizāmī 'Arūdī who, quoting the later piece, proclaims the superiority of Rūdakī (*Čahār Maḳāla*, transl. Browne, p. 35–36); at a later date on the other hand, this poem is vigorously criticised by Dawlatshāh (cf. E. G. Browne, *Lit. Hist. of Persia*, ii., p. 16) which clearly shows the evolution of literary taste.

(HENRI MASSÉ)

RÜDHRAWAR, a district in al-Djibāl (Media) south of Mount Alwand, halfway between Hamadhān and Nihāwand. According to Ibn al-Faḳīh, it was a valley in the district of Nihāwand, which was three farsakhs in length and formed one of the most pleasing spots in the Sāsānīan empire with its 93 villages all linked up one another by an uninterrupted stretch of orchards and perennial streams. The principal product was a world renowned saffron which was exported through Nihāwand and also through Hamadhān. There also grew there as a result of the mild climate in the shelter of the mountains on the north, grapes, pomegranates, walnuts, almonds, apples, pears and other fruits. According to al-Iṣṭakhrī,

the pulpit mosque of the district was in Karadj, known as Karadj Rūdhrawar to distinguish it from the same place near Iṣpahān, Karadj Abī Dulaf.

Barkiyārūk in 495 (1101–1102) went from Rūdhrawar via Mardj Karātegin to Sāwa (Ibn al-Aṭhīr, xi. 137). Hamd Allāh al-Mustawfi calls the district Rūdārūd with the towns of Sirkān and Tuwī. On modern maps we still find Sirkān at the southern base of the Alwand, and Tuwī after which the district is now called, a little farther south.

Not far from the village of Rūdhrawar, i.e. presumably of Karadj, was a village called Muḥkān (al-Saiyid al-Murtaḍā, *Taḍj al-Arūs*, Cairo 1307, vii. 178; P. Schwarz, *Iran im Mittelalter*, v. 552).

The present ruins of Rūdlāwar (De Morgan, *Mission en Perse*, ii. 136) are certainly those of Karadj, capital of Rūdhrawar (Le Strange, *East Caliph.*, p. 197, note 1).

(E. HONIGMANN)

AL-RÜDHRAWARĪ ZAḤĪR AL-DĪN ABŪ SHUDJĀ' MUḤAMMAD B. AL-ḤUSAIN B. MUḤAMMAD B. 'ABD ALLĀH B. IBRĀHĪM, an 'Abbāsīd vizier. Al-Rūdhrawarī was born in al-Ahwāz in 437 (1045–1046); his father Abū Ya'la al-Ḥusain, who had died just as he was about to take over the vizierate to which he had been appointed by the Caliph al-Kā'im [q. v.] (460 = 1067–1068), was a native of Rūdhrawar, a little town near Hamadhān. He studied in Bagdhād under the direction of Shaikh Abū Ishāḳ al-Shirāzī and in 471 (1078–1079) was appointed vizier by the Caliph al-Muḳtaḍī but dismissed after a short period of office. After the fall of 'Amīd al-Dawla b. Djahīr [see IBN DJAHIR 2.] al-Muḳtaḍī again gave him the vizierate in Shaḥbān 476 (Dec. 1083–Jan. 1084), and this time he held office for several years. In Ṣafar or Rabi' I, 484 (April or May 1091) he was dismissed at the instigation of the Saldjūḳ sultān Malikshāh [q. v.] and retired to Rūdhrawar. From there he went in 487 (1094) on the pilgrimage to Mecca; in the vicinity of al-Rabadha however, the caravan was attacked by Beduins and al-Rūdhrawarī is said to have been the only one who escaped. He then settled in Medīna where he lived till his death in the middle of Djumādā II, 488 (June 1095). He was buried on the Baḳī' al-Ḡharḳad near the tomb of Ibrāhīm, the son of the Prophet.

Al-Rūdhrawarī is praised by eastern historians not only for his piety and devotion to duty, but also for his eloquence and poetical gifts. He wrote among other works a continuation of the *Taḍārīb al-Umam* of Ibn Miskawaih [q. v.] (*Dhail Kitāb Taḍārīb al-Umam*) containing the years 368–389 (979–999), edited and translated by Amedroz and Margoliouth, *The Eclipse of the 'Abbāsīd Caliphate*, Oxford 1920–1921.

Bibliography: Ibn Khallikān, *Wafayāt al-A'yān* (ed. Wüstenfeld), N°. 712 (transl. de

Slane, iii. 288 sqq.); Ibn al-Athīr, *al-Kāmil* (ed. Tornberg), x. 39, 74 sq., 78, 84, 94, 106, 111, 123 sq., 156, 171, 221; Ibn al-Ṭīṭakā, *al-Fakhrī* (ed. Derenbourg), p. 400—403.

(K. V. ZETTERSTÉEN)

RUDJŪC (A.), return in the neo-Platonic sense, forms the main subject of the apocryphal "Theology of Aristotle". The question deals mainly with the individual souls who have descended or fallen into this earthly world of bodies but are purified by knowledge and who return to their original home, the spiritual world, either in an ecstatic condition or after separation from their bodies by death. *Marājī* is used alongside of *rudjū*; the verbal forms from *radja'a* are frequently employed; connected with these we find a number of expressions, sometimes related in meaning and sometimes giving a closer definition. The Arabic translators of the "Theology" took their terminology in part from the Qur'ān and sacred tradition; we must however here confine ourselves to the neo-Platonic meaning and its reception into Islām.

In a certain sense the doctrine of return is a counterpart of the theory of emanation [cf. the article **FAID** in the Supplement]. Everything comes from God and returns to him! Logos and (soul) mythos are, however, more interwoven here than in the doctrine of *faid*. There is a general presupposition of the purely spiritual substantiality of the intelligent soul (*nafs nāṭika*) and of its immortality, which has not only a philosophical foundation but is supported by appeal to the age-old cult of tombs and ancestors (see "Theology", ed. Dieterici, p. 7 sq.). Orphic-Pythagorean traditions and views of Socrates, Plato and Aristotle are combined and harmonised.

Let us begin with an outline from the "Theology" (p. 4—8 and *passim*). The human, i.e. intelligent soul does not feel at home in its association with an earthly body. Lying in the filth of matter it longs for return to its pure origin. It was once a part of the elevated world soul produced by God through the intermediary of the intellect ('*akl*'). So long as it was in the world-soul its place was in the centre of the all. The world-soul has a two-fold countenance: on the one side directed upwards, it looks to the '*akl*' and by it to God; on the other it turns to the corporeal world which emanated from it and is guided by it (cf. "Theology", p. 20). In so far as the world-soul has caused the corporeal world, it knows its product, but as a spiritual being, it always remains within itself. It is however possible that parts of the all-soul may turn more deeply to the earthly, form an idea of it and demand to be united with it. This is the cause of the descent or fall of the individual souls (*hubūt*; also *nuzūl*, *tanāzul*, *tanazzul* etc. = Greek *κἀσθός*). But as every individual soul partakes of spiritual being and immortal life it can never fall completely (cf. p. 132): in part it remains with itself in the upper world, in part it combines with the corporeal world and in part it wanders to and fro. Such migrations of the soul are naturally to be interpreted in the spiritual sense, i.e. independently of time and space.

The descent of the individual souls differs very much in degree. The deeper a soul sinks into matter, the more it forgets its heavenly origin. If it gives way to its passions and desires, it cannot rise again to its origin, and even after the separation from the body by death, only with great difficulty.

But the souls that turn away through asceticism from the sensual world, prepare themselves by good deeds and — this is the most important — purify and perfect themselves by love and knowledge, can, either in ecstasy ("Theology", p. 8; cf. thereon Massignon, *Textes inédits*, p. 131 sq.) or after death raise themselves to their origin (*su'ūd*, *nuhūd*, *irtifā'*, *tarakki'* = Greek *ἄνοδος*), where they see the '*akl*' and through it God himself in light and beauty. Plato had already spoken of this elevation (e.g. *Republic*, vii., p. 517 B: τὴν εἰς τὸν νοῦτον τόπον τῆς ψυχῆς ἄνοδον). According to the "Theology", p. 9 sqq., Herakleitos, Empedocles and Pythagoras also urged the soul to this ascent; the *Ikhwān al-Ṣafā'* add Ptolemy, the astronomer, and interpret the ascension of Christ and Muḥammad's journey to heaven (*mi'rādī*) in a spiritual sense. Muslim philosophers and mystics did the same.

After what has been said, it is evident that the elevation (*su'ūd*) of the soul to its origin (*ila' l-aṣl*) can be called a return. It is more closely defined as a return to its interior, to its own being (*ilā dhātihi*). It is an entering into the self, a becoming conscious of one's own self; not a losing of being, not a destruction. The speculative mystics in Islām went a great deal farther in this direction.

According to the "Theology" (p. 18 sqq.), the return to the origin or being can only be a state (*ḥāl*) of the soul, not of the mind. The '*akl*' always remains by itself and therefore never needs to return to itself; thinking, thinker and thought are always one in its being. When in the *Liber de causis* (ed. Bardenheuer, § 6, cf. § 14) a return to its being is predicated of the '*akl*', this can only be interpreted as an uninterrupted self-consciousness.

So far the doctrine of the fall and return of the soul can be presented as fairly uniform. It shows a pessimistic conception of the life of the soul in combination with the body. But it also finds an optimistic interpretation ("Theology", p. 10 sq.). With Plotinus it is observed that Plato talks another language in the *Timaeus* (cf. p. 28 sqq.) from that of the *Phaedo*, *Phaedrus* and *Republic*. According to the *Timaeus*, God created this beautiful world and equipped it in his great goodness with mind ('*akl*') and life (= soul). Not only has he sent the all-soul into the world but also our (part-)souls so that the world may be as perfect as possible. If the individual soul can only conceive the sensual world correctly, i.e. as the image of the intelligible world, its combination with the physical world will not be a misfortune for it. Both worlds have come from God, the pure good. The only question is, what is the purpose of the soul in this world.

To this the "Theology" answers (p. 43 sq.) that the union of the soul with a body is not a final aim for the individual soul. In any case, union with the world soul and the contemplation of the '*akl*' and of God gives it a higher bliss for which it longs; but first of all it has to prepare itself for this. It has a divine task. If it descends into the corporeal world, it receives strength from above to form and guide a body. Provided it does not sink too low, it derives advantage and knowledge from it. Its previously dormant strength and the nature of this now become known to it. This is its very purpose, that it should come to know itself and its origin. The journey through the corporeal world is for it a course of training. Therefore (p. 80) the individual soul should not be blamed for leaving the spiritual world and coming into this world to

adorn it and to reveal its own nature. After it completes its work it returns to its origin.

Both expositions of the fate of the soul, pessimistic and optimistic, have influenced Muslim thinkers. With the gnostics, the *Ikhwān al-Ṣafāʾ* and many mystics, pessimism predominates, while from Fārābī onwards the philosophers are more inclined to optimism. It is to be noted that the terminology of the "Theology" was only partially adopted. Rudjūʿ, for example, is found only when from the context neo-Platonic influence can be deduced; but it did not become a proper technical term. In place of rudjūʿ and *marǧʿi* we usually find *maʿād* and *ʿawd* which are explained as return in the neo-Platonic sense.

That the teaching of the *Ikhwān al-Ṣafāʾ* turns almost entirely on the spiritual substantiality of the soul and its immortality is well known. Goldziher has often and expressly pointed this out (e.g. *Vorlesungen*, p. 31, 163 and *Koranauslegung*, p. 183 sqq.). The third part of their encyclopædia is wholly devoted to the soul (on *maʿād*, especially *rasūʾil* 32 and 38 sq., Bombay ed.). The 38th treatise is entitled: *Fi 'l-Ba'ith wa 'l-Nashūr wa 'l-Ḳiyāma*; these are three synonyms for resurrection, here interpreted in a spiritual sense. But in other parts of this work also (i. 3; ii. 27—29; iv. 43 sq.), there is much to the point. The famous passage in the "Theology" on the Plotinian ecstasy (i. 3, p. 69) is quoted, and the pseudo-Aristotelian "Book of the Apple" modelled on the *Phædo* of Plato is mentioned (iv. 2, p. 119 sq.). The value of life in the world is, it is true, sometimes recognised but the misery of the wandering soul is more strongly emphasised. It is frequently pointed out that the weak souls cannot help themselves, that they require advice and instruction from prophets and philosophers in a community of life and belief so that they may be put upon the right path of return. The principal thing is the gnosis, for what food and drink are to the body, knowledge and wisdom (*ʿilm* and *ḥikma*) are to the soul (ii. 27, p. 313 sq.). Like the physician Rāzī and the philosopher Kindī the *Ikhwān* chose the Socrates of Hellenistic tradition as their first leader; he is however not the only one. The individual souls require many philosophers and prophets and also living guides (generally a late Hellenistic principle). With their help the good, wise soul advances to union with the world soul and through this with the *ʿaḳl* and God. The union of the individual soul with the world-soul, is the minor resurrection (*ḳiyāma*); the major resurrection takes place when the world soul separates itself entirely from matter and returns to the higher world of the spirits and of God (cf. Tj. de Boer, *Wijsbegeerte in den Islam*, Haarlem 1921, p. 77 sqq., esp. p. 98 sqq.).

The doctrine of the *maʿād* became more complicated after the theory propounded by Fārābī and more clearly developed by Ibn Sīnā of the ten spirits of the spheres (*uḳūl*). The individual souls endowed with intelligence, according to this, do not descend from the world-soul as parts of it, but they are, like the bodies of the earthly world, products of the last spirit in the series of emanation, i. e. of the *ʿaḳl faʿāl*. The purified soul longs for this spirit and its return is in the first place to it. Its longing goes further, to come as near as possible to God and to become like him, so far as it is possible for man. The philosophers are distinguished

from the speculative mystics by the fact that from Fārābī to Ibn Rushd the first question they put is: How is the union (*ittiṣāl*) of our soul with its origin (the *ʿaḳl faʿāl*) possible? The mystics, on the other hand, however differently their inner states and stations are described, desire nothing else than becoming one with God himself (*ittiḥād*).

According to Fārābī, the soul finds its return by the way of right knowledge and pious acts, but knowledge is esteemed more highly than deeds. Deeds remain in the world but knowledge enters into the spirit [cf. the article 'AMAL in the Supplement].

With the doctrine of the ecstatic conditions of the soul Fārābī combines in exemplary fashion his prophetology, especially in the "Model State", a copy of Plato's republic, but interpreted in the cosmopolitan spirit of the Stoics. This turns upon the harmony of religion and philosophy. The agreement is based on the fact that they both come from the same source: the difference is explained by the fact that the souls of the prophets and philosophers take up different attitudes. In their ascent in the ecstatic condition to the *ʿaḳl faʿāl* the soul of the prophet receives revealed truth through its imagination, while the soul of the philosopher receives illuminating wisdom through its intellect. But the truth is one and the same, so the philosophers down to Ibn Rushd and Ibn Sabʿīn (viith — xiiith century), teach, and many mystics are of the same opinion. Cf. Fārābī, *Abhandlungen* ed. Dieterici, p. 69 sqq. and *Musterstaat*, p. 46 sqq.

According to Ibn Sīnā's "Division of the Sciences of the Mind" (*Iḳṣām al-ʿUlūm al-ʿaḳliyya* in *Tisʿ Rasāʾil*, Constantinople, p. 76 sqq.), metaphysics (with Aristotle here called Theology) presents in its fundamental parts (*uṣūl*) among other things the theory of emanation, but on the other hand deals with the doctrine (*ʿilm*) of *maʿād* along with prophetology as derived or applied parts (*furūʿ*). This means that the theory of *faḳīd* possesses a higher place than the doctrine of the return.

Ibn Sīnā here again supports Fārābī. More definitely than the latter he adopts the neo-Platonic doctrine of the spirituality and immortality of the soul. This is not merely the form of its body, as Aristotle taught, of course inconsistently, but a spiritual and therefore indestructible substance. Against Plato and Pythagoras it is asserted that it has no pre-existence in the world-soul and does not migrate from one body to another. The *ʿaḳl faʿāl* gives (presumably from an inexhaustible supply) a suitable soul to each body that is sufficiently prepared for it. In a sense one can say that it has come into existence, but it will never perish. Fārābī was, as Ibn Ṭufail (*Ḥayy*, ed. Gauthier, p. 11) remarks, somewhat undecided in his opinion on the return of all souls, even of the wicked, Ibn Sīnā, on the other hand, not; but both interpreted the rewards and punishments in the next world in a spiritual sense, as was also the case with the *Ikhwān al-Ṣafāʾ*. It is also to be noted that Ibn Sīnā, especially in his mystical writings, uses terms of a more Ṣūfī character than Fārābī.

Ḡhazālī took over from the philosophers just mentioned the doctrine of the spirituality and immortality of the soul, without however, at least in his principal works, drawing from this its logical spiritual deductions regarding the next world. In his *Tahāfut* (ed. Bouyges, p. 344 sqq.) he defends

the orthodox doctrine of the resurrection of the bodies on the last day, while in his esoteric writings he speaks in allegory after the Sūfī fashion (cf. Ibn Rushd, in *Tahāfut al-Tahāfut*, ed. Bouyges, p. 580 sqq.). Ibn Rushd therefore accuses him of contradiction, defends the philosophers and observes that the Sūfis believe in a spiritual return (*ma'ād rūḥānī*) and are still regarded as good Muslims. But what is the personal opinion of this philosopher? It looks as if he hesitated to come out with his real opinion. It must therefore be sought in his larger works on metaphysics and psychology which have not yet been sufficiently investigated. But it is often very difficult to say where the commentator on Aristotle stops and the philosopher begins. This much may safely be said that Ibn Rushd more than Fārābī and Ibn Sīnā regards the soul as the form of its body. With this its spiritual substantiality and individual immortality would disappear.

RŪH. [See NAFS.]

RŪḤ B. ḤĀTIM B. QABĪṢA, governor of Ifrīkiya, was appointed to this high office by the caliph Hārūn al-Rashīd in 171 (787). Under al-Manṣūr he had been *ḥāḍib*, then governor of al-Basra; then he was appointed by al-Mahdī successively governor of al-Kufa, Sind, Ṭabaristān and Palestine. He must have been advanced in years when Hārūn al-Rashīd sent him to Ifrīkiya in the year after his accession to the throne. He belonged to the family of al-Muhallab, which had already sent two governors to the same province and was to supply two more after him. "It seems that at this period the caliph thought of entrusting the affairs of Ifrīkiya to a vassal family" (Vonderheyden). The governorship of the Muhallabids which preceded that of the Aghlabids, was very successful. The rebel Berbers appeared to be finally overcome and the Khāridjī agitation was suppressed; so satisfactory was the position that Rūḥ b. Ḥātim when he arrived at Kairawān in Rajab 171 (Dec. 787—Jan. 788) had no serious difficulties to face. Besides, he had brought with him new contingents of the *ḡund*, 500 horsemen, who were joined soon after by 1,500 others brought by his son Qabīṣa. For the three years of his governorship, the country was peaceful. Rūḥ even succeeded in concluding a peace with 'Abd al-Wahhāb [q. v.], the Rustamid *imām* of Ṭāhert. The authors who are our authorities upon him, notably Abu 'l-'Arab and Ibn 'Idhārī, make special mention of his generosity, his stoicism in face of adversity and of his skill in disarming his opponents.

As he was showing signs of senility, the postmaster and a *qā'id* of the province requested the caliph to appoint a successor to him secretly, who could take his place if necessary. Following their advice, Hārūn al-Rashīd appointed Naṣr b. Ḥabīb. Rūḥ b. Ḥātim died on 19th Ramaḍān 174 (Feb. 3, 791), and his son Qabīṣa was formally recognised as his successor in the great mosque of Kairawān. But the postmaster and the *qā'id*

informed Naṣr, the governor designate, and Qabīṣa had to give way to him.

AL-RUHĀ'. [See ORFA.]

RŪḤĪ, is the *makhlaṣ* of the historian, whose work was until 1925 known only from the references in 'Alī's [q. v.] *Kūnh ūl-Akhbār* and in Münedj-djimbashī [q. v.]. J. H. Mordtmann (*M. O. G.* ii, 129 sqq.) was the first to identify by conclusive arguments several manuscripts of the anonymous original work. They tell us practically nothing about the personality of the author and it is only a hypothesis (cf. F. Babinger *Die frühosmanischen Jahrbücher des Urudsch*, Hanover 1925, p. xiii.) that connects the historian Rūḥī with a certain Rūḥī Fāḍil Efendi who, like Muḥyī al-Dīn Ḍijāmālī (cf. F. Babinger, *G. O. W.*, p. 72 sqq.), was a son of Zebbīllī 'Alī Efendi, distinguished himself as a poet and died young, in 927 (1528) it is said. As he is also called Rūḥī Edrenevī, i. e. Rūḥī of Adrianople, this hypothesis may be correct. But elsewhere (cf. Sehi, *Tedhkire*, p. 127), this Rūḥī Fāḍil Efendi is said to have been born and to have died in Stambul.

The history of Rūḥī entitled *Tewārikh-i 'Alī 'Othmān* is written in a simple style and divided into two parts (*ḥisim*). The author calls the first *mebādī*, i. e. beginnings, the second *meṭālib*, i. e. elucidations. The first part falls into two sections of a general nature, the second contains eight chapters each of which describes the reign of one sultān. The chronicle was written in the reign of Bayazid II (1481–1512) and ends in 917 (beg. March 31, 1511). Rūḥī's work has not been further investigated nor is there a critical edition of the text, which could easily be prepared from existing old and good manuscripts (Berlin, Oxford, Algiers; cf. F. Babinger, *G. O. W.*, p. 43). It is clear however that Luṭfī Pasha's [q. v.] Chronicle is dependent on that of Rūḥī.

W.*, p. 42 sq. — In addition to Sehi, the following mention men named Rūḥī: Laṭīfī, *Tedhkire*, p. 172 and Mehmed Thureiyā, *Sidjill-i 'othmānī*, ii. 421. Cf. Brūsālī Mehmed Ṭāhir, *'Othmānī Miw'ellifleri*, iii. 54.

(FRANZ BABINGER)

RUKN AL-DAWLA, ABŪ 'ALĪ AL-ḤASAN B. BŪYE, second in age of the three brothers that founded the Būyid dynasty [q. v.]. His fortunes followed those of the elder brother 'Alī (later 'Imād al-Dawla [q. v.]) up to the latter's occupation of Fārs in 322 (934); Rukn was then given the governorship of Kāzarūn and other districts. But shortly afterwards he was forced by the 'Abbāsīd general Yāqūt, at whose expense the Būyid conquest of Fārs had been made, to seek refuge with his brother; and when Yāqūt was in turn defeated by the Ziyārid Mardāwīdj [q. v.], the Būyids' former overlord against whom they had revolted, 'Imād, who then found it advisable to conciliate Mardāwīdj, sent Rukn to

him as a hostage. On Mardāwīd's assassination in the following year (323 = 935), Rukn escaped and rejoined 'Imād, by whom he was supplied with troops to dispute the possession of the Djbāl with Mardāwīd's brother and successor, Washmgīr. Rukn succeeded at the outset in taking Isfahān; but the first round of his contest with Washmgīr ended in Rukn's ejection from that city in 327 (939), when he again fled to Fārs.

In the next year Rukn's help was sought by his younger brother al-Ḥusain (later Mu'izz al-Dawla [q. v.]), who had meanwhile set himself up in Khūzistān, against the Barīdis [q. v.]; whereupon Rukn, being now possessed of no territory, attempted to take Wāsiṭ but was obliged to retire when the caliph al-Rādi [q. v.] and the amīr Badjkam [q. v.] opposed him. Almost immediately afterwards, however, he succeeded in recovering Isfahān, owing to Washmgīr's championship of Mākān b. Kākūy in a quarrel with the Sāmānid Naṣr b. Aḥmad [q. v.]; and when the latter ruler died in 331 (943), Rukn, who had meanwhile supported the Sāmānid cause, was able to drive Washmgīr as well from al-Raiy, of which he had momentarily regained possession on the retirement of the Sāmānid general Ibn Muḥtādī.

With al-Raiy Rukn gained control of the whole Djbāl; and but for two short intervals (of about a year in each case) retained it for the rest of his days. Up to 344 (955—956), however, his position was highly precarious. For not only Washmgīr, but also the Sāmānids continued to challenge it. It was only by playing them off against each other and sowing dissensions between the Sāmānid princes and the officers they sent against him that Rukn was able to maintain it. Even so (as indicated above) he was driven from al-Raiy, and his representatives were expelled from most parts of the province, once in 333 (944—945) and again in 339 (950—951), in each case by Sāmānid forces. Indeed he was obliged in the end to become the Sāmānids' tributary (at least two agreements for the payment of tribute being recorded); it was on this basis that he first made peace with them in 344 (955—956) as again in 361 (971—972). In the course of his long contest with Washmgīr, who, until he was killed in an accident in 357 (968) never ceased to intrigue with the Sāmānids against him, Rukn on several occasions invaded Ṭabaristān and Gurgān, but was unable to incorporate these provinces permanently in his dominions. And though in 337 (948—949), after he had defeated an attempt on al-Raiy made by the Sālārid Marzubān b. Muḥammad, whom he took prisoner, he gained control of southern Ādharbāidjān, his ejection two years later from al-Raiy itself [see above] naturally cost him this as well.

Rukn received his *laḡab* simultaneously with his brothers in 334 (945—946), on Mu'izz's entry into Baghdad; and on 'Imād's death in 338 (949), succeeded him as head of the family and *amīr al-umarā'* (though this title was also held by Mu'izz). The last two years of his life were rendered unhappy — so much so that he never recovered from the shock induced by the news — owing to the conduct of his son, 'Aḍud al-Dawla [q. v.], in taking advantage of an appeal for help sent by Bakhtiyār [q. v.] (son of Mu'izz and his successor in the rule of al-'Irāḡ), to imprison the latter, and, in conjunction with Rukn's own *wazīr*

Abu 'l-Faṭḥ Ibn al-'Amīd [q. v.], who had been sent likewise with a force to Bakhtiyār's aid, to seize that province for himself. And though 'Aḍud obeyed his command to release Bakhtiyār and return to his government in Fārs, Rukn was only with difficulty persuaded to visit 'Aḍud in 365 (975—976) at Isfahān, in order to ensure that by receiving a confirmation of his appointment as heir, he should succeed without dispute. Rukn died at al-Raiy in Muḥarram of the next year (September 976).

Rukn al-Dawla was fortunate in his employment of the remarkable *wazīr* Abu 'l-Faḍl Ibn al-'Amīd [q. v.] from 329 (941) for thirty years until his death in 359 (970), though, as that minister himself complained (see Miskawaih), he was prevented by the prince's lack of royal blood and of culture from governing properly. Rukn (so he said) was in fact no more than a predatory soldier, who could secure the allegiance of his supporters only by means of largesse, and was not able to forgo revenue in the expectation of subsequently increasing its yield. On the other hand he is said to have been just and humane towards his troops and his subjects, and gave proof — especially in connection with the episode of 'Aḍud al-Dawla mentioned above — of a tender sense of honour.

(HAROLD BOWEN)

RUKN AL-DĪN, SULAIMĀN II B. KĪLĪDĪ ARSLĀN II, a Salḡuḡ ruler in Asia Minor. His father KĪlĪdĪ Arslān b. Mas'ūd [q. v.] in his old age divided his kingdom among his many sons. The consequence of this was that the latter set up as independent rulers and began to fight with one another so that at his death in Sha'bān 588 (Aug. 1192) complete anarchy reigned. In the course of time however, Rukn al-Dīn brought the whole kingdom under his sway. Kuṭb al-Dīn Malikshāh who had received Siwās and Aḡsarā, began by attacking his brother Nūr al-Dīn Maḥmūd, lord of Ḳaisariya. The latter was killed and Ḳaisariya passed to Kuṭb al-Dīn. On the latter's death Rukn al-Dīn who ruled in Tokat (Dūḡāt), attacked Siwās and took possession of it. He next seized the two towns of Aḡsarā and Ḳaisariya. After some time, he turned against his other brother Ghīyāth al-Dīn Kaikhusrāw in Ḳonya and laid siege to him. The latter had to give in and ceded his territory to his brother. In Ramaḍān 597 (June—July 1201) Malatya which belonged to Mu'izz al-Dīn Ḳaisarshāh b. KĪlĪdĪ Arslān was captured. Erzerūm was the next to pass to Rukn al-Dīn. When the latter's troops approached, the governor there, 'Alā' al-Dīn b. Malikshāh, the last of the Ṣaltuḡid dynasty, began negotiations by which the town was surrendered to Rukn al-Dīn who gave it to his brother Ṭuḡhrīlshāh. Another brother, Muḥyi al-Dīn, who had obtained Angora when the kingdom was divided, long resisted Rukn al-Dīn's lust for conquest, and only after a three years' siege found himself forced to capitulate when supplies were completely cut off, but was promised suitable compensation. Rukn al-Dīn promised him

a fortress in a remote part, but laid an ambush for him in which he was attacked and killed as he left the town. Soon afterwards however, Rukn al-Dīn fell ill and died before the news of his brother's murder reached him. He was succeeded by his son Kāẓim Arslān III [q. v.]. Ibn al-Aṭhīr (xii. 128) gives the date of his death as the 6th Dhu 'l-Ḳa'da 600 (July 6, 1204); according to another statement (xii. 59) however, the surrender of Angora and the death of Rukn al-Dīn did not take place ill 601 (1204—1205).

Ibn al-Aṭhīr describes Rukn al-Dīn as a strong and vigorous ruler; he is said to have held certain heretical views (*madḥhab al-falāsifa*) on religious matters which, however, he concealed from fear of his subjects.

Bibliography: Ibn al-Aṭhīr, *al-Kāmil* (ed. Tornberg), xii. 57—59, 111, 119, 125 sq., 128 sq., 132, 205; Abu 'l-Fidā', *Annales* (ed. Reiske), iv. 193, 209; *Recueil des historiens des croisades, Historiens orientaux*, II/i. 69—72, 94; Houtsma, *Recueil de textes relatifs à l'histoire des Seldjoudes*, iii. 15—25, 45—61, 72; iv. 5—9, 18—23, 28. RUKN AL-DĪN. [See BAIBARS I, BARKIYĀRŪK, TUḠHRĪL-BEG, KĪLĪD ARSLĀN.]

RUKNĀBĀD (or ĀB-I RUKNĪ: the water of Rukn al-Dawla), a canal (*kanāt*) which runs from a mountain (called Kulāi'a: P. Schwarz, *Iran im Mittelalter*, ii. 48, N^o. 7) about six miles from Shīrāz. Enlarged by a secondary canal, it follows for a part of the way the road from Isfahān to Shīrāz. Its waters reach as far as the vicinity of the town towards the cemetery in which Ḥāfiẓ is buried, when they are not entirely absorbed for irrigation purposes. According to Ḥasan Faṣā'ī (*Fārs-nāme-i Nāṣirī*, part ii., p. 20), "all the waters of the plain of Shīrāz come by subterranean channels except the water from the spring of Djušk... The best waters are those of the Zangī and Ruknī canals... The Kanāt-i Ruknī (i. e. Ruknābād) was made in 338 (949—950), one and a half farsakhs N. E. of Shīrāz by Rukn al-Dawla Ḥasan the Dailamī [cf. BŪYIDS]; its waters rise in the ravine of Tang-i Allāh Akbar a mile north of Shīrāz; it waters the plain of al-Muṣallā [q. v.]". In the fourteenth century, Ruknābād is mentioned by Ibn Baṭṭūṭa and by Ḥamd Allāh Mustawfi Ḳazwīnī (*Nuḥat al-Kulūb*, transl. Le Strange, in *G.M.S.*, p. 113: "The water comes from subterranean canals and the best is that of Ruknābād"). But it is to the poets that this canal really owes its fame. In the xiiith century Sa'dī declares himself charmed by the land of Shīrāz and the waters of Ruknābād (*Kulliyāt*, Calcutta 1791, fol. 299b, l. 4). In the following century 'Ubaid-i Zakānī sings: "The zephyr which blows from al-Muṣallā and the wave of Ruknābād remove from the stranger the memory of his native land" (text quoted by E. G. Browne, who finds in it an echo of Sa'dī, *Persian Lit. under Tartar Dominion*, p. 238). Ḥāfiẓ in particular immortalised Ruknābād in his verses: "Pour out, cup-bearer, the wine that is left, for in Paradise thou shalt find neither the stream of Ruknābād nor the promenade of al-Muṣallā" (ed. Khalkhali, Teherān 1306, N^o. 3, v. 2); "Shīrāz and the wave of Ruknī and the sweet breeze of the zephyr, blame them not, for they are the pride of the universe" (*ibid.*, N^o. 35, v. 7); "The zephyr which blows from al-Muṣallā and the wave of Ruknābād will never allow me to depart" (*ibid.*, N^o. 168,

v. 9); "May God a hundred times preserve our Ruknābād, for its limpid waters give a life as long as that of Khidr" [q. v.] (*ibid.*, N^o. 277, v. 2), and in a piece which may be apocryphal (*ibid.*, part 2, N^o. 71): "The water of Ruknī, like sugar, rises in al-Tang (-i Allāh Akbar)". According to later writers, Ruknābād, which Ibn Baṭṭūṭa called a great water-course (*al-nahr al-kabīr*), gradually dried up. Among the notable travellers of the xviiith century, Chardin, almost alone in mentioning it, saw only a large stream and gives Ruknābād the fanciful meaning "Ruknenabat, veine ou filet de sucre" (*Voyages*, ed. Langlès, viii. 241). At the end of the xviiith century, W. Franklin praises the sweetness and clearness of the waters of this little stream to which the natives attribute medicinal qualities. At the beginning of the xixth century Scott Waring notes that its breadth was nowhere more than six feet. Ker Porter observes that the canal has become choked up through neglect. The *Kulthūm naneh* deplores the disappearance of the groves that surrounded it. At a later date we have the same observation by Gobineau ("Cette onde poétique ne m'apparut que sous l'aspect d'un trou bourbeux"), Curzon ("a tiny channel filled with running water") and Sykes ("a diminutive stream").

The *Fārs-nāme-i Nāṣirī* mentions a second Ruknābād in Fārs: "The source of the warm stream of Ruknābād is part of the district of Bikhe-i Fāl (Lāristān); it is over a farsakh north of the village of Ruknābād; having a bad flavour and an unpleasant smell, it is of no use for agriculture; it cooks in a few minutes eggs put into it; one can only bathe in it at some distance from the spring" (ii. 318 middle and 288).

(H. MASSÉ)

RŪM, the name in Persian and Turkish for the Byzantine empire. Rūm means the land of the Rhomaeans (Ρωμαῖοι) or Byzantines although in Central Asia Rūm is also used for the Roman empire. In course of time the conception

became narrower. While Rūm still is the old name for Ǵonya (q. v. and RŪM-SALDŪǴS), in the early Ottoman period Rūm comprises the district of Amasia [q. v.] and Siwās [q. v.] while Anatolia included the so-called province with the capital Kūtāhiya [q. v.] (cf. *Isl.*, x., 1920, p. 144, note 1). From the earlier name Rūm for old Hellas (cf. *Iskandar-i Rūmī*, i. e. Alexander the Great), Eastern Roman and Byzantine, it was applied in Turkey to designate the modern Greeks (also *Urūm*) in contrast to the ancient Greeks who were called *Yūnāniyān* or Ionians. Rūm also sometimes meant Turkey in general; cf. the expression *Rūm Pādī-shāhī* for the sūltān. *Rūmī* later was used in a derogatory sense. *Rūm Meshreb* was said of the Greek character, faithless, unreliable, flattering.

Cf. also ERZERUM (i. e. *Erd-i Rūm*) and RUMELIA. (FRANZ BABINGER)

RŪM ǴAL'A, a fortress in Northern Syria. According to Arnold Nöldeke's description, it is situated "on a steeply sloping tongue of rock, lying along the right bank of the Euphrates, which bars the direct road to the Euphrates from the west for its tributary the Merziman as it breaks through the edge of the plateau, so that it is forced to make a curve northwards around this tongue. The connection between this tongue of rock, some 1,300 feet long and about half as broad, and the plateau which rises above it is broken by a ditch made by man about 100 feet deep. The walls of the citadel with towers and salients follow the outlines of the rock along its edge at an average height of 150 feet above the level of the Euphrates, while the ridge extending along the middle of the longer axis rises 100 to 120 feet higher" (A. Nöldeke, in *Petermanns Mitteil.*, 1920 p. 53 sq., where the main road up to the citadel, the buildings etc. are also described).

The unusual position of the fortress on a high cliff suggests that it corresponds to the tower of Shitamrat "hovering like a cloud in the sky" which Salmanassar III took in 855 B. C. (F. Honigmann, art. *Syria*, in Pauly-Wissowa, *R.E.*, iv., A, col. 1569, 1592).

While Th. Nöldeke (*N. G. W. Gött.*, 1876, p. 12, note 2) wished to distinguish Rūm Ǵal'a clearly from *Ōrīma* and identify with the former place the modern Orum, Hōrum on the Euphrates, above Balkīs, Urima is now generally identified with Rūm Ǵal'a (Marmier, B. Moritz, Cumont, Dussaud etc.). The name of the old bishopric of Urima last appears in Matt'ēos of Edessa (ed. Watarshapat 1898, p. 323): in 561 A. M. (1112—1113 A. D.) the Armenian Kogh Wasil returned to Tancred of Antioch the lands of Harsn Msur, *Thorēsh* and Uremn, which he had taken from the Franks. The first two are Hīsn Maṣūr and Trūsh (Turūsh) and Uremn is Ūrima (*Hist. or. des croisad.*, *Docum. armén.*, i. 102; J. Markwart, *Südarmerien und die Tigrisquellen*, Vienna 1930, p. 182, note 1 of p. 177). The Syriac chronicles record (Mich. Syr., iii. 199; Barhebraeus, *Chron. syr.*, ed. Bedjan, p. 279) that Kōgh Basil or after his death Kurtig, who acted as governor for his widow, held the towns of Kaishūm, Ra'bān, Bēthēsēnē and Ǵal'a Rhōmaitā. It is very probable that the latter, the Syriac for Rūm Ǵal'a, here corresponds to the Uremn of the Armenians, which is later in Armenian always called Hromklay and by similar names.

Rūm Ǵal'a later belonged to the county of Edessa. The metropolitan Abu 'l-Faraj b. Shum-

mānā of Edessa, who after the second capture and destruction of this town by the Turks (1146) escaped to Samosata, was imprisoned for three years in Rūm Ǵal'a by Joscelin; he then wrote several *mēmūrē* "with an account of the events" which caused his imprisonment (Mich. Syr., iii. 277b; Baumstark, *Gesch. der syr. Literatur*, Bonn 1922, p. 293).

At the request of an Armenian of Ǵal'a Rhōmaitā named Michael in 1148 Beatrix, widow of Joscelin II of Edessa, and her son demanded that the Armenian Catholicos Grigor III Pahlavuni should move his residence to the "fortress of the Romans" (Arm. Hromklay) which belonged to their territory, the former county of Edessa (the capital of which since the fall of al-Ruhā' in 1145 had been Tall Bāshir). The Catholicos had lived since 1125 in Cowk' ("little lake"), i. e. the fortress of Ǵal'at Šōf in the Djabal Sawī (Šōf) to which Badr al-Dīn Maḥmūd al-'Aīnī fled in 803 (1400—1401) from Timurlenk (Quatremère, *Histoire des Sultans Mamlouks de l'Égypte*, 11/ii., 1840, p. 227), and recently visited by Haussknecht, as is evident from Armenian sources which mention the "little castle of Cowk' in the region of Tluk'" (Dalūk, Τελούχ) (Papken G. W. Güleserean, *Cowk', Cowk'-Tluk' and Hrom-Glay, eine historisch-topographische Studie* [Armen.], Vienna 1903, p. 33—44; Markwart, *Südarmerien*, p. 18 sq., still wrongly identified Cowk' with Göldjūk). The Catholicos obeyed the summons and in 1150 purchased the fortress of Rūm Ǵal'a from the Franks but is said to have shown ingratitude to Michael for he deprived him of all his possessions and drove him out of the country (Mich. Syr., iii. 297; Barhebraeus, *Chron. syr.*, ed. Bedjan, p. 317). The Armenian Catholicoi after that lived in the fortress from 1147/1148 till 1293 (*Chronique du royaume de la Petite Arménie*, in *Rec. hist. or. crois.*, *Docum. arm.*, i. 618, under the year 590 A. M. = 1141—1142 A. D.).

Grigor's successor, the poet Nersēs IV Shnorhali, "the graceful" (patriarch 1166—1173), was called Klayec'i from his place of residence. In May 1170 and March 1172 negotiations concerning a church union took place between him, Theorianos as ambassador of the Byzantine emperor Manuel Comnenos, and the bishop Iwannis (Elias) of Kaishūm and the monk Theodoros Bar Wabhūn as delegates of the Jacobite patriarch Michael the Great, who had remained in the monastery of Mar Bar Šawmā (ἐν τινὶ καστολλιῷ αὐτοῦ λεγομένῳ ὁ ἄγιος Βαλοσαμῶν), in Rūm Ǵal'a (Syr. Ǵal'a Rhōmaitā or Hēsōā dhe-Rōmāyē, Greek Ῥωμαίων Κουλά) and in Kaisūm (Syr. Kaishūm, Greek Κεσσόβιον) (Migne, *Patr. Graec.*, cxxxiii., col. 114—298; Barhebraeus, *Chron. eccl.*, ed. Abbeloos, Lamy, i. 549—551 expanded in Mich. Syr., iii. 334—336).

After the death of Nerses (Aug. 8, 1173) his younger nephew was proclaimed Catholicos in Rūm Ǵal'a. His older nephew however induced his brother-in-law Mleh of Cilicia to obtain from Nūr al-Dīn a charter, on the authority on which he threw his cousin into prison and had himself installed as Catholicos on Sept. 5, 1173 (Mich. Syr., iii. 353 sq.). As Grigor IV Tēta (Degha, "the child") he was Catholicos from 1173—1193, the son of prince Wasil of Gerger, who was brother to Nerses Shnorhali. Under him in 1179 took place the synod of Hromklay, at which Nerses of Lampron delivered a famous speech in which he recommended the adoption of the Chalcedonian creed (Mansi, xxii.,

col. 197—206). But the proposed union of the churches fell through because Manuel Comnenos died on Sept. 24, 1180. In the same year Theodoros Bar Wabhūn, who had seceded from his teacher and godfather Michael the Great and was seeking assistance everywhere to oust him from the patriarchate, came to the Catholicos in Rūm Ǵal'a, who welcomed him kindly and sent him to Cilicia to Leon II (Syr. Lebḥōn; Armen. Lewon) of Little Armenia; the latter made him patriarch (1180—1193) of his whole kingdom (Mich. Syr., iii. 386 sq.; Barhebraeus, *Chron. eccl.*, i., col. 583—585; J. Gerber, *Zwei Briefe Barwabhuns*, Halle [diss.] 1911, p. 3—9).

When the emperor Frederick Barbarossa was on his way through Asia Minor, in 585 (1189—1190) the Armenian *šāhib* of Ǵal'a al-Rūm (i. e. Grigor IV) sent a letter to Saladin to ask for help; in the following year he (al-Ǵaghikūs) again sent a letter to him (Abū Shāma, *Kitāb al-Rawdatain*, in *Rec. hist. or. crois.*, *Hist. arab.*, iv. 435 sq., 453—456).

After the death of Grigor IV (July 1193), the Armenians made his young nephew Grigor V Manug ("the young") or as Michael Syrus calls him, Dīrāsū ("the cleric") Catholicos (1193—1194; Mich. Syr., iii. 411 sq.). Leon of Cilicia in 1195 had him carried off and thrown into the fortress of Gubidara (Kopitar) where he perished in an attempt to escape. The Armenians thereupon made his predecessor's cousin, Gregoras, son of Shahan, his successor as Catholicos Grigor VI known as Abirad ("the scoundrel") (1194—1203; Mich. Syr., iii. 413; *Hist. or. des crois.*, *Docum. arm.*, i., p. cxx.). His successors were: Howhannēs VI of Sis (1203—1221), Costandin I Barzberde'ci (1221—1267), Hakob I Klayec'ci (1267—1286), Kostandin II (1286—1289) and Stephanos IV Hromklayec'ci (1290—1293).

In Rūm Ǵal'a in the xiiith century there were also many Jacobites, among whom the presbyter Iṣḥō' (Barhebraeus, *Chron. eccl.*, i. 665) and his sons (Benē Iṣḥō': Barhebraeus, i. 691, 695, 721, 751, 759), Ya'qūb (*ibid.*, i. 683—685, 751, 779), the presbyter and physician Shem'ōn (*ibid.*, i. 735, 741, 747, 759—767) with his followers (Bēth Shem'ōn: *ibid.*, i. 759, 767, 769) and Iṣḥō' Shankit (*ibid.*, i. 741) played an important part. The Jacobite patriarch Ignatius II (Rabban Dawid, 1222—1252), celebrated for his wealth, endowed Ǵal'a Rōmaitā among other places with a splendid church (Barhebraeus, i. 665). Later he chose this fortress as the see of his patriarchate (Barhebraeus, i. 685). He did not come out openly against the Armenian Catholicos but he endeavoured as far as possible in secret to advance the Syrian church at the expense of the Armenian (Barhebraeus, i. 687—689). On the other hand, we are told that at this time, when the doubtless very profitable cult of the Jacobite saint Barṣawmā was at its height in the monastery at Gargar called after him (now Borsūn Ǵal'esī between Malatya and Sumaisāt), the Armenians also "out of covetousness" built a monastery "called after Barṣawmā" in Rūm Ǵal'a and received many gifts from the people, to the vexation of the Jacobites. The patriarch Ignatius therefore resolved to build a Jacobite monastery there also and to buy a suitable site for it on the Nahrā dhe-Pharzemān (Arab.: Nahr Marzubān, now Merziman-Çai) from the Benē Iṣḥō' and also to get from them an agreement of sale by which they

were to surrender any authority over the monks living there. When they stubbornly refused, the patriarch excommunicated them and established himself in a cave on the Euphrates but was brought back by the Armenian Catholicos. Later on he fell ill, and after a reconciliation with the Benē Iṣḥō' through the offices of the Katholikos, died in Rūm Ǵal'a on June 14, 1252 (Barhebraeus, *Chron. eccl.*, i. 691 sqq.).

In 1260 Hūlagū crossed the Euphrates by bridges of boats at Malatya, Ǵal'at al-Rūm, Bira and Ǵar-ḳisiya' (Barhebraeus, *Mukhtaṣar Ta'rikḥ al-Duwal*, Bairūt 1890, p. 486; *Chron. syr.*, ed. Bedjan, p. 509). In the decades following, the Jacobite patriarch Ignatius III (1264—1282) had to defend his possession of the Barṣawmā monastery at Gargar in a desperate struggle with the physician Shem'ōn of Ǵal'a Rōmaitā; both had received or alleged they had received new charters of ownership from Hūlagū and Abāḳā (Barhebraeus, *Chron. eccl.*, i. 753—766; ii. 439 sqq.); later on they made up their quarrel (Barhebraeus, i. 769). After the death of Ignatius, the presbyter Ya'qūb of Ǵal'a Rōmaitā made his nephew Philoxenos or Nemrōd patriarch in 1283 (Ignatius IV). The latter died at the beginning of July 1292 in the monastery of Barṣawmā (Barhebraeus, *Chron. eccl.*, i. 781); after his death the Jacobite patriarchate disintegrated and three rivals appeared in Malatya, Cilicia (Gawikāt monastery) and Mārdīn and as a result of this permanent schism the Jacobite church sank to complete insignificance (Barṣawmā [?], additions to Barhebraeus, *Chron. eccl.*, i. 781 sqq.).

It was perhaps not merely chance that the end of the united Jacobite patriarchate which in recent years had been closely associated with the town of Rūm Ǵal'a, happened almost the same day as the collapse of the Armenian Catholicate of Hromklay.

In the reign of Ǵalā'ūn an Egyptian army of 9,000 horse and 4,000 foot under Baisari as well as Syrian forces under Ḥusām al-Dīn of 'Aintāb had come to Rūm Ǵal'a and laid siege to the fortress on the Pharzemān on May 19, 1280. The sultān demanded that the Catholicos should surrender the fortress and move with his monks to Jerusalem, or if he preferred, to Cilicia. When the Catholicos refused to do so, the Egyptians laid waste the country around the town which was inhabited by Armenians, on the next day forced their way over a wall only recently built into the town and set it on fire. The whole population fled into the citadel. After the Egyptians had ravaged and plundered the country round for five days, they retired.

In the reign of al-Aṣḥraf Khalil they undertook a new expedition against Rūm Ǵal'a in 691 (1292) in which the prince of Ḥamā, Malik al-Muza'far, took part with Abu 'l-Fidā' in his retinue (Abu 'l-Fidā', *Annales Muslemici*, ed. Reiske-Adler, v. 102 sqq.). On Tuesday, the 8th Djumādā II, the Egyptians appeared before the town and erected 20 pieces of siege artillery. It fell after a siege of 33 days. On the 11th Raddjab (June 29, 1292) it was plundered and a massacre carried out among the garrison of Armenians and Mongols. Among the 1,200 prisoners who were mostly taken to the sultān's arsenal on June 28 (al-Nuwairi, MS. Paris, fol. 100 sq., in Quatremère, *Hist. des Sult. Mamlouks*, II/i., p. 141, note 30) was the Armenian Catholicos (Arab. "*Khalīfat al-Masīḳ*", whom they call *Kāthāghikūs*"), cf. Yāqūt, iv. 164), Stephanos IV of Rūm Ǵal'a with his monks; he died a prisoner

in Damascus (Barhebraeus, *Chron. syr.*, p. 579). According to the inscription of ownership in a Syrian manuscript (Brit. Mus., MS. Syr., No. 295), it belonged to a certain Rabban Barsawmā of Ḳal'a Rōmaitā, high priest of Ra'bān who in a note refers to the harsh imprisonment which he suffered from the Egyptians; Armenian verses on the fall of the fortress are preserved on a relic casket (Wright, *Catal. syr. Mss. Brit. Mus.*, i. 231^b; Carrière, *Inscription d'un reliquaire arménien*, in *Mélanges orientaux*, Paris 1883, p. 210, note 1; Promis, *Mem. dell' accad. di Torino*, xxxv., 1884, p. 125–130). The inscription on the great gate of the citadel which was restored by al-Ashraf (cf. above, vol. ii., p. 235a) speaks of him as a victor who among other feats had put the Armenians to flight, an allusion to the capture of Rūm Ḳal'a (van Berchem, in *J. A.*, 1902, May–June, p. 456; the inscription published by Sobernheim, in *Ist.*, xv., 1926, p. 176). The sultan sent boastful bulletins of victory to the cities of Syria in which he proclaimed the capture of this impregnable citadel as an unprecedented feat of arms and concluded with the words: "After the capture of this fortress, the road is open to us to conquer the whole of the East, Asia Minor and the 'Irāk so that with God's will we shall become owners of all the lands from the rising of the sun to its setting" (al-Nuwairi, MS. Leyden, fol. 58, transl. by Weil, *Gesch. d. Chalifen*, iv. 183 sq.).

The fortress of Ḳal'at al-Rūm was rebuilt by orders of the sultan by the *nā'ib* of Syria, Sandjar Shudjai, and given the name of Ḳal'at al-Muslimin; another part of the town was left in ruins however (Quatremère, *Hist. des Sultans Mamlouks*, II/i., p. 139 sq.).

The successor of the imprisoned Armenian patriarch Stephanos, Grigor VII of Anavarza (1293–1307) took up his residence in Sis in Cilicia, which henceforth was the seat of the Catholics. Rūm Ḳal'a, in spite of its restoration as a frontier fortress (cf. also Abu 'l-Fidā', ed. Reinaud, p. 226; al-Dimishkī, ed. Mehren, p. 214), under the Mamlūks never seems to have recovered from the blow. In 775 (1373–1374) much damage was done by floods in Ḳal'at al-Muslimin as well as in Ḥalab, al-Ruhā', al-Bira and Baghdad (al-Ḥasan b. Habib, *Durrat al-Astāk fī Dawlat al-Atrāk*, in Weijers, *Orientalia*, ii., Amsterdam 1846, p. 435).

In the spring of the year 1477 the Mamlūk sultan Ḳā'itbai made a tour of inspection as far as Ḳal'at al-Muslimin (described by al-Djirān Abu 'l-Bakā', ed. R. V. Lanzzone, *Viaggio in Palestina e Soria di Kaid Ba*, Torino 1878; transl. R. L. Devonshire, in *Bulletin I. F. A. O.*, xx., Cairo 1921, p. 1–43). After the battle of Mardj Dābiq, the fortress became Ottoman and in modern times came under the pashalik of Ḥalab (Ḥādjdī Khalifa, *Djikhān-numā*, p. 598).

The Armenian and European authors give the name Rūm Ḳal'a or Ḳal'at al-Rūm in many forms. Among the Armenians we find the forms Htōm-klay, Klay-Hōfōmakan, vulg. Arm. Oufōum-gala (works of St. Nersēs, St. Petersburg, p. 80; his poems, Venice, p. 224, 277; Indjidjean, *Altertümer Armeniens*, iii. 278; Saint-Martin, *Mémoires... de l'Arménie*, i., Paris 1818, p. 196). Gulielmus Tyrius (*Histor.*, xvii. 16) writes *Ranculath*; but it is no doubt identical with his *Rangulath* (xi. 11; French text, ed. Paulin Paris, ii., Paris 1880, p. 164), which however he takes to be a quarter

of Edessa. Schiltberger (*Reise*, p. 47) calls the fortress *Urumkula*.

Only a few remnants of the fortress now remain as well as of an Armenian monastery and a mosque (plans of the fortress in Moltke and following him in Humann-Puchstein, *Reisen...*, p. 175, and in A. Nöldeke, in *Peterm. Mitt.*, 1920, pl. 3, map: *Plan von R. K. in 1:2000*; photographs: F. Frech, in *Geogr. Zeitschr.*, xxii., 1916, pl. 1; Cumont, *Études syriennes*, p. 170, fig. 54; from the north: Humann-Puchstein, *op. cit.*, p. 176, fig. 25; from the east with the Euphrates: A. Nöldeke, *op. cit.*, pl. 13).

(E. HONIGMANN)

RUMELI, RUMELIA. The name *Rum-eli*, *Rum-ili* (i. e. land of the Rhomaeans) was given in the narrower sense to the province proper of this name, which comprised Thrace and Macedonia i. e. an area which was bounded on the north by the Balkans, in the east by the Black Sea and the Bosphorus, in the south by the sea of Marmara and the Aegean, the so-called White Sea, then by the Olympus range and in the west by the Pindos, Barnos and Shar-Dagh (Šar planina), embracing the old territories of Thrace, Bulgaria, Macedonia, Serbia and Albania as well as the ancient Hellas, with the exception however of the strip of coast and all the islands of the Aegean or Archipelago, which were a separate governorship (*djezā'ir*) under the Grand Admiral (*kapudan paša*; q. v.; after 1849 the *Djezā'ir-i Bahr-i Sefid* formed an *eyālet*, cf. *Revue de l'Orient*, xvi. 117, and later a *wiyālet*).

The governorship of Rumelia (*Rum-eli eyālet*?)

was bounded in the north by Austria and Wallachia, in the northeast by Moldavia and Russia, in the east by the Black Sea, in the southwest by the Ionian Sea and in the west by the Adriatic, in the north west by Austria and Bosnia [q. v.]. It is to be noted that these frontiers include the *sandjaks* [q. v.] belonging to the governorship of the Archipelago (*djema'ir eyaleti*) Gallipoli [q. v.], Negropont (Eghripos, Euboea) and Ainebakhti (Nau-pactos), the former of which comprised the coast from Stambul to the exit of the *Qara Su* into the Aegean Sea with a considerable stretch of land running into the interior, the second and third of which comprised the east and south coast of Greece proper with the exception of the Morea (Peloponesus). The area of the province at its greatest extent was estimated at about 5,100 square miles while the population was estimated at not more than 5—5½ millions of different nationalities (*millet*), Turks (Ottomans, who, although the ruling nation, formed the smallest part), Tatars, Greeks, Slavs, Arnauts, Armenians, Jews and Gipsies. The predominant religion was Islām, while of the Christian confessions that of the so-called non-uniat Greeks was the largest.

The residence of the *beglerbeg* of Rumelia was at first Philippopolis (Filibe, now Plovdiv), which was conquered by the Ottomans in 1363. The first governor to reside there was Lālā Shāhin Pasha, conqueror of that country, whose *türbe* is still to be seen not far from Stara Zagora. In 787 (1385) there appears Timurtash-Beg [q. v.] as *beglerbeg* (cf. J. v. Hammer, *G. O. R.*, i. 191, following Feridūn-Beg) with his residence in Sofia.

The governorship of Rumeli was divided into *sandjaks*, the number of which varied in course of time and the boundaries of which were constantly changing. About 1830 there were 24 of them, namely: Wiza, Kırk Kilise [q. v.], Silistria (Silistra), Nikopolis [q. v.], Widin, Sofia, Çirmen, Küstendil, Selānik [q. v.], Tirhala (Trikkala; q. v.), Yānia (Ioānnina), Delōnia (Delvina), Awlōna (Valona), Elbašan (cf. F. Babinger, *Die Gründung von Elbasan*, in *M.S.O.S.*, ii., vol. xxiv., 1931, p. 84—93), Iskenderiye (Scutari, Albania), Dukaghin (Dukadzin), Okhri (Ohrid, Ochrida), Perzerin (Prizren), Velētrina (Vučitrn), Üsküb (Skoplje), Aladja Hışar (Kruševac) and Semendria (Semendria, Smederovo). By an imperial *khatt-i sherif* of 6th Rabi' I 1252 (June 21, 1836) the area under the *Rüm-ili wālisī*, governor of Rumelia, was redefined. As previously the position of Sofia as the centre of administration had favoured the rebellion of treacherous vassals and attempts to secure independence by the mountain tribes especially in Albania, Monastir (Toli Monastir, now Bitolj) at the S. E. extremity of this area was chosen as the centre of government. The province of the *Rüm-ili wālisī* was divided as follows: 1. the district of the town of Monastir directly under the governor, 2. the personal estates of the sultān's mother (*wālide*) or the land of Okhri, 3. the *sandjaks* of Elbašan, Kavaja, Tirana [q. v.] and Lesh (Alessio), which were governed by Arnaut governors who could be dismissed, 4. the *paschaliks* of Ishkodra (Iskenderiye, Scutari), Perzerin (Prizren) and Ipek (Peć) which were under military officers (generals of division, *ferik's*), 5. the *a'yānlik's* Podgorica, Bar (Antivari), Ulcinj (Dulcigno), which were under native hereditary *a'yān* whose powers

were very minutely regulated, 6. the districts of Zadrim, Mirdit, Dibra (Debar) which were under chiefs self-elected, the only Turkish officials being those who collected the taxes. The *paschaliks* of Priština, Niš [q. v.] and Tetovo, originally part of the *eyalet* of Rumili, were transferred in 1839 to the *müşir* of Sofia. The *paschaliks* of Üsküb (Skoplje) and Kalkandelen (Tetovo) were only under the political supervision and not the administration of the *Rumili wālisī*, while the northern Arnaut tribes and Montenegro (Karadagh), although nominally under the governor of Rumeli and in particular the pasha of Scutari, in reality were in no organic connection with the Ottoman government (cf. Josef Müller, *Albanien, Rumelien und die österreichisch-montenegrinische Gränze*, Prague 1844, p. 2—3). The remainder of the former Rumili was divided into *paschaliks* of which Adrianople (formerly called "*sandjak* of Çirmen"), as Adrianople was the chief residence of the sultān; in 1840 there were still law-courts in Çirmen) and the three Bulgarian *paschaliks* of Ruschuk [q. v.], Vidin and Silistria were the most important (cf. Ami Boué, *La Turquie d'Europe*, vol. iii., Paris 1840, p. 181—189 with further details of the division and of the officials in 1840). The division continued to change frequently so that J. Gg. v. Hahn in 1860 found the *eyalet* of Rumelia divided into four *livās*, namely Ishkodra, Okhri, Monastir and Kesriye (Kastoria) of which Ochrida comprised the whole of Central Albania i. e. down to the coast of the Adriatic (cf. J. Gg. v. Hahn, *Reise von Belgrad nach Salonik*, Vienna 1861, p. 116 = *Denkschriften der Wiener Ak. der Wiss., phil.-hist. Kl.*, vol. xi.). Rumelia remained divided in this way until 1864, when the first *wilāyet* law — i. e. the law the object of which was to create larger provinces and entrust them to able governors — was promulgated. The new governors were to carry through the progressive plans of the government with the help of expert officials and numerous subordinate governors (*mutesarrifs*). The governor-generalships, formerly *eyālets*, now called *wilāyets* at the head of which was a *wāli*, remained divided into *livās*, formerly *sandjaks*, at the head of which was a *mutesarrif*. As a model province the Danube *wilāyet* (*Tuna wilāyeti*) was first created in Radjab 1281 (Dec. 1864) and entrusted to Midhat Pasha [q. v.] who had already made a name for himself as governor of Niš and Prizren. The *wilāyets* of Salonica and Yānia (Ioānnina) were formed in 1867. The name Rumili, Rumelia disappeared completely until it was revived in 1878. In this year by the treaty of Berlin, the new principality of Bulgaria, which was declared an independent tributary principality recognising the suzerainty of the sultān, was created and limited to Bulgaria on the Danube, the former Danube *wilāyet* (*Tuna Wilāyeti*). From the trans-Balkan district of southern Bulgaria, an autonomous province of Turkey was formed and called eastern Rumelia (cf. Carl v. Sax, *Geschichte des Machtverfalls der Türkei*², Berlin 1913, p. 373, 446). Aleko Pasha from 1879 to 1884 and Gavril Pasha from 1884 to 1885 acted as governors there. Western Rumelia formed part of the Ottoman empire and was divided into three *wilāyets*: Adrianople, Salonica and Monastir. While Eastern Rumelia was occupied by the Bulgars in 1885, by the peace of Bucarest (1913) Monastir (Bitolj) was ceded to Serbia and Salonica to Greece and

only the *wilāyet* of Adrianople [q. v.] remained to the Ottoman empire.

The history of Islām in Rumeli, which is closely associated with the expansion of Ottoman power on European soil, is still very obscure, at least as regards the xivth-xvth century. Political dissensions and the mixture of peoples favoured in Rumelia more than elsewhere the formation of sects, so that even directly after the arrival of the Ottoman on European soil (cf. Johs. Draeseke, *Der Übergang der Osmanen nach Europa im XIV. Jahrh., in Neues Jahrbuch für das klassische Altertum*, xxxi. 7 sqq. and H. A. Gibbons, *The Foundation of the Ottoman Empire*, Oxford 1916), perhaps even earlier in the Byzantine period, as is clearly shown by the not sufficiently explained problem of the *Shi'ī* sectarian *Şarī Saltık Dede* (q. v.; i. e. "Father Yellow Pate", as an English traveller of 1652 explains the strange name), not to speak of the obscure history of the Turks in the Wardar valley (Wardariots), all kinds of Muslim sects developed in Rumeli, the study of which has not yet been begun. Islām was built upon all kinds of religious ideas and a kind of syncretism was created which raises difficult problems for the study of religions. In particular we must recall the converts to Islām, formerly Bogomiles, who inhabited certain areas of Bulgaria, Bosnia and the Herzegovina, and the Muslim sects and derwish monasteries of northern Bulgaria, where the *Kızılbaşes* have flourished down to the present day, being undoubtedly favoured in their rise by the remarkable sectarian *Şaikh* Badr al-Dīn Maḥmūd (d. 1416 in Serres; cf. IBN KĀDĪ SIMAWNA and Fr. Babinger, *Sheikh Bedr ed-Dīn, der Sohn des Richters von Simaw*, Berlin and Leipzig 1921), who gained an astonishingly large following in Southern Bulgaria, particularly in Deli Orman [q. v.]. Closely connected with the advance of Ottoman power is the history of the *Bektashīs* [q. v.] in Rumeli. They founded settlement everywhere (cf. F. W. Hasluck, *Christianity and Islam under the Sultans*, Oxford 1929, 2 vols.), and quickly propagated *Shi'a* views as far as the coast of the Adriatic. At the same time in Bulgaria, in the inaccessible forests of the vast Deli Orman, the *Kızılbaşes* seem to have made considerable progress (cf. thereon also T. Kowalski, *Les Turcs et la langue turque de la Bulgarie du Nord-Est*, Cracow 1933). Their still unelucidated history there seems to be closely connected with the holy man Demir Baba and his brothers and descendants who are still to be found there (cf. F. Babinger, *Das Bektashikloster von Demir Baba*, in *M. S. O. S.*, ii., vol. xxxiv., Berlin 1931, p. 84 sqq.; cf. thereon already Ewliyā Çelebi, *Siyāhatnāme*, vol. v., p. 579). After the prohibition of the derwish orders in Turkey, banished *shaikhs* and monks to some extent have sought refuge here and found followers. As well as in Bulgaria the derwishes have flourished in the modern Southern Serbia where monasteries of the different orders are still to be found (cf. D. G. Gadžanov, in vol. i. of the *Makedonski Pregled*, Sofia 1925, p. 59—66). A problem not yet fully explained is raised by the Pomaks [q. v.] in the Rhodope mountains and round Lofča (now Loveč; the so-called *Pomak nāhiye*; cf. A. Boué, *loc. cit.*, vol. ii., p. 24) and the Gagauz on the coast of the Black Sea. But even the history of official Islām in Rumelia still requires investigation. It is certain that in many places like Adrianople [q. v.], Philippopolis,

Sofia, Šumla (Šumen), Razgrad (Hezarghrad), Dupnica, Küstendil, Lofča (Loveč), Plevna (Pleven) where there were the numerous and rich *wakfs* and buildings of the *Mikhal-oghlu*; cf. Jordan Trifunov, *Istoria na grada Plēven do osvoboditel-nata vojna*, Sofia 1933, p. 35—41), Üsküb, İstip (Štip), Prizren, Priština, Kaḳandelen (Tetovo), Prilep, Monastir (Toli-Monastir, Bitolj), and particularly in Thessaly and Macedonia, there were formed centres of Muslim culture, as the schools, mosques etc. founded there show. In these centres were born men who made a name for themselves in the intellectual history of Turkey. Üsküb, Prizren and Priština in particular are rich in such names and it may be assumed that their bearers were mainly South Slavs converted to and Islām. Epirus Albania play a special part in the cultural history of Islām; from there the Ottoman empire, apart from Bosnia and the Herzegovina, drew its ablest and greatest statesmen and generals, for the supply was in the main maintained by the tribute of youths (*dewshirme*; q. v.) levied in the Balkans. The number of men born in Rumelia who played an important part in the political and intellectual life of Turkey is legion. They were almost exclusively natives, not Ottoman immigrants, the number of whom must always have been small, as the Turks confined themselves to exploiting the land, divided into large and small fiefs (*zi'āmet* and *tīmār*; q. v.). Ami Boué put the number of Turkish fiefs at 614 *zi'āmet* and 8,360 *tīmār* (cf. A. Boué, *La Turquie d'Europe*, vol. iii., Paris 1840, p. 182, without however saying to what date his figures refer).

The rule of the Ottomans in Rumeli, which began with the crossing of the Turks to European soil (1356—1357) and soon found visible expression in the capture of Adrianople in the spring of 1361 (cf. F. Babinger, in *M. O. G.*, ii. 311 and the article *ORKHAN*), is only very superficially known, so far as the xivth and even the first half of the xvth century is concerned. It is to be supposed that certain bases such as Salonica frequently changed hands, which is the simplest way to explain the different dates given of the capture of this town for example. In view of the great political dismemberment of S. E. Europe the advance of the Ottomans met with varying degrees of resistance, and it looks as if the great Ottoman generals of the xivth and xvth centuries, who distinguished themselves on Rumelian soil and soon won tremendous influence as margraves and great landowners — e. g. the Ewrenos-oghlu, the Mikhal-oghlu, the Timurtash-oghlu, the Malkoç-oghlu, the Kawanos-oghlu, a "feudal family of Asia Minor" (C. J. Jireček), who ruled in and around Tatar Bazar-djık since the xvith century, but perhaps already much earlier, till the year 1835 when the *wālī* of Rumelia for the second time Kawanos-zāde Ḥusain Paşa died (cf. *Sidjill-i 'othmānī*, ii. 223 sq. and *ibid.*, ii. 206), families [see the articles on them] who were able to hold their hereditary estates in some cases down to the sixteenth century — were able to win over by an elastic policy the people who had lost their own princes and chiefs. In the course of centuries some tribal chiefs were here and there (especially in Albania and Epirus and in Thessaly) to make themselves more or less independent of the Porte so that they had to be granted a certain degree of autonomy. This is shown by the case of the Yürükbeys, of whom there were 7 in Rumelia about 1840, and

particularly of the *ayān* in Albania who were able to make themselves more or less independent. The case of 'Alī Pasha of Janina [q. v.] and his whole family is the most eloquent example of this. Although the decline of Turkish rule in Rumelia has now been going on for over a century, the influence of Turkish culture there is in many ways so distinct that even if there were no monuments of the Muslim period to recall the past, it will remain in manners, customs and traditions.

Bibliography: In addition to the numerous books of travel of all periods which form the most important source for the history of Turkish rule in Rumelia and of which the following are specially important: A. Griesebach, *Reise durch Rumelien und nach Brussa im Jahre 1839*, Göttingen 1841; Josef Müller, *Albanien, Rumelien etc.*, Prague 1844; Ami Boué, *La Turquie d'Europe*, Paris 1840 (fundamental work also in German: *Die europäische Türkei*, Vienna 1889); also his *Recueil d'Itinéraires dans la Turquie d'Europe. Détails géographiques, topographiques et statistiques sur cet empire*, Vienna 1854; the following may also be consulted: Maximilian Friedrich Thielen, *Die europäische Türkei*, intended as a work of reference for the newspaper reader, Vienna 1828; also A. M. Perrot, *Itinéraire de la Turquie d'Europe et des provinces danubiennes. Description géographique et militaire de toutes les routes, villes, forteresses et ports de mer de cet empire*, Paris 1855; C. Mostras, *Dictionnaire géographique de l'Empire Ottoman*, Paris 1873; É. Isambert, *Itinéraire descriptif de l'Orient*, Paris 1874; very full statistics regarding administration, population, religion etc. of Rumelia are given in the following: A. Ubicini and Pavet de Courteille, *État présent de l'Empire Ottoman d'après le Salnâme (annuaire impérial) pour l'année 1293 de l'hégire (1875—1876)*, Paris 1876 and T. X. Bianchi, *Le premier Annuaire de l'empire ottoman, publié à Constantinople pour l'année de l'hégire 1263 (1847)*, Paris 1848; A. Ubicini, *Lettres sur la Turquie*, Paris 1854 (reprinted from the years 1850—1852 of the *Moniteur Universel*, also English *Letters on Turkey*, London 1856 and Italian *Lettere sulla Turchia*, Milan 1853); F. Crousse, *La Péninsule gréco-slave, son passé, son présent et son avenir*, Paris 1876; Bianconi, *Ethnographie et statistique de la Turquie*, Paris 1877; Jovan Cvijić, *La Péninsule balkanique*, Paris 1918; Paul de Règla, *La Turquie officielle*, Paris 1890; Guillaume Le Jean, *Ethnographie de la Turquie d'Europe*, Paris 1861; an able survey of social conditions in Turkey in Europe about 1840 is given by Jérôme-Adolphe Blanqui (1789—1854, called Blanqui aîné) in his *Considérations sur l'état social des populations de la Turquie d'Europe*, Paris 1841, German by Hch. Roth: *Betrachtungen über den gesellschaftlichen Zustand der europäischen Türkei*, Sudenburg-Magdeburg 1846, based on a journey made in Rumelia for the French Academy on which he gave a *Rapport sur l'état social des populations de la Turquie d'Europe*, Paris 1842, and described in his *Voyage en Bulgarie pendant l'année 1841*, Paris 1843. — On the educational system in European Turkey cf. François-Adolphe Belin, *De l'instruction publique et du mouvement intellectuel en Orient*, reprint from *Le Contemporain*, revue d'économie chré-

tienne, Paris 1866. — The Slav peoples of Rumelia are dealt with by: Albert Dumont, *Le Balkan et l'Adriatique. Les Bulgares et les Albanais. L'administration en Turquie. La vie des campagnes. Le Panславisme et l'Hellénisme*, Paris 1873², Paris 1873; Cyprien Robert, *Les Slaves de Turquie, Serbes, Monténégrins, Bosniaques, Albanais et Bulgares, leurs sources, leurs tendances, et leur progrès politique*, Paris 1844 (², *ibid.*, 1852, with an *Introduction nouvelle sur leur situation pendant et depuis leurs insurrections de 1849 à 1851*); Mackenzie and Irby, *Travels in the Slavonian provinces of Turkey*, London 1866 etc.; suggestive descriptions of travel in Rumelia are given by A. Viquesnel, *Voyage dans la Turquie d'Europe. Description physique et géologique de la Thrace*, Paris 1856, with atlas; H. F. Tozer, *Researches in the Highlands of Turkey*, 2 vols., London 1869; Anton Tuma, *Die östliche Balkan-Halbinsel*, Vienna 1886; do., *Griechenland, Makedonien oder die südliche Balkan-Halbinsel*, Vienna 1888; Léon Hugonnot, *La Turquie inconnue: Roumanie, Bulgarie, Macédoine, Albanie*, Paris 1885; Dora d'Istria (i. e. Helene Prinzessin Ghica), *Excursions en Roumélie et en Morée*, Paris 1862—1863; E. Parmentier, *Voyage dans la Turquie d'Europe*, Paris 1890; James Baker, *Turkey in Europe*², London 1877 (German transl.: *Die Türken in Europa*, transl. by Karl Emil Franzos, 1st and 2nd [title] ed., Stuttgart 1878—1879; French: *La Turquie d'Europe*, Paris 1882); Sir Charles Eliot, *Turkey in Europe*², London 1908; Heinrich Barth, *Reise quer durch das Innere der europäischen Türkei* (in the Berlin *Zeitschrift für allgemeine Erdkunde*, 1863—1864, also separately). — The principal Ottoman sources for our knowledge of Rumelia are: Hādjīdī Khalifa [q. v.], *Rumeli und Bosna*, transl. by Jos. v. Hammer, Vienna 1812 (cf. thereon Fr. Taeschner, in *M.O.G.*, vol. ii., Hanover 1926, p. 308 sqq.), and the travels of Ewliyā Ćelebi [q. v.], parts of whose sections on Rumelia have been translated into various European languages: Albania: cf. Fr. Babinger, *Ewlija Ćelebi's Reisewege in Albanien*, Berlin 1930; Greece: S. A. Hudaverdolu Theodotos, in *Ελληνικά*, vol. iv., Athens 1931, p. 429—438 (cf. do., in *Message d'Athènes*, N^o. 2960 of Dec. 21, 1931: *Un voyageur turc en Grèce au XVII^{ème} siècle*) and Ioannis Spatharis, in *Θρακικά*, vol. iv., Athens 1933, p. 113—128, vol. v., Athens 1934, p. 179—217, also Jean Deny, *Un voyageur turc en Tsakonie*, in Hubert Pernot, *Introduction à l'étude du dialecte Tsakonien*, Paris 1934, p. 497—508; Bulgaria: D. G. Gadžanov, in *Periodičesko spisanie na bǎlgarskoto knižovno družestvo v Sofija*, vol. lxx., Plovdiv 1909; on South Slavia cf. the literature collected by F. Babinger, *Ewlija Ćelebi's Reisewege in Albanien*, p. 1, note; on the Dobrudža, Rumania etc. cf. the extensive literature collected by F. Babinger, *Robert Bargrave, un voyageur anglais dans les pays roumains du temps de Basile Lupu (1652)* (= *Academia Română, Memoriile secțiunii istorice, seria III, tomul XVII, mem. 7*, Bucarest 1936), p. 10, note 3. — On the Ottoman geographer Mehmed 'Ashīk b. 'Ömer, who included Rumelia in his work, cf. F. Babinger, in *M.O.G.*, i. 163 sqq. and do., *G.O.W.*, p. 138 sq.

(FRANZ BABINGER)

RUMILI HİŞÂR [See ANADOLİ HİŞÂR.]

RUPĪYA (P.), an Indian coin, a rupee. In the latter xvth and early xvth centuries the silver *tanka* [q.v.] of the sultāns of Dehli had become so debased that when Sher Shāh (1539—1545) reformed the coinage, the name could no longer be given to a silver coin. To his new silver coin, corresponding to the original fine silver *tanka*, he therefore gave the name rupīya = rupee, i.e. the silver coin (Sanskrit, *rūpya*, *rūpaka*), and *tanka* became a copper denomination. The weight of the rupee was 178 grains (11.53 grms.) and it rapidly established itself in popular favour. Under the Mughals it was struck all over India at over 200 mints and with the decline of Mughal power continued to be struck by their successors, notably the English East India Company. In the xviith century Akbar and Djahāngir struck many square rupees; on one coin of Akbar the name rupīya occurs. Djahāngir for a short period struck a heavy rupee of 220 grains (14.259 grms.), but on the whole the rupee has shown little variation in weight. In the xixth century the English rupee gradually drove the local issues out of circulation and with few exceptions the local mints have now been closed. Such native states as still issue their own rupees strike them on the same standard as the Indian government rupee.

Aḥmad Shāh Durrānī adopted the rupee as his monetary unit on becoming independent and until quite recently it remained the standard coin of Afghānistān. The Hindu kings of Assam also struck the rupee.

The Indian rupee having become current in British East Africa, it was adopted in 1890 as the standard coin of German East Africa also.

Chalmers, *History of Currency in the British Colonies*, London 1893, p. 336—340; E. Thurston, *Coinage of the East India Company*, Madras 1890; H. Yule and A. C. Burnell, *Hobson Jobson*², London 1903, s.v. rupee. (J. ALLAN)

RŪS, the Russians; at first the Normans, then the founders of the dukedom of Kiev.

The Rūs of the west. In his description of Spain Ya'qūbī, *B.G.A.*, vii. 354, says that in 229 (843—844) "the Madjūs called Rūs" invaded Seville and committed all kinds of depredations. The name Madjūs [q.v.] is regularly applied to the Normans. The name even passed into the Spanish *Primera Crónica General* (xiiith century) according to which the *Almouices* were worshippers of fire (!). The origin of this use of *madjūs* is obscure. Did the Arabs and Spaniards allude to such rites as the cremation of the dead [cf. Ibn Faḍlān]? Mas'ūdī, *Murūdj*, i. 364—365, speaking of events in Spain about 300 (912—913) also uses the term Rūs although he gives it a special meaning.

The Rūs of the east. There is quite a literature on the origin of the name of the Russians. The "Norman" school claims that the name *Rus'* belongs to the Normans; the Finns call the Swedes *Ruotsi* whence in Russian *Rus'* (Рѹсь), the name of the Finns *Suomi* similarly becomes in Russian *Sum'* (Сѹмь); the basis of *Ruotsi/Rus'* must be a Scandinavian word (cf. the names of the coast *Roslagen* and of its inhabitants

Rods-karlar "rowers"). The names of the earliest Russian princes are undoubtedly Scandinavian (R'urik < *Hroerekkr*, Igor < *Ingvær* etc.); the testimony of Constantine Porphyrogenetus (chap. ix.) is equally positive; in his list of the cataracts on the Dniepr, he gives the names "in Russian" (ῥωσσιστι) and "in Slav" (σλαβενιστι), e.g. Οὐλβορι < in Scandinavian **hólm* "isle" + *fors* "rapids" = Ὀστραβονίπρασ < in Slav *ostrov'nŷy* "of the isle" + *prag* "the cataract". The "anti-Norman" school pronounces in favour of the native origin of the name but its arguments are mainly useful to show certain contaminations of the term *Rus'* (in Greek Ῥῶς, Ῥωσία) by names in Hebrew (Ῥῶς, Ezek., Septuag., xxxviii. 2—3; xxxix. 1), Greek (ῥοσία χελάνδια "the red boats") etc. [It is evident that the *asḥāb al-Rass* mentioned in the Qur'ān with the 'Ad and Thamūd (Sūra xxv. 40 and l. 12) have nothing to do with the Araxes or the Russians, in spite of the late texts, Dimishkī, text, p. 106, transl. Mehren, p. 131 and the fancies of European commentators like v. Hammer, *Sur les origines de l'état russe*, St. Petersburg 1825, p. 24—29].

According to the Russian Chronicle, the Varangians (Var'ag; see below) came from beyond the sea in 859 and levied tribute on certain Slav and Finnish peoples until in 862 they were driven away by the latter. The civil wars which broke out soon afterwards among them, however, forced these tribes to invite from beyond the sea "the Varangians called Rus'". The *Rus'* at first settled in the region of the great Russian lakes (Ilmen, Ladoga) but in 882 Oleg (< *Helgi*) moved to Kiev. This was certainly not the first appearance of the "Russians" for previously under 839 the *Annales Bertiniani* mention the arrival at the court of Louis the Pious of a Byzantine embassy accompanied by envoys from the *Rhos* whom their king *Chacanus* had sent to Constantinople and who now wished to return home. An enquiry as to their identity showed that they were Swedes (*gentis esse Sueonum*). The Normans in Kiev were not numerous and their marriages with Slav women accelerated their assimilation. Sviatoslav (born in 942) already has a Slav name and c. 1000 the process of slavisation of the Normans was complete (cf. Thomsen, *op. cit.*, p. 123—124).

The sources of the ixth and xth centuries. The Muslim sources are acquainted with the Rūs from their first appearance in eastern Europe. Ibn Khurdādhbih, p. 154, mentions only Rūs merchants whom he regards as "a kind of Slavs" (*djins min al-Ṣaḳāliba*), and describes their journeys (by sea: from the remotest parts of the *Ṣaḳlaba* to the Black Sea, to the Khazar capital and the Caspian Sea, and by land: from Tangier to Damascus, Baghdad, Basra and then into India and China; or again they travelled still farther beyond [= to the north of] Rome through the Slav countries to reach the Khazar capital, Balkh, the lands of the Toghuzghuz and China; cf. Ibn Faḳīh, p. 271). Ibn Khurdādhbih does not assign any definite territory to the Rūs. It is true that the available text of his book is incomplete but another detail is significant. Ibn Khurdādhbih, p. 154, speaks of *nahr al-Ṣaḳāliba* "which de Goeje identifies with the Tanais (Don) [Marquart, *Streifzüge*, p. 352, reads *Tin* for *Don*]. The term later disappears from geographical literature but Ibn Ḥawḳal, p. 276, and the *Hudūd al-'Ālam*

speak of a "river of the Rūs" and although the meaning they give to the term is doubtful, it is possible that their nomenclature indicates the transformation of the *Ṣaḳālība* into *Rūs* while Ibn *Khurdādhbih* reflects the situation before the consolidation of Norman power in Russia. [In Idrīsī, ii. 385, the *Nahr al-Rūsīya* is certainly the Don].

On the other hand, the common source [Muslim b. Abi Muslim?; cf. Mas'ūdī, *Tanbih*, p. 190] used by Ibn Rusta, the *Hudūd al-'Ālam*, Gardizī, 'Awfi, etc. formally distinguishes between the Rūs and the Slavs. The latter (probably the western Slavs) lived under their own princes, while the Rūs occupied an island three days' march in length and breadth, situated in the middle of a lake. Their king bore the title of *khākān Rūs*. This version seems to refer to the sojourn of the Norman chiefs in the region of the great Russian lakes (cf. Novgorod, in Scandinavian *Hölm garðr* "the Town of the Lake"!). The *Hudūd al-'Ālam* adds that the Russians have many towns and Gardizī says that the population of the island is 100,000 men (*mardum*); these additions may reflect the gradual expansion of the Rūs or rather their amalgamation with the Slavs.

The third tradition is represented by Iṣṭakhri and Ibn Hawqal (< Abū Zaid Balkhī) who place the Rūs between Bulghār and the Slavs. The point from which the description starts must be the town of Bulghār on the Volga. Three groups of Rūs are described. The king of the group nearest the Bulghār lives in **Kūyāba* (Kiev; Const. Porphy., ch. 9: *Κιόβα, Κιόβα*). The most remote are the *Ṣalāwīya* (probably the original inhabitants of Novgorod, the *Sloveni*). The third group are the *Arthāniya* whose king lives in *Arthā* (many variants, reading doubtful). They are savages who kill strangers; they come down the rivers to export the skins of black *samūr* and lead (*riṣāṣ*). Since the time of Fraehn, *Arthā* has usually been explained as *Erz'a*, the name of the eastern branch of the Finnish people Mordva (in the basin of the Sura, a tributary of the Volga to the west of Kazan). Another explanation (Reinaud, Chwolson) which starts with the variant *ألارقا* and explains **Abārma* by Biarmia (Perm) is very doubtful. In both cases, it is necessary to suppose the previous subjection of these regions by the Rūs. In a recent work P. Smirnov seeks to prove the existence of a Russian "*khākānat*" in the region between the Volga and the Oka, cf. the incident quoted above from the *Annales Bertiniani*. Cf. also M. Vasmer, *Wikingerspuren in Russland*, in *S. B. Pr. Ak. W.*, 1931, p. 649—674, on the traces of Scandinavian place-names on the Upper Volga.

The fourth independent source is Mas'ūdī (cf. Marquart, *Streifzüge*, p. 330—353). In the *Murūdj*, ii. 15, he calls the Black Sea "Sea of the Rūs" for they are the only people who sail upon it and they live on one of its shores. This last allusion may be to the Russian colony of Tmutarakan (*Ταμταράκη*, the ancient *Θαναγόρεια* on the peninsula of Taman) [although Westberg and Marquart, *op. cit.*, suppose the Baltic to be meant here]. Among the many tribes that composed the Rūs, Mas'ūdī, *Murūdj*, ii. 18, mentions *اللودغانة* = *Tanbih*, p. 141; *الكودكانة*, who trade with Spain, Rome, Constantinople and the *Khazars*. This name is probably identical with *الأردمانيون* *al-Urdmān* <

**Nordmān* of the Arab chroniclers of Spain [cf. MAḌJŪS] and with the *Lordmani* of the Latin chronicles, i. e. the Northmen. [Marquart, *Streifzüge*, p. 352, prefers to connect the word with *الأندانية* but in Ibn *Khurdādhbih*, p. 153, this name refers to Jewish merchants].

An attempt to define the frontiers of Russian territory is made in the *Hudūd al-'Ālam* (372 = 682) but it cannot be regarded as very successful.

Of first rate importance for our knowledge of the manners and customs of the Rūs is the narrative of Ibn Faḍlān [q. v.] who in 921—922 observed the customs and funeral rites of the Russians, somewhere on the Volga, perhaps near Bulghār, quoted in Yāqūt, ii. 834—840. The Arabs knew of the expeditions of Sviatoslav against the peoples of eastern Europe (Bulghār, Burtās, Khazar), cf. Ibn Hawqal, p. 286, who dates the expedition in 358 (968—969), instead of 965 as in the Russian chronicles, but Barthold has rightly pointed out that this date really refers to the investigation conducted into the question by Ibn Hawqal, p. 282, at Djurdjān. 'Awfi [q. v.] who wrote before 633 (1236) has preserved the name of St. Vladimir (*Bulādhmīr*, popular etymology "prince of steel") who converted the Russians to Christianity in 988. 'Awfi's version (perhaps collected in *Khwārizm*) puts the date of this event in 300 (912) and adds that the Russians, whose only trade was war, had repented of their conversion and sent envoys to *Khwārizm*, from which an *imām* was sent to convert them to Islām (cf. Barthold, in *Zap.*, ix., 1895, p. 262—267). Ibn al-Aṭhīr, ix. 30 is better informed for he knows the circumstances of the marriage of the *malik al-Rūsīya* (Vladimir) to the sister of the two Byzantine emperors Basil and Constantine; but he puts the event in 375 (985—986; cf. Dimishḳī, transl. Mehren, p. 378).

The Russians on the Caspian Sea. The Muslim statements regarding Russian raids to the south of the Caspian Sea are of considerable value. At the time when the 'Alid Ḥasan b. Zaid (250—270 = 864—884) was ruling in Ṭabaristān the Rūs made a raid on Ābaskūn [q. v.]. In 297 (909—910) the Rūs coming in sixteen ships ravaged the same region. In the following year the Rūs penetrated as far as Sārī and Panjāh-hazār but suffered a defeat in Gilān (cf. Ibn Isfandiyyār, in *G. M. S.*, p. 199). This last raid, according to the commentators (F. B. Charmoy, Kunik), must have taken place in 301 (913) after Igor's accession. Mas'ūdī, *Murūdj*, ii. 18—25, describes it in detail "after 300 (912)", during the reign of the *Shirwānshāh* 'Alī b. Haitham. In 332 (943—944) the Rūs ascended the Kur and seized Bardha'a (q. v. and cf. *MUS'ĀḌIRI*; cf. the very circumstantial record in Ibn Miskawaih, *The Eclipse*, ii. 62—67). Dorn's *Caspia*, a book written without any definite system but full of facts, deals especially with these raids. Cf. also Barthold, *M'esto prikasp'iyskikh oblastey*, Baku 1925.

Warank. Another name applied to the Normans, *Warank* (old Russ. *Varęgū*), usually explained as "member of a merchant association who has taken the oath", from the Scandinavian *vár* "promise, contract", is found in Muslim literature at a much later date. Abu 'l-Fidā', ed. Reinaud, p. 35, says that he found the term *Bahr-Warank* only in al-Bīrūnī and in the *Tadhkira* of Naṣīr al-Dīn Ṭūsī. Cf. al-Bīrūnī, *al-Tafhīm*, ed. R. Wright, 1934,

p. 121, on a large gulf (the Baltic Sea) which separates from the *Baḥr al-Muḥiṭ* and extends north of the Ṣaḫāliba as far as the vicinity of the Muslim Bulghars.

Idrīsī. After the tenth century Idrīsī alone affords any independent information about the Rūs, under clime vi., sect. 5 (the river of the Russians, the towns along the Dniepr) and clime vii., sect. 4 and 5 (the sources of the *Dnys't*, Dniester, Russia and Ḳumāniya, i. e. the land of the Comans); cf. Jaubert's transl., ii. 395—398, 401, 404, 433—434, and the passage (clime vii., sect. 5) transcribed in O. Tallgren-Tuulio, *Idrīsī. La Finlande*, Helsingfors 1930 (*Soc. Orient. Fennica*), p. 115—121. Idrīsī however confuses traditional and contemporary data by putting them in juxtaposition, e. g. *Kūyāba* is mentioned alongside of *Kāw* (Kiev).

Persian poetry. Nizāmī in his *Iskandar-nāma* celebrates Alexander's campaign against the Russians who had devastated Bardha'a and carried off queen Nūshāba, an ally of Alexander's. The king of the Russians who rules over the Burtās, the Khazar, the Alans, the Isū (in Russian *Ves'*) etc., is called

قنطال, perhaps a corruption in transcribing or in hearing the title *kinnāz* (Russ. *knez'*) already found in Ibn Khurdādhbih, p. 17. Cf. F. Erdmann, *De expeditione Russorum Berdaam versus*, Kazan 1826, 1828, 1832, 3 vols., and the French translation by F. B. Charmoy, *L'expédition d'Alexandre*, St. Petersburg 1829, English by H. W. Clarke, 1881, *The Sikandar-nama*, p. 663—664, German by G. Jacob, *Iskanders Warägerfeldzug*, 1932 (free and incomplete version). In the *Haft Paikar* of Nizāmī, ed. H. Ritter and Rypka, 1934, p. 11, 178—196 (transl. C. E. Wilson, i. 171—188), is found the daughter of the king of the fourth clime (*sic*), "the fair Slavonian, rosy-red of cheek" who tells a story that happened in a "Russian" town. There is more reality in the odes of Khākānī dedicated to the Shīrwānshāh Akhsitān (530—590 = 1135—1193) from which we learn of a raid by the Russians which this ruler successfully repelled; cf. Khānīkov, in *Bull. Ac. SPb.*, xiv., No. 23—24 (= *Mél. Asiat.*, iii. 114—136).

From the Mongol period. The statements by the later writers regarding the Russians are very fragmentary; cf. for the Mongol period: Djuwainī, i. 224; Abu 'l-Fidā', p. 201, 207 (the Russians, a Turkish tribe), p. 222; Dimishkī, transl. Mehren, p. 131, 378 (the Russians live on the islands of the Maeotis, probably confused with a northern lake); Mustawfī, *Nuṣḥat al-Ḳulūb*, p. 264; and for the period of Timūr: *Zafar-nāma*, i. 759—762 (as well as the geographical introduction to the *Zafar-nāma*, Br. Mus. MS. Or. 18406, fol. 13^b, on the Rūs, descendants of Japhet).

Turkish libraries and archives must contain important information about Russia; cf. Babinger, *G.O.W.*, p. 310 and index, as well as the journal of a Turkish officer at St. Petersburg in the time of Catherine II, quoted in V. D. Smirnow, *Obras. proizv. osm. liter.*, St. Petersburg 1891, p. 228—242 (wanting in the edition of 1903). In Persia the Ṣafawī chronicles only mention briefly the Russian embassies; the chronicles of the Ḳādjārs, such as the *Ma'āthir-i sulṭānī* of 'Abd al-Razzāk b. Nadjaf-ḳulī (transl. Brydges), the *Rawḍat al-Safā-yi Nāsirī* of Riḍā-ḳulī Khān, and the *Nāsiḫ al-Tawārīkh* of Siphīr [q. v.], contain information about the Russo-Persian wars and the subsequent

negotiations [cf. TEHERAN]; a curious paragraph no the Russians is to be found in the *Bustān al-Siyāḥa* of Zain al-'Ābidīn Shīrwānī, Teheran 1315, p. 299; of no value from the geographical point of view, it is curious as reflecting the ideas of the Persians about 1830: the Russians, like the other *Firang*, are clever in worldly matters (*dar šurat-garī*), but devoid of spirituality (*djān nadārand*).

Bibliography: See the article SLAVS. — A bibliography of the Muslim sources will be found in the commentary on the *Ḥudūd al-'Ālam* by V. Minorsky (in *G.M.S.*, in the press). The principal studies on the Muḥammadan sources are: Fraehn, *Ibn Foszlans und anderer Araber Berichten über die Russen*, St. Petersburg 1823; Chwolson, *Izvestiya Ibn Dasta* (read: *Ibn Rusta*) etc., St. Petersburg 1869; Garkavi (Harkavy), *Skazaniya musulm. pisateley*, St. Petersburg 1870 and 1871 (translations from 26 + 6 Arab authors; on the necessity for a new edition of these texts and the preparation of a *Corpus* of Arabic sources on the Russians etc. see Kračkovskiy, in *Zap. Inst. Vost.*, 1932, i. 55—62); Dorn, and Kunik, in *Caspia*, in *Mém. Ac. SPb.*, series vii., vol. xxiii., No. 1, 1875 (Russian edition *ibid.*, vol. xxvi., app. i., 1875); Kunik and Rosen, *Izvestiya al-Bekri*, St. Petersburg, i. (1878) and ii. (1903); A. Seippel, *Rerum Normannicarum fontes arabici*, fasciculus i., textum continens, Christiania, i. (1896), ii. (1928) (variants, critical remarks); Westberg, *Zur Klärung oriental. Quellen*, in *Bull. Ac. SPb.*, 1899, vol. xi, No. 4 and 5, and *Aknalizu vostočnikh istočnikov*, in *Jour. Min. Nar. Prosv.*, 1909, xiii. and xiv.; Marquart, *Streifzüge*, p. 330—353 (Mas'ūdī on the Rūs). A general survey of the literature on Russian origins has recently been given by V. Mošin, *Var'ago-russkiy vopros*, in *Slavia*, x. (1931), 1—3. A still valuable survey is that of Thomsen, *The relations between Russia and Scandinavia and the origin of the Russian state*, Oxford 1877 (new edition in Thomsen, *Samlede Afhandlingar*, i., 1919, p. 231—444); many difficult questions are dealt with in the works of Kunik, Marquart, *Streifzüge*, *passim*, and Westberg. Among recent works must be mentioned P. Smirnov, *Vol'skiy shlakh* ("The Volga route and the early Russians"), Kiev 1928 (in Ukrainian; an original work). (V. MINORSKY)

AL-RUṢĀFA (RUṢĀFAT AL-SHA'M, RUṢĀFAT HISHĀM), a town in the desert in the Syrian Palmyrene, 4 farsakhs or 25 miles south of the Euphrates.

The town already bore this name in the pre-Muḥammadan period. The Assyrian lists of eponyms mention in the years 840, 838, 804, 775, 747, and 737 B. C., a town Ra-ṣap-pa as the residence of the Assyrian governor (*shaknu*). On a relief stèle of Adadnirari IV Raṣappa is mentioned among the lands governed by Urīgallu-eresh and formed with Ḳatni (now Tell Djellal on the Khābūr) an administrative district (Unger, *Reliefstèle Adadnirari's III. aus Saba'a*, Publikationen der Ksrli. Osmanischen Museen, ii., Stambul 1916, p. 10—12, pl. 2, l. 23 *sqq.*). The identification of Raṣappa with Beled Sindjār by E. Forrer (*Provinzeinteilung des assyr. Reiches*, Leipzig 1921, p. 15) can hardly be maintained (Musil, *The Middle Euphrates*, New York 1927, p. 210 *sq.*). In the Bible (2 Kings xix. 12; Isaiah xxxvii. 12) Resef, for which we should no doubt read Reṣaf, is mentioned along

with Gozan, Ḥaran and Benē 'Eden in Tēlassar. Ptolemy (*Geogr.*, v. 14, 19) mentions our town in Palmyrene as Ῥωσάφα; the *Tabula Peutingeriana* writes Risapa, the geographer of Ravenna (*Cosmogr.*, ii. 15, ed. Pinder-Parthey, p. 89, 1) Risapha, the *Notitia dignitatum* (or., xxxiii. 5, 27) Rosafa, the Metropolitan Alexander of Hierapolis in a letter (*Acta Concil. Oecumen.*, ed. E. Schwartz, tom. i. vol. iv., p. 171, 28) Rasapha. The name (cf. *Rasīf*) means "cemented road" (Clermont-Ganneau, in *R. A. O.*, iv., 1901, p. 112 sq.).

About 434 the town was raised to be a bishopric against the otherwise usual practice by the patriarch Ioannes of Antioch, not by the Metropolitan Alexander of Hierapolis. It was then famous for its church of St. Sergios dedicated to the memory of the martyrdom of the two officers of the imperial palace Sergios and Bacchos ("in the reign of Maximianos") (the *Acta Martyr.*, ed. in Greek by Delahaye, in *Anal. Boll.*, xiv. 373—395; in Syriac by Bedjan, *Acta martyri. et sanctor.*, iii. 283—322, do not bear historical criticism: Harnack, *Chronologie der altchristl. Litteratur*, ii. 481, note; Delahaye, in *Anal. Boll.*, xxiii. 478). The first bishop of Ῥωσάφα was Marinianos, who is mentioned in 434, 444 and 451 (is not mentioned in the list of bishops of Resapha-Sergiopolis in Le Quien, in *O. C.*, ii. 951 sq.; cf. E. Honigmann, in *Oriens Christianus*, xii. 214—217). The emperor Anastasius (491—518) had the thumb of St. Sergios brought from Resapha to Constantinople and stories of the miracles associated with this relic spread even as far as Gaul (Gregor. Turonens., *Hist. Francor.*, vii. 31). In honour of this event the town was given the name Sergiopolis and the privileges of an ecclesiastical metropolis (Ioannes Diakrinomenos in Cramer, *Anecdota Graeca e codd. Paris.*, ii. 109). Perhaps we have Σεργιοπολίτου as early as 512 in the trilingual inscription of Zebed (Neubauer in Sachau, *Reise in Syrien und Mesopotamien*, p. 126, note 1; otherwise in Prentice, *Publ. of the Americ. Archaeol. Exped., Greek and Latin Inscr.*, p. 262). Georgios Kyprios (ed. Gelzer, v. 863) knows as a third name of the town Ἀναστασιούπολις, the correctness of which has wrongly been doubted; probably the great basilica in al-Ruṣāfa also dates from this emperor (Dussaud, *Topographie de la Syrie*, p. 254, who however also wrongly takes Tetrapyrgia to be a name of al-Ruṣāfa). The Syriac name also remained in use (ῥδ [Ῥε]σάφας: Ioannes Moschos, *Pratum spirituale*, chap. 180, in Migne, *Patr. Graec.*, lxxxvii/iii., col. 3052). The Armenian Basileios who in the ixth century sought to transform the profane geography of Georgios Kyprios into an ecclesiastical handbook added to the town the epithet ἡ σήμερον Ῥατταφά (M. Hartmann, in *Z. A.*, xiv. 340 sq.; Chapot, *La Frontière de l'Euphrate*, p. 330, note 8).

Rabban Bar 'Idtā (d. Jan. 8, 611), the teacher of the Persian Yōhannān who wrote his life (Baumstark, *Gesch. d. syr. Litt.*, p. 203, § 31b), was born in Ruṣāfa (E. A. W. Budge, *The history of Rabban Ḥormīz the Persian and Rabban Bar 'Idtā*, i., London 1902, p. 115).

The town, which was situated in the desert βαρβαρικὸν πεδίον (Procop., *Bell. Pers.*, ii. 5, 29; Theophyl. Simoc., ed. de Boor, v. 13, 3; Syriac, *Barbarāyā*: Kugener, in *Oriens Christ.*, 1907, p. 408—412), was at first defended against the Saracens only by fortifications of no great strength; Justinian is said to have been the first to surround

it with proper walls (probably before 542 A. D.) (Procop., *De aedif.*, ii. 9, 3; 9), a statement which however the results of modern archaeological research show to be exaggerated (Herzfeld in Sarre-Herzfeld, *Archäol. Reise*, i. 138; Guyer, *ibid.*, ii. 28, 37). Justinian also built bazaars and other fine buildings and large cisterns to provide the town with water (Procop., *De aed.*, ii. 9, 6 sqq.).

Khusrāw I, who on his campaign to Syria in 540 had been promised by Kandidos, bishop of Sergiopolis, 200 pounds of gold for the ransom of 12,000 captured inhabitants of Sūra on the Euphrates, on his third campaign in 542 took prisoner the bishop, who had come to meet him to make excuses for not carrying out his promises, and sent a force against the town, which had however soon to withdraw on account of the lack of water (Procop., *Bell. Pers.*, ii. 20, 2—14). Half a century later, the story was already told of the miraculous rescue of the defenceless city by St. Sergios and his heavenly forces (Euagrios, *Hist. eccl.*, iv. 28). About 570 there were five bishoprics under the metropolitan of Sergiopolis (*Notitia Antiochena*, in *Byz. Zeitschr.*, xxv., 1924, p. 75, 83). Besides the already mentioned bishops Marinianos and Kandidos we know of the following metropolitans: in 524 Sargis (Sergios) of Bēth Rōṣāfā (Guidi, in *Atti della R. Accad. dei Lincei*, 1881, p. 507), in 550 Joseph, bishop of the Sacred Monastery of Raṣīfā (Assemani, in *B. O.*, i. 117), 553 Abraamios (Mansi, ix. 390; Wright, *Catal. syr. MSS. Brit. Mus.*, ii. 797b), between 793 and 986 Michael Syrus (*Chron.*, transl. Chabot, iii. 451 sqq., 501 sq.) mentions eleven further Jacobite bishops, and from inscriptions we know of a certain Sergios (between 910 and 922; cf. Mich. Syr., iii. 462, N^o. 18) and Simeon, who, in 1093, restored the great Basilica (Musil, *Palmyrena*, p. 160, 267 sq.).

The veneration and pious awe which was generally felt with regard to the sanctity of the place is shown with particular clearness in the fact that the Ghassānid al-Mundhir b. Ḥārith only dared to meet the Byzantine envoys here (summer of 578) as he felt himself safe nowhere else from their treachery (Johann. Ephes., vi. 4; Nöldeke, in *Abh. Pr. Ak. W.*, 1887, p. 24). At this time the town was apparently not in the possession of the Ghassānid; the inscription ascribed to him *νικῆ ἡ τύχη Ἀλαμουνδάρου*, which was found at the "Central Church extra muros" also indicates that the inner town was still Roman at this date.

In the sanctuary of Sergios at a later date among the gifts dedicated to the saint was shown a richly decorated cross given by Justinian and Theodora, then taken to Persia by Khusrāw I after the plundering of Kallinikos and Barbalissos (Mich. Syr., iv. 296), but given back by his grandson Khusrāw II with another cross and a gift, both of which bore long inscriptions (Euagrios, *Hist. eccl.*, iv. 28; vi. 21; Niceph. Kallist., *Hist. eccl.*, xviii. 21 sq.; Theophyl. Sim., v. 13; Firdawsī 1946, in Nöldeke, *Tabari*, p. 287, note 1; C. de Boor, in *Zeitschr. f. Kirchengesch.*, v. 315—322). On his flight to the Byzantines Khusrāw II lived in 590 in Edessa in the house of the general Johannes Rōṣāfāyā, a member of the family of the Bēth Rōṣāfāyē (Mich. Syr., ii. 380, 412; Barhebraeus, *Chron. eccl.*, i. 271).

The cistern built by Justinian and later destroyed by a Lakhmid is said to have been restored by the Ghassānid Nu'mān b. al-Ḥārith b. al-Aiham (Hamza al-Iṣfahānī, *Ta'rikh*, ed. Gottwaldt, p. 120;

Yākūt, ii. 784; against Nöldeke, in *Abh. Pr. Ak. W.*, 1887, p. 51, who says al-Ḥārith b. Djabala, cf. E. Herzfeld, *Arch. Reise*, i. 138, note 5; *Jahrb. d. Preuss. Kunstsammlungen*, 1921, p. 112 sq.).

In the Islāmic period this desert town sprang into fame when the caliph Hishām b. 'Abd al-Malik, who as a prince had moved his *bādiya* from the midge-plagued Euphrates thither, made it his residence in 105 (723–724); he died and was buried here in 125 (743) (al-Ṭabarī, *Ta'rikh*, ed. de Goeje, ii. 1467, 1729 sq., 1737 sq.; al-Balādhuri, ed. de Goeje, p. 179 sq., 186; H. Lammens, in *M. F. O. B.*, iv. 94 sq.). The town therefore received the name of Ruṣāfat Hishām (al-Balādhuri, *op. cit.*, to distinguish it from Ruṣāfat Baghdād, the eastern suburb of Baghdād with the palace of the same name, cf. vol. i., p. 565); it was also called Ruṣāfat al-Sha'm. Whether Hishām did a great deal of building is doubtful (cf. E. Reitemeyer, *Die Städtegründungen der Araber*, p. 75).

Other Omayyads also lived occasionally in this town; for example Marwān, Sulaimān b. Hishām and Muḥammad b. al-Walid (al-Ṭabarī, ii. 1897, 1908; iii. 95, 98; Yākūt, ii. 786; Herzfeld, *Arch. Reise*, i. 139). Shortly after Hishām's death, his successor al-Walid ordered the confiscation of all his predecessor's property in al-Ruṣāfa (al-Ṭabarī, ii. 1751). Sulaimān b. Hishām gathered an army in al-Ruṣāfa in 127 (745), and then encamped opposite Marwān II's army at Kinnasrīn; after his defeat he came back to al-Ruṣāfa (al-Ṭabarī, ii. 1896 sq., 1908; Mich. Syr., ii. 505). The 'Abbāsīd 'Abd Allāh b. 'Alī came in 132 (749–750) to al-Ruṣāfa and dishonoured and burned the embalmed body of Hishām (al-Ya'qūbī, ed. Houtsma, ii. 427 sq.). 'Abd Allāh b. 'Alī [q. v.] spent a night here when fleeing before the army of his nephew Abū Dja'far al-Manṣūr in 754 (Ṭabarī, iii. 98).

In the spring of 244 (858) Mutawakkil came from Damascus to visit the town in order to see the palaces of Hishām and Sulaimān and the old Byzantine monastery (al-Bakrī, ed. Wüstenfeld, p. 379). The sons of Zikrwaih b. Mihrwaih al-Karṣatī fell upon the town in 289 (902) along with the Bani al-Aṣḡagh by order of Subk al-Dailamī, a mawlā of the caliph Mu'taḍid, murdered the inhabitants, burned the mosque and laid waste the neighbouring villages (Ṭabarī, iii. 2219). Ibn al-Faḳīh (in 295 = 908) again mentions al-Ruṣāfa as a flourishing town. Saif al-Dawla passed in 344 (955) from Salāmya via Tadmur, 'Urd and al-Ruṣāfa to al-Raḳqa (M. Canard, *Sayf al-Dawla*, Algiers–Paris 1934, p. 226, 230).

The Arab geographers describe al-Ruṣāfa as situated in the middle of barren desert land; its inhabitants drank only water from cisterns within its walls or when this failed they had to bring water from the Euphrates 3–4 farsakhs distant. Al-Aṣma'ī, who died in 215 (830), tutor of Ḥārūn al-Raṣhīd, identifies the town with al-Zawra' and mentions the wonderful monastery there. The inhabitants had to pay tribute to the Banū Khafāḍja in return for which they were protected. The rich inhabitants were merchants or landowners, the Beduins were labourers. As a flourishing domestic industry the weaving of woollen garments is mentioned (al-Aṣma'ī in Yākūt, ii. 784); in addition to articles of clothing, bags and sacks were manufactured (al-Ḳazwīnī, *Adja'ib*, ed. Wü-

stenfeld, ii. 132 sq.). According to Ibn Buṭlān (in Yākūt, ii. 784 sq.), Ḳaṣr al-Ruṣāfa was smaller than the Dār al-Khalāfa of Baghdād. He describes the church, the outside of which was adorned with gold mosaics, and says it was built by Constantine, son of Helena. Below this church and of the same dimensions was a subterranean cistern panelled with alabaster slabs. The inhabitants of the fortress were for the most part Christians who earned their living by guarding caravans and transporting merchandise, but they also made bargains with thieves and robbers. The desert around al-Ruṣāfa is so flat that one can see to the horizon on all sides. According to al-Idrīsī (transl. Jaubert, ii. 137), the town in his day (1154) had a flourishing market; a much used road led from there through the desert to Salāmya and Ḥimṣ. Yākūt was still able to see in the centre of Ruṣāfat Hishām the monastery of al-Ruṣāfa which, on account of its architectural beauty, he describes as one of the wonders of the world (Yākūt, ii. 660 sq., s. v. *Dair al-Ruṣāfa*). Abu 'l-Fiḍā' (ed. Reinaud, p. 271) gives the distance of the town from the Euphrates as less than a day's journey.

In 1240 the Khwārizmians on their return from Syria came via Salāmya to al-Ruṣāfa; troops from Ḥalab followed them and fought them at Ṣifīn (Abu 'l-Fiḍā', *Annales Muslem.*, ed. Reiske-Adler, iv. 458). In 668 (1269) the inhabitants of al-Ruṣāfa fled from fear of the Mongols to Salāmya; henceforth the town remained uninhabited (B. Moritz, in *Z. G. Erdk. Berl.*, xiii. 174 sqq.; *M. S. O. S. As.*, i., 1898, p. 144).

In 1300 al-Dimishkī (ed. Mehren, p. 205) includes Ṣifīn and Ruṣāfat Hishām, which, as he knew occupied the site of a Greek city, in the district of Bālis, while Ḥādjidjī Khalīfa (Stambul 1145, p. 593) includes Bālis and al-Ruṣāfa in the province of Kinnasrīn with Ḥalab as capital.

The imposing ruins of the town date almost entirely from ancient times. They have in modern times been several times surveyed, thoroughly examined and fully described.

RUSČUK, capital of a district and port on the Danube in Bulgaria (often wrongly written and pronounced Ruščuk) in Bulgarian Ruse (*Pyce*; Roussé), is situated at the junction of the eastern Lom (Turk. *Kara Lom*) and the Danube, here 1,400 yards wide, opposite Giurgiu (Gjurgjevo, Turk. *Yer Kökfi*), in part high on the loess plateau, on the state railway from Ruščuk to Varna (since 1866) and Ruščuk to Tirnovo and is one of Bulgaria's nine ports on the Danube (with about 50,000 inhabitants).

After the decay of the mediæval Červen some 15 miles inland, which survived as the name of a Bulgarian eparchy and the ruins of which could still be seen in the xviiith century (cf. *Hādjdji Khalifa, Rumeli und Bosna*, transl. J. von Hammer, Vienna 1812, p. 44), the new Ruse arose on the Danube half a day's journey away. The Turkish name Ruščuk, by which the town is still almost exclusively known outside of Bulgaria, is undoubtedly a diminutive from Ruse (Ruse = Rus-čuk; cf. the name of the island of Rhodes, Turk. *Rodos* and *Rodos-čik* for *Rodosto*; q. v.), but only seems to have come into being in the first third of the seventeenth century. In the two treaties concluded between the Porte and Hungary on Aug. 20, 1503 (cf. J. v. Hammer, *G. O. R.*, II, 331 sq. and the text on p. 618: *Rwcz* = Ruse) and April 1, 1519 (cf. Theiner, *Monumenta Hungarica*, II, 624: *Kusly for Russy*) and in Mercator's map of 1584 the Bulgarian form still appears. The town must have already attained considerable prosperity in the xviith century. It quickly developed under Turkish rule and became an important centre of traffic, trade, industry and strategy in Danubian Bulgaria and surpassed the two fortified towns of Nicopolis [q. v.] and Silistria which played the leading part there at the beginning of Ottoman rule (cf. A. Iširkov, *Bulgarien, Land und Leute*, Leipzig 1917, II, 102 sq.). The French traveller Pierre Lescapier, who reached Ruščuk on June 14, 1576, in his valuable journal, which has only been published in part, describes *Rusci* as a populous town: *ceste ville est peuplée et y a quantité de marchandise de toutes sortes et des vivres en abondance et à bon pritz* (cf. *Revue de l'Histoire diplomatique*, vol. xxxv., Paris 1921, p. 46). Shortly before, the famous Ottoman architect Sinān [q. v.] built a mosque there for the grand vizier Rustem Pašha [q. v.] still admired in the xviiith century, presumably in the north at the water's edge. The figure given for the population as for mosques varies; of the latter Ruščuk had at one time a considerable number. The Franciscan Peter Bogdan Bakšić, later archbishop of Sofia, in 1640 found in *Ruhcich* 3,000 Turkish houses with 15,000 inhabitants and 10 mosques of stone (*fatte die pietra bianca*), and 200 Armenian houses with over 1,000 inhabitants and a citadel with five towers (cf. Eug. Fernendžin, *Acta Bulgariae ecclesiastica* = vol. xviii. of the *Monumenta spectantia historiam Slavorum meridionalium*, Agram 1887, p. 74). In 1659 Filip Stanoslavov counted 6,000 Turkish wooden houses with over 30 mosques (*ibid.*, p. 263; cf. also p. 7, 10, 26, 31, 88, 137, 299 [*Russi o*

Ruhcich: 1685], 300 with further particulars). Ewliyā Čelebi (*Seyāhetnāme*, III, 313 sq.; cf. the Bulgarian transl. by D. G. Gadžanov, in *Periodičesko spisanie na bŭlgarskoto kniževno društvo v Sofija*, vol. lxx., Plovdiv 1909, p. 654 sq.) about the same time mentions 2,200 houses of wood, also three Christian quarters, the mosque of Rustem Pašha, baths and three caravan-serais in "Uruschuk". The only Jews, he says, were those who visited the place on their trading journeys. The people, whom he praises for their hospitality, lived by commerce and spoke Bulgarian as well as the "language of Wallachia and Moldavia". Ewliyā Čelebi says the pumpkin (*kawun*) there was particularly good, 10 being sold for 1 *pen(e)* (5 of which = 1 Vienna groschen or 3 kreuzers, 150 = 1 taler).

Ruščuk is regularly mentioned in the many records of travel on the Danube in the following centuries. References to the town in the xviiith and first half of the xixth century are in general agreement. The inhabitants seem at all times to have conducted a busy trade in wool, cotton, silk, leather and tobacco, which at an earlier period was for a considerable part in the hands of Ragusan merchants, who had a settlement there from 1673 to 1755. The English clergyman R. Walsh (1827) estimated the population at 18—20,000 souls. The streets of the town, which was surrounded by walls on three sides after the manner of Turkish fortresses, as a rule sloped steeply to the Danube which part was partly undefended. Turks, Greeks, Bulgars and Armenians lived in some 7,000 houses and conducted a busy trade with Turkey (cf. R. Walsh, *Narrative of a Journey from Constantinople to England*², London 1828, p. 207). Helmuth v. Moltke who visited Ruščuk in 1835 and described it (cf. *Briefe über Zustände und Begebenheiten in der Türkei*³, Berlin 1877, p. II sqq., 132 sqq., 424 sqq.) was surprised that "this important Turkish fortress with its long, dominated and enfiladed lines without outer works, half armed and defectively planned" could offer the enemy such resistance. As an important frontier fortress Ruščuk suffered a great deal in course of centuries. Sieges, conflagrations and bombardments (the last by the Rumanians during the world war on Aug. 28, 1916) continually altered the appearance of the town which with its regular streets and large open spaces no longer has anything of an oriental appearance. In the Turkish period Ruščuk was the residence of a sandjak-bey, at one time of a pašha (about 1840, when Bulgaria was divided into the three pašhalihs of Ruščuk, Vidin and Silistria), until in 1864 it became the capital of the new Danube wilāyet (*Ṭūna wilāyet*) with the so-called *livāṭ*'s of Ruščuk, Varna, Vidin, Tulča, Tirnova (Tirnovo), Sofia and Niš, created and administered by the reformer Midhat Pašha [q. v.] and formed out of the *eyālets* of Silistria, Vidin and Niš [q. v.]. A special printing press was instituted and in addition to a newspaper a *salnāme* (*Ṭūna Wilāyet* *Sālnāmes*) annually published, which gives a good survey of the administrative measures. After the devastation wrought in the Russo-Turkish wars of 1811 and 1828, Ruščuk attained new prosperity as the official residence of a governor (*wāli*). In 1854 Boucher de Perthes estimated that Ruščuk had about 30,000 inhabitants in 4,000 houses (cf. *Voyage à Constantinople*, vol. II., Paris 1855, p. 413 sq.); the German physician C.

W. Wutzer who became acquainted with Rusčuk in the governor-generalship of Sa'īd Mehmed Pašha, thought that the population was only 24—25,000. The number of mosques in Rusčuk is very variously given by travellers. In 1840 F. Hackländer says 29, C. W. Wutzer in 1856 only 16. The fact is that many mosques were destroyed in the fighting. Nowadays (1935) Rusčuk has 19 mosques (*džamā'at*), 9 small mosques (*masājid*) and the monastery of the *Shādhilī* darwishes founded in 1252 (1836). While in the great battle that raged on July 4, 1811 around Rusčuk the fortune of war decided in favour of the Turks under the grand vizier Aḥmad Pašha, and the Russians under Kutusov blew up the defences of the stronghold and retired across the Danube after setting the whole town on fire, in the Russo-Turkish war of 1877—1878 on Feb. 21, 1878, the Ottomans under Kaiseriḥ Aḥmad Pašha had to surrender the town and fortress to the Russians after a long siege. The defences, renewed for the last time in 1877, were razed to the ground in 1881. Since that date the town has been a Bulgarian possession.

Rusčuk was the birth-place of the grand vizier Čelebi-zāde Sherif Hasan Pašha (d. 1205 = 1791; q. v.), of the *kiatib* Amānī Čelebi (d. 1000 = 1591, according to J. v. Hammer, *Geschichte der Osmanischen Dichtkunst*, iii. 83) and of the famous Ottoman author Aḥmad Sharif Ḥasan Midḥat Bey (1841—1912; cf. F. Babinger, *G.O.W.*, p. 389 sq.).

(FRANZ BABINGER)

RUSTAMIDS, a dynasty of Ibādī Khāridjis of Tāhert. The first of the Rustamid imāms, 'Abd al-Raḥmān b. Rustam, of Persian origin, had been made governor of Kairawān when the Khāridjī Berbers of the Djebel Nefūsa, led by Abu 'l-Khaṭṭāb al-Ma'fārī [q. v.] seized the town in 141 (758). Three years later (144 = 761), Muḥammad b. al-Ash'ath at the head of a strong Arab army recaptured Kairawān. Ibn Rustam fled to the west and founded Tāhert [q. v.] in a region where the Khāridjis must already have been very numerous. Fifteen years later, the Ibādīs conferred the imāmate upon him. Six members of the same family in turn succeeded him. The chronology of their reigns is however rather uncertain. With certain gaps it may be arranged as follows:

'Abd al-Raḥmān b. Rustam 160—168 (776—784)
'Abd al-Wahhāb b. 'Abd al-Raḥmān 168—208 (784—823)
Abū Sa'īd al-Aflāḥ b. 'Abd al-Wahhāb 208—258 (823—871)
Abū Bakr b. al-Aflāḥ, dethroned 258—? (871—?)
Abu 'l-Yaḳzān Muḥammad b. al-Aflāḥ ?—281 (?—894)
Abū Ḥātim Yūsuf b. Muḥammad, dethroned 281—? (894—?)
Ya'qūb b. al-Aflāḥ, dethroned. ?
Abū Ḥātim Yūsuf, restored ?
Ya'qūb b. al-Aflāḥ, restored 294—296 (906—908)

The history of the foreign relations of the Rustamids, all that authors like Ibn Khaldūn, Ibn 'Idhārī or al-Bakrī, knew of them, is limited to a few facts. Although the kingdom of Tāhert was surrounded by enemies (the territory of the Aghlabids of Kairawān included the Zāb [q. v.] and the Idrisids of Fās were suzerains of Tlemcen [q. v.]), its existence was not directly threatened for 150 years. We find the second imām, 'Abd al-Wahhāb, associated in the attack by the Khāridjī Berbers (Huwwāra and Nefūsa) on the town of Tripoli which was under the Aghlabid amirs. At the same time the Rustamids, who could not recognise the 'Abbāsīd caliphate and had to defend themselves against the Aghlabids who were vassals of Baghdād, seem to have sought the friendship of the Umayyads of Cordova. Ibn 'Idhārī under 207 (822) mentions the magnificent reception given by the Umayyad 'Abd al-Raḥmān II to an embassy from Tāhert which included the son of the imām 'Abd al-Wahhāb. We also know that this Umayyad had a Rustamid among his viziers (information supplied by E. Lévi-Provençal) and that in 239 (853) al-Aflāḥ received a present of 100,000 dirhems from the

Umayyad Muḥammad I. The reign of this imām al-Aḫḫāḥ saw a conflict between the Rustamids and the Berbers of the region of Tlemcen, partisans of the Idrisids of Fās, in which Tāhert was victorious. Lastly we know how in 296 (908) the kingdom of Tāhert collapsed in a few days before the onslaught of the Kutāma Berbers led by the Shīʿī missionary Abū ʿAbd Allāh [q. v.]. Several Rustamids were put to death and their heads sent to Raḡḡāda and carried through the streets of ʿAīra-wān. Others, among whom according to some authors were the imām Yaʿqūb and his son Abū Sulaimān, were able to escape and reach the oasis of Wargla.

What is of more importance than the relations with the other powers of Spain and Barbary, is the internal life of the Rustamid state which our usual sources ignore but of which we get a glimpse from Ibādī chroniclers like Abū Zakāriyāʾ.

Although hereditary, the succession of imāms was in theory regulated by the vote of the Ibādī community. The imām, regarded as the most worthy, most honourable and best educated man, the temporal and spiritual chief of the state, whose prestige extended to the communities in the east, was in reality under the control of the religious caste: *shurāt*, *mashāʾikh*, *ṭalaba*, the guardians of the strict observance of the laws of the sect.

In a theocratic state of this kind, crises naturally took the form of schisms. The most serious took place during the reign of the second imām, ʿAbd al-Waḥḥāb. At the instigation of a rejected candidate for the imāmate a group of malcontents demanded that the elected imām should rule with the control of a regular assembly. This innovation was put to the Ibādī doctors in the east, who rejected the principle completely. The advocates of the reform separated from the community and formed the sect of the Nukkārīs [q. v.].

A second schism took place in the region of Tripoli on the death of a governor of the province and the question of his successor designated by the imām of Tāhert.

Crises no less serious which seem however to have been more of the character of dynastic rivalries disturbed the peace of Tāhert from the fourth imāmate. The claimants to the throne gained the support of an opposition formed of diverse elements. No less than the religious prestige of the imāms, the resources of the region and the activity of its commerce attracted to Tāhert foreigners from Persia, the ancestral home of the Rustamids, or from different parts of Barbary, Arabs from Ifriḡiyya, Nafūsa from Tripolitania, and Christian Berbers. The Zenāta nomads of Ifriḡiyya and the Central Maghrib frequented its markets and grew rich in them. Among these heterogeneous groups, some, like the Nefūsa, Persians and Christians, showed themselves regularly the supporters of the established authority; while others, the Arabs in particular, and very often the nomads, were disposed to encourage the ambitions of pretenders.

Exposed to the troubles stirred up by its guests and its neighbours, this ideal state had then a somewhat agitated existence. The dynasty included able politicians, like al-Aḫḫāḥ who, using the maxim *divide et impera*, secured peace and whose reign marks the apogee of Rustamid power. Several Rustamids were learned imāms, caring less for their tasks as rulers than for theological speculations, not to mention profane studies like astronomy. Their

surprising tolerance of foreigners, even those hostile to the sect, encouraged the entrance of dissident elements into the administration and prepared the way for the collapse of Tāhert and the annexation of the kingdom by the victorious Shīʿīs.

(GEORGES MARÇAIS)

RUSTEM PASHA, Ottoman grand vizier and historian, was born in 1500 in the vicinity of Sarajevo (q. v.; cf. the report of the Bailo B. Navagero in Albèri, *Relazioni degli ambasciatori veneti al senato*, ser. iii., vol. 3, p. 89: *d'un casale appresso il serraglio da Bosna*, i. e. Bosna-Serāy), either in Botomir or perhaps on the western border of Sarejevsko polje (cf. Č. Truhelka, in *Bosnische Post*, Sarajevo 1912, N^o. 80, who comes to this conclusion because Rustem Pasha built a bridge with 15 arches over the Željeznica of which remains still exist), of parents probably originally Christian. In a *sidjill* of the Sheriʿat court in Sarajevo, "Nefisa Khanum, daughter of Muṣṭafā and sister of Rustem Pasha" in the middle of Shaʿbān 964 (June 1557) sold through her agent Ḥādīdī ʿAlī Beg b. Khair al-Dīn, *mütevellī* of Rustem Pasha's *beziştān* in Sarajevo, her house there; this gives the name of the father Muṣṭafā. The family are said to have been originally called Opuḳović while Č. Truhelka, *op. cit.*, says the name was Čigalić. The local tradition of Sarajevo knows Nefisa Khanum as a sister of Rustem Pasha and daughter of a Muṣṭafā Beg or Pasha. Rustem Pasha's brother was the *kapudan pasha* (q. v.; grand admiral) Sinān Pasha. As a boy Rustem entered the school for pages in Stambul and then the service of the court. He became stirrup-holder (*riḳābdār*; q. v.), gained the favour of the sultān and was appointed governor of Diyārbakr [q. v.], later of Anatolia. In 1533 he became third and in 1541 second vizier. On Dec. 1, 1544 he received the imperial seal for the first time. In 1553 at his own request Rustem Pasha was relieved of office and retired to Scutari where his wife Mihr-i Māh [q. v.], a daughter of Sulaimān I Ḳānūnī [q. v.], had built a palace. But by 1555 he was again grand vizier, and held this office until his death in July 10, 1561 (28th Shawwāl 968; of the various dates given, this must be the right one; J. H. Mordtmann, in *M. S. O. S.*, xxxii./2 [1929], 38, however, gives the 26th Shawwāl 978 [July 8, 1561] as the day of his death). He was buried in his own splendid *türbe* in Stambul beside the Shah-zāde mosque (cf. *Ḥadiḳat al-Wuzarāʾ* p. 28 sqq.

and Ḥusain b. Ismā'il, *Ḥadīkat al-Diawāmi*, i. 16; wrongly in *Sidjill-i 'othmāni*, ii. 378). In addition to the many buildings, notably mosques, which he erected with his vast wealth in various parts of the empire and for which he employed the great architect Sinān, Rustem Pasha made a reputation for himself by a chronicle of the Ottoman empire, *Tawārikh-i Āl-i 'Othmān*, which goes under his name. In the completest version that has survived, it comes down to 968 (1560—1561). The narrative, as regards the earlier period, closely follows the anonymous *Tawārikh-i Āl-i 'Othmān* and the Annals of Muḥyi al-Dīn Djemālī and Neshri [q. v.]. It is only from the reign of Mehmed II the Conqueror, that it shows a certain independence, although perhaps here also an original source may be found. It only becomes important when it describes the events of his time. Although Rustem Pasha is known to have encouraged historical studies (cf. F. Babinger, *G.O.W.*, p. 82, note), it is by no means certain whether he is himself the author of the Chronicle that bears his name or whether he only had it compiled. A German translation of part of it was published by Dr. Ludwig Forrer under the title *Die osmanische Chronik des Rustem Pascha in der Türkische Bibliothek*, xxi. (Leipzig 1923; cf. thereon *O.L.Z.*, xxviii. [1925], p. 246 sq.; *Isl.*, xvi. [1925], p. 154 sqq., and *Hist. Zeitschrift*, vol. cxxviii. [1928], p. 571 sq.).

(FRANZ BABINGER)

RÜYÂN, a district comprising the western half of Māzandarān [q. v.].

Iranian tradition. According to Darmesteter, *Avesta*, ii. 416, Rūyān corresponds to the mountain called *Raodita* ("reddish") in *Yasht*, 19, 2, and *Rōyishn-ōmand* in *Bundahishn*, xii. 2, 27 (transl. West, p. 34). Birūnī, *Chronologie*, ed. Sachau, p. 220, makes Rūyān the scene of the exploit of the archer Arīsh (cf. Zāhir al-Dīn, p. 18 [*Yasht* 8, 6, in this connection mentions the hill Aryō-xshnā]). In the letter addressed to the mobad Tansar by king *Gushnaspshāh (iiird century A.D.?), the latter claims to be lord of Ṭabaristān, Patishxwār-gar, Gilān, Dailamān, Rūyān and Damāwand.

Geography. According to Ibn Rusta, p. 150, and Ibn al-Faḳīh, p. 304 [the latter cites Balādhuri as authority, but the passage is lacking in the *Futūḥ al-Buldān*], Rūyān was at first an independent *kūra* attached to Dailam. It was conquered by 'Omar b. al-'Alā' (after 141 = 758) who built a town there with a *minbar* and attached it to Ṭabaristān. Rūyān comprised an extensive area the districts of which lay between two mountains [Ibn al-Faḳīh: "between the mountains of Rūyān and Dailam"]; each township could supply from 400 to 1,000 soldiers [Ibn al-Faḳīh: in all 50,000]. The *kharaḍj* levied on Rūyān by Ḥārūn al-Rashid

was 400,050 dirhams. The town of Rūyān called Kadjdja was the headquarters of the *wālī*. Rūyān was near the mountains of Raiy and was reached via Raiy. The text of the two authors above quoted suggests that between Rūyān and unsubjected Dailam was a region which formed the military zone from which operations were conducted against Dailam. To this zone belonged Shālūs (*Čālūs), a town called *al-Kabira* [situated opposite Kadjdja], another (?) town called al-Muḥdatha and lastly Muzn. [But on these frontiers see the *Ḥudūd al-'Ālam* and Zāhir al-Dīn].

Iṣṭakhri, p. 206, enumerates the mountains of "Dailam" [in the broad sense] as the following: Djibāl Qarin, Djibāl *Fādhūsban and Djibāl al-Rūbandj (according to Barthold: *al-Rūyandj = Rūyān). In these last named highlands there were formerly kingdoms (*mamālik*); in the part adjoining Ṭabaristān the kings were of Ṭabaristān and in the part adjoining Raiy they were of Raiy.

According to the *Ḥudūd al-'Ālam* (written in 372 = 982, ed. Barthold, fol. 30^a), Nātil (according to Iṣṭakhri, p. 217: one marḥala west of Āmul) Čālūs, Rūdhān (= Rūyān) and Kalār (west of Čālūs) formed a province of Ṭabaristān but the authority there belonged to a king named Ustundār. Rūdhān produced red woollen materials for water-proofs and blue *gilīm* (a kind of carpet material).

Rustamdār. From the Mongol period we find the geographical term *Rustamdār*. According to the *Nuzhat al-Kulūb*, p. 161, the greater part of its territory was irrigated by the Shāh-rūd (!) and the *Ta'rikh-i Khānī*, ed. Dorn, p. 298, says that Ṭalākān (on the upper Shāh-rūd) adjoined Rustamdār. On the other hand, Zāhir al-Dīn gives the term a larger connotation and uses it sometimes as a synonym of Rūyān and sometimes with a special meaning. An examination of the passages leads R. Vasmer, *op. cit.*, p. 123—124 to the conclusion that Rustamdār in the proper sense was situated towards Kudjūr and Kalār while Rūyān primarily meant the country between Rustamdār and Qasrān (i. e. the country towards Raiy). According to Zāhir al-Dīn (p. 19—20), the eastern frontier of Rustamdār was originally at Si-sangān (near the mouth of the river of Kudjūr), but in the time of the Saldjūk Sandjar was brought back to Alīsha (near Āmul?); the western frontier was at first at Malāt (near Lengerūd in Gilān), but in 590 (1193) was brought back to Sakhtsar (on the eastern frontier of Gilān) and in 640 (1242) at Namak-āwa-rūd (west of Kalārastāk). It is curious that Zāhir al-Dīn, p. 17 seems to place the "town of Rūyān" (Kadjdja of Ibn Rusta) at Kudjūr but the passage is not very explicit and the legend of the foundation of the town given by Zāhir al-Dīn may belong to a period before the appearance of the term Rustamdār.

The princes of Rūyān. The title attested for the dynasty is Ustundār (perhaps **Ustan-dār* < *Ōstān-dār*; cf. Ṭabari, i. 2638). It is not clear if the dynasty also took the title of *pādshāspān* (< *pātḡspān*) which in Sāsānian terminology was at first borne by the viceroys of the four great divisions of the empire, the prerogatives of which were lessened in time by the increase in power of the military commanders (*sipāhbadh*; cf. Christensen, *L'empire des Sāsānides*, p. 41, 43). The fact is that in the passage in Iṣṭakhri, p. 206, the mountain of *Fādhūsban is mentioned separately and, it seems, to the east of *Rūyandj but it is possible that the

two names only mean the two parts of "Rūyān" which at this time were under Ṭabaristān and Raiy respectively. In any case, in the genealogy of the Ustundār (Zahīr al-Dīn, p. 146—154 and 320—321), Pādūspān appears as the personal name of the eponymous founder and of certain princes only. The eponym Pādūspān (towards the end of the viith century?) was regarded as one of the three sons of Gil-Gaubāra, a descendant of the Sāsānian Djamasp (who reigned 497—499). Towards the beginning of the xth century (Iṣṭakhri, p. 206 [see above]), the dynasty seems to have passed through a crisis which it survived. After the death of Djalāl al-Dawla Kayūmārth b. Bisūtūn b. Gustahm in 857 (1453) his possessions were divided between his two sons: the line of Kā'ūs reigned in Nūr, in the valley of the left bank tributary of the river of Āmul (Haraz-pey), and that of Iskandar at Kudjūr, on the northern slopes of the mountains of Nūr.

On the feudal wars in Māzandarān see Zahīr al-Dīn, ed. Dorn, index. The princes of Rustam-dār retained their autonomy down to the time of the Ṣafawids. In 947 (1540) the expedition of Shāh Tahmāsp against Malik Djahāngir b. Malik Kā'ūs who had shut himself up in the fortress of Lāridjān, was a failure (cf. *Aḥsan al-Tawārikh*, ed. Seddon, p. 299). In 997 (1589) the maliks Djahāngir b. 'Aziz of Nūr and Djahāngir b. Muḥammad of Kudjūr came to pay homage to Shāh 'Abbās but finally in 1003 (1594) they were both dispossessed of their lands: the ruler of Nūr submitted voluntarily while he of Kudjūr was seized by force (cf. *Ālam-ārā*, p. 265, 334, 354—357).

The Rhode Island School of Design (U. S. A.) possesses a sarcophagus of wood originally placed over the tomb of the Imām-zāda Abu 'l-Kāsim b. Mūsā al-Kāzīm by *al-malik al-a'zam iftikhār mulūk al-'adām malik Djalāl al-Dīn Gustahm b. al-marḥūm Malik Ashraf Ustundār* dated Ramaḍān 877 [or 879?] = Feb. 1473 (cf. *Catalogue of the International Exhibition of Persian Art in London, 1930—1931*, No. 141). This prince must be added to Justi's list. Perhaps the sarcophagus comes from the sanctuary of Ibn Imām Mūsā in the valley of Lār, i. e. immediately south of Nūr (cf. Rabino, *op. cit.*, p. 115 and the map: on the road from Baladeh to Teherān [via Afēa]).

The names of the carpenters are Aḥmad and Ḥusain (?) b. Ḥasan (?), cf. the name of Aḥmad b. Ḥusain who carved a gateway at Bārfurūsh in 870, Rabino, *op. cit.*, p. 14, and *ibid.*, p. 10, Ḥusain b. Aḥmad who carved the gate of Buland-Imām, near Ashraf, dated 873 (1468).

RUZZĪK B. ṬALĀT' AL-MALIK AL-'ĀDIL, BADR AL-DĪN ABŪ SHUDJĀ' MAJID AL-ISLĀM, Fātimid wazīr, of Armenian origin, succeeded his father Ṭalāt' [q. v.] after the latter's assassination on 20th Ramaḍān 556 (Sept. 12, 1161), and remained in office for fifteen months. The only event of importance during this period was a Berber invasion in 557 (1162) under Ḥusain b. Nizār [see NIZĀR B. AL-MUSTAṢIR], who was captured and put to death. Ruzzik inherited the literary tastes of his father and is said to have governed well, but when, in the same year, he attempted to remove his rival Shāwar [q. v.] from the governorship of the Upper Ṣā'id, the latter, encouraged by the Caliph al-'Ādīd [q. v.], rebelled and marched on Cairo. The wazīr, deserted by his partisans [see DIRGHĀM], fled from the city (18th Muḥarram 558 = Dec. 29, 1162) but was betrayed, and executed by Taiy b. Shāwar. The historian al-Maḥrizī remarks (*Khiṭaṭ*, ii. 207—208) that Ruzzik was the last holder of the office of *nāẓir al-maẓālim* in the Fātimid period.

Art. MUHR

*) slightly enlarged

Seals of various individuals, Ottoman,
Algerian and Hidjarian
(beginning of the sixteenth century).

1. Giritli İbrâhîm Agha, *wakil* of Algiers at Chios. Document of 11 Muh. 1211 (July 17? 1796).
2. Esmâ Sultân, sister of Maḥmūd II. 11 Ram. 1222 (November 12? 1807).
3. Mūsâ Pasha, *kā'immaḥkām* or grand vizier interim. 8 Shaw. 1222 (December 9, 1807).
4. Selim Thābit, correspondent of Mehmed 'Alī at Constantinople, later his *kapu-kiehyası*. 13 Saf. 1225 (March 20? 1810). Cf. N^o. 18.
5. Kāsim Agha, chief eunuch. 19 Rab. II 1225 (May 24, 1810).
6. Ghālib, *Sherif* of Mecca. 20 Shaw. 1226 (November 7, 1811).
7. Kara Kiehya, banker to Mehmed 'Alī at Constantinople (seal in Armenian characters). 21 Djum. II 1226 (July 13? 1811).
8. Mehmed 'Arif Efendi, former *sheikh-ül-islām*. 9 Saf. 1227 (Feb. 21? 1812).
9. Mehmed Sa'id Khālet, Minister of the Interior. 23 Djum. II 1227 (July 4? 1812).
10. Shākir Aḥmad, *kā'immaḥkām*. 28 Djum. II 1227 (July 8? 1812).
11. Mehmed Khusrav Pasha, *kapudan-pasha* (at this date). 15 Saf. 1228 (Feb. 17? 1813).
12. Tosun Aḥmad Pasha, son of Mehmed 'Alī. 12 Muh. 1228 (Jan. 15? 1813).
13. Mehmed Nedjib Efendi (later Pasha), *kapu-kiehyası* of Mehmed 'Alī at Constantinople (later *wālī* of Syria, for Mehmed 'Alī). 3 Rab. I 1228 (March 6? 1813).
14. Ismā'il Pasha, son of Mehmed 'Alī. 9 Djum. I 1228 (May 10, 1813).
15. Khurshid Aḥmad Pasha, grand vizier. 18 Djum. I 1228 (May 19, 1813).
16. al-Saiyid Aḥmad b. Muḥammad, *khaẓnadji* of Algiers 1237 (1821—1822).
17. Sarf Aḥmad, *wakil al-haramain el-sharifain* at Medea. 3 Shaw. 1241 (May 11? 1826).
18. Selim Thābit, as *wakil* of Algiers at Constantinople. 7 Shaw. 1242 (May 4? 1827. Cf. N^o. 4: same seal, but on this impression the signature of the engraver 'Ömer appears clearly under the fleuron on the left).
19. al-Saiyid Khalil, *wakil* of Algiers at Smyrna. End of Ram. 1243 (April 15, 1828).
20. Mustafā Kapudan, commander of the Algerian frigate Miftāḥ al-Djihād. 22 Saf. 1244 (Sept. 14? 1828).
21. Mehmed 'Izzet Pasha, grand vizier (great seal). 7 Sha'b. 1244 (Feb. 12? 1829).
22. Sulaimān Ismā'il, *gümriük emini* and *wakil* of Algiers at Durazzo. 7 Ram. 1244 (March 13? 1829). To left under the fleuron: signature?
